RE: Cultural Resource Constraints Analysis for the Calimesa Zoning Overlay Program
Environmental Impact Report Project, City of Calimesa, Riverside County, California

Dear Ms. Standerfer:

This letter report, prepared by Applied EarthWorks, Inc. (Æ) on behalf of Albert A. Webb Associates, summarizes the results of the cultural resource constraints analysis for the Calimesa Zoning Overlay Program Environmental Impact Report (PEIR) Project (Project) in the City of Calimesa (City), Riverside County, California (Figure 1).

The proposed Project involves 37 parcels in which a zoning overlay will be created to allow the City to increase development. The Project is located within Sections 13, 14, and 24, Township 2 South, Range 2 West, and Sections 18 and 30, Township 2 South, Range 1 West, San Bernardino Baseline and Meridian, as shown on the El Casco, California 7.5-minute U.S. Geological Survey (USGS) topographic quadrangle maps (Figure 2).

CULTURAL RESOURCE RECORDS SEARCH AND LITERATURE REVIEW

California Historical Resource Information System staff conducted an archaeological literature and records search at the Eastern Information Center (EIC), housed at the University of California, Riverside on June 6, 2021, and at the South Central Coastal Information Center (SCCIC), housed at the California State University, Fullerton on November 9, 2021. The objective of these record searches was to determine whether any prehistoric or historical cultural resources have been recorded previously within the Project area surrounded by a one-half-mile-wide buffer zone (Study Area). The record searches indicated 67 cultural resource investigations have been conducted previously within the Study Area (Table 1). Eleven of these investigations specifically involved portions of the Project area. As a result, approximately 15 percent of the Project area has been previously studied.

These previous investigations resulted in the identification of a total of 26 cultural resources in the Study Area (Table 2). Sixteen are archaeological and 10 are built environment resources. The prehistoric archaeological resources include isolated metates, artifact and lithic scatters, and a habitation site. The historic period archaeological resources include isolated glass fragments, refuse scatters, foundations, water features, and structural remnants. The 10 built environment resources include historical houses and segments of transmission lines. None of these resources are documented within the Project area.

36-012606	CA-SBR-12333		Prehistoric lithic scatter
Isolated Prehistoric Finds			
36-002624	CA-SBR-2624		Prehistoric isolated metates
Historical Archaeological Sites			
33-004115	CA-RIV-4115H		Historical structural remnants: 3 concrete foundations, corrugated metal scatter, concrete well platform
33-010794			Historical collapsed wooden shed
33-013995			Historical structural remnants: 2 concrete foundations and parking apron
33-014866	CA-RIV-7921H		Refuse scatter consisting of 1930s auto fender and car seat springs, concrete building pier, and sheet metal
33-014869	CA-RIV-7924H		Historical refuse scatter
33-014870	CA-RIV-7925H		Historical structural remnants: cinderblock wall, water tank, paved drive, and landscaping
		AE-3997-01H	Historical structural remnants: concrete foundations
36-012607	CA-SBR-12334H		Historical reservoir and associated features (circa 1935)

**Table 2
Cultural Resources within the Study Area**

Primary	Trinomial	Temp Number	Description
36-012608	CA-SBR-12335H		Historical pump house
36-022623	CA-SBR-14397H		Historical refuse scatter
Isolated Historical Finds			
33-015299			2 sun-colored amethyst glass fragments
Built Environment			
		APN 413-270-014	Historical built environment farm complex
33-013721			Historical residence constructed circa 1950 (34990 Woodhouse Road)
33-015035			Devers-San Bernardino 220kV Transmission Line
33-015300			Historical 1940s electrical utility line
33-016792			Historical residence and barn constructed circa 1929 (1118 7 th Street)
33-016793			Historical residence and outbuildings constructed circa 1910s (726 W. Ave L)
33-017258			Historical residence constructed between 1946–1962 (946 7 th Place)
33-022389			Devers-Vista #1 220kV Transmission Line
33-023900			Concrete storm drain
33-029055			Historical residence constructed circa 1940 (727 West County Line Road)

In addition to the EIC and SCCIC research, Æ also consulted the 1901 Elsinore 30-minute USGS topographic quadrangle map, the 1942 Perris 15-minute USGS topographic quadrangle maps, and the 1953 and 1967 El Casco 7.5-minute USGS topographic quadrangle map to assess historical land uses in the Study Area. The 1942 Perris 15-minute USGS topographic quadrangle map exhibits multiple structures within the northern Project area. The same structures, plus structures in the southern Project area are also on the 1953 and 1967 El Casco 7.5-minute USGS topographic quadrangle map.

SACRED LANDS FILE SEARCH

Æ contacted the Native American Heritage Commission (NAHC) on April 6, 2021, for a review of the Sacred Lands File (SLF) to determine if any known Native American cultural properties (e.g., traditional use or gathering areas, places of religious or sacred activity) are present within or adjacent to the Project area. The NAHC responded on April 21, 2021, stating the SLF search was completed with negative results. The NAHC provided a list of Native American individuals and organizations for follow-up to elicit information and/or concerns regarding cultural resource issues related to the Project, if any. Results of the NAHC SLF search and Native American contact list are included in Attachment 1.

MANAGEMENT RECOMMENDATIONS

The records search results indicate only a small portion of the Project (approximately 15%) has been previously studied. As such, the presence or absence of archaeological resources within the Project area is not known. In addition, a review of historical maps and current aerial images revealed multiple structures more than 50 years of age within the Project area. The proposed Project includes a PEIR for a

zoning overlay in the City; therefore, no development is proposed. However, if the zoning overlay is approved and future development proposed, a complete cultural resource assessment of the Project, including an archaeological pedestrian survey and documentation and evaluation of structures 50 years of age or older, is recommended prior to development.

If you have any questions or concerns regarding the information provided above, please feel free to contact me at (951) 766-2000.

Best regards,

Joan George, B.S., RA (28093)

Re: Native American Tribal Consultation, Pursuant to the Assembly Bill 52 (AB 52), Amendments to the California Environmental Quality Act (CEQA) (Chapter 532, Statutes of 2014), Public Resources Code Sections 5097.94 (m), 21073, 21074, 21080.3.1, 21080.3.2, 21082.3, 21083.09, 21084.2 and 21084.3, Calimesa Zoning Overlay Program Environmental Impact Project, Riverside County

Dear Ms. Abdo:

Pursuant to Public Resources Code section 21080.3.1 (c), attached is a consultation list of tribes that are traditionally and culturally affiliated with the geographic area of the above-listed project. Please note that the intent of the AB 52 amendments to CEQA is to avoid and/or mitigate impacts to tribal cultural resources, (Pub. Resources Code §21084.3 (a)) ("Public agencies shall, when feasible, avoid damaging effects to any tribal cultural resource.")

Public Resources Code sections 21080.3.1 and 21084.3(c) require CEQA lead agencies to consult with California Native American tribes that have requested notice from such agencies of proposed projects in the geographic area that are traditionally and culturally affiliated with the tribes on projects for which a Notice of Preparation or Notice of Negative Declaration or Mitigated Negative Declaration has been filed on or after July 1, 2015. Specifically, Public Resources Code section 21080.3.1 (d) provides:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The AB 52 amendments to CEQA law does not preclude initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction prior to receiving requests for notification of projects in the tribe's areas of traditional and cultural affiliation. The Native American Heritage Commission (NAHC) recommends, but does not require, early consultation as a best practice to ensure that lead agencies receive sufficient information about cultural resources in a project area to avoid damaging effects to tribal cultural resources.

The NAHC also recommends, but does not require that agencies should also include with their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential effect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:

- A listing of any and all known cultural resources that have already been recorded on or adjacent to the APE, such as known archaeological sites;
- Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
- Whether the records search indicates a low, moderate, or high probability that unrecorded cultural resources are located in the APE; and
- If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.

2. The results of any archaeological inventory survey that was conducted, including:

- Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code section 6254.10.

3. The result of any Sacred Lands File (SLF) check conducted through the Native American Heritage Commission was negative.

4. Any ethnographic studies conducted for any area including all or part of the APE; and

5. Any geotechnical reports regarding all or part of the APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS are not exhaustive and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance, we can assure that our consultation list remains current.

If you have any questions, please contact me at my email address: Andrew.Green@nahc.ca.gov.

Sincerely,

Andrew Green
Cultural Resources Analyst
