

Proposed 2022/23 Operational Action to Reposition Storage – DVL to Mills

Deliver MWD water from Diamond Valley Lake to MWD’s Mills Treatment Plant via DWR’s Santa Ana Valley Pipeline

Purpose: Helps Metropolitan preserve SWP storage in carryover, which can be delivered to all parts of Metropolitan’s service area and helps maximize SWP storage going into 2022.

Amount: Up to 100,000 acre-feet.

Timeframe: 04/01/22-03/31/23

Operations: Flow of water would be from Diamond Valley Lake to the Inland Feeder to the Lakeview Pipeline (via interconnection) to the Perris Bypass Pipeline to DWR’s Santa Ana Valley Pipeline to the Box Springs Feeder turnout to Mills Treatment Plant.
