**Project Description:** (please use a separate page if necessary)

The project would preserve and resurface the existing lanes on State Route 41, including three ramps in Kings County near Stratford from Nevada Avenue (post mile 28.4) to the State Route 41/State Route 198 Separation Bridge (post mile R39.8). The project would repair or replace 12 culverts along the northbound and southbound sides of State Route 41. Clearing, grubbing, and trenching are expected for culvert work, intelligent transportation system elements (traffic count stations and vehicle classification systems used to obtain traffic data and vehicle volume, class, and weight), and electrical facilities. No trenching would be done across State Route 41. During construction, K-rail would support a single-lane closure, with flagmen directing reverse traffic lanes. A 50-by-50 foot temporary construction easement at post mile 33.18 and a permanent right-of-way acquisition at post mile 33.82 will be required.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.
