Project Description: (please use a separate page if necessary)

Stanislaus County, in coordination with the California Department of Transportation, proposes to replace the existing Pioneer Avenue over Lone Tree Creek Bridge (Bridge No. 38C0262) to provide improved safety and operations on the facility (see continuation pages for full project description).

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".

**Pioneer Avenue over Lone Tree Creek Bridge Replacement
Notice of Completion
Continued Project Description**

The Pioneer Avenue over Lone Tree Creek Bridge is located in Stanislaus County, California approximately 100 feet south of Freelove Road and south of the town of Valley Home. The existing bridge was constructed in 1918 and is a north-south two-lane local road with average daily traffic (ADT) of 350 vehicles per day. The replacement is needed to provide improved safety and operations on the facility.

This project is included in the Fiscal Years 2018/2019 Federal Transportation Improvement (FTIP) and is funded through the Highway Bridge Program.

The existing 2-span reinforced concrete slab bridge is 32 feet long and 21 feet wide. The bridge replacement includes a 45-foot cast-in-place, two-lane, single-span bridge that will be constructed on the existing alignment. Two 10-foot lanes, 3-foot shoulders, and railing Concrete Barrier Type 85 will yield a total width of 30 feet. The bridge will be simply supported by diaphragm abutments founded on cast-in-steel-shell piles behind the existing abutment. The replacement structure would be designed to meet current American Association of State Highway and Transportation Officials (AASHTO) standards.

It is anticipated that excavators, dozers, concrete truck, drill rigs and dump trucks will be required to construct the new bridge.

There are existing overhead electrical lines, including communication lines, on the east of the roadway that may require relocation. A public utility easement may be required to accommodate the relocation of overhead electrical and communication lines. Additionally, temporary right of way would be required from adjacent properties, west and east of the existing bridge, to complete the proposed creek diversion. Close coordination with the local utility companies and private property owners will be carried out in order to ensure access during construction.

Construction within Lone Tree Creek would be limited to temporary ground disturbance associated with construction activities and minimal permanent fills as a result of foundation removals, abutments and rock slope protection to prevent erosion.

Construction is anticipated to begin in May 2024 and is proposed to take approximately 10 months to complete. Access over Pioneer Avenue bridge will be temporarily unavailable during construction. Detour routes will be available from each direction utilizing Pleasant Valley Road, Aker Road, Victory Avenue, Lone Tree Road, Freelove Road and Valley Home Road. Access to all properties will remain during construction.
