Project No. G2307-62-04  
September 16, 2021

Lennar  
16465 Via Esprillo, Suite 150  
San Diego, California 92127

Attention: Mr. David Shepherd

Subject: PHASE I AND II ENVIRONMENTAL SITE ASSESSMENT REPORT  
PIRAEUS PROPERTY  
ENCINITAS, CALIFORNIA

Dear Mr. Shepherd:

In accordance with your request and our Proposal No. LE-21404 dated August 20, 2021, we have performed a Phase I and II Environmental Site Assessment (ESA) of the property located to the northeast of the intersection of Piraeus Street and Plato Place (the Site) in Encinitas, California.

We performed the Phase I ESA to provide information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site as part of Lennar's due diligence prior to purchasing the Site. Based on the findings of our Phase I ESA, we also performed a Phase II ESA to assess the potential presence of pesticides and arsenic (commonly associated with pesticides) in soil at the Site. The accompanying report presents the details of our Phase I and II ESA.

We appreciate the opportunity to have performed this Phase I ESA for Lennar. Please contact us if you have any questions concerning this report or if we may be of further service.

Very truly yours,

GEOCON INCORPORATED

Cole E. Mikesell  
Staff Geologist

Troy K. Reist, CEG  
Senior Geologist

# PHASE I AND II ENVIRONMENTAL SITE ASSESSMENT REPORT

## 1. INTRODUCTION

We have performed a Phase I and II Environmental Site Assessment (ESA) of the Piraeus property located to the northeast of the Piraeus Street and Plato Place intersection (the Site) in Encinitas, California. Lennar (the Client) requested the Phase I ESA to provide information regarding the potential for existing hazardous substances and/or petroleum product impacts at the Site as part of their due diligence prior to purchasing the Site. This report describes the methodology and procedures and present the findings of the Phase I ESA.

### 1.1 Purpose and Objectives

The purpose of the Phase I ESA was to identify evidence or indications of ‘recognized environmental conditions’ (RECs) as defined by the American Society for Testing and Materials (ASTM) *Designation E 1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Section 1.1.1 of *ASTM Designation E 1527-13* defines an REC as “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.” De minimis conditions are those that generally do not present a threat to human health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies.

*ASTM Designation E 1527-13* also defines ‘Historical’ and ‘Controlled’ RECs. They define an ‘Historical REC’ (HREC) as “A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” ASTM defines a ‘Controlled REC’ (CREC) as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).” An HREC is not an REC if a property meets current standards for unrestricted residential use. A CREC remains an REC by definition when the property does not meet the unrestricted residential use requirements unconditionally.

We also conducted the Phase I ESA in general accordance with the requirements of 40 Code of Federal Regulations (CFR) Part 312 titled *Standards and Practices for All Appropriate Inquiries*, as required under Sections 101(35)(B)(ii) and (iii) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The purpose of conducting an all appropriate inquiries investigation into the previous ownership and uses of a property is to meet the provisions necessary for the landowner, contiguous property owner, and/or bona fide prospective purchaser to qualify for certain landowner liability protections under CERCLA.

The following principles are an integral part of ASTM *Designation E1527-13*:

- **“Uncertainty Not Eliminated** - No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.”
- **“Not Exhaustive** - All Appropriate Inquiries does not mean an exhaustive assessment of a property. There is a point at which the cost of information obtained or the time required to gather it outweighs the usefulness of the information and, in fact, may be a material detriment to the orderly completion of transactions. One of the purposes of this practice is to identify a balance between the competing goals of limiting the costs and time demands inherent in performing an environmental site assessment and the reduction of uncertainty about unknown conditions resulting from additional information.”
- **“Level of Inquiry is Variable** - Not every property will warrant the same level of assessment. Consistent with good commercial and customary practice, the appropriate level of environmental site assessment will be guided by the type of property subject to assessment, the expertise and risk tolerance of the user, and the information developed in the course of the inquiry.”

## 1.2 Scope of Services

We performed the scope of services outlined in our Proposal No. LE-21404 dated August 20, 2021, with the exception that we did not review Sanborn fire insurance maps, as Environmental Data Resources, Inc. (EDR) indicated that there are none available for the Site or surrounding vicinity. The main components of the Phase I ESA and their objectives, as specified by the referenced standards, include the following:

- **Physical Setting Review:** we reviewed physical setting references for information concerning the topographic, geologic, and hydrogeologic characteristics of the Site and vicinity. Such information may be indicative of pathways (i.e., direction and/or extent) that a contaminant could migrate along in the event of a spill or release.
- **Regulatory Agency Records Review:** we reviewed publicly available Federal, State, and local regulatory agency records for information regarding the use, storage, and disposal of

hazardous substances and/or petroleum products at the Site and facilities and properties adjoining or within ¼ mile of the Site. Such records may identify RECs at or potentially affecting the Site.

- **Site History Review:** we reviewed information regarding the historical uses of the Site and adjoining and nearby facilities and properties back to the Site's and other properties' first use or 1940, whichever is earlier, that could have led to RECs on or near the Site. Historical sources reviewed included aerial photographs, topographic maps, and city directories. In addition, we conducted interviews with persons who were expected to be reasonably knowledgeable about historical and/or current conditions at and uses of the Site.
- **Site Reconnaissance:** we performed a site reconnaissance to observe site conditions and activities for evidence of RECs. The site reconnaissance was for the Site only. We viewed offsite properties and features solely from the vantage of the Site and public thoroughfares.

### 1.3 Report Limitations

We prepared this Phase I ESA report exclusively for the Client. The information obtained is only relevant for the dates of the records reviewed and the latest site visit. Therefore, the information contained herein is only valid as of the date of the report and may require an update after 180 days to reflect updated records and another reconnaissance to assess current site conditions.

The Client should recognize that a Phase I ESA is not a comprehensive site characterization and should not be construed as such. The findings and conclusions presented in this report are predicated on the site reconnaissance, information in the specified regulatory records, and information regarding the historical usage of the Site, as presented in this report. The Client should also understand that wetlands, asbestos-containing building materials, lead-containing paint, lead in drinking water, radon, mercury related to mining activities, methane, and mold surveys were not included in the scope of services for this Phase I ESA. Assessment for potential naturally occurring hazards such as asbestos and arsenic was also not included.

Therefore, the report should only be deemed conclusive with respect to the information obtained. No guarantee or warranty of the results of the Phase I ESA is implied within this report or any subsequent reports, correspondence or consultation, either express or implied. We strived to conduct the services summarized herein in accordance with the local standard of care in the geographic region at the time the services were rendered.

### 1.4 Data Gaps

A data gap is defined by ASTM *Designation E 1527-13* as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.” Data gaps could include such things as insufficient historical information, the inability to interview persons with direct site knowledge (e.g., the owner(s), past owner(s), tenants, workers,

etc.) or the lack of access to all parts of a site during the site reconnaissance. As indicated in Section 1.2, we did not review Sanborn fire insurance maps for the Site and surrounding vicinity because there are none for the Site and vicinity. We do not consider this a significant data gap however, because of other available historical information we reviewed.

## **2. SITE DESCRIPTION**

This section provides information regarding the location and physical characteristics of the Site including its size, topography, geologic, soil, and hydrogeologic conditions.

### **2.1 Location and Legal Description**

The 6.92-acre Site is located to the northeast of the intersection of Piraeus Street and Plato Place in Encinitas, California (Figure 1). The Site is situated south of Batiquitos Lagoon and east of Interstate (I)-5. The San Diego County assessor's parcel number (APN) for the Site is 254-144-01. A copy of the parcel map is in Appendix A.

The Site is depicted in the northeastern quarter of Section 4 of Township 13 South, Range 4 West, San Bernardino Base and Meridian on the United States Geological Survey's (USGS) *Encinitas, California*, 7.5-minute topographic map (USGS, 2015).

### **2.2 Site and Vicinity General Characteristics**

The majority of the Site is undeveloped land with native vegetation. The surrounding vicinity includes undeveloped land, single-family residences and transportation (I-5). Figure 2 depicts the site boundaries and features and surrounding properties. Further site description is provided in Sections 2.4 and 6.

#### **2.2.1 Topography**

The Site is located on a broad marine terrace with groundwater draining to the west. The USGS *Encinitas, California*, 7.5-minute topographic map (USGS, 2015), depicts the site elevation as approximately ranging between 100 and 180 feet above mean sea level.

#### **2.2.2 Geologic and Soil Conditions**

The Site is located in the Peninsular Ranges geomorphic province of Southern California (Norris and Webb, 1990). This geomorphic province extends approximately 900 miles from its northern terminus against the Transverse Ranges and Los Angeles Basin, south to the tip of Baja California. In general, the province is characterized by rugged mountains in Mesozoic igneous and metamorphic rocks to the east, with a dissected coastal plain on Cenozoic sediments to the west. The Peninsular Ranges vary in

width from approximately 30 to 100 miles, and are traversed fault zones trending roughly northwest-southeast.

Based on our previous geotechnical investigation and observations during our reconnaissance performed in June 2019 (Geocon, 2019), the geology underlying the Site consists of surficial soil deposits, Terrace Deposits and the Santiago Formation.

Information concerning the soil conditions at and in proximity to the Site from the United States Department of Agriculture, Natural Resources Conservation Service, Web Soil Survey (<http://websoilsurvey.nrcs.usda.gov/app/HomePage.htm>) indicates that site soil is Gaviota fine sandy loam, and Marina loamy coarse sand, which are well drained and have low infiltration rates.

### **2.2.3 Hydrologic and Hydrogeologic Conditions**

Groundwater quality and occurrence information available from the California Department of Water Resources and the California State Water Resources Control Board (SWRCB) indicates that the Site is located in the Batiquitos Sub-Hydrologic Area (904.51) of the San Marcos Hydrologic Area (904.50) of the Carlsbad Hydrologic Unit (904.00). Groundwater in the Batiquitos Sub-Hydrologic Area has existing beneficial use designations for municipal, agricultural, and industrial supply purposes (SWRCB, 2016).

Our previous exploratory borings performed during our field investigation in 2019 encountered groundwater between approximately 38 to 49 feet below the existing ground surface.

### **2.3 Current and Planned Uses of the Site**

The majority of the Site is not currently used for any specific purpose. The Client reported that they plan to develop the majority of the Site for residential use. Further description of the Site is provided in Section 6.

### **2.4 Descriptions of Structures, Roads, Other Improvements on the Site**

No structures, roads, or other improvements are present on the Site.

### **2.5 Current Uses of Adjoining Properties**

Current uses of adjoining properties are primarily residential with transportation (I-5) to the west and undeveloped land to the north. Further information regarding adjoining properties is provided in Section 6.4.

### **3. USER-PROVIDED INFORMATION**

This section summarizes site information provided by the Client – the “user” of this Phase I ESA. Also provided are responses to inquiries to the Client via a “user” questionnaire for information pertaining to the Site. David Shepherd with Lennar completed the questionnaire (Appendix B).

#### **3.1 Title, Appraisal and Sale Agreement Records**

Mr. Shepherd provided a Preliminary Title Report (PTR) for the Site prepared by First American Title Insurance Company and dated July 27, 2019. The PTR indicates that the site parcels are owned by Piraeus Investor, LLC. The PTR identifies no issues regarding the environmental condition of the Site.

#### **3.2 Environmental Liens or Activity and Use Limitations**

Mr. Shepherd indicated that he has no knowledge of environmental liens on or activity and use limitations for the Site.

#### **3.3 Specialized Knowledge**

Mr. Shepherd indicated he has no specialized knowledge of the Site.

#### **3.4 Commonly Known or Reasonably Ascertainable Information**

Mr. Shepherd indicated he is not aware of commonly known or reasonably ascertainable information pertaining to the Site.

#### **3.5 Owner, Property Manager, and Occupant Information**

Mr. Shepherd indicated the Site is owned by Harrington Carrington, Piraeus Investor, LLC.

#### **3.6 Valuation Reduction for Environmental Issues**

According to Mr. Shepherd, the monetary value of the Site has not been reduced due to environmental issues.

#### **3.7 Reason for Performing the Phase I ESA**

The Phase I ESA was requested to provide information regarding the potential for existing hazardous substance and/or petroleum product impacts at the Site for pre-acquisition due diligence purposes.

## 4. RECORDS REVIEW

This section summarizes information we obtained from readily available agency records for the Site and properties and facilities in the surrounding vicinity.

### 4.1 Standard Environmental Record Sources

EDR searched federal, state, and local databases regarding the use, storage, disposal, or release of hazardous substances and/or petroleum products for the Site and area within one mile of the Site. The databases that list the Site and/or properties/facilities within one mile of the Site and the number of properties/facilities listed are summarized in the table below. A copy of *The EDR Radius Map™ Report with GeoCheck*, dated August 23, 2021, is in Appendix C.

Database Name	Search Radius (Mile)	Number of Listings
<b>FEDERAL DATABASES</b>		
RCRA-SQG (Small Quantity Generators)	¼	1
<b>STATE AND LOCAL DATABASES</b>		
SWF/LF (Solid waste Facilities/Landfill Sites)	½	1
SAN DIEGO CO. SAM (Diego County Site Assessment and Mitigation Program)	½	3
LUST (Leaking Underground Storage Tanks)	½	2
CA SLIC (Spills, Leaks, Investigation, and Cleanup Program)	½	5
DEED Restriction Sites	½	1
RCRA-NonGen (Resource Conservation and Recovery Act – Non-Generators)	½	4
CORTESE	½	2

#### 4.1.1 Site

The Site is not listed on any of the databases searched by EDR.

#### 4.1.2 Offsite Properties

The following table summarizes information provided in the EDR report for listed properties/facilities that are located less than ¼ mile from the Site and are listed on various release-related databases<sup>1</sup>. Properties/facilities located within a ¼ mile and not listed on a release-related database<sup>1</sup> are not

---

<sup>1</sup> "Release" refers to an unauthorized release of a petroleum product or hazardous substance to the environment - i.e. the ground surface, soil, soil vapor, groundwater, or surface water on a property. "Release-related database" refers to those which provide information regarding an unauthorized release. "Non-release-related database" refers to those that may report use, storage, or disposal of hazardous substances and/or petroleum products or other environmental conditions, but do not report releases of such.

included in the table below and are unlikely to have caused an REC at the Site. Distances reported by EDR may differ from actual distances.

Property Name and Address	Approximate Distance, Direction, and Hydraulic Gradient Position	Databases	Pertinent Information
1540 Caudor Street 1540 Caudor Street	891 feet southeast Upgradient	CPS-SLIC CERS	On January 8, 2014 four soil samples were collected at this facility. OCPs were detected in three of the four borings at concentrations that did not exceed the California Human Health Screening Levels for residential use soils. The DEH concurred that the cleanup goals established for the facility were met. The distance from the Site and the DEH's closure of the case indicate that this facility is unlikely to have caused an REC at the Site.
Hymettus Estate 1492 Hymettus Ave	1,272 feet southwest Downgradient	San Diego Co. SAM CPS-SLIC DEED CHMIRS CIWQS CERS	These listings are related to DEH case #H99106-002 which was opened under the Voluntary Assistance Program (VAP) for the facility located at 1492 Hymettus Ave. Soil at the Site was excavated to a depth of seven feet below design finished grade, with dieldrin-impacted soil being placed at the bottom of the excavations. A geotextile liner was placed on top of the dieldrin-impacted soil as a marker in the event of any future excavation. With the additional work to provide seven feet of non-impacted soil over the entire area underlain by dieldrin-impacted soil, Stantec recommended that a no further action letter be provided, with the DEH concurring on October 24, 2011. The downgradient location, distance from the Site, and the closure of DEH case #H99106-002 suggests that this facility is unlikely to have caused an REC at the Site.

Other properties and facilities within 1/4-mile of Site are listed on various non-release-related databases<sup>1</sup> and therefore are not anticipated to have caused an REC at the Site.

### **4.1.3 Orphan Summary**

EDR's Orphan Summary identifies properties with incomplete address information and therefore cannot be accurately plotted. One property is listed but because it is greater than 1/2 mile from the Site it is not suspected of having caused an REC at the Site.

## **4.2 Additional Environmental Record Sources**

This section summarizes information from additional, readily available environmental record sources regarding the Site and properties/facilities within one mile from the Site.

### **4.2.1 GeoTracker and EnviroStor Databases**

We reviewed GeoTracker and the California Department of Toxic Substance Control's (DTSC) EnviroStor online database (<http://www.envirostor.dtsc.ca.gov/public/>) for information regarding the Site and nearby properties/facilities that are within ¼ mile of the Site. GeoTracker lists two cleanup program properties/facilities within ¼ mile of the Site both of which have been granted regulatory closure. Information regarding these facilities is summarized in Section 4.1.2. EnviroStor does not have information pertaining to the Site any properties/facilities within ¼ mile of the Site.

### **4.2.2 State of California Department of Conservation, Geologic Energy Management Division**

We reviewed the California Geologic Energy Management Division (CalGem) website (<https://maps.conservation.ca.gov/doggr/wellfinder>) to evaluate the potential for existing/former oil, gas, or geothermal wells on the Site or properties proximal to the Site. CalGem information indicates that no former or current wells are or were located within one mile of the Site.

### **4.2.3 County of San Diego Department of Agriculture, Weights and Measures**

We submitted a request to the County of San Diego, Department of Agriculture, Weights and Measures (DAWM), Pesticide Use Enforcement Division regarding possible use of restricted pesticides/herbicides at the Site. That office maintains such records for approximately 4 years. The DAWM indicated that no record of restricted pesticide/herbicide use was reported for the site APNs for the period of 2017 through 2021.

### **4.2.4 San Diego Air Pollution Control District**

We submitted a request to the San Diego Air Pollution Control District (APCD) for records pertaining to the Site. The APCD indicated that no records are on file for the site APNs.

#### **4.2.5 County of San Diego Department of Environmental Health**

We submitted a request to the DEH for records pertaining to the Site. A permit for 8 borings and an accompanying technical report were provided. The documents provided by DEH are presented in Appendix D.

#### **4.2.6 San Diego Gas and Electric Company**

No transformers were observed onsite or were likely on the Site previously. Therefore, San Diego Gas & Electric Company was not contacted as part of this assessment.

#### **4.3 Previous Documents/Reports**

Following are summaries of documents pertaining to the Site.

*Apex Companies, LLC - Phase I Environmental Site Assessment, Northeast Corner of Piraeus Street and Plato Place, Encinitas, California, dated September 19, 2019*

Apex Companies, LLC performed a Phase I ESA for the Site in September of 2019. Apex concluded that their assessment revealed no current or historical RECs in connection with the Site. Apex considered the isolated inert debris observed on the Site as de minimis.

### **5. HISTORICAL USE**

This section summarizes information obtained from a variety of sources regarding the historical uses of the Site in an effort to identify those uses that could have led to RECs. The sources of information included historical aerial photographs, historical topographic maps, and an abstract of city directories provided by EDR.

#### **5.1 Aerial Photographs**

We reviewed historical aerial photographs for the years 1928, 1939, 1946, 1953, 1964, 1967, 1970, 1979, 1985, 1990, 1994, 1997, 2002, 2005, 2009, 2012 and 2016 (Appendix E) for indications of past land uses that had the potential to have impacted the Site through the use, storage or disposal of hazardous substances and/or petroleum products. The following table summarizes our observations of the Site and adjacent properties.

Year	Observations	
	Site	Adjacent Properties
1928 (1" = 500')	The Site appears to have been vacant land with natural vegetation.	Adjacent properties appear to have been vacant land with natural vegetation.
1939 (1" = 500')	Conditions appear to have been similar to those observed on the 1928 aerial photograph.	Conditions appear to have been similar to those observed on the 1928 aerial photograph.
1946 (1" = 500')	Conditions appear to have been similar to those observed on the 1939 aerial photograph.	Conditions appear to have been similar to those observed on the 1939 aerial photograph.
1953 (1" = 500')	Conditions appear to have been similar to those observed on the 1946 aerial photograph.	Conditions appear to have been similar to those observed on the 1946 aerial photograph.
1964 (1" = 500')	Conditions appear to have been similar to those observed on the 1953 aerial photograph.	Conditions appear to have been similar to those observed on the 1953 aerial photograph with the exception that the properties adjacent to the east appear to have been developed with single-family residences.
1967 (1" = 500')	Conditions appear to have been similar to those observed on the 1964 aerial photograph.	Conditions appear to have been similar to those observed on the 1964 aerial photograph with the exception that the I-5 is now depicted adjacent to the west of the Site.
1970 (1" = 500')	Conditions appear to have been similar to those observed on the 1967 aerial photograph.	Conditions appear to have been similar to those observed on the 1967 aerial photograph.
1979 (1" = 500')	Conditions appear to have been similar to those observed on the 1970 aerial photograph with the exception that numerous dirt roads are present on the southern portion of the Site.	Conditions appear to have been similar to those observed on the 1970 aerial photograph.
1985 (1" = 500')	Conditions appear to have been similar to those observed on the 1979 aerial photograph.	Conditions appear to have been similar to those observed on the 1979 aerial photograph.
1990 (1" = 500')	Conditions appear to have been similar to those observed on the 1985 aerial photograph.	Conditions appear to have been similar to those observed on the 1985 aerial photograph.
1994 (1" = 500')	Conditions appear to have been similar to those observed on the 1990 aerial photograph.	Conditions appear to have been similar to those observed on the 1990 aerial photograph.
1997 (1" = 500')	Conditions appear to have been similar to those observed on the 1994 aerial photograph.	Conditions appear to have been similar to those observed on the 1994 aerial photograph.
2002 (1" = 500')	Conditions appear to have been similar to those observed on the 1997 aerial photograph.	Conditions appear to have been similar to those observed on the 1997 aerial photograph.
2005 (1" = 500')	Conditions appear to have been similar to those observed on the 2002 aerial photograph.	Conditions appear to have been similar to those observed on the 2002 aerial photograph.
2009 (1" = 500')	Conditions appear to have been similar to those observed on the 2005 aerial photograph.	Conditions appear to have been similar to those observed on the 2005 aerial photograph.
2012 (1" = 500')	Conditions appear to have been similar to those observed on the 2009 aerial photograph.	Conditions appear to have been similar to those observed on the 2009 aerial photograph.
2016 (1" = 500')	Conditions appear to have been similar to those observed on the 2012 aerial photograph.	Conditions appear to have been similar to those observed on the 2012 aerial photograph.

We observed no conditions on or uses of the Site or adjoining properties on the historical aerial photographs with the potential to have caused an REC at the Site.

## 5.2 Topographic Maps

We reviewed historical topographic maps for the years 1893, 1898, 1901, 1947, 1948, 1949, 1968, 1975, 1997 and 2012 (Appendix F). The following table summarizes observations of the Site and adjacent properties on the historical topographic maps.

Year	Observations	
	Site	Adjacent Properties
1893 (1:62,500)	No structures or land use are depicted on the Site.	No structures or land use are depicted on the adjacent properties.
1898 (1:62,500)	Conditions are similar to those depicted on the 1893 topographic map.	Conditions are similar to those depicted on the 1893 topographic map.
1901 (1:62,500)	Conditions are similar to those depicted on the 1898 topographic map.	Conditions are similar to those depicted on the 1898 topographic map.
1947 (1:50,000)	Conditions are similar to those depicted on the 1901 topographic map.	Conditions are similar to those depicted on the 1901 topographic map.
1948 (1:24,000)	Conditions are similar to those depicted on the 1947 topographic map with the exception that the Site is shaded green indicating natural vegetation.	Conditions are similar to those depicted on the 1947 topographic map with the exception that the adjacent properties to the north and south are shaded green indicating natural vegetation.
1949 (1:24,000)	Conditions are similar to those depicted on the 1948 topographic map.	Conditions are similar to those depicted on the 1948 topographic map.
1968 (1:24,000)	Conditions are similar to those depicted on the 1949 topographic map.	Conditions are similar to those depicted on the 1949 topographic map with the exception that the I-5 is now depicted adjacent to the west of the Site, and multiple structures are now depicted to the east of the Site.
1975 (1:24,000)	Conditions are similar to those depicted on the 1968 topographic map.	Conditions are similar to those depicted on the 1968 topographic map.
1997 (1:24,000)	Conditions are similar to those depicted on the 1975 topographic map.	Conditions are similar to those depicted on the 1975 topographic map with the exception that the adjacent properties are shaded pink indicating an urban environment.
2012 (1:24,000)	No shading or structures are depicted.	No shading or structures are depicted.

The historical topographic maps depict no conditions, structures, or uses on the Site or adjacent properties that would suggest the presence of RECs.

### **5.3 City Directories**

EDR prepared an abstract of city directories including city, cross-reference, and telephone directories summarized in the *EDR-City Directory Image Report* dated August 27, 2021. The directories were reviewed at approximately 5-year intervals, if available, from 1971 to 2017. A copy of the EDR city directory abstract including information regarding offsite facilities is in Appendix G. The city directory lists residents along Plato Place and Piraeus Street, none of which are suspected of having caused an REC at the Site.

## 6. SITE RECONNAISSANCE

This section summarizes observations of the Site and surrounding properties made during the site reconnaissance.

### 6.1 Methodology and Limiting Conditions

Cole E. Mikesell, Staff Geologist with Geocon, performed the site reconnaissance unaccompanied on September 3, 2021, by walking the Site. Mr. Mikesell performed the offsite survey by observing adjacent properties from the Site and adjacent public streets. Weather on the day of the site reconnaissance was slightly cloudy with temperatures in the mid-70s. Photographs of various site features and offsite properties are appended. Figure 2 is a Site Plan illustrating selected site features.

### 6.2 General Site Setting

The Site is located in an area of predominantly residential use with nearby transportation (I-5). The Site is surrounded by undeveloped land to the north and south.

### 6.3 Onsite Survey

The Site is an undeveloped hillside with natural vegetation which slopes to the north (Photographs 1 through 9). We observed no odors, pools of liquid, significantly stained soil or distressed vegetation on the Site. We observed no evidence of RECs on the Site.

### 6.4 Offsite Survey

Properties within the site vicinity include:

- **North:** Undeveloped land beyond which are residential homes (Photograph 10).
- **South:** Undeveloped land beyond which are residential homes (Photograph 11).
- **East:** Residential homes (Photographs 12 and 13).
- **West:** Piraeus Street beyond which is I-5 (Photograph 14).

We observed no evidence of RECs on the surrounding properties.

## **7. INTERVIEWS**

The current property owner representative, Harrington Cannon, reported via a site owner/occupant questionnaire (Appendix B) that the Site is vacant land. Mr. Cannon reported that the site had been used for agriculture in the past. Mr. Shepherd contacted Mr. Cannon to inquire specifically about pesticide use on the Site and was informed to assume they were applied.

## 8. SUMMARY OF FINDINGS

The following table summarizes our findings and opinions regarding the Site, including known or suspect RECs, CRECs, HRECs, and de minimis environmental conditions.

Assessment Category	Observed (Y/N)	(REC/ CREC/ HREC/ DM or None)	Recommended Actions	Report Section(s)
<b>Hazardous Substances/Petroleum Products</b>	N	N	NFA	
<b>Hazardous Wastes</b>	N	N	NFA	
<b>Non-Hazardous Wastes</b>	N	N	NFA	
<b>Aboveground/Underground Storage Tanks</b>	N	N	NFA	
<b>Unidentified Substance Containers</b>	N	N	NFA	
<b>Equipment Potentially Containing PCBs</b>	N	N	NFA	
<b>Wastewater Systems</b>	N	N	NFA	
<b>Evidence of Releases</b>	N	N	NFA	
<b>Pools of Liquid, Pits, Ponds, Lagoons</b>	N	N	NFA	
<b>Wells</b>	N	N	NFA	
<b>Other Site Issues</b>	N	N	NFA	
<b>Nearby Properties</b>	N	N	NFA	
<b>Historical Land Use – Site</b>	Y	N	NFA	7, 9
<b>Historical Land Use – Nearby Properties</b>	N	N	NFA	

**Recommended Action:**

AA = Additional action recommended.

NFA = No further action required at this time.

DM = De minimis condition where additional activities do not appear warranted at this time.

As discussed previously in Section 7, the property owner representative stated in the questionnaire that the Site had been utilized for agricultural purposes in the past and to assume pesticides had been applied. Although, no photographic evidence or documents indicated that sustained agricultural use had occurred on Site, we collected soil samples to assess for the presence of pesticides and arsenic in the soil as discussed in Section 9.

## 9. PHASE II ESA

We performed a Phase II ESA to assess the Site for the potential presence of pesticides and arsenic in soil based on the information provided by the owner's representative.

### 9.1 Scope of Investigation

The scope of the Phase II ESA consisted of the following tasks:

- Retaining Enthalpy Analytical, LLC, a state-certified laboratory, to perform laboratory analysis of soil samples and planned soil sample locations;
- Collecting soil samples from the planned locations;
- Performing laboratory analysis of soil samples; and
- Preparing this report describing the assessment and its findings.

### 9.2 Soil Sample Collection and Analysis

On September 9, 2021, we collected 6 discrete soil samples (S1 to S6) from the locations shown on Figure 2. We collected each sample from between the ground surface and a depth of 6 inches. The soil samples were collected using a decontaminated trowel then transferred into laboratory-provided 8-ounce jars. The jars were capped with Teflon-lined lids, labeled, and placed in a chilled cooler for transport to the laboratory under chain-of-custody protocol. The samples were analyzed for organochlorine pesticides (OCPs) by United States Environmental Protection Agency (USEPA) Test Method 8081A and arsenic by USEPA Test Method 6010B.

### 9.3 Results

A copy of the laboratory analysis report is in Appendix H and the results are summarized below.

#### OCPs

OCPs were detected in four of the six discrete soil samples analyzed.

The OCP dichlorodiphenyldichloroethylene (DDE), was detected at concentrations ranging from 5.7 to 79 micrograms per kilogram (ug/kg), which does not exceed the San Francisco Bay Regional Water Quality Control Board Environmental Screening Level (ESL) for DDE in residential soil of 1,800 ug/kg.

The OCP dichlorodiphenyltrichloroethane (DDT), was detected at concentrations ranging from 6.1 to 12 ug/kg, which does not exceed the ESL for DDT in residential soil of 1,900 ug/kg.

## **Arsenic**

Arsenic was detected in two of the six discrete soil samples analyzed at concentrations of 3.8 and 6.5 milligrams per kilogram (mg/kg) respectively. Arsenic is a natural mineralogical component of soil and its naturally occurring or “background” concentrations in California soils typically range from 0.6 to 12 mg/kg and much higher in some areas depending on the mineralogy of the soil’s parent material. Therefore, regulatory agencies allow comparison of arsenic concentrations in soil to naturally occurring background arsenic concentrations instead of calculated screening levels. The arsenic concentrations of the six samples are within the range of naturally occurring arsenic concentrations for soil.

## **10. CONCLUSIONS AND RECOMMENDATIONS**

We have performed a Phase I and II ESA, in general conformance with the scope and limitations of ASTM E 1527-13, of the 6.92-acre property located northeast of the intersection of Piraeus Street and Plato Place in Encinitas, California. The San Diego County APN for the Site is 254-144-01.

This Phase I and II ESA identified no evidence of RECs in connection with the Site. Therefore, additional environmental assessment does not appear to be warranted at this time.

If soil staining or petroleum odors are observed during grading observations, we recommend retaining Geocon to observe and possibly sample areas of potential impact to determine if further action is warranted. Although not anticipated, any undocumented subsurface structures or areas of apparent contamination encountered during site redevelopment activities including septic tanks, USTs, wells, etc. should be properly abandoned/removed in accordance with San Diego County regulatory requirements.

## 12. QUALIFICATIONS

This Phase I ESA report was prepared by Cole E. Mikesell with oversight by Troy K. Reist, CEG. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312. We have the specific qualifications based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Mr. Mikesell has a BS degree in Geology with an emphasis in Environmental Geosciences. Mr. Mikesell is a certified Geologist-In-Training in the State of California. Mr. Mikesell has 5 years of experience in the geotechnical and environmental consulting industry. He has performed exploratory drilling, infiltration testing, foundation and earthworks observation, and prepared Phase I and Phase II ESAs throughout southern California.

Mr. Reist is a Professional Geologist and Certified Engineering Geologist, with a BS degree in Geology and has over 23 years of experience in the geotechnical and environmental consulting industry in California. Mr. Reist investigates, remediates and manages geotechnical and environmental issues on residential, commercial, industrial, and agricultural properties throughout southern California.

A

APPENDIX

**CLIENT-PROVIDED INFORMATION FOR THE SITE**

**Site: Piraeus Property, Encinitas, CA; Project No. G2307-62-04**

**\*Please elaborate on any question answered "yes." If the question does not apply to the site, please answer "N/A".**

1. If possible, please provide us with the title, appraisal, or sale agreement records to review and discuss in the Phase I ESA.  
PTR attached with email including this questionnaire.
  
2. Are you aware of any environmental liens or activity and use limitations associated with the Site?  
NO
  
3. Do you have any specialized knowledge of the Site?  
NO
  
4. Please provide any commonly known or reasonably ascertainable information about the Site.  
None
  
5. Who currently owns, manages, and operates the Site?  
Harrington Carrington, Piraeus Investor, LLC
  
6. Has the monetary value of the Site been reduced due to environmental issues associated with the Site or adjacent properties?  
NO
  
7. Why are you requesting a Phase I ESA for the Site?  
Part of due diligence to evaluate the property for potential acquisition to build homes.

PROPERTY BACKGROUND INFORMATION QUESTIONNAIRE FOR SITE  
OWNER, OCCUPANT, OR REPRESENTATIVE

Site: Piraeus Property, Encinitas, CA; Project No. G2307-62-04

**\*Please elaborate on any question answered "yes." If the question does not apply to the site, please answer "N/A".**

- 1) Describe the current uses of the Site.      **VACANT SITE**
- 2) How long has the Site been used for these purposes?      **20 PLUS YEARS**
- 3) How long have you occupied the Site?      **VACANT SITE**
- 4) List the existing structures on the property and their age.      **No Structures**
- 5) Describe the past uses, owners, and operators of the Site. (Be as detailed as possible and note approximate time periods.)      **SITE USED FOR Agriculture, SAME OWNERS 30 plus yrs**
- 6) Utilities including electricity, natural gas, water, sewer, and trash removal are provided to the Site by which utility/companies.
- Water -  
Sewer -  
Electricity -  
Natural Gas -  
Trash -
- NONE**
- 7) What type of heating, ventilating, and air conditioning (HVAC) system is located at the Site and how is the HVAC system powered?      **NONE**
- 8) Have the Site or adjoining properties been used for industrial activities, such the following? (Please note that an adjoining property is a property that is contiguous with, or directly across the street from the Site.)
- |                             |   |
|-----------------------------|---|

| Waste Treatment             | <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No |

Storage, Disposal, or Recycling Facility  Yes  No

Describe other industrial activities, if any. **NONE**

9) Have any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or other waste materials been dumped aboveground, buried, or burned on the Site?

Yes  No

10) Have any of the following items been stored on the Site in containers greater than 5 gallons?

Paint  Yes  No

Chemicals  Yes  No

Pesticides  Yes  No

11) Are hazardous wastes generated at the Site? If yes, describe the means of disposal and frequency of disposal.

Yes  No

12) Have petroleum products been stored on the Site or transferred across the Site in pipelines, either above or belowground?

Yes  No

13) Has fill dirt been brought onto the Site from an offsite source?

Yes  No

14) Is there evidence that the fill dirt in Question 13 may be contaminated?

Yes  No

15) Are there currently any pits, ponds, or lagoons on the Site?

Yes  No

16) Have any pits, ponds, or lagoons previously existed on the Site?

Yes  No

17) Are there currently areas on the Site with stained soil?

**NONE**

Yes  No

**18) Have stained soils previously existed on the Site?**

Yes  No

**19) Do chemical-containing underground or aboveground storage tanks exist, or have they existed previously on the Site?**

Yes  No

**20) Do fill pipes, vent pipes, or access ways indicating the presence of current or former underground storage tanks exist on the Site?**

Yes  No

**21) Have fill pipes or vent pipes which may indicate the presence of a current or former underground storage tank been removed from the Site?**

Yes  No

**22) Are floor drains stained with anything other than water in any area on the Site?**

Yes  No

**23) Do floor drains on the Site emit foul odors?**

Yes  No

**24) Is the Site served by a private well or a non-public water source?**

Yes  No

**25) Are contaminants known to exist in any private well or non-public water system serving the Site?**

Yes  No

**26) Does the Site discharge wastewater, other than domestic wastewater or storm water, into the sewer?**

Yes  No

27) Other than permission for domestic hookup, have any city, county, or local permits for wastewater discharge been issued to the Site?

Yes  No

28) Does a septic tank exist, or has one existed previously on the Site?

Yes  No

29) Do cesspools or cisterns currently exist on the Site?

Yes  No

30) Have cesspools or cisterns previously existed on the Site?

Yes  No

31) Other than storm water, does the Site discharge waste water onto the neighboring Site?

Yes  No

32) Is there a transformer or capacitor that may contain PCBs on the Site?

Yes  No

33) Is there hydraulic equipment such as automobile lifts or elevators on the Site?

Yes  No

34) Are PCBs contained in hydraulic oil associated with hydraulic equipment located on the Site?

Yes  No

35) Has an asbestos and/or lead-based paint survey been conducted at the Site? If so, what were the findings?

Yes  No

36) Other than small quantities of legal pesticides used for landscape maintenance (e.g., Roundup), have pesticides, herbicides, or insecticides been applied on the Site?

Yes  No

37) Are you aware of any environmental liens against the Site that are filed or recorded under federal, tribal, state, or local law?

Yes  No

38) Have any environmental violations or citations associated with activities conducted on the Site been issued?

Yes  No

39) Has the Site been included in other environmental assessments? If so, can copies of the reports be provided?

Yes  No

40) Have other environmental assessments identified hazardous substances or petroleum products that exist, or may have existed on the Site?

Yes  No

41) Are there any pending lawsuits that involve the release or threatened release of hazardous substances associated with the Site?

Yes  No

42) Are you aware of any activity and land use limitations, such as engineering controls, land use restrictions or institutional controls that are in place on the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

Yes  No

43) Are you aware of any commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of hazardous substance releases or threatened hazardous substance releases?

Yes  No

44) Do you have any specialized knowledge or experience related to the Site or nearby properties, including the knowledge of the chemicals and processes used by this type of business?

Yes  No

45) Based in your knowledge or experience related to the Site, are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

Yes  No

46) If the purchase price of the Site was below fair market value, did this occur because contamination was/is known or believed to be present on the Site?

Yes  No  N/A

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

PIRAEUS STREET/PLATO PLACE  
ENCINITAS, CA 92024

#### COORDINATES

# EXECUTIVE SUMMARY

## TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

## DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

NPL..... National Priority List  
Proposed NPL..... Proposed National Priority List Sites

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### **Federal RCRA generators list**

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>OLYMPUS ROAD BURNSIT</i></b> Database: SWF/LF (SWIS), Date of Government Version: 05/10/2021	<b><i>600 BLK OLYMPUS ROAD</i></b>	<b><i>SSE 1/4 - 1/2 (0.337 mi.)</i></b>	<b><i>8</i></b>	<b><i>31</i></b>

## EXECUTIVE SUMMARY

Facility ID: 37-CR-0061  
 Operational Status: Closed  
 Regulation Status: Pre-regulation

### **State and tribal leaking storage tank lists**

SAN DIEGO CO. SAM: The listing contains all underground tank release cases and projects pertaining to properties contaminated with hazardous substances that are actively under review by the Site Assessment and Mitigation Program.

A review of the SAN DIEGO CO. SAM list, as provided by EDR, and dated 03/23/2010 has revealed that there are 3 SAN DIEGO CO. SAM sites within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 5 CPS-SLIC sites

### ADDITIONAL ENVIRONMENTAL RECORDS

#### **Local Land Records**

DEED: The use of recorded land use restrictions is one of the methods the DTSC uses to protect the public from unsafe exposures to hazardous substances and wastes .

A review of the DEED list, as provided by EDR, and dated 05/28/2021 has revealed that there is 1 DEED site within approximately 0.5 miles of the target property.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Facility Status: Completed - Case Closed**  
Status Date: 10/24/2011  
Global Id: T10000003208  
Lead Agency: SAN DIEGO COUNTY LOP  
Lead Agency Case Number: H99106-002  
Latitude: 33.076078  
Longitude: -117.299296  
Case Type: Cleanup Program Site  
Case Worker: CF  
Local Agency: SAN DIEGO COUNTY LOP  
RB Case Number: Not reported  
File Location: Local Agency  
Potential Media Affected: Soil  
Potential Contaminants of Concern: Other Insecticides / Pesticide / Fumigants / Herbicides  
Site History: DEH Case #H99106-002 was opened under the Voluntary Assistance Program (VAP) to address additional remedial work required at 1492 Hymettus Avenue in Encinitas following the closure of Case #H99106-001. Site characterization activities performed in 2006 indicated that the detected concentrations of the pesticide dieldrin in soil beneath the site exceeded its California Human Health Screening Level (CHHSL). Under the original case (#H99106-001), remediation of the dieldrin-impacted soil at the site was performed under a work plan approved by DEH on October 26, 2010. Dieldrin-impacted soil underlying the foundation footprints, front-yards and side-yards of the proposed 19-lot subdivision was excavated to an initial depth of seven feet below design finished grade. The impacted soil was temporarily stockpiled onsite while the excavated areas were deepened to approximately 14 feet. Non-impacted soil removed from the lower portion of the excavated areas was also temporarily stockpiled. [Note; non-impacted soil is used here to designate soil in which organochlorine pesticides were not detected or where analytical results indicated concentrations below CHHSLs]. After the collection of confirmation samples from the base of the excavated areas, the dieldrin-impacted soil was placed in the bottom portions of the excavated areas up to a depth of seven feet below design finished grade. A geotextile liner was placed on top of the dieldrin-impacted soil as a marker in the event any future excavation was performed. Following placement of the liner, stockpiled, non-impacted soil was used to fill the upper portion of the excavated areas. Additional non-impacted soil was imported from offsite locations and placed to augment the final cover at the site. Grading of the site to achieve design final grade was performed under a permit issued by the City of Encinitas to the developer (City Ventures). During the City's review of the final grading map, it was

MAP FINDINGS

**HYMETTUS ESTATE (Continued)**

**S108087033**

found that the top of the dieldrin-impacted soil, which was covered with a geotextile marker, was less than seven feet below designed finish grade at front-yard locations of Lots 1 through 10. The sloping front-yards featured drainage swales to channel runoff into planned sediment retention basins. The retention basins were located in an easement between these lots and the road within the interior of the subdivision (Halia Court). Case #H99106-002 was opened to provide regulatory oversight for the additional work needed to provide a uniform, seven-foot-thick, cover fill of non-impacted soil over the entire remediated area. Borings were advanced by the consultant (Stantec) near the drainage swales or planned retention basins to allow collection of soil samples for analysis of organochlorine pesticides, including dieldrin. Detection of dieldrin at concentrations above the remedial action level (35 micrograms per kilogram) at depths of less than seven feet below design finished grade served to indicate the areas requiring additional remedial work. On August 3, 2011, City Ventures began excavating soils from the front-yards of Lots 6 through 10. The area immediately adjoining the easement was excavated a maximum of one-to-three feet below the existing geotextile marker to achieve the required depth. Dieldrin-impacted soils were reburied in the disposal area established beneath Lots 15 and 16 and covered with a seven-foot-thick layer of non-impacted soil. A new geotextile marker was placed at the bottom of the excavated front-yard areas at a depth of seven feet, which were then filled with non-impacted soil up to design finished grade. Soil was removed near three sediment retention basins in the easement between the front-yards of Lots 1 through 5 and Halia Court from September 14 through 26, 2011. The excavation terminated at a depth approximately 0.5 feet below the existing geotextile marker. The excavated soil was temporarily stockpiled onsite. Following placement of a new geotextile marker, non-impacted soil was then placed in the excavated areas to provide a seven-foot-thick cap. The excavated, stockpiled soil was then transported under manifest to an offsite disposal facility. The existing environmental covenant addressing the remediated dieldrin-impacted soil at the site was re-recorded with a revised map that shows the surveyed elevations of the top of the dieldrin-impacted soil in the subsurface. The additional work performed at the site to provide seven feet of non-impacted soil over the entire area underlain by dieldrin-impacted soil brings the site into conformance with the work plan approved in October 2010. Stantec has recommended no further action at the site and case closure. DEH concurs with these recommendations.

File Location: Local Agency  
Potential Media Affected: Soil  
Potential Contaminants of Concern: Chlordane, DDD / DDE / DDT, Other Insecticides / Pesticide / Fumigants / Herbicides

Site History: The property at 1492 Hymettus Avenue in Encinitas, California, was formerly used for agricultural purposes (i.e., citrus groves and row crops) in the 1930s and 1940s. Although aerial photographs indicate that the land was unused in the 1950s, greenhouses were constructed on the property in the 1960s or early 1970s for growing flowers. The flowering-growing activities continued until June 2007, when the property was sold to a prospective developer. Past agricultural use of the property is inferred to have involved the application of pesticides to site soils. Site investigations were performed in 2005 and 2006 by Vinje & Middleton in anticipation of residential development that indicated the presence of minor concentrations of the following pesticides: 4,4-DDD, 4,4-DDE, 4,4-DDT, endosulfan, and methoxychlor. However, the pesticide dieldrin was detected in soil samples at concentrations that exceed the California Health Soil Screening Level (CHSSL) for the compound (i.e., 35 micrograms per kilogram [a%g/kg]) and the U.S. EPA Region IX Residential Preliminary Remediation Goal of 30 a%g/kg. The maximum detected concentration of dieldrin in the 66 soil samples analyzed was 920 a%g/kg. The arithmetic mean concentration was for soil to a depth of 5.5 feet was calculated by Vinje & Middleton to be 114.3 a%g/kg for the area investigated. A geotechnical investigation was also performed by Vinje & Middleton in 2005 that identified fill materials in the central area of the property. The fill materials were described as occurring from the ground surface to a depth of approximately five feet. The lateral extent of the fill was not determined due to access limitations (i.e., greenhouses covered nearly 98% of the property). Noting that past agricultural practices usually introduced pesticides to the top 2 to 3 feet of soil, Vinje & Middleton surmised that soils previously impacted with pesticides had been graded and used to fill a drainage swale prior to construction of the greenhouses. [A topographic low does appear on a 1949 map on the western side of the property]. A Revised Remedial Action Work Plan to bury the dieldrin-impacted soil and cover it with clean soil excavated at the site, as well as imported fill, was approved on October 26, 2010. Grading operations in association with redevelopment of the site for construction of residential units began March 1, 2011.

Description:	ONGOING RELEASE - Caller states she is concerned about dust clouds in the area for two weeks from a construction site of an old green house. Caller states there is a high Dieldren count in the soil as well as other pesticides and due to the rain weather event, there was free standing water on-site. Last week, a neighbor advised they noticed the responsible party vacuuming up the water and dumping it into a storm drain off of Parkwood Lane. In addition, 16 people have been fallen ill and 25 people are complaining of symptoms in the area.

Site History: The case involves a release of diesel fuel from a tractor trailer owned by Coca Cola Company of Southern California that veered off Highway 5 in Carlsbad, and crashed on the embankment beside Highway 5. The location was about 200 feet from the edge of Batiquitos Lagoon. Two saddle tanks of about 70 gallons each lost their contents of diesel fuel. A Notice was issued to Coca Cola Company to clean up the impacted soil so that diesel concentrations were less than 1,000

ppm in soil. A clean-up company excavated about 20 yards of contaminated soil and hauled it away. Two soil samples were collected about a foot below finish grade of the excavation. The estimated amount of soil excavated for disposal and recycling is approximately 37 tons. The soil was sent to Filter Recycling in Rialto, CA. A Voluntary Assistance Program (VAP) application was submitted to DEH on February 19, 2008 and case H39722-001 was opened. Even though an official report was never submitted documenting the clean-up, the data submitted demonstrates that diesel contamination was removed to acceptable levels. Provided that the information presented to DEH was complete, accurate, and representative of existing site conditions, this agency concurs that the cleanup goals established for the subject site have been met.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 08/04/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021

#### Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 08/04/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

#### NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

## ***Federal CERCLIS list***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 08/04/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/25/2021

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/22/2021	Source: EPA
Date Data Arrived at EDR: 03/23/2021	Telephone: 800-424-9346
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021

	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/10/2021	Source: Department of the Navy
Date Data Arrived at EDR: 05/13/2021	Telephone: 843-820-7326
Date Made Active in Reports: 08/03/2021	Last EDR Contact: 08/05/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 11/22/2021
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/17/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/21/2021	Telephone: 703-603-0695
Date Made Active in Reports: 08/11/2021	Last EDR Contact: 05/21/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/06/2021
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/17/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/21/2021	Telephone: 703-603-0695
Date Made Active in Reports: 08/11/2021	Last EDR Contact: 05/21/2021
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/06/2021
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 06/14/2021  
Date Data Arrived at EDR: 06/17/2021  
Date Made Active in Reports: 08/17/2021  
Number of Days to Update: 61

Source: National Response Center, United States Coast Guard  
Telephone: 202-267-2180  
Last EDR Contact: 06/17/2021  
Next Scheduled EDR Contact: 10/04/2021  
Data Release Frequency: Quarterly

## **State- and tribal - equivalent NPL**

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/23/2021  
Date Data Arrived at EDR: 04/23/2021  
Date Made Active in Reports: 07/12/2021  
Number of Days to Update: 80

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 07/22/2021  
Next Scheduled EDR Contact: 11/08/2021  
Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/23/2021  
Date Data Arrived at EDR: 04/23/2021  
Date Made Active in Reports: 07/12/2021  
Number of Days to Update: 80

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/10/2021	Source: Environmental Protection Agency

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2021

Telephone: 916-323-2514  
Last EDR Contact: 07/15/2021  
Next Scheduled EDR Contact: 11/01/2021  
Data Release Frequency: Quarterly

## CA FID UST: Facility Inventory Database

The Facility Inventory Database (FID) contains a historical listing of active and inactive underground storage tank locations from the State Water Resource Control Board. Refer to local/county source for current data.

Date of Government Version: 10/31/1994  
Date Data Arrived at EDR: 09/05/1995  
Date Made Active in Reports: 09/29/1995  
Number of Days to Update: 24

Source: California Environmental Protection Agency  
Telephone: 916-341-5851  
Last EDR Contact: 12/28/1998  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

## **Local Land Records**

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 05/27/2021  
Date Data Arrived at EDR: 05/28/2021  
Date Made Active in Reports: 08/20/2021  
Number of Days to Update: 84

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 05/25/2021  
Next Scheduled EDR Contact: 09/13/2021  
Data Release Frequency: Varies

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 04/27/2021  
Date Data Arrived at EDR: 05/03/2021  
Date Made Active in Reports: 05/19/2021  
Number of Days to Update: 16

Next Scheduled EDR Contact: 10/11/2021  
Data Release Frequency: Semi-Annually

### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Number of Days to Update: 85	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

#### CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 04/04/2021	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/20/2021	Telephone: 916-845-8400
Date Made Active in Reports: 07/07/2021	Last EDR Contact: 07/15/2021
Number of Days to Update: 78	Next Scheduled EDR Contact: 11/01/2021
	Data Release Frequency: Semi-Annually

#### LDS: Land Disposal Sites Listing (GEOTRACKER)

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Quality Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 06/03/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 09/20/2021
	Data Release Frequency: Quarterly

#### MCS: Military Cleanup Sites Listing (GEOTRACKER)

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 03/08/2021	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/09/2021	Telephone: 866-480-1028
Date Made Active in Reports: 03/31/2021	Last EDR Contact: 06/03/2021
Number of Days to Update: 22	Next Scheduled EDR Contact: 09/20/2021
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A
Date Made Active in Reports: 02/22/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (415) 495-8895
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/21/2021
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/04/2021
	Data Release Frequency: Quarterly

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 05/04/2021	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 05/18/2021	Telephone: 202-528-4285
Date Made Active in Reports: 08/11/2021	Last EDR Contact: 08/17/2021
Number of Days to Update: 85	Next Scheduled EDR Contact: 11/29/2021
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 07/13/2021
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/25/2021
	Data Release Frequency: Varies

### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018	Source: U.S. Geological Survey
Date Data Arrived at EDR: 04/11/2018	Telephone: 888-275-8747
Date Made Active in Reports: 11/06/2019	Last EDR Contact: 07/09/2021
Number of Days to Update: 574	Next Scheduled EDR Contact: 10/18/2021
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013  
Date Data Arrived at EDR: 03/21/2014

Data Release Frequency: No Update Planned

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Next Scheduled EDR Contact: 09/13/2021  
Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995  
Date Made Active in Reports: 08/07/1995

Number of Days to Update: 84	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: No Update Planned

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: Varies

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### *EDR Exclusive Records*

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 03/24/2021	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/11/2021	Telephone: 860-424-3375

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

PIRAEUS PROPERTY  
PIRAEUS STREET/PLATO PLACE  
ENCINITAS, CA 92024

### **TARGET PROPERTY COORDINATES**

Latitude (North):	33.079225 - 33° 4' 45.21"
Longitude (West):	117.295148 - 117° 17' 42.53"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	472452.5
UTM Y (Meters):	3659917.2
Elevation:	158 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	5641296 ENCINITAS, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06073C1035G	FEMA FIRM Flood data

Not Reported	

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ENCINITAS	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: GAVIOTA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 41 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	16 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:
2	16 inches	20 inches	unweathered bedrock	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	Not reported	Max: Min:	Max: Min:

#### Soil Map ID: 2

Soil Component Name: MARINA

Soil Surface Texture: loamy coarse sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy coarse sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
2	9 inches	57 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4
3	57 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 7.4

### Soil Map ID: 3

Soil Component Name: CIENEBA

Soil Surface Texture: coarse sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat excessively drained

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RESPONSIBLE PARTY: COVELOP INCORPORATED

---

**PERMIT CONDITIONS:**

1. All borings must be sealed from the bottom of the boring to the ground surface with an approved sealing material as specified in California Well Standards Bulletin 74-90, Part III, Section 19.D. **Drill cuttings are not an acceptable fill material. Bentonite slurries are not an acceptable fill material in the unsaturated zone.**
2. All borings must be properly destroyed within 24 hours of drilling.
3. Placement of any sealing material at a depth greater than 30 feet must be done using the tremie method.
4. This work is not connected to any known unauthorized release of hazardous substances. Any contamination found in the course of drilling and sampling must be reported to DEH. All water and soil resulting from the activities covered by this permit must be managed, stored and disposed of as specified in the SAM Manual in Section 5, II, D-4. ([http://www.sdcounty.ca.gov/deh/lwq/sam/manual\\_guidelines.html](http://www.sdcounty.ca.gov/deh/lwq/sam/manual_guidelines.html)) In addition, drill cuttings must be properly handled and disposed in compliance with the Stormwater Best Management Practices of the local jurisdiction.
5. Within 60 days of completing work, submit a well/boring construction report, including all well and/or boring logs and laboratory data to the Well Permit Desk. This report must include all items required by the SAM Manual, Section 5, Pages 6 & 7.
6. **This office must be given 24-hour notice of any drilling activity on this site and advanced notification of drilling cancellation. Please contact the Well Permit Desk at (858) 505-6688.**

## PROPERTY OWNER CONSENT

Proposed locations for subsurface work:

Property Address:

Assessor's Parcel Number (APN):

Piraeus Street

254-144-01-00

Encinitas, CA

PIRAEUS INVESTOR LLC

I, \_\_\_\_\_, owner of the property/properties listed above, give my permission to Geocon Incorporated (consulting company, contractor) to conduct the following work at the locations stated above.

- Install \_\_\_\_\_ monitoring wells
  Destroy \_\_\_\_\_ monitoring wells
  Drill & soil borings

I understand that Lilian Rodriguez (registered professional) of Geocon Incorporated (consulting company) and an authorized signer for Tri-County Drilling Incorporated (drilling company) have submitted a signed application to the Department of Environmental Health in which they have agreed to complete the above-stated work according to the requirements of the current SAM Manual, all ordinances and laws of the County of San Diego and the State of California pertaining to well/boring construction and destruction. I have arranged with the Responsible Party, the person who causes to have monitoring wells/borings installed or existing wells destroyed on this property, to ensure proper closure of the monitoring wells/borings.

Project No. G2307-11-02  
May 24, 2019

Well Permitting Clerk  
County of San Diego  
Department of Environmental Health  
Site Assessment and Mitigation Division  
5500 Overland Avenue, Suite 110  
San Diego, California 92123

Subject: SUBMITTAL OF FIGURES AND BORING LOGS FOR PERMIT CLOSURE  
DEH PERMIT NO. LMWP-003948  
APN NO: 254-144-01-00  
ENCINITAS, CALIFORNIA

To Whom It May Concern:

On behalf of Covelop Incorporated, we prepared this letter regarding 3 small-diameter and 4 large-diameter geotechnical borings (SB-1 through SB-3 and LB-1 through LB-4, respectively) advanced at the subject site under DEH Permit No. LMWP-003984. The subsurface materials encountered consist of undocumented fill, alluvium, Terrace Deposits, and Santiago Formation. We encountered perched groundwater in the small diameter borings at depths ranging from approximately 38 to 49 feet below the existing ground surface, and we encountered seepage in the large diameter borings at depths ranging from approximately 40 to 44 feet below the existing groundwater surface. The Vicinity Map, Figure 1, depicts the approximate location of the site. The Boring Location Map, Figure 2, presents the approximate locations of the borings. The site is also depicted on the Parcel Map, Figure 3. The small and large diameter borings were 8 and 30-inches in diameter, respectively, and the borings were terminated at depths ranging from approximately 52½ and 84 feet. We backfilled the small-diameter borings with a bentonite-grout mix, and the large-diameter borings with bentonite in accordance with the requirements of the permit following the completion of the drilling, sampling, and logging operations. Details of subsurface materials encountered in the borings and backfill materials are indicated on the attached boring logs.

Please contact the undersigned if you have any questions.

Very truly yours,

GEOCON INCORPORATED

  
Lilian E. Rodriguez  
RCE 83227

					EQUIPMENT <u>EZ BORE E-120</u>		BY: <u>R. ADAMS</u>			
MATERIAL DESCRIPTION										
0				SC	<b>TERRACE DEPOSITS (Qt)</b> Dense, damp to moist, reddish brown to dark brown, Clayey, fine to coarse SAND; massive to very weakly bedded, few brown paleosol horizons					
2										
4										
6										
8										
10						-Paleosol, 2"-6" thick, reddish to dark brown sand with trace silt				
12					SC	Medium dense to dense, moist, brown to reddish brow, Clayey, fine to coarse SAND; gravel and cobble up to 6 inches				
14										
16					SM	<b>SANTIAGO FORMATION (Tsa)</b> Dense to very dense, damp, grayish to yellowish brown, Silty, fine- to coarse-grained SANDSTONE; massive to very weakly laminated, some cross bedding, few sand filled fractures extending down from contact, narrowing with increasing depth				
18										
20							-Coarse grained			
22										
24						-Mottled				
26					CL	-Sharp, bioturbated contact				
28						Stiff to very stiff, damp, bluish gray to mottled orangish gray, CLAYSTONE; interbedded siltstone, oxidated laminae, short closed fractures				
30

					EQUIPMENT <b>EZ BORE E-120</b>		BY: <b>R. ADAMS</b>		
MATERIAL DESCRIPTION									
32				ML	Stiff to hard, damp, gray to grayish brown, Clayey, SILTSTONE; massive, occasional closed fracture				
34									
36									
38					-Transitional contact				
40				CL	Stiff to hard, moist, bluish gray, CLAYSTONE; very weakly fissured, oxidized laminae, little seepage, few closed fractures, few thin, 1/8" thick, gypsum veins parallel to bedding				
42									
44				SM	-Shear, 3/4" to 1" thick, gray, weak to moderately remolded, soft to very soft, plastic clay gouge; increase fissuring above shear				
46						-Shear, 1 1/2" thick, grayish brown, weakly remolded, fully developed, soft plastic, clay bed, internally sheared with numerous parting surfaces, 1° N63W DDD			
48				SP	very dense, damp, bluish gray, Silty, medium- to coarse-grained SANDSTONE				
50						-1/4" TO 1/2" sub-horizontal fractures with seepage; 40% TO 60% gypsum filled			
52					Very dense, damp, yellowish gray, medium- to coarse-grained SANDSTONE; very weakly laminated				
54					-Concretion bed				
56									
58									
60									
					BORING TERMINATED AT 60 FEET Groundwater encountered at 40 feet Backfilled with bentonite chips per manufacturing recommendations

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
