Project Description (Proposed actions, location, and/or consequences).

The Project consists of construction of a centralized treatment facility (CTF) located at the City's Operations Service Center for disinfection, fluoridation, and PFAS treatment of the City's groundwater; and the rehabilitation and/or replacement of three well facilities. The Project also includes installation of approximately 5,200 feet of piping to convey raw groundwater from the well facilities to the CTF; and upsizing 1,600 feet of treated water distribution main to allow City treated groundwater to be distributed from a centralized location.

Environmental issue areas identified to have potentially significant impacts include: Air Quality, Biological Resources, Cultural Resources, Geology/Soils, Hazards & Hazardous Materials, Noise, Transportation, Tribal Cultural resources, Utilities/Service Systems, and Wildfire. However, implementation of Mitigation Measures AQ-1, AQ-2, BIO-1, BIO-2, CUL-1a, CUL-1b, CUL-2, GEO-1, NOI-1, NOI-2, and TRA-1 would reduce potentially significant impacts to less than significant levels. No significant and unavoidable impacts would occur with Project implementation.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
