The City of Redding proposes to remove a custom concrete bench and demolish the existing stamped concrete pad, disposing of both offsite. The bank will be backfilled and built up with imported materials to replace lost materials in-kind. On the bank, 0.25-ton riprap will be placed, with geotextile fabric placed beneath the riprap above the ordinary high water mark. The riprap will be vegetated with willows to protect against future flood damage. A new custom bench, concrete curb, and new stamped concrete pad will be constructed.
