**SUBJECT:** Filing of Notice of Determination pursuant to Public Resources Code section 21108

**State Clearinghouse Number:** 2022070147

**Project Title:**

Putah Creek Bridge Rehabilitation Project (04-1Q570) (Lake or Streambed Alteration Agreement No. EPIMS SOL-55802-R3)

**Project Location (Solano):**

The Putah Creek Bridge Rehabilitation Project is located 5.7 miles west of the City of Winters on SR 128 in unincorporated Solano County, within the Monticello Dam U.S. Geological Survey Quadrangle, at 38.513180 degrees north latitude, and 122.095438 degrees west longitude (Section 28, Township 08 North, Range 02 West, SWNW). The Project spans Putah Creek, approximately 0.5 mile east of Monticello Dam that forms Lake Berryessa. The surrounding land use consists of rural recreational lands, including privately owned Canyon Creek Resort and CDFW owned/managed Putah Creek State Wildlife Area.

**Project Description:**

The California Department of Fish and Wildlife (CDFW) has executed Lake and Streambed Alteration Agreement (EPIMS-SOL-55802-R3), pursuant to Fish and Game Code section 1602, the project Applicant, California Department of Transportation.

The Project involves demolishing existing overhangs and railing along both sides of the bridge, constructing new overhangs, and installing new ST-75 Post and Beam Bridge Rail. Modifications to the bridge superstructure will be necessary to support added weight from new rails and overhangs. Modifications include adding concrete struts that will extend from the outermost longitudinal girders to the outer edge of new overhangs and install intermediate diaphragms between the middle and outermost longitudinal girders.

After existing overhangs and railing are demolished, the contractor will begin constructing the new overhang, struts, and intermediate diaphragms. Wooden falsework for concrete will be erected and used to form new overhangs, struts, and diaphragms. Concrete will be used to embed ST-75 railing into the overhangs. The concrete will be pumped into the falsework from trucks parked on the bridge deck. Falsework will be removed after the concrete finishes curing. Crews will work from scaffolding attached to the bridge. Cranes located at the northwest and southeast side of the bridge will deliver material and remove debris

This is to advise that CDFW, acting as a Responsible Agency, approved the project described above on April 21, 2025 and has made the following determinations regarding the project pursuant to California Code of Regulations section 15096, subdivision (i):

**Notice of Determination**

1. The project will not have a significant effect on the environment. This determination is limited to effects within CDFW's permitting jurisdiction as a Responsible Agency.
2. CDFW considered the Mitigated Negative Declaration prepared by the Lead Agency for this project pursuant to California Code of Regulations section 15096, subdivision (f).
3. Mitigation measures were made a condition of CDFW's approval of the project.
4. A Mitigation Reporting or Monitoring Plan was adopted by CDFW for this project.
5. A Statement of Overriding Considerations was not adopted by CDFW for this project.
6. Findings were not made by CDFW pursuant to California Code of Regulations section 15091.

The Mitigated Negative Declaration prepared for the project is available to the general public at the office location listed above for the Lead Agency. CDFW's record of project approval as a Responsible Agency is available at CDFW's regional office.
