☐ Statutory Exemptions. State code number: ___

Reasons why project is exempt: The City has analyzed potential environmental effects of the proposed Coastal Development Permit and has determined that the action is not subject to CEQA pursuant to Section 15301 and 15302. This project is exempt from the California Environmental Quality Act (CEQA) under Class 1 (Existing Facilities) of the CEQA Guidelines, California Code of Regulations, Division 6, Title 14, Chapter 3, because replacement of the existing home and associated improvements has no potential to have a significant effect on the environment. Class 1 exempts projects involving negligible or no expansion of use including but not limited to repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features.

The Class 2 (Section 15302) exemption consists of replacement or reconstruction of existing structures and facilities where the new structure will be located on the same site as the structure replaced and will have substantially the same purpose and capacity as the structure replaced, the existing residence will be demolished, and a new residence will be constructed with substantially the same footprint. While Class 2 does not specifically list a single-family residence, it is noted that the exemption is not limited to the examples provided. The reconstruction of the residence is consistent with the Class 2 Exemption because the new residence will have substantially the same purpose and capacity as the structure replaced.

The Class 3 (Section 15303) exemption consists of construction and location of limited numbers of new, small facilities or structures. Examples of the exemption include:

- (a) One single-family residence, or a second dwelling unit in a residential zone. . .
- (e) Accessory (appurtenant) structures including garages, carports, patios, swimming pools, and fences.

The proposed project is eligible for a Class 3 exemption because construction of a single-family residence and the related improvements including the garage, patio, and walls/fences are specifically included in the list of examples.

The California Environmental Quality Act (CEQA) allows categorical exemptions for projects that have been determined not to have a significant effect on the environment. (CEQA Guidelines §15300-15332. Each component of the project, including the demolition of the existing residence and accessory structures, and the reconstruction of the residence and accessory structures, meets criteria outlined in the Class 1, Class 2, and Class 3 exemptions. The project will not result in a cumulative impact or a significant environmental effect and will not damage scenic or historic resources and the appropriate environmental document for this project is a Notice of Exemption. Standard conditions of approval applied by the City for all construction projects of this nature will address any short-term construction related concerns.
