Notice of Completion, page 2

PRESENT LAND USE / ZONING / GENERAL PLAN DESIGNATION:

Present Land Use: The project site is in a highly industrial area, and is surrounded entirely by developed sites within the County of San Bernardino, City of Montclair, City of Ontario, or City of Chino.

State Street Wellhead Treatment Plant Site Construction

- North: Industrial (City of Montclair)
- East: Industrial (City of Ontario)
- South: LI: Limited Industrial (County)
- West: LI: Limited Industrial (County) / Industrial (City of Montclair)

The project site currently contains the City of Chino Reservoir 5 and Well 14.

Pipeline Alignments

The land uses surrounding the proposed pipeline alignments are as follows:

- City of Montclair: Industrial, Single Family Residential, Commercial, Medium Density Residential
- County of San Bernardino: MDR: Medium Density Res. 5-20 du/ac, C: Commercial, LI: Limited Industrial
- City of Ontario: Single Family and Industrial
- City of Chino: RD1: Rural Residential Density 1du/ac, General Commercial and Public Facility

Well 12 is located in the City of Chino on land designated as Public Facility. Surrounding land uses include County of San Bernardino Single Family Residential, City of Montclair Single Family Residential, and City of Chino Commercial use.

Zoning Classification: State Street Facility located in the County of San Bernardino: IC: Community Industrial. Well 12 is located in the City of Chino on land designated as Public Facility with a zoning classification of P: Public.

General Plan Designation: State Street Facility (Existing Well 14 and Reservoir 5 site), located in the County of San Bernardino: Public Quasi Public. Well 12 is located in the City of Chino on land designated as Public Facility.

PROJECT DESCRIPTION:

Continued....

The proposed project would provide treatment for nitrate, perchlorate, and 1,2,3 TCP at Wells 12 and 14. Treatment is anticipated to include pretreatment through sand separators followed by cartridge filters (solids removal), 1,2,3-TCP Removal through Granular Activated Carbon (GAC), perchlorate and nitrate removal through a proprietary ion exchange (IX) treatment system, then disinfection and storage in Reservoir 5 before distribution. The IX treatment system generates waste water known as brine, that will be disposed of through a new connection to north Non-Reclaimable Wastewater System (NRWS) brine disposal pipeline that is managed locally by the Inland Empire Utilities Agency (IEUA). The GAC system generates a periodic backwash water when the media is replaced that will be disposed of through a local sewer connection.
