Professional Certification

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the Property. We have developed and performed the all-appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

1.0 INTRODUCTION

The following report presents the findings of a Phase I Environmental Site Assessment (ESA) performed by EBA Engineering (EBA) for the property located at 1370 Burbank Avenue in Santa Rosa, California. The property is further identified by Sonoma County Assessor's Parcel Number (APN) 125-252-003, hereafter identified as the project site. This ESA was completed for The City of Santa Rosa (the Client) in conformance with ASTM Standard Practice E1527-13.

1.1 PURPOSE

The purpose of this environmental site investigation is to assess the possible contamination of the project site with hazardous or toxic substances or wastes. A site may contain these substances or wastes as a result of current or past site activities, unauthorized dumping or disposal, or migration of contaminants from adjacent or nearby properties.

The Client should be aware that strict interpretation of California and federal legislation and case law may hold the landowner responsible for any toxic liability including future cleanup costs and, potentially, historical assessments and remediation work on the project site. Such statement is not motivated by any condition of the project site but is a general observation of the advisability that property owners and purchasers exercise all appropriate diligence and alertness to hazardous material risks.

This report is not intended to provide the necessary level of detail to be utilized for structural demolition/remodeling or soil or groundwater remediation. For such activities, appropriate regulations should be followed to ensure adequate coverage of material handling, worker and employee safety, airborne contamination during construction, and the precise extent of any contamination for contractor directions. This report conforms to American Society of Testing and Materials (ASTM) Standards E 1527-13 for Phase I Environmental Site Assessments.

In defining a standard of good commercial and customary practice for conducting an environmental site assessment, the goal of the processes established by this practice is to identify recognized environmental conditions, historical recognized environmental conditions and controlled recognized environmental conditions. The term recognized environmental conditions (RECs) refers to the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term historic REC refers to a past release of a hazardous substance or petroleum hydrocarbons that has occurred in connection to the property and has been addressed to the satisfaction of applicable regulatory agencies without restricting use of the property or requiring controls. The term controlled REC refers to a past release of a hazardous substance or petroleum hydrocarbons that has occurred in connection to the property and has been addressed to the satisfaction of applicable regulatory agencies and allowed to remain in place subject to the implementation of required controls. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not

intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

By performing a Phase I ESA of a parcel of real estate with respect to the range of contaminants within the scope of the CERCLA (42 U.S.C. §9601) and petroleum products, a user satisfies one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability.

1.2 SCOPE OF WORK

This Phase I ESA was performed in general accordance with the requirements of the ASTM International Designation: E 1527-13, *Standard Practice for Environmental Site Assessment*. To determine the condition of the project site with respect to environmental liability, EBA performed the following tasks:

- 1) Reviewed past and current land use for indications of the manufacture, generation, use, storage, and/or disposal of hazardous substances;
- 2) Evaluated the potential for on-site soil and/or groundwater contamination resulting from past and present project site land use activities and, to the extent possible, adjacent off-site operations;
- 3) Rendered findings and professional opinions regarding the potential for environmental contamination at the project site; and
- 4) Recommend and perform further investigations (i.e., Phase II ESA), if deemed appropriate to evaluate whether contamination and/or environmental hazards exist at the locations identified.

1.3 SIGNIFICANT ASSUMPTIONS

No significant assumptions were made during the performance of this Phase I ESA.

1.4 LIMITATIONS, EXCEPTIONS, AND DEVIATIONS

Local, State, and Federal environmental regulations and property conditions can vary significantly over time. Consequently, the conclusions and recommendations presented as a result of this environmental site assessment apply strictly to the environmental regulations and Property conditions existing at the time EBA performed this study. EBA assumes that the data obtained and the inferences made during this investigation are reasonable and representative of the Property.

EBA makes no warranty, expressed or implied, except that our services have been performed in accordance with generally accepted existing environmental engineering, health and safety principles, and applicable regulations at the time and location of the study. EBA has analyzed the available information using currently applicable engineering techniques.

Please be advised that the recommendations presented herein are based solely on information made available to EBA by others, and includes professional interpretations based on limited research and data. Based on these circumstances, the decision to conduct additional investigative work to substantiate the findings and conclusions presented herein is the sole responsibility of the Client.

No Exceptions or Deviations occurred from the ASTM Standard.

1.5 SPECIAL TERMS AND CONDITIONS

This Phase I ESA was conducted in accordance with our executed contract.

1.6 USER RELIANCE

This report has been prepared solely for the Client and any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

Please note pursuant to Section 4.6 of the *ASTM Standard E 1527-13 for Phase I Environmental Site Assessments*, this report is valid for 180 days from the date noted herein.

1.7 REASON FOR PERFORMING PHASE I ESA

It is our understanding that this Phase I ESA was performed as part of environmental due diligence to support the proposed acquisition of the project site property.

2.0 SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

The project site property is located at 1370 Burbank Avenue in Santa Rosa, California and encompasses a single parcel of rural residential property that is 2.61 acres in size. The project site has two single-family residences, a mobile home trailer and several associated outbuildings. Figure 1, Appendix A shows the location of the project site. Figure 2, Appendix A shows the project site boundaries, as shown on the current tax assessor's map. Figure 3, Appendix A is an aerial photograph of the project site property. Photo Plates are also included in Appendix A that show relevant site features.

Legal descriptions of the project site are included in the Preliminary Title Report is enclosed in Appendix B.

The following presents project site specific information:

Site Name:	McCafferty Property
Site Location:	1370 Burbank Avenue, Santa Rosa, California
Tax Assessor Parcel No:	125-252-003
Site Owner:	Jesse McCafferty & Michelle Barton Trust

Site Occupants:	Tenant Occupied
Date of Ownership:	July 1996
Zoning:	Residential (R3-18)
Lot Size:	2.61-acres
County:	Sonoma
USGS Quadrangle:	Santa Rosa, California
Latitude and Longitude:	N 38°25'24.07" Latitude & W 122°43'59.09" Longitude
	** Approximate center of property

2.2 SITE CHARACTERISTICS

The project site consists of a single parcel of developed residential property that is 2.61-acre in size that is located within the southwestern portion of the City of Santa Rosa. The project site property contains two single-family dwellings, a mobile home trailer and several associated outbuildings.

2.3 CURRENT USE OF THE PROPERTY

The property is currently occupied by several tenants.

2.4 PHYSICAL SETTING

2.4.1 TOPOGRAPHY

The project site is generally flat and level and has limited topographic relief and is located at approximately 128 feet above mean sea level.

2.4.2 GEOLOGIC SETTING

The project site is located within the Coast Range Geomorphic Province of northern California. The Coast Range Geomorphic Province is generally characterized as a series of northwest trending elongated ridges and valleys that are a result of folding and faulting.

The project site is located on the southwest quadrant of the Santa Rosa Plain, which consists of Quaternary alluvial deposits that are up to 550 feet thick. The alluvial deposits form a nearly continuous blanket over the Santa Rosa Plain and consist of poorly sorted coarse sand and gravel, moderately sorted fine sand and silt, and silty clay. The project site has been mapped as having basement materials that underlie the alluvial fan deposits of the Petaluma Formation that consists of fluvial and lacustrine deposits with estuarine and transitional marine environment of Pliocene to late Miocene age. Portions of the Quaternary alluvial deposits may be underlain by the Wilson Grove Formation which consists of deep to shallow marine sediments with localized transitions to continental environments.

Groundwater in the area of the project site has been calculated to generally flow to the west to southwest with the predominant flow direction of the Laguna de Santa Rosa. Depths to groundwater in the area of the project site have been documented to exist between five to 15 feet below the ground surface. Please note that groundwater depths and flow direction have been demonstrated to be influenced by local topography and drainage courses and that groundwater levels have been observed to vary seasonally.

2.4.3 SURFACE WATER BODIES/FLOODPLAINS

Roseland Creek runs through from the northeast to southwest through the project site. The channel of Roseland Creek within the project site contains concrete within the entire bed of the creek that extends through the project site property.

A review of the Federal Emergency Management Agency Flood Insurance Rate Map [Map No. 06097C0736F] indicates that a portion of the project site is located with a 100 year floodplain.

2.4.4 HYDROGEOLOGY

The project site is located within the Santa Rosa Plain Watershed (SRPW) boundary. The project site is further delineated by the California Department of Water Resources (CDWR) as being within the Santa Rosa Valley groundwater basin and the sub-basin of Santa Rosa Plain. The groundwater storage unit has been identified as the Cotati Basin.

The principle source of recharge in the SRPW is from infiltration from streams within the watershed and direct infiltration from precipitation. Based on the surface topography and near site investigations, groundwater in the area of the project site is anticipated to flow to the south and west with the flow of Roseland Creek and towards Laguna de Santa Rosa.

2.5 DESCRIPTION OF STRUCTURES, ROADS AND IMPROVEMENTS

The project site contains two single-family dwellings, a mobile home trailer and several associated outbuildings. A single-family dwelling is located on the western side of the project site and is the first structure encountered upon entering the western side of the project site from Burbank Avenue. The dwelling consists of a single-story, wood-framed structure that has a concrete perimeter foundation. At the time of the property inspection the dwelling was reported to be occupied by a tenant. The condition of the dwelling was observed to be fair.

A domestic water supply is located to the east of the aforementioned dwelling. The well is reported to be used to supply potable water at the project site.

A second dwelling is located to the east of the domestic water supply well. The second dwelling also consists of a single-story, wood-framed structure that has an attached garage and slab on grade foundation. At the time of the property inspection the dwelling was reported to be occupied by a tenant. The condition of the dwelling was observed to be fair.

A concrete, slab on grade foundation is located to the northeast of the eastern dwelling. It is reported that the slab was the previous location of a carport that was recently removed by the owner of the property as an unpermitted structure. At the time of the property inspection the slab foundations remained at the site.

A mobile home trailer is located to the east of the concrete slab. The trailer appears to consist of several structures that have been joined together. At the time of the property inspection, a portion of the western side of the trailer appeared to be been partially

removed. The trailer appeared to be occupied by a tenant. The condition of the structure appeared to be poor.

A small greenhouse and bathroom structure are located to the south of the mobile home trailer. The greenhouse appeared to be used for the storage of household items. A septic system appears to be located on the western side of the bathroom structure. The use and condition of the septic system is unknown.

A pump house is located to the east of the greenhouse. The pump house appears to be a remnant of a water tower structure and consists of a wood framed structure with a slab on grade foundation. A second domestic water supply well is located within the pump house that also includes a water pressure tank and pump controls. The well appeared to be in use but did not contain a sealed top. A water storage tank is located on the west side of the pump house structure that appears to be used for the storage of water.

A mound septic system is located on the eastern side of the project site.

A portion of Roseland Creek runs through the eastern side of the project site and adjacent to the southern border of the property parcel. The creek bottom is lined with concrete.

The remainder of the project site consists of grassland and limited landscaping. Several brush and minor debris piles are present on the eastern side of the project site.

2.6 CURRENT ADJOINING PROPERTIES

The project site is bordered on the west by Burbank Avenue and on the north and south by vacant properties. Several developed residential properties are present bordering the eastern side of the project site.

3.0 USER PROVIDED INFORMATION

3.1 TITLE RECORDS

Title information was reviewed using the Preliminary Title Report dated March 29, 2017 and available public records from the Sonoma County Records Office. A copy of the Preliminary Title Report is included in Appendix B.

3.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS (AULs)

A review of Title information was performed by EBA using the Preliminary Title Report dated March 29, 2017 and available records available from the Sonoma County Recorder's Office. No environmental liens or Use Limitations were noted in record information reviewed.

3.3 OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The project site property is currently owned by Jesse McCafferty & Michelle Barton Trust.

3.4 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

The ASTM Standard requires an evaluation of environmental issues that would result in a devaluation of the property. There were issues of environmental concern identified at the project site from this assessment. However these issues are currently not fully defined and therefore no opinion is included regarding the value of the project site.

3.5 PREVIOUS ENVIRONMENTAL REPORTS

Several previous environmental reports were available for the project site property that are discussed and referenced herein.

4.0 RECORDS REVIEW

4.1 ENVIRONMENTAL RECORDS SOURCES

EBA contacted Environmental Data Resources (EDR) of Southport, Connecticut, to conduct a comprehensive Federal, state and local environmental records search for the project site and properties within a one-mile radius of the project site. The purpose of the database search was to identify potential exposure to the subject property from various environmental concerns and/or hazardous materials releases. The following databases and environmental programs are included in the database search:

- National Priority List
- Proposed National Priority List Sites
- NPL Federal Superfund Liens
- National Priority List Deletions
- CERCLIS Comprehensive Environmental Response, Compensation, & Liability Information System
- Federal Facility Site Information listing
- CERC-NFRAP CERCLIS No Further Remedial Action Planned

The Environmental Record Search (ERS) consists of a map showing the location of the identified sites relative to the project site, a summary listing the identified sites by street names, and a final report describing the sources investigated and the resulting findings. It should be noted that the findings are those noted on the regulatory database(s) and that accuracy and completeness of record information varies among information sources,

including government sources. The ERS findings are supplemented by interviews with owners/occupants/employees, and local government officials. Agency records review and historical data review are also used to ascertain the potential environmental significance of sites reported in the ERS. Results of the record search are presented in Appendix C.

The ERS did not identify the project site property as having issues of environmental concern. Several mapped sites as having environmental concerns were identified within a one-mile radius of the project site and are further discussed herein.

4.2 PROJECT SITE

The project site was not identified in the EDR Radius Map Report or applicable regulatory agencies as having issues of environmental concern. There is no indication of the use, generation or disposal of hazardous materials at the project site. Further there is no indication of the current or historic use of underground fuel storage tanks at the project site.

It should be noted that sampling of sediment within Roseland Creek was conducted during the environmental review and investigation of the New Roseland School located directly west of the project site. The sediment sampling indicated the presence of elevated concentrations of lead, zinc and polycyclic aromatic hydrocarbons (PAHs). The source of these compounds were attributed to contaminants that were washed into Roseland Creek from Burbank Avenue and the Roseland Creek watershed. As discussed Roseland Creek runs through the project site and there is a significant amount of watershed located upstream of the project site from urbanized areas. It is possible that sediments with environmental contaminants are present at the project site. It should be finally noted that the regulatory agencies involved with the development of the school property restricted the use of the creek area for residential use and indicated that any work within the creek would include provisions for sediment sampling and remediation if required.

The project site is located within an area that has been shown to have domestic water supply wells that have been impacted by releases of halogenated volatile organic compounds (HVOCs) from historical business operation located to the north of the project site on the Sebastopol Avenue corridor. Contaminants consisting of volatile organic compounds were determined to be present in a number of water supply wells in the greater area to the north of the project site. From a review of the available information it appears that the domestic water supply wells at the project site were sampled several times as part of the overall area investigation. The sampling results indicate that there was an initial detection of 1,2 Dichloroethane in the western well at a concentration of 1.4 micrograms per liter (ug/L) and 1.0 ug/L in the eastern well. There is limited information regarding the investigation and it appears that limited additional sampling of the wells was performed. A review of available sampling data for soil borings, groundwater monitoring wells and domestic water supply wells located in the greater area of the project site indicates that the known areas of groundwater impact were well north of the project site and generally located along the Sebastopol Road corridor. The current condition of the wells at the project site is unknown.

Copies of the available information regarding sampling the wells is included in Appendix D.

At the time of the property inspection the domestic water supply well located on the eastern side of the project site was observed to have an open top with no seal. It appears that the well is in use. The well should be fully sealed if it is to remain in use.

It should be noted that based on the age of the existing structures it is likely that asbestos containing materials and lead based paint are likely present. No testing for the presence of these materials was conducted as part of this assessment.

4.2.1 PROPERTIES WITHIN THE APPROXIMATE MINIMUM SEARCH DISTANCE

Several near site properties were identified in EDR Radius Map Report as having environmental concerns within the minimum search distance from the project site property as required by ASTM Standard 1527-13. The following provides additional information for relevant near site properties.

ROSELAND CREEK @ BURBANK AVENUE- BURBANK AVENUE, SANTA ROSA

The Roseland Creek @ Burbank Avenue site is located approximately 200 feet west of the project site property and identified in environmental databases as closed Spills, Leaks, Investigation and Cleanup (SLIC) site. During an environmental assessment for a future elementary school at 1683 Burbank Avenue soil samples collected from nearby Roseland Creek indicated elevated levels of lead, zinc and polycyclic aromatic hydrocarbons. Additional soil and surface water sampling indicated that the contaminated shallow soil was present in the creek channel sediments. Surface water samples were not reported to be impacted. The source of the contamination was suspected to be stormwater runoff from urbanized areas within the watershed area of Roseland Creek and it was recommended to remove the impacted soil from the creek bed under a Clean Water Act Section 401 permit for future projects that include creek repair or restoration. No additional information was available for this site. The North Coast Regional Water Quality Control Board (NCRWQCB) issued a *No Further Action* letter in November 2010.

The conditions encountered within Roseland Creek at the school property are likely representative of sediments within the creek both upstream and downstream of the school and including the project site. A general awareness of the potential of contaminated sediments within the creek should be recognized for any future work within Roseland Creek at the project site.

NEW ROSELAND SCHOOL – 1683 BURBANK AVENUE, SANTA ROSA

The Roseland School property is located approximately 200 feet west of the project site. The site is identified in the EDR radius Map Report and the Envirostor web site due to environmental investigations that were conducted as part of the entitlement and scoping for a school property. All school properties are subject to environmental review that is overseen by the California Department of Toxic Substances Control jurisdictional oversight. The process of investigation at the site included a Preliminary Endangerment Assessment that identified several areas of the property as having issues of environmental concern. The concerns included leaching from lead based paint from former buildings, the historic

use of agricultural chemicals and the presence of elevated levels of lead and polycyclic aromatic hydrocarbons in sediment of Roseland Creek as discussed above. Investigation included soil sampling and characterization of the existing conditions. Cleanup at the property included the removal of soil that was contaminated with lead and a land use restriction in the area of Roseland Creek that would not allow for residential use of this area. It appears that all environmental issues at the property have been identified and remediated to the satisfaction of applicable agencies. Based on the available information the site is seen as posing no threat to the project site. It should be noted however that conditions in Roseland Creek may be representative of the condition of the creek within the project site.

McMINN AVENUE SUPERFUND AREA, SANTA ROSA

The McMinn Superfund area represents an area of study extending from Highway 101 on the east to Stony Point Road on the west and Highway 12 on the north to Roseland Creek on the south. This area was designated as a Superfund site by the California Department of Toxic Substances Control in 1984 after petroleum and solvent contaminants were detected in several domestic water supply wells in the area. A variety of investigations have been conducted in this area since the listing as a Superfund site in 1984. These investigations include domestic well sampling events, monitoring well sampling events, soil gas and indoor air surveys and contamination source identification. Many sites within the McMinn Superfund Area are undergoing investigation and cleanup activities under the direction of the NCRWQCB and several of these sites have been issued closure notices that require no further action. Investigation is on-going at the remaining sites.

A majority of the sites located within the McMinn Superfund area are located approximately 0.75 miles northeast to northwest of the project site property on the Sebastopol Avenue corridor. Groundwater in the superfund area has been calculated to flow generally in a southwesterly direction. From a review of available information there is no indication that the impacts from the McMinn area have impacted the project site.

SEBASTOPOL ROAD AT WEST AVENUE- HVOC PLUME, SANTA ROSA

The Sebastopol Road at West Avenue HVOC Plume site is located within the McMinn Superfund area and is identified as an open SLIC site due to contamination from halogenated volatile organic compounds (HVOCs). Files reviewed at the NCRWQCB indicate a groundwater investigation is ongoing to characterize and monitor contamination from HVOCs that have been detected in domestic water wells in this area. As part of this investigation, monitoring wells have been installed in the area represented by Sebastopol Road, West Avenue, Sunset Avenue, and McMinn Avenue. Analytical results from the monitoring events have shown detections of several HVOCs including tetrachloroethene, trichloroethylene, cis-1,2-dichloroethene, carbon tetrachloride, freon, and chloroform. The petroleum constituents benzene, toluene, ethylbenzene, xylenes, and methyl tert-butyl ether were also detected in groundwater samples obtained from the monitoring wells.

Documents reviewed at the NCRWQCB indicated that after several years of investigation of the HVOC plume on numerous sites in the area, it was determined that petroleum hydrocarbons occurred more extensively in the investigated area than HVOCs. It was

requested that since HVOCs and petroleum hydrocarbons are commingled in certain areas, mitigation of HVOCs cannot begin until petroleum hydrocarbon are fully evaluated. Several sites documented to be contributing to the petroleum hydrocarbon contamination in the area have completed investigation and remedial activities.

Several former dry cleaning facilities in the area have been and/or are currently being investigated for their potential contribution to the HVOC plume including Lange Cleaners (555 Sebastopol Road), Cleaning Mart (651 Sebastopol Road), My Cleaners (426 Sebastopol Road), Golden State Linen Services (900 Sebastopol Road), BSC Cleaners (800 Sebastopol Road), Roseland Cleaners (761 Sebastopol Road) and Holland Cleaners (700 Sebastopol Road). All of these sites are located a significant distance from the project site property. From a review of available information there is no indication that the releases at these properties have impacted the project site and all are seen as posing a low threat to the project site.

SEBASTOPOL ROAD COMMINGLED PLUME GROUP, SANTA ROSA

The Sebastopol Road Commingled Plume is located within the McMinn Superfund area and consists of three former leaking UST sites including BP/Redwood Oil #110 (760 Sebastopol Road), Wilson Baugh Enterprise (805 Sebastopol Road) and Beacon #3489 (921 Sebastopol Road). These sites are all identified as having active investigations related to petroleum hydrocarbon impacts from former leaking USTs.

A groundwater monitoring network for all three sites consists of 52 monitoring wells with petroleum hydrocarbon impacts extending from 760 Sebastopol Road west to 921 Sebastopol Road and south approximately 300 feet. Detections of benzene and total petroleum hydrocarbons as gasoline (TPH-g) exist throughout all three sites with impacts of methyl tert butyl ether (MtBE) concentrated mainly at the 921 Sebastopol Road site.

Groundwater sampling has indicated the highest contaminants in groundwater generally to be confined to the 760 and 921 Sebastopol Road sites, respectively with the highest benzene detection occurring near the southwest corner of Sebastopol Road and West Avenue.

Active remediation is occurring at all three sites that include air sparing, groundwater pump and treat and/or soil vapor extraction. It likely that environmental investigation and remediation of these sites will continue into the foreseeable future.

Groundwater in this area has been calculated to flow in a southwesterly direction. There is no indication that releases from the identified sites have impacted the project site property. Due to the distance of the identified sites from the project site and the limited extent of contamination these sites are seen as posing a minimal risk to the project site property.

ADDITIONAL SITES

Additional properties within the McMinn Superfund area and within the surrounding area of the project site are identified in regulatory agency files as having environmental issues. Several of these sites have completed investigations with regulatory oversight related to

having investigations related to historic or leaking USTs. Due to the distance of these identified sites from the project site and the fact that many have completed investigations and/or cleanups, all of the additional sites are seen as posing a minimal risk to the project site property.

4.2.2 ORPHAN SITES

EDR orphan site designation indicated insufficient address information for an identified site to be plotted. EBA reviewed the Orphan Sites identified in the Radius Map Report. Neither the project site nor any near site properties were identified in the Orphan Summary.

4.2.3 Vapor Encroachment Screening

Vapor encroachment screening pursuant to ASTM Standard 2600-10 was conducted for the project site property in conjunction with this assessment. Tier 1 vapor screening was performed to determine if vapor intrusion was a threat to the present or future use of the project site due to the presence of the documented release of environmental contaminants at near site properties. The Tier 1 screening is based on the following factors:

- Types and concentrations of contaminants present
- Soil characteristics
- Depth to groundwater
- Location of the project site property in relation to the known or suspected contaminants
- Vapor conduits
- Cleanup status of the contaminated property

The minimum distance criteria for the assessment of vapor sources pursuant to ASTM 2600-10 is one-tenth mile (528 feet) for petroleum hydrocarbons and one-third mile (1,742 feet) for volatile organic compounds. As discussed there is no indication of the use, storage or disposal of hazardous materials at the project site. Further, there is no indications of a release of petroleum hydrocarbons or volatile organic compounds at the project site.

Also as discussed there are documented releases of petroleum hydrocarbons and volatile organic compounds in the greater area surrounding the project site. No documented releases of petroleum hydrocarbons have been documented within 528 feet of the project site. As discussed there has been documented releases of volatile organic compounds at properties located north of the project site within the McMinn Superfund area and Sebastopol Road corridor. However, many of these properties are located a significant distance (greater than 1,000 feet) from the project site and all have been generally well characterized to demonstrate that there is no indication of releases from these properties impacting the project site.

Soil at the project site consists of alluvial soil consisting of a heterogeneous mix of sand, silt and clays. The soil at the project site would be expected to be transmissive of soil vapor.

Groundwater at the project site is expected to be shallow and vary seasonally. Groundwater would be the expected transport mechanism for contaminant transport and movement. Depths to groundwater are expected to vary seasonally with high groundwater conditions in the winter months.

Potential vapor conduits such as utility conduits are expected to be present in the area of the project site within public right of ways and road ways.

As discussed herein there has been several sites with documented releases of petroleum hydrocarbons and volatile organic compounds in the greater area of the project site. All of the identified sites are located a significant distance from the project site and there is no indication that releases at these properties have impacted the project site. Based on a review of available information regarding the project site and properties in the surrounding area the threat of vapor intrusion at the project site is seen as unlikely.

4.3 ADDITIONAL ENVIRONMENTAL RECORDS SOURCES - INTERVIEWS & REGULATORY AGENCY REVIEWS

Supplemental interviews and research were performed based on findings from the environmental records search. The interview and research process targeted both project site and regulatory personnel and regulatory agencies in an attempt to ascertain the nature and status of known environmental issues. Regulatory agencies and individuals contacted during the information review process included:

- Mr. Jesse McCafferty – Project site property owner
- Craig Hunt – North Coast Regional Water Quality Control Board
- City of Santa Rosa Fire Department
- City of Santa Rosa Community Development Department
- Sonoma County Assessor's Office
- Sonoma County Recorder's Office
- Sonoma County Department of Health Services
- Sonoma County Department of Fire & Emergency Services
- Sonoma County Permit & Resource Management Department
- North Coast Regional Water Quality Control Board
- California Department of Toxic Substances Control
- California State Water Resources Control Board Geotracker Website
- California Department of Toxic Substances Control Envirostor Website

Regulatory agency files were reviewed at the agencies listed above. The findings from the file reviews are as follows:

CITY OF SANTA ROSA FIRE DEPARTMENT

There were limited records available for the project site at this agency that included permitting records for the removal of a carport.

CITY OF SANTA ROSA COMMUNITY DEVELOPMENT DEPARTMENT

Code Enforcement and permitting for the recent correction of building violations were available at this agency.

SONOMA COUNTY ASSESSOR'S OFFICE

Development and tax records were reviewed at the Sonoma County Assessor's Office website. No significant data gaps were noted within the available information.

SONOMA COUNTY RECORDER'S OFFICE

Recorded deeds and other relevant site documentation were reviewed at the Sonoma County Recorder's Office website. No environmental liens or deed restrictions were noted in the available information.

SONOMA COUNTY DEPARTMENT OF HEALTH SERVICES

There were no records available for the project site at this agency.

SONOMA COUNTY DEPART OF FIRE & EMERGENCY SERVICES

No information related to the project site was available from this agency.

SONOMA COUNTY PERMIT & RESOURCE MANAGEMENT DEPARTMENT

Building and permit records dating from 1978 were available for the project site from this agency.

NORTH COAST REGIONAL WATER QUALITY CONTROL BOARD

There were limited records available for the project site at this agency which included information regarding sampling of the domestic water supply well. Information regarding several properties in the surrounding area was also available at this agency which was reviewed from the Geotracker database.

CALIFORNIA DEPARTMENT OF TOXIC SUBSTANCES CONTROL

No files were available for the project site property at this agency.

CALIFORNIA STATE WATER RESOURCES CONTROL BOARD GEOTRACKER WEB SITE DATABASE

The Geotracker web site was consulted to determine if either the project site or surrounding properties were identified in this environmental database as having environmental concerns. The project site was not identified. Several surrounding sites were identified in the surrounding area of the project site property. These identified sites are duplicative of the sites identified in the EDR Radius Map Report.

CALIFORNIA DEPARTMENT OF TOXIC SUBSTANCES CONTROL ENVIROSTOR WEB SITE DATABASE

The Envirostor web site was consulted to determine of either the project site or surrounding properties were identified in this environmental database as having environmental concerns. The project site was not identified. Several surrounding sites were identified in the area of the project site property. These identified sites are duplicative of the sites identified in the EDR Radius Map Report.

4.4 PHYSICAL SETTING SOURCES

Several sources of information were reviewed to establish the physical setting of the project site property including the following:

- Google Earth
- USGS Topographic Maps
- Published Geologic references

4.5 HISTORICAL USE INFORMATION FOR THE PROJECT SITE

The history of the project site was researched to ascertain the past use from the present back to the property's first developed use. Reasonably ascertainable historical information sources were reviewed to determine the history of the project site property. The following historical sources were reviewed as part of this assessment:

- Historical aerial photographs
- Historical Maps and research
- Interview with property owner

4.5.1 HISTORICAL SUMMARY

The project site property appears to be originally developed as a rural residential property some time prior to 1942. Aerial photographs dating from 1942 indicate that both dwellings and several of the associated outbuilding were present at the project site during this time period. It should be that the area of the project site was annexed into the City of Santa Rosa in October 2017.

Recorded documents indicate the Jesse McCafferty purchased the project site in July 1996 from the Southpoint Development Corporation. Mr. McCafferty indicated that the use of the project site has been as a residential property. Historical documents confirm that the use of the project site has consisted primarily as rural residential use with limited agricultural use.

Due to the passage of time there is a lack of previous property owners; however, from the available information it appears that the history of the project site is well known with no significant data gaps.

4.5.2 HISTORICAL AERIAL PHOTOGRAPHS

Historical aerial photographs were obtained from Environmental Data Resources for the years 1942, 1952, 1968, 1973, 1983, 1985, 1993, 2005, 2006, 2010 and 2014. The following is a summary of the historic use of the project site based on a review of these photographs.

1942 PHOTOGRAPH

The 1942 photograph indicates two dwellings located on the western portion of the project site. Several additional structures that appear to consist of the water tower, pump house and a small garage are visible on the central portion of the property. Burbank Avenue is

visible to the west of and adjacent to the project site. Remnants of an orchard are visible within the eastern portion of the property parcel. Roseland Creek is visible running from the northeast to southwest through the project site. The surrounding area includes orchards to the north and west and rural residential properties to the south and east.

1952 PHOTOGRAPH

The 1952 photograph indicates no significant changes to the project site from the 1942 photograph. The surrounding area appears generally unchanged.

1968 PHOTOGRAPH

The 1968 photograph indicates no significant changes to the project site from the 1952 photograph. The surrounding area appears generally unchanged.

1973 PHOTOGRAPH

The 1973 photograph indicates no significant changes to the project site from the 1968 photograph. The surrounding area appears generally unchanged.

1982 PHOTOGRAPH

The 1982 photograph indicates few changes from the 1973 photograph. The surrounding area appears unchanged.

1985 PHOTOGRAPH

The 1985 photograph indicates few changes from the 1982 photograph. The surrounding area appears unchanged.

1993 PHOTOGRAPH

The 1993 photograph indicates few changes from the 1985 photograph. The surrounding area appears unchanged with the exception that the orchards to the north of the project site have been removed.

2006 PHOTOGRAPH

The 2006 photograph indicates few changes from the 1993 photograph. The surrounding area appears generally unchanged.

2010 PHOTOGRAPH

The 2010 photograph indicates few changes from the 2006 photograph. The surrounding area appears generally unchanged.

2014 PHOTOGRAPH

The 2014 photograph shows the project site property as it exists today. The surrounding area is generally unchanged.

Copies of the historical aerial photographs are included in Appendix E.

4.5.3 SANBORN FIRE INSURANCE MAPS

Coverage from historic Sanborn Fire insurance maps is not available for the area of the project site.

4.6 HISTORICAL USE INFORMATION FOR ADJOINING PROPERTIES

Historic research was ascertained for adjoining properties by reviewing the historical documents referenced above.

5.0 SITE RECONNAISSANCE

5.1 METHODOLOGY AND LIMITING CONDITIONS

EBA personnel conducted a site reconnaissance on March 12, 2018. The site reconnaissance entailed viewing the project site and the surrounding areas. The site was inspected to observe the property and to identify discernible or potential environmental concerns. In addition, a reconnaissance of adjacent properties was performed to confirm surrounding land use and conditions. Information was obtained by interviews with knowledgeable individuals regarding the past and current uses of the project site. No limitations were encountered to limit the extent of the property inspection. Findings from the site reconnaissance activities are summarized in the following sections.

5.2 CURRENT USE OF THE PROPERTY

The property currently consists of a rural residential property with two single-family dwellings and a mobile home trailer that are reported to be occupied by tenants.

5.3 EXTERIOR OBSERVATIONS

As discussed there are multiple structures present at the project site that include two dwellings, a mobile home trailer and several associated outbuildings. The dwellings are reported to be occupied by tenants. Several brush and minor debris piles were observed within the project site. At the time of the property inspection it appeared that several structures had been recently demolished and removed from the property.

5.4 INTERIOR OBSERVATIONS

No interior inspections of the dwellings was performed as part of this assessment. The remaining structure were inspected at the time of the property inspection. The structures appeared to be either empty or used for the storage of personal property.

5.5 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

No hazardous materials or wastes or petroleum products were observed to be present at the project site.

5.5.1 ODORS

No odors were observed during the site reconnaissance.

5.5.2 POOLS OF LIQUID

No pools of free liquid indicative of hazardous materials or hazardous wastes were observed at the project site during the site reconnaissance.

5.5.3 DRUMS

No drums were identified at the project site at the time of the site reconnaissance.

5.5.4 UNIDENTIFIED SUBSTANCE CONTAINERS

No unidentified substance containers were identified at the project site at the time of the site reconnaissance.

5.5.5 INTERIOR STAINS OR CORROSION

No interior stains were observed within the structures at the project site.

5.5.6 DRAINS AND SUMPS

No sumps or sumps were observed at the project site during the site reconnaissance.

5.5.7 PITS, PONDS OR LAGOONS

No pits, ponds or lagoons were observed at the project site during the reconnaissance. As discussed herein Roseland Creek runs from the northeast to southwest through the project site.

5.5.8 STAINED SOIL OR PAVEMENT

No stained soil or pavement was identified at the project site at the time of the site reconnaissance.

5.5.9 SOLID WASTE

There were several small debris piles present at the project site at the time of the property inspection. The materials appeared to consist primarily of brush and yard debris.

5.5.10 STRESSED VEGETATION

No areas of stressed vegetation were observed during the site reconnaissance.

5.5.11 WELLS

There are two water supply wells present at the project site. The wells are located on the western and central portion of the property parcel and both appear to be in active use. It should be noted the well located in the central portion of the property has an open top with no seal.

5.5.12 SEPTIC SYSTEMS

There is reported to be three septic systems present at the project site. One is centrally located within the property and is associated with the outdoor bathroom. The second system consists of a mound system that is located on the eastern side of the property parcel. The third is reported to be used for the dwelling located on the western side of the property parcel.

5.5.13 ELECTRICAL TRANSFORMERS

No electrical transformers were observed at the project site during the site inspection.

5.5.14 UNDERGROUND STORAGE TANKS

There is no indication of the current or historic use of underground fuel tanks at the project site property.

5.5.15 ABOVEGROUND STORAGE TANKS

No aboveground fuel tanks were observed at the project site during the site reconnaissance.

5.6 NON-SCOPE OBSERVATIONS

5.6.1 ASBESTOS

The existing structures located at the project site were constructed some time before 1942. Based on the age of the structures, asbestos containing materials are expected to be present. No testing for asbestos was conducted as part of this assessment.

5.6.2 LEAD PAINT

The existing structures located at the project site were constructed some time before 1942. Based on the age of the structures, lead based paint is expected to be present. No testing for lead based paint was conducted as part of this assessment.

5.6.3 RADON

The U.S. Environmental Protection Agency Radon Zone Classification for Sonoma County is 3, which is defined as having a low potential to have radon concentration less than 2 picocuries per liter (pCi/L). The U.S. EPA action level for radon is 4.0 pCi/L. Based on the radon concentration information, it is unlikely that radon abatement activities would be required at the project site.

6.0 DISCUSSION

From the information reviewed for this assessment it appears that the project site was initially developed as rural residential property some time before 1942. Historic records reviewed for this assessment indicate that the two dwellings and several of the existing associated outbuildings were present at the project site from the early 1940's. It appears that additional structures were added to the property over time.

The project site is not identified in regulatory agency records or databases as having issues of environmental concern. At the time of the property inspection no hazardous materials or wastes were observed or soil staining to indicate a release. There is no indication of the current or historic use of underground or aboveground fuel storage tanks at the project site.

As discussed herein there is documentation that the domestic water supply wells at the project site were sampled as part of the area wide investigation of environmental contaminants from releases at properties located to the north of the project site located

along the Sebastopol Road corridor. Sampling of the domestic water supply wells indicated the presence of 1,2 Dichloroethane at concentrations of 1.0 and 1.4 ug/L. Subsequent sampling of the wells did not indicate the presence of these compounds. It appears that no long term sampling of the wells has occurred and it appears that the wells are still in active use at the project site. The current condition of the wells is unknown.

As discussed herein there are a number of identified sites in the greater surrounding area of the project site that have documented releases of contaminants to soil and groundwater. Many of these sites have been fully investigated and closed with regulatory agency oversight and direction. There is still active investigation and remedial activities at several of the identified properties. All of these sites are located a significant distance from the project site and there is no indication that impacts from these properties to the project site.

7.0 CONCLUSIONS/RECOGNIZED ENVIRONMENTAL CONDITIONS

EBA Engineering has performed this Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of the property located at 1370 Burbank Avenue in Santa Rosa, California. Any exceptions to, or deletions from, this practice are described herein. Based on conclusions from the environmental records search, historical data review, and the site reconnaissance we find the following recognized environmental conditions present at the project site property:

- The detection of 1,2 Dichloroethane in the domestic water supply wells at the project site is a Recognized Environmental Condition. Limited information is available regarding the detection of this compound in the wells at the project site and the wells appear to both remain in use.

8.0 NON-SCOPE CONSIDERATIONS

8.1 NON-SCOPE CONSIDERATIONS

The following environmental issues are outside the scope (non-scope considerations) of the standard practice defined by ASTM Standard Practice E 1527-13:

- Regulatory Compliance;
- Cultural and Historic Resources;
- Industrial Hygiene;
- Health and Safety;
- Ecological Resources;
- Endangered Species;
- Indoor Air Quality;
- High Voltage Power Lines;
- Biological Agents; and
- Mold

EBA identified no ASTM non-scope considerations/RECs in connection with the project site that represent potential business environmental risk but are outside the standard scope of services prescribed by ASTM Standard Practice E 1527-13.

8.2 ADDITIONAL SERVICES

No additional services beyond the standard scope of services prescribed by ASTM Standard Practice E 1527-13 were requested by the Client.

9.0 RECOMMENDATIONS

Based on information discussed in this assessment and given the proposed use of the project site for a buffer along the adjoining properties of the Laguna Wastewater Treatment Plant, the following recommendations are included for consideration:

- Consider testing both of the existing domestic wells at the project site for volatile organic compounds and petroleum hydrocarbons.
- Cap and seal the eastern domestic water supply well at the project site property if it is to remain in use.
- Be aware that sediments within Roseland Creek may require testing and remediation if work is conducted within the bed and bank of the creek.
- If the structures at the project site are to be remodeled or demolished they should be assessed for the presence of asbestos containing materials and lead based paint by a qualified professional.

APPENDIX B
PRELIMINARY TITLE REPORT

First American Title

Guarantee

CLTA Guarantee Form No. 28 -
Condition of Title

ISSUED BY

First American Title Insurance Company

GUARANTEE NUMBER

5026900-5431865

SUBJECT TO THE EXCLUSIONS FROM COVERAGE, THE GUARANTEE CONDITIONS ATTACHED HERETO AND MADE A PART OF THIS GUARANTEE.

FIRST AMERICAN TITLE INSURANCE COMPANY
a Nebraska corporation, herein called the Company

GUARANTEES

the Assured named in Schedule A of this Guarantee

against loss or damage not exceeding the Amount of Liability stated in Schedule A sustained by the Assured by reason of any incorrectness in the Assurances set forth in Schedule A

First American Title Insurance Company

Dennis J. Gilmore
President

Jeffrey S. Robinson
Secretary

By:

Authorized Countersignature

This jacket was created electronically and constitutes an original document

© California Land Title Association. **All rights reserved.** The use of this Form is restricted to CLTA subscribers in good standing as of the date of use. All other uses prohibited. Reprinted under license or express permission from the California Land Title Association.

EXCLUSIONS FROM COVERAGE

Except as expressly provided by the assurances in Schedule A, the Company assumes no liability for loss or damage by reason of the following:

- (a) Defects, liens, encumbrances, adverse claims or other matters against the title to any property beyond the lines of the Land.
- (b) Defects, liens, encumbrances, adverse claims or other matters, whether or not shown by the Public Records (1) that are created, suffered, assumed or agreed to by one or more of the Assureds; or, (2) that result in no loss to the Assured.
- (c) Defects, liens, encumbrances, adverse claims or other matters not shown by the Public Records.
- (d) The identity of any party shown or referred to in any of the schedules of this Guarantee.

- (e) The validity, legal effect or priority of any matter shown or referred to in any of the schedules of this Guarantee.
- (f) (1) Taxes or assessments of any taxing authority that levies taxes or assessments on real property; or, (2) proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not the matters excluded under (1) or (2) are shown by the records of the taxing authority or by the Public Records.
- (g) (1) Unpatented mining claims; (2) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (3) water rights, claims or title to water, whether or not the matters excluded under (1), (2) or (3) are shown by the Public Records.

GUARANTEE CONDITIONS

1. Definition of Terms.

The following terms when used in the Guarantee mean:

- a. the "Assured": the party or parties named as the Assured in Schedule A, or on a supplemental writing executed by the Company.
- b. "Land": the Land described or referred to in Schedule A, and improvements affixed thereto which by law constitute real property. The term "Land" does not include any property beyond the lines of the area described or referred to in Schedule A, nor any right, title, interest, estate or easement in abutting streets, roads, avenues, alleys, lanes, ways or waterways.
- c. "Mortgage": mortgage, deed of trust, trust deed, or other security instrument.
- d. "Public Records": those records established under California statutes at Date of Guarantee for the purpose of imparting constructive notice of matters relating to real property to purchasers for value and without knowledge.
- e. "Date of Guarantee": the Date of Guarantee set forth in Schedule A.
- f. "Amount of Liability": the Amount of Liability as stated in Schedule A.

2. Notice of Claim to be Given by Assured.

The Assured shall notify the Company promptly in writing in case knowledge shall come to an Assured of any assertion of facts, or claim of title or interest that is contrary to the assurances set forth in Schedule A and that might cause loss or damage for which the Company may be liable under this Guarantee. If prompt notice shall not be given to the Company, then all liability of the Company shall terminate with regard to the matter or matters for which prompt notice is required; provided, however, that failure to notify the Company shall in no case prejudice by the failure and then only to the extent of the prejudice.

3. No Duty to Defend or Prosecute.

The Company shall have no duty to defend or prosecute any action or proceeding to which the Assured is a party, notwithstanding the nature of any allegation in such action or proceeding.

4. Company's Option to Defend or Prosecute Actions; Duty of Assured to Cooperate.

Even though the Company has no duty to defend or prosecute as set forth in Paragraph 3 above:

- a. The Company shall have the right, at its sole option and cost, to institute and prosecute any action or proceeding, interpose a defense, as limited in Paragraph 4 (b), or to do any other act which in its opinion may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A or to prevent or reduce loss or damage to the Assured. The Company may take any appropriate action under the terms of this Guarantee, whether or not it shall be liable hereunder, and shall not thereby concede liability or waive any provision of this Guarantee. If the Company shall exercise its rights under this paragraph, it shall do so diligently.
- b. If the Company elects to exercise its options as stated in Paragraph 4(a) the Company shall have the right to select counsel of its choice (subject to the right of the Assured to object for reasonable cause) to represent the Assured and shall not be liable for and will not pay the fees of any other counsel, nor will the Company pay any fees, costs or expenses incurred by an Assured in the defense of those causes of action which allege matters not covered by this Guarantee.
- c. Whenever the Company shall have brought an action or interposed a defense as permitted by the provisions of this Guarantee, the Company may pursue any litigation to final determination by a court of competent jurisdiction and expressly reserves the right, in its sole discretion, to appeal from an adverse judgment or order.
- d. In all cases where this Guarantee permits the Company to prosecute or provide for the defense of any action or proceeding, the Assured shall secure to the Company the right to so prosecute or provide for the defense of any action or proceeding, and all appeals therein, and permit the Company to use, at its option, the name of such Assured for this purpose. Whenever requested by

GUARANTEE CONDITIONS (Continued)

the Company, the Assured, at the Company's expense, shall give the Company all reasonable aid in any action or proceeding, securing evidence, obtaining witnesses, prosecuting or defending the action or lawful act which in the opinion of the Company may be necessary or desirable to establish the correctness of the assurances set forth in Schedule A to prevent or reduce loss or damage to the Assured. If the Company is prejudiced by the failure of the Assured to furnish the required cooperation, the Company's obligations to the Assured under the Guarantee shall terminate.

5. Proof of Loss or Damage.

- a. In the event the Company is unable to determine the amount of loss or damage, the Company may, at its option, require as a condition of payment that the Assured furnish a signed proof of loss. The proof of loss must describe the defect, lien, encumbrance, or other matter that constitutes the basis of loss or damage and shall state, to the extent possible, the basis of calculating the amount of the loss or damage.
- b. In addition, the Assured may reasonably be required to submit to examination under oath by any authorized representative of the Company and shall produce for examination, inspection and copying, at such reasonable times and places as may be designated by any authorized representative of the Company, all records, books, ledgers, checks, correspondence and memoranda, whether bearing a date before or after Date of Guarantee, which reasonably pertain to the loss or damage. Further, if requested by any authorized representative of the Company, the Assured shall grant its permission, in writing, for any authorized representative of the Company to examine, inspect and copy all records, books, ledgers, checks, correspondence and memoranda in the custody or control of a third party, which reasonably pertain to the loss or damage. All information designated as confidential by the Assured provided to the Company pursuant to this paragraph shall not be disclosed to others unless, in the reasonable judgment of the Company, it is necessary in the administration of the claim. Failure of the Assured to submit for examination under oath, produce other reasonably requested information or grant permission to secure reasonable necessary information from third parties, as required in the above paragraph, unless prohibited by law or governmental regulation, shall terminate any liability of the Company under this Guarantee to the Assured for that claim.

6. Options to Pay or Otherwise Settle Claims: Termination of Liability.

In case of a claim under this Guarantee, the Company shall have the following additional options:

- a. To pay or tender payment of the Amount of Liability together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay.

- b. To pay or otherwise settle with the Assured any claim assured against under this Guarantee. In addition, the Company will pay any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment or tender of payment and that the Company is obligated to pay; or
- c. To pay or otherwise settle with other parties for the loss or damage provided for under this Guarantee, together with any costs, attorneys' fees, and expenses incurred by the Assured that were authorized by the Company up to the time of payment and that the Company is obligated to pay.

Upon the exercise by the Company of either of the options provided for in 6 (a), (b) or (c) of this paragraph the Company's obligations to the Assured under this Guarantee for the claimed loss or damage, other than the payments required to be made, shall terminate, including any duty to continue any and all litigation initiated by the Company pursuant to Paragraph 4.

7. Limitation Liability.

- a. This Guarantee is a contract of Indemnity against actual monetary loss or damage sustained or incurred by the Assured claimant who has suffered loss or damage by reason of reliance upon the assurances set forth in Schedule A and only to the extent herein described, and subject to the Exclusions From Coverage of This Guarantee.
- b. If the Company, or the Assured under the direction of the Company at the Company's expense, removes the alleged defect, lien, or encumbrance or cures any other matter assured against by this Guarantee in a reasonably diligent manner by any method, including litigation and the completion of any appeals therefrom, it shall have fully performed its obligations with respect to that matter and shall not be liable for any loss or damage caused thereby.
- c. In the event of any litigation by the Company or with the Company's consent, the Company shall have no liability for loss or damage until there has been a final determination by a court of competent jurisdiction, and disposition of all appeals therefrom.
- d. The Company shall not be liable for loss or damage to the Assured for liability voluntarily assumed by the Assured in settling any claim or suit without the prior written consent of the Company.

8. Reduction of Liability or Termination of Liability.

All payments under this Guarantee, except payments made for costs, attorneys' fees and expenses pursuant to Paragraph 4 shall reduce the Amount of Liability under this Guarantee pro tanto.

9. Payment of Loss.

- a. No payment shall be made without producing this Guarantee for endorsement of the payment unless the Guarantee has been lost or destroyed, in which case proof of loss or destruction shall be furnished to the satisfaction of the Company.
- b. When liability and the extent of loss or damage has been definitely fixed in accordance with these Conditions, the loss or damage shall be payable within thirty (30) days thereafter.

GUARANTEE CONDITIONS (Continued)

10. Subrogation Upon Payment or Settlement.

Whenever the Company shall have settled and paid a claim under this Guarantee, all right of subrogation shall vest in the Company unaffected by any act of the Assured claimant.

The Company shall be subrogated to and be entitled to all rights and remedies which the Assured would have had against any person or property in respect to the claim had this Guarantee not been issued. If requested by the Company, the Assured shall transfer to the Company all rights and remedies against any person or property necessary in order to perfect this right of subrogation. The Assured shall permit the Company to sue, compromise or settle in the name of the Assured and to use the name of the Assured in any transaction or litigation involving these rights or remedies.

If a payment on account of a claim does not fully cover the loss of the Assured the Company shall be subrogated to all rights and remedies of the Assured after the Assured shall have recovered its principal, interest, and costs of collection.

11. Arbitration.

Either the Company or the Assured may demand that the claim or controversy shall be submitted to arbitration pursuant to the Title Insurance Arbitration Rules of the American Land Title Association ("Rules"). Except as provided in the Rules, there shall be no joinder or consolidation with claims or controversies of other persons. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the Assured arising out of or relating to this Guarantee, any service of the Company in connection with its issuance or the breach of a Guarantee provision, or to any other controversy or claim arising out of the transaction giving rise to this Guarantee. All arbitrable matters when the amount of liability is \$2,000,000 or less shall be arbitrated at the option of either the Company or the Assured. All arbitrable matters when the amount of liability is in excess of \$2,000,000 shall be arbitrated only when agreed to by both the Company and the Assured. Arbitration pursuant to this Guarantee and under the Rules shall be binding upon the parties. Judgment upon the award rendered by the Arbitrator(s) may be entered in any court of competent jurisdiction.

12. Liability Limited to This Guarantee; Guarantee Entire Contract.

- a. This Guarantee together with all endorsements, if any, attached hereto by the Company is the entire Guarantee and contract between the Assured and the Company. In interpreting any provision of this Guarantee, this Guarantee shall be construed as a whole.
- b. Any claim of loss or damage, whether or not based on negligence, or any action asserting such claim, shall be restricted to this Guarantee.
- c. No amendment of or endorsement to this Guarantee can be made except by a writing endorsed hereon or attached hereto signed by either the President, a Vice President, the Secretary, an Assistant Secretary, or validating officer or authorized signatory of the Company.

13. Severability.

In the event any provision of this Guarantee, in whole or in part, is held invalid or unenforceable under applicable law, the Guarantee shall be deemed not to include that provision or such part held to be invalid, but all other provisions shall remain in full force and effect.

14. Choice of Law; Forum.

- a. Choice of Law: The Assured acknowledges the Company has underwritten the risks covered by this Guarantee and determined the premium charged therefor in reliance upon the law affecting interests in real property and applicable to the interpretation, rights, remedies, or enforcement of Guarantees of the jurisdiction where the Land is located.

Therefore, the court or an arbitrator shall apply the law of the jurisdiction where the Land is located to determine the validity of claims that are adverse to the Assured and to interpret and enforce the terms of this Guarantee. In neither case shall the court or arbitrator apply its conflicts of law principles to determine the applicable law.

- b. Choice of Forum: Any litigation or other proceeding brought by the Assured against the Company must be filed only in a state or federal court within the United State of America or its territories having appropriate jurisdiction.

15. Notices, Where Sent.

All notices required to be given the Company and any statement in writing required to be furnished the Company shall include the number of this Guarantee and shall be addressed to the Company at **First American Title Insurance Company, Attn: Claims National Intake Center, 5 First American Way, Santa Ana, California 92707. SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities,

EXECUTIVE SUMMARY

private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/11/2017 has revealed that there are 2 SEMS sites within approximately 0.5 miles of the target property.

WEST AVENUE MERCURY BAUGH, MS. WILSON	1363 WEST AVENUE 805 SEBASTOPOL RD.	E 1/8 - 1/4 (0.185 mi.) NNE 1/4 - 1/2 (0.428 mi.)	3 N57	14 191

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/11/2017 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/30/2017 has revealed that there are 22 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 29 LUST sites within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

SCH: This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category, depending on the level of threat to public health and safety or the environment they pose.

A review of the SCH list, as provided by EDR, and dated 10/30/2017 has revealed that there is 1 SCH

EXECUTIVE SUMMARY

site within approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/11/2017 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CA BOND EXP. PLAN: Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

A review of the CA BOND EXP. PLAN list, as provided by EDR, and dated 01/01/1989 has revealed that there is 1 CA BOND EXP. PLAN site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MCMINN AVENUE	ROSELAND AREA	NNW 1/4 - 1/2 (0.316 mi.)	E13	30

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 02/08/2018 has revealed that there are 6 Cortese sites within approximately 0.5 miles of the target property.

ROSELAND CREEK @ BURBANK AVENUE (Continued)

S108937598

Local Agency: Not reported
RB Case Number: 1NSO904
File Location: Regional Board
Potential Media Affected: Sediments, Surface water, Under Investigation
Potential Contaminants of Concern: * Metals/Heavy Metals, * Polynuclear Aromatic Hydrocarbons
Site History: Sediment contamination identified in Roseland Creek during a Phase II investigation by DTSC related to the intent to develop a neighboring property as a school. Source of contamination suspected to be related to impacted storm water run-off. Remedial efforts will be addressed during future development, as required by a 401 certification.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Reponsible Party: DETAILED SITE EXPENDITURE PLAN
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: Currently there are no identified responsible parties. Therefore, Bond funds will be used to investigate and remediate the site. If during the investigation RPs are identified, DHS will pursue appropriate cost recovery activities. This site is currently not on the NPL, nor does it appear to be a likely candidate for NPL listing in the near future. Therefore, it is unlikely that federal funds will become available for this site.

**Actual:
 131 ft.**

Site Description:

Ground water contamination in privately-owned wells has been discovered. The area where investigation activities have been focused is designated as the Local Study Area and is defined as the area within a 2000-foot radius of the intersection of McMinn Avenue and Sebastopol Road. More than 50 potential sources of contamination have been identified, although responsible parties have not yet been identified.

Hazardous Waste Desc:

Initial sampling and analysis of water from private wells, conducted by the Sonoma County Public Health Department and Regional Water Quality Control Board, indicated ground water contaminated by fuels and associated compounds and solvents. Seven of thirty eight private wells, which were sampled by DHS in the fall of 1986, were found to have concentrations of contaminants at or exceeding State drinking water action levels. Contaminants which were found to exceed State action levels include benzene, 1,2-dichloroethane (DCE), tetrachloroethene (TCE) and vinyl chloride. Fuels have been found floating in monitoring wells. 1,2-dichloroethane (DCE), tetrachloroethene (TCE) and vinyl chloride. Fuels have been found floating in monitoring wells.

Threat To Public Health & Env:

The primary threat is from consumption of contaminated well water. Migration of ground water contaminants may result in the contamination of additional wells.

Site Activity Status:

The preliminary site assessment and investigation (PSAI) has been completed and the final report was issued in July, 1987. Soil gas sampling was conducted in August, 1987. Implementation of the first Phase of the RI started June, 1988. The work to be completed in this Phase includes drilling, installation and sampling of ground water monitoring wells, drilling stratigraphic boreholes and aquifer testing. Data generated will be used to identify sources of contamination and potential RPs and to determine the direction of future work. The RWQCB has completed underground tank investigations at several locations in the study area.

Case Worker:	TNM
RB Case Number:	1TSR275
Local Agency:	SANTA ROSA, CITY OF
File Location:	Regional Board
Local Case Number:	Not reported
Potential Media Affect:	Well used for drinking water supply
Potential Contaminants of Concern:	Gasoline

Site History: The site is a convenience store that sells gasoline. In December 1998, two 10,000-gallon, single-walled steel underground storage tanks (USTs) were replaced with larger double walled USTs in the same excavation. Soil and groundwater contaminated by gasoline was found during these activities. From 1998 to now, site assessment activities have included soil borings, installation of 14 monitoring wells at various depths, and regular groundwater monitoring. Cleanup work has included removing 500 yards of impacted material and 30,000 gallons of contaminated groundwater during 1998 and operation of an ozone sparge system for over 10 years at various depths on site. These activities appear to have had a positive impact on reducing the amount of fuel constituents in the upper layers of soil and groundwater at the site.

 Completed Document Type: Phase 1
 Completed Date: 01/25/1999
 Comments: Pursuant to the MOU, DTSC has reviewed a Phase I Environmental Site Assessment Report for the Sonoma County Indian Health Project, Inc. (SCIHP). The subject property is currently a vacant, undeveloped lot. SCIHP is proposing to build a health clinic on the property. A Supplemental Phase I Environmental Assessment Report was prepared by DTSC and concluded that no action was needed for this property: there is no contamination on the property.

Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Benzene, Other Chlorinated Hydrocarbons, Toluene, Xylene, Lead, Diesel, MTBE / TBA / Other Fuel
Site History: This site is a former wholesale fuel delivery and bus maintenance shop, and currently maintains and stores commercial vehicles. There were several above ground storage tanks (ASTs) installed in the 1940s, which are no longer on-site. In 1950 six fuel underground storage tanks (USTs) were installed, and removed in 1985. Contamination was reported in 1988. In 2001, a kerosene UST was also removed. Cleanup activities have included removing 7,800 cubic yards of fuel impacted soil, pumping out 1.3 million gallons of impacted groundwater, and the short-term use of both dual-phase extraction (DPE), and high-vacuum DPE (HVDPE) systems to remove several hundred

pounds of fuel constituents. There are currently six monitoring wells (irregularly monitored since 1990) and 5 extraction wells both on- and off-site. A HVDPE system is planned for the site, and short term pilot test using in 2015 removed about 239 pounds of contaminants.

SLIC:

Region: STATE
Facility Status: Open - Inactive
Status Date: 05/19/2011
Global Id: T0609793565
Lead Agency: NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number: Not reported
Latitude: 38.4289444076905
Longitude: -122.732406109572
Case Type: Cleanup Program Site
Case Worker: BBB
Local Agency: SANTA ROSA, CITY OF
RB Case Number: 1NSR219
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Indoor Air, Soil, Soil Vapor, Surface water, Well used for drinking water supply

Actual:
137 ft.

Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Benzene, Other Solvent or Non-Petroleum Hydrocarbon, Tetrachloroethylene (PCE), Toluene, Trichloroethylene (TCE), Xylene, Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline, Waste Oil / Motor / Hydraulic / Lubricating

Site History: The McMinn Area is located in southwest Santa Rosa, primarily along Sebastopol Road between Stony Point Road and Dutton Avenue. This McMinn Avenue area entry in Geotracker is not an actual Cleanup Program site, but rather a tool used historically as part of evaluating groundwater contamination in the area. Several sites are located within this area and are addressed as separate case numbers. Oversight of groundwater contamination in this area is now through the individual site cases. However, this Geotracker entry includes some historic documents under the site documents tab.

WDS:

Facility ID: 1 49I000306
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 1
Facility Telephone: Not reported
Facility Contact: BOB WESCOTT
Agency Name: WESCOTTS BOB
Agency Address: 3664 FIR RIDGE DR
Agency City,St,Zip: SANTA ROSA 95403
Agency Contact: BOB WESCOTT
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 3714
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Longitude: -122.73996591568
Case Type: Cleanup Program Site
Case Worker: TNM
Local Agency: SONOMA COUNTY
RB Case Number: 1NSR126
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Lead, MTBE / TBA / Other Fuel Oxygenates
Site History: Since the mid 1980's the property has been used as a salvage yard for discarded vehicles. Several phases of soil and groundwater investigation have been performed at the site between 1992 and 2009. No further cleanup of petroleum impacted groundwater has been required since 2014. Full closure of the environmental case will not be complete until current site use changes and soil impacts are fully characterized and remediated. Compliance with the industrial storm water program is required.

WDS:

Facility ID: 1 49I003958
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 1
Facility Telephone: Not reported
Facility Contact: MICHAEL J. MARQUIS
Agency Name: ACME AUTO WRECKERS
Agency Address: 1885 SEBASTOPOL RD
Agency City,St,Zip: SANTA ROSA 95407
Agency Contact: MICHAEL J. MARQUIS
Agency Telephone: Not reported
Agency Type: Private
SIC Code: 5015
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported

Waste2: Stormwater Runoff
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

 Status: Completed - Case Closed
 Status Date: 11/04/2014
 Case Worker: ZZZ
 RB Case Number: 1TSO056
 Local Agency: SONOMA COUNTY
 File Location: Regional Board
 Local Case Number: Not reported
 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Benzene, Toluene, Xylene, MTBE / TBA / Other Fuel Oxygenates, Gasoline
 Site History: The property was a petroleum service station which was closed in 1989. Six underground storage tanks (USTs) were removed from the property in 1989. In 1986 a piping leak was reported to the Sonoma County Health Department. Data from soil and groundwater samples

confirmed that there was a release to the subsurface in 1987. The property is now a vacant lot. Cleanup activities associated with the release at this property have included removal of all underground tanks and piping with excavation of 1,000 cubic yards of impacted soil. Soil and groundwater remediation treated approximately 2 million gallons of groundwater and removed 2,826 pounds of hydrocarbons from the subsurface. The environmental investigation at this site included numerous soil and groundwater sampling locations to define the lateral and vertical extent of contamination. Dissolved concentrations of petroleum hydrocarbons (including gasoline and diesel) in groundwater are limited in extent. Soil impacts are also limited and remain along the western edge of the property. No free product or dissolved concentrations of methyl tertiary butyl ether (MTBE) are currently detected in groundwater samples collected from this investigation. This site complies with the State Water Resources Control Boards Low-Threat Underground Storage Tank Case Closure Policy.

Local Agency: SONOMA COUNTY
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply, Well used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Problem Description In June 1989, the Santa Rosa Fire Department reported petroleum discharges discovered during the removal of two 1000-gallon diesel and gasoline underground storage tanks (USTs). Analysis of soil samples showed the presence of Total Petroleum Hydrocarbons measured as gasoline (TPH-g) and as diesel (TPH-d) at 670 milligrams per kilogram (mg/Kg) and 730 mg/Kg respectively. Actions Completed Between June 1990 and October 2011, the Discharger installed at least thirteen exploratory borings fifteen groundwater monitoring and/or extraction wells to define the horizontal and vertical extent petroleum impacts, and to monitor contaminant levels in groundwater. In November 1990, the Discharger excavated and removed approximately 875 cubic yards of petroleum impacted soil. Between July 2007 and May 2008, the Discharger removed approximately 110 pounds of petroleum hydrocarbons by extracting and treating petroleum-impacted groundwater and soil vapor prior to disposal under regulatory permits. In June 2011, the Discharger excavated and removed approximately 1200 cubic yards of petroleum-impacted soil.

Lead Agency: NORTH COAST RWQCB (REGION 1)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T060977408
Global Id: T060977408
Latitude: 38.4297563451985
Longitude: -122.729040228172
Status: Open - Assessment & Interim Remedial Action
Status Date: 06/22/2017
Case Worker: RBD
RB Case Number: 1TSR394
Local Agency: SONOMA COUNTY LOP
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply, Indoor Air, Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: * Solvents, Benzene, Ethylbenzene, Gasoline, MTBE / TBA / Other Fuel Oxygenates, Toluene, Xylene
Site History: Not reported

Potential Contaminants of Concern: * Solvents
Site History: This entry in Geotracker is not an actual Cleanup Program site, but rather a tool used historically as part of evaluating groundwater contamination in the area. Several sites are located within this area and are addressed as separate case numbers. Oversight of groundwater contamination in this area is now through the individual site cases. However, this Geotracker entry includes some historic documents under the site documents tab.

Case Type:	Cleanup Program Site
Case Worker:	TNM
Local Agency:	Not reported
RB Case Number:	1NSR403
File Location:	Regional Board
Potential Media Affected:	Well used for drinking water supply
Potential Contaminants of Concern:	Tetrachloroethylene (PCE), Trichloroethylene (TCE), MTBE / TBA / Other Fuel Oxygenates
Site History:	The site was the former Hill/Roseland/Payless Cleaners at 761 Sebastopol Road from approximately 1965 through 1971. The facility performed onsite dry cleaning in the western part of the building, and Monty's Launderette occupied the eastern half (at least through 1977). The site was located in an almost 7-acre neighborhood shopping center parcel. The dry cleaner/laundrette building was demolished in 2009, and four other buildings on this parcel were demolished in late 2014 to early 2015, leaving only one large commercial structure. The site is paved. A gasoline station was investigated and remediated for fuel releases on the same parcel, and the case was closed in 2017 (Geotracker ID T0609700174). A release of PCE from the former dry cleaning facility was discovered in 2002 during a sanitary sewer assessment and underground utility survey. Several soil, soil gas, and groundwater investigations were conducted at the site since 2002. These have included installation of groundwater monitoring wells, borings, and completion of a sensitive receptor survey. Limited soil excavation was completed after removal of the former dry cleaner building in 2009, and additional source area soil excavation was done in 2015.

 Potential Media Affect: Aquifer used for drinking water supply, Well used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: The Shell-branded service station and former DZ, Inc. petroleum fuel bulk plant, located at 255 and 257 Dutton Avenue, respectively, are sited in a commercial section of southwest Santa Rosa, California. The Shell station has been in operation since the early 1960s. The DZ site is a former Shell bulk plant, originally operated by Shell in the 1960s and sold in 1974 to DZ, Inc. The two adjacent properties are managed as one commingled plume site per a 2003 agreement between the responsible parties, and are currently enrolled in the California Underground Storage Tank Cleanup Fund.

Global Id: SL0002014200
Lead Agency: NORTH COAST RWQCB (REGION 1)
Lead Agency Case Number: Not reported
Latitude: 38.4322992775776
Longitude: -122.725553065539
Case Type: Cleanup Program Site
Case Worker: ZZZ
Local Agency: Not reported
RB Case Number: 1NSO079
File Location: Regional Board
Potential Media Affected: Not reported
Potential Contaminants of Concern: * Petroleum - Automotive gasolines
Site History: Electronic data reports for this co-mingled plume site are uploaded to the LUST case 1TSSO079. The site is the location of an active gas station where an investigation and cleanup is in progress for releases from underground storage tanks (USTs) . Groundwater beneath this site has also been impacted by releases from the adjacent petroleum bulk plant. The site invrstigation and cleanup activities are being managed as a co-mingled plume. All case management activities and site investigation data related to the UST releases are being managed under the Geotracker Case # 1TSO079. The non-tank Geotracker case 1NSO079 is redundant and un-necessary and will be closed as an administrative action to improve utility of the Geotracker for documenting regulatory and cleanup activities.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 10/06/2015
Comments: DTSC completed site reassessment on US EPA's behalf. Lead and volatile organic compounds were detected in soil and groundwater above screening levels. The North Coast Regional Water Quality Control Board is currently overseeing environmental cleanup. EPA determined that the site needed further assessment under CERCLA but at low priority as a state agency is currently overseeing cleanup.

 Case Type: Cleanup Program Site
 Case Worker: BML
 Local Agency: SONOMA COUNTY
 RB Case Number: 1NSO366
 File Location: Regional Board
 Potential Media Affected: Aquifer used for drinking water supply, Soil, Well used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: This site is comprised of three parcels totaling approximately 12.2 acres. Since the late 1940s up until 2000 or 2001, the site was operated as an auto wrecking yard by the Fouche family. Soil and groundwater at the site were affected by the auto wrecking activities. Soil cleanup work has been performed. Cleanup and Abatement Order No.R1-2016-0040 was issued by the Regional Water Board in 2016. Soil testing for lead and groundwater testing for HVOCs is ongoing under the CAO. The site is currently being developed into residential housing.

Potential Media Affected: Well used for drinking water supply
Potential Contaminants of Concern: Diesel
Site History: The Shell-branded service station and former DZ, Inc. petroleum fuel bulk plant, located at 255 and 257 Dutton Avenue, respectively, are sited in a commercial section of southwest Santa Rosa, California. The Shell station has been in operation since the early 1960s. The DZ site is a former Shell bulk plant, originally operated by Shell in the 1960s and sold in 1974 to DZ, Inc. The two adjacent properties are managed as one commingled plume site per a 2003 agreement between the responsible parties, and are currently enrolled in the California Underground Storage Tank Cleanup Fund.

LUST:

Lead Agency: NORTH COAST RWQCB (REGION 1)
Case Type: LUST Cleanup Site
Geo Track: http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0609700542
Global Id: T0609700542
Latitude: 38.431487746
Longitude: -122.7204013
Status: Completed - Case Closed
Status Date: 12/13/2013
Case Worker: ZZZ
RB Case Number: 1TSR019
Local Agency: SANTA ROSA, CITY OF
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History:

The Site development began in 1904, and historical operations at the Site have largely been related to the processing and transporting of fish products. As part of these operations, fish products were stored at the Cold Storage Building with refrigeration supplied from power derived from the adjacent Engine Room and UST3. The Point St. George Fisheries facility closed in 1993 and removal of equipment and demolition of the process buildings were completed in 2000. The Site is currently being redeveloped into approximately 110 two-story houses with associated streets, utilities, paved and landscaped areas. Investigation and remedial activities commenced at the Site in 1985. In 1997, BSK Associates (BSK) removed the two tanks and soil to a depth of 15 feet below ground surface (bgs) and approximately 3 feet outward from the sides of the tanks. Petroleum hydrocarbons were detected in confirmation soil samples along the western and southern walls of the excavation. In October 1999, approximately 2773 tons of petroleum-impacted soil were excavated from the western property boundary in the vicinity of the former UST3 (Former Engine Room Excavation) and removed for offsite disposal. Demolition of the operation buildings and offices was completed in January 2000. In December 2000 and January 2001, approximately 2,153 tons of petroleum-impacted soil were excavated and removed for off-site disposal. Between March and July 2004, approximately 1860 cubic yards (approximately 2325 tons) of petroleum-impacted soil were excavated and removed for off-site disposal. Demolition of a dry goods warehouse, paved driveways, and concrete foundations of the former buildings was completed in 2005. Between 1996 and 2009, the responsible party installed thirty monitoring wells and collected samples from thirty-four exploratory borings to define the extent of groundwater contamination. Petroleum hydrocarbons remain in soil at depths deeper than eight feet below ground surface beneath some areas of the site. Contaminated soil has been removed to the extent feasible. Petroleum hydrocarbons remain in groundwater beneath the site. Periodic groundwater monitoring demonstrates that the area of groundwater contamination is stable or decreasing. An environmental covenant will be recorded to prohibit groundwater extraction and will establish specific requirements excavating in some areas of the Site. With the establishment of the environmental covenant restrictions, conditions at the Site are consistent with the closure criteria specified in the State Water Resources Control Boards Low-Threat Underground Storage Tank Case Closure Policy.

January 2001 confirmed petroleum impacts in soil and groundwater. Actions Completed: - In November 2005, limited over-excavation of contaminated soil was completed at one of the former tank locations. - Between January 2001 and June 2013, investigators advanced thirty-one exploratory borings, two Cone Penetrometer Test borings, and installed seven groundwater monitoring wells to define the extent of contamination in soil and groundwater. - Site investigators conducted periodic groundwater monitoring and reporting from January 2005 through May 2012. Assessment of Soil and Groundwater The results of soil sampling and analysis demonstrate that significant levels of petroleum contamination are not present in soil to a depth of ten feet below ground surface. Periodic groundwater monitoring results demonstrate that the area of contamination in groundwater is stable or decreasing, and that the petroleum constituents remaining in groundwater do not present an unacceptable threat to human health. Soil and groundwater conditions at the site are consistent with the low-threat case closure criteria specified in the State Water Resources Control Boards Low-Threat Underground Storage Tank Case Closure Policy.

 Status Date: 01/26/2005
 Case Worker: TNM
 RB Case Number: 1TSR150
 Local Agency: SANTA ROSA, CITY OF
 File Location: Regional Board
 Local Case Number: Not reported
 Potential Media Affect: Aquifer used for drinking water supply
 Potential Contaminants of Concern: Gasoline
 Site History: In April 1990, one 6,000-gallon and two 10,000-gallon underground storage tanks were removed from the north side of the site. Soil samples collected from the excavation pit, at depths ranging between 16 and 20 feet below ground surface, contained total petroleum hydrocarbons as gasoline and benzene at maximum concentrations of 15 mg/kg and 2.3 mg/kg, respectively. Groundwater and soil remediation has been conducted at the site since 2005, using shallow groundwater extraction from an interceptor trench, deeper-zone extraction from extraction wells, and several multi-phase extraction events using a mobile extraction unit. Groundwater monitoring events were conducted quarterly at the site from 1999 until mid-2009, and then semi-annually from 2009 to the present.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Number of Days to Update: 14	Next Scheduled EDR Contact: 05/21/2018
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: N/A

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 01/05/2018
Number of Days to Update: 92	Next Scheduled EDR Contact: 04/16/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/11/2017	Source: EPA
Date Data Arrived at EDR: 12/22/2017	Telephone: 800-424-9346
Date Made Active in Reports: 01/12/2018	Last EDR Contact: 02/06/2018
Number of Days to Update: 21	Next Scheduled EDR Contact: 04/30/2018
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/11/2017	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 45	Next Scheduled EDR Contact: 04/09/2018
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/11/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2017	Telephone: (415) 495-8895
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/22/2017	Source: Department of the Navy
Date Data Arrived at EDR: 06/13/2017	Telephone: 843-820-7326
Date Made Active in Reports: 09/15/2017	Last EDR Contact: 02/09/2018
Number of Days to Update: 94	Next Scheduled EDR Contact: 05/28/2018
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018
Number of Days to Update: 74	Next Scheduled EDR Contact: 03/12/2018
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/13/2017	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/27/2017	Telephone: 703-603-0695
Date Made Active in Reports: 02/09/2018	Last EDR Contact: 01/19/2018

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Jesse McCafferty
1370 Burbank
Santa Rosa, CA 95407

Dear Mr. McCafferty:

Subject: Well Sampling Results for 1370 Burbank Avenue.
File: McMinn Avenue Site

As you may know, in 1984 the area around McMinn Avenue and Sebastopol Road was identified on a list of state hazardous waste sites because of groundwater pollution that affected several wells in the Roseland District near Sebastopol Road. This area was placed on a list for state Superfund sites, created by the California Department of Toxic Substances Control, and was identified as the McMinn Avenue Superfund Site (McMinn Site). Most of the groundwater pollution in the area is caused by chemicals called hydrocarbons, including petroleum products such as gasoline and diesel fuel and also volatile organic compounds (VOCs) including industrial solvents and cleaners. The North Coast Regional Water Quality Control Board (NCRWQCB) has been working to identify the sources of this groundwater pollution. In addition, the NCRWQCB collected a sample from your well on behalf of the U. S. Environmental Protection Agency on August 25, 1998, as part of an effort to help determine the area of contamination and whether your well has been affected by the contamination.

On January 8, 1999, we wrote you that the analysis for your well water had not been received by this agency. We have just received validated laboratory results for the analysis of VOCs in your well water. These results show that none of the hydrocarbons known to be in the groundwater in the area were found in your well on the date we sampled. While the information for your well is re-assuring, please be aware that groundwater can move, especially in response to seasonal changes or the proximity of another pumping well. For this reason, periodic re-sampling of your well is advised. Enclosure 1 is a Fact Sheet on well testing opportunities. Since you are located in the County there is a program available for grants to assist in hooking up to the public water system. Enclosure 2 contains information on this local program. You should contact Steve McCoy at (707) 524-7545 if you wish to learn more about the available programs for replacement water supplies.

California Environmental Protection Agency

Recycled Paper

The NCRWQCB is continuing to investigate the groundwater pollution in the McMinn Superfund Area and is closer to identifying how far the contamination has spread and where the contamination first came from, which allows cleanup measures to begin at each facility. We will keep the community informed about our progress in investigating and cleaning up the contamination. If you wish to be on our mailing list to receive periodic updates, please call us at 576-2220 and request addition to the McMinn Mailing List.

Thank you for your cooperation in allowing us to sample the well, and again allow me to apologize for the delay in obtaining final laboratory results. Please call me at 576-2802 if you have any questions.

Sincerely,

Bill Erdei
Engineering Geologist

Walter McCallum
1267 Burbank Avenue
Santa Rosa, CA 95407

Dear Mr. McCallum:

Subject: Well Sampling Results for 1267 Burbank Avenue
File: McMinn Avenue Site

As you may know, in 1984 the area around McMinn Avenue and Sebastopol Road was identified on a list of state hazardous waste sites because of groundwater pollution that affected several wells in the Roseland District near Sebastopol Road. This area was placed on a list for state Superfund sites, created by the California Department of Toxic Substances Control, and was identified as the McMinn Avenue Superfund Site (McMinn Site). Most of the groundwater pollution in the area is caused by chemicals called hydrocarbons, including petroleum products such as gasoline and diesel fuel and also volatile organic compounds (VOCs) including industrial solvents and cleaners. The North Coast Regional Water Quality Control Board (NCRWQCB) has been working to identify the sources of this groundwater pollution. In addition, the NCRWQCB collected two samples from your well on behalf of the U. S. Environmental Protection Agency on August 25, 1998, as part of an effort to help determine the area of contamination and whether your well has been affected by the contamination.

Considerable time has passed since the date we collected the samples from your well. The NCRWQCB shares your concern in the delay in receiving final laboratory results for the sample from your well. We have only received results from the state lab for the gasoline analysis performed on one of the samples from your well. Results for this sample show that total petroleum hydrocarbons, measured as gasoline, were not detected in your well water. However, at this time, we have not received the laboratory results for the VOC analysis performed on the other sample from the well. We have recently learned that the final results may be delayed to February because of a backlog in quality control reviews. We will inform you of the results of the VOC analysis as soon as we can obtain this information.

Thank you for your cooperation in allowing us to sample the well, and again allow me to apologize for the delay in obtaining laboratory results for the VOC analysis. Please call me at 576-2802 if you have any questions.

Sincerely,

Bill Erdei

July 17, 1998

Jessie McCafferty
1370 Burbank Ave.
Santa Rosa, CA. 95407

Dear Mr. McCafferty:

Subject: 1370 Burbank Ave.; McMinn Avenue Superfund, McMinn well file;
Laboratory results for domestic well water samples

Enclosed please find the laboratory analyses for groundwater samples collected from your domestic well on June 17, 1998. The samples were analyzed for Total Petroleum Hydrocarbons as gasoline (TPH-g) and as diesel (TPH-d), volatile organic compounds using a drinking water method (EPA 502.2), and for MTBE, a fuel oxygenate.

The chemical compound 1,2-Dichloroethane (1,2-DCA) was detected in the samples at 1.4 parts per billion (ppb) in the front well which you are using, and at 1.1 ppb in the well at the rear of the property. The maximum contaminant level for 1,2-DCA in drinking water is 0.5 ppb. The concentration of 1,2-DCA present in your wells exceed this drinking water standard. You may wish to contact the Sonoma County Environmental Health Department for further information on the use of these wells.

The North Coast Regional Water Quality Control Board is continuing to investigate groundwater contamination in the McMinn Superfund Area and the possible source of contamination in your well.

Thank you for your cooperation and assistance in this investigation. Please contact me at (707) 576-2688 if you have any questions.

Sincerely,

Jim Tischler

Sample collectors: Jim Davidson and Jim Tischler

Analyses to be performed: TPH-D + motor oil; TPH-G; and EPA 502.2

June 15, 1998 Monday

Legnito

- 1828 West Ave Elaine ~~McNito~~, 778-1513 *p65* time: 1010 hr.
- 1119 Sunset Dennis Hagemann, 575-1297 *p65* time: 1100
- 2220 Sebastopol Rd Jim Seaton 575-9004 *p65* time: 1135

The above listed samples were shipped to North Coast Laboratories, Inc. via FedEx on 6/15/98, air bill #0632917375

June 17 Wednesday

- 1215 Gloria St. Chris Allen 5273367 *No p65* Time of sampling: 0945
This address is the house is at the rear of the driveway. The well is in the south yard, we used the hose bib on the south wall of the house.
- 1370 Burbank Jessie McCafferty Time of sampling: 1020 (1) and 1055 (2) *p65*
2 wells are at this location: the well in back is out of service
We used a bailer to sample standing water in this well.
The well nearest the house is in service about 25' behind the house.
- 983 Dutton Leonard Halvorsen 542-5641 *p65* time: 1130
PO Box 7033, Santa Rosa 95402
- 781 Dutton tenant: Patricia Fain *p65* time: 1215
PO Box 493 Santa Rosa 95402

the above samples were shipped to North Coast Laboratories, Inc. via FedEx on 6/17/98

June 18 Thursday

- 857 Dutton time of sampling: 1015
This well is used for watering the yard and vegetable garden. Please copy lab results to residents: Casa Cal Mecca *p65*
c/o Joe Barahas 573-1590
- 1109 Dutton time of sample: 1120 *p65*
This well is used for drinking and all other domestic needs. A chlorination system was disconnected and the well water was sampled at the well head before the point of chlorine injection.
copy: Mr. & Mrs. Jaillet at site address *p65*

the above samples were shipped to North Coast Laboratories, Inc via FedEx on 6/18/98

As per our conversation at the meeting on October 30th at the Sonoma County Public Health Department, I am sending you the name and address of a family who requested we sample their wells, but who are located outside the McMinn Avenue Study Area.

Their names and address is:

Mark and Julianne Tolleson
 1370 Burbank Avenue
 Santa Rosa, CA 96507
 (707) 542-1957

TOLLESON DR.
submersible pump
partial seal 4216
press

From what they have told me in speaking with them on the phone, their water has a film on it, and they do not drink it. There are two wells on the property, one 65 feet deep drilled prior to 1940 which is used for domestic purposes, and another of unknown depth drilled prior to 1910 which is used for irrigation.

resampled 12/18/86
@ 1500 hrs.

Subject: Analysis of One Sample Identified as "Tolleson DW
 12/4/86 1400" Received December 4, 1986

Dear Mr. Vath:

Analysis of the sample referenced above has been completed. This report is written in confirmation of results transmitted verbally on December 17, 1986.

The sample was submitted in two, 40-milliliter glass vials sealed with Teflon septa and screw caps. On receipt, the sample was noted to be at approximately ambient temperature, legibly labeled and otherwise in good condition.

To measure contents of purgeable halocarbons and purgeable aromatic compounds, the sample was analyzed in accord with Methods 601 and 602 ("Guidelines Establishing Test Procedures for the Analysis of Pollutants Under the Clean Water Act," 40 CFR, Part 136, U.S. EPA, 1984). Briefly, the analysis consisted of purging portions of sample with reagent helium in a closed system. Compounds sparged from sample were collected on a sorbent "trap" and later thermally desorbed and swept onto the column of a gas chromatograph. Following separation by the column, individual compounds were detected and quantified using Hall electrolytic conductivity and photoionization detectors.

At your request, a one-hundred microgram-per-liter (parts-per-billion) diesel oil standard was analyzed by this method to confirm that the analytical system did not respond to the oil.

Results of analysis are presented in Table 1. Results of quality control procedures which accompanied analysis of samples are not included in this report but are available upon request. Please feel welcome to contact us should you have questions regarding procedures or results.

ADDRESS: _____ SAMPLE ID: NW-48 DATE: 8/25/98 TIME: _____

Introduce yourself, and let them know you have a few questions to ask about their drinking water. Determine if translation is needed, and the language.

Do you have a well? (If not -- do you use City water (ask if they pay a water bill to the City; look for well if uncertain)) Yes

May we sample the well?

Can we look at the well now?

Where would you like us to run the hose while we pump the well to take our sample? We will be running the well for several minutes.

CHECK WHETHER THE WELL IS ON THE DETAILED WELL LIST -- IF CONSTRUCTION DETAILS ARE ABSENT, ASK:

When was your well drilled? _____

Do you have a well log? _____

If not, do you know the depth of the well? _____

Do you use the well water for have a bitter drinking? household use? yard irrigation?

Is the well your primary source of drinking water? _____ How long have you used the well? _____

Have you ever noticed any unusual tastes or odors in the water? _____ If so, could you describe them?

May we have your mailing address for sending you the results?

Phone Number: _____

Is there someone else, such as a landlord, who should receive the results? Could we have his/her address?

(HOME IS OWNER OCCUPIED _____)

Would you like us to come back at another time? If so, what is a better time (date) for you? _____

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

PROFESSIONAL QUALIFICATIONS

DAVID M. NOREN

MANAGER, ENVIRONMENTAL SERVICES

PROFESSIONAL CERTIFICATIONS/MEMBERSHIPS

Registered Environmental Assessor, California
OSHA 40 Hour Hazardous Waste Operations & Emergency Response Training
OSHA 8 Hour Hazardous Waste Activities Management Training
Supervisor Training in Hazardous Waste Operations
American Red Cross First Aid and CPR

Board Member North Coast Regional Water Quality Control Board

EDUCATIONAL BACKGROUND

M.Sc., Environmental Management
University of San Francisco, San Francisco, California

B.Sc., Agricultural Science & Management
University of California Davis, Davis, California

EXPERIENCE SUMMARY

Mr. Noren is a Registered Environmental Assessor with over 25 years of experience in the field of environmental assessments and investigations. Prior experience includes technical and management services for a wide range of environmental, hydrogeologic, and solid waste landfill projects. The nature and scope of these projects have included field and management positions for property assessments, assessments of surface and subsurface geologic investigations, underground fuel storage tank investigations and remediation, hydrogeologic characterization investigations, remedial action design and implementation of soil, groundwater, and landfill gas corrective action programs and storm water management sampling and reporting.

At EBA Engineering, Mr. Noren is the Manager of Environmental Services and oversees a number of projects including site investigations and monitoring, environmental assessments, as well as providing technical support and management services for solid waste management projects. The management requirements include the oversight of project budgets, client interactions, site investigation activities and field and reporting programs.

Mr. Noren has experience in the application of numerous investigative and treatment methodologies in a wide range of geologic environments including performing the investigation and remediation of a diverse range of contaminated sites and municipal solid waste facilities.
