Project Title: Contract: HVI Cat Canyon; Abandoned Bankruptcy Estate Assets; Cat Canyon, Casmalia, and Santa Maria Valley Oil Field Well and Facility Abandonments

Project Applicant: Department of Conservation, Geologic Energy Management Division

Project Location: Multiple locations in the Cat Canyon, Casmalia, and Santa Maria Valley Oil Fields in Santa Barbara County. See Attachment 1 for specific locations.

Project Description: The proposed project is an invitation for bid to abandon the 210 wells and the attendant facilities and pipelines in Santa Barbara County.

Per Public Resources Code, Section 3250 et. seq. hazardous and idle-deserted oil and gas wells are public nuisances and that it is essential, in order to protect life, health, and natural resources that such oil and gas wells be plugged and abandoned, re-abandoned, produced, or otherwise remedied to mitigate, minimize, or eliminate their danger to life, health and natural resources.

Work to be performed consists of 210 well abandonments and the removal of all tanks, above-ground pipelines, debris, and other facilities and equipment. Remaining buried pipelines will be purged of oil and filled with an inert fluid. Toxic or hazardous materials will be removed and disposed of in accordance with Department of Toxic Substances Control requirements. The well tasks include cleaning out each well and plugging with cement and inert mud. The well casings will be cut down approximately 5 ft below ground level and plated, and the surface at each site shall be restored. All oil and gas related facilities will be removed, and sites restored to as close to the original condition. That will include removing many of the pads and seeding them. Roads will be left in place if landowners choose to keep the roads.

The work to is expected to take about 18-24 months to complete

Exempt Status: As the Lead Agency, CalGEM has determined that the proposed project is exempt from further environmental review requirements of the California Environmental Quality Act (CEQA), pursuant to the specified exemptions marked in the section below. CalGEM further finds that the proposed project would not result in a significant adverse impact to the environment, or that any of the exceptions to the application of the exemptions apply (14 CCR 15300.2).

Reasons Why Project is Exempt: The basis for CalGEM's determination that the project is exempt from the requirements of CEQA is provided in the brief explanation below.

Class 1 – Existing Facility: The project is categorically exempt from CEQA under the “Class 1” (14 CCR 15301) exemption per the CEQA Guidelines because the field well maintenance and pipeline isolation are within an existing oil field and involves no expansion of use of the oil field.

Class 7 – Actions by Regulatory Agencies for Protection of Natural Resources: The project is categorically exempt from CEQA under the “Class 7” (14 CCR 15307) exemption per the CEQA Guidelines because it is an action taken by regulatory agencies as authorized by state law or local ordinance to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment.

Class 8 - Actions by Regulatory Agencies for Protection of the Environment: The project is categorically exempt from CEQA under the “Class 8” (14 CCR 15308) exemption per the CEQA Guidelines because it is an action taken by regulatory agencies, as authorized by state or local ordinance, to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for protection of the environment.

A copy of this NOE (as required by 14 CCR 15062(a)) and all other related materials are available for public inspection at CalGEM's CEQA Program, located at 715 P Street, 18th floor, Sacramento, CA 95814; or an electronic copy of these documents may also be accessed online at the State Clearinghouse: <https://ceqanet.opr.ca.gov>;
