Login Sample Receipt Checklist

Client: Aptim Environmental & Infrastructure Inc

Job Number: 570-35585-1

Login Number: 35585

List Number: 1

Creator: Ramos, Maribel

List Source: Eurofins Calscience

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

Spring 2021

ANALYTICAL REPORT

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Job ID: 570-48815-1

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

GC/MS Semi VOA

| Qualifier | Qualifier Description |
|-----------|--|
| *1 | LCS/LCSD RPD exceeds control limits. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

HPLC/IC

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |

Narrative

**Job Narrative
570-48815-1**

Comments

No additional comments.

Receipt

The samples were received on 1/19/2021 6:20 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 2.3° C.

Receipt Exceptions

The Chain-of-Custody (COC) was improperly completed. Received 8 containers instead of 7, for samples 1 Through 4.

The Chain-of-Custody (COC) was improperly completed. Received 13 containers instead of 12 for this sample.

GC/MS VOA

Method 8260B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for the following sample associated with analytical batch 570-124228 were outside control limits: MW-03 (570-48815-5[MS]) and MW-03 (570-48815-5[MSD]). The associated laboratory control sample (LCS) recovery met acceptance criteria.

Method 8260B: The matrix spike / matrix spike duplicate (MS/MSD) precision for analytical batch 570-124228 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC/MS Semi VOA

Method 8270C: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for preparation batch 570-123331 and analytical batch 570-123736 recovered outside control limits for the following analytes: Benzidine.

Method 8270C: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-123331 and analytical batch 570-123736 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HPLC/IC

Method 300.0: Due to the high concentration of Chloride, the matrix spike / matrix spike duplicate (MS/MSD) for analytical batch 570-123387 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method 300.0: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 570-123386 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-125105 and analytical batch 570-125699 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method 6010B: Due to the high concentration of Calcium and Magnesium the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 570-125105 and analytical batch 570-125699 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Case Narrative

Client: Aptim Environmental & Infrastructure Inc
Project/Site: Omar Former Rendering Plant-Program Wells

Job ID: 570-48815-1

Job ID: 570-48815-1 (Continued)

Laboratory: Eurofins Calscience LLC (Continued)

Method 6010B: Due to the high concentration of Sodium the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 570-125105 and analytical batch 570-126071 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Lab Admin

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Accreditation/Certification Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: Omar Former Rendering Plant-Program Wells

Job ID: 570-48815-1

Laboratory: Eurofins Calscience LLC

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

| Authority | Program | Identification Number | Expiration Date |
|------------|---|-----------------------|-----------------|
| California | Los Angeles County Sanitation Districts | 10109 | 09-30-21 |
| California | SCAQMD LAP | 17LA0919 | 11-30-21 |
| California | State | 2944 | 09-30-21 |
| Guam | State | 20-003R | 10-31-20 * |
| Nevada | State | CA00111 | 07-31-21 |
| Oregon | NELAP | CA300001 | 01-30-22 |
| USDA | US Federal Programs | P330-20-00034 | 02-10-23 |
| Washington | State | C916-18 | 10-11-21 |

* Accreditation/Certification renewal pending - accreditation/certification considered valid.

Method Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: Omar Former Rendering Plant-Program Wells

Job ID: 570-48815-1

| Method | Method Description | Protocol | Laboratory |
|----------|--|----------|------------|
| 8260B | Volatile Organic Compounds (GC/MS) | SW846 | ECL 2 |
| 8270C | Semivolatile Organic Compounds (GC/MS) | SW846 | ECL 1 |
| 300.0 | Anions, Ion Chromatography | MCAWW | ECL 1 |
| 6010B | Metals (ICP) | SW846 | ECL 1 |
| 7470A | Mercury (CVAA) | SW846 | ECL 1 |
| SM 2320B | Alkalinity | SM | ECL 1 |
| SM 2540C | Solids, Total Dissolved (TDS) | SM | ECL 1 |
| 3005A | Preparation, Total Recoverable or Dissolved Metals | SW846 | ECL 1 |
| 3510C | Liquid-Liquid Extraction (Separatory Funnel) | SW846 | ECL 1 |
| 5030C | Purge and Trap | SW846 | ECL 2 |
| 7470A | Preparation, Mercury | SW846 | ECL 1 |

Login Number: 48815
List Number: 1
Creator: Cortez Diaz, Antonio

List Source: Eurofins Calscience

| Question | Answer | Comment |
|---|--------|-------------------------------------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | False | Refer to Job Narrative for details. |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| *+ | LCS and/or LCSD is outside acceptance limits, high biased. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| me | LCS Recovery is within Marginal Exceedance (ME) control limit range (± 4 SD from the mean). |

HPLC/IC

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Comments

No additional comments.

Receipt

The samples were received on 1/19/2021 6:20 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.3° C.

GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-124261.

Method 8260B: The following analyte(s) recovered outside control limits for the LCSD associated with analytical batch 570-124261: 1,2-Dichlorobenzene, 1,2,3-Trichlorobenzene and 1,4-Dichlorobenzene. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

Unless there is a specific client QAPP requirement, the reported analyte list for batch quality control samples (LCS, LCSD, MS, and MSD) is in accordance with EPA Method 860B. Refer to the QC Sample Results section of this report.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HPLC/IC

Method 300.0: Due to the high concentration of Chloride, the matrix spike / matrix spike duplicate (MS/MSD) for analytical batch 570-123387 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method 300.0: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for analytical batch 570-123386 were outside control limits. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6010B: Due to the high concentration of Sodium the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 570-125105 and analytical batch 570-126071 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Lab Admin

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

| Qualifier | Qualifier Description |
|-----------|--|
| *1 | LCS/LCSD RPD exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

HPLC/IC

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| H | Sample was prepped or analyzed beyond the specified holding time |

Metals

| Qualifier | Qualifier Description |
|-----------|---|
| 4 | MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Job Narrative 570-48929-1

Comments

No additional comments.

Receipt

The samples were received on 1/20/2021 6:50 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperatures of the 2 coolers at receipt time were 3.4° C and 3.6° C.

GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-124265.

Method 8260B: The following volatiles sample was diluted due to foaming at the time of purging during the original sample analysis: TPMW-01 (570-48929-1). Elevated reporting limits (RLs) are provided.

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-124974.

Method 8260B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 570-124974 recovered outside control limits for the following analytes: 1,1,2,2-Tetrachloroethane, 1,2,3-Trichlorobenzene and Bromoform.

Unless there is a specific client QAPP requirement, the reported analyte list for batch quality control samples (LCS, LCSD, MS, and MSD) is in accordance with EPA Method <METHOD>. Refer to the QC Sample Results section of this report.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HPLC/IC

Method 300.0: Due to the high concentration of Chloride and Sulfate, the matrix spike / matrix spike duplicate (MS/MSD) for analytical batch 570-123955 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method 300.0: Reanalysis of the following samples were performed outside of the analytical holding time due to dilution requirement : MW-20 (570-48929-2), MW-16 (570-48929-3), MW-24 (570-48929-7), MW-23 (570-48929-8) and MW-21R (570-48929-9).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Metals

Method 6010B: Due to the high concentration of Calcium, Magnesium and Sodium the matrix spike / matrix spike duplicate (MS/MSD) for preparation batch 570-125645 and analytical batch 570-126248 could not be evaluated for accuracy and precision. The associated laboratory control sample (LCS) met acceptance criteria.

Method 6010B: The matrix spike / matrix spike duplicate / sample duplicate (MS/MSD/DUP) precision for preparation batch 570-125645 and analytical batch 570-126248 was outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample / laboratory control sample duplicate (LCS/LCSD) precision was within acceptance limits.

Method 7470A: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 570-125652 and analytical batch 570-125973 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

General Chemistry

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Project/Site: OMAR Former Rendering Plant

Job ID: 570-48929-1

General Chemistry

Client Sample ID: MW-21R
Date Collected: 01/20/21 13:59
Date Received: 01/20/21 18:50

Lab Sample ID: 570-48929-9
Matrix: Water

| Analyte | Result | Qualifier | RL | MDL | Unit | D | Prepared | Analyzed | Dil Fac |
|-------------------------------|--------------|-----------|------|------|------|---|----------|----------------|---------|
| Alkalinity, Total (As CaCO3) | 703 | | 5.00 | 1.69 | mg/L | | | 01/26/21 00:24 | 1 |
| Bicarbonate (as CaCO3) | 703 | | 5.00 | 1.69 | mg/L | | | 01/26/21 00:24 | 1 |
| Carbonate (as CaCO3) | ND | | 5.00 | 1.69 | mg/L | | | 01/26/21 00:24 | 1 |
| Total Dissolved Solids | 12200 | | 2.00 | 1.74 | mg/L | | | 01/21/21 07:43 | 1 |

Surrogate Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: OMAR Former Rendering Plant

Job ID: 570-48929-1

Method: 8260B - Volatile Organic Compounds (GC/MS)

Matrix: Water

Prep Type: Total/NA

Percent Surrogate Recovery (Acceptance Limits)

Accreditation/Certification Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: OMAR Former Rendering Plant

Job ID: 570-48929-1

Laboratory: Eurofins Calscience LLC

All accreditations/certifications held by this laboratory are listed. Not all accreditations/certifications are applicable to this report.

| Authority | Program | Identification Number | Expiration Date |
|------------|---|-----------------------|-----------------|
| California | Los Angeles County Sanitation Districts | 10109 | 09-30-21 |
| California | SCAQMD LAP | 17LA0919 | 11-30-21 |
| California | State | 2944 | 09-30-21 |
| Guam | State | 20-003R | 10-31-20 * |
| Nevada | State | CA00111 | 07-31-21 |
| Oregon | NELAP | CA300001 | 01-30-22 |
| USDA | US Federal Programs | P330-20-00034 | 02-10-23 |
| Washington | State | C916-18 | 10-11-21 |

* Accreditation/Certification renewal pending - accreditation/certification considered valid.

Method Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: OMAR Former Rendering Plant

Job ID: 570-48929-1

| Method | Method Description | Protocol | Laboratory |
|----------|--|----------|------------|
| 8260B | Volatile Organic Compounds (GC/MS) | SW846 | ECL 2 |
| 300.0 | Anions, Ion Chromatography | MCAWW | ECL 1 |
| 6010B | Metals (ICP) | SW846 | ECL 1 |
| 7470A | Mercury (CVAA) | SW846 | ECL 1 |
| SM 2320B | Alkalinity | SM | ECL 1 |
| SM 2540C | Solids, Total Dissolved (TDS) | SM | ECL 1 |
| 3005A | Preparation, Total Recoverable or Dissolved Metals | SW846 | ECL 1 |
| 5030C | Purge and Trap | SW846 | ECL 2 |
| 7470A | Preparation, Mercury | SW846 | ECL 1 |

Creator: Cortez Diaz, Antonio

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

Definitions/Glossary

Client: Aptim Environmental & Infrastructure Inc
 Project/Site: Omar - Disposal Analyses

Job ID: 570-35707-1

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| * | LCS or LCSD is outside acceptance limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |
| me | LCS Recovery is within Marginal Exceedance (ME) control limit range (± 4 SD from the mean). |

Metals

| Qualifier | Qualifier Description |
|-----------|--|
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Comments

No additional comments.

Receipt

The sample was received on 8/12/2020 7:00 PM; the sample arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 4.3° C.

GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-88216.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep

Method 1664A: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 570-89344. LCS/D performed to meet QC requirement.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Surrogate Summary

Client: Aptim Environmental & Infrastructure Inc
Project/Site: Omar - Disposal Analyses

Job ID: 570-35707-1

Method: 8260B - Volatile Organic Compounds (GC/MS)

Matrix: Water

Prep Type: Total/NA

Percent Surrogate Recovery (Acceptance Limits)

| Lab Sample ID | Client Sample ID | BFB | DBFM | DCA | TOL |
|------------------|------------------------|----------|----------|----------|----------|
| | | (68-120) | (80-127) | (80-128) | (80-120) |
| 570-35707-1 | DRUM-1 | 94 | 104 | 109 | 100 |
| LCS 570-88216/3 | Lab Control Sample | 101 | 101 | 104 | 99 |
| LCSD 570-88216/4 | Lab Control Sample Dup | 101 | 100 | 104 | 101 |
| MB 570-88216/6 | Method Blank | 94 | 103 | 109 | 97 |

Surrogate Legend

BFB = 4-Bromofluorobenzene (Surr)

DBFM = Dibromofluoromethane (Surr)

DCA = 1,2-Dichloroethane-d4 (Surr)

TOL = Toluene-d8 (Surr)

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

Spring 2021

NON-HAZARDOUS WASTE MANIFEST

Please print or type (Form designed for use on 6/16 (12 pitch) typewriter)

| | | | | |
|--|--|-------------------------------------|--|----------------------|
| NON-HAZARDOUS WASTE MANIFEST | | 1. Generator's US EPA ID No. | Manifest Document No. CAD981412356 | 2. Page 1 of 1 |

The test results in this report meet all 2003 NELAC, 2009 TNI, and 2016 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Job ID: 570-48931-1

Qualifiers

GC/MS VOA

| Qualifier | Qualifier Description |
|-----------|--|
| *- | LCS and/or LCSD is outside acceptance limits, low biased. |
| *1 | LCS/LCSD RPD exceeds control limits. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

LCMS

| Qualifier | Qualifier Description |
|-----------|--|
| *5+ | Isotope dilution analyte is outside acceptance limits, high biased. |
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Metals

| Qualifier | Qualifier Description |
|-----------|--|
| J | Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value. |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| α | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CFU | Colony Forming Unit |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MCL | EPA recommended "Maximum Contaminant Level" |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| MPN | Most Probable Number |
| MQL | Method Quantitation Limit |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| NEG | Negative / Absent |
| POS | Positive / Present |
| PQL | Practical Quantitation Limit |
| PRES | Presumptive |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |
| TNTC | Too Numerous To Count |

Narrative

Job Narrative 570-48931-1

Comments

No additional comments.

Receipt

The samples were received on 1/20/2021 6:50 PM; the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.6° C.

GC/MS VOA

Method 8260B: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with analytical batch 570-123809.

Method 8260B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for the following sample associated with analytical batch 570-124490 were outside control limits: Drum-1 (570-48931-1[MS]) and Drum-1 (570-48931-1[MSD]). The associated laboratory control sample (LCS) recovery met acceptance criteria.

Method 8260B: The following analyte(s) recovered outside control limits for the LCSD associated with analytical batch 570-124490: Methylene Chloride. This is not indicative of a systematic control problem because these were random marginal exceedances. Qualified results have been reported.

Method 8260B: The following volatiles sample was diluted due to foaming at the time of purging during the original sample analysis: Drum-1 (570-48931-1). Elevated reporting limits (RLs) are provided.

Method 8260B: The RPD of the laboratory control sample (LCS) and laboratory control sample duplicate (LCSD) for analytical batch 570-124490 recovered outside control limits for the following analyte: Methylene Chloride.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

LCMS

Method EPA 537(Mod): Isotope Dilution Analyte (IDA) M2-8:2 FTS recovery is above the method recommended limit for the following sample: Drum-1 (570-48931-1). Quantitation by isotope dilution generally precludes any adverse effect on data quality due to elevated IDA recoveries.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

Method 3535: Due to the matrix being, the initial volume used for the following sample deviated from the standard procedure: Drum-1 (570-48931-1). A 10x dilution was made on the sample, then fortified with IDA and extracted. The reporting limits (RLs) have been adjusted proportionately.

Method code: 3535 PFC_IDA
Matrix: Aqueous
preparation batch 320-456220

Method 3535: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 320-456220.

| Question | Answer | Comment |
|---|--------|---------|
| Radioactivity wasn't checked or is \leq background as measured by a survey meter. | N/A | |
| The cooler's custody seal, if present, is intact. | True | |
| Sample custody seals, if present, are intact. | True | |
| The cooler or samples do not appear to have been compromised or tampered with. | True | |
| Samples were received on ice. | True | |
| Cooler Temperature is acceptable. | True | |
| Cooler Temperature is recorded. | True | |
| COC is present. | True | |
| COC is filled out in ink and legible. | True | |
| COC is filled out with all pertinent information. | True | |
| Is the Field Sampler's name present on COC? | True | |
| There are no discrepancies between the containers received and the COC. | True | |
| Samples are received within Holding Time (excluding tests with immediate HTs) | True | |
| Sample containers have legible labels. | True | |
| Containers are not broken or leaking. | True | |
| Sample collection date/times are provided. | True | |
| Appropriate sample containers are used. | True | |
| Sample bottles are completely filled. | True | |
| Sample Preservation Verified. | True | |
| There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs | True | |
| Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4"). | True | |
| Multiphasic samples are not present. | True | |
| Samples do not require splitting or compositing. | True | |
| Residual Chlorine Checked. | N/A | |

Data Quality Assessment

Acronyms and Abbreviations

| | |
|------|--------------------------------------|
| µg/L | microgram(s) per liter |
| %R | percent recoveries |
| EPA | U.S. Environmental Protection Agency |
| J/UJ | estimated |
| LCS | laboratory control spike |
| LCSD | laboratory control spike duplicate |
| mg/L | milligram(s) per liter |
| MS | matrix spike |
| MSD | matrix spike duplicate |
| QC | quality control |
| RPD | relative percent difference |
| VOCs | volatile organic compounds |

1.0 Data Quality Assessment

An Aptim Federal Services, LLC chemist reviewed laboratory data to verify that all analytical results were received from the laboratory, that the results provided in the electronic data deliverable and hard copy forms were the same, and that standard laboratory procedures and protocols were followed. Analytical data for this project were assessed in terms of precision, accuracy, representativeness, completeness, and comparability based on the requirements of the published U.S. Environmental Protection Agency (EPA) analytical methods.

Table F-1, shows samples collected and analytical methods performed during the August 2020 and January 2021 sampling events. Eurofins-Calscience laboratory, located in Garden Grove, California, analyzed the samples. Eurofins-Calscience is a State of California-certified environmental laboratory. Table F-2 summarizes the data qualified for laboratory quality control exceedances and applicable reason codes. The following data quality indicators were evaluated during the data review process.

Accuracy is demonstrated by recovery of target analytes from fortified blank and sample matrices, laboratory control spike (LCS), laboratory control spike duplicate (LCSD), matrix spike (MS), and matrix spike duplicate (MSD), respectively. The recovery of target analytes from fortified samples is compared to acceptance criteria. When these criteria are not met, the data are flagged as appropriate.

Precision is expressed as relative percent difference (RPD) between the results of replicate sample analyses: sample duplicates, LCSDs, and MSDs. When analyte RPDs exceed the acceptance criteria, the data are flagged as appropriate.

Representativeness of the samples submitted for analysis is ensured by adherence to standard sampling techniques and protocols.

Comparability of sample results is ensured through the use of approved sampling and analysis methods.

Completeness is expressed as a ratio of number of usable data to all analytical data collected.

The laboratory data packages were reviewed at EPA Level II. As applicable to referenced methodology, a Level II data review includes the following:

- Chain-of-custody/sample receipt
- Holding times
- Method blanks

- Equipment rinse blanks/trip blanks
- Laboratory control samples
- MS/MSD samples
- Laboratory Sample duplicates
- Surrogate standards (organics)
- Field duplicate samples

1.1 Sample Receipt

Sample coolers and the samples contained within were received at the laboratory within the specified temperature range of 0 - 6 degrees Celsius (°C) of the EPA preservation requirements. Sample receipt or login discrepancies identified by the laboratory were resolved with the Aptim Federal Services, LLC chemist prior to sample analysis.

1.2 Sample Holding Times

Samples were prepared and analyzed within the holding times as specified in the referenced EPA method of analysis.

1.3 Blanks (Reason Code B1)

Method blanks, equipment rinse blanks, and trip blanks were prepared and analyzed as recommended by the referenced methods and project plans. Target analytes were not detected in any blanks, which affected sample results associated with this sampling event, except as noted below.

| Method | Lab SDG | Blank Concentration | Sample Affected | Qualification |
|--|---------|----------------------------------|-------------------------|--|
| Metals (Method blank) | J35586 | Silver = 0.005983J mg/L | MW-13 MW-02 MW-03 | Sample concentrations less than five times the blank concentration were qualified as not detected (U) at the reporting limit. |
| Metals (Method blank) | J35585 | Silver = 0.004868 J mg/L | MW-22 | |
| Volatile Organic Compounds (VOCs) (Trip Blank) | J35585 | Methylene Chloride = 0.077J µg/L | MW-18 | Sample concentrations less than five times the trip blank concentration were qualified as not detected (U) at the reporting limit. |
| VOC (Method Blank) | J35586 | Chloroform = 0.078J µg/L | MW-08 | Sample concentrations less than five times the blank concentration were qualified as not detected (U) at the reporting limit. |

mg/L – milligrams per liter

µg/L – micrograms per liter

1.4 Laboratory Control Samples

All laboratory control samples were prepared and analyzed as required by the referenced EPA method. The percent recoveries (%R) for LCS, LCSD, and RPD were within control limits for all analytical batches containing the samples for this project, with the exceptions noted below.

| Method | Lab SDG | Sample Affected | LCS/LCSD -% Recovery | Control Limit | Qualification |
|--------|---------|--|-----------------------------------|---------------|--|
| VOC | J35704 | MW-16 MW-21R MW-23 Non-Program Well Dup | 1,1-Dichloroethene 127% / 118% | 77% – 120% | Due to high LCS recovery, detected 1,1-DCE in associated samples were qualified as estimated (J) due to potential high bias. |

1.5 Matrix Spikes/Matrix Spike Duplicates/Laboratory Duplicates (Reason Code M)

MS/MSD analysis was performed on project sample MW-03, MW-21R, and TPMW-01 over both semiannual sampling events. The %R and RPDs for the MS/MSD were within control limits for all parameters with the exceptions noted below.

| Method | Lab SDG | Sample Affected | MS/MSD -% Recovery | Control Limit | Qualification |
|--------|---------|-----------------|---|--------------------------|---|
| SVOC | J35586 | MW-03 | Fluorene 18%/18% | 50% – 150% | Fluorene results in sample MW-03 were qualified as estimated (UJ) due to potential matrix interference. |
| Metals | J35586 | MW-03 | Thallium 76%/80% Potassium 127%/133% | 79% – 121% 83% - 131% | Thallium and potassium results in sample MW-03 were qualified as estimated (J/UJ) due to potential matrix interference. |
| Metals | J48815 | MW-03 | Thallium 89%/77% | 79% – 121% | Thallium results in sample MW-03 were qualified as estimated (J/UJ) due to potential matrix interference. |

% - percent

Laboratory sample duplicates were performed on multiple Omar project samples for alkalinity and total dissolved solids. The RPDs for both sample and sample duplicate analyses were within laboratory control limits.

1.6 Surrogate Standards

Surrogate standards are added prior to extraction and analysis for VOCs by EPA Method 8260 and semivolatile organic compounds by EPA Method 8270 to monitor the efficiency of the extraction and the accuracy of the analysis for each sample. All surrogate spike recoveries were within the specified control limits for all samples.

1.7 Field Duplicate Samples

Four groundwater field duplicates were collected during the two sampling events. Table F-3 shows field duplicate results. Sample results are not qualified due to exceedances in field duplicate precision. Field duplicate data provides qualitative information about sample collection techniques or laboratory procedures.

Field duplicate precision is calculated for analytes detected above laboratory reporting limits in both the primary and field duplicate sample as shown on Table F-3. Analytes not detected in the samples are not shown. Field duplicate precision met the 35 percent RPD control limit for all duplicate analyses.

1.8 Data Qualifiers

Except where noted above, no additional data validation qualifiers were added to laboratory data.

1.9 Completeness

The following subsections present a discussion of holding-time and technical completeness for the annual sampling events. Field completeness was 100 percent as all groundwater samples were collected as planned.

Holding-time completeness is a quantitative determination of the number of holding-time compliant results compared to the total number of sample results, expressed as percentage. The holding-time completeness includes data qualified for missed holding times only. The holding time completeness goal is 100 percent. The holding-time goal was met for all analyses.

Technical completeness is a quantitative measure of the data usability based on the number of rejected data compared to the total number of sample results. The technical completeness calculation considers data that are not rejected to be usable. The technical completeness objective is 90 percent. As discussed in the previous subsection, sample results were qualified as estimated (J/UJ) due to various laboratory quality control outliers. However, the degree of the QC exceedances was small and did not affect the data usability. All data is considered usable, and the technical completeness was 100 percent for all analyses.

1.10 Summary

Based on the above data review, there were no significant, systematic problems identified with the analytical method performance. Minimal data were qualified due to analytical quality control exceedances, as discussed above. All laboratory data meet the quality objectives for the intended use, and all results are considered usable for project decisions.

mg/L - milligrams per liter

J - estimated concentration

UJ - The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is estimated.

µg/L - micrograms per liter

* A "No" response requires a comment to define corrective action required.

Describe unsatisfactory conditions in more detail below. Suggest corrective actions, if possible. A sketch or photo may be helpful.

Notes:

Top of waste cell is paved and used as a parking lot. The lot owner maintains the area, and the parking lot, catch basins, and drainage areas appear to be in good condition.

The lower gate has locks and signage in place. Fence is maintained. Program wells are secure.

New gates & locks impede access to gauging well MW-11.

Our lock has been removed from the MW-17 gate. We no longer have vehicle access to the location.

Homeless camp set up around MW-17. Safety concerns.

A pipe southeast of the waste cell appears to occasionally be leaking water.

The pipe is located along Auto Park Place near the base of the waste cell driveway (south of Terrace 3).

Lower gate locks & signs in place; site secured.

EXECUTIVE SUMMARY

This report presents the results of a limited ground-water and soil investigation conducted by Ogden Environmental and Energy Services Co., Inc. (Ogden) at the Brandywine Distribution Center, located at 1670 and 1690 Brandywine Avenue in Chula Vista, California. The investigation was conducted on behalf of Chula Vista Industrial Realty, Inc. The purpose of the investigation was to verify the presence of ground-water contamination beneath the site, evaluate ground-water flow direction, velocity and gradient, and assess potential sources of identified contamination.

Two previous investigations have been conducted at the site: a Phase I Environmental Site Assessment conducted by BEM Systems, Inc. in March 1994, and a Phase II subsurface environmental investigation conducted by Ceres Environmental in May 1995. Results of the Phase I site assessment indicated that no regulated or hazardous substances were found to be in current use at the site, nor were such substances being disposed of at the site. Previous tenants were primarily product distributors who would not likely use hazardous substances. The Phase II investigation results indicated that halogenated and non-halogenated volatile organic compounds (HVOCs and VOCs) occur in site soil and ground water. The observed soil impacts were located adjacent to the water table and likely associated with ground water contamination. According to the previous Phase I and Phase II investigation results, hazardous substances, especially compounds such as trichloroethene (TCE), tetrachloroethene (PCE), and methylene chloride that were detected in site soil and ground water were not used or likely disposed of at the site. BEM Systems therefore concluded that an offsite source of the observed VOC and HVOC contamination was likely. Known potential offsite sources include the former Omar rendering facility, located approximately 700 feet east of the site (the Omar facility accepted Class 1 liquid industrial wastes from 1959 to 1978), and the Otay Landfill, located approximately one-half mile northeast of the site. Extensive documentation exists in San Diego Regional Water Quality Control Board (SDRWQCB) files that indicates significant TCE and methylene chloride contamination occurs in soil and ground water at the Omar facility.

This limited soil and ground-water investigation, conducted between February 5 and March 13, 1996, included completion and sampling of five soil borings, installation and sampling of five ground-water monitoring wells, analytical testing of soil and ground-water samples, heat pulse flow logging to determine ground water flow direction, gradient and velocity, geochemical evaluation of ground water, and report preparation.

Results of this investigation indicated no detectable soil contamination (VOCs and HVOCs) occurs within the unsaturated zone onsite. However, relatively high VOC and HVOC ground-water contamination was encountered in the central portion of the site, with lower concentrations detected throughout the remainder of the site.

Heat pulse flow logging results from the central portion of the site (MW-03 and MW-04) indicate that ground-water flow in this area of the site appears to be in a generally westward direction. Observed ground-water flow rates ranged from 2.7 to 13.9 feet per day. These measurements are generally consistent with the overall direction of the measured hydraulic gradient. Heat pulse flow logging of outlying wells indicated no measurable flow (MW-01 and MW-05) or variable flow (MW-02).

Results of geochemical analysis of site ground water indicate that site ground water is of poor quality, with generally high total dissolved solids, hardness, electrical conductivity sulfate, and chloride. The ground water is not considered to be a potable water resource by the SDRWQCB (SDRWQCB 1995). One well (MW-02) had considerably lower general minerals results than the others, suggesting a localized freshwater source such as irrigation water or a leaking water line.

Contaminant mobility calculations indicate that a TCE plume originating at the Omar facility could migrate to the subject site within a relatively short time period (0.4 to 2.7 years). Because no evidence indicates that an onsite source of the observed ground-water contamination exists, and based on the results of the ground-water flow direction, velocity and gradient measurements, the most likely source of ground water contamination appears to be the adjacent Omar facility. To be effective, potential ground-water remediation activities would have to be initiated at the offsite contaminant source rather than at the subject site.

SECTION 1

INTRODUCTION AND SITE DESCRIPTION

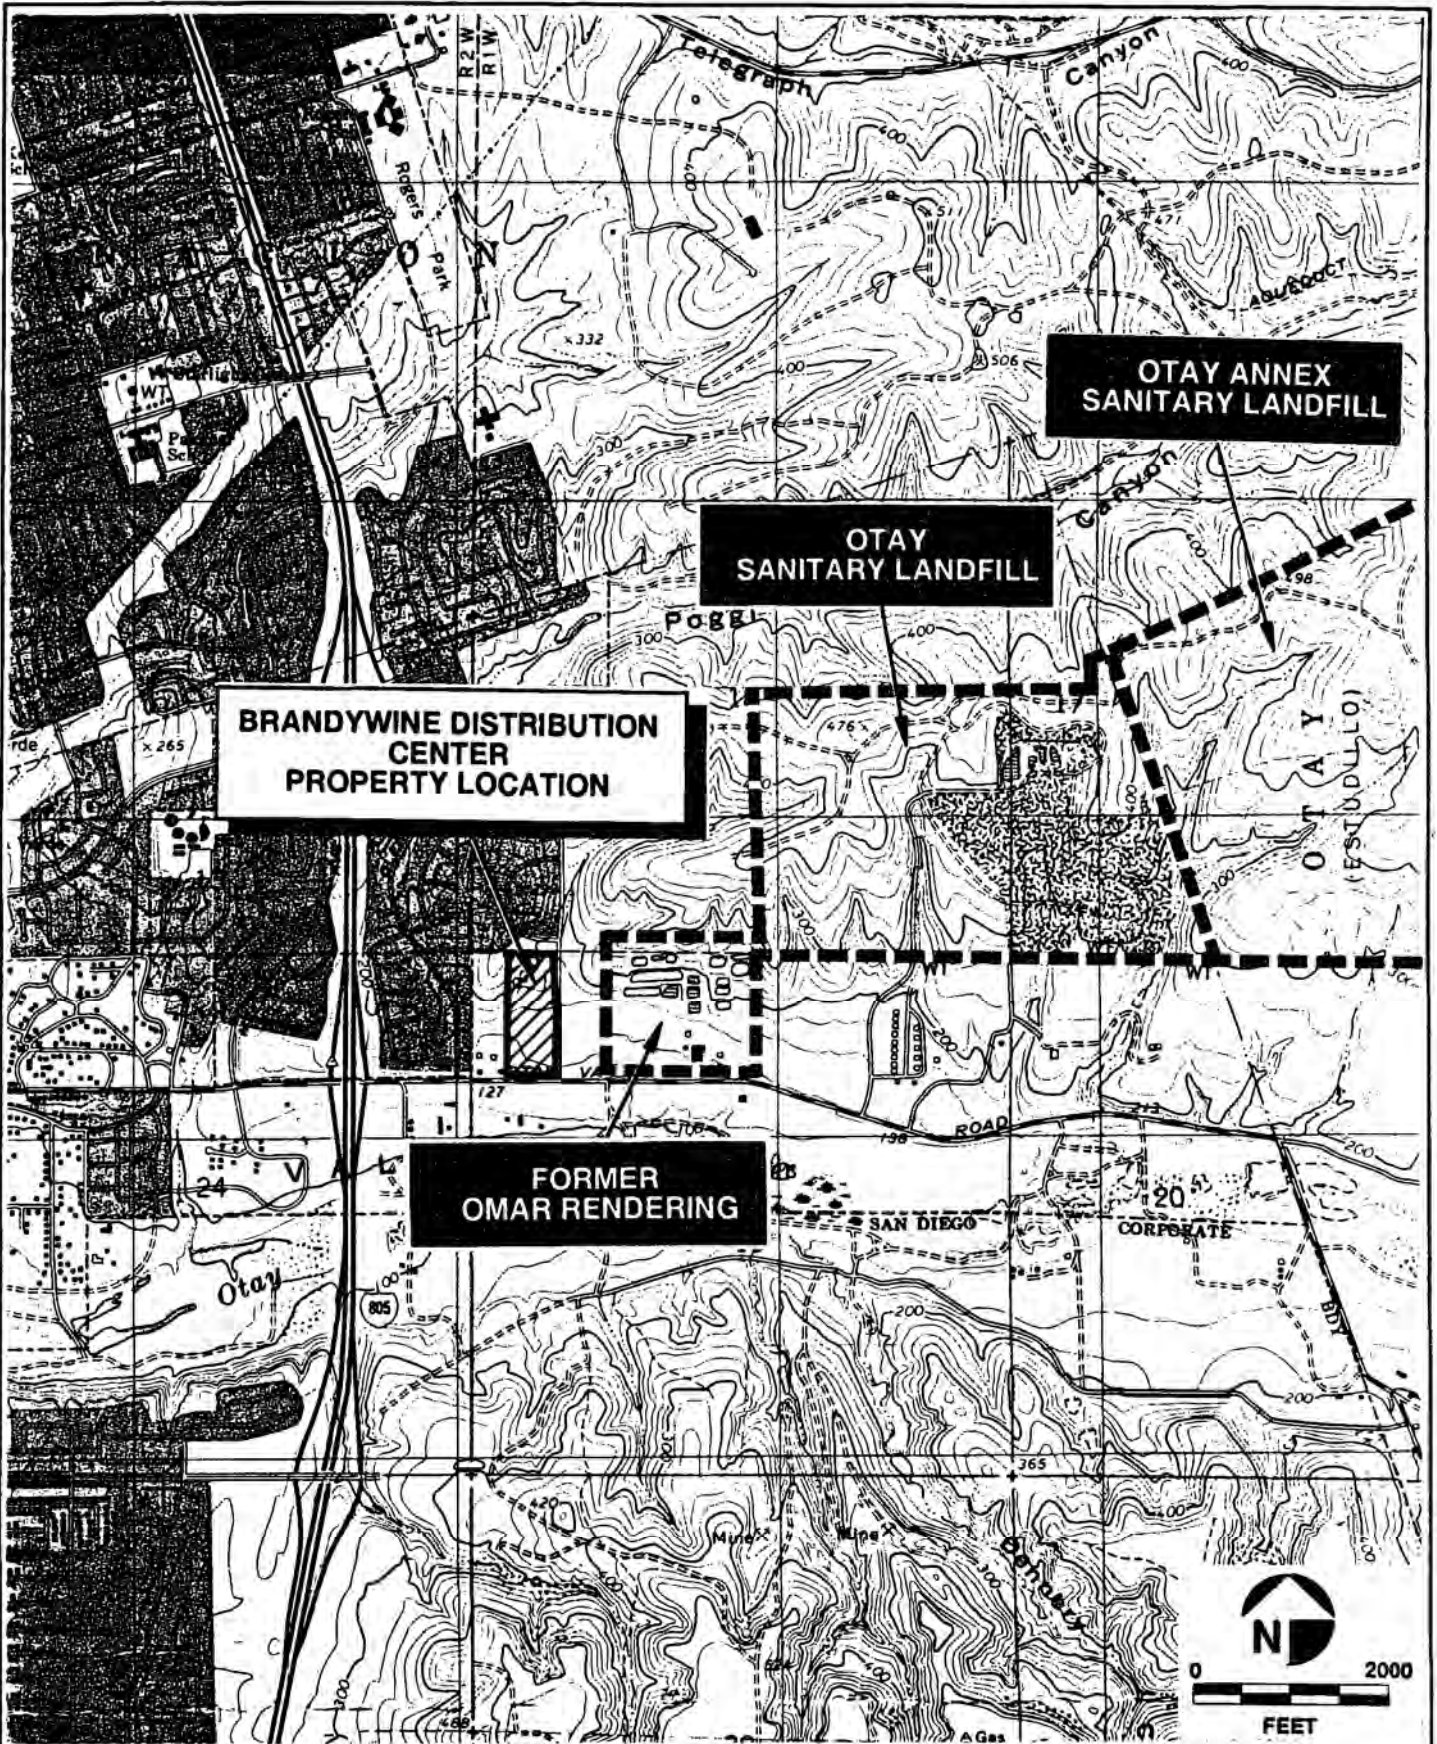

1.1 INTRODUCTION

This report presents results of a limited soil and ground-water investigation conducted at the Brandywine Distribution Center (subject site), located at 1670 and 1690 Brandywine Avenue in Chula Vista, California. A project location map is shown in Figure 1-1. This investigation was conducted by Ogden Environmental and Energy Services Company, Inc., (Ogden) for Chula Vista Industrial Realty, Inc. at the request of Mr. Robert C. Lascelles. The investigation was conducted to verify the presence of ground-water contamination beneath the subject site, evaluate ground-water flow direction, velocity, and gradient, and assess potential sources of the identified contamination.

This report includes an introduction and site description (Section 1); a discussion of previous investigations conducted at the subject site (Section 2); field investigation activities (Section 3); investigation results and discussion (Section 4); conclusions and recommendations (Section 5); references (Section 6) and limitations (Section 7).

1.2 SITE DESCRIPTION

The subject site is located along the west side of Brandywine Avenue, immediately north of Otay Valley Road, in Chula Vista, California (Figure 1-1). According to a previous Phase I Environmental Site Assessment performed for the property, the site consists of two rectangular parcels with a combined area of 9.84 acres (BEM 1994). The subject property contains two commercial/light industrial buildings located at 1670 and 1690 Brandywine Avenue, located across Shinohara Lane from each other. The majority of the site is paved with asphalt, with landscaping around the edges of the site. The site generally slopes from north to south and ranges in elevation from approximately 175 feet above mean sea level (MSL) along the northern boundary to approximately 130 feet MSL along the southern site boundary.

Project Location Map

FIGURE

1-1

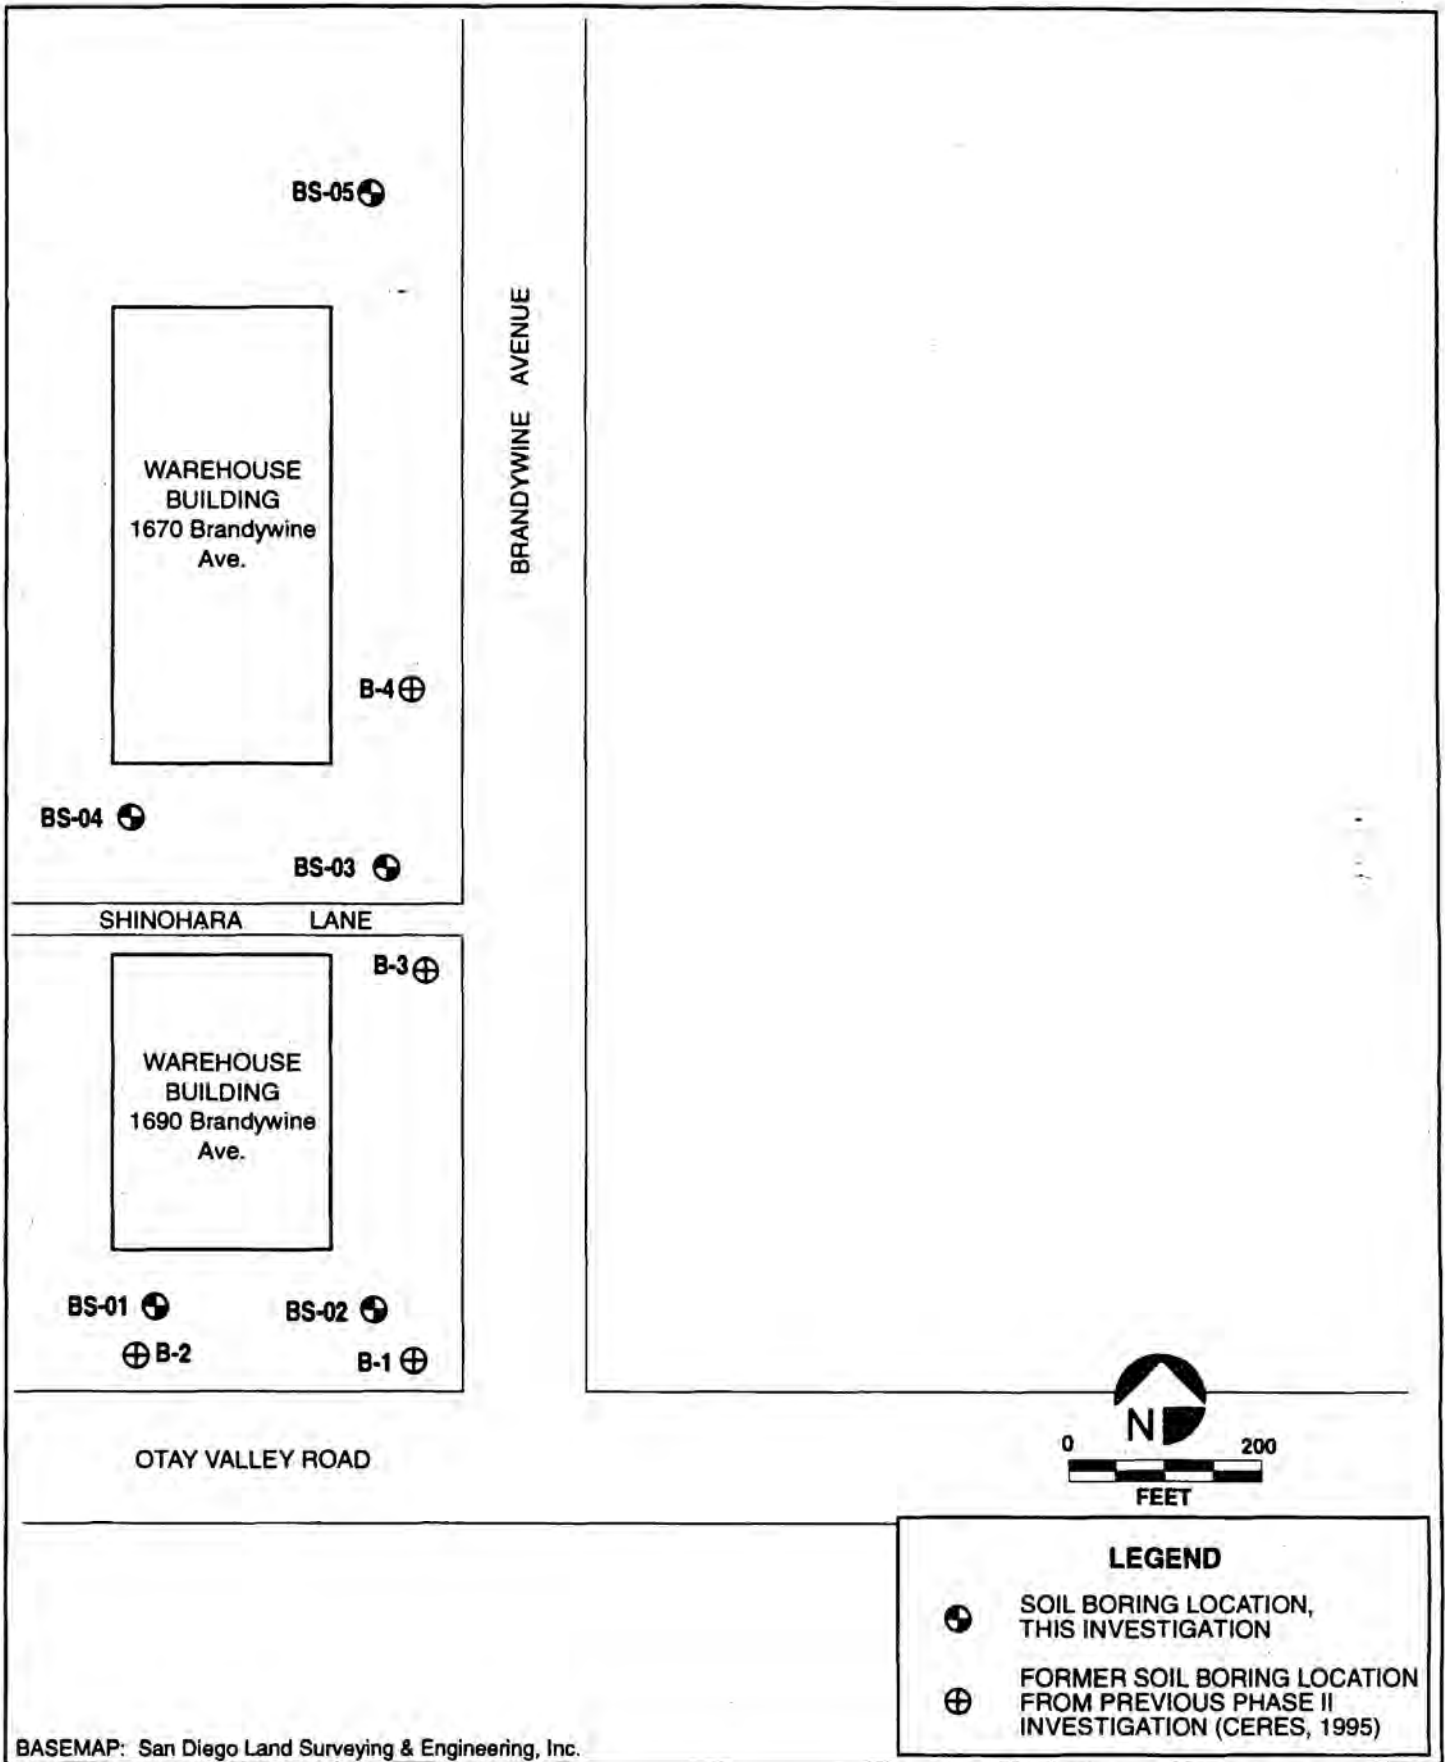

SECTION 2 PREVIOUS INVESTIGATIONS

Two previous environmental investigations have been conducted at the subject site, including a Phase-I Environmental Site Assessment and a Phase II subsurface soil assessment. BEM Systems, Inc. (BEM) conducted a Phase I investigation in March, 1994. The purpose of the Phase I investigation was to identify existing or potential environmental hazards and to recommend whether further investigation would be warranted.

According to the Phase I report, the site was believed to be previously undeveloped. Based on a site reconnaissance and interviews with current building tenants, no regulated or hazardous substances were found to be in current use at the site, nor were such substances being disposed of at the site. According to the property manager, previous tenants were primarily product distributors who would not likely use hazardous substances. Current tenants were reported to be involved in the sale or distribution of lumber, hardware, dried flowers, halogen lamps, and Easter baskets, and would not be likely to use hazardous substances (BEM 1994).

A Phase II subsurface environmental investigation conducted by Ceres Environmental (CERES) in May, 1995, provided data indicating that soil and ground water beneath the subject site contains halogenated and non-halogenated volatile organic compounds (HVOCs and VOCs). Four soil borings were excavated on May 12 and 15, 1995, as shown in Figure 2-1. Soil samples collected at the soil/ground-water interface from borings B-1, B-3, and B-4 were submitted to an analytical laboratory for analysis (refusal on large cobbles was encountered in B-2 prior to reaching ground water). Ground-water samples were also obtained from soil borings B-1, B-3, and B-4. Table 2-1 presents the analytical results for soil and ground water.

CERES concluded that the most likely source of the observed HVOCs and VOCs in soil and ground water was the former Omar Rendering (Omar) site, located approximately 700 feet east of the subject site. The Omar site is described in the 1994 BEM Phase I report as being listed in the CORTESE, CERCLIS, CALSITES, and SWIS environmental databases. According to files reviewed by CERES at the San Diego Regional Water Quality Control Board (SDRWQCB), the Omar Rendering facility accepted Class I liquid industrial wastes from 1959 to 1978. These liquids, which included organic solvents,

were stored in large surface impoundments in the northern portion of the site (CERES 1995).

Based on the proximity of the Omar site to the subject property, the period of time that evaporation ponds were in operation, and the anticipated southwestward ground-water flow direction, CERES concluded that the adjacent Omar site was most likely the source of ground-water contamination beneath the subject site. The Otay Landfill, located approximately 1/2 mile northeast of the subject property, was also identified as a possible secondary contamination source (CERES 1995).

Files reviewed by Ogden at the Site Assessment and Mitigation (SA/M) Division of the County of San Diego Department of Environmental Health indicate that ground-water contamination beneath the Omar site is well documented. A site investigation report for the Omar site by Dames and Moore (1989) indicates that trichloroethene (TCE) was detected in 7 of 9 ground-water monitoring wells at concentrations ranging from 3 to 1,100 parts per billion (ppb). In addition, several metals were detected in ground-water samples, with mercury and selenium exceeding primary drinking water standards in several monitoring wells. An annual ground-water monitoring report by Dames and Moore (1995) indicates that TCE concentrations as high as 3,000 micrograms per liter ($\mu\text{g/l}$) were measured in ground water beneath the Omar site between 1989 and 1994. A 1996 addendum to the 1989 Dames and Moore report by Risk-Based Decisions, Inc. indicates that a ground-water TCE concentration of 21,000 $\mu\text{g/l}$ was measured in a monitoring well located within the area occupied by the former southwestern surface impoundment at the Omar site.

Available SA/M files were also reviewed for the property occupied by Hyspan Precision Products, Inc. This property is located at 1685 Brandywine Avenue, directly east of the subject site on the eastern side of Brandywine Avenue. According to the County of San Diego Compliance Inspection Report, a single 1,000-gallon diesel fuel underground storage tank (UST) was removed from the property in February, 1986. No indication of soil or ground-water contamination was apparent in the tank excavation. In addition, a 1994 Compliance Inspection Report for the Hyspan property indicates that onsite machinery was observed to be leaking oil to the ground. Available records did not indicate that any other hazardous materials releases, leaks, or removals have been reported at this property. Based on these records, the Hyspan property does not appear to be a possible source for HVOCs and VOCs detected in ground water at the subject site.

SECTION 3

FIELD INVESTIGATION ACTIVITIES

The current field investigation activities were performed by Ogden at the subject property between February 5 and March 13, 1996. The activities included a subsurface utility detection survey; drilling and soil sampling; installation, development, and sampling of monitoring wells; land surveying; heat-pulse flow logging; and management of investigation-derived waste (IDW). The following sections describe these activities.

3.1 UNDERGROUND UTILITY CHECK AND UTILITY DETECTION SURVEY

Underground Service Alert (USA) was contacted prior to commencement of field activities. All utility companies contacted by USA indicated that no underground utilities were present in the direct vicinity (i.e., within 5 feet) of proposed boring/monitoring well locations.

An underground utility detection survey was conducted by Underground Location Services Company (ULS) of La Jolla, California, on February 5, 1996. The underground utility survey was conducted to locate and identify underground cables, pipes and utilities at each boring location. ULS performed an Electromagnetic Pipe and Cable Location (EMPCL) conductive utility survey, which utilized passive, ground induction and connection modes. ULS also conducted an Electromagnetic Induction (EMIND) sweep for potential metal mass interference. A 10-foot radius around each boring was investigated. No anomalous readings or underground utilities were identified at any of the five boring locations surveyed. The utility detection survey report by ULS is included in Appendix A.

3.2 SOIL SAMPLING

Soil sampling activities were conducted on February 10 and 11, and on February 17 and 18, 1996. Valley Well Drilling of Ventura, California, provided the drilling services. A total of five soil borings were conducted to depths ranging from 56.5 to 91 feet below ground surface (bgs). Soil boring locations BS-01 through BS-05 are shown in Figure 2-1. Three borings were conducted at 1670 Brandywine Avenue and two were conducted at 1690 Brandywine Avenue.

Soil borings were conducted using a Failing F-6 drill rig equipped with 8-inch (outside diameter) hollow-stem augers. Soil cuttings were examined every 10 feet to identify

changes in lithology, soil moisture, and organic vapor concentrations. Soil sampling was accomplished using a California Modified 1 3/8" inside diameter split-spoon sampler equipped with three 6-inch brass sleeves. Soil samples were obtained by driving the sampler with a 140-pound hammer dropped from a height of 30 inches in accordance with ASTM D 1586. Two to three split-spoon samples were collected from each boring, for a total of 13 samples. Sample locations were selected to include at least one sample each from the unsaturated and saturated zones.

The ends of the sample sleeves were covered with Teflon tape, capped, labeled, and placed immediately on ice. Headspace vapor analysis was performed as a field screening technique for assessing whether organic contaminants were present in soil samples. This was done by first placing a portion of the soil sample or cuttings into a zip-lock plastic bag. After the bag was allowed to remain in the sun for several minutes, an H-Nu™ photoionization detector (PID) was used to measure organic vapor concentrations within the plastic bag. Soil classification and sampling activities were conducted by a State of California Registered Geologist. Soils were logged using the Unified Soil Classification System (USCS) in accordance with ASTM D 2488. Soil boring logs are included in Appendix A, along with a description of the USCS.

All drilling equipment was decontaminated using a hot-water high pressure washer system prior to the commencement of field activities and between each boring. Field sampling equipment (e.g., split-spoon samplers, sleeves, caps, etc.) was decontaminated prior to sampling and between each sample using Ogden's standard decontamination procedures, which include a wash in a laboratory grade detergent, potable water rinse, isopropyl alcohol spray, potable water rinse, and distilled water rinse. All decontamination fluids were containerized in DOT approved 55-gallon drums and temporarily stored onsite pending sampling results.

3.3 MONITORING WELL INSTALLATION

The five soil borings (BS-01 through BS-05) were converted to monitoring wells (MW-01 through MW-05) following soil sampling activities. A two-inch polyvinyl chloride (PVC) ground-water monitoring well was installed in each boring. Well screens consisted of slotted PVC with 0.010-inch slot size. Well screen sections were 20 feet in all monitoring wells except MW-01, in which a 30-foot section of well screen was installed due to a large amount of ground-water rise following drilling activities. All installation procedures were

conducted in accordance SA/M Division requirements as specified in the 1996 SA/M Manual. Surface completions for each well consisted of a flush-mounted traffic box finished with a Class A cement surface seal in accordance with SA/M requirements. Monitoring-well construction was overseen by a State of California Registered Geologist. Well construction logs are included in Appendix A.

Following installation, each monitoring well was developed in accordance with SA/M division requirements. A surge and bail method was used to develop the monitoring wells. Each well was surged with a surge block for a minimum of 20 minutes, after which ground water was removed with a bailer. Purged water was monitored for pH, temperature, turbidity and electrical conductivity. The process of alternately surging the well and removing ground water with a bailer was continued until the parameters stabilized and until ground water became substantially less turbid. All purged water was drummed in DOT approved 55-gallon drums and temporarily stored onsite. Appendix A contains the monitoring-well development records.

3.4 GROUND-WATER SAMPLING

Ground-water samples were collected from monitoring wells MW-01 through MW-05 on February 27, 1996, in accordance with SA/M Division requirements, following a minimum 72-hour period after monitoring well development. Prior to sampling, depths to ground water were measured and each monitoring well was purged by pumping with a 2-inch Grundfos™ submersible pump, which was decontaminated prior to use and between monitoring wells. Purged water was monitored for temperature, pH, and conductivity. Purging was continued until these parameters stabilized with successive measurements. Well development and purge records are included in Appendix A. Purge water was contained and stored onsite in 55-gallon DOT-approved drums. Ground-water samples were collected from each well with disposable polyethylene bailers.

3.5 SOIL AND GROUND-WATER SAMPLE ANALYSIS

Soil and ground-water samples collected for analysis were delivered with proper chain-of-custody documentation to CKY Inc. Analytical laboratories, in Torrance, California. Soil samples were analyzed for halogenated and non-halogenated VOCs using EPA methods 8010/8020 and for Total Organic Carbon (TOC) using EPA method 90-3.2 ASA. All thirteen soil samples collected were submitted for analysis.

Ground-water samples were analyzed for halogenated and non-halogenated VOCs using EPA methods 8010/8020, and for general chemistry constituents and metals (various EPA Methods). Five ground-water samples were submitted for analysis. Complete copies of original analytical laboratory reports for soils and ground water are included in Appendix B.

3.6 SURVEYING AND DEPTH TO GROUND-WATER MEASUREMENTS

San Diego Land Surveying & Engineering, Inc. was subcontracted to survey the monitoring well elevations. Monitoring wells were surveyed to a vertical accuracy of 0.01-foot using a bench mark reference to mean sea level. All monitoring wells were surveyed at a notch located at the top of the PVC casing to provide a datum for water-level measurements. Depth to ground water was measured in each monitoring well on February 27, 1996, prior to ground-water sampling activities. Ground-water depths were measured with respect to the notch at the top of the PVC casing using a Solinst Model 101 water-level meter.

3.7 HEAT-PULSE FLOW LOGGING

Heat-pulse flow (HPF) logging was performed at the subject site on March 12 and 13, 1996, using a Model 200 GeoFlo™ ground-water flow meter. A heat-pulse flow meter is a hydrological logging device used to determine ground-water flow direction and velocity in monitoring wells and open boreholes. A heat-pulse flow meter operates by emitting a heat pulse and measuring subsequent temperature changes in the ground water as a result of the ground-water movement. Direct small-scale ground-water velocity and flow direction measurements can therefore be made within a single well. An article (Gutherie 1986) describing the use of a heat-pulse flow meter is included in Appendix C.

Ground-water velocities and flow directions were directly measured in MW-02, MW-03, and MW-04. Ground-water flow measurements were conducted at two different depths in each monitoring well. A minimum of four velocity measurements were collected at each depth and averaged to provide a mean ground-water flow velocity measurement and error range. Measurable ground-water flow was not detected in MW-01 and MW-05. Ground-water flow direction measurements were referenced to magnetic north and subsequently corrected to true north.

3.8 MANAGEMENT OF INVESTIGATION-DERIVED WASTE

A total of 41 55-gallon DOT-approved drums of investigation-derived waste (IDW) were generated during this investigation. Drum contents include soil cuttings, purge water, decontamination water, unused grout, and asphalt. Other IDW, including used tyvek coveralls, nitrile gloves, used headspace bags, and plastic sheeting, were double-bagged, sealed, and disposed of as municipal waste. Drums were labeled, sealed, and stored temporarily onsite pending analytical results. Details of IDW disposal will be provided in a separate report.

SECTION 4 INVESTIGATION RESULTS AND DISCUSSION

4.1 GENERAL GEOLOGIC CONDITIONS

According to the Phase II report by CERES (1995), the subject site is underlain by river terrace deposits of Holocene age (less than 11,000 years old). These deposits are underlain by Pliocene-age (less than 5 million years old) deposits of the San Diego Formation (Kennedy and Tan 1977; Kuper and Gastil 1977). The terrace deposits are described as unconsolidated sand, gravel, and clay derived from older geologic units. The San Diego Formation consists of yellowish-brown to reddish-brown, fine- to medium-grained marine sandstone.

The closest mapped fault is the La Nacion fault zone. A strand of the La Nacion fault zone has been mapped as trending approximately north-south in the general vicinity of Brandywine Avenue adjacent to the eastern edge of the subject site (Kennedy and Tan 1977; Kuper and Gastil 1977). This fault strand is presently considered to show evidence of offset during Quaternary time (last 1.6 million years) but not during Holocene time (Jennings 1994).

4.2 REGIONAL GROUND-WATER CONDITIONS

The subject site is located within the Otay Valley Hydrologic Area (HA) of the Otay Hydrologic Unit of the San Diego Drainage Province (SDRWQCB 1995). Ground water within the Otay HA generally flows from east to west, along the course of the Otay River, toward San Diego Bay. Ground-water quality in portions of the Otay HA is considered to be of poor quality due to high total dissolved solids (TDS) and elevated chloride concentrations. High chloride content may be due partially to the presence of connate water and dissolved salts within marine sediments (Dames and Moore 1989). According to the current Water Quality Control Plan for the San Diego Basin (the Basin Plan), the subject site lies within a portion of the Otay Hydrologic Unit that is designated as having beneficial uses only for industrial purposes; however, discussions with staff at the SDRWQCB indicate that ground-water beneath the Brandywine site is not exempted from having municipal and agricultural beneficial uses (verbal comm. with Brian McDaniel on May 8, 1996).

4.3 SUBSURFACE SOIL CONDITIONS

Subsurface conditions encountered during this investigation were generally similar to those described in the previous Phase II subsurface investigation (CERES 1995). Probable fill soils were encountered in the upper few feet bgs of BS-01, BS-02, and BS-04. These soils were lithologically similar to the underlying terrace deposits and consisted primarily of moist, brown to light olive brown, silty sand in BS-01 and BS-04, and dark grayish brown, moist clay in BS-02. Terrace deposits were encountered beneath fill soils in BS-01, BS-02, and BS-04, and consisted of brown to dark grayish brown, moist, dense, silty sands and clays. No fill soils were encountered in BS-03. Terrace deposits encountered in BS-02 were finer grained than in other borings. Cobbly horizons characterized by difficult drilling conditions were encountered at approximately 25 to 37 feet bgs in BS-01, 28 to 33 feet bgs in BS-02, and 40 to 50 feet bgs in BS-03. The San Diego Formation was encountered beneath the terrace deposits at depths ranging from the ground surface in BS-05 to depths of 65 to 70 feet bgs in BS-04. All five borings were terminated within the San Diego Formation, which consisted of moist to wet, dense to very dense, micaceous, olive brown silty sand and silt.

No hydrocarbon or solvent odors were detected in any of the borings, nor was any visual evidence of soil contamination (i.e., staining, discoloration, etc.) observed. Slight headspace PID readings of 1 to 2 parts per million (ppm) were measured between 36 and 67 feet bgs in BS-04 and at 36 feet bgs in BS-05.

4.4 SITE GROUND-WATER CONDITIONS

Ground water was encountered at depths ranging from approximately 52.6 feet bgs in MW-02 to 76.3 feet bgs in MW-04. Ground water rose approximately 10 to 13 feet in MW-01, MW-02, and MW-03 within approximately 60 minutes after first being encountered. In contrast, ground water equilibrated at a level approximately 2 feet higher in MW-04 and MW-05 within several hours after boring completion. Ground-water levels in MW-01 and MW-02 recovered relatively quickly subsequent to purging, whereas water levels in MW-03, MW-04, and MW-05 recovered more slowly, as indicated by well purge records (Appendix A).

Ground-water elevations and ground-water contours are shown in Figure 4-1. HPF logging results are discussed in Section 4.6. Ground-water elevations range from 103 feet

MSL in the northeastern portion of the site to 93.7 feet MSL in the southwestern portion of the site. Monitoring well recovery data from MW-01, MW-02, and MW-03 (presented in previous paragraph) suggest that the uppermost aquifer beneath the site is somewhat confined (i.e., under pressure) locally; however, static ground-water elevations across the site indicate that ground-water generally flows from northeast to southwest, as evidenced by the trend of the ground-water contours (Figure 4-1). These results indicate that the subject site is down-gradient of the Omar and Otay Landfill sites. The ground-water gradient (i.e., the slope of the ground-water table) at the subject site is approximately equal to 0.02 ft/ft (106 feet per mile).

Figure 4-2 shows a comparison of ground-water contours at the subject site with ground-water contours at the Omar and Otay Landfill sites. As shown in Figure 4-2, ground-water elevations generally increase toward the northeast, indicating that ground-water flow in the uppermost aquifer is generally southwest.

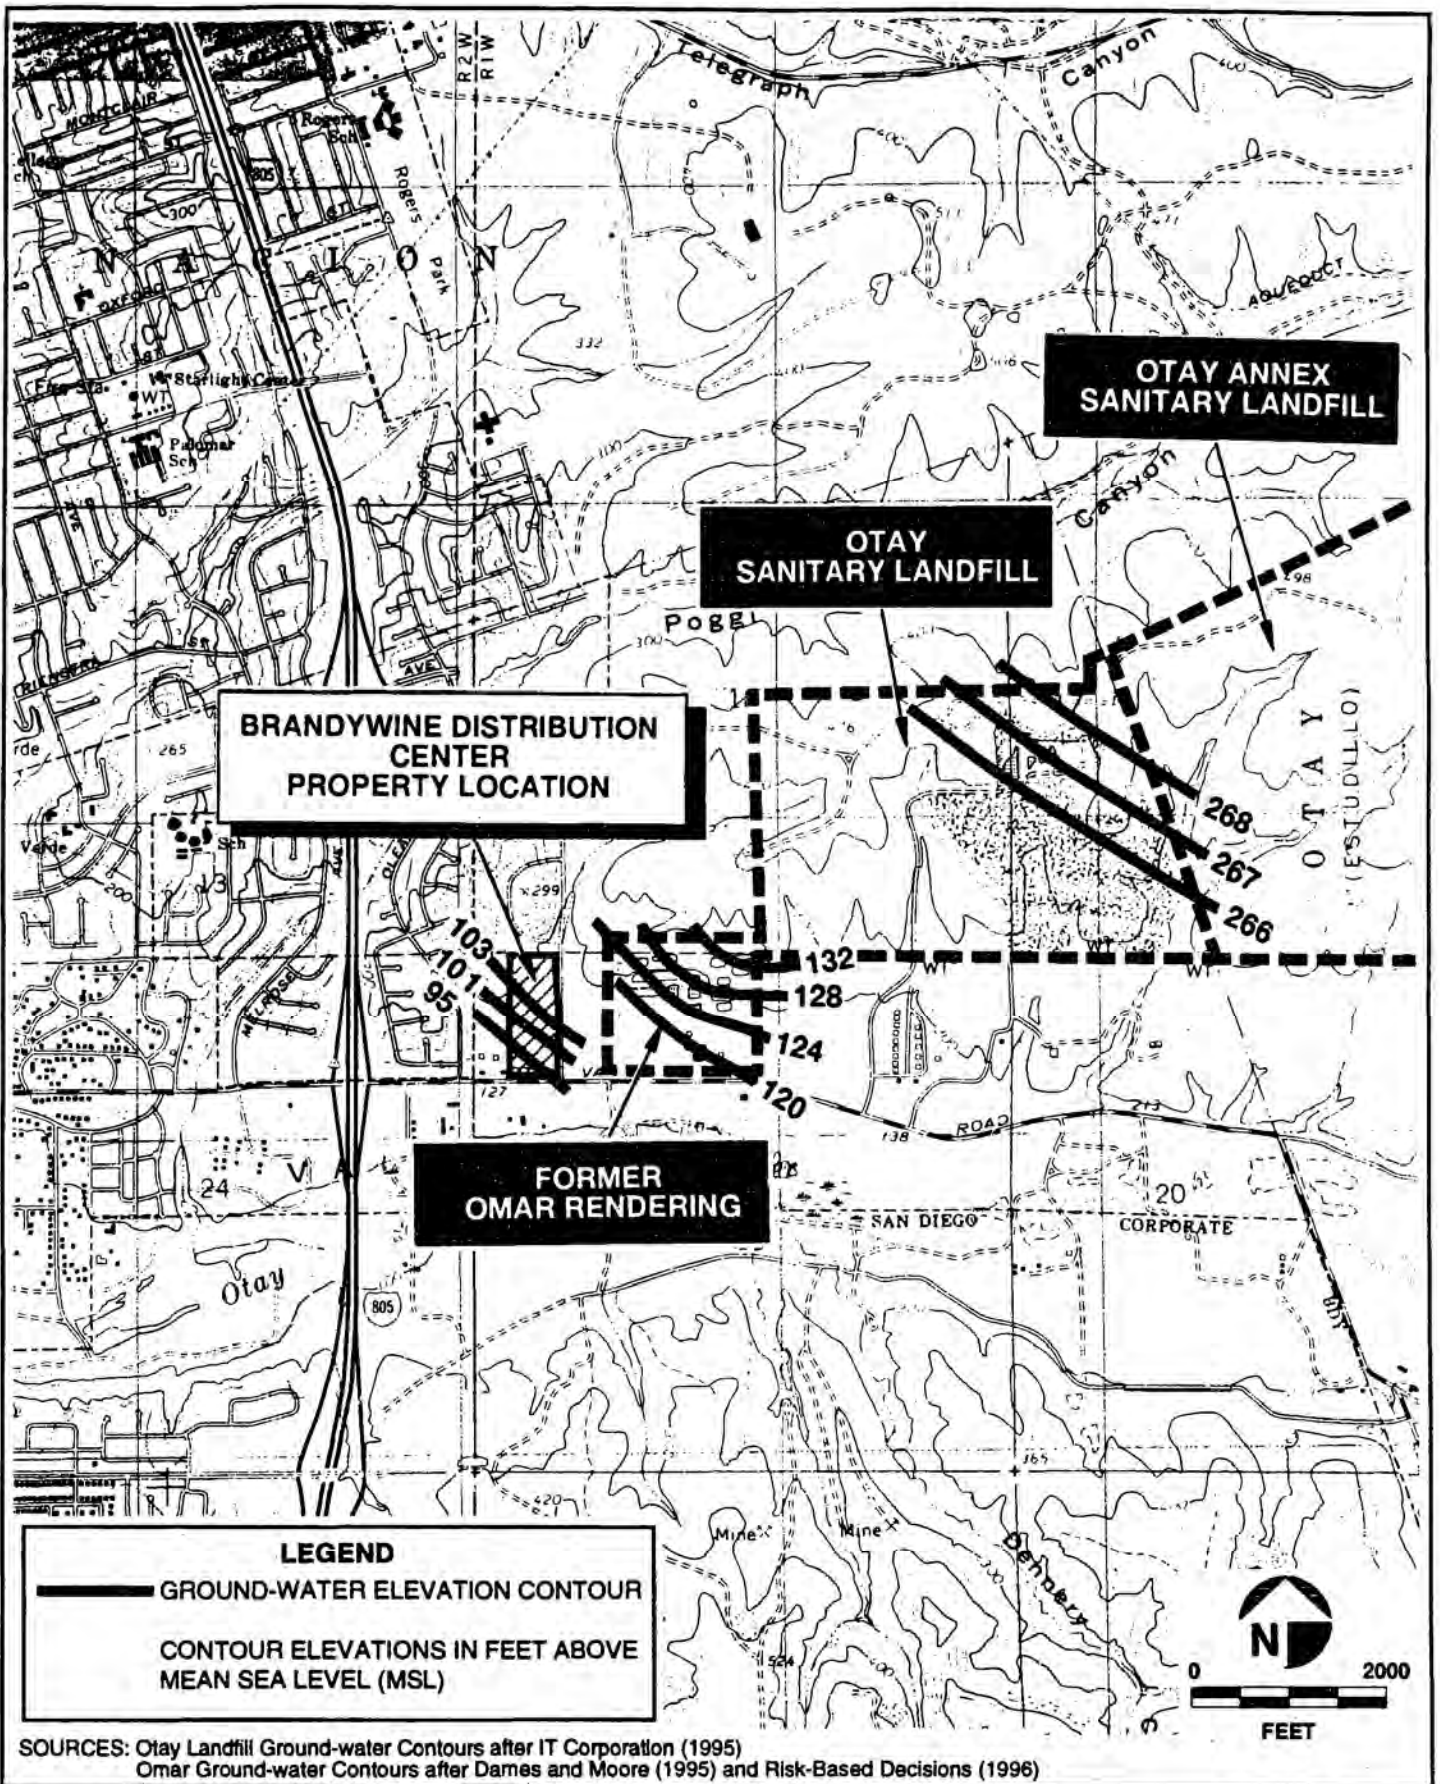

4.5 ANALYTICAL RESULTS

Soil

Soil analytical results are shown in Figure 4-3. HVOCs and benzene, toluene, xylenes, and ethylbenzene (BTXE) were not detected above their respective laboratory detection limits in BS-01, BS-02, and BS-05. None of the soil samples collected within the unsaturated zone contained detectable HVOC or BTXE concentrations.

HVOCs were detected in BS-03 and in BS-04 at depths of 66.5 feet and 86.5 feet bgs, respectively. A trichloroethene (TCE) concentration of 240 $\mu\text{g}/\text{kg}$ was detected in sample S03D86.5, collected at a depth of 86.5 feet bgs; a TCE concentration of 16 $\mu\text{g}/\text{kg}$ was detected in S02D66.5 in BS-04, collected at 66.5 feet bgs in BS-04. Both of these samples were collected within the saturated zone (i.e., below the ground-water table).

The absence of detectable HVOC and BTXE concentrations within the unsaturated zone, relatively high ground-water HVOC concentrations, and a lack of historical and current hazardous materials usage at the site indicate an offsite contamination source. Table 4-1 lists the total organic carbon (TOC) results for soil. These results and their influence on contaminant mobility are discussed in Section 4.7.

Appendix B contains the complete analytical laboratory reports for TOC.

Ground Water

General minerals analytical results for ground water are shown in Table 4-2. Ground water beneath the subject site appears to be of poor quality, with elevated total dissolved solids (TDS) concentrations ranging from 2,310 to 10,600 milligrams per liter (mg/l) and chloride concentrations ranging from 598 to 5,400 mg/l.

The general minerals results for MW-02 differ considerably from the results for the other monitoring wells. Specifically, chloride, sulfate, electrical conductivity (EC), total dissolved solids (TDS) and hardness results are much lower for MW-02 than for MW-01, MW-03, MW-04, and MW-05. These results indicate that the ground water in the vicinity of MW-02 is chemically distinct from other portions of the site. This difference may be a result of influence from an anthropogenic water source, such as over-irrigation of the adjacent landscaping or a leaky irrigation line.

The ground-water analytical results for EPA Methods 8010 (HVOCs) and 8020 (BTXE) are shown in Figure 4-4. All five ground-water samples contained detectable concentrations of HVOCs. TCE concentrations in MW-03 and MW-04 are significantly higher than in MW-01, MW-02, and MW-05. TCE concentrations detected in MW-01, MW-02, and MW-05 range from 1.6 to 13 $\mu\text{g/l}$, while concentrations of 400 and 720 $\mu\text{g/l}$ were detected in MW-03 and MW-04, respectively. Methylene chloride concentrations in MW-01 through MW-05 ranged from 30 to 87 $\mu\text{g/l}$.

A comparison of the TCE and methylene chloride ground-water results for the subject site and the adjacent Omar and Otay Landfill sites is shown in Table 4-3. Ground-water analytical data for the Omar and Otay Landfill sites were obtained from available reports on file at the San Diego County SAM Division. As shown in Table 4-3, the maximum TCE concentrations measured in ground-water beneath the Omar site are substantially higher (by one to two orders of magnitude) than concentrations at the subject site and the Otay Landfill site. Methylene chloride concentrations at the Omar site are also higher than concentrations at the subject site.

N/A Not applicable.

¹Brandywine analytical data from results of present investigation and previous Phase II investigation (CERES 1995). Omar Rendering data from Dames and Moore (1995) and Risk-Based Decisions (1996). Otay Landfill Data from IT Corporation (1993) and County of San Diego (1994). Otay Landfill data shown are for uppermost (perched) aquifer.

²A less-than symbol (<) followed by a value indicates the laboratory detection limit.

Although both the Otay Landfill and the Omar facility are located upgradient from the subject site, ground-water TCE concentrations beneath the subject site are higher than those detected at the Otay Landfill. In addition, the Omar site is substantially closer to subject site than is the Otay Landfill. Given these observations and analytical results, the Omar site represents a more likely source of ground-water contamination at the subject site than does the Otay Landfill.

Analytical results for metals are shown in Table 4-4. These results, which are for unfiltered ground-water samples, also indicate poor ground-water quality. Table 4-5 shows a comparison of selected metal concentrations in ground water from the subject site with available analytical data from the nearby Omar and Otay Landfill sites. Maximum ground-water metal concentrations generally appear to be higher at the subject site than at the Omar and Otay Landfill sites; however, direct comparisons of metal concentrations among the three sites listed in Table 4-5 are not possible due to varying levels of suspended solids in ground-water at the three sites. Typically, high levels of suspended solids in ground water result in increased total metal concentrations. The main conclusion to be

² From IT (1993). Metal concentrations converted from mg/l.

A less-than symbol (<) followed by a value indicates the laboratory detection limit.

drawn from Table 4-5 is that elevated metal concentrations occur in the ground water beneath all three sites.

4.6 HEAT-PULSE FLOW LOGGING RESULTS

HPF logging results are presented in Table 4-6 and Figure 4-1. Ground-water flow directions and velocity measurements obtained from HPF logging are considered approximate due to variability in the HPF data; however, these results are generally consistent with ground-water flow directions indicated by the trend of the ground-water contours (also shown in Figure 4-1). The HPF data and the ground-water contours both indicate that ground-water beneath the subject site flows in a southwest to northwest direction. Vertical variability of the ground-water flow field was also observed, as is typical for many aquifers (Fetter 1988).

The results from MW-03 indicate a southwest flow direction of approximately 3.9 to 13.9 feet per day, with an average value of approximately 8.9 feet per day. HPF logging results indicate that ground-water flow in the vicinity of MW-04 is generally west to northwest at velocities ranging from approximately 2.7 to 4.3 feet per day, with average values of 3.5 to 4.1 feet per day. No measurable flow was detected in MW-01 and MW-05, located in the southern and northern portions of the site, respectively. Based on the flow meter instrument sensitivity and on site ground-water conditions, ground-water flow in the direct vicinity of these wells is estimated to be less than about 1 foot per day. Measured ground-water flow directions in each monitoring well generally exhibited 10 to 30 degrees of variability, and ground-water flow velocity measurements generally exhibited approximately 0.2 to 5 feet per day of variability.

A northeast ground-water flow of approximately 3 feet per day was measured at 49 feet bgs in MW-02, whereas a southward flow of approximately 11 feet per day was measured at 44 feet bgs in MW-02. These results may reflect localized influence from an anthropogenic surface water source, as discussed in Section 4.5. Alternatively, these results may reflect a natural variability of the overall ground-water flow field, as discussed below.

One explanation for the vertical variability of flow directions and velocities measured in MW-02 is that since HPF measurements are made at a point source (i.e., a particular level in a small-diameter monitoring well), such measurements may reflect localized flow irregularities through the aquifer material rather than regional ground-water flow directions.

Table 4-6

SUMMARY OF HEAT-PULSE FLOW LOGGING RESULTS

| Monitoring Well | Depth to Water at Time of Flow Measurement ¹ | Depth of Flow Measurement ¹ | Magnitude of Ground-water Flow | Direction of Ground-water Flow (azimuth) |

¹ Measured from ground surface.
NM Not Measurable

Such flow irregularities can result from locally heterogeneous aquifer conditions such as changes in lithology, which cause significant changes in hydraulic conductivity. Flow variability in MW-02 may therefore be a result of preferential groundwater flow at discrete depths in the direct vicinity of MW-02.

Ground-water elevations and heat pulse flow data indicate an overall westward ground-water flow direction in the direct vicinity of MW-03 and MW-04. HPF data indicate that the most significant ground-water flow is primarily occurring beneath the central portion of the site, as indicated by generally higher flow velocities and more consistent flow directions in this area than in the northern and southern portions of the site (Figure 4-1). Ground-water TCE concentrations are also higher in this portion of the subject site than in the northern and southern portions of the site. This portion of the site is directly down-gradient of the adjacent Omar site; therefore, the Omar site represents the most likely source of ground-water contamination observed at the subject site.

As a rough check of the HPF ground-water velocity results, hydraulic conductivities were back-calculated for aquifer materials from HPF data and from the measured ground-water gradient (i.e., the slope of the water table) beneath the subject site. Hydraulic conductivity (K) is a measure of the rate at which water moves through a permeable medium. Calculated hydraulic conductivities range from 0.014 to 0.073 centimeters per second (cm/s). These values are within a typical K range of 0.0001 to 0.01 for silty sand (Fetter 1988). Measured ground-water velocities at the subject site therefore appear to be realistic values.

4.7 RESULTS OF CONTAMINANT MOBILITY EVALUATION

The mobility of TCE in ground-water beneath the subject site and vicinity was evaluated by calculating its retardation factor (R). R represents the degree to which the average velocity of a dissolved contaminant plume in ground water is retarded (i.e., slowed down) relative to the ground-water flow velocity. The larger the R value, the slower the average velocity of the contaminant plume relative to that of the seepage velocity (i.e., the velocity of ground water). R is strongly influenced by the fraction of organic carbon (TOC) in the aquifer material. The higher the fraction of TOC in the aquifer material, the lower the mobility of an organic contaminant, since organic compounds exhibit a strong tendency to sorb onto organic carbon particles within an aquifer (Fetter 1993).

As explained below, average TCE plume velocities (i.e., retarded velocities) derived from estimated R values are relatively close to measured ground-water velocities. This indicates that the dissolved TCE ground-water plume beneath the subject site is relatively mobile, since its average velocity is close to that of the ground water. As noted above, aquifer materials contain very little organic carbon, indicating high TCE mobility.

TCE plume travel times from the Omar site to the subject site were estimated to be relatively low (0.4 to 2.7 years); therefore, not much time would be required for a TCE plume originating at the Omar site to migrate to the subject site. Historical TCE concentrations as high as 3,000 $\mu\text{g/l}$ have been measured in ground water beneath the Omar site (Table 4-3). Methylene chloride concentrations as high as 14,000 $\mu\text{g/l}$ have also been measured (Dames and Moore 1995).

Discussion of Contaminant Mobility Results

The retardation factor (R) is defined by the following equation:

$$R = 1 + \frac{K_d B_d}{\Theta_{eff}} \quad (\text{Equation 4-2; Fetter 1988})$$

where

K_d = the distribution coefficient;

B_d = the bulk density of the aquifer material (assumed to equal 1.3 kg/l); and

Θ_{eff} = the effective porosity of the aquifer material (assumed to equal 0.3).

The distribution coefficient (K_d) in Equation 4-2 is a measure of the equilibrium partitioning of a compound between the sorbed and dissolved phases. A site-specific K_d value can be estimated by dividing the TCE concentration in soil by the TCE concentration in ground water at the subject site. Bulk density (B_d) and effective porosity (Θ_{eff}) values were estimated from typical ranges for these parameters given by Holtz and Kovacs (1981) and Fetter (1988).

Two methods were used to estimate K_d for TCE. The first method used the soil and ground-water analytical results presented in Figures 4-3 and 4-4 to calculate K_d values of approximately 0.04 liters per kilogram (l/kg) and 0.33 l/kg from MW-03 and MW-04 data, respectively (see Table 4-7).

The second method estimated K_d values based on a published relationship between the organic carbon/water partitioning coefficient (K_{oc}) and the octanol/water partitioning coefficient (K_{ow}). K_d is equal to the K_{oc} value for the compound times the organic carbon fraction (Fetter 1988). The higher the organic carbon fraction of the soil, the greater the tendency of the organic compound to sorb onto the soil rather than remain in the ground water, and thus the lower the mobility of the compound in ground water. The TOC results shown in Tables 4-1 and 4-7 provide a measure of the organic carbon fraction present in soil samples from MW-03 and MW-04. K_d values estimated for TCE were calculated based on a published K_{ow} value for TCE (Fetter 1993) and an empirical relationship between K_{ow} and K_{oc} (Karichoff et al. 1979).

Table 4-7 provides a summary of the estimated K_d values for MW-03 and MW-04 obtained by the two methods described above.

Table 4-8 provides a summary of estimated R values using the K_d estimates shown in Table 4-7. The estimated R values shown in Table 4-7 are relatively low, suggesting that TCE in ground water beneath the subject site and vicinity is relatively mobile. Dividing the measured ground-water velocities in MW-03 and MW-04 by the estimated R values shown in Table 4-7 gives the average velocity range of the TCE contaminant plume beneath the subject site. TCE plume velocity estimates are approximately equal to the average ground-water velocities measured in MW-03 and MW-04, indicating very little retardation of the TCE plume.

Dividing the estimated TCE plume velocities in Table 4-8 by the distance from MW-03 and MW-04 to the former Omar evaporation ponds (a distance of 1,000 to 1,500 feet) yields average plume travel times ranging from 0.4 to 2.7 years. This result indicates that a relatively short time period would be required for a TCE plume originating at the Omar site to migrate to the subject site relative to the elapsed time since 1978, when the Omar site stopped receiving hazardous wastes.

Table 4-7
SUMMARY OF ESTIMATED K_d VALUES

| Monitoring Well | TCE Concentration Soil | TCE Concentration in Ground Water | K_d Estimated from Analytical Data | Range of TOC Results (percent) | Estimated K_{oc} for TCE ¹ | K_d Derived from Estimated K_{oc} |
|-----------------|------------------------|-----------------------------------|--------------------------------------|--------------------------------|---|---------------------------------------|
| MW-03 | 16 µg/kg | 400 µg/l | 0.04 l/kg | 0.032-0.17 | 123 | 0.04-0.21 l/kg |
| MW-04 | 240 µg/kg | 720 µg/l | 0.33 l/kg | 0.015-0.079 | 123 | 0.02-0.10 l/kg |

¹ Based on a published K_{ow} value for TCE (Fetter 1993) and an empirical relationship between K_{ow} and K_{oc} by Karichoff et al. (1979) ($K_{oc}=0.63K_{ow}$).

Table 4-8
ESTIMATED R VALUES AND TCE PLUME VELOCITIES

| Monitoring Well | Range of Estimated R values (Equation 4-2) | Estimated Average Velocity Range of TCE Plume | Average Ground-Water Velocity (From HPF Data) |
|-----------------|--|---|---|
| MW-03 | 1.2 | 7.4 ft/day | 8.9 ft/day |
| MW-04 | 1.1-2.4 | 1.5-3.7 ft/day | 3.5-4.1 ft/day |

SECTION 5 SUMMARY AND CONCLUSIONS

A limited ground-water and soil investigation was conducted at the Brandywine Distribution Center, located at 1670 and 1690 Brandywine Avenue in Chula Vista, California. The investigation was conducted on behalf of Chula Vista Industrial Realty, Inc. to verify the presence of ground-water contamination beneath the subject site, evaluate ground-water flow direction, velocity, and gradient, and determine potential sources of the identified contamination.

The investigation included completion of soil borings, installation and sampling of ground-water monitoring wells, analytical testing of soil and ground-water samples, heat-pulse flow logging, geochemical evaluation of ground water, and report preparation. The following conclusions have been developed as a result of this investigation:

1. Ground-water analytical results indicate elevated HVOC concentrations beneath the central portion of the subject site. TCE concentrations of 400 and 720 $\mu\text{g/l}$ were measured in ground water samples collected from MW-03 and MW-04, respectively. In contrast, MW-01, MW-02, and MW-05 analytical results for ground water displayed much lower HVOC concentrations ranging from 1.6 to 13 $\mu\text{g/l}$.
2. No detectable concentrations of contaminants were observed in site soil within the unsaturated zone.
3. There is no evidence of historic or current hazardous materials storage, use, or release at the site. Therefore, an offsite source of the detected contamination is indicated.
4. Review of available records indicates that the Hispan property, located adjacent to the subject site on the eastern side of Brandywine Avenue, does not appear to be a possible source for HVOCs detected in ground water at the subject site. Similarly, HVOC concentrations detected in ground water at the Otay Landfill are lower than those at the subject site; therefore, the Otay Landfill also does not appear to be a likely source of ground-water impacts at the subject site.
5. HPF logging results indicate that ground-water flow beneath the subject site appears to be generally in a westward direction. Results from MW-03 indicate a southwest flow

direction of approximately 3.9 to 13.9 feet per day in the east-central portion of the site, with an average value of approximately 8.9 feet per day. HPF logging results also indicate that ground-water flow in the vicinity of MW-04 is generally west to northwest at velocities ranging from approximately 2.7 to 4.3 feet per day.

6. Direct measurements of ground-water flow direction in the vicinity of MW-03 and MW-04 are generally consistent with the overall direction of the hydraulic gradient. Both lines of evidence indicate an overall westward ground-water flow direction beneath this portion of the subject property. This portion of the subject property displays the highest TCE concentrations in ground water and appears to be located directly down-gradient of the adjacent Omar site.
7. TCE in ground water beneath the subject site and vicinity is relatively mobile, as evidenced by low retardation factor (*R*) values and estimated TCE plume velocities approaching average estimated ground-water flow velocities. Estimates of the ground-water travel time between the Omar and subject sites suggest that a TCE plume originating at the Omar site could migrate to the subject site within a relatively short time period (approximately 0.4 to 2.7 years).
8. Review of the previous Phase I and Phase II reports for the subject property and review of SA/M Division files indicates that ground-water contamination has been extensively documented beneath the Omar site, with TCE and methylene chloride concentrations in ground water as high as 21,000 and 14,000 µg/l, respectively.

No evidence indicates that ground-water contamination at the subject site has originated from an onsite source. The most likely source for contamination of ground water beneath the subject site appears to be the adjacent Omar site.

SECTION 6 RECOMMENDATIONS

No further site assessment activities are warranted at the subject site. There is no evidence of the storage, use, or release of hazardous chemicals at the site. The results of soil and ground-water testing indicate that the ground-water contamination observed onsite is a result of migration from an upgradient, offsite source or release. To be effective, potential ground-water remediation activities would have to be initiated at the offsite contaminant source rather than at the subject site.

Ogden recommends that this report be submitted to the SDRWQCB. They are currently compiling and evaluating data associated with the known ground-water contamination in the area (per. comm. with Mark Alpert, April 1996). Following SDRWQCB review of this report, it is recommended that Ogden meet with the SDRWQCB on behalf of Chula Vista Industrial Realty, Inc. to discuss the results for the subject site and to request a "no further action" letter specifying that the observed ground-water contamination is not due to former or current site uses or activities and is the result of the migration of releases from offsite sources. Ogden Environmental can assist in this effort as requested.

WORK REQUESTED: (SCOPE OF WORK)
Conductive Utility Survey in and around 5 proposed borings

| | |
|--|-----------------|
| WORK PERFORMED: * EMPCL Conductive Utility Survey - Utilized passive, ground induction and connection modes. Located utilities marked with pink painted arrows indicating direction. Approx 10'x10' survey zone around each point painted with pink boxes (see sketch). * EMIMD Inductive Survey for any metal mass anomalies | TRAVEL HOURS |
| | LABOR HOURS 2.0 |
| | DOWN HOURS |

CAUTION: Some conductive and non-conductive utilities may or may not be located due to uncontrolled circumstances, i.e. (soil content, PVC pipe, reinforced concrete, etc) Strongly suggest exhausting all possible source of info, i.e. (as built, USA/Digline, etc.

| | |
|---|----------------|
| SIGNATURE OF ULS REPRESENTATIVE Chris Reimer | DATE 2-5-96 |
|---|----------------|

NOTE: THE WORK PERFORMED ABOVE IS PERFORMED TO INDUSTRY STANDARDS (OR HIGHER); HOWEVER, IT IS THE RESPONSIBILITY OF THE CLIENT OR EXCAVATOR TO CONTACT ALL UNDERGROUND FACILITY OWNERS AND TO DETERMINE THE EXACT LOCATION OF UNDERGROUND FACILITIES BEFORE EXCAVATING. EXCAVATION WORK NEAR UNDERGROUND FACILITIES MAY RESULT IN INJURY TO PERSONS OR DAMAGE TO FACILITIES. THE CLIENT OR EXCAVATOR WILL TAKE ALL STEPS NECESSARY TO AVOID CONTACT WITH UNDERGROUND FACILITIES. STATE LAW MAY REQUIRE THAT HAND TOOLS BE USED TO UNCOVER FACILITIES WHEN WORKING WITHIN 2 FEET OF EITHER SIDE OF FACILITY. LAW MAY VARY. ULS AND ITS REPRESENTATIVES ARE NOT RESPONSIBLE FOR INJURY TO PERSONS OR DAMAGE TO FACILITIES. CLIENT'S SIGNATURE BELOW IS ACCEPTANCE OF RESPONSIBILITY AND ACKNOWLEDGMENT OF SATISFACTORY COMPLETION OF WORK PERFORMED ABOVE. THIS DOCUMENT WILL ALSO BE FAXED TO CLIENT FOR ACKNOWLEDGMENT OF ABOVE.

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

Kam Y. Pang, Ph.D.
Laboratory Director

P.S. - All analyses requested for the above referenced project have been completed. Therefore, unless instructed, the remaining portions of the samples will be disposed after fifteen (15) days from the date of this report.

EPA METHOD 8010
 HALOGENATED VOLATILE ORGANICS

| | | | | Sample | Dup. | RPD(%) |
| 4307-7 | --- | TOC | % | 0.032 | 0.027 | 17 |

Notes:

Note that Matrix Spikes are not project specific. Therefore, spike information shown on this report may not be from the same project; however, they were analyzed in the same analytical batch.

Definitions:

Spike: A sample from the analytical batch which has been spiked with the parameter(s) of interest at a known concentration and taken through the same preparation and analysis as the samples.

Spike Duplicate: A duplicate of the spiked sample, taken from a separate aliquot of the sample.

RPD: Relative Percent Difference between a Spike and a Spike Duplicate (or a sample and sample duplicate).
 $RPD = [(Spike - Spk. Dup.) / Mean] * 100$

Where the mean is the average spike recovery of the matrix spike and the matrix spike duplicate.

Mean: The average sample results, from both samples and sample duplicates.

Control limits are calculated by Sterling Analytical Laboratory for internal use from existing spike data. Control limits are found by calculating three standard deviations above and below the mean of the population.

CKY incorporated Analytical Laboratories

Date: 02-22-1996
CKY Batch No.: 96B042

Attn: Don Barrie

Ogden Environmental
5510 Morehouse Drive
San Diego, CA 92121

Subject: Laboratory Report
Project: Chula Vista

Enclosed is the Laboratory report for samples received on 02/12/96. The samples were received in coolers with ice and intact; the chain-of-custody forms were properly filled out. The data reported include :

| Sample ID | Control No. | Matrix | Analysis |
|----------------|-------------|--------|-----------------------------|
| BWB505S01D10.0 | B042-01 | Soil | EPA 8010 EPA 8020 TOC |
| BWB505S04D85.5 | B042-02 | Soil | EPA 8010 EPA 8020 TOC |
| BWB505S05D91 | B042-03 | Soil | EPA 8010 EPA 8020 TOC |
| BWB504S01D26.5 | B042-04 | Soil | EPA 8010 EPA 8020 TOC |
| BWB504S02D76.5 | B042-05 | Soil | EPA 8010 EPA 8020 TOC |
| BWB504S03D86.0 | B042-06 | Soil | EPA 8010 EPA 8020 TOC |

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

Kam Y. Pang, Ph.D.
Laboratory Director

P.S. - All analyses requested for the above referenced project have been completed. Therefore, unless instructed, the remaining portions of the samples will be disposed after fifteen (15) days from the date of this report.

Quality Assurance Addendum Report

Page 1 of 1

| LAB ID | SYMBOL | TEST | UNITS | QA/QC Results | | |
|--------|--------|------|-------|---------------|-------|--------|
| | | | | Sample | Dup. | RPD(%) |
| 4270-6 | --- | TOC | % | 0.015 | 0.011 | 28 |

Notes:

Note that Matrix Spikes are not project specific. Therefore, spike information shown on this report may not be from the same project; however, they were analyzed in the same analytical batch.

Definitions:

Spike: A sample from the analytical batch which has been spiked with the parameter(s) of interest at a known concentration and taken through the same preparation and analysis as the samples.

Spike Duplicate: A duplicate of the spiked sample, taken from a separate aliquot of the sample.

RPD: Relative Percent Difference between a Spike and a Spike Duplicate (or a sample and sample duplicate).
 $RPD = [(Spike - Spk. Dup.) / Mean] * 100$

Where the mean is the average spike recovery of the matrix spike and the matrix spike duplicate.

Mean: The average sample results, from both samples and sample duplicates.

Control limits are calculated by Sterling Analytical Laboratory for internal use from existing spike data. Control limits are found by calculating three standard deviations above and below the mean of the population.

Subject: Laboratory Report
Project: Brandywine

Enclosed is the Laboratory report for samples received on 02/28/96. The samples were received in coolers with ice and intact; the chain-of-custody forms were properly filled out. The data reported include :

| Sample ID | Control No. | Matrix | Analysis |
|-----------|-------------|--------|--|
| MW01-S01 | B134-01 | Water | EPA 8010 EPA 8020 Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate |
| MW02-S01 | B134-02 | Water | EPA 8010 EPA 8020 |

| <u>Sample ID</u> | <u>Control No.</u> | <u>Matrix</u> | <u>Analysis</u> |
|------------------|--------------------|---------------|---|
| MW03-S01 | B134-03 | Water | Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate EPA 8010 EPA 8020 Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate EPA 8010 EPA 8020 Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride |
| MW05-S01 | B134-04 | Water | Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate EPA 8010 EPA 8020 Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride |

| Sample ID | Control No. | Matrix | Analysis |
|-----------|-------------|--------|---|
| MW04-S01 | B134-05 | Water | Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate EPA 8010 EPA 8020 Metals Mercury MBAS Turbidity Alkalinity Sulfate Chloride Fluoride pH Conductivity TDS Color Odor Total Hardness Nitrate |

The results are summarized on the following pages.

Please feel free to call if you have any questions concerning these results.

Sincerely yours,

K. Y. Pang
 Kam Y. Pang, Ph.D.
 Laboratory Director

P.S. - All analyses requested for the above referenced project have been completed. Therefore, unless instructed, the remaining portions of the samples will be disposed after fifteen (15) days from the date of this report.

February 28, 1996

CLIENT: OGDEN

GENERAL MINERALS LIST

MBAS, Turbidity, Alkalinity, Sulfate, Chloride, Fluoride, pH, Electrical Conductivity, TDS, Color, Odor, Hardness, Nitrate.

Aside from CAM Metals (17 metals) client also requests the following elements:
Calcium, Magnesium, Sodium and Potassium.

OFFICIAL NOTICE
NOTICE OF VIOLATION

BUSINESS NAME NYPRO PHONE 482-7033
BUSINESS ADDRESS 505 Otay Valley Rd CITY Chula Vista ZIP 91911
OWNERS NAME Spectrum Management PHONE _____
OWNERS ADDRESS 8799 Balboa #102 CITY San Diego ZIP 92123-1538

An inspection of your business was conducted, under the authority of Section 25185 of the California Health and Safety Code. This inspection was conducted with the purpose of determining compliance with Chapters 6.5, 6.7, 6.95 in Division 20, of the California Health and Safety Code (H&S); Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following statements describe conditions which are violations of the law or that require further investigation. These observations require a formal response and/or immediate corrective action be taken. Failure to correct these violations or to provide information requested in a timely manner may be a factor in determining the course of further legal action.

On this date 15 gallons of waste and 60 pounds of High Temperature grease was abandoned at the rear of your facility. 10 gallons of waste oil dripped onto the parking lot adjacent to your loading docks

You, or your property management company, Spectrum Property Management, 8799 Balboa Ave, Ste 102, San Diego 92123-1538 (619) 569-8799

are required to clean up spilled waste oil and grease, absorbent residue. Provide this office with a copy of the hazardous waste manifest, or environmental receipt. You are required to clean up residual oil so that it will not pollute the environment during the next rain storm. Chula Vista storm water program will be advised of this incident. See Ben HW Requirements attached.

Contact E. Slater 338-2218 if you have any questions

COMPLIANCE INSPECTION REPORT

EST. NUMBER H 30637DATE 2/5/97PAGE 2 OF 2BUSINESS ADDRESS: 305 OTAY VALLEY ROAD, CHULA VISTA, CA 91911

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.905
- No EPA Identification Number 66262.12
- Waste Manifests/Receipts not on-site for 3 years 66262.40
- Manifest not properly completed 66262.23
- Manifest copy not sent to DTSC 66262.23
- TSDF signed-manifest not on-site 66262.40
- Biennial report not sent to DTSC 66262.41
- LDR Documentation not available 66268.7
- Exception Rpt. not filed with DTSC 66262.42
- Operating TSDF without authorization 25201

STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262.34
- Failure to clean up hazwaste off of floor surface 66262.10b
- Waste container missing/improperly labeled 66262.34
- Haz Materials not properly labeled 25124
- Waste container not kept closed 66265.173
- Waste container in poor condition 66265.171
- Waste container(s) not properly managed 66265.173
- Damaged container not repackaged 66265.171
- Container incompatible with waste 66265.172
- Incompatibles in the same container 66265.177
- Incompatibles not stored separately 66265.177
- Ignitable Waste less than 50 feet 66265.176
- Ignitable Waste not grounded 66265.31
- Storage area not inspected weekly 66265.174

DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to 25189.5
- Waste determination not made 66262.11
- Unlawful transport of haz. waste 25163
- Waste transported without manifest 66262.20
- Extremely Haz Waste Permit not obtained 25205.7

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.16
- Training program not adequate 66265.16
- Facility not designed to minimize release 66265.31
- Spill control equip not available 66265.32
- Aisle space is obstructed 66265.35
- Contingency plan not prepared and/or on file 66265.51, 66265.53

MISCELLANEOUS

- Waste oil contaminated 25250.7
- Used oil filters improperly managed 66266.130
- Damaged batteries improperly managed 66266.81
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting)
- Onsite treatment of waste without authorization 25201

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.1105
- Business Plan not established/implemented 25503.5
- Business Plan not submitted to HMMD 25505
- Business Plan not amended 25505
- Personnel Training Records not available 19 CCR 2732

RELEASE REPORTING

- Failure to report a release/threatened release 25507

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284
- Repair/modify/close permit not obtained 68.1005
- UST Permit Application not submitted 25286(a)
- Operating permit conditions violated 2712
- Failed to notify HMMD of changes 25284
- No owner/operator agreement 25284
- No records of financial coverage 25292.2
- No maint/monit/calib records available 2712(b), 2641(j)
- Monitoring Equip. not tested annually 2630, 2641

MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643
- Integrity test not conducted 25292
- Copy of tank test not submitted to HMMD within 30 days 2643
- Manual tank gauging (<2000 gal) 2645 not done properly
- Reconciliation not done properly 2646
- Reconciliation not approved for facility 2646
- Dispenser meter(s) not calib annually 2646
- Improper liquid measurements 2646
- Stick in poor condition 2646
- Improper monthly reconciliation 2646
- Failed to report excessive variation 2646
- Pressurized Product Piping Leak Device not tested annually 25292
- No written monitoring procedure 2641
- No written emergency response plan 2641
- SIR reporting incorrectly done 2646.1

MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632
- No written monitoring procedure 2632
- Written emergency response plan not available 2632
- Spill/Overfill equip. not maintained or installed 2635

RELEASE REPORTING

- Failure to report an unauthorized release 25295
- Release record log not available 2651, 2650
- No leak report/investigation/action 2652

CLOSURE

- Temporary closure req. not completed 2671
- Unused tank not properly closed 25298
- Permanent closure req. not completed 2672
- Failed to apply for temporary closure 25298

BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504
- Emergency Contacts not provided/current 25509
- Personnel Training Program inadequate 25504
- Inventory is incomplete 25504
- Site Map is not sufficient 25509
- Acutely Haz. Mat. not registered 25533

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

COMPLIANCE INSPECTION REPORT

BUSINESS NAME NYPRO SAN DIEGO
ADDRESS 505 OTAY VALLEY RD.
CITY/ZIP CHULA VISTA 91911

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

Office Use Only

ROUTINE INSPECTION

JUL 27 1998

P: 8/3/98 Ceo

OBSERVED VIOLATIONS:

1. WASTE OIL HAS SPILLED/LEAKED ON TO THE CONCRETE COOLING WATER PAD. PLEASE CLEAN UP THE SPILLED WASTE OIL AND DISPOSE OF IT AS A HAZARDOUS WASTE. OPERATE THIS FACILITY IN A MANNER WHICH WILL MINIMIZE THE RELEASE OF HAZARDOUS WASTE TO THE ENVIRONMENT.
2. A 55 GALLON DRUM CONTAINING WASTE OIL IS NOT KEPT CLOSED. KEEP ALL CONTAINERS STORING HAZARDOUS WASTE CLOSED AT ALL TIMES EXCEPT WHEN ADDING OR REMOVING WASTE FROM THE CONTAINER. PLEASE INSTALL THE BUNG.
3. EMPLOYEE TRAINING RECORDS ARE NOT AVAILABLE FOR REVIEW. KEEP DOCUMENTATION OF ALL COMPLETED EMPLOYEE TRAINING ON HAZARDOUS WASTES/MATERIALS HANDLING AND EMERGENCY RESPONSE PROCEDURES. WITHIN 30 DAYS, SUBMIT PHOTOCOPIES OF THE PAST YEAR'S EMPLOYEE TRAINING DOCUMENTATION TO THIS OFFICE* FOR THE ATTENTION OF MIKE MANN. CONDUCT REFRESHER TRAINING AT LEAST ONCE EACH YEAR.

REMARKS:

- HAZARDOUS WASTE MANIFESTS/RECEIPTS ARE MAINTAINED ON SITE.

COMPLIANCE INSPECTION REPORT

EST. NUMBER H 30637DATE 7/22/98PAGE 3 OF 3BUSINESS ADDRESS: 505 OTAY VALLEY RD., CHULA VISTA 91911

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.905 V0108 W
- No EPA Identification Number 66262.12 V0105 W
- Waste Manifests/Receipts not on-site for 3 years 66262.40 V0118 W
- Manifest not properly completed 66262.23 V0120 W
- Manifest copy not sent to DTSC 66262.23 V0115 W
- TSDF signed-manifest not on-site 66262.40 V0121 W
- Biennial report not sent to DTSC 66262.41 V0122 W
- LDR Documentation not available 66268.7 V0123 W
- Exception Rpt. not filed with DTSC 66262.42 V0116 W
- Operating TSDF without authorization 25201 V0124 W

STORAGE AND HANDLING

- Waste stored longer than 90, 180, or 270 days 66262.34 V0221 W
- Failure to clean up hazwaste off of floor surface 66262.10b V0313 W
- Waste container missing/improperly labeled 66262.34 V0222 W
- Haz Materials not properly labeled 25124 V0223 W
- Waste container not kept closed 66265.173 V0202 W
- Waste container in poor condition 66265.171 V0205 W
- Waste container(s) not properly managed 66265.173 V0210 W
- Damaged container not repackaged 66265.171 V0226 W
- Container incompatible with waste 66265.172 V0207 W
- Incompatibles in the same container 66265.177 V0224 W
- Incompatibles not stored separately 66265.177 V0213 W
- Ignitable Waste less than 50 feet 66265.176 V0214 W
- Ignitable Waste not grounded 66265.31 V0215 W
- Storage area not inspected weekly 66265.174 V0216 W

DISPOSAL AND TRANSPORTATION

- Unauth. disposal of waste to 25189.5 V0313 W
- Waste determination not made 66262.11 V0319 W
- Unlawful transport of haz. waste 25163 V0315 W
- Waste transported without manifest 66262.20 V0316 W
- Extremely Haz Waste Permit not obtained 25205.7 V0317 W

TRAINING, CONTINGENCY PLAN & EMERGENCY PROCEDURES

- Training records unavailable 66265.16 V0405 W
- Training program not adequate 66265.16 V0406 W
- Facility not designed to minimize release 66265.31 V0501 W
- Spill control equip not available 66265.32 V0508 W
- Aisle space is obstructed 66265.35 V0509 W
- Contingency plan not prepared and/or on file 66265.51, 66265.53 V0609 W

MISCELLANEOUS

- Waste oil contaminated 25250.7 V0225 W
- Used oil filters improperly managed 66266.130 V0701 W
- Damaged batteries improperly managed 66266.81 V0702 W
- Facility has failed to notify local CUPA and DTSC of onsite treatment of hazardous waste (tiered permitting) V0125 W
- Onsite treatment of waste without authorization 25201 V0125 W

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.1105 V2001 W
- Business Plan not established/implemented 25503.5 V2002 W
- Business Plan not submitted to HMMD 25505 V2007 W
- Business Plan not amended 25505 V2003 W
- Personnel Training Records not available 19 CCR 2732 V2302 W

RELEASE REPORTING

- Failure to report a release/threatened release 25507 V2008 W

II UNDERGROUND STORAGE TANK (UST) REQUIREMENTS:

GENERAL UST REQUIREMENTS

- Health Permit not obtained 68.1005, 25284 V3002 T
- Repair/modify/close permit not obtained 68.1005 V3007 T
- UST Permit Application not submitted 25286(a) V3010 T
- Operating permit conditions violated 2712 V3011 T
- Failed to notify HMMD of changes 25284 V3012 T
- No owner/operator agreement 25284 V3005 T
- No records of financial coverage 25292.2 V3013 T
- No maint/monit/calib records available 2712(b), 2641(j) V3001 T
- Monitoring Equip. not tested annually 2630, 2641 V3003 T

MONITORING REQUIREMENTS (SINGLE WALL)

- Leak Detection Method does not meet performance standards 2643 V3014 T
- Integrity test not conducted 25292 V3015 T
- Copy of tank test not submitted to HMMD within 30 days 2643 V3016 T
- Manual tank gauging (<2000 gal) 2645 not done properly V3017 T
- Reconciliation not done properly 2646 V3018 T
- Reconciliation not approved for facility 2646 V3019 T
- Dispenser meter(s) not calib annually 2646 V3020 T
- Improper liquid measurements 2646 V3021 T
- Stick in poor condition 2646 V3022 T
- Improper monthly reconciliation 2646 V3023 T
- Failed to report excessive variation 2646 V3024 T
- Pressurized Product Piping Leak Device not tested annually 25292 V3025 T
- No written monitoring procedure 2641 V3027 T
- No written emergency response plan 2641 V3027 T
- SIR reporting incorrectly done 2646.1 V3004 T

MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632 V3026 T
- No written monitoring procedure 2632 V3027 T
- Written emergency response plan not available 2632 V3028 T
- Spill/Overfill equip. not maintained or installed 2635 V3029 T

RELEASE REPORTING

- Failure to report an unauthorized release 25295 V3009 T
- Release record log not available 2651, 2650 V3030 T
- No leak report/investigation/action 2652 V3031 T

CLOSURE

- Temporary closure req. not completed 2671 V3006 T
- Unused tank not properly closed 25298 V3032 T
- Permanent closure req. not completed 2672 V3033 T
- Failed to apply for temporary closure 25298 V3008 T

ALL VIOLATIONS MUST BE CORRECTED. PLEASE CALL (619) 338-2222 OR YOUR INSPECTOR IF YOU HAVE ANY QUESTIONS.

ROUTINE INSPECTION WITH RICH FREEMAN.

- OBSERVATIONS / VIOLATION / NOTICE TO COMPLY:

- ① FAILED TO MAKE A PROPER WASTE DETERMINATION
 - ACCORDING TO RICH FREEMAN (MAINT. SUPERVISOR) - USED SAND BLAST (SILICA SAND) WERE DISPOSED TO THE TRASH. NO WASTE DETERMINATION DONE ON THE WASTE.
 - CONDUCT A WASTE DETERMINATION ON YOUR BLAST WASTE AND MANAGE IT ACCORDINGLY BASED ON THE ANALYTICAL TESTING RESULT OR MANAGE IT AS A HAZARDOUS WASTE FROM THE START OF GENERATION. ALSO STORE / CONTAIN THE WASTE PROPERLY.
- ② - ACCUMULATED WASTE TOO LONG (MORE THAN 180 DAYS).
 - WASTE ETHANOL / ETHYL ACETATE STORED IN A 55 GAL STEEL DRUM - LAST DISPOSAL WAS IN FEBRUARY 2006; USED OIL - LAST DISPOSAL RECORD WAS IN 2005.
 - IMMEDIATELY DISPOSED OF THE WASTE ETHANOL / ETHYL ACETATE AND USED OIL. IN 30 DAYS, SUBMIT TO ME A COPY OF THE DISPOSAL RECEIPTS.

RECEIVED OCT 04 2007

This is an annual certification that the Hazardous Materials Business Plan (inventory, emergency contacts, emergency response plan, and employee training plan) is current and includes all the information required in the H&SC and is maintained at the site where hazardous materials are stored.

COUNTY OF SAN DIEGO

COMPLIANCE INSPECTION REPORT
Small and Large Quantity Generators of Hazardous Waste
Handlers of Hazardous Materials

PERMIT # 130637
DATE 9/18/07
PAGE 4 OF 4

BUSINESS ADDRESS: 505 MAIN ST., CHULA VISTA

ZIP: 91911

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19 & 22 of the California Code of Regulations (CCR), Chapters 6.5 & 6.95 of the Health and Safety Code, and/or the San Diego County Code (SDCC). Small Quantity Hazardous Waste Generator=(SQG); Large Hazardous Waste Quantity Generator=(LQG); Code 40 of Federal Regulations=(CFR). All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Your Specialist can provide this form. Please call (619) 338-2222 or your Specialist if you have any questions.

HAZARDOUS MATERIALS REQUIREMENTS

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 1001-1018 with checkboxes and circled numbers 5 and 6.

HAZWASTE REQUIREMENTS FOR LOGs & SQGs

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 0216-0224 under STORAGE AND HANDLING.

HAZWASTE REQUIREMENTS FOR SQGs ONLY

STORAGE AND HANDLING-Pursuant to 66262.34(d)

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 0225-0234 with checkboxes and circled numbers 2, 3, 4, and 5.

HAZWASTE REQUIREMENTS FOR LQGs & SQGs RECORDKEEPING

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 0131-0149.

TRAINING, CONTINGENCY PLAN & ER PROCEDURES

Pursuant to 66262.34(d)(2)

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 0407-0412 with checkboxes and circled number 7.

DISPOSAL AND TRANSPORTATION

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 0301-0308 with checkboxes and circled number 1.

HAZARDOUS WASTE TANK SYSTEMS Pursuant to 66262.34(d)(2)

Table with columns: Viol #, V, VIOLATION DESCRIPTION. Includes items 1612-1616.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Brian Charles

TITLE: Plant Manager

INTRODUCTION:

The summary of violations was issued on 3/12/19 due to HMD time restriction. The full report was delivered on 3/14/19 with Brian Charles and Bernie Cazarez.

On 3/12/19 I conducted a routine inspection at NYPRO San Diego to verify compliance with Hazardous Materials Business Plan (HMBP) Requirements, Hazardous Waste generator requirements, and Aboveground Petroleum Storage Act (APSA) requirements. Brian Charles granted consent to conduct the inspection and review documents for the inspection. Also present, Bernie Cazarez, Safety Engineer who assisted with the walk through and will also be taking over the responsibilities as the Environmental Health Contact per Brian Charles. Also present during the inspection was Elaine Villena, Environmental Health Specialist with HMD. The following individuals assisted with questions during the inspection:

- Luis Guerrero, Warehouse lead
- Terry Grabau, Tooling Supervisor
- Miguel Gutierrez, Maintenance Supervisor

This facility specializes in manufacturing plastic molded parts for various health care services including diagnostics, medical device, pharmaceutical, and consumer health markets.

This facility currently requires a permit with the County HMD for the following programs:

- Hazardous Materials Business Plan (HMBP) requirements, for storing hazardous materials/waste at reportable amounts
- Hazardous waste generator requirements
- Aboveground Petroleum Storage Act (APSA) requirements for having a total storage capacity of $\geq 1,320$ gals of petroleum product (based on the definition of petroleum in H&SC 25270.2(h))

Based on review of waste disposal documents, my observations, and statements made by Brian Charles, this facility appeared to be Small Quantity Generator (SQG) of hazardous waste (100 kg/month-1000 kg/month) and generates approximately 33-70 lbs/gal. of waste per month.

APSA Tier I Qualified Facility

Based on speaking with Brian Charles and the Spill Prevention, Control, and Countermeasure plan (SPCC) oil storage inventory, the aboveground petroleum storage capacity at this facility appeared to be at least 5,363 gal. This facility is considered a Tier I

Qualified Facility, meaning the total petroleum storage capacity on-site is less than 10,000 gals, and no one container exceeds 5,000 gals in capacity. 40 Code of Federal Regulations (CFR) §112.3(g)(1)

- This facility has a Professional Engineer (PE#C59211) certified SPCC plan, **last certified on 4/11/14**. Note, the SPCC plan must be certified every 5 years.
- According to the SPCC plan, the facility has 21 different sizes of oil filled operating equipment (mold injecting equipment) through out the facility, and the petroleum equipments storage capacity can range from 4.5-400 gal. Per Miguel Gutierrez, the facility has started transitioning into using electrical equipment in 2004 and is in the process of reducing the number of oil filled equipments.
- According to the SPCC plan, the oil filled operating equipments have general containment "Spill kit/drain mats/ inspection"
- According to the SPCC plan and my observation oil filled drums are placed on secondary containment pallets in the hazardous material/waste storage area.
- According to the SPCC plan, monthly visual inspections are conducted. Documents for monthly visual inspections for the past 3 years were available and reviewed.

I observed the following during today's inspection:

- Hydraulic oil: Approximately 5,110 gal. in the oil filled equipments + 2 x 55 gal. drums (in the hazardous materials/waste storage area) + 4 x 5 gal. container of mobile gear600XP
- Resin: Approximately 10000 lbs
- Resin - Linear low density polyethylene SILO 2: Approximately 55000 lbs
- Polyethylene 808A SILO 1: Approximately 55000 lbs
- Polypropylene: Approximately 26500 lbs
- PVC: Approximately 15000 lbs
- Amplify EA 100 Polymer: Approximately 6000 lbs
- Aluminum foil: Approximately 1000 lbs.
- Glass fiber reinforced pet (different colors): Approximately 15000 lbs
- Cleaner/degreaser: Approximately 75 gal.
- Simple green: Approximately 55 gal.
- Clariant: Approximately 20000 lbs
- Lead acid batteries: Approximately 5176 lbs
- Alcohol: 2 x 55 gal. drums located in the flammable cabinet outside the facility, on the east side
- HDPE: Approximately 95000 lbs
- Lexan: Approximately 6000 lbs

- Oxygen: 3 x 300 cf. cylinders
- Propane: 5 x 8 gal. located in the cage outside the facility, on the east side

- Used hydraulic oil: 1 x 55 gal. drum (3/4 full, with accumulation date 2/29/18) + 2 x 55 gal. drums (full, with accumulation date 8/31/18)
- Oily absorbent/pads: 1 x 55 gal. drum (empty at the time of inspection)
- Used filters (paper): 1 x 55 gal. (3/4 full, with accumulation date 6/29/17)
- Ultrasonic cleaner: 1 x 17 gal. (serviced by Safety Kleen)

- Acetylene: 2 x 80 cf. cylinders (below HMBP reportable threshold)

VIOLATION # 1

3030010 Accumulated waste too long (>180 or 270 days) or (>90 days). HSC 25201(a), 25123.3(h)(1); 22 CCR 66262.34(d); 40 CFR 262.34(e) and/or (f)

Classification: Class II

Observations:

This facility is a Small Quantity Generator of hazardous waste and was observed to be storing hazardous waste in exceedance of hazardous waste generator requirements. I observed the following hazardous waste exceeding the storage time:

- Used hydraulic oil: 1 x 55 gal. drum (3/4 full, with accumulation date 2/29/18) + 2 x 55 gal. drums (full, with accumulation date 8/31/18)
- Used filters (paper): 1 x 55 gal. (3/4 full, with accumulation date 6/29/17)

The hazardous waste disposal records indicated the last used oil pick up took place on 8/3/18.

This violation was cited on 11/29/16 by HMD inspector Raisa Luna. BE ADVISED: repeated violation may lead to potential penalties/fees and/or possible enforcement.

Corrective Action Due By:04/11/2019

Immediately contact your registered hazardous waste transporter and properly dispose of all hazardous wastes exceeding the accumulation time limit. Within 30 days, provide documentation of corrective action, including hazardous waste manifests, to me via e-mail to your inspector. You may use the corrective action form at the end of this email. Be advised, Small Quantity Generators of hazardous waste must properly dispose of their waste within 180 days of the accumulation start date (HSC 66262.34). Develop a procedure to ensure that hazardous waste is not stored beyond the allowed accumulation periods.

VIOLATION # 2

1010004 Chemical inventory incomplete or not submitted in CERS. HSC 25505(a)(1); 25507(a); 25508.1(a-b); 19 CCR 2654 (a) or (d)

Classification: Class II

Observations:

Facility's last CERS inventory submittal was dated on 2/13/17 did not include the following hazardous waste that was observed in today's inspection: Ultrasonic cleaner: 1 x 17 gal.

Per Brian Charles, the ultrasonic cleaner has been on-site for approximately 4 years.

This violation was cited on 11/29/16 by HMD inspector Raisa Luna. BE ADVISED: repeated violation may lead to potential penalties/fees and/or possible enforcement.

Corrective Action Completed During Inspection:

The following hazardous waste was added to CERS: Ultrasonic cleaner: 1 x 17 gal. and submitted for review. Be advised that any change to your chemical inventory must be reported in CERS within 30 days.

INSPECTION REMARKS:

Action item:

Per Brian Charles, the Human Resource Manager and Safety Manager currently listed on the SPCC plan are no longer at the facility. **Within 30 days, update your SPCC plan to reflect these changes and ensure the emergency contact information are accurate. Provide documentation to your inspector that this change has been made.**

For more information on APSA and SPCC plan visit:

https://www.sandiegocounty.gov/deh/hazmat/hmd_apsa.html

Minor violation corrected on-site:

HMBP was not annually certified in the California Environmental Reporting System (CERS) at <http://cers.calepa.ca.gov>. The last annual certification of this facility's Hazardous Materials Business Plan (HMBP) was on 2/13/17 and for the plan section it was on 12/5/16. Your HMBP must be certified at least once every 12 months to be complete and accurate in the California Environmental Reporting System. The following sections are required to be certified annually in CERS:

- Facility Information
- Chemical Inventory and Site Map
- Emergency Response and Employee Training Plans

An official notice for the delinquent annual hazardous materials business plan certification was mailed on 8/8/18.

Assistance with CERS was provided on 3/13/19 and HMBP was submitted and certified during the inspection. The following sections in CERS were updated:

- Secondary emergency contact information, environmental health contact information, and billing contact information;
- Federal hazard categories for all inventory items;
- Inventory item Acetylene was removed because it was under the reportable threshold (200 cf.). Per Brian Charles, they do not store or use more than 2 x 80 cf. of acetylene.
- The "units" and "state" for some of the inventory items that did not match were updated.
- The consolidated emergency response contingency plan was completed and submitted
- New inventory item "Ultrasonic washer waste fluid" was added to the inventory.

For assistance, visit our CERS Information webpage for guides and videos or call our CERS help line at (858) 505-6990 for one-on-one guidance.

Remember that your HMBP must be certified in CERS at least annually. Also note that any changes to information in CERS must be submitted within 30 days of the change occurring. Assistance in making CERS submittals is available from HMD by contacting your Inspector (contact information below) or by contacting our CERS Help Desk at 858-505-6990 Monday through Friday between 8:00 AM and 3:00 PM.

Additional remarks:

The EPA ID # (CAR000006916) for this facility is Active.

This facility's hazardous waste hauler is Asbury Environmental Services.

Per Brian Charles, the parts washer is serviced by Safety-Kleen every 6 weeks; the shop rags are serviced by Unifirst; lead acid batteries are recycled through Raymond.

The last disposal record was dated 3/5/19 and pick-ups occur approximately every 180 days per Brian Charles.

Waste disposal documents were available for review. Please continue to maintain documentation of proper waste disposal records readily available for review dating back 3 years.

Employee training documents (last dated 11/13/18) for the past 3 years were available and reviewed. Continue to maintain documentation of employee training readily available for review dating back 3 years.

The dumpster located outside of this facility was inspected.

Two sand blast machines were observed in the tool room. According to Terry Grabau, the machines have not been used for the past 8 months and no waste is generated from the sandblast machines. Be advised that it is the facility's responsibility to make a proper waste determination for all waste at the initial point of generation before it is mixed or diluted with other waste.

If you need help in waste determination and would like to test a sample, you may use any of the state certified lab found through: <http://ww2.cdph.ca.gov/certlic/labs/Pages/ELAP.aspx>

HAZARDOUS WASTE TANK SYSTEMS FOR SQGS ONLY

| # | VIOLATION DESCRIPTION |
|---|-----------------------|
|---|-----------------------|

HM-923 (10-18)

COUNTY OF SAN DIEGO

COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 03/14/2019 PAGE 7 OF 10
 RECORD ID #: DEH2002-HUPFP-130637

Hazardous Materials and Hazardous Waste (continued)

- 3030024 Failed to operate uncovered tank to ensure at least 2 ft. of freeboard to prevent overtopping, unless the tank is equipped with a containment structure, a drainage control system, or a diversion structure with a capacity that equals or exceeds the volume of the top 2 ft. of the tank. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(c)
- 3030025 Failed to provide an overfill protection device on continuously fed hazardous waste tank(s). 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)(4)
- 3030027 Failed to conduct daily tank inspection of discharge control system, monitoring equipment and waste level. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(1-3), 262.34(d)(3)
- 3030028 Failed to conduct weekly hazardous waste tank inspection(s) to detect signs of leakage and ensure that the construction materials, fixtures and surrounding areas of the tank are in good condition. 22 CCR 66262.34(d)(2); 40 CFR 265.201(c)(4 & 5), 262.34(d)(3)
- 3050007 Failed to properly remove all waste upon closure, decontaminate, and document the closure of a hazardous waste tank system. 22 CCR 67383.3; 40 CFR 262.34(d)(3), 265.201(f)
- HMD1612 Hazardous waste improperly stored in a tank system causing leaks, corrosion, or failure. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(b)
- HMD1614 Failed to pre-notify the CUPA in writing prior to closing a hazardous waste tank system. 22 CCR 67383.3(a)(1)
- HMD1615 Failed to properly accumulate ignitable or reactive waste in a tank system. 22 CCR 66262.34(d)(2); 40 CFR 262.34(d)(3), 265.201(g)

HAZARDOUS WASTE REQUIREMENTS FOR SQGS AND LOGS

RECORD KEEPING/OPERATIONAL REQUIREMENTS

- | # | <u>VIOLATION DESCRIPTION</u> |
|----------------------------------|--|
| <input type="checkbox"/> HMD0131 | Unified Program Facility Permit not obtained &/or maintained for the generation of hazardous waste. SDCC 68.905 |
| <input type="checkbox"/> HMD0150 | Failed to submit complete and accurate Facility Information in CERS. 27 CCR 15188(b-c); SDCC 68.904(b) |
| <input type="checkbox"/> 3030053 | Failed to maintain waste analysis records, analytical records &/or waste determination results for at least 3 years. 22 CCR 66262.40(c) |
| <input type="checkbox"/> 3010002 | Failed to obtain &/or maintain an active EPA ID Number. 22 CCR 66262.12(a) |
| <input type="checkbox"/> 3010008 | Failed to properly complete a uniform hazardous waste manifest. 22 CCR 66262.23(a) |
| <input type="checkbox"/> 3010009 | Failed to submit an Exception Report to DTSC for hazardous waste manifest. HSC 25123.3(h)(2); 22 CCR 66262.42(b), (c), &/or (d) |
| <input type="checkbox"/> 3010010 | Failed to maintain copies of Uniform Hazardous Waste Manifest, consolidated manifest, or Bills of Lading for 3 years. HSC 25160.2(b)(3), 25185(a)(4); 22 CCR 66262.40(a), 66262.23(a)(3) |
| <input type="checkbox"/> 3010011 | Failed to send copy of the uniform hazardous waste manifest to DTSC within 30 days of shipment. 22 CCR 66262.23(a)(4) |
| <input type="checkbox"/> 3010013 | Failed to meet the consolidated manifesting requirements for waste shipment. HSC 25160.2(b)(3) &/or (c) |
| <input type="checkbox"/> 3010014 | Failed to retain at the generator's place of business disposal records of spent lead-acid batteries for at least 3 years. 22 CCR 66266.81(a)(4)(A) &/or (B) |
| <input type="checkbox"/> 3030006 | Failed to determine if a hazardous waste is restricted or prohibited from land disposal and has to be treated. 22 CCR 66268.7(a)(1) |
| <input type="checkbox"/> 3010016 | Failure of recycler who recycles more than 100 kilograms per month of a recyclable material to submit the biennial Recyclable Materials Report (RMR) in CERS when claiming exclusion or exemption. HSC 25143.10(a), (c) &/or (d) |
| <input type="checkbox"/> HMD0149 | Failed to keep disposal receipts for drained used oil filters and/or drained fuel filters for 3 years. HSC 25250.22; 22 CCR 66266.130(c)(5) |
| <input type="checkbox"/> HMD0152 | Failed to report &/or update the required inventory information for hazardous waste(s) generated at the facility in CERS. SDCC 68.904(a)(2) |
| <input type="checkbox"/> HMD0140 | Failed to have Land Disposal Restriction documentation onsite for 3 years. 22 CCR 66268.7(a)(8) |
| <input type="checkbox"/> 3250005 | Failed to obtain a Treatment, Storage and Disposal Facility (TSDF) permit or authorization to store/treat/dispose of hazardous waste. HSC 25201(a) |
| <input type="checkbox"/> 3050005 | Failed to have adequate records demonstrating claim of exemption or exclusion for recyclable materials. HSC 25143.2(f) |
| <input type="checkbox"/> HMD0142 | Failed to notify the CUPA in CERS for onsite hazardous waste treatment/tiered permitting. HSC 25201(a) |
| <input type="checkbox"/> HMD0138 | Manifest signed by the TSDF not available for inspection. 22 CCR 66262.40(a); HSC 25185(a)(4) |
| <input type="checkbox"/> 3010035 | Failure to annually submit notification of generator's intent to remotely consolidate hazardous waste. HSC 25110.10(d) |

DISPOSAL AND TRANSPORTATION

- | # | <u>VIOLATION DESCRIPTION</u> |
|----------------------------------|---|
| <input type="checkbox"/> 3010007 | Failed to prepare a hazardous waste manifest for the transport of a waste for off-site transfer, treatment, storage, or disposal. HSC 25160(b)(1) or (2), 25160.2(b)(9); 22 CCR 66262.20(a) |
| <input type="checkbox"/> 3030005 | Failed to make a proper waste determination. 22 CCR 66262.11, 66262.40(c) |
| <input type="checkbox"/> 3050001 | Failed to use a DTSC registered hazardous waste transporter to transport hazardous waste. HSC 25163(a) |
| <input type="checkbox"/> 3050002 | Failed to properly dispose of hazardous waste at an authorized facility. HSC 25189.5(a) |
| <input type="checkbox"/> HMD0308 | Impermissible dilution of hazardous waste. 22 CCR 66268.3(a) |
| <input type="checkbox"/> HMD0305 | Disposed of used oil illegally. HSC 25250.5(a), 25189.5(a) |
| <input type="checkbox"/> HMD0306 | Failed to properly dispose of oil-based paint &/or hazardous waste latex paint liquid. HSC 25217.1, 25189.5(a) |

STORAGE AND HANDLING

- | # | <u>VIOLATION DESCRIPTION</u> |
|----------------------------------|--|
| <input type="checkbox"/> 3030001 | Failed to meet the management requirements when handling or storing spent lead-acid batteries. 22 CCR 66266.81(a) |
| <input type="checkbox"/> 3030003 | Failed to properly manage 'damaged' spent lead acid batteries so as to minimize the release of acid and lead and to protect the handlers and the environment. 22 CCR 66266.81(b) |
| <input type="checkbox"/> 3030004 | Failed to properly manage, store, label &/or recycle used oil filters &/or used fuel filters. HSC 25250.22; 22 CCR 66266.130 |
| <input type="checkbox"/> 3050004 | Generator intentionally contaminated used oil with another hazardous waste other than minimal amounts of fuel. HSC 25250.7(a), (c) |
| <input type="checkbox"/> HMD0222 | Failed to properly label Excluded Recyclable Materials (ERM) accumulated in a container or tank. HSC 25143.9(a) |
| <input type="checkbox"/> HMD0216 | Failed to label hazardous material container within 10 days after the container was discovered to be mislabeled or inadequately labeled. HSC 25124(b)(3)(A); 22 CCR 66262.34(f) |
| <input type="checkbox"/> HMD0217 | Failed to repack and properly label damaged/deteriorated hazardous material container within 96 hours. HSC 25124(b)(3)(B); 22 CCR 66262.34(f) |
| <input type="checkbox"/> HMD0219 | Failed to properly segregate used oil &/or fuel drained from filters. HSC 25250.22(b)(4); 22 CCR 66266.130(c)(6) |
| <input type="checkbox"/> 3030057 | Failed to comply with hazardous waste satellite container regulation. 22 CCR 66262.34(e) |
| <input type="checkbox"/> HMD0023 | Failed to properly empty container, failed to manage non-empty container, or inner liner removed from a container. 22 CCR 66261.7(b), (d), (e) &/or (f) |

COUNTY OF SAN DIEGO

COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 03/14/2019 PAGE 8 OF 10
 RECORD ID #: DEH2002-HUPFP-130637

Hazardous Materials and Hazardous Waste (continued)

- 3030058 Failed to mark date on empty container larger than 5 gallons &/or manage it within one year. 22 CCR 66261.7(f)
- 3030060 Failure of the owner or operator managing laboratory hazardous waste in a laboratory accumulation area to comply with the accumulation, storage, management, training, and/or record-keeping requirements. HSC 25200.3.1(b) and/or (c)

UNIVERSAL WASTE HANDLER REQUIREMENTS

| # | VIOLATION DESCRIPTION |
|----------------------------------|--|
| <input type="checkbox"/> 3010004 | Failed to obtain a California ID Number from DTSC or federal ID Number from USEPA prior to accumulating 5,000 kgs or more of Universal Waste. 22 CCR 66273.32(a-b) |
| <input type="checkbox"/> HMD0151 | Failed to maintain universal waste handler training records for 3 years. 22 CCR 66273.36(c),(d) |
| <input type="checkbox"/> 3020003 | Failed to properly train handlers of universal waste in universal waste management and response procedures. 22 CCR 66273.36(a),(b) |
| <input type="checkbox"/> 3030008 | Failed to properly label or mark Universal Waste container, package, or pallet (excluding CESQUWG) 22 CCR 66273.34 |
| <input type="checkbox"/> 3030011 | Failed to properly dispose of Universal Waste within one year. 22 CCR 66273.35(a) &/or (b) |
| <input type="checkbox"/> HMD0147 | Failed to keep records of offsite Universal Waste shipment(s) available for inspection for 3 years. 22 CCR 66273.39(c),(d)(2) |
| <input type="checkbox"/> 3030051 | Failed to meet accumulation, labeling, marking, &/or containment standards for Universal Waste aerosol containers. HSC 25201.16(f) |
| <input type="checkbox"/> 3040004 | Failed to manage universal waste in a manner to prevent release(s) to the environment. 22 CCR 66273.33; 66273.33.5 |
| <input type="checkbox"/> HMD0307 | Disposal of universal waste (UW) to an unauthorized point. HSC 25189.5(a); 22 CCR 66273.31(a), 66273.8(b) |
| <input type="checkbox"/> 3010005 | Failure of a universal handler of electronic devices or CRTs from an offsite source to notify DTSC 30 days prior to acceptance. 22 CCR 66273.32(c) |
| <input type="checkbox"/> 3010020 | Failure of a universal waste handler to submit an annual report that includes all required information to DTSC by February 1 of every year. 22 CCR 66273.32(d) |
| <input type="checkbox"/> 3010006 | Failure of the universal waste handler who sends electronic devices or CRTs to any foreign destination to notify DTSC 60 days prior to export and send a copy to the CUPA. 22 CCR 66273.40(a)(3) |

CERTIFIED APPLIANCE RECYCLER REQUIREMENTS

| # | VIOLATION DESCRIPTION |
|----------------------------------|---|
| <input type="checkbox"/> 3010033 | Failure to obtain Certified Appliance Recycler certification (CAR) from DTSC. HSC 25211.4 |
| <input type="checkbox"/> 3010034 | Failure of certified appliance recycler (CAR) to provide documentation that all materials that require special handling (MRSH) have been properly removed and managed. HSC 25211.2, 25211.3 |
| <input type="checkbox"/> 3030055 | Failure of certified appliance recycler (CAR) to properly remove and dispose of all materials that require special handling (MRSH). HSC 25211.3, 25212 (a), (b), and/or (c) |

COUNTY OF SAN DIEGO

COMPLIANCE INSPECTION REPORT

Aboveground Petroleum Storage Act (APSA) Program

Each violation checked below is for the section(s) of the California Health and Safety Code (HSC), California Code of Regulations (CCR), or San Diego County Code ("SDCC") indicated in *italics*. Incorporated provisions of Title 40 of the Code of Federal Regulations (CFR) are noted for reference. All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use a DEH Corrective Action Form (HM-926) or other correspondence to document your return to compliance. Please call (858) 505-6880 or your Specialist if you have any questions.

GENERAL APSA FACILITY REQUIREMENT

(CHAPTER 6.67 OF DIVISION 20 OF THE HSC & SDCC)

| # | VIOLATION DESCRIPTION |
|----------------------------------|--|
| <input type="checkbox"/> 4010001 | Failed to prepare a Spill Prevention, Control, and Countermeasures (SPCC) Plan. HSC 25270.4.5(a), 40 CFR 112.3, 112.6 |
| <input type="checkbox"/> 4030038 | Failed to implement the SPCC Plan. HSC 25270.4.5(a), 40 CFR 112.3, 112.6 |
| <input type="checkbox"/> 4010032 | Failed to submit a tank facility statement or update/certify Business Plan annually. HSC 25270.6(a)(1) or (a)(2) |
| <input type="checkbox"/> 4010033 | Failed to pay the APSA program fee or obtain Unified Program Facility Permit. HSC 25270.6(b), SDCC 68.905 |
| <input type="checkbox"/> 4040001 | Failed to immediately, upon discovery, report a one-barrel (42 gallons) or greater release of petroleum to Cal OES and the CUPA. HSC 25270.8 |
| <input type="checkbox"/> 4010037 | Failed to meet conditions of APSA exemption for oil-filled electrical equipment including containment and visual inspection. HSC 25270.2(a)(4) |
| <input type="checkbox"/> 4030043 | Failed to have secondary containment and/or leak detection if piping connected to tank in an underground area (TIUGA) cannot be directly viewed on all sides. (Refer to HSC 6.67 for direct viewing: DOES NOT apply to: 1. Piping connected to a tank that contains new oil/used oil for lubricant or coolant in a motor engine or transmission, or oil-filled operational/manufacturing equipment. 2. Piping connected to a tank used solely in connection with a fire pump or emergency system, legally required by standby system, or optional standby system. 3. Piping connected to a petroleum hazardous waste tank that complies with hazardous waste tank standards (22 CCR Ch. 15, Art. 10) and facility has been issued a unified program facility permit pursuant to HSC 25404.2 for generation, treatment, accumulation, or storage of hazardous waste.) (24CCR Title 9 Section 5703.6.2.2.) HSC 25270.4.5(a), HSC 25270.2(o)(1)(C)(iv)(III) |

REQUIREMENTS BASED ON 40 CFR 112.1-112.6

| # | VIOLATION DESCRIPTION |
|----------------------------------|---|
| <input type="checkbox"/> 4010035 | Failed to prepare an appropriate SPCC Plan within six months when the facility no longer meets the conditions of a qualified facility. (40 CFR 112.3(a)(1), 112.3(g), 112.6.) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010047 | (Qualified Facility only- Tier I or II) Failed to have management, or a Professional Engineer if applicable, certify the SPCC Plan and comply with the certification requirements. (40 CFR 112.6(a)(1), 112.6(b).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010048 | (Qualified Facility only- Tier I) Failed to certify the SPCC Plan according to 40 CFR 112.6(a)(1) if a technical change has been made to the facility design, construction, operation, or maintenance. (40 CFR 112.6(a)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010052 | (Qualified Facility only- Tier II) Failed to have technical amendment(s) certified by management, or a Professional Engineer if applicable. (40 CFR 112.6(b)(2), 112.6(b)(2)(i).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010054 | (Qualified Facility only- Tier I) Failed to include in the SPCC Plan a prediction of direction and total quantity of oil potentially discharged from the facility as a result of each type of major equipment failure. (40 CFR 112.6(a)(3)(i).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030041 | (Qualified Facility only- Tier I) Failed to provide bulk storage containers/tanks with adequate sized secondary containment to contain the capacity of the largest container plus freeboard for precipitation; failed to position/locate mobile or portable containers to prevent a discharge. (40 CFR 112.6(a)(3)(ii).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030042 | (Qualified Facility only- Tier I) Failed to provide systems or follow procedures to prevent overfills as described in the SPCC Plan; failed to routinely test overflow equipment to ensure proper operation. (40 CFR 112.6(a)(3)(iii).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010003 | Failed to have a Professional Engineer certify and review the SPCC Plan. (40 CFR 112.3(d).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010008 | Failed to maintain a complete copy of the SPCC Plan at the facility if the facility is normally attended at least four hours per day, or at the nearest field office if the facility is not so attended. (40 CFR 112.3(e)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010010 | Failed to make SPCC Plan technical amendment(s) within six months when the facility has had a change in design, construction, operation, or maintenance which affects the facility's discharge potential; failed to implement within six months following preparation of the amendment. (40 CFR 112.5(a), 112.5(b).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010009 | Failed to perform and properly document a five-year review of the SPCC Plan. (40 CFR 112.5(b).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010039 | Failed to have technical amendments certified by a licensed Professional Engineer. (40 CFR 112.5(c).) HSC 25270.4.5(a) |

GENERAL SPCC REQUIREMENTS

BASED UPON 40 CFR 112.7

| # | VIOLATION DESCRIPTION |
|----------------------------------|--|
| <input type="checkbox"/> 4010012 | Failed to prepare a written SPCC Plan in accordance with good engineering practices and any applicable more stringent State rules, regulations, and guidelines; failed to prepare a SPCC Plan that follows the sequence of rule or provides a cross-reference; failed to prepare a SPCC Plan that addresses additional procedures/methods/equipment not fully operational; failed to obtain facility management approval for implementation of the SPCC Plan. (40 CFR 112.7 and 112.7(a)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010014 | Failed to include alternative environmental protection to SPCC requirements within SPCC Plan. (40 CFR 112.7(a)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010015 | Failed to include in the SPCC Plan an adequate facility diagram, or no facility diagram included. The facility diagram is not required for a Tier I Qualified Facility. (40 CFR 112.7(a)(3).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010016 | Failed to adequately describe in the SPCC Plan the physical layout of facility, types of oil and storage capacities, tanks, containers, equipment, mobile refuelers, portable containers, transfer operations, and other required information. (40 CFR 112.7(a)(3), 112.7(a)(3)(i-vi).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010017 | Plan does not contain procedures for reporting a discharge, and/or a contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all appropriate Federal, State, and local agencies. (40 CFR 112.7(a)(4).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010018 | Discharge response procedures are not adequately organized to be readily accessible in an emergency. (40 CFR 112.7(a)(5).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010019 | Failed to include in the SPCC Plan a prediction of the direction, rate of flow, and total quantity of oil that could be discharged for each type of major equipment failure where experience indicates a reasonable potential for equipment failure. (40 CFR 112.7(b).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010020 | (General Containment) Failed to provide, or include in the SPCC Plan, the appropriate containment, diversionary structures, or equipment to prevent a discharge that will not escape containment before cleanup occurs, including typical failure mode and most likely quantity of discharge. (40 CFR 112.7(c).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010004 | Failed to clearly explain why appropriate containment/diversionary structures are not practicable and/or SPCC Plan claiming impracticability is not certified by a licensed Professional Engineer. (40 CFR 112.7(d).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010005 | Failed to prepare an Oil Spill Contingency Plan following the provisions of 40 CFR Part 109 for impracticability claim. (40 CFR 112.7(d)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010006 | Failed to provide a written commitment of manpower, equipment, materials when claiming impracticability. (40 CFR 112.7(d)(2).) HSC 25270.4.5(a) |

COUNTY OF SAN DIEGO

COMPLIANCE INSPECTION REPORT

INSPECTION DATE: 03/14/2019 PAGE 10 OF 10
 RECORD ID #: DEH2002-HUPFP-130637

APSA Program (continued)

- 4010021 Failed to have record of inspections and integrity tests signed by the appropriate supervisor or inspector, keep written procedures and records of inspections and integrity tests for at least three years, and/or keep comparison records. (40 CFR 112.7(e), 112.8(c)(6).) HSC 25270.4.5(a)
- 4020001 Failed to train oil-handling personnel on: operation/maintenance of equipment to prevent discharges; discharge procedure protocols; applicable laws, rules, and regulations; general facility operations; and the contents of the SPCC Plan. (40 CFR 112.7(f)(1).) HSC 25270.4.5(a)
- 4010022 Failed to designate person accountable for discharge prevention who reports to facility management. (40 CFR 112.7(f)(2).) HSC 25270.4.5(a)
- 4010023 Failed to conduct annual discharge prevention briefings to ensure understanding of SPCC plan. (40 CFR 112.7(f)(3).) HSC 25270.4.5(a)
- 4030001 Failed to address security and access control of the oil handling, processing, and storage areas to both prevent acts of vandalism and assist in discovery of discharges. (40 CFR 112.7(g).) HSC 25270.4.5(a)
- 4030002 (For loading/unloading racks) Failure of the secondary containment, and/or rack drainage to flow to a catchment basin, treatment system, or quick drainage system, and hold at least the maximum capacity of the largest single compartment of any tank car or tank truck. (40 CFR 112.7(h)(1).) HSC 25270.4.5(a)
- 4030003 (For loading/unloading racks) Failed to provide an interlocked warning light or physical barriers, warning signs, wheel chocks, or vehicle brake interlock system in the area adjacent to the loading/unloading rack to prevent vehicles from departing before complete disconnection of transfer lines. (40 CFR 112.7(h)(2).) HSC 25270.4.5(a)
- 4030016 Failed to evaluate field-constructed storage tank for brittle fracture or other catastrophe and take appropriate action. (40 CFR 112.7(i).) HSC 25270.4.5(a)
- 4010013 Failure to discuss in the SPCC Plan conformance with SPCC requirements and other effective discharge prevention and containment procedures or any more stringent State rules, regulations and guidelines. (HSC 6.67 25270.4.5(a); 40 CFR 112.7(a)(1), 112.7(j))
- 4030034 (For oil-filled operational equipment) Failed to provide general secondary containment or fulfill alternative requirements to general secondary containment. (40 CFR 112.7(k).) HSC 25270.4.5(a)

SPCC REQUIREMENTS BASED UPON 40 CFR 112.8 & 112.20

REFER TO APSA (HSC CHAPTER 6.67) FOR DEFINITION OF "STORAGE TANK"

- | # | VIOLATION DESCRIPTION |
|----------------------------------|---|
| <input type="checkbox"/> 4010027 | Failed to restrain drainage from diked storage areas by valve(s) or manually activated pump/ejector to prevent discharge. (40 CFR 112.8(b)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030005 | Failed to use valves of manual, open-and-closed design, for drainage of diked areas. (40 CFR 112.8(b)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030008 | Facility drainage system from undiked areas not designed/equipped to retain oil or return oil to facility and/or failed to ensure catchment basin is not in an area subject to flooding. (40 CFR 112.8(b)(3), 112.8(b)(4).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030009 | Failed to provide at least two lift pumps and permanently install at least one pump where drainage waters are treated in more than one treatment unit and such treatment is continuous, and pump transfer is needed. (40 CFR 112.8(b)(5).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030012 | Storage tanks not compatible with materials stored or conditions of storage. (40 CFR 112.8(c)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030010 | (Sized Containment) Secondary containment not sized to contain the entire capacity of the largest single storage tank plus freeboard for precipitation. (40 CFR 112.8(c)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030013 | Failure to ensure diked areas are sufficiently impervious to contain discharged oil. (40 CFR 112.8(c)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030006 | Failed to ensure all of the following before allowing drainage of uncontaminated rainwater from diked area: keep bypass valve normally sealed closed, inspect the retained rainwater, and open then reseal bypass valves under responsible supervision. (40 CFR 112.8(c)(3).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010026 | Failed to maintain adequate records (or NPDES permit records) of drainage from diked areas. (40 CFR 112.8(c)(3)(iv).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030017 | Failed to provide corrosion protection for partially buried storage tanks. (40 CFR 112.8(c)(5).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030015 | Failed to test or inspect each aboveground tank or container for integrity on a regular schedule and after material repairs. (40 CFR 112.8(c)(6).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030014 | Failed to ensure tanks are inspected and tested by an appropriately qualified person in accordance with industry standards. (40 CFR 112.8(c)(6).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010028 | Failed to include in the SPCC Plan procedures to test or inspect each aboveground container for integrity in accordance with industry standards on a regular schedule, after material repairs are made, by qualified personnel; failed to include the frequency and type of testing and inspections based on container size, configuration, and design. (40 CFR 112.8(c)(6).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030018 | Failure of steam return/exhaust of internal heating coils, which discharge into an open water course, to be monitored, passed through a settling tank, skimmer, or other separation system. (40 CFR 112.8(c)(7).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030019 | Failed to engineer or update each container/tank installation in accordance with good engineering practice to avoid discharges and/or failed to provide at least one of the following devices: audible/visual high liquid level alarm, high liquid level pump cutoff devices, audible or code signal communications between tank gauge and pumping station, or fast response system for determining liquid levels, such as computers, telepulse or direct vision gauges. (40 CFR 112.8(c)(8)(i-iv).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030022 | Failed to regularly test liquid level sensing devices to ensure proper operation. (40 CFR 112.8(c)(8)(v).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030023 | Failed to observe effluent treatment facilities frequently enough to detect any potential for discharges as described in 40 CFR 112.1(b). (40 CFR 112.8(c)(9).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030021 | Failed to promptly correct visible discharges and/or remove any accumulations of oil in diked areas. (40 CFR 112.8(c)(10).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030020 | (For mobile or portable storage tanks EXCEPT mobile refuelers) Failed to position or locate mobile or portable storage container, and/or failure to provide secondary containment with sufficient capacity to contain the largest single mobile or portable container/compartment and sufficient freeboard for precipitation. (40 CFR 112.8(c)(11).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030025 | Failed to inspect buried piping when exposed for any reason; failed to do additional examination or take corrective action if corrosion damage is identified. (40 CFR 112.8(d)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030027 | Failed to provide corrosion protection for buried piping. (40 CFR 112.8(d)(1).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030028 | Failed to cap/blank-flange piping connection at transfer point and mark its origin if not in service. (40 CFR 112.8(d)(2).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030029 | Failed to design pipe supports to minimize abrasion/corrosion and to allow for expansion/contraction. (40 CFR 112.8(d)(3).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030026 | Failed to regularly inspect aboveground valves, piping, and appurtenances. (40 CFR 112.8(d)(4).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030030 | Failed to conduct integrity and leak test on buried piping at installation, modification, construction, relocation or replacement. (40 CFR 112.8(d)(4).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4030031 | Failed to adequately warn vehicles entering facility to protect piping and other transfer operations. (40 CFR 112.8(d)(5).) HSC 25270.4.5(a) |
| <input type="checkbox"/> 4010044 | Failed to complete and maintain at the facility the Substantial Harm Criteria certification form when owner or operator determines that the facility could not be reasonably expected to cause substantial harm to the environment. (40 CFR 112.20(e).) HSC 25270.4.5(a) |

COMPLIANCE INSPECTION REPORT

BUSINESS NAME KEYSTONE AUTOMOTIVE

ADDRESS 1670 Brandywine Avenue #3

CITY/ZIP Chula Vista CA 91911

On the above date an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

AUG 29 1996

MSDS FOR H2O BASE
TRIMED-PRIMER
Perry 10/14/96
619-6942

ROUTINE INSPECTION:

1. OBTAIN AN EPA ID # BY CALLING 1-800-61-TOXIC.
@ 694-3340
2. CALL AIR POLLUTION CONTROL DISTRICT AND INQUIRE ABOUT REQUIREMENTS FOR PERMITTING PAINT BOOTH.
HMBP
3. COMPLETE HAZARDOUS MATERIALS BUSINESS PLAN & MAIL TO MY ATTENTION WITHIN 5 WORKING DAYS (By 8/14/96)
4. USE HMBP AS PART OF EMPLOYEE TRAINING. ANNUAL EMPLOYEE TRAINING MUST INCLUDE HAZARDOUS MATERIALS/WASTE MANAGEMENT, SPILL CONTROL AND EMERGENCY PROCEDURES.
 - MAIL TO MY ATTENTION DOCUMENTATION OF TRAINING BY 8/21/96
5. OBSERVED THAT BUMPERS ARE SANDED AND THAT PAINT CHIPS/SAND ARE GENERATED / SANDBLAST WASTE ALSO GENERATED
 - COLLECT CHIPS/SAND IN A CLOSED, LABELED CONTAINER
 - PERFORM WASTE DETERMINATION OR MANAGE AS A HAZARDOUS WASTE.
6. DISPOSE OF OFF SPEC/OUTDATED MATERIALS ANNUALLY

PAGE 2 OF 2

BUSINESS ADDRESS: 1670 Broadway Brandywine, Chula Vista CA 91911

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.905
No EPA Identification Number 68262.12
Waste Manifests/Receipts not on-site for 3 years 68262.40
Manifest not properly completed 68262.23
Manifest copy not sent to CAL-EPA 68262.23
TSDF signed-manifest not on-site 68262.40
Biennial report not sent to CAL-EPA 68262.41
LDR Documentation not available 68268.7
Exception Rpt. not filed with CAL-EPA 68262.42
Operating TSDF without authorization 25201

- V0108 W
V0105 W
V0118 W
V0120 W
V0115 W
V0121 W
V0122 W
V0123 W
V0116 W
V0124 W

STORAGE AND HANDLING

- Waste stored longer than 90 days 68262.34
Waste container missing/improperly labeled 68262.34
Haz Materials not properly labeled 25124
Waste container not kept closed 68265.173
Waste container in poor condition 68265.171
Waste container(s) not properly managed 68265.173
Damaged container not repackaged 68265.171
Container incompatible with waste 68265.172
Incompatibles in the same container 68265.177
Incompatibles not stored separately 68265.177
Ignitable Wastes less than 50 feet 68265.176
Ignitable Wastes not grounded 68265.31
Storage area not inspected weekly 68265.174

Written response plan not available 2632
Spill/Overfill equip. not maintained or installed 2635

- V3026 T
V3027 T
V3028 T
V3029 T

RELEASE REPORTING

- Failure to report an unauthorized release 25295
Release record log not available 2651, 2650
No leak report/investigation/action 2652

- V3009 T
V3030 T
V3031 T

CLOSURE

- Temporary closure req. not completed 2671
Abandoned tank not properly closed 25298
Permanent closure req. not completed 2672

- V3006 T
V3032 T
V3033 T

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.1105
Business Plan not established/implemented 25503.5
Business Plan not submitted to HMMMD 25505
Business Plan not amended 25505
Personnel Training Records not available 2732

- V2001 W
V2002 W
V2007 W
V2003 W
V2302 W

RELEASE REPORTING

- Failure to report a release/threatened release 25507

- V2008 W

BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504
Emergency Contacts not provided/current 25509
Personnel Training Program inadequate 25504
Inventory is incomplete 25504
Site Map is not sufficient 25509
Acutely Haz. Mat. not registered 25533

- V2201 W
V2203 W
V2301 W
V2005 W
V2202 W
V2009 W

An inspection summary report will be mailed shortly. All violations must be corrected. Please call (619) 338-2222 if you have any questions.

BUSINESS NAME LYON Electric Co. Inc
 ADDRESS 1690 Brandwine Ave #A
 CITY/ZIP Chula Vista CA 91911

Permitted 1/10/01 for fire

On the above date, an inspection of your business/facility was conducted in order to determine compliance with the California Health and Safety Code (H&S) Chapters 6.5, 6.7, 6.95; Titles 19, 22 and 23 of the California Code of Regulations (CCR); and the San Diego County Code (SDCC). The following remarks are intended to provide guidance to correct the violations noted on the attached violation report.

DEC 28 2000

Office Use Only

Routine Inspection

A complete inspection was performed: Walk-through and review of paperwork. Authorization was granted by Jim Miller, Plant Manager.

Observation: Container holding metal chips with oil ~~needs to be closed~~ at all times was observed to be open. Corrective action: Provide lids to containers and maintain them closed at all times.

Observation: Metal container holding soiled rags with solvent and oil ~~did not have~~ was not grounded. Corrective action: Ground container or use plastic container.

Remarks:

Health permit is current.

Business Owner/Operator Identification

Please submit the Business Activities page, the Business Owner/Operator Identification page (OES Form 2730), and Hazardous Materials - Chemical Description pages (OES Form 2731) for all hazardous materials inventory submissions. For the inventory to be considered complete this page must be signed by the appropriate individual.

(Note: the numbering of the instructions follows the data element numbers that are on the UPCF pages. These data element numbers are used for electronic submission and are the same as the numbering used in 27 CCR, Appendix C, the Business Section of the Unified Program Data Dictionary.) Please number all pages of your submittal. This helps your CUPA or AA identify whether the submittal is complete and if any pages are separated.

ALWAYS SUBMIT A COPY OF THIS COMPLETED PAGE WITH SUBMITTAL OF ANY OTHER UNIFIED PROGRAM CONSOLIDATED FORM.

1. FACILITY ID NUMBER - Enter your 6 character Permit # on your Unified Program Facility Permit (UPFP If you do not have a Unified Program Facility Permit, leave this blank.
3. BUSINESS NAME - Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA" - Doing Business As.
 100. BEGINNING DATE - Enter the beginning year and date (YYYYMMDD) of the inventory report, recyclable materials report, or on-site tiered permitting report for PBR sites.
101. ENDING DATE - Enter the ending year and date (YYYYMMDD) of the reports identified in #100.
102. BUSINESS PHONE - Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS - Enter the street address where the facility is located. No post office box numbers are allowed. This information must provide a means to geographically locate the facility. If the mailing address is different, complete #113- #116.
104. CITY - Enter the city or unincorporated area in which business site is located.
105. ZIP CODE - Enter the zip code of business site. The extra 4-digit zip may also be added.
106. DUN & BRADSTREET - Enter the Dun & Bradstreet number for the facility. If you do not have one, leave this field blank.
107. SIC CODE - Enter the primary Standard Industrial Classification Code number for primary business activity. NOTE: If code is more than 4 digits, report only the first four.
108. COUNTY - Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME - Enter the name of the business operator which is the name used for mailing correspondence.
110. BUSINESS OPERATOR PHONE - Enter business operator phone number, if different from business phone, area code first, and any extension.
111. OWNER NAME - Enter name of business owner, if different from business operator.
112. OWNER PHONE - Enter the business owner's phone number if different from business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS - Enter the owner's mailing address where business related correspondence should be sent, if different from business site address.
114. OWNER CITY - Enter the name of the city for the owner's mailing address.
115. OWNER STATE - Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE - Enter the zip code for the owner's address. The extra 4-digit zip may also be added.
117. ENVIRONMENTAL CONTACT NAME - Enter the name of the person, if different from the Business Owner or Operator, who will respond to enforcement activity.
118. CONTACT PHONE - Enter the phone number, if different from Owner or Operator, at which the environmental contact can be contacted.
119. CONTACT MAILING ADDRESS - Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY - Enter the name of the city for the environmental contact's mailing address.
121. STATE - Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE - Enter the zip code for the environmental contact's mailing address. The extra 4-digit zip may also be added.
123. PRIMARY EMERGENCY CONTACT NAME - Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE - Enter the title of the primary emergency contact.
125. BUSINESS PHONE - Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE - Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER - Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME - Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE - Enter the title of the secondary emergency contact.
130. BUSINESS PHONE - Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE - Enter a 24-hour phone number for the secondary emergency contact. The 24-hour phone number must be one that is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER - Enter the pager number for the secondary emergency contact, if available.
133. ADDITIONAL LOCALLY COLLECTED INFORMATION - This space may be used for CUPAs or AAs to collect any additional information necessary to meet the requirements of their individual programs. Contact your local agency for guidance.
134. DATE - Enter the date that the document was signed. (YYYYMMDD)
135. NAME OF DOCUMENT PREPARER - Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER - Enter the full printed name of the person signing the page. The signer certifies to a familiarity with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information, all the information submitted is true, accurate and complete.

SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE - The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies that the signer is familiar with the information submitted and that based on the signer's inquiry of those individuals responsible for obtaining the information it is the Signer's belief that the submitted information is true, accurate and complete.
137. TITLE OF SIGNER - Enter the title of the person signing the page.

ANALYTICAL REPORT

Eurofins Calscience Irvine
17461 Derian Ave
Suite 100
Irvine, CA 92614-5817
Tel: (949)261-1022

Laboratory Job ID: 440-262156-1

Client Project/Site: Lyon Technologies Inc.

For:

County of San Diego
5500 Overland Ave, Suite 110
PO BOX 129261
San Diego, California 92112

Attn: Kelly Robertson

Authorized for release by:
3/24/2020 11:12:00 AM

Sheri Fama, Project Manager I
(949)260-3274
sheri.fama@testamericainc.com

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Job ID: 440-262156-1

Laboratory: Eurofins Calscience Irvine

Narrative

Job Narrative 440-262156-1

Comments

Added analyses, due to results (sample exceedances) from TTLC data. Added STLC Cr & Ni to Samples -1; 17309 (440-262156-1) and -4; 17312 (440-262156-4) and STLC Cu to Sample -3; 17311 (440-262156-3).

Receipt

The samples were received on 3/5/2020 4:15 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.1° C.

Metals

Method 6010B: The continuing calibration blank (CCB) for analytical batch 440-599985 contained Antimony above the reporting limit (RL). All reported samples associated with this CCB were ND for this analyte; therefore, re-analysis of samples was not performed.

Method 6010B: The following samples were diluted due to the nature of the sample matrix: 17309 (440-262156-1) and 17312 (440-262156-4). Elevated reporting limits (RLs) are provided.

Method 6010B: The method blank for preparation batch 440-599491 and analytical batch 440-599985 contained Nickel and Chromium above the reporting limit (RL). Associated sample(s) were not re-extracted and/or re-analyzed because results were greater than 10X the value found in the method blank.

Method 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and precision of multi-analytes for preparation batch 440-599491 and analytical batch 440-599985 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) was within acceptance limits.

Method 7471A: The following samples were diluted due to the dark green color of the liquids: 17309 (440-262156-1) and 17312 (440-262156-4). Elevated reporting limits (RL) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep

No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

| Project Contact Brian Sweet | | Telephone # (928) 230-6184 |

The following questions represent the facility's activities, NOT the specific project description.

PART I: FIRE DEPARTMENT - HAZARDOUS MATERIALS DIVISION: OCCUPANCY CLASSIFICATION: Indicate by circling the item, whether your business will use, process, or store any of the following hazardous materials. If any of the items are circled, applicant must contact the Fire Protection Agency with jurisdiction prior to plan submittal.

- | | | | |
|---|-----------------------|-------------------------------------|--------------------------|
| 1. Explosive or Blasting Agents | 5. Organic Peroxides | 9. Water Reactives | 13. Corrosives |
| 2. Compressed Gases | 6. Oxidizers | 10. Cryogenics | 14. Other Health Hazards |
| 3. Flammable/Combustible Liquids | 7. Pyrophorics | 11. Highly Toxic or Toxic Materials | 15. None of These. |
| 4. Flammable Solids | 8. Unstable Reactives | 12. Radioactives | |

PART II: SAN DIEGO COUNTY DEPARTMENT OF ENVIRONMENTAL HEALTH - HAZARDOUS MATERIALS DIVISIONS (HMD): If the answer to any of the questions is yes, applicant must contact the County of San Diego Hazardous Materials Division, 1255 Imperial Avenue, 3rd floor, San Diego, CA 92101. Call (619) 338-2222 prior to the issuance of a building permit.

FEES ARE REQUIRED. **Fuller Ford collision ctr. re-opening across the street** Expected Date of Occupancy: 11 / 15 / 07

**LIST OF BUSINESSES WHICH REQUIRE REVIEW AND APPROVAL FROM THE COUNTY OF SAN DIEGO
DEPARTMENT OF ENVIRONMENTAL HEALTH – HAZARDOUS MATERIALS DIVISION**

Check all that apply:

AUTOMOTIVE

- Battery Manufacturing/Recycling
- Boat Yard
- Car Wash
- Dealership Maintenance/Painting
- Machine Shop
- Painting
- Radiator Shop
- Rental Yard Equipment
- Repair/Preventive Maintenance
- Spray Booth
- Transportation Services
- Wrecking/Recycling

CHEMICAL HANDLING

- Agricultural supplier/distributor
- Chemical Manufacturer
- Chemical Supplier/Distributor
- Coatings/Adhesive
- Compressed Gas Supplier/Distributor
- Dry Cleaning
- Fiberglass/Resin Application
- Gas Station
- Industrial Laundry
- Laboratory
- Laboratory Supplier/Distributor
- Oil and Fuel Bulk Supply
- Pesticide Operator/Distributor

CHEMICAL HANDLING

- Photographic Processing
- Pool Supplies/Maintenance
- Printing/Blue Printing
- Road Coatings
- Swimming Pool
- Toxic Gas Handler
- Toxic Gas Manufacturer

METAL WORKING

- Anodizing
- Chemical Milling/Etching
- Finish-Coating/Painting
- Flame Spraying
- Foundry
- Machine Shop-Drilling/Lathes/Mills
- Metal Plating
- Metal Prepping/Chemical Coating
- Precious Metal Recovery
- Sand Blasting/Grinding
- Steel Fabricator
- Wrought Iron Manufacturing

AEROSPACE

- Aerospace Industry
- Aircraft Maintenance
- Aircraft Manufacturing

OTHERS AND MISCELLANEOUS

- Asphalt Plant
- Biotechnology/Research
- Chiropractic Office
- Co-Generation Plant
- Dental Clinic/Office
- Dialysis Center
- Emergency Generator
- Frozen Food Processing Facility
- Hazardous Waste Hauler
- Hospital/Convalescent Home
- Laboratory/Biological Lab
- Medical Clinic/Office
- Nitrous Oxide (NO_x) Control System
- Pharmaceuticals
- Public Utility
- Refrigeration System
- Rock Quarry
- Ship Repair/Construction
- Telecommunications Cell Site
- Veterinary Clinic/Hospital
- Wood/Furniture Manufacturing/Refinishing

ELECTRONICS

- Electronic Assembly/Sub-Assembly
- Electronic Components Manufacturing
- Printed Circuit Board Manufacturing

NOTE: THE ABOVE LIST INCLUDES BUSINESSES, WHICH TYPICALLY USE, STORE, HANDLE, AND DISPOSE OF HAZARDOUS SUBSTANCES. ANY BUSINESS NOT INCLUDED ON THIS LIST, WHICH HANDLES, USES OR DISPOSES OF HAZARDOUS SUBSTANCES MAY STILL REQUIRE HAZARDOUS MATERIALS DIVISION (HMD) REVIEW OF BUSINESS PLANS. FOR MORE INFORMATION CALL (619) 338-2222.

LIST OF AIR POLLUTION CONTROL DISTRICT PERMIT CATEGORIES

Businesses, which include any of the following operations or equipment, will require clearance from the Air Pollution Control District.

CHEMICAL

- 47 – Organic Gas Sterilizers
- 32 – Acid Chemical Milling
- 33 – Can & Coil Manufacturing
- 44 – Evaporators, Dryers & Stills Processing Organic Materials
- 24 – Dry Chemical Mixing & Detergent Spray Towers
- 35 – Bulk Dry Chemicals Storage
- 55 – Chrome Electroplating Tanks

COATINGS & ORGANIC SOLVENTS

- 27 – Coating & Painting
- 37 – Plasma Arc & Ceramic Deposition Spray Booths
- 38 – Paint, Stain & Ink Mfg
- 27 – Printing
- 27 – Polyester Resin/Fiberglass Operations

METALS

- 18 – Metal Melting Devices
- 19 – Oil Quenching & Salt Baths
- 32 – Hot Dip Galvanizing
- 39 – Precious Metals Refining

ORGANIC COMPOUND MARKETING

(GASOLINE, ETC)

- 25 – Gasoline & Alcohol Bulk Plants & Terminals
- 25 – Intermediate Refuelers
- 26 – Gasoline & Alcohol Fuel Dispensing

COMBUSTION

- 34 – Piston Internal – Combustion Engines
- 13 – Boilers & Heaters (1 million BTU/hr or larger)
- 14 – Incinerators & Crematories
- 15 – Burn Out Ovens
- 16 – Core Ovens
- 20 – Gas Turbines, and Turbine Test Cells & Stands
- 48 – Landfill and/or Digester Gas Flares

ELECTRONICS

- 29 – Automated Soldering
- 42 – Electronic Component Mfg

FOOD

- 12 – Fish Canneries
- 12 – Smoke Houses
- 50 – Coffee Roasters
- 35 – Bulk Flour & Powered Sugar Storage

SOLVENT USE

- 28 – Vapor & Cold Degreasing
- 30 – Solvent & Extract Driers
- 31 – Dry Cleaning

ROCK AND MINERAL

- 04 – Hot Asphalt Batch Plants
- 05 – Rock Drills
- 06 – Screening Operations
- 07 – Sand Rock & Aggregate Plants
- 08 – Concrete Batch, CTB, Concrete Mixers, Mixers & Silos
- 10 – Brick Manufacturing

OTHER

- 01 – Abrasive Blasting Equipment
- 03 – Asphalt Roofing Kettles & Tankers
- 46 – Reverse Osmosis Membrane Mfg
- 51 – Aqueous Waste Neutralization
- 11 – Tire Buffers
- 17 – Brake Debonders
- 23 – Bulk Grain & Dry Chemical Transfer & Storage
- 45 – Rubber Mixers
- 21 – Waste Disposal & Reclamation Units
- 36 – Grinding Booths & Rooms
- 40 – Asphalt Pavement Heaters
- 43 – Ceramic Slip Casting
- 41 – Perlite Processing
- 40 – Cooling Towers – Registration Only
- 91 – Fumigation Operations
- 56 – WWTP (1 million gal/day or larger) & Pump Station

NOTE: OTHER EQUIPMENT NOT LISTED HERE THAT IS CAPABLE OF EMITTING AIR CONTAMINANTS MAY REQUIRE AN AIR POLLUTION CONTROL DISTRICT PERMIT. IF THERE ARE ANY QUESTIONS, CONTACT THE AIR POLLUTION CONTROL DISTRICT AT (858) 650 – 4550.

COMPLIANCE INSPECTION REPORT

 TIME START 930 END 1030
 SPECIALIST B. McLERNON
 INSPECTION CONTACT
MIKE ALLISON
 TITLE MGR
 PHONE (619) 656-2500

FACILITY NAME FULLER FORD COLLISION CENTER
 ADDRESS 515 MAIN STREET
 CITY/ZIP CHULA VISTA / 91911

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

- NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.**

Consent to inspect granted by: Inspection Contact Other:

ROUTINE INSPECTION

THIS WAS A ROUTINE INSPECTION FOR HAZARDOUS MATERIALS AND WASTE MANAGEMENT. MR. ALLISON GAVE CONSENT FOR THE INSPECTION.

RECEIVED AUG 22 2012

TODAY AT INSPECTION I OBSERVED ALL REQUIRED PAPERWORK AND CONDUCTED A FACILITY WALKTHROUGH.

- NOTICE TO COMPLY -

① VIOLATION 0138: MANIFEST SIGNED BY TSDF NOT AVAILABLE FOR INSPECTION. OBSERVATION: THREE MANIFEST WERE FOUND NOT SIGNED BY TSDF (007415992, 004998275, 005777663). CORRECTIVE ACTION: OBTAIN A SIGNED COPY OF THE MANIFESTS AND SUBMIT PROOF TO ME WITHIN 30 DAYS.

REMARKS: BUSINESS PLAN MUST BE CERTIFIED ANNUALLY, CERTIFICATION FORM CAN BE DOWNLOADED FROM COUNTY WEBSITE: WWW.CO.SAN-DIEGO.CA.US

BEGINNING JANUARY 2013 ALL BUSINESS MUST BEGIN USING THE CALIFORNIA ENVIRONMENTAL REPORTING SYSTEM (CERS). PLEASE LOG ON TO THE CERS WEBSITE FOR MORE INFORMATION: CERS.CALEPA.CA.GOV/BUSINESS

COMPLIANCE INSPECTION REPORT Small and Large Quantity Generators of Hazardous Waste Handlers of Hazardous Materials

PERMIT # 208691DATE 7 / 30 / 12PAGE 2 OF 2FACILITY ADDRESS: 515 MAIN STREETZIP: 91911

VIOLATION REPORT. The items checked below refer to specific section numbers of Titles 19, 22 & 27 of the California Code of Regulations (CCR), Chapters 6.5, 6.67 & 6.95 of the Health and Safety Code, and/or the San Diego County Code (SDCC), Small Quantity Hazardous Waste Generator=(SQG); Large Hazardous Waste Quantity Generator=(LQG); Code 40 of Federal Regulations=(CFR). All violations must be corrected. Submit documentation of return to compliance to your Specialist. You may use the Corrective Action Form (HM-926) to document your return to compliance. Your Specialist can provide this form. Please call (858) 505-6880 or your Specialist if you have any questions.

On the above date, the County inspected your facility under the authority of the California Health and Safety Code (H&SC), to determine compliance with applicable provisions of the H&SC, the California Code of Regulations (CCR), and the San Diego County Code of Regulatory Ordinances (SDCC). **This report serves as a Notice to Comply (H&SC 25187.8 & 25404.1.2) for any minor violations as defined in H&SC 25404 and 25117.6.** This report may contain both minor and more significant (Class II) violations. Minor violations do not include repeat violations or violations remaining uncorrected for more than 30 days (or as specified below). Minor violations do not include knowing, willful, intentional, or chronic violations; nor do they include violations showing a pattern of neglect or disregard. The remarks below are intended to provide guidance to correct any violations indicated on the attached violation report. You must submit a written response to this report within 30 days (or as specified below) demonstrating that all violations have been corrected or include a written notice of disagreement that clearly states the reason for any disputed violations. Prompt correction can protect you from penalties for a "minor violation". Penalties can be imposed for each day in violation for all other violations even if they are corrected promptly. However, correction within 30 days (or as specified below) will make a penalty less likely.

NOTE: Reinspection fees will be charged if additional inspections are required to determine compliance.

CONSENT TO CONDUCT INSPECTION GRANTED BY: Mike Allison

TITLE: Collision Manager

INTRODUCTION:

Today I conducted a Certified Unified Program Agency (CUPA) initial inspection at PENSKE FORD COLLISION CENTER with Mike Allison, Collision Manager to verify compliance with hazardous materials and hazardous waste regulations. This business began operating under new ownership on 6/5/2017.

Consent to conduct today's inspection and review documents was granted to Raisa Luna, Environmental Health Specialist by Mike Allison, Collision Manager.

Currently, this facility is subject to Hazardous Materials Business Plan (HMBP) requirements and Hazardous Waste generator requirements for storing reportable amounts (≥ 55 gallons, 500 pounds, or 200 cubic feet) of hazardous materials and generating hazardous waste on-site. Based on observations and manifests reviewed during today's inspection, at this time this facility appears to be a small quantity generator (SQG) of hazardous waste for generating less than 2,200 pounds or 270 gallons of hazardous waste per month.

The following items were observed on-site during today's inspection:

- 1 x 250 cubic foot cylinder of oxygen gas
- below reportable quantities of argon, acetylene, and nitrogen
- 1 x 30 gallon drum of used oil
- 1 x 55 gallon drum of waste coolant
- 1 x 55 gallon drum of waste sanding dust
- 1 x 30 gallon drum of water-based paint-related paint waste
- 1 x 30 gallon drum of solvent-based paint-related paint waste
- 2 x 30 gallon drum of solid paint-related paint waste
- 1 x 30 gallon drums of oily absorbent waste
- 1 unit parts washer

INSPECTION REMARKS:

1. NO VIOLATIONS WERE ISSUED DURING TODAY'S INSPECTION. PLEASE COMPLETE THE REQUIRED ACTION ITEM LISTED BELOW. Please be sure to pay all applicable Unified Program Facility Permit fees within 10 days of receiving your invoice.

COUNTY OF SAN DIEGO

SUPPLEMENTAL COMPLIANCE INSPECTION REPORT

INSPECTION DATE: **07/07/2017** PAGE **2** OF **5**
RECORD ID #: **DEH2007-HUPFP-208691**

*ACTION REQUIRED BY 7/30/2017:

- Establish/implement adequate HMBP at your facility. Submit to the CUPA your complete HMBP in the California Environmental Reporting System (CERS) at cers.calepa.ca.gov. Your HMBP must include a full submittal of the facility information, hazardous materials inventory and employee training/emergency response plans elements. If you require assistance with completing your CERS submittal, please contact the CERS help desk at (858) 505-6990.

2. EPA ID number CAL000426811 is active. Manifests/waste disposal receipts were available and reviewed. Records must be maintained on-site for at least 3 years.

CERS APPLICATION

Request to Submit CERS Facility Information to Initiate Unified Program Facility Permit

All Certified Unified Program Agency (CUPA) regulated facilities are required by law (Assembly Bill 2286) to submit business information electronically through the California Environmental Reporting System (CERS). Visit https://www.sandiegocounty.gov/content/sdc/deh/hazmat/hmd_cers.html

**SUBMITTING THIS FORM DOES NOT GRANT YOU A UNIFIED PROGRAM FACILITY PERMIT (UPFP)
MONITOR EMAIL FOR ADDITIONAL INSTRUCTIONS & ACTIONS REQUIRED**

I. BUSINESS NAME & LOCATION DETAILS FOR ACCESS REQUESTS ONLY- FILL OUT SECTIONS I, II, & VII

| | | |
|--|---|--|
| Facility Name <i>(This name will be printed on your permit)</i> | CERS ID <i>(i.e. 10301234)</i> | Permit/Record ID <i>(i.e. DEH2002-HUPFP-123456)</i> |
| FORD COLLISION CENTER | | |

II. CERS USERS TO BE GRANTED ONLINE ACCESS FOR ACCESS REQUESTS ONLY- FILL OUT SECTIONS I, II, & VII

The two users designated below will be granted access to this facility in the online California Environmental Reporting System (CERS). These lead users must create a unique user account and log in to CERS to submit required reporting elements. Once submitted, lead users will be notified via email on the status of the submittal. New permits are typically issued after an initial inspection is conducted and only after your inventory has been accepted in CERS.

CERS BUSINESS ACTIVITIES

V. REGULATED BUSINESS ACTIVITIES

Hazardous Materials/Waste Inventory

Regulated facilities in San Diego County are required by local ordinance to report all medical waste(s) and hazardous waste(s) generated in the Hazardous Materials Inventory submittal element. San Diego County Code §68.904(a)(2), §68.905, §65.1202.

Does your facility have on site (for any purpose) at any one time any of the following reportable inventory items?

- ≠ Hazardous materials at or above 55 gallons for liquids, 500 pounds for solids, or 200 cubic feet for compressed gases
- ≠ Hazardous wastes in any amount
- ≠ Medical wastes in any amount

Yes No

Inventory reporting guidance: https://www.sandiegocounty.gov/content/sdc/deh/hazmat/hazmat/hmd_chem_reporting_changes.html

UST: Underground Storage Tank(s)

Does your facility own or operate underground storage tanks?

Yes No

HW: Hazardous Waste

HW Generator: Does your facility generate Hazardous Waste?

If yes, provide an EPA ID Number: CAL000446460

Yes No

HW Treatment: Does your facility treat hazardous waste on-site?

Yes No

CA/PBR Financial Assurance: Is your facility's treatment subject to financial assurance requirements for Permit by Rule (PBR) or Conditional Authorization (CA)?

Yes No

Remote Consolidation: Does your facility consolidate hazardous waste generated at a remote site?

Yes No

HW Tank Closure: Does your facility need to report the closure/removal of a tank that was classified as hazardous waste and cleaned on-site?

Yes No

RCRA Large Quantity Generator (LQG): Do any of the following apply to this facility?

- ≠ Generates in any single calendar month 1,000 kg (2,200 pounds) or more of RCRA (federally-regulated) hazardous waste
- ≠ Generates in any single calendar month, or accumulate at any time, 1 kg (2.2 pounds) of RCRA acute hazardous waste
- ≠ Generates or accumulates at any time more than 100 kg (220 pounds) of spill cleanup materials contaminated with RCRA acute hazardous waste. **Do not check yes if you only generate non-RCRA waste.**

If yes, File Biennial Report (EPA Form 8700-13A/B), and satisfy requirements for RCRA LQG.

Yes No

ERM: Excluded Recyclable Materials

Does your facility recycle more than 100 kg/month of excluded or exempted recyclable materials (per HSC 25143.2)?

Yes No

APSA: Aboveground Petroleum Storage Act

Does your facility own or operate aboveground petroleum storage tanks or containers AND:
Have a total aboveground petroleum storage capacity of 1,320 gallons or more, OR one or more petroleum tanks in an underground area?

Yes No

V. MEDICAL WASTE INVENTORY (IF APPLICABLE)

| Type of Medical Waste | Max Daily Amount ¹ | Largest Container | Annual Waste Amount ² | Container Information |
|--|-------------------------------|-------------------|----------------------------------|--|
| <input type="checkbox"/> Infectious Waste, Sharps | _____ lbs | _____ lbs | _____ lbs | <input type="checkbox"/> Sharps container |
| <input type="checkbox"/> Infectious Waste, General (red bag) | _____ lbs | _____ lbs | _____ lbs | <input type="checkbox"/> Bag |
| <input type="checkbox"/> Non-RCRA Pharmaceutical Waste | _____ lbs | _____ lbs | _____ lbs | <input type="checkbox"/> Plastic bottle <input type="checkbox"/> Box |
| <input type="checkbox"/> Trace Chemotherapy Waste | _____ lbs | _____ lbs | _____ lbs | <input type="checkbox"/> Plastic bottle <input type="checkbox"/> Bag |
| <input type="checkbox"/> Pathology Waste | _____ lbs | _____ lbs | _____ lbs | <input type="checkbox"/> Plastic bottle <input type="checkbox"/> Bag |

¹ Max Daily Amount: Provide an estimate for the maximum amount (in whole lbs) that can be stored per day at this facility. This cannot be less than the size of the largest container.

² Annual Waste Amount: Provide an estimate of the amount (in whole lbs) of medical waste generated per year by this facility.

VII. AUTHORIZATION FOR HMD TO SUBMIT INFORMATION IN CERS FOR ACCESS REQUESTS ONLY- FILL OUT SECTIONS I, II, & VII

I authorize the Hazardous Materials Division (HMD) to set up my CERS ID; enter the information included on this form into my CERS account; and submit the information through CERS on behalf of my business.

I understand that my obligations to complete the remaining required information through CERS will not be fully satisfied by submitting this form and that I am responsible for completing and maintaining my Facility Information and all other applicable submittal sections in CERS as required by State law and local ordinance.

I certify under penalty of law that I have personally reviewed and verified the information contained on this form to be true, accurate and complete.

County of San Diego

DEPARTMENT OF ENVIRONMENTAL HEALTH HAZARDOUS MATERIALS DIVISION

CERS APPLICATION

Request to Submit CERS Facility Information to Initiate Unified Program Facility Permit

All Certified Unified Program Agency (CUPA) regulated facilities are required by law (Assembly Bill 2286) to submit business information electronically through the California Environmental Reporting System (CERS). Visit https://www.sandiegocounty.gov/content/sdc/deh/hazmat/hmd_cers.html

**SUBMITTING THIS FORM DOES NOT GRANT YOU A UNIFIED PROGRAM FACILITY PERMIT (UPFP)
MONITOR EMAIL FOR ADDITIONAL INSTRUCTIONS & ACTIONS REQUIRED**

I. BUSINESS NAME & LOCATION DETAILS FOR ACCESS REQUESTS ONLY- FILL OUT SECTIONS I, II, & VII

| | | |
|--|---|--|
| Facility Name <i>(This name will be printed on your permit)</i> | CERS ID <i>(i.e. 10301234)</i> | Permit/Record ID <i>(i.e. DEH2002-HUPFP-123456)</i> |

II. CERS USERS TO BE GRANTED ONLINE ACCESS FOR ACCESS REQUESTS ONLY- FILL OUT SECTIONS I, II, & VII

The two users designated below will be granted access to this facility in the online California Environmental Reporting System (CERS). These lead users must create a unique user account and log in to CERS to submit required reporting elements. Once submitted, lead users will be notified via email on the status of the submittal. New permits are typically issued after an initial inspection is conducted and only after your inventory has been accepted in CERS.

Definitions/Glossary

Client: County of San Diego
Project/Site: Lyon Technologies Inc.

Job ID: 440-262156-1

Qualifiers

Metals

| Qualifier | Qualifier Description |
|-----------|--|
| B | Compound was found in the blank and sample. |
| F1 | MS and/or MSD recovery exceeds control limits. |
| F2 | MS/MSD RPD exceeds control limits |

Glossary

| Abbreviation | These commonly used abbreviations may or may not be present in this report. |
|----------------|---|
| □ | Listed under the "D" column to designate that the result is reported on a dry weight basis |
| %R | Percent Recovery |
| CFL | Contains Free Liquid |
| CNF | Contains No Free Liquid |
| DER | Duplicate Error Ratio (normalized absolute difference) |
| Dil Fac | Dilution Factor |
| DL | Detection Limit (DoD/DOE) |
| DL, RA, RE, IN | Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample |
| DLC | Decision Level Concentration (Radiochemistry) |
| EDL | Estimated Detection Limit (Dioxin) |
| LOD | Limit of Detection (DoD/DOE) |
| LOQ | Limit of Quantitation (DoD/DOE) |
| MDA | Minimum Detectable Activity (Radiochemistry) |
| MDC | Minimum Detectable Concentration (Radiochemistry) |
| MDL | Method Detection Limit |
| ML | Minimum Level (Dioxin) |
| NC | Not Calculated |
| ND | Not Detected at the reporting limit (or MDL or EDL if shown) |
| PQL | Practical Quantitation Limit |
| QC | Quality Control |
| RER | Relative Error Ratio (Radiochemistry) |
| RL | Reporting Limit or Requested Limit (Radiochemistry) |
| RPD | Relative Percent Difference, a measure of the relative difference between two points |
| TEF | Toxicity Equivalent Factor (Dioxin) |
| TEQ | Toxicity Equivalent Quotient (Dioxin) |

Accreditation/Certification Summary

Client: County of San Diego
Project/Site: Lyon Technologies Inc.

Job ID: 440-262156-1

Laboratory: Eurofins Calscience Irvine

Unless otherwise noted, all analytes for this laboratory were covered under each accreditation/certification below.

| Authority | Program | Identification Number | Expiration Date |
|------------|---------|-----------------------|-----------------|
| California | State | 2706 | 06-30-20 |

The following analytes are included in this report, but the laboratory is not certified by the governing authority. This list may include analytes for which the agency does not offer certification.

COMPLIANCE INSPECTION REPORT

DATE 8/07/96

PAGE 2 OF 2

BUSINESS ADDRESS: 1670 Broadway Brandywine, Chula Vista CA 91911

VIOLATION REPORT: The items checked below refer to specific section numbers of Titles 19/22/23 of the California Code of Regulations (CCR), Chapters 6.5, 6.7, 6.95 of the Health and Safety Code (HSC), and/or the San Diego County Code (SDCC).

I HAZARDOUS WASTE REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.905
No EPA Identification Number 68262.12
Waste Manifests/Receipts not on-site for 3 years 68262.40
Manifest not properly completed 68262.23
Manifest copy not sent to CAL-EPA 68262.23
TSDF signed-manifest not on-site 68262.40
Biennial report not sent to CAL-EPA 68262.41
LDR Documentation not available 68268.7
Exception Rpt. not filed with CAL-EPA 68262.42
Operating TSDF without authorization 25201

V0116 W
V0124 W

STORAGE AND HANDLING

- Waste stored longer than 90 days 68262.34
Waste container missing/improperly labeled 68262.34
Haz Materials not properly labeled 25124
Waste container not kept closed 68265.173
Waste container in poor condition 68265.171
Waste container(s) not properly managed 68265.173
Damaged container not repackaged 68265.171
Container incompatible with waste 68265.172
Incompatibles in the same container 68265.177
Incompatibles not stored separately 68265.177
Ignitable Wastes less than 50 feet 68265.176
Ignitable Wastes not grounded 68265.31
Storage area not inspected weekly 68265.174

MONITORING REQUIREMENTS (DOUBLE WALL)

- Monitoring system not functional 2632
No written monitoring procedure 2632
Written response plan not available 2632
Spill/Overfill equip. not maintained or installed 2635

- V3026 T
V3027 T
V3028 T
V3029 T

RELEASE REPORTING

- Failure to report an unauthorized release 25295
Release record log not available 2651, 2650
No leak report/investigation/action 2652

- V3009 T
V3030 T
V3031 T

CLOSURE

- Temporary closure req. not completed 2671
Abandoned tank not properly closed 25298
Permanent closure req. not completed 2672

- V3006 T
V3032 T
V3033 T

III HAZARDOUS MATERIALS BUSINESS PLAN REQUIREMENTS:

RECORD KEEPING

- Health Permit not obtained SDCC 68.1105
Business Plan not established/implemented 25503.5
Business Plan not submitted to HMMMD 25505
Business Plan not amended 25505
Personnel Training Records not available 2732

- V2001 W
V2002 W
V2007 W
V2003 W
V2302 W

RELEASE REPORTING

- Failure to report a release/threatened release 25507

- V2008 W

BUSINESS PLAN ELEMENTS

- Emergency Response Plan inadequate 25504
Emergency Contacts not provided/current 25509
Personnel Training Program inadequate 25504
Inventory is incomplete 25504
Site Map is not sufficient 25509
Acutely Haz. Mat. not registered 25533

- V2201 W
V2203 W
V2301 W
V2005 W
V2202 W
V2009 W

An inspection summary report will be mailed shortly. All violations must be corrected. Please call (619) 338-2222 if you have any questions.

RÉSUMÉS

ALLISON O'NEAL

Education

BS – Geology, Humboldt State University, Arcata, 2018

Specialty Certifications

40-Hour OSHA EPA-Approved Hazardous Waste Operations & Emergency Response (HAZWOPER) Training

Professional Affiliation

San Diego Association of Geologists – Member

Professional Experience

Ms. O'Neal is an environmental professional with specialized experience in site assessment, subsurface investigation, and due diligence reporting. She is responsible for performing site reconnaissance, reviewing regulatory agency records and historical documents, interpreting evidence related to historical land use, monitoring soil management, collecting data (soil, groundwater, soil vapor sampling, etc.), and generating maps for soil boring/well logs, groundwater gradients, and hydrocarbon iso-concentrations. She also oversees drilling and groundwater monitoring well installations, writes reports for Phase I and II Environmental Site Assessments (ESAs), and ensures that groundwater monitoring reports meet regulatory agency standards.

Her project experience is summarized below.

Mission Village Shopping Center, Former Dry Cleaning Facility, San Diego, CA. Ms. O'Neal conducted soil and groundwater assessments to determine the attenuation of a plume of constituents of concern while meeting requirements of the Department of Environmental Health. She oversaw six well installations that included properly documenting well log data. She also assisted with the technical writing of the Subsurface Assessment Report, and created groundwater gradient and constituents of concern iso-concentration maps.

Villa de Vida Project, Special Needs Residential Community, Phase I and II ESA, San Diego, CA. Ms. O'Neal performed a Phase I ESA on the property and analyzed the status of potential Recognized Environmental Concerns (RECs), such as a release from on-site underground storage tanks (USTs) (the tanks were used when the site was a Public Works Road Station). The Phase I ESA recommended a subsurface site assessment because of the close proximity to the former USTs. During the Phase II investigation, soil samples detected elevated concentrations of petroleum hydrocarbons. Ms. O'Neal oversaw excavation of the contaminated soil and collected soil confirmation samples at the edges of the excavation.

Former Country Hills Dry Cleaners, In Situ Chemical Reduction Feasibility Study, Diamond Bar, CA. Ms. O'Neal oversaw drilling and direct push injection of the appropriate amendments to remediate constituents of concern associated with a former dry cleaner at the site. She created

boring logs, collected waste characterization samples, and helped manage site safety. In addition, she assisted in obtaining the regulatory permits required for the site from the City of Diamond Bar.

Community HousingWorks San Marcos, Affordable Housing Development, Phase I and II ESAs, San Marcos, CA. Ms. O'Neal performed a Phase I ESA on the property and analyzed the status of RECs, such as a release from a dry cleaning facility adjacent to the site. After completing the Phase I ESA, SCS recommended a subsurface assessment regarding a historically documented release of constituents of concern. During the Phase II investigation, Ms. O'Neal organized the utility mark-out, mapped boring locations, and oversaw the installation and retrieval of soil vapor samples that were collected. She wrote technical reports for both phases of the environmental investigation.

Clairemont Village Shopping Center, Phase I ESA, San Diego, CA. Ms. O'Neal completed a Phase I ESA investigation that included extensive historical research on several automotive repair facilities adjacent to the site, and historic releases from a former gas station and dry cleaning facility also on site. In addition, the client required asbestos, radon, lead-based paint, and mold inspections at the property, using their specific guidance. After completing the Phase I ESA, SCS recommended additional soil vapor sampling in the areas of the former dry cleaner and gas station.

LUKE MONTAGUE, PG

Education

MS – Environmental Science and Management, University of California, Santa Barbara, 2004
 BS – Geology, University of California, Santa Barbara, 1998

Luke Montague, PG

Professional Licenses

Professional Geologist – California (No. 8071)
 General Building Contractor, B Classification – California (No. 981618)

Specialty Certifications

Occupational Safety and Health Administration (OSHA) Hazardous Waste Operations and Emergency Response (HAZWOPER) 40-Hour Training
 Real Estate Entitlement, Development, and Design, University of San Diego, 2010
 Real Estate Finance, Investments, and Development, University of San Diego, 2010

Professional Experience

Mr. Montague is a Professional Geologist (PG) and licensed contractor with a Masters in Environmental Science and Management, with 15 years of experience in environmental consulting, and 4 years of experience in general contracting and development for commercial and residential developments. He has performed and reviewed over 500 Phase I Environmental Site Assessments (ESAs), and has completed and overseen a large amount of Phase II subsurface investigations, Human Health Risk Assessments (HHRAs), Remedial Action Plans (RAPs), and site remediation activities. Luke also has two additional years of experience performing other consulting services including geotechnical investigations, asbestos and lead-based paint (LBP) surveys, and asbestos air monitoring. His development, general contracting, and property and asset management experience includes managing construction through lease-up; lease administration and property operations and maintenance; contract procurement and administration; oversight of subcontractors and staff; and interfacing with clients, owners, tenants, and regulatory agencies.

Mr. Montague's project experience is summarized below.

Manchester Financial Group, Redevelopment of Eight City Blocks for the Manchester Pacific Gateway Project, San Diego, CA. As Project Manager, he oversaw assessment and construction remedial planning involving soil excavation and export of up to 800,000 cubic yards of soil on land owned by the Department of the Navy. Soil export is to accommodate the construction of two levels of subterranean parking across eight city blocks located adjacent to San Diego Bay, which are currently being redeveloped into office, hotel, retail, park, and other uses. Remedial construction activities are anticipated to be completed by mid-2019.

Rincon Band of Luiseno Indians, Due Diligence Services for Tribal Properties, Valley Center, CA. Mr. Montague has served as a Project Manager on Phase I and II ESAs supporting the due diligence process of various properties for the Tribe. He also served as an expert witness in tribal court

regarding the Tribe's oversight of a property within the Reservation, in support of protecting Tribal resources that included soil and groundwater.

Frontera Real Estate, Redevelopment of Former County Road Station with Self-Storage Facility, Spring Valley, CA. Mr. Montague served as Project Manager overseeing the assessment, remedial planning, and remediation consisting of oversight, segregation, and on-site burial of residual petroleum hydrocarbon (PHC)-impacted soils from a former unauthorized release of gasoline from underground storage tanks (USTs) previously operated by a County Road Station.

Brixton Capital, Gasoline Service Station Redevelopment with Retail Buildings, Chula Vista, CA. As Project Manager, Mr. Montague oversaw the assessment, remedial planning, and remediation consisting of oversight, segregation, and on-site burial of residual PHC-impacted soils from a former gasoline service station release property redeveloped with new retail buildings.

RD Brown Company, Leaking Underground Storage Tank (LUST) Case Assessment and Remediation, City of Imperial, CA. As Project Manager, Mr. Montague oversaw several on- and off-site soil, soil vapor, and groundwater assessments, and is currently overseeing ongoing remediation and monitoring of a proposed senior living facility at a former gasoline service station.

San Diego County Water Authority (SDCWA), Environmental Consulting Services, San Diego, CA. As Project Manager, Mr. Montague completed several ESAs and subsurface assessments to assist the SDCWA in obtaining easements required to complete the Carlsbad Desalination Project.

City of Encinitas, Site Investigation and Planning, Encinitas Community Park, Encinitas, CA. As Project Geologist, Mr. Montague provided oversight for mitigation and monitoring activities involving pesticides in soil from the Hall Property, which consists of 43 acres of coastal bluff that was formerly used as a nursery and was redeveloped into a community park. Under the oversight of the County of San Diego Department of Environmental Health (DEH), work consisted of Phase II ESAs, remedial planning and implementation of on-site reuse/burial of 45,000 cubic yards of pesticide-impacted soil in a Soil Management Zone, and creation of a land-use covenant. SCS received an award for this project with the Industrial Environmental Association (IEA).

Los Angeles Unified School District (LAUSD), Assessment and Remediation, Various Locations in Los Angeles County, CA. Mr. Montague managed and performed the environmental characterization and cleanup of various proposed school redevelopment projects overseen by the California Department of Toxic Substances Control (DTSC) that required Phase I ESAs, preliminary environmental assessments or subsurface investigations, and preparation and implementation of removal action work plans to obtain "no further action" status prior to redevelopment.

City Heights Revitalization Corporation, Brownfields Assessment and Remediation, City Heights, CA. Mr. Montague managed a subsurface investigation for an entire Brownfields city block planned for redevelopment. The investigation included extensive drilling, trenching, and hand auguring to estimate the volume of lead- and hydrocarbon-impacted soil from residual contamination from a former service station and from lead-based paint. Work also included negotiation of cleanup levels with the local regulatory agency.

Casmalia Steering Committee, Remedial Investigation, Casmalia, CA. Mr. Montague managed and performed soil vapor sampling at the Casmalia Hazardous Waste Management Facility, a Class I hazardous waste site, for a remedial investigation and feasibility study of soil gas impacts submitted to the U.S. Environmental Protection Agency (U.S. EPA). Soil gas impacts to ecological receptors were assessed, considering specific regulatory guidance, including the joint DTSC and Los Angeles Regional Water Quality Control Board (LARWQCB) Advisory on Active Soil Gas Investigations.

The Boeing Company, UST Assessment, Long Beach, CA. Mr. Montague performed subsurface vapor intrusion to indoor air analysis at a former aeronautics manufacturing facility. Soil, soil vapor, and sub-slab soil vapor extraction (SVE) assessments were conducted to determine appropriate corrective actions associated with former solvent USTs. Work was performed under the corrective action consent agreement with the DTSC.

Trihydro Corporation, Soil Vapor Sampling, Hooven, OH. Mr. Montague performed SVE sampling from indoor air probes and outdoor multi-level probes at residences in Hooven, OH. This project focused on helping to evaluate the potential for subsurface vapor intrusion to indoor air from volatilization of PHCs in groundwater, or light, non-aqueous phase liquid petroleum product originating from an adjacent former fuel and asphalt petroleum refinery. The vapor intrusion pathway was evaluated based on a request by the U.S. EPA, Region V, and was performed in accordance with the EPA-issued document, Draft Guidance for Evaluating the Vapor Intrusion to Indoor Air Pathway from Groundwater and Soil, 2002.

CSK Auto, Phase I ESAs, Various Sites in the Western U.S. Mr. Montague conducted Phase I ESAs, subsurface investigations, and geotechnical investigations for the development of auto parts chain stores in the western U.S. Work included site investigations, drilling operations, and records research.

AT&T/Gianni & Associates, Phase I ESAs and Geotechnical Investigations, San Diego, CA. Mr. Montague completed Phase I ESAs, transaction screen assessments, National Environmental Policy Act (NEPA) reports, asbestos surveys, and geotechnical investigations involving the development of wireless communications sites.

Ford Mance Company, Construction and Property Management, Mixed-Use Building at 111 Chesterfield Drive, Encinitas, CA. Mr. Montague served as Project Manager during the development and construction phases of a 2-story, Type V, 3,874-square-foot mixed-use building with subterranean parking. Responsibilities included managing all phases of construction and shell and tenant improvements, and assisting in construction supervision activities and lease-up. Development activities included oversight and collaboration of architectural, mechanical, electrical, and plumbing plans preparation, assisting with design research and decisions, obtaining various permits, and preparing cost and budgets. After construction, Mr. Montague also served as the Property and Asset Manager.

Ford Mance Company, Construction and Property Management, Del Norte Medical Plaza, Carlsbad, CA. Mr. Montague served as Project Manager during the development and construction of a 2-story, Type II, medical building with subterranean parking. Responsibilities included contracting out all phases of shell construction of 22,000 square feet of rentable area for medical use, collaborative oversight concerning architectural, mechanical, electrical, and plumbing plans preparation, assisting with design research and decision-making, obtaining various permits, and preparing costs and budgets. After construction, he also served as Property and Asset Manager.

California Department of Fish and Game, Carpinteria Creek Watershed Plan, Carpinteria, CA. Mr. Montague collaborated with local and state government representatives, and various stakeholders, to aid in preparing the Carpinteria Creek Watershed Plan under the Cachuma Resource Conservation District for the California Department of Fish and Game (CDFG). Work consisted of research, meetings, various field assessments, report writing, and map creation. The Plan served as an amendment to the Water Quality Control Plan for the Central Coast Region.

Affordable Housing

San Diego Housing Commission, Phase I and II ESAs, San Diego, CA. As Project Manager, Mr. Montague oversaw the assessment of several sites that were redeveloped for affordable housing purposes.

Community HousingWorks, Phase I and II ESAs and Soil Mitigation, San Diego, CA. Mr. Montague was the Project Manager for several affordable housing developments, including working on San Diego's first LGBT senior housing project, where lead-bearing soil was safely buried or reused under building improvements during grading activities.

Mercy Housing Corporation, Phase I and II ESAs and Soil Mitigation, San Diego, CA. Mr. Montague managed the environmental assessment and cleanup portion of the redevelopment of a creek-front Poway site with a former LUST case into Villa de Vida, a home for adults with developmental disabilities. SCS investigated, identified, and remediated left-in-place impacted soil from several former LUSTs, as well as from lead-bearing soil.

BRIDGE Housing, Phase I and II Site Assessments, Southern California. Mr. Montague has managed several affordable housing projects that have included subsurface assessment and soil characterization, with soil mitigation planning and implementation to be completed at a later date.
