Good morning,

After reviewing the draft environmental document and Notice of Completion regarding the Carlotta Shoulder Widening Project, the Humboldt CHP Area expects the project to have a minimal to moderate impact on traffic in the area and minimal impact to CHP operations. The proposed widening will likely force the immediate construction area on State Route 36 to be mitigated by one-way traffic control measures. The one-way traffic control would need to be mitigated by either temporary, two-phase traffic lights or through the utilization of flaggers and a pilot vehicle system. Although through traffic on State Route 36 is typically light, logging trucks and local residents will feel an impact during the construction period.

As the project timeframe approaches, the Humboldt CHP Area request notification of any changes in the expected impact from the lead agency (DOT) and advisement if reimbursable contracts with CHP will be needed.

Thank you,

Sergeant Gabriel Parker
