**CITY OF CHICO
NOTICE OF INTENT TO ADOPT A
MITIGATED NEGATIVE DECLARATION**

October 18, 2022

NOTICE IS HEREBY GIVEN that the City of Chico Community Development Director intends to adopt a Mitigated Negative Declaration for the project described below. The project will be approved administratively unless referred to the City Council for action.

Notre Dame Blvd. Bridge Project (Capital Project No. 50453) – The Project will construct a new bridge to connect the existing sections of Notre Dame Boulevard over Little Chico Creek. The new structure will accommodate two 12-foot travel lanes separated by a 6-foot-wide center median, eight-foot bike lanes, a five-foot sidewalk on the west side and an eight-foot multi-use path on the east side. The new bridge is anticipated to be a multi-span structure, approximately 100 feet long and 56 feet wide. The structure type is expected to be a three-span, cast-in-place, reinforced concrete bridge with 30-degree skew, a 2.0% Cambered 20" thick concrete deck, and will include rock slope protection at the banks under and adjacent to the bridge. In addition to the bridge, the existing bike path on the south side of the creek will be re-routed to a new bridge undercrossing and connect to the multi-use path crossing the bridge. Construction of the bridge will involve excavation for and construction of concrete abutments and piers, founded on either spread footings or deep foundation. Other temporary work within Little Chico Creek includes falsework erection and removal, and installation of scour countermeasures at the support locations. Little Chico Creek is a seasonal creek and construction is anticipated to proceed without the need for a temporary water diversion system. Construction of the roadway approaches will involve the removal and realignment of a portion of the existing bike path on the south bank. The approach roadway will tie into the existing curb, gutter, and sidewalk on the north and south portions of Notre Dame Boulevard. Approach roadway work will include both median and parkway landscape per city standards as well as street lighting and public utility extensions crossing the creek.

Questions regarding the environmental review for this project should be directed to Tracy R. Bettencourt, AICP – Regulatory and Grants Manager, Public Works – Engineering Department, who can be reached at (530) 879-6903 or via email at tracy.bettencourt@chicoca.gov.

An Initial Study for environmental review has been prepared for the project. Based upon the information within the Initial Study, the Public Works – Engineering Department is recommending that a Mitigated Negative Declaration be adopted for the project pursuant to the California Environmental Quality Act (CEQA). A Mitigated Negative Declaration is a determination that a project will not have a significant impact on the environment after the incorporation of specific mitigation measures. A 30-day public review period is being conducted on the Draft Initial Study / Proposed Mitigated Negative Declaration (IS/MND) commencing on **Tuesday, October 18, 2022, and ending at 5:00 p.m. on Thursday, November 17, 2022**. The document as well as all applicable technical appendices may be reviewed at the City's website at: <https://chico.ca.us/post/notre-dame-bridge>.

Comments relating to environmental concerns and the proposed Mitigated Negative Declaration must be filed in writing to the City of Chico Public Works - Engineering Department, P.O. Box 3420, Chico, CA 95927 or sent via email to tracy.bettencourt@chicoca.gov during the designated time period.
