Re: Record Search Results for the Property Located at 2000 Stadium Way

The South Central Coastal Information Center received your records search request for the project area referenced above, located on the Hollywood and Los Angeles, CA USGS 7.5' quadrangles. The following summary reflects the results of the records search for the project area and a ½-mile radius. The search includes a review of all recorded archaeological and built-environment resources as well as a review of cultural resource reports on file. In addition, the California Points of Historical Interest (SPHI), the California Historical Landmarks (SHL), the California Register of Historical Resources (CAL REG), the National Register of Historic Places (NRHP), the California State Built Environment Resources Directory (BERD), and the City of Los Angeles Historic-Cultural Monuments (LAHCM) listings were reviewed for the above referenced project site and a ¼-mile radius. Due to the sensitive nature of cultural resources, archaeological site locations are not released.

RECORDS SEARCH RESULTS SUMMARY

Archaeological Resources* (*see Recommendations section)	Within project area: 0 Within project radius: 0
Built-Environment Resources	Within project area: 30 Within project radius: 24
Reports and Studies	Within project area: 0 Within project radius: 17
OHP Built Environment Resources Directory (BERD) 2019	Within project area: 40 Within ¼-mile radius: 19
California Points of Historical Interest (SPHI) 2019	Within project area: 0 Within ¼-mile radius: 0
California Historical Landmarks (SHL) 2019	Within project area: 0 Within ¼-mile radius: 0
California Register of Historical Resources (CAL REG) 2019	Within project area: 33 Within ¼-mile radius: 0
National Register of Historic Places (NRHP) 2019	Within project area: 0 Within ¼-mile radius: 0

City of Los Angeles Historic-Cultural Monuments (LAHCM)	Within project area: 1 Within ¼-mile radius: 3
--	---

HISTORIC MAP REVIEW - Pasadena, CA (1900) and Santa Monica, CA (1902, 1921) 15' USGS historic maps indicate that in 1900 and 1902 there was no visible development within the project area. There were several roads, buildings and one intermittent stream within the project search radius which was located within the historic place name of Elysian Park. An unnamed rail line ran through the western portion of the project search radius. In 1921, there were several more roads and buildings within the project search radius. The previously mentioned stream and rail line were no longer visible.

RECOMMENDATIONS

*When we report that no archaeological resources are recorded in your project area or within a specified radius around the project area; that does not necessarily mean that nothing is there. It may simply mean that the area has not been studied and/or that no information regarding the archaeological sensitivity of the property has been filed at this office. The reported records search result does not preclude the possibility that surface or buried artifacts might be found during a survey of the property or ground-disturbing activities.

The subject property has not been surveyed for archaeological resources; therefore, the archaeological sensitivity of the project site is unknown. However, the property does contain several recorded built-environment resources that are listed on the California Register of Historical Resources and eligible for the National Register of Historic Places. The effect of the project on these recorded resources should be studied prior to the approval of project plans. Changes to the property may substantially alter the character and integrity of the property and could affect its current or future eligibility. A qualified consultant could be retained to assist you with any additional cultural resource requirements.

For your convenience, you may find a professional consultant**at www.chrisinfo.org. Any resulting reports by the qualified consultant should be submitted to the South Central Coastal Information Center as soon as possible.

**The SCCIC does not endorse any particular consultant and makes no claims about the qualifications of any person listed. Each consultant on this list self-reports that they meet current professional standards.

If you have any questions regarding the results presented herein, please contact the office at 657.278.5395 Monday through Thursday 9:00 am to 3:30 pm. Should you require any additional information for the above referenced project, reference the SCCIC number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Thank you for using the [California Historical Resources Information System](#),

Isabela Kott
Assistant Coordinator, GIS Program Specialist

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.
