Project Description (Proposed actions, location, and/or consequences).

The proposed program is a Vehicle Miles Traveled (VMT) Exchange Program (program) – a voluntary program in which discretionary development applicants can participate to reduce the amount of VMT generated by their projects. The program will also provide applicants with the option to reduce potentially significant VMT impacts identified through the California Environmental Quality Act (CEQA) review process by constructing specified VMT-reducing projects that have been identified by the City. The program will provide applicants with the option to implement early action exchange program projects, which include pedestrian network, bicycle network, and transit supportive improvements that are located within existing developed rights of way in Escondido city limits.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Based on the findings of the Initial Study, the City of Escondido has concluded that the program would not result in any significant or potentially significant effects on the environment. Therefore, no mitigation measures are proposed.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known areas of controversy regarding the proposed program.

Provide a list of the responsible or trustee agencies for the project.

No responsible or trustee agencies have been identified for the proposed program.
