Violation Date: 04-05-2018
Citation: 23 CCR 16 2715(c) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)
Violation Description: Failure to comply with one or more of the following designated operator (DO) monthly inspection requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(f)(2).
Violation Notes: Returned to compliance on 05/10/2018. OBSERVATION: THE LAST EMPLOYEE TRAINING WAS LOGGED AS 4/7/2016. WAS UNABLE TO FIND ANY OTHER PROOD OF CURRENT TRAINING DURING ON-SITE DOCUMENT REVIEW. CORRECTIVE ACTION: EMPLOYEES MUST BE TRAINED ANNUALLY. PROVIDE PROOF OF DESIGNATED OPERATOR SIGNED TRAINING TO OUR DEPARTMENT, OF EMPLOYEES THAT ARE PAST DUE. INCLUDE NAMES AND DATES TRAINED ON LIST.

Violations:

Site ID: 398643
Site Name: ONTARIO MUNI YARD
Violation Date: 08-15-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: Returned to compliance on 11/04/2019. OBSERVATION: The site map uploaded into CERS is missing the following requirements: evacuation staging area and adjacent streets. CORRECTIVE ACTION: Submit an accurate and complete site map into CERS. 11/4/19 CERS Site maps completed and uploaded. Violation corrected. PS

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 398643
Site Name: ONTARIO MUNI YARD
Violation Date: 07-10-2014
Citation: HSC 6.7 25286(a) - California Health and Safety Code, Chapter 6.7, Section(s) 25286(a)

Violation Description: Failure to submit an complete and accurate application for a permit to operate an underground storage tank, or for renewal of the permit.

Violation Notes: Returned to compliance on 08/27/2014. No UST elements have been uploaded into CERS. Within 30 days, upload all elements to the website. Use the existing hardcopy information in the UST binder to populate required UST elements. Contact the CERS helpline at 909 386-8432 for questions regarding input into the CERS database or make an appointment with a UST inspector for questions regarding tank construction and monitoring. Upload required information and return signed Certificate of Compliance as documentation that these violations have been corrected.

Violation Division: San Bernardino County Fire Department
Violation Program: UST

Citation: 23 CCR 16 2715(i) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(i)
Violation Description: Failure to have a properly qualified service technician test leak detection equipment as required every 12 months (vapor, pressure, hydrostatic (VPH) system, sensors, line-leak detectors (LLD), automatic tank gauge (ATG), etc.).
Violation Notes: Returned to compliance on 10/21/2016. UPDATE: THE FAILED SENSOR WAS REPLACED WHILE ON-SITE TO VERIFY OPERABILITY. SENSOR DID NOT REGISTER AN ALARM AT THE PANEL PER REVIEW OF THE ALARM HISTORY; RE-TEST REVEALED THAT THE SENSOR WAS DEFECTIVE. THE NEW SENSOR WAS CERTIFIED DURING THE RE-TEST. -JK OBSERVATIONS: BASED ON REVIEWING THE ALARM HISTORY PRINTOUT FROM 9/15/2016, WHICH WAS ATTACHED TO THE DO REPORT, THE L10 SENSOR FOR THE WASTE OIL SUMP WAS NOT TESTED DURING THE MONITORING TEST ON 7/5/2016. THE LAST ALARM SHOWN FOR THE SENSOR WAS 7/7/2015, WHICH WAS THE DATE OF LAST YEAR'S MONITORING CERTIFICATION TEST. COMPLIANCE REQUIREMENT: SCHEDULE WITH OUR DEPARTMENT TO CONDUCT A WITNESSED TEST OF THE L10 SENSOR IN THE WASTE OIL SUMP. IF THERE IS PROOF THAT THE SENSOR WAS TESTED DURING THE TESTING CONDUCTED ON 7/5/2016, THEN DOCUMENTATION MUST BE PROVIDED TO OUR DEPARTMENT BY 10/10/2016.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 08/06/2020. OBSERVATION: The Overfill Prevention Equipment inspection should have been conducted beginning in October 2018. There was no record of the Overfill Prevention Equipment testing having been done in 2018-2019. CORRECTIVE ACTION: The Overfill Prevention Equipment inspection was conducted on 08/06/2020. Violation abated.

Site Name: ONTARIO MUNI YARD
Violation Date: 07-10-2014
Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715
Violation Description: Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.
Violation Notes: Returned to compliance on 07/10/2014. -Designated Operator G RY Rodriguez - 1 liquid alarm in last 12 months. L11 Waste Oil Overfill alarm occurred June 3, 2014. Alarm failed to be noted on Designated Operator Monthly Report. No documentation onsite. Ensure that all alarms are recorded and corrective action indicated. This item to be re-evaluated during monitoring inspection next year. Discussed concern with DO. DO discussion and confirmation of compliance as basis to clear violation

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order
 should cause a relatively minor impairment of beneficial uses compared
 to a major or minor threat. Not: All nurds without a TTWQ will be
 considered a minor threat to water quality unless coded at a higher
 Level. A Zero (0) may be used to code those NURDS that are found to
 represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as
 cooling water dischargers or thosewho must comply through best
 management practices, facilities with passive waste treatment and
 disposal systems, such as septic systems with subsurface disposal, or
 dischargers having waste storage systems with land disposal such as
 dairy waste ponds.

Eval Notes: SWPPP dated 2013 was available for review. The facility is in the process of re-certifying their site themselves and updating the SWPPP. They have already set-up their account and just waiting on completion of the site map and SWPPP update before recertifying. Shift was ending and in process of cleaning up at the end of the shift when inspected. Observed sweeper running in the back area of the facility. Site looked relatively clean.

Violations:

Site ID: 57890
Site Name: PRC Composites LLC
Violation Date: 07-20-2015
Citation: HSC 6.95 25508.1(a)-(e) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(e)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name.

Violation Notes: Returned to compliance on 08/14/2015. The facility operator has updated the facility information page of the business plan. The inventory section, tiered permit section, and plans section must still be updated. Mr. Cavanaugh stated he was in the process of updating these sections.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 57890
Site Name: PRC Composites LLC
Violation Date: 07-25-2018
Citation: HSC 6.5 25201.5(d)(5) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(5)

Violation Description: Failure to prepare, implement, and maintain onsite, for three years at the facility, a treatment system inspection program and log of inspections conducted.

Violation Notes: Returned to compliance on 08/23/2018. OBSERVATION: The Owner/Operator failed to maintain records for inspecting the hazardous waste treatment system for three years. The generator shall prepare and maintain a written inspection schedule and log of the inspections conducted for the hazardous waste treatment system onsite for three years. CORRECTIVE ACTION: Ensure that a written inspection schedule is prepared and a log of the inspections conducted are maintained onsite for three years for the hazardous waste treatment system. Submit supporting documentation that verifies compliance with these requirements to the CUPA.

Violation Division: San Bernardino County Fire Department
Violation Program: CE
Violation Source: CERS

Site ID: 57890
Site Name: PRC Composites LLC
Violation Date: 07-25-2018
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12

Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 09/26/2018. OBSERVATION: The generator generates more than 100 kg of RCRA hazardous waste per month and has not obtained a Federal EPA ID number to manage hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained a Federal EPA ID number.

Site Name: PRC Composites LLC
Violation Date: 07-25-2018
Citation: HSC 6.5 25201.5(d)(5) - California Health and Safety Code, Chapter 6.5, Section(s) 25201.5(d)(5)
Violation Description: Failure to prepare, implement, and maintain onsite, for three years at the facility, a treatment system inspection program and log of inspections conducted.
Violation Notes: Returned to compliance on 08/23/2018. OBSERVATION: The Owner/Operator failed to maintain records for inspecting the hazardous waste treatment system for three years. The generator shall prepare and maintain a written inspection schedule and log of the inspections conducted for the hazardous waste treatment system onsite for three years. CORRECTIVE ACTION: Ensure that a written inspection schedule is prepared and a log of the inspections conducted are maintained onsite for three years for the hazardous waste treatment system. Submit supporting documentation that verifies compliance with these requirements to the CUPA.
Violation Division: San Bernardino County Fire Department

Violation Source: CERS

Site ID: 57890
Site Name: PRC Composites LLC
Violation Date: 07-25-2018
Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.
Violation Notes: Returned to compliance on 09/26/2018. OBSERVATION: The generator generates more than 100 kg of RCRA hazardous waste per month and has not obtained a Federal EPA ID number to manage hazardous waste. CORRECTIVE ACTION: Submit documentation to the CUPA demonstrating that you have obtained a Federal EPA ID number.
Violation Division: San Bernardino County Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 57890
Site Name: PRC Composites LLC
Violation Date: 07-25-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 08/20/2018. OBSERVATION: The reported maximum daily amount for all inventory items does not reflect the quantities stored onsite and was not consistent with the inventory observed at the time of the inspection. CORRECTIVE ACTION: Submit an accurate and complete hazardous materials inventory into the California Environmental Reporting System (CERS).

CERS:

Name: LIGHTING RESOURCES, LLC
Address: 805 E FRANCIS ST
City,State,Zip: ONTARIO, CA 91761
Site ID: 130742
CERS ID: CAR000156125
CERS Description: Hazardous Waste

Violations:

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: A hazardous waste is generated from the disposal of a carbon filter on the air scrubber. Update CERS to add this hazardous waste item to the plan inventory. The site map does not show the current hazardous waste storage location. Update the map to show this location. The hazard classification for each inventory item was found to be obsolete. Updated to reflect the new federal hazard categories. CORRECTIVE ACTION: Submit an update to CERS and submit a signed certificate of compliance to indicate the corrections have been made.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The employee training documents provided during the inspection did not appear to meet the minimum large quantity generator training documentation requirements. Large quantity hazardous waste generators must retain written documentation of employee hazardous waste management training sessions which includes: G A written outline/agenda of the type and

S103672888

Citation: 2014-0057-DWQ - Industrial General Permit
Violation Description: SW - Late Report
Violation Notes: Failure to submit 2017-2018 Annual Report by 7/15/2018 due date.
Violation Division: Water Boards
Violation Program: INDSTW
Violation Source: SMARTS

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The site is not being maintained in a manner to prevent the release of a hazardous waste. Light tubes were observed to have been broken while in the outdoor storage area. These appear to have been damaged by equipment or personnel. Phosphor dust was found on the ground around the collection drum located outside the building. Take all necessary actions to prevent the release of these hazardous wastes to the environment. CORRECTIVE ACTION: Submit a statement indicating the measures taken to prevent the release of the mercury containing phosphor dust to the environment.

Eval General Type: Case Development Inspection
Eval Date: 09-22-2014
Violations Found: No
Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Annual report 2013-2014 certified non-compliance mail came back to the office as unclaimed. Regular mail went through without any issue. Email was sent to Mr. Daniel Gillespie on 9/16/2014, but no response was returned by site's business. Apparently, there was post office mailbox issues that was being dealt with during the time of the compliance letter mailing. However, it's unclear why the certified mail letter returned with the "Unclaimed" status. I visited the facility, and business was still in operation. I met up with Mrs. Susan Richard, the Chief Compliance Officer of the business, and briefly notified her about the outstanding annual report for the 2013-2014 reporting period. A copy of the certified letter was made, and the annual report submission date was extended to October 20, before 2nd Notice of Non-Compliance is sent. Overview of the site's operation was clean and well protected from storm water. Single compaction/bailer unit was outside, but will soon be under roof once permits have been approved. Most, if not all, recycling operation for lighting materials was done indoor. No violation was noted on site during inspection period.

Violations:

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: A hazardous waste is generated from the disposal of a carbon filter on the air scrubber. Update CERS to add this hazardous waste item to the plan inventory. The site map does not show the current hazardous waste storage location. Update the map to show this location. The hazard classification for each inventory item was found to be obsolete. Updated to reflect the new federal hazard categories. CORRECTIVE ACTION: Submit an update to CERS and submit a signed certificate of compliance to indicate the corrections have been made.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The employee training documents provided during the inspection did not appear to meet the minimum large quantity generator training documentation requirements. Large quantity hazardous waste generators must retain written documentation of employee hazardous waste management training sessions which includes: G A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.). G The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and G A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position. G Current employee records [Truncated]

Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The site is not being maintained in a manner to prevent the release of a hazardous waste. Light tubes were observed to have been broken while in the outdoor storage area. These appear to have been damaged by equipment or personnel. Phosphor dust was found on the ground around the collection drum located outside the building. Take all necessary actions to prevent the release of these hazardous wastes to the environment. CORRECTIVE ACTION: Submit a statement indicating the measures taken to prevent the release of the mercury containing phosphor dust to the environment.

office as unclaimed. Regular mail went through without any issue. Email was sent to Mr. Daniel Gillespie on 9/16/2014, but no response was returned by site's business. Apparently, there was post office mailbox issues that was being dealt with during the time of the compliance letter mailing. However, it's unclear why the certified mail letter returned with the "Unclaimed" status. I visited the facility, and business was still in operation. I met up with Mrs. Susan Richard, the Chief Compliance Officer of the business, and briefly notified her about the outstanding annual report for the 2013-2014 reporting period. A copy of the certified letter was made, and the annual report submission date was extended to October 20, before 2nd Notice of Non-Compliance is sent. Overview of the site's operation was clean and well protected from storm water. Single compaction/bailer unit was outside, but will soon be under roof once permits have been approved. Most, if not all, recycling operation for lighting materials was done indoor. No violation was noted on site during inspection period.

Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16

Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.

Violation Notes: Returned to compliance on 02/13/2019. **OBSERVATION:** The employee training documents provided during the inspection did not appear to meet the minimum large quantity generator training documentation requirements. Large quantity hazardous waste generators must retain written documentation of employee hazardous waste management training sessions which includes: G A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.). G The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and G A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position. G Current employee records [Truncated]

Eval Notes: Annual report 2013-2014 certified non-compliance mail came back to the office as unclaimed. Regular mail went through without any issue. Email was sent to Mr. Daniel Gillespie on 9/16/2014, but no response was returned by site's business. Apparently, there was post office mailbox issues that was being dealt with during the time of the compliance letter mailing. However, it's unclear why the certified mail letter returned with the "Unclaimed" status. I visited the facility, and business was still in operation. I met up with Mrs. Susan Richard, the Chief Compliance Officer of the business, and briefly notified her about the outstanding annual report for the 2013-2014 reporting period. A copy of the certified letter was made, and the annual report submission date was extended to October 20, before 2nd Notice of Non-Compliance is sent. Overview of the site's operation was clean and well protected from storm water. Single compaction/bailer unit was outside, but will soon be under roof once

Site ID: 130742
Site Name: LIGHTING RESOURCES, LLC
Violation Date: 01-14-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: A hazardous waste is generated from the disposal of a carbon filter on the air scrubber. Update CERS to add this hazardous waste item to the plan inventory. The site map does not show the current hazardous waste storage location. Update the map to show this location. The hazard classification for each inventory item was found to be obsolete. Updated to reflect the new federal hazard categories. CORRECTIVE ACTION: Submit an update to CERS and submit a signed certificate of compliance to indicate the corrections have been made.

Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.16 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.16
Violation Description: Failure to provide employees with hazardous waste training program of class room instructions or on-the-job training within the first six months after the date of their employment or assignment to a facility, or to a new position at a facility and annually thereafter. Training records on current personnel shall be kept until closure of the facility and for former employees the record shall be kept for at least three years from the date the employee last worked at the facility. The records shall include the following: the job title for each position at the facility related to hazardous waste management, and the name of the employee filling each job; a written job description for each position, duties of facility personnel assigned to each position, and a written description of the type and amount of both introductory and continuing training that will be given to each person filling a position.
Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The employee training documents provided during the inspection did not appear to meet the minimum large quantity generator training documentation requirements. Large quantity hazardous waste generators must retain written documentation of employee hazardous waste management training sessions which includes: G A written outline/agenda of the type and amount of both introductory and continuing training that will be given to persons filling each job position having responsibility for the management of hazardous waste (e.g., labeling, manifesting, compliance with accumulation time limits, etc.). G The name, job title, and date of training for each hazardous waste management training session given to an employee filling such a job position; and G A written job description for each of the above job positions that describes job duties and the skills, education, or other qualifications required of personnel assigned to the position. G Current employee records [Truncated]

Violation Date: 01-14-2019
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 02/13/2019. OBSERVATION: The site is not being maintained in a manner to prevent the release of a hazardous waste. Light tubes were observed to have been broken while in the outdoor storage area. These appear to have been damaged by equipment or personnel. Phosphor dust was found on the ground around the collection drum located outside the building. Take all necessary actions to prevent the release of these hazardous wastes to the environment. CORRECTIVE ACTION: Submit a statement indicating the measures taken to prevent the release of the mercury containing phosphor dust to the environment.

Eval Type: Industrial Storm Water Enforcement Follow-up
Eval Notes: Annual report 2013-2014 certified non-compliance mail came back to the office as unclaimed. Regular mail went through without any issue. Email was sent to Mr. Daniel Gillespie on 9/16/2014, but no response was returned by site's business. Apparently, there was post office mailbox issues that was being dealt with during the time of the compliance letter mailing. However, it's unclear why the certified mail letter returned with the "Unclaimed" status. I visited the facility, and business was still in operation. I met up with Mrs. Susan Richard, the Chief Compliance Officer of the business, and briefly notified her about the outstanding annual report for the 2013-2014 reporting period. A copy of the certified letter was made, and the annual report submission date was extended to October 20, before 2nd Notice of Non-Compliance is sent. Overview of the site's operation was clean and well protected from storm water. Single compaction/bailer unit was outside, but will soon be under roof once permits have been approved. Most, if not all, recycling operation for lighting materials was done indoor. No violation was noted on site during inspection period.

Street, Ontario, California 91761, in San Bernardino County at latitude 34 degrees 02' 30" and longitude 117 degrees 30' 15". The Facility is located in an area zoned for light industrial. The nearest residential zone is about 0.1 mile away. The owners of the facility are Lighting Resources, LLC at 805 East Francis Street, Ontario, California 91761; and Thumos, LLC, 4054 Mission Boulevard, Montclair, California 91763. LRL has been operating under a Standardized Hazardous Waste Facility Permit, Series A, issued June 24, 1996, which authorized LRL to operate as an off-site hazardous waste treatment and storage facility. LRL, which is also a registered hazardous waste transporter, collects and transports spent fluorescent lamps, High Intensity Discharge (HID) lamps, other spent mercury-containing lamps, mercury-containing instruments (e.g. manometers) and intact PCB-containing lighting ballasts to its Facility. The collection of mercury-containing instruments is incidental to the primary lamp recycling operations. LRL also accepts the above described wastes from other transporters. The hazardous waste management activities occur mainly inside a warehouse building, storage trailers, and paved area outside of the warehouse building. PERMITTING REGULATORY DESCRIPTION/HISTORY The first permit was issued in 1996 and renewed once in 2007. The current permit will expire in 2017. Since the permit was issued in 2007, LRL has made no permit modifications. Six units are regulated under this permit. (1) Lamp Machine (treatment) The Lamp Machine is a demanufacturing machine into which lamps are manually fed. Fluorescent lamps are allowed to enter the system at a rate of up to one per second, up to a maximum of 32,000 lamps per day. (2) HID Glove Box (treatment) This is

 Quarterly Update:

Lighting Resources LLC (LRL) originally operated under this EPA ID but the County of San Bernardino Fire Department requested LRL to change their ID in 2004. During the same time, they changed their name from Lighting Resources Inc to LLC so they made a Class 1 Permit Modification to reflect these changes and was issued a new permit with the updated name and EPA ID in 2005. Thus, this facility is being tracked under a new EPA ID # CAR000156125.

 Reclamation: Not reported
 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 388096
Site Name: BOMEL CONSTRUCTION CO INC
Violation Date: 02-10-2020

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 02/10/2020. OBSERVATION: At time of inspection, observed (1) 55 gallon drum of waste coolant in the hazardous waste storage area in the north end of the shop without a hazardous waste label. CORRECTED ON SITE: A complete hazardous waste label was added to the (1) 55 gallon drum of waste coolant located in the hazardous waste storage area in the north end of the shop at time of inspection.

Site Name: BOMEL CONSTRUCTION CO INC
Violation Date: 01-04-2017
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.

Violation Notes: Returned to compliance on 02/21/2017. Business Plan not submitted to CERS for annual review

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 388096
Site Name: BOMEL CONSTRUCTION CO INC
Violation Date: 02-10-2020
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 02/10/2020. OBSERVATION: At time of inspection, observed (1) 55 gallon drum of waste coolant in the hazardous waste storage area in the north end of the shop which was not listed on the hazardous materials inventory submitted via CERS on 3-1-2018. CORRECTIVE ACTION: Submit an updated hazardous materials inventory via CERS within 30 days. CERS ID 10036450.

CROWN PAPER CONVERTING (Continued)

S105090633

Site ID: 108980
Site Name: CROWN PAPER CONVERTING
Violation Date: 11-20-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 11/30/2019. OBSERVATION: At time of inspection, Business Activities page submitted via CERS on 6-17-2019 indicated this facility is a Hazardous Waste Generator. This information is inaccurate. CORRECTIVE ACTION: Submit a complete and accurate Business Activities page via CERS within 30 days.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 108980
Site Name: CROWN PAPER CONVERTING
Violation Date: 09-24-2013
Citation: HSC 6.95 25505(a) - California Health and Safety Code, Chapter 6.95, Section(s) 25505(a)
Violation Description: Owner/Operator failed to complete and/or submit a Hazardous Materials Business Plan when storing hazardous materials at or above the thresholds quantities of 55 gallons/500 lbs/200 cubic feet.
Violation Notes: Returned to compliance on 04/03/2017.
Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Click Here:

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: 6.95, Section(s) 25508(a)(1)
Failure to complete and electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 11/29/2016. This facility has not submitted the Business Plan elements into CERS. CERS ID 10044778.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 154045
Site Name: SKY SYSTEMS CO., INC.
Violation Date: 12-17-2019
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)

Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: Returned to compliance on 03/03/2020. OBSERVATION: Observed (5) 55-gallon drums of propylene glycol on site that was missing from the hazardous materials inventory via CERS. CORRECTIVE ACTION: Update the hazardous materials inventory via CERS by adding (5) 55-gallon drums of propylene glycol. Submit the completed Certificate of Compliance (CofC) to this Division indicating that the hazardous materials inventory has been updated.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS

Site ID: 154045
Site Name: SKY SYSTEMS CO., INC.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Characterization Report
Completed Date: 11/06/2006
Comments: The objective of the SI is to further assess the site for the possible presence of elevated concentrations of various chemical compounds at the site. This SI report describes site investigation activities performed to provide additional subsurface information to supplement previous environmental investigations performed at the Site. Based upon the results of the site investigation, the nature and extent of the contaminants have been delineated such that potential risks to human health and the environment can be conservatively assessed. DTSC's previous comments regarding the SI have been adequately addressed. Therefore, DTSC hereby approves the SI.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 08/27/1999
Comments: PAH-contaminated soil was removed from 3 adjacent residential properties located at 608, 614, & 624 Maitland Street. These properties are located across the street from the main site. Contamination has been remediated to background levels.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 04/13/1999
Comments: A Removal Action Work Plan for Operable Unit 2 was approved by DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 06/26/1998
Comments: REMOVAL ACTION and CERT: Removal of 17,000 cubic yards of PAH contaminated soil. Soil was transported to a licensed treatment and disposal facility. clean soil will be used to backfill and grade the site.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 05/22/1998
Comments: Removal Action Workplan. Removal of 4700 cubic yards of PAH contaminated soil. Soil will be transported to a licensed treatment and disposal facility. Clean soil will be used to backfill and grade the site.

Click Here:

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

CA BOND EXP. PLAN:

Responsible Party: RESPONSIBLE PARTY LEAD SITE CLEANUP WORKPLAN
 Project Revenue Source Company: Not reported
 Project Revenue Source Addr: Not reported
 Project Revenue Source City,St,Zip: Not reported
 Project Revenue Source Desc: The responsible party, Isaac Cohen and Son, Inc., is in compliance with an order. DHS has budgeted \$30,000 for oversight/monitoring of the RPs actions. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The RP will pay all costs of investigation and remediation.
 Site Description: Isaac Cohen and Son, Inc. has been in business for over 20 years collecting and recycling metals and batteries. Lead and sulfuric acid were recovered from used batteries and recycled.
 Hazardous Waste Desc: Hazardous wastes present onsite include sulfuric acid, lead, arsenic, and waste oil. It is estimated that 300 cubic yards of contaminated material is present onsite.
 Threat To Public Health & Env: A direct contact threat exists because of the proximity of the site to other businesses and residential areas. There is also a possibility of ground water contamination.
 Site Activity Status: The company has complied with past notices of violations issued by San Bernardino County Health Department and DHS. The responsible party has complied with a Section 25359.5 order to post and fence and secure the site. A RAO was issued in August, 1987. A RAP was approved by DHS on March 31, 1988 and is expected to be implemented by March, 1989.

Comments: The owner indicated that no changes had been made to the property within the last one year.

Completed Area Name: Doug Shand Property - 401293
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/18/2009
Comments: DTSC completed review of the PEA. DTSC determined that NFA is needed if a deed restriction is placed on the property. A Land Use Covenant restricting certain activities at the site has been recorded with the County of San Bernardino. Therefore, DTSC issued a NFA letter.

Completed Info:

Completed Area Name: Harrie Cohen Property
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/05/2007
Comments: DTSC issued NFA letter to these parcels.

Completed Area Name: Harrie Cohen Property
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 02/03/2005
Comments: DTSC approved PEA the Workplan.

Completed Area Name: Doug Shand Property - 401293
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Workplan
Completed Date: 05/18/2007
Comments: Not reported

Completed Area Name: Harrie Cohen Property
Completed Sub Area Name: Not reported
Completed Document Type: Operation and Maintenance Report
Completed Date: 02/25/2008
Comments: The owner indicated that no changes had been made to the property within the last one year.

Completed Area Name: Doug Shand Property - 401293
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 02/18/2009
Comments: DTSC completed review of the PEA. DTSC determined that NFA is needed if a deed restriction is placed on the property. A Land Use Covenant restricting certain activities at the site has been recorded with the County of San Bernardino. Therefore, DTSC issued a NFA letter.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

	Description:	The former Ontario Air National Guard Training Site consisted of 30.62 acres leased to the U.S. Air Force by the City of Ontario and 7.93 acres fee owned by the U.S. Air Force and leased to the California Air National Guard (CANG). It is on 1280 S. Tower Drive, Ontario, California. The site is located along the south-central border of Ontario International Airport. In 1985, the city of Ontario conveyed the entire airport to the City of Los Angeles, Department of Airports

(LADA). The site was included in that conveyance. By supplemental agreement dated 11 May 1988, 27.41 acres were deleted from the lease between the Air Force and the City of Los Angeles, reducing the size of the site. The Air Force still leases 3.21 acres from LADA and still owns 7.93 acres fee. This area is currently used by the California Air National Guard (CANG), 148th Combat Communications Squadron. This portion contains supply and administrative facilities and a motor pool, and is ineligible for consideration under DERP-FUDS. Since 1988, the eligible portion of the site has been leased to various tenants whom have used the hangar.

History: The site has been used as an airport and for Air National Guard training. The former Ontario Air National Guard Training Site is located on a small portion of the former Ontario Army Airfield (DERP Site No. J09CA053100). The U.S. Air Force acquired the site for the use of the CANG. The CANG used the site from 1949 to about 1980 for ANG flight training. The former ANG site was disposed of to the LADA in 1988. LADA has leased this area to various tenants whom have used the hangar located on this site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

Next Scheduled EDR Contact: 10/11/2021
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

East Map:	5620426 GUASTI, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

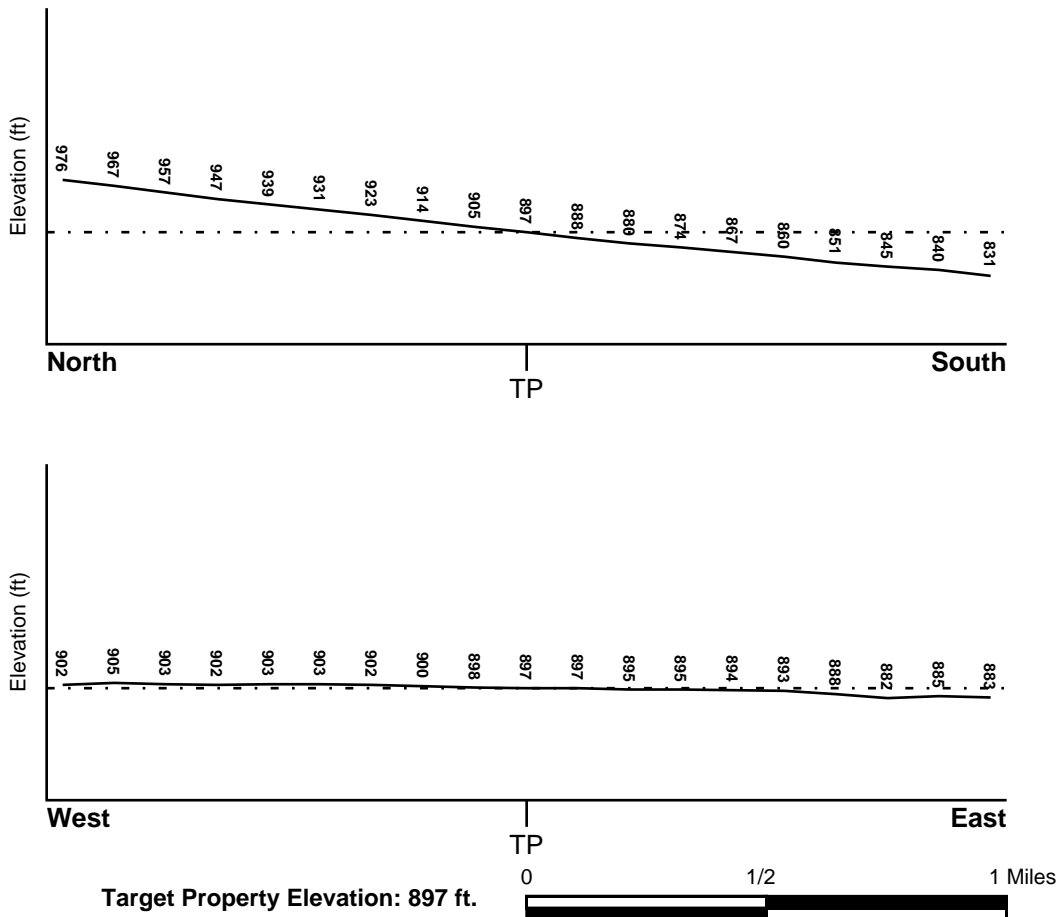

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06037C1750F	FEMA FIRM Flood data

06071C8636J	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ONTARIO	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: TUJUNGA

Soil Surface Texture: gravelly loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1
2	18 inches	59 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.8 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Ramboll were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

APPENDIX D
QUALIFICATIONS OF ENVIRONMENTAL
PROFESSIONALS

LEO REBELE

Principal

Mr. Rebele is a Principal in the Irvine office of Ramboll, with responsibilities that include business development, client liaison, senior oversight and execution on projects involving environmental site investigation, litigation, remediation, environmental permitting and natural resource management. Experience includes the following:

- Supported private industry for more than 25 years by delivering solutions to problems involving real estate due diligence, waterfront and brownfield redevelopment, transit-oriented development, and ports/harbors and watershed-related services. Project experience has been split between managing uplands projects focusing on property transfer/redevelopment and assisting private and port clients with aquatic-related environmental issues.
- Provided high-level strategic redevelopment consulting services to municipalities and private developers in connection with the transfer and redevelopment of contaminated real estate. Clients include residential, commercial and industrial developers, land owners, attorneys, and real estate brokers. Implementing cost recovery actions by providing environmental litigation support services; designing and implementing environmental liability transfer programs including guaranteed fixed-price remediation (GFPR) contracts.
- Provided environmental litigation support services in matters involving cost recovery actions against responsible parties. Deposition and trial experience including a landmark litigation case 3000 E. Imperial v. Robertshaw Controls et al. Routinely conducts environmental forensics analyses with a specialty in compound-specific isotope analysis (CSIA). Develops and applies multi-media video and animation for purposes of trial exhibits and mediation settlement discussions.
- Managed and supervised dozens of Phase I and II environmental site assessments (ESAs) and remediation projects throughout the western United States, Canada, and Mexico; assessed sites affected by landfill materials, chlorinated solvents, heavy metals, petroleum hydrocarbons (including free product), polychlorinated biphenyls (PCBs), and strong acids; prepared site conceptual models; performed remedial investigation/feasibility studies (RI/FSs); managed the completion of human health risk assessments; and evaluated remedial action alternatives under the Comprehensive

Environmental Response, Compensation, and Liability Act (CERCLA) and ensuring compliance with the National Contingency Plan (NCP). Regulatory negotiation/site closure experience with various jurisdictional offices of the Regional Water Quality Control Board (CRWQCB) and the California Department of Toxic Substances Control (DTSC), Orange County (California) Health Care Agency, the City and County Fire Departments of Los Angeles and the San Diego County of Environmental Health.

- Managed and provided oversight for projects involving natural resource management issues, including wetland evaluations and permitting, marine benthological studies, sediment and water quality monitoring, and underwater and eelgrass surveys. Experience has also included developing public outreach materials on behalf of private-sector clients, conducting resource mapping using Global Positioning System (GPS) software and geographic information system (GIS) technology.
- Served as program manager for several environmental impact assessments under National Environmental Policy Act (NEPA) and California Environmental Quality Act. Projects include environmental assessments (EAs) for proposed telecommunication sites on federal land, municipal well installations, private urban infill developments and mega-scale solar facilities located in Los Angeles County and San Bernardino County.

PROJECTS

2016-2017

Environmental Oversight

Mr. Rebele served as the principal-in-charge for the environmental oversight of a sewer line replacement in an area where groundwater impacted by chlorinated volatile organic compounds (cVOCs) associated with a State Superfund site may be encountered by city workers. The scope of work involves navigating concerns of a contentious community group and ensuring the protection of City workers through the development and implementation of a field monitoring program during sewer line construction activities.

2017

Due Diligence and Environmental Compliance Review

Mr. Rebele lead a due diligence and environmental compliance team in support of an acquisition of a 700-acre terminal in the Port of Los Angeles. The work involved a comprehensive assessment of current practices involving the use, storage and disposal of hazardous materials, compliance with air and stormwater regulations, and a review of historical spills and cleanup activities. A Phase I Environmental Site Assessment was conducted as part of the review. A review of California Environmental Quality Act (CEQA) permitting issues was also performed to evaluate the potential for terminal expansion onto an unoccupied portion of the facility.

2017-present

Pilot Testing and Support of Guaranteed Fixed Price Remediation Program

Mr. Rebele is heading a comprehensive site investigation and pilot test to evaluate a proposed groundwater and soil remediation strategy in support of a guaranteed fixed-price remediation (GFPR) strategy. The property, which is being sold to an industrial developer, is impacted by moderated levels of trichloroethylene and perchloroethylene in groundwater, with impacts extending off-site. Concentrations of chlorinated VOCs in soil vapor beneath the manufacturing facility were found to be very high, requiring immediate mitigation. Mr. Rebele is leading the project team to develop a groundwater remedy under a possible GFPR contract option while designing soil vapor extraction and vapor mitigation system that can be implemented in the short term.

2016-present

Implementation of Mitigation Monitoring, New Residential Development

Mr. Rebele served as principal-in-charge for a project involving implementing mitigation monitoring requirements for biological and cultural resources under California Environmental Quality Act (CEQA). Work included conducting ongoing monitoring for cultural and biological resources during disturbance of native soils during grading for a new residential development. Challenges included working with changing client schedules and interfacing with regulatory personnel to keep the project on-track on-schedule.

2016-present

Redevelopment of former ITT Site into new Industrial Complex

Lead consultant for a high-profile industrial redevelopment project in Santa Ana, California. The project involves assisting the prospective developer with the pre-bid due diligence during the seller's auction, evaluating seller's proposed remedial strategy in the context of the proposed development, performing Phase I and II environmental assessments, regulatory agency negotiation, and the design of a vapor mitigation system. Complexities in the due diligence activities include the integration of a polychlorinated biphenyl (PCB) cap into the proposed development and integrating the proposed electrical resistance heating/steam injection remedial program with client's development plans.

2016-2017

Implementation of Soil Management Plan and Soil Stockpile Profiling for Residential Development Project

Mr. Rebele served as client services manager for a project involving the redevelopment of a former foundry and iron works facility. The soils beneath the property were identified through a combined Phase I/II Environmental Site Assessment to be impacted with Cal-Hazardous levels of lead. A combination of field screening using a portable X-Ray Fluorescence (XRF) meter and confirmation soil sampling with formal laboratory analysis in order to profile soils to be exported and to establish residual concentrations in soils. Cost effective management of soils was achieved through carefully interfacing with the client's grading contractor and project phasing.

2015-present

Innovative In-Situ Remediation of Chlorinated Solvents

Account manager for Griffon Corporation to remediate a chlorinated VOC plume in groundwater which is commingled with chlorinated solvent plumes on adjacent properties. The remediation is confounded by access restrictions associated with a storm channel and two sewer lines. In addition two distinct groundwater mounds resulting from leaks in the sewer lines are affecting the groundwater flow and distribution of the contamination. Mr. Rebele is overseeing the forensic evaluation of sources of VOCs, general strategy, remedial approach and is leading regulatory negotiations.

2015-2017

In-situ Capping of Heavy Metal Impacted Soils

For this former tool manufacturing facility (Union Fork and Hoe Company) in upstate New York, Mr. Rebele served as project principal and client service manager. The site, which has been under the

oversight of the New York State Department of Environmental Conservation (NYSDEC) and Department of Environmental Health. Mr. Rebele helped Griffon negotiate a capping remedy of the heavy metals impacted soil. A significant component of the work has been negotiating with NYSDEC and DOH to eliminate a mature wooded area from the remediation area and to reduce the long-term groundwater monitoring obligations.

2005->>>

Ongoing Brownfield Advisory and Consulting Services

Serves in a strategic consulting role on behalf of the City for the remediation and brownfield planning of a 170-acre downtown core area targeted for redevelopment. Work to date has included federal and state brownfield grant procurement and execution, brownfield inventory, development of a GIS system, development of an area-wide brownfield remediation strategy, Phase I and II Environmental Site Assessments, development of multiple remedial action plans under the oversight of the Department of Toxic Substances Control, litigation support for cleanup cost recovery, and waste to energy (WTE) consulting.

2007->>>

Alameda Triangle Redevelopment

Provided oversight and consulting services for an 11.2 acre project comprised of 5 parcels with multiple ownerships and a history of manufacture use dating to World War II. The property uses identified including a former Witco chemical facility located on Caltrans property, a Magnetek transformer repair and refurbishment business, two auto-wrecking yards, a former railroad right-of-way, and a variety of other uses involving the manufacture and use of various chemical materials. The chemicals detected on-site during Gannett Fleming and other site investigations included organochlorine pesticides, PCBs, free product petroleum hydrocarbons in groundwater and soil, chlorinated VOCs in soil and soil vapor, heavy metals and polynuclear aromatic hydrocarbons. The City is in the process of marketing the site for development. Following a multi-media investigation involving substantial site access coordination, Gannett Fleming prepared a Site Investigation Report, Feasibility Study and a Remedial Action Plan (RAP) for the entire Site. The reports were submitted to Department of Toxic Substances Control (DTSC) for review. Gannett Fleming is working with city's environmental counsel to develop a cost recovery strategy.

2017

Economic Development Department

Mr. Rebele is working with the City of South Gate Economic Development Department and their economic development consultant, Rosenow Spivasek Group (RSG,) in addressing environmental impacts associated with a historical gasoline service station. Mr. Rebele and his team were retained to take over all aspects of the assessment and cleanup activities from a prior consultant due to a stalled remedial program.

2015-2016

Operational Transition/Environmental Compliance

Project Principal for an operational transition project involving all aspects of environmental compliance as Bombardier took over rail service and maintenance responsibilities for all rail facilities from the prior operators of the North County Transit District (NCTD) facilities at the Escondido and Oceanside yards. Work involved initial consultation, environmental compliance audits, permitting, preparation of spill prevention control and countermeasure (SPCC) plans, stormwater pollution prevention plans (SWPPS) and environmental compliance plans for ongoing rail operations and facility maintenance.

2014->>>

Remediation of Organochlorine Pesticide Impacted Soils in Support of Residential Development

Mr. Rebele serves as the principal-in-charge for a residential development project involving the remediation of organochlorine pesticides (OCPs) and closure of historical underground storage tanks

(USTs), irrigation wells and low-level volatile organic compounds (VOCs). In his role, Mr. Rebele is served in a strategic capacity to result in a fast-track review and approval of a remedial action plan by transferring the open case file from a local oversight agency to the Santa Ana Regional Water Quality Control Board.

2014-present

Remediation of Groundwater at Logistically Constrained Shopping Center

Mr. Rebele has been serving as principal-in-charge for a complex gasoline remediation project involving very high concentrations of gasoline at a commercial shopping center where site access precludes implementation of many traditional remedies. Mr. Rebele serves as senior technical advisor to the client's environmental counsel and is working to reduce the environmental liabilities of the property owner. Mr. Rebele helped devise a two-part strategy aimed at protecting the current tenants against indoor air intrusion through the development of vapor mitigation systems while conducting an aggressive groundwater remedial program consisting of trenching/product removal followed by in-situ chemical oxidation of groundwater.

2014-present

Environmental Remediation Consulting in Support of Residential Development

Mr. Rebele served in a strategic consulting role for New Urban West, Inc. (NUWI) to support the redevelopment of infill properties throughout southern California. Projects have included former nursery/greenhouse areas, manufacturing operations and properties and areas impacted by fill materials. Currently executing several cleanup programs under a California Land Reuse and Revitalization Act (CLRRRA) agreement with the Department of Toxic Substances Control.

2014-2017

Redevelopment Consulting and Remediation

Mr. Rebele serves as the project principal for a residential redevelopment project at a former Teledyne research and development facility and historical agricultural operation. Work has involved several phases of soil, soil vapor and groundwater investigation that included multiple degreaser locations, additional potential source areas of metals and petroleum hydrocarbons and organochlorine pesticides associated with the historical agricultural use. A soil vapor extraction (SVE) was implemented to reduce elevated concentrations of PCE to acceptable levels in order to prepare the Site for residential occupancy. The site is currently undergoing redevelopment.

REBEKAH J WALE

Senior Managing Consultant

Rebekah Wale has more than 30 years of experience conducting and managing Phase I environmental site assessments, due diligence projects, and Phase II subsurface investigations. She is a senior practitioner in Ramboll's Merger & Acquisition Due Diligence practice. Her work has included conducting and/or managing hundreds of property transfer Phase I and Phase II investigations, property redevelopment, site and facility closure activities, California Class I and Class III landfill investigations, compliance groundwater monitoring, state and federal Superfund site assessments, underground storage tank assessments, and litigation support.

CAREER

1990-Present

Senior Managing Consultant, Ramboll

Environmental due diligence, Phase II subsurface investigations; prepare various reports, work plans, and results reports; manage clients and staff; coordinate with regulatory personnel.

1985-1990

Field Geologist, Hart Environmental Management Corporation

Perform Phase II subsurface investigations; prepare various reports, work plans, and results reports; oversee subcontractors; manage clients and staff; coordinate with regulatory personnel.

PROJECTS

2005-2017

Due Diligence Manager

Managed hundreds of single and multiple property Phase I environmental site assessments at various locations throughout the United States and in other countries (e.g., Canada, Mexico, Europe, Asia, Africa).

2002-2004

Property Redevelopment Manager

Managed several property redevelopment projects of former aerospace facilities in Burbank, California. Responsible for preparing and implementing dust control plans, sampling plans, and health and safety plans during construction activities, and supervised construction personnel to ensure compliance with plans. Prepared weekly reports for submittal to the local oversight agency.

2000

Litigation Support

Manager

Managed day to day activities in a large litigation support case involving an industrial facility. Assisted with preparation of expert opinions, including a cost allocation model.

1999-2015

Site Investigation

Manager

Managed numerous Phase II subsurface investigations related to property transfer projects; including soil gas surveys, soil sampling, grab groundwater sampling, and indoor air sampling.

Managed a large multi-phase remedial investigation at a testing facility in southern California. Responsible for coordinating and directing field staff, preparing technical memorandums and data transmittals, preparing large remedial investigation reports, and communicating and responding to regulatory agency personnel.

Designed and managed soil gas, soil, and ground water investigation programs at a plating facility near Los Angeles, California.

Managed several tasks associated with the sale of a hotel in Los Angeles, California, including underground storage tank removals and investigation of a dry cleaning plant in the hotel.

1997-1998

Site Investigation

Manager

Managed several tasks associated with investigation and closure of an industrial facility in Los Angeles County, California, including sump removal and a soil boring and sampling program. Prepared sampling plans and results reports.

Designed and managed soil gas, soil, and ground water investigation programs at a shopping center property in Ventura County, California. Prepared sampling plans and results reports, participated in regulatory interaction.

Designed and manage a site investigation of a former dry cleaning facility in Orange County, California, that included soil gas, soil, and ground water sampling programs, and installation of a Soil Vapor Extraction (SVE) remediation system.

1994-1996

Site Investigation

Field Geologist

Managed a Phase II site investigation of an industrial facility in Commerce, California. Prepared a sampling plan, supervised soil boring and sampling activities, reported findings, and participated in regulatory interaction.

Supervised the drilling of soil borings and collected soil samples at a metals recycling facility in Los Angeles, California. Prepared a report on remedial options for soils.

Supervised the installation of five deep aquifer monitoring wells drilled as part of a regional ground water contamination study in northern California.

1993-1995

Geologic Evaluation

Researched and evaluated three properties in the Imperial Valley with regard to geologic, seismic, and flood hazards. The properties were being considered as potential industrial facility sites.

Researched and evaluated the landslide potential of a property for a private client in Los Angeles, California.

1990-2004

Routine Groundwater Monitoring

Manager

Conducted an evaluation of ground water sampling practices and prepared an environmental technician training seminar for a Class III landfill in Orange County, California.

Managed a large regional quarterly ground water monitoring compliance program in a municipality in Los Angeles County, California. Responsible for oversight of field staff and regulatory compliance. Prepared quarterly monitoring reports.

Managed a large quarterly ground water monitoring compliance program at a Class I landfill in California. Responsible for oversight of field staff and regulatory compliance. Prepared quarterly monitoring reports.

1988-1994

Site Investigation

Field Geologist

Prepared cross sections and isopach maps for several sites as part of a regional ground water study in northern California.

Participated in step-testing and a long-term pumping test of a shallow well at a chemical manufacturing facility.

Managed two multiphased ECRA projects at large industrial facilities in northern New Jersey for a Fortune 100 company. Directed implementation of multiple sampling plans involving soil borings; well installation; ground water, soil, sediment and air sampling; geophysical logging; and aquifer (packer) testing.

1988-1991

Site Investigation

Prepared a site-wide Sampling and Analysis Plan for a Class III landfill in southern California.

Provided technical field oversight services to a group of PRPs at a landfill under investigation in New Jersey.

Provided closure activities at a stamping facility in Alabama, including installing overburden and cored bedrock wells, and conducting ground water and potable well sampling and a soil investigation (soil gas survey and soil sampling).

Assisted with rock coring and the installation of bedrock wells at an incinerator fabrication facility in Pennsylvania. Also participated in slug testing the wells.

Directed an expansion investigation in New Jersey for a warehouse facility that was formerly part of a municipal landfill. Oversaw soil borings and soil sampling, monitoring well installation, and ground water sampling. Prepared sampling results reports, including recommended remedial options and strategic planning.

1986-1988

Site Investigation

Managed three multifaceted site investigations for a gas station chain/fuel transfer facility company in New Jersey. Prepared sampling plans, supervised tank and soil removal and well installation and sampling efforts, completed permit applications for both sites, prepared reports of findings, and provided remedial recommendations.

Managed a planned subdivision site in New Jersey located adjacent to a gasoline spill area. Prepared sampling plans and results reports, supervised a soil gas survey and soil sampling activities, and participated in local government meetings to obtain approvals for building at the site.

Managed a major ECRA investigation of a dye and pigment manufacturing facility in New Jersey. Prepared sampling plans; drilled and sampled soil borings; conducted ground water sampling, pump-in (pressure) testing, discrete interval sampling (packer testing); and oversaw test pit construction and downhole geophysical logging.

1985-1986

Site Investigation

Field Geologist

Managed a multiphased ECRA investigation at an electric motor repair plant in New Jersey. Installed overburden and bedrock wells, collected soil and ground water samples, and oversaw soil excavation activities. Negotiated for off-site access. Planned and implemented aquifer testing through a series of short duration step tests, followed by a 72-hour pumping test.

Conducted potable well and surface water sampling at four Superfund asbestos disposal sites in New Jersey. Prepared sampling results report.

Assisted with rock coring and the installation of bedrock wells at an incinerator fabrication facility in Pennsylvania. Also participated in slug testing the wells.

Assisted in the remedial investigation of a metals-contaminated soils problem in Colorado, including grid layout, soil sample collection, test pit construction, and soil mapping.

THIS PAGE INTENTIONALLY LEFT BLANK

E.3 - Limited Phase II Environmental Site Assessment

THIS PAGE INTENTIONALLY LEFT BLANK

Mr. Alex Filler
Dedeaux Properties
1430 South Eastman Avenue
Los Angeles, California 90023

**RESULTS OF LIMITED SUBSURFACE INVESTIGATION
1516 SOUTH BON VIEW AVENUE
ONTARIO, CALIFORNIA**

Dear Mr. Filler:

September 10, 2021

Ramboll US Consulting, Inc., (Ramboll) is pleased to present the results of the limited Phase II to Dedeaux Properties (Dedeaux) to document the findings of the limited subsurface investigation completed at the property located at 1516 South Bon View Avenue, Ontario, California (the "Site", Figure 1).

Ramboll
5 Park Plaza
Suite 500
Irvine, CA 92614
USA

BACKGROUND

It is Ramboll's understanding that Dedeaux intends to acquire the Site and utilize it as a commercial property. Ramboll, on behalf of Dedeaux, conducted a limited Phase II subsurface investigation to evaluate current environmental conditions at the Site near or in the vicinity of historical and/or current features that were identified in Ramboll's Phase I Environmental Site Assessment (ESA) conducted in August 2021, as "Recognized Environmental Conditions" (REC's). Historical and/or current features of potential concern included i) vehicle parts manufacturing, ii) tow yard operations and iii) various light industrial operations.

T +1 949 261-5151
F +1 949 261-6202
www.ramboll.com

OBJECTIVES AND SAMPLING RATIONALE

The objective of this investigation is to evaluate whether historical and/or current subsurface conditions, that were identified as RECs based on Ramboll's Phase I ESA, have adversely impacted shallow soil and/or soil vapor at the Site.

Based on the Phase I ESA, Dedeaux requested that Ramboll prepare a scope of work that would provide an understanding of current subsurface conditions at the Site. Ramboll's investigation was conducted in accordance with our proposal dated August 11, 2021.

SCOPE OF WORK

The scope of work included pre-field activities and limited soil and soil vapor sampling. Each task is further described below.

Task 1: Pre-Field Activities and Preparation of OSHA Required HASP

Prior to initiation of drilling activities, Ramboll prepared site-specific Health & Safety Plan (HASP). The HASP is designed to minimize exposure of Ramboll field personnel

to potentially hazardous materials. In addition, consistent with Center for Disease Control (CDC) guidelines and applicable local regulations, Ramboll included COVID-19 precautionary measures. Ramboll field personnel was required to review the HASP prior to commencing field activities and implement all COVID-19 precautionary measures during field operations.

In addition, Ramboll notified Underground Service Alert (Dig Alert) of our intent to conduct drilling activities. In addition to Dig-Alert, Ramboll contracted with Spectrum Geophysics (Spectrum) of Chatsworth, California to conduct a geophysical survey in the immediate vicinity of each proposed boring location to identify subsurface structures, anomalies and delineate zones for drilling.

Task 2: Soil and Soil Vapor Sampling

Between August 23 and 24, 2021, BC2 Environmental (BC2) of Orange, California, a California-licensed drilling contractor advanced eight borings (SB-1 through SB-8), under Ramboll's oversight, at the locations depicted in Figure 2. Each boring location was hand augered to a depth of approximately 5 feet below ground surface (bgs). During advancement, soils were logged in accordance with the Unified Soil Classification System (USCS). Soil characteristics were recorded on the field log and soil was screened for total volatile organic compounds (VOCs) using a photoionization detector (PID). Soil samples were collected at depths of approximately 0.5, 2 and 5 feet bgs. Based on field observations and PID readings, select soil samples were analyzed for VOCs by United States Environmental Protection Agency (USEPA) Methods 5035/8260B, total petroleum hydrocarbons (TPH) by USEPA Method 8015B, and metals by USEPA Method 6010/7471A. A total of 2 samples from each boring location were analyzed and 1 sample was placed on-hold pending the results of the other 2 sample depth intervals. Soil samples were labeled, stored in a cooler with ice, and couriered to Jones Environmental Inc., of Santa Fe Springs (Jones), California, a California-certified fixed laboratory, under standard chain-of-custody protocols.

After advancement, temporary soil vapor probes were installed at depths of approximately 5 feet bgs at each boring location. Soil gas probes were built in accordance with the California Environmental Protection Agency (CalEPA), Department of Toxic Substances Control (DTSC), the Los Angeles Regional Water Quality Control Board (LA-RWQCB) and the San Francisco Regional Water Quality Control Board (SF-RWQCB) Advisory - Active Soil Gas Investigations (Advisory), dated July 2015. Each vapor probe was constructed with an air stone filter (or equivalent) connected to 1/8-inch tubing and capped with a valve at its termination above the ground surface. Each air stone filter was set within a minimum of 1.5 inches of sand, topped with a minimum of 1 foot of dry bentonite, followed by hydrated bentonite to 0.5 feet below the ground surface. Prior to sample collection, soil vapor probes were allowed to equilibrate a minimum of 48 hours, as required by the Advisory.

On August 27, 2021, soil vapor samples were collected in general accordance with the Advisory by A&R Laboratories Inc., (A&R) of Ontario, California, a California-licensed mobile laboratory. Soil vapor samples were collected from each probe using a glass syringe, recorded under standard chain-of-custody protocols, and analyzed for VOCs by USEPA Method 8260B via the mobile laboratory.

RESULTS

Analytical results for TPH and VOCs in soil are summarized in Table 1 (soil), for metals in soil in Table 2, and for VOCs in soil vapor in Table 3 and summarized below. Laboratory analytical reports and chain-of-custody documentation is presented in Attachment A.

Soil**TPH**

Concentrations of TPH as oil-range organics (C17-C32) and TPH as heavy-range organics (C33-C43) were reported in 1 soil sample (SB-6) at maximum concentrations of 176 milligrams per kilograms (mg/kg) and 275 mg/kg, at a depth of 0.5 feet bgs. TPH as oil-range organics was detected at concentrations well below its respective Department of Toxic Substances Control (DTSC) commercial screening level (SL) of 30,000 mg/kg. TPH as heavy-range organics does not currently have an established commercial screening level and TPH as gasoline-range organics and diesel-range organics were not reported above their laboratory reporting limit (RL). Reported concentrations TPH as oil-range organics and TPH as heavy-range organics were not detected above their RL in deeper samples.

VOCs

A total of 9 VOCs including benzene, n-butylbenzene, ethylbenzene, naphthalene, toluene, 1,2,4-trimethylbenzene (TMB), 1,3,5-TMB, m,p-xylene, and o-xylene were reported in at least one soil sample. Although concentrations of these compounds were reported in soil above RLs, all compounds detected were well below their respective commercial SLs. No other VOCs were reported in soil above their respective RL.

Metals

A total of 10 metals including barium, cadmium, cobalt, chromium, copper, nickel, lead, vanadium, zinc and mercury were reported in at least one soil sample. Although concentrations of these metals were reported in soil, all metals detected were well below their commercial SLs. No other metals were reported in soil above their respective RL.

Soil Vapor

A total of 10 VOCs including, n-butylbenzene, ethylbenzene, naphthalene, styrene, tetrachloroethene (PCE), toluene, 1,2,4-TMB, 1,3,5-TMB, m,p-xylene, and o-xylene were reported in at least 1 soil vapor sample. All detected VOCs were below their respective commercial preliminary screening level (PSL), using a default attenuation factor (AF) of 0.001. When applying the more conservative AF of 0.03, naphthalene at 1 location (SV-8; 0.020 µg/L) only slightly exceeded its commercial PSL of 0.012 micrograms per liter (µg/L), at a depth of 5 feet bgs. No other VOCs exceeded their commercial PSL when applying the more conservative AF of 0.03.

CONCLUSIONS AND RECOMMENDATIONS

Based on the findings summarized above, Ramboll has not identified evidence of significant or widespread contamination at the Site. Based on the ongoing and future commercial use of the Site, no further investigation or action is recommended.

LIMITATIONS

The location and number of borings were selected to evaluate the Site for the presence of significant or widespread contamination; however, it is possible that "pockets" of contamination exist at the Site near areas of concern identified as RECs in the Phase I ESA and/or in areas that were not investigated as part of this assessment. To the extent that residual impacts are present at the Site, such impacts should be managed through implementation of a (SMP) at the time of future Site grading or any earth moving activities.

CLOSURE

We appreciate the opportunity to be of service to you on this important project. If you have any questions about the information discussed herein, please contact us at your convenience.

Very Truly Yours,

Leo M. Rebele

Notes:

mg/kg - milligram per kilogram

ID - identification

NE - screening level not established

< - not detected above the laboratory reporting limit

Bold indicates detected concentration above respective laboratory reporting limit**References:**¹Human Health Risk Assessment (HHRA) Note Number 3, DTSC-modified Screening Levels (DTSC SLs). DTSC Human and Ecological Risk Office (HERO), June 2020.²United States Environmental Protection Agency (USEPA) Regional Screening Levels (RSLs) - Generic Tables, May 2021.³Background concentration from "Determination of a Southern California Regional Background Arsenic Concentration in Soil," G. Chernoff, W. Bosan, D. Oudiz, 2008.

Evaluated by the DTSC of arsenic from school sites in Southern California. Arsenic concentrations in soil samples collected at the site were conservatively screened against 12 mg/kg.

Table 3. Summary of VOCs in Soil Vapor1516 South Bon View Avenue

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
 B1 = BOD dilution water is over specifications . The reported result may be biased high.
 D = Surrogate recoveries are not calculated due to sample dilution.
 E = Estimated value; Value exceeds calibration level of instrument.
 H = Analyte was prepared and/or analyzed outside of the analytical method holding time
 I = Matrix Interference.
 J = Analyte concentration detected between RL and MDL.
 Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
 S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
 RL = Reporting Limit, Adjusted by DF
 MDL = Method Detection Limit, Adjusted by DF
 Qual = Qualifier
 Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

For any feedback concerning our services, please contact Jenny Jiang, Project Manager at 951.779.0310. You may also contact Ken Zheng, President at office@arlaboratories.com.

EPA 8015M - Extended Range Hydrocarbons

	Result	Spike Level	% Recovery	% RPD	% Recovery Limits	Units
LCS:	LCS1-082621FID7	SAMPLE SPIKED:	CLEAN SOIL			
Analyte:						
Diesel (C10 - C28)	440	500	88%		60 - 140	mg/kg
Surrogate Recovery:						
Hexacosane			98%		30 - 120	
LCSD:	LCSD1-082621FID7	SAMPLE SPIKED:	CLEAN SOIL			
Analyte:						
Diesel (C10 - C28)	465	500	93%	5.5%	60 - 140	mg/kg
Surrogate Recoveries:						
Hexacosane			99%		30 - 120	
CCV:	CCV1-082621FID7					
Analyte:						
Diesel (C10 - C28)	1070	1000	107%		80 - 120	mg/kg

LCS = Laboratory Control Sample
LCSD= Laboratory Control Sample Duplicate
CCV = Continuing Calibration Verification
RPD = Relative Percent Difference
