Name of Applicant/Identify of person undertaking project (if different from the applicant above): N/A

Project Description: The Project consists of the replacement of two existing isolation valves and piping with new motorized valves and piping, which would automate water system operations. The existing 24-inch and 42-inch valves divert water into the 10-million-gallon tank and the 200-million-gallon reservoir. The new valves would be installed in a new underground vault at the base of the slope for easier access to the valves and improved worker safety.
