The Ames Aeronautical Laboratory was established in 1939 by Congress adjacent to the Sunnyvale Naval Air Station as the west coast site of the National Advisory Committee on Aeronautics (NACA). In 1945 the Sunnyvale airfield was renamed Moffett Field, after Admiral Moffett.

In 1958 the Ames Aeronautical Laboratory became a NASA field center when Congress created NASA with the National Aeronautics and Space Act. NASA Ames Research Center grew to occupy 500 acres adjacent to the Naval Air Station at Moffett Field.

Following the closure of Moffett Field as a military base in 1994, NASA Ames acquired stewardship for the property. In 2002 NASA Research Park began collaborative partnerships with academia, industry and non-profits to stimulate innovation and education in science and research disciplines critical to space exploration. NASA Ames strategic areas, including astrobiology, information technology, biotechnology and nanotechnology.

NASA Ames site is underlain by a large groundwater plume from the Middlefield-Ellis-Whisman ("MEW") and Moffett Field Naval Air Station. The MEW and Moffett Field plumes are Federal Superfund projects with US EPA being the lead agency. NASA Ames requested DTSC to provide oversight for those AOIs where EPA is not providing oversight. The DTSC is providing oversight for Area of Investigation(AOI 4). AOI 4 consists of the area surrounding the National Full Scale Aerodynamic Complex.

Groundwater at AOI 4 is contaminated with petroleum hydrocarbons, however the plume has been stable in size and has displayed signs of decreasing

Document Type: Monitoring Report
Date Completed: 1/28/2014
Comments: The Annual Operations and Maintenance Report presents groundwater data collected during calendar year 2012 and includes summaries of groundwater chemical data, and groundwater elevation and gradient data. The results of NASA's May 2012 soil and groundwater investigation are also summarized in the report. Contaminants of concern concentrations continue to exceed the Site-specific cleanup goals; therefore, as outlined in the Operations and Maintenance Plan, the continuation of groundwater monitoring is required for the Site.

Title Link: Area Name: Area Link: Sub Area: Sub Area Link: Document Type: Date Completed: Comments:					http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43370008&doc_id=5002945 Removal Action Completion Report 10/3/2000 Completed Removal Action. Skimming pumps were planned to be installed in two monitoring wells (one existing well and one new well) to extract free product floating on the water table. Additional sampling data conducted in 1999 indicated that there is no longer free product in the shallow aquifer near Tank 1 and Tank 5. Based on this information skimming pumps were not required and proposed new groundwater monitoring well was not installed. Both Tank 1 and 5 were removed. Dissolved petroleum hydrocarbons in the groundwater will be monitored quarterly until such time that four consecutive quarters of data are analyzed indicating that the TPH concentrations are below cleanup levels and stable. A source point for the TCE concentrations detected in the groundwater was not discovered during the remedial investigation phase of the project. Therefore, it is believed that the source of the TCE detected in the groundwater is from an off-site source. Groundwater TCE contamination will be investigated separately from the AOI 4 project. Petroleum hydrocarbon contaminated soils exceeding the identified remediation levels (400 mg/kg) were planned to be excavated. Excavated soil with concentrations under 1,000 mg/kg was to be bioremediated and reused. Soil exceeding 1,000 mg/kg was to be disposed of offsite. Additional soil sampling conducted in 1999 indicated that the level of petroleum hydrocarbons in the soil and groundwater were lower than originally identified; they were below or close to the established cleanup goals. The sampling was repeated and the results confirmed; the soil excavation proposed in the RAW was not implemented.	
Title: Title Link: Area Name: Area Link: Sub Area: Sub Area Link: Document Type: Date Completed: Comments:					Order http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43370008&enforcement_id=5002948 Voluntary Cleanup Agreement 11/3/1995 Signed VCA for AOI 4. The VCA includes the National Full Scale Aerodynamics Complex, a large wind tunnel for testing the aerodynamic characteristics of large-scale models. Twelve underground storage tanks were originally located within AOI 4; leaking tanks were removed. Subsequent sampling events identified four primary locations, Tank 1, Tank 5, and SB4-6, located in the drum storage area. Soil and groundwater samples from these areas detected petroleum hydrocarbons and trichloroethylene (TCE).

Site History:

Raytheon Corporation manufactured semiconductors at the Site from 1967 to 1971. C&Z Circuits and Innerconn Technologies (ICT) manufactured printed circuit boards during the period from 1971 to 1985. Chemicals used at these facilities included metal plating solutions, organic and inorganic acids, and organic solvents. ICT stored some of its hazardous waste in 55-gallon drums at the Site prior to disposal offsite. ICT and C&Z circuits also used a wastewater treatment sump for treating wastewater prior to discharge. The discharged water contained copper, nickel and lead. Full details of waste disposal methods for Raytheon Corporation and C&Z Circuits were not available. Investigations began at the Site in early 1986 in anticipation of the sale of the property. Volatile organic compounds (VOCs) including methylene chloride, dichloroethane (DCA), trichloroethylene (TCE) and benzene were detected in groundwater onsite above action levels, and copper was detected at 3,000 and 7,500 parts per million (ppm) and lead at 1100 ppm in soil. The building onsite was demolished in April 1989, and approximately 500 cubic yards of soil contaminated with lead and copper were removed from the Site. In August of 1989, following the removal of contaminated soil, the Department of Toxic Substances Control (DTSC, formerly the Department of Health Services, Toxic Substances Control Division) approved the commercial development of the Site. However, the San Francisco Bay Regional Water Quality Control Board (RWQCB) issued a Site Clean-up Order in May 1989 that required further investigation of groundwater contamination at the Site. Groundwater extraction wells began operating in 1992. The extraction wells in 2002 ceased operation after concentration concentrations of TCE,

---------	-------------------	-----------	------------------	----------------	------	----

DCE, and DCA had reached asymptotic levels in groundwater. The highest concentrations of TCE, DCE, and DCA in groundwater are currently in the range of 100-200 parts per billion (ppb).

Site History:

From 1963 to 1985, property owner operated pest control company out of a residence on this site. Improper storage and handling of pesticides resulted in soil contamination. Contaminated soil was consolidated and capped beneath driveway areas of the property. The site has been redeveloped into townhomes.

Document Type:					Site Screening	
Date Completed:					4/11/2001	
Comments:					DTSC completed a Site Inspection Re-Assessment for the U.S. Environmental Protection Agency. As the lead regulatory agency for the Site, DTSC had approved a Removal Action Workplan for the Site on October 30, 1998. It was noted in the Site Inspection Re-Assessment that implementation of the Removal Action Workplan had been significantly delayed due to the City of Mountain View's building permit process and the Site owner's funding problem for construction of the multifamily residential buildings. Based on the Site Inspection Re-Assessment it was determined the Site did not qualify for further remedial site assessment under the Comprehensive Environmental Response, Compensation, and Liability Act.

Site History:

Between 1968, and 1981, Intel Corporation operated a semicon- ductor manufacturing plant at the site. Chemicals used in the manufacturing process and wastes generated by this process were handled and stored onsite. The site is located adjacent to re- sidential and commercial development. This site is part of the Middlefield-Ellis-Whisman (MEW) study area. In 1981, soil and groundwater contamination was discovered at the site. An investigation determined that the sources of conta- mination were leaking underground storage tanks containing solvents. The types of contaminants identified

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

include trichloro-ethylene (TCE), xylene, Freon-113, trichloroethane (TCA), dichloroethylene (DCE), and vinyl chloride. Approximately 270,000 people living within a 3-mile radius of the facility depend on groundwater as a principal source of drinking water. Three private wells have been contaminated. Five municipal wells belonging to the City of Mountain View and five City of Sunnyvale wells are located within a three-mile radius of the site. The City of Mountain View's well No. 18 is located 1.1 miles from the facility & is 2,600 feet away from a contaminated monitoring well. In August, 1985, Intel entered into a consent agreement with EPA to conduct a RI/FS. All five underground tanks and sumps at the site have been excavated along with 4,600 cubic yards of contaminated soil. Groundwater monitoring and extraction wells have been installed for plume characterization, monitoring and extraction. About 72,000 gallons of contaminated groundwater is pumped daily and treated by carbon adsorption prior to discharge to Stevens Creek, Whisman Slough and the San Francisco Bay.

POLYCHLORINATED BIPHENYLS (PCBS), TPH-DIESEL, TETRACHLOROETHYLENE (PCE), TRICHLOROETHYLENE (TCE)

Site History:

The Ames Aeronautical Laboratory was established in 1939 by Congress adjacent to the Sunnyvale Naval Air Station as the west coast site of the National Advisory Committee on Aeronautics (NACA). In 1945 the Sunnyvale airfield was renamed Moffett Field, after Admiral Moffett.

In 1958 the Ames Aeronautical Laboratory became a NASA field center when Congress created NASA with the National Aeronautics and Space Act. NASA Ames Research Center grew to occupy 500 acres adjacent to the Naval Air Station at Moffett Field.

Following the closure of Moffett Field as a military base in 1994, NASA Ames acquired stewardship for the navy property.

In 2002 NASA Research Park began collaborative partnerships with academia, industry and non-profits to stimulate innovation and education in science and research disciplines critical to space exploration. NASA Ames strategic areas, including astrobiology, information technology, biotechnology and nanotechnology.

AOI 5 is located in the west central portion of the NASA Ames Research Center and includes six building used as bioscience laboratories and biomedical research facilities. There are also two electrical substations within AOI 5.

During a center wide soil and groundwater investigation conducted in 1995, it was discovered that some soil contamination existed in four general areas of AOI 5. The four contamination areas of AOI 5 have been designated A through D.

The NASA Ames site is underlain by a large plume from the Middle-Ellis-Whisman "MEW" area and the Moffett Field Naval Air Station. The MEW and Moffett Field plumes are Federal Superfund projects with US EPA being the lead agency. This plume is considered to be a potential source for the volatile organic compound contamination found in the groundwater at AOI 5.

<p>Title: Sampling Workplan Title Link: http://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43370009&doc_id=6012937 Area Name: Area Link: Sub Area: Sub Area Link: Document Type: Site Characterization Workplan Date Completed: 2/20/2007 Comments: Approved SAP near locatons near N236, N225, and N225B.</p>						
<p>Title: Order Title Link: Area Name: Area Link: Sub Area: Sub Area Link: Document Type: Voluntary Cleanup Agreement Date Completed: 3/8/1996 Comments: Signed VCA. DTSC is providing oversight for the AOI 5 which is not under the oversight of the U.S. EPA. The VCA outlined the oversight duties of DTSC, including additional investigations and remediation of the site. AOI 5 includes six buildings used as biosciences laboratories, the biomedical research facility and two electrical substations. AOI 5 also includes a drum storage area and one underground storage tank that were previously located within the site boundaries. The drum storage area was closed in the middle 1980s and the tank was removed in 1990. Analyses of soil and groundwater samples detected petroleum hydrocarbons, PCBs, and VOCs. Investigations conducted in 1998 and 1999 indicated two separate groundwater plumes. The western plume contains PCE up to 72 micrograms per liter (ug/l). The eastern plume contains primarily TCE up to 80 ug/l. NASA is currently evaluating some in-situ remedial methods as an alternative to pump and treat for any groundwater contamination found.</p>

Potential Contaminant of Concern:			

TETRACHLOROETHYLENE (PCE)

Site History:

The City of Mt. View plans to redevelop the Evelyn Parking lot property for low-income housing. The 1.03 acre site was acquired by the City of Mt. View in the 1970's. Previous uses include a residence, a stable and a warehouse. A subsurface investigation detected tetrachloroethene (PCE) in groundwater up to 230 parts per billion (ppb) and soil vapor at 4,700 ug/cubic meter. The concentration of PCE is above the California Department of Health's primary MCL (Maximum Contaminant Level, a drinking water standard) and the RWQCB's Environmental Screening Level (ECL). The PCE detected in groundwater appears to be associated with an up-gradient release.

Potential Contamin of Concern:

TRICHLOROETHYLENE (TCE)

Site History:

Fairchild Semiconductor System 3 was one of many Fairchild Semiconductor facilities operated in Mountain View. Semiconductors were manufactured here and volatile organic compounds (VOCs), primarily trichloroethylene (TCE), were released from the facility during operations, impacting soil and groundwater. The facility at 313 Fairchild Drive reportedly ceased operations in 1988 and began closure in 1989. DTSC approved clean closure of the facility in 1995. Remediation at the site is ongoing under EPA oversight.

The EPA added this site to the National Priorities List (NPL) in 1991. This Superfund site is comprised of several former Fairchild Semiconductor Corp facilities spanning 56 acres in Mountain View. The Fairchild Semiconductor Corp - Mountain View site is one of three Superfund or NPL sites that are being cleaned up simultaneously. The other two Superfund sites are the Intel - Mountain View site and the Raytheon site. All three sites are located in the Middlefield-Ellis-Whisman (MEW) Study Area and are being addressed collectively as the MEW Site. Site investigations at several of these facilities during 1981 and 1982 revealed extensive soil and groundwater contamination, primarily VOCs. Soil cleanup by soil vapor extraction, excavation, and aeration has been completed at all the MEW study area sites. Groundwater remediation is ongoing at the MEW Study Area.

Site History:

Intel Corporation used the Site from 1976 to 2008 to performing quality control of chemicals and electrical testing of semiconductors. Groundwater contamination was first discovered at the Site in 1982, when groundwater samples were collected as part of a leak detection program for underground tanks. The Site was listed on the NPL in 1986 and is being overseen by the EPA. A Site visit was conducted and there were no observations indicating that there had been a release hazardous material. The EPA assumed oversight of the Intel Santa Clara 3 Site in 2006. The EPA chose MNA as the cleanup remedy in the ROD Amendment.

Document Type: Phase 1 Addendum
Date Completed: 4/16/2014
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. Intel Corporation used the Site to perform quality control of chemicals and electrical testing of semiconductors. The Site was listed on the National Priorities List in 1986 and the U.S. Environmental Protection Agency (EPA) issued a Record of Decision (ROD), which selected a remedy for the site with groundwater extraction and treatment as a primary component. The groundwater extraction and treatment system was operated nine years up through 1994. A trial monitored natural attenuation (MNA) program was initiated after groundwater extraction and treatment ceased. The Regional Water Quality Control Board provided oversight of the cleanup activities until EPA assumed oversight in 2006. EPA changed the remedy to MNA in a September 2010 ROD Amendment and continues to oversee the cleanup of the Site. DTSC recommended that the Site status be identified as Refer to EPA.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Aug 20, 2019

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Aug 20, 2019

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Aug 20, 2019

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Aug 20, 2019

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:

SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Aug 20, 2019

Comprehensive Environmental Response, Compensation and Liability Information System -

CERCLIS

CERCLIS:

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:

IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:

CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:

CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:

RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Aug 26, 2019

RCRA non-CORRACTS TSD Facilities:

RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Aug 26, 2019

RCRA Generator List:

RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Aug 26, 2019

RCRA Small Quantity Generators List:

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Aug 26, 2019

RCRA Conditionally Exempt and Very Small Quantity Generators List:

[RCRA CESQG](#)

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt and Very Small Quantity Generators (VSQG and CESQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG and CESQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Aug 26, 2019

RCRA Non-Generators:

[RCRA NON GEN](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Aug 26, 2019

Federal Engineering Controls-ECs:

[FED ENG](#)

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jun 11, 2019

Federal Institutional Controls- ICs:

[FED INST](#)

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jun 11, 2019

Emergency Response Notification System:

[ERNS 1982 TO 1986](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

[ERNS 1987 TO 1989](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

[ERNS](#)

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Mar 21, 2019

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

[FED BROWNFIELDS](#)

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Sep 3, 2019

FEMA Underground Storage Tank Listing:

[FEMA UST](#)

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Petroleum Refineries:

REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 17, 2018

Petroleum Product and Crude Oil Rail Terminals:

BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Jan 18, 2019

LIEN on Property:

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Aug 20, 2019

Superfund Decision Documents:

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Aug 20, 2019

State

State Response Sites:

RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Oct 1, 2019

EnviroStor Database:

ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Oct 1, 2019

Delisted State Response Sites:

DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Oct 1, 2019

Solid Waste Information System (SWIS):

SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Aug 19, 2019

EnviroStor Hazardous Waste Facilities:

HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Oct 1, 2019

Land Disposal Sites:

LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 17, 2019

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report:

SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Leaking Underground Fuel Tank Reports:

LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 17, 2019

Delisted Leaking Storage Tanks:

DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Oct 16, 2019

Permitted Underground Storage Tank (UST) in GeoTracker:

UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jul 17, 2019

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels:

SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Proposed Closure of Underground Storage Tank Cases:

UST CLOSURE

List of UST cases that are being considered for closure by either the California Environmental Protection Agency, State Water Resources Control Board or the Executive Director that have been posted for a 60-day public comment period.

Government Publication Date: Jun 17, 2019

Historical Hazardous Substance Storage Information Database:

HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Aboveground Storage Tanks:

AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

Delisted Storage Tanks:

DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 11, 2019

California Environmental Reporting System (CERS) Tanks:

CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions:

[LUR](#)

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Oct 1, 2019

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions:

[HLUR](#)

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Sep 23, 2019

Deed Restrictions and Land Use Restrictions:

[DEED](#)

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 17, 2019

Voluntary Cleanup Program:

[VCP](#)

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Oct 1, 2019

GeoTracker Cleanup Program Sites:

[CLEANUP SITES](#)

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 17, 2019

Delisted County Records:

[DELISTED COUNTY](#)

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Oct 17, 2019

Delisted California Environmental Reporting System (CERS) Tanks:

[DELISTED CTNK](#)

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Aug 19, 2019

Historical Hazardous Substance Storage Container Information - Facility Summary:

[HIST TANK](#)

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in the 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Lands:

[INDIAN LUST](#)

LUSTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 9, which includes California.

Government Publication Date: Dec 31, 2017

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

Delisted Tribal Underground Storage Tanks:

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

County

Santa Clara County - City of San Jose Hazardous Material Facilities:

SANJOSE HM

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Sep 15, 2019

Santa Clara County - Gilroy City CUPA Facilities List:

GILROY CUPA

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Aug 21, 2019

Santa Clara County - CUPA Facilities List:

SANTA CLARA CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental Health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Jul 16, 2019

Santa Clara County - Historic Solvent Case Listing:

SANTA CLARA HSOL

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing:

SANTA CLARA LO

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks:

UST SANTA CLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Aug 14, 2019

Santa Clara County - Sunnyvale City CUPA List:

SUNNYVALE CUPA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jul 16, 2019

Additional Environmental Record Sources

Federal

PFOA/PFOS Contaminated Sites:

PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Nov 15, 2018

Facility Registry Service/Facility Index:

FINDS/FRS

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Apr 23, 2019

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2017

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Dec 31, 2017

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Jan 8, 2019

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Sep 26, 2019

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2017

Hist TSCA:

HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Aug 20, 2019

State Coalition for Remediation of Drycleaners Listing:

SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities:

FED DRYCLEANERS

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 29, 2018

Delisted Drycleaner Facilities:

DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 29, 2018

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Oct 23, 2018

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Nov 1, 2018

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: May 3, 2019

Alternative Fueling Stations:

[ALT FUELS](#)

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Oct 1, 2019

Registered Pesticide Establishments:

[SSTS](#)

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: May 31, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

[PCB](#)

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Mar 20, 2019

State

Dry Cleaning Facilities:

[DRYCLEANERS](#)

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Jul 16, 2019

Delisted Drycleaners:

[DELISTED DRYCLEANERS](#)

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jul 16, 2019

Non-Toxic Dry Cleaning Incentive Program:

[DRYC GRANT](#)

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Feb 28, 2018

Per- and Polyfluoroalkyl Substances (PFAS):

[PFAS](#)

List of sites from the State Water Resources Control Board (SWRCB)'s GeoTracker at which one or more of the potential contaminants of concern are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 17, 2019

PFOA/PFOS Groundwater:

[PFAS GW](#)

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.Y

Government Publication Date: Oct 17, 2019

Hazardous Waste and Substances Site List - Site Cleanup:

[HWSS CLEANUP](#)

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Aug 27, 2019

List of Hazardous Waste Facilities Subject to Corrective Action:

DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement:

INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked in the Department of Toxic Substance Control (DTSC) EnviroStor.

Government Publication Date: Jul 16, 2019

School Property Evaluation Program Sites:

SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Oct 1, 2019

California Hazardous Material Incident Report System (CHMIRS):

CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jul 15, 2019

Hazardous Waste Manifest Data:

HAZNET

A list of hazardous waste manifests received each year by Department of Toxic Substances Control (DTSC). The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Oct 24, 2016

Historical California Hazardous Material Incident Report System (CHMIRS):

HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Historical Hazardous Waste Manifest Data:

HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

Historical Cortese List:

HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders:

CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Feb 16, 2012

California Environmental Reporting System (CERS) Hazardous Waste Sites:

CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Aug 19, 2019

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites:

[DELISTED HAZ](#)

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker:

[GEOTRACKER](#)

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 17, 2019

Waste Discharge Requirements:

[WASTE DISCHG](#)

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 17, 2019

Toxic Pollutant Emissions Facilities:

[EMISSIONS](#)

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program. This program requires emission inventory updates every four years.

Government Publication Date: Dec 31, 2017

Clandestine Drug Lab Sites:

[CDL](#)

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/ clandestine drug laboratories.

Government Publication Date: Jun 30, 2018

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Appendix E: ERIS Physical Setting Report

Property Information

Order Number:	20191023141p
Date Completed:	October 24, 2019
Project Number:	19-4587-Terra Bella-PS20113
Project Property:	19-4587-Terra Bella-PS20113 1055 San Leandro Ave and 1020 Terra Bella Ave Mountain View CA 94043
Coordinates:

Topographic Information.....	2
Hydrologic Information.....	4
Geologic Information.....	7
Soil Information.....	9
Wells and Additional Sources.....	12
Summary.....	13
Detail Report.....	46
Radon Information.....	1366
Appendix.....	1367
Liability Notice.....	1369

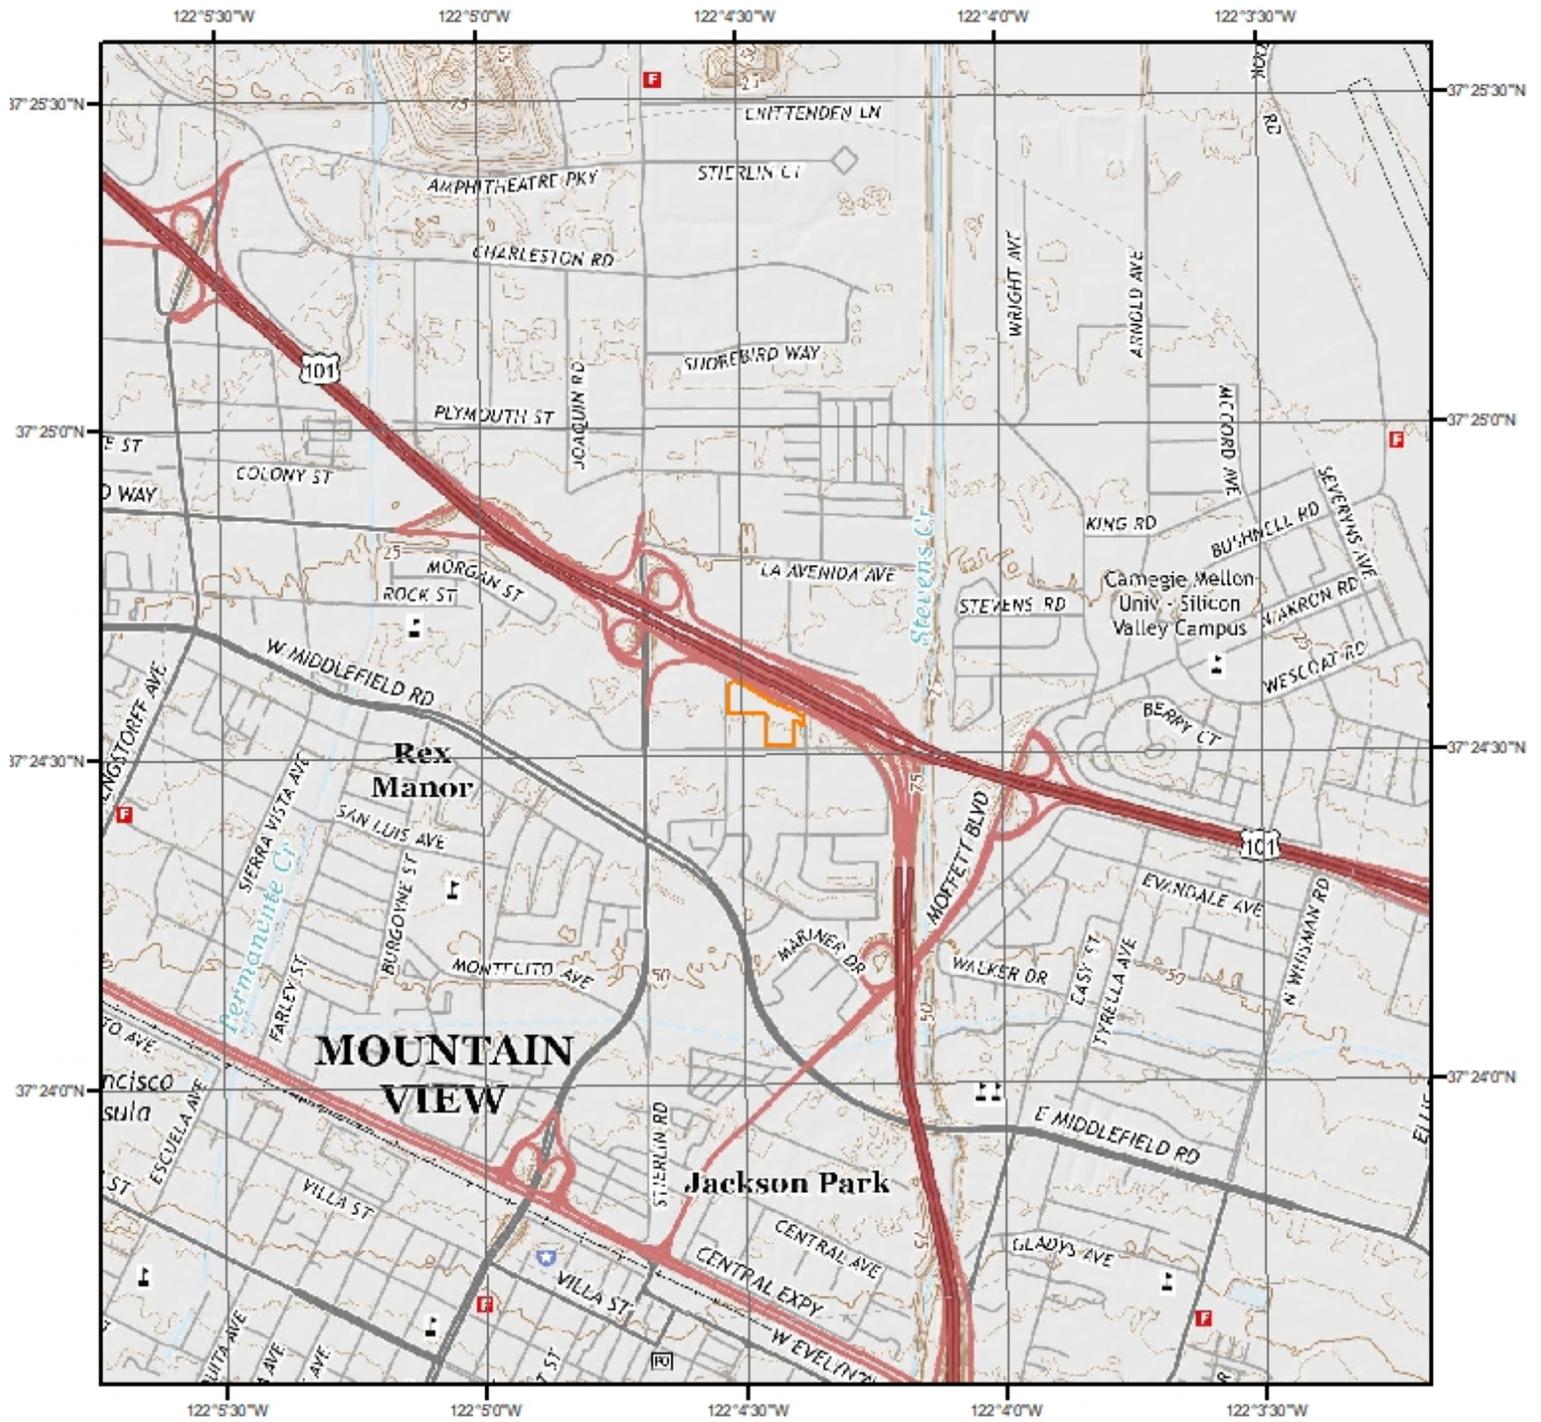

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Topographic Information

Current USGS Topo

Quadrangle(s): Mountain View, CA

Source: USGS 7.5 Minute Topographic Map

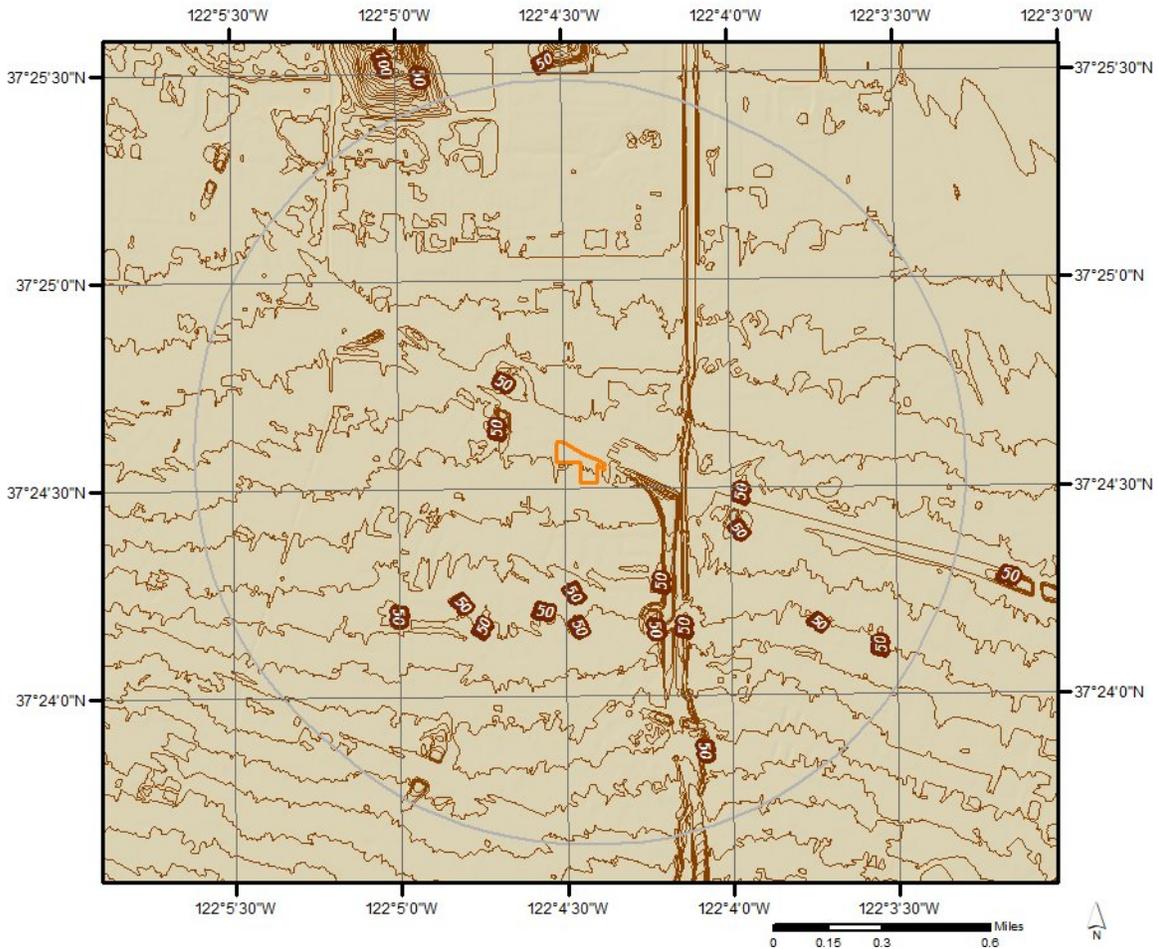

Topographic Information

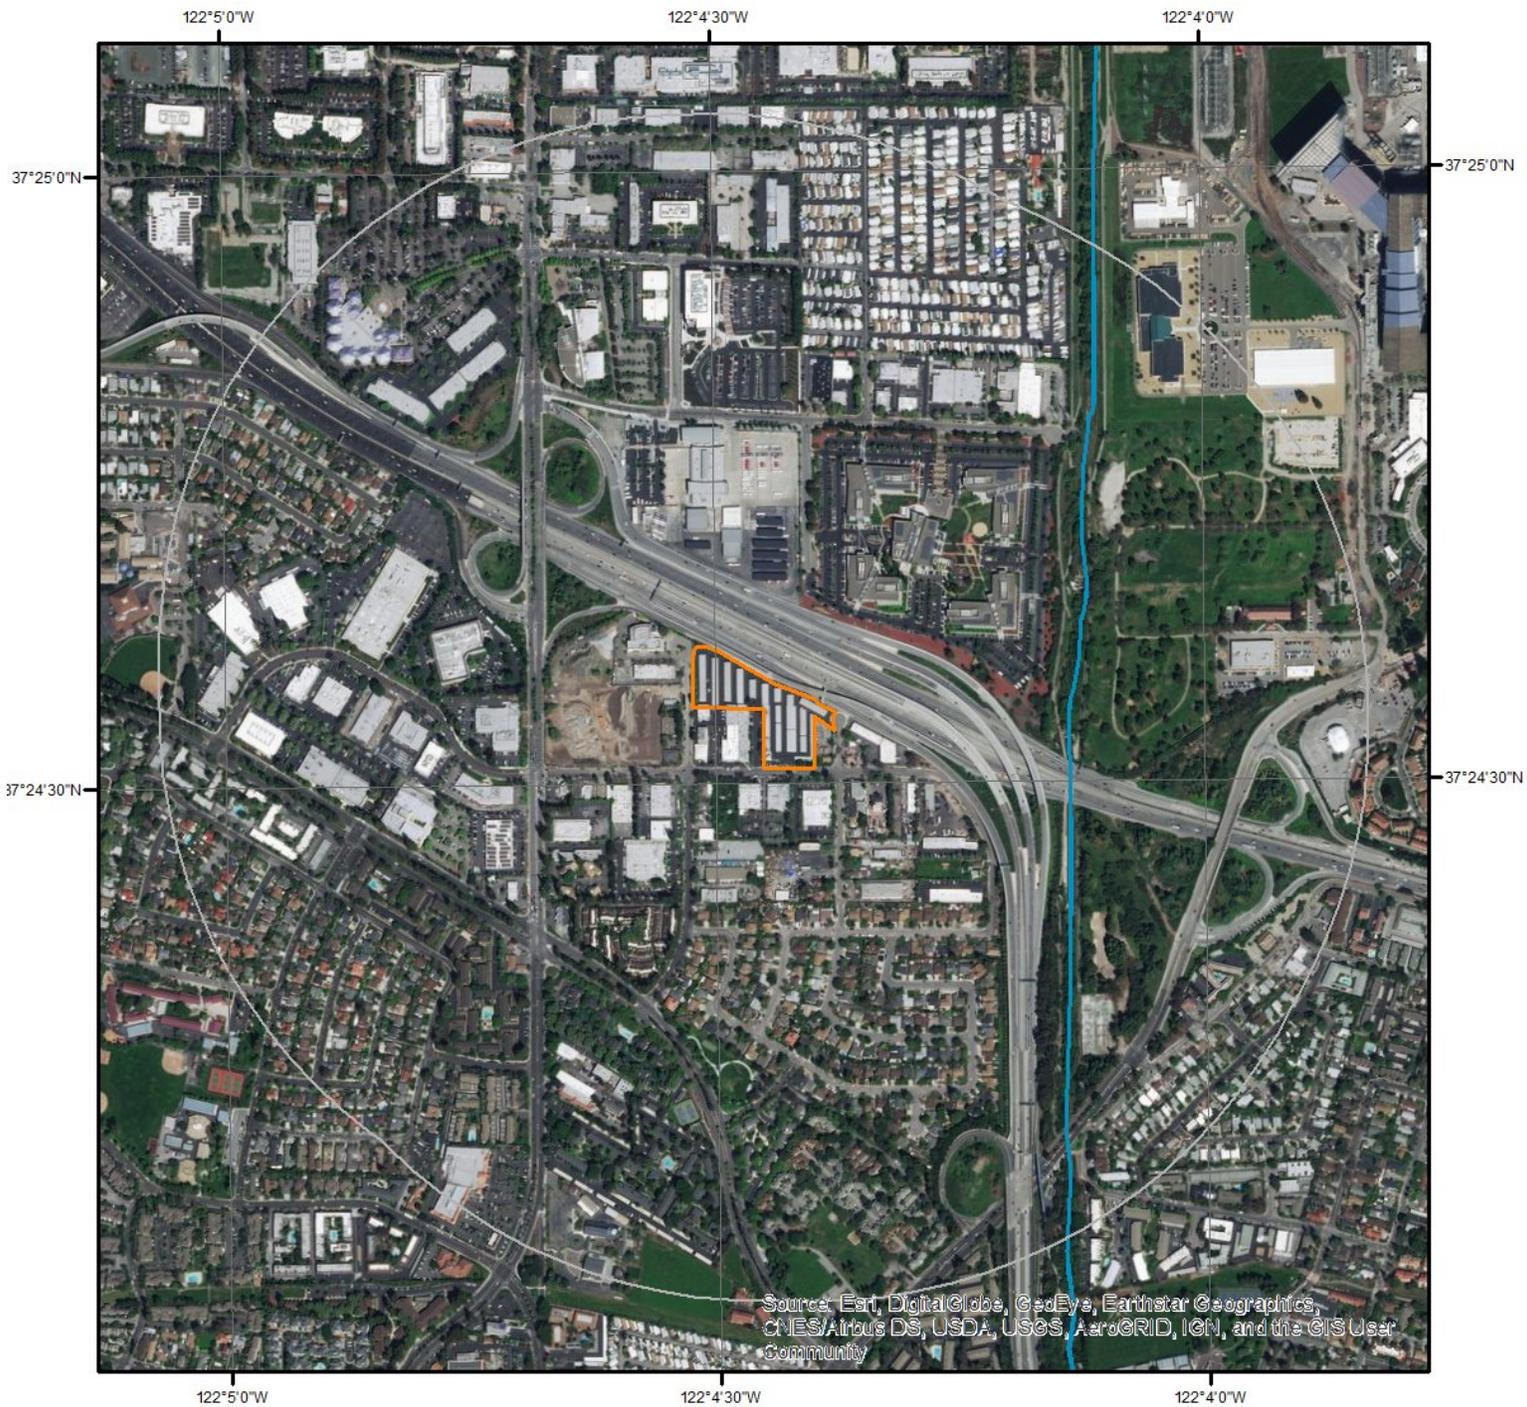

The previous topographic map(s) are created by seamlessly merging and cutting current USGS topographic data. Below are shaded relief map(s), derived from USGS elevation data to show surrounding topography in further detail.

Topographic information at project property:

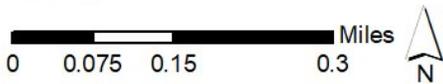

Elevation: 33.52 ft
Slope Direction: NNE

Hydrologic Information

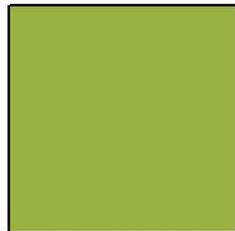

Wetland

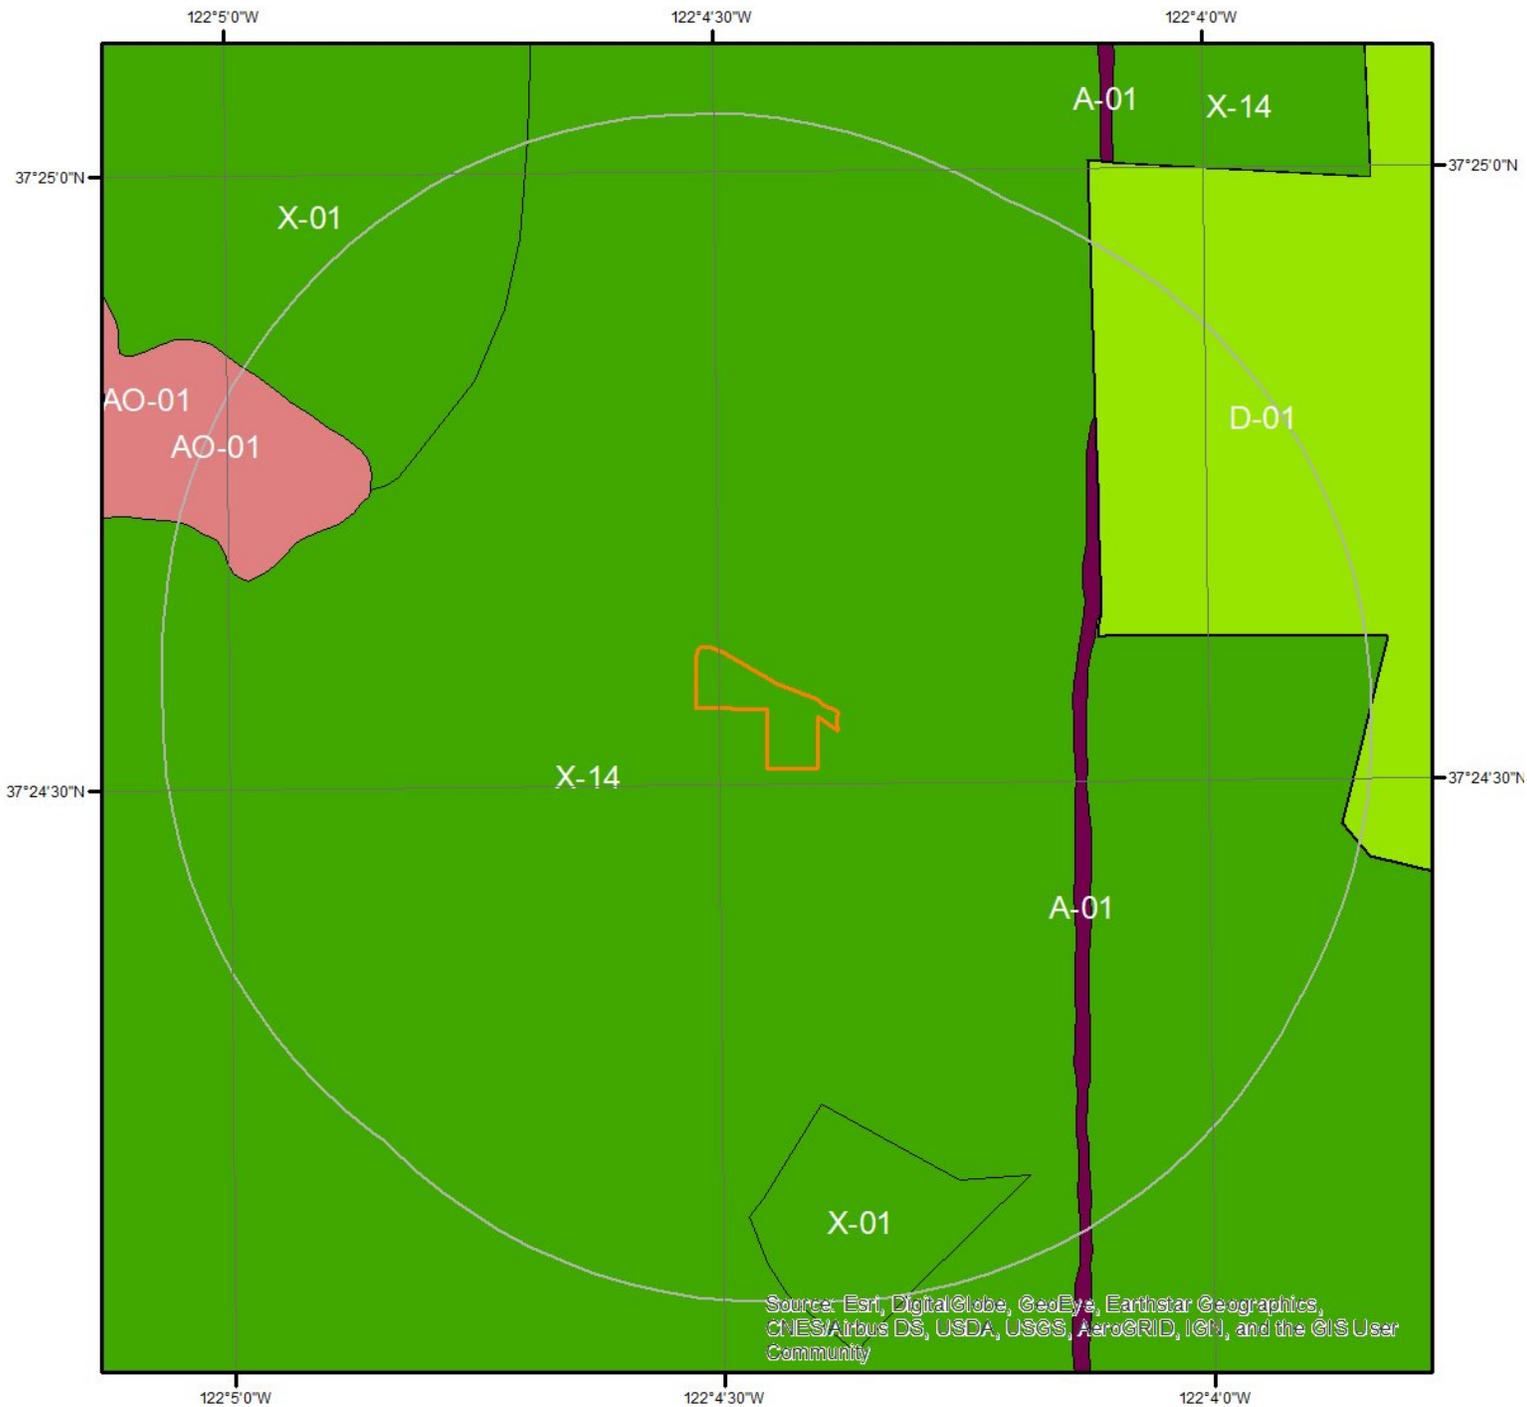

This map shows wetland existence using data from US Fish & Wildlife. Data coverage is shown to the right. Gray indicates no data available in the area.

|  AE |  VE |  NOT POPULATED |
|  AH |  D |  AREA NOT INCLUDED |

Hydrologic Information

The Wetland Type map shows wetland existence overlaid on an aerial imagery. The Flood Hazard Zones map shows FEMA flood hazard zones overlaid on an aerial imagery. Relevant FIRM panels and detailed zone information is provided below.

Available FIRM Panels in area: 06085C0037H(effective:2009-05-18) 06085C0039H(effective:2009-05-18)

Flood Zone A-01

Zone: A
Zone subtype:

Flood Zone AO-01

Zone: AO
Zone subtype:

Flood Zone D-01

Zone: D
Zone subtype:

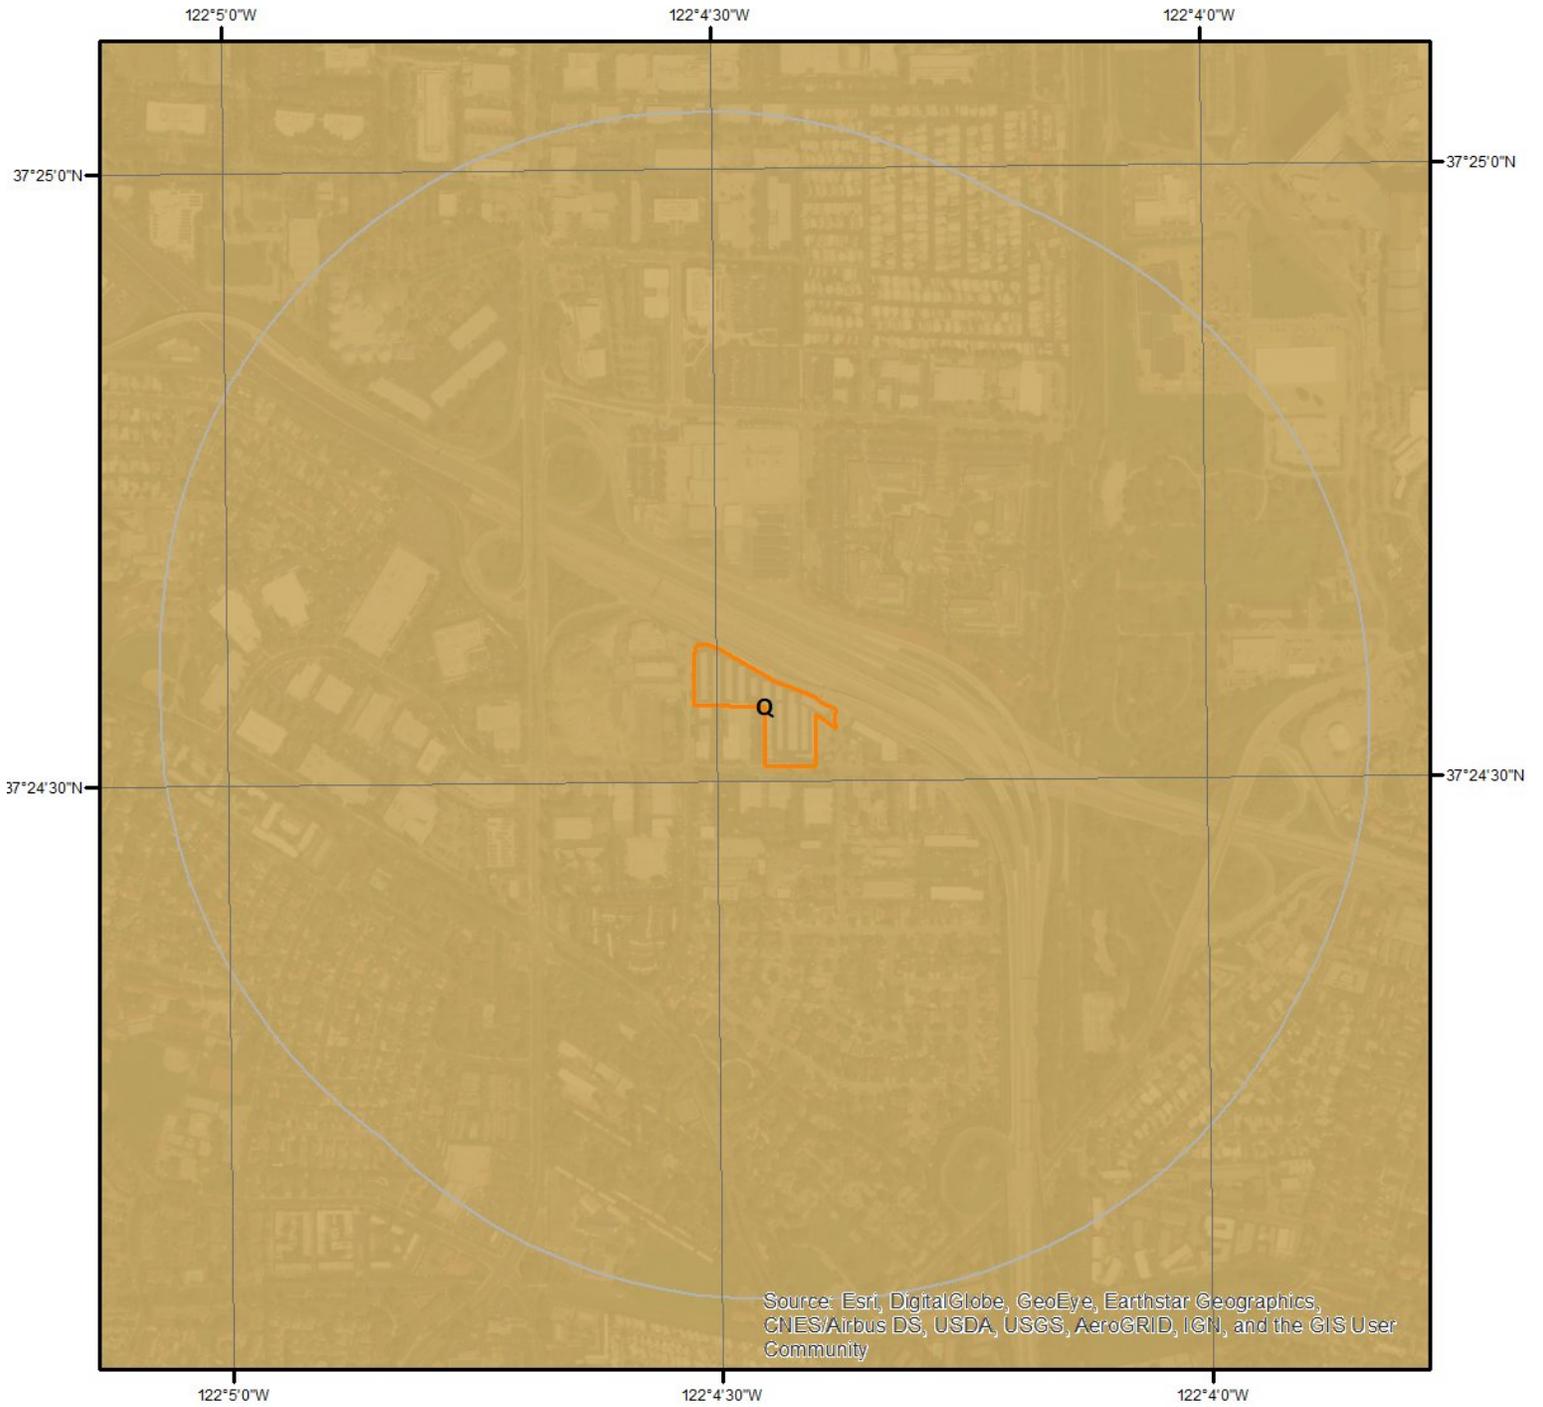

Flood Zone X-01

Zone: X
Zone subtype: 0.2 PCT ANNUAL CHANCE FLOOD HAZARD

Flood Zone X-14

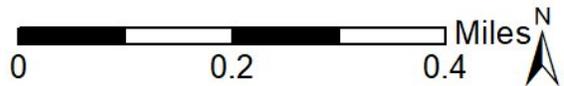

Zone: X
Zone subtype: AREA WITH REDUCED FLOOD RISK DUE TO LEVEE

Geologic Information

Geologic Units

This maps shows geologic units in the area. Please refer to the report for detailed descriptions.

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

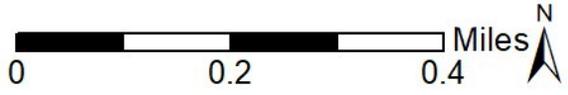

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pliocene to Holocene
Primary Rock Type:	alluvium
Secondary Rock Type:	terrace
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

Soil Information

Source: Esri, DigitalGlobe, GeoEye, Earthstar Geographics, CNES/Airbus DS, USDA, USGS, AeroGRID, IGN, and the GIS User Community

SSURGO Soils

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 145

Map Unit Name: Urbanland-Hangerone complex, 0 to 2 percent slopes, drained

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Hangerone(25%)

horizon A1(0cm to 24cm)	Clay
horizon A2(24cm to 42cm)	Clay
horizon Bw(42cm to 68cm)	Clay
horizon Bk(68cm to 88cm)	Clay
horizon Ck(88cm to 115cm)	Clay loam
horizon C(115cm to 183cm)	Gravelly loam
horizon 2Ab(183cm to 225cm)	Clay

Map Unit 165

Map Unit Name: Urbanland-Campbell complex, 0 to 2 percent slopes, protected

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Campbell(20%)

horizon Ap(0cm to 25cm)	Silt loam
horizon A1(25cm to 60cm)	Silt loam
horizon A2(60cm to 80cm)	Silty clay loam
horizon A3(80cm to 97cm)	Silty clay loam
horizon 2A(97cm to 130cm)	Silty clay loam
horizon 2Bw1(130cm to 180cm)	Silty clay
horizon 2Bw2(180cm to 200cm)	Silty clay

Map Unit 185

Map Unit Name: Urban Land - Bayshore complex, 0 to 2 percent slopes, drained

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

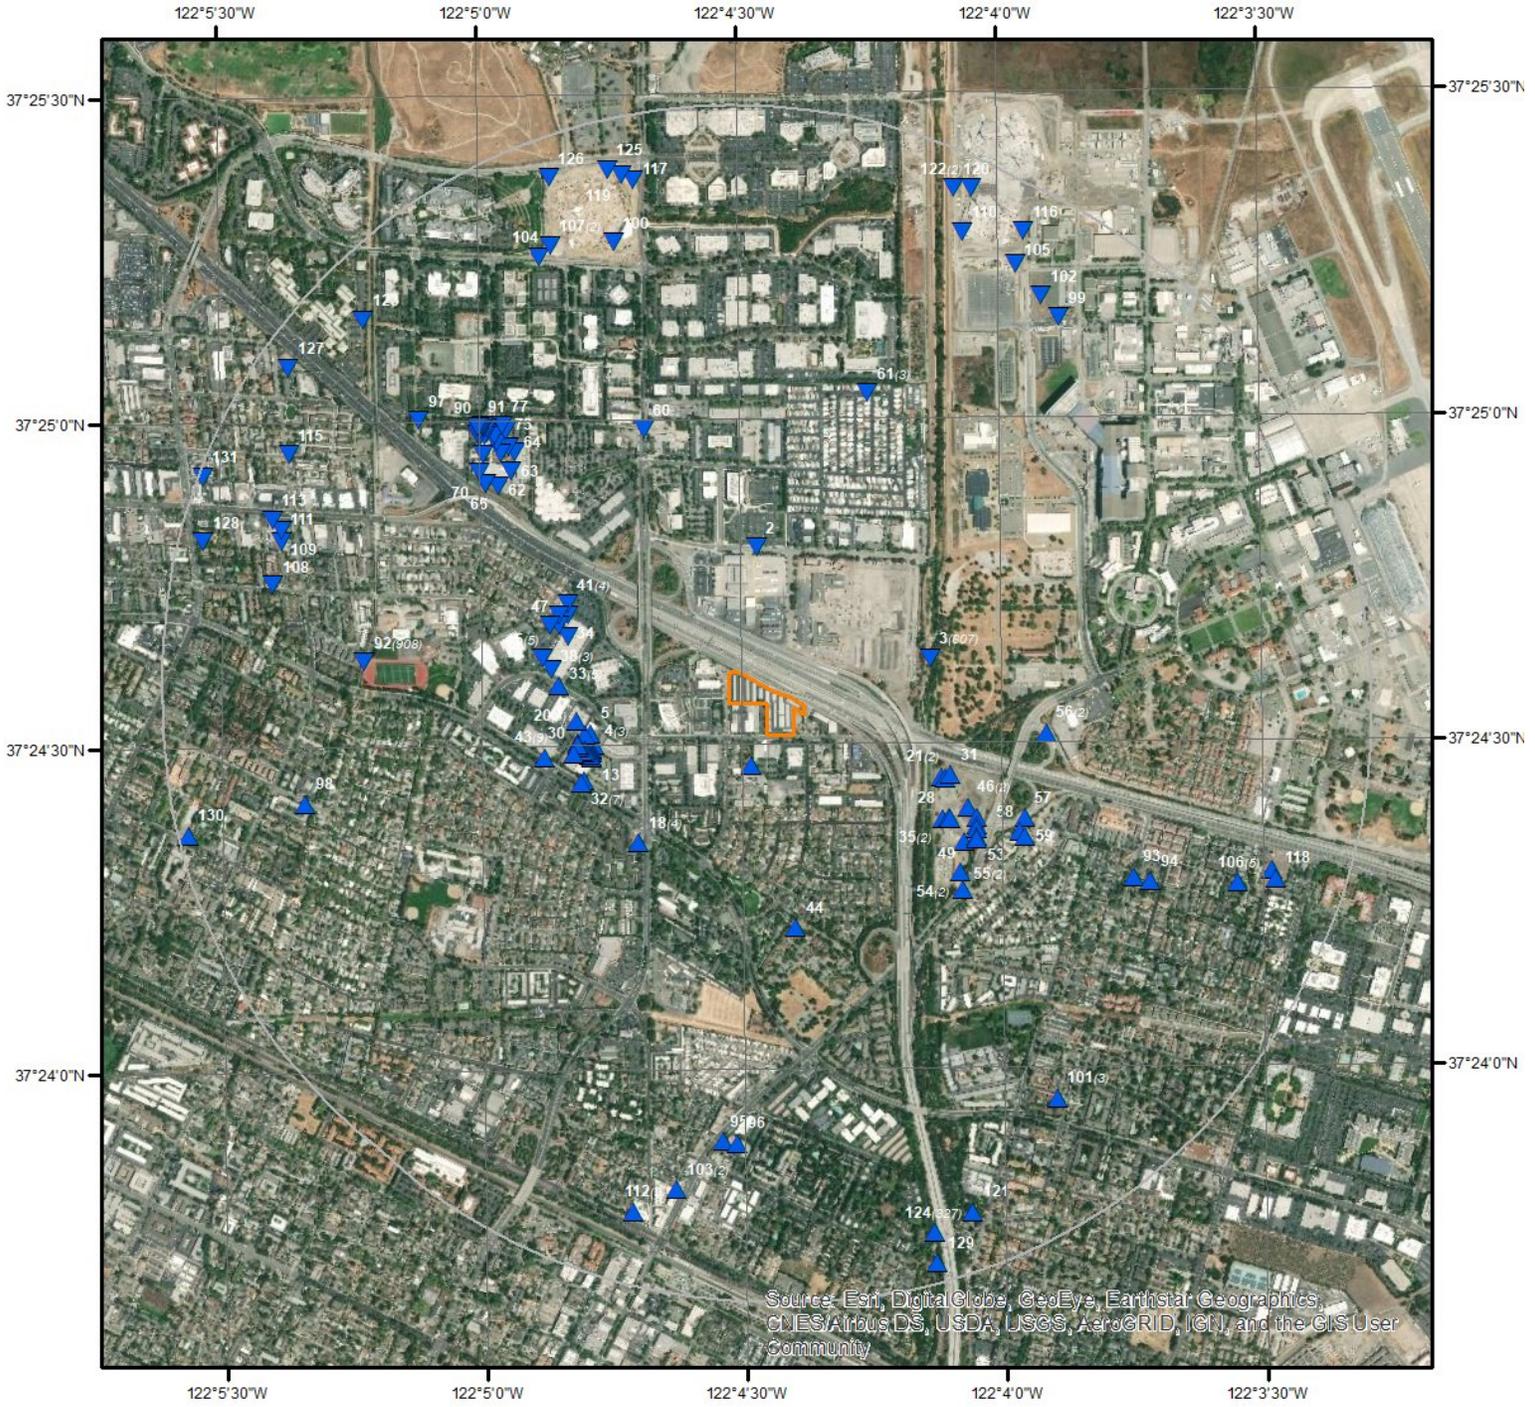

Major components are printed below

Bayshore(20%)

Soil Information

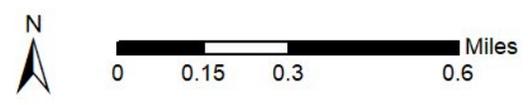

horizon A1(0cm to 7cm)	Loam
horizon A2(7cm to 30cm)	Loam
horizon ABt(30cm to 66cm)	Loam
horizon ABtk(66cm to 96cm)	Sandy clay loam
horizon Ck(96cm to 129cm)	Sandy clay loam
horizon C(129cm to 154cm)	Gravelly sandy loam

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for SANTA CLARA County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L

Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L

Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for SANTA CLARA County

No Measures/Homes:	77
Geometric Mean:	0.7
Arithmetic Mean:	1.4
Median:	1
Standard Deviation:	1.9
Maximum:	9.2
% >4 pCi/L:	9
% >20 pCi/L:	0
Notes on Data Table:	TABLE 1. Screening indoor radon data from the EPA/State Residential Radon Survey of California conducted during 1989-90. Data represent 2-7 day charcoal canister measurements from the lowest level of each home tested.

Federal Sources

FEMA National Flood Hazard Layer

FEMA FLOOD

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data

INDOOR RADON

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data

PWSV

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level

RADON ZONE

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS)

SDWIS

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database

SSURGO

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data

US WETLAND

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo

US TOPO

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology

US GEOLOGY

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System

FED USGS

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells

OGW

A list of Oil and Gas well locations. This is provided by California's Department of Conservation Division of

Appendix

Oil, Gas and Geothermal Resources.

Periodic Groundwater Level Measurement Locations

Locations of groundwater level monitoring wells in the Department of Water Resources (DWR)'s Periodic Groundwater Levels dataset. The DWR Periodic Groundwater Levels dataset contains seasonal and long-term groundwater level measurements collected by the Department of Water Resources and cooperating agencies.

MONITOR WELLS

Well Completion Reports

List of wells from the Well Completion Reports data made available by the California Department of Water Resources' (DWR) Online System for Well Completion Reports (OSWCR). Please note that the majority of well completion reports have been spatially registered to the center of the 1x1 mile Public Land Survey System section that the well is located in.

Appendix G: Historical Topographic Maps

TOPOGRAPHIC MAPS

Project Property: 19-4587-Terra Bella-PS20113
1055 San Leandro Ave and 1020 Terra Bella Ave
Mountain View CA 94043

Project No: 19-4587-Terra Bella-PS20113

Requested By: CRESurveys, LLC

Order No: 20191023141

Date Completed: October 24, 2019

We have searched USGS collections of current topographic maps and historical topographic maps for the project property. Below is a list of maps found for the project property and adjacent area. Maps are from 7.5 and 15 minute topographic map series, if available.

Year	Map Series
2015	7.5
1997	7.5
1995	7.5
1981	7.5
1973	7.5
1968	7.5
1961	7.5
1953	7.5
1961	15
1948	15
1943	15
1899	15
1897	15

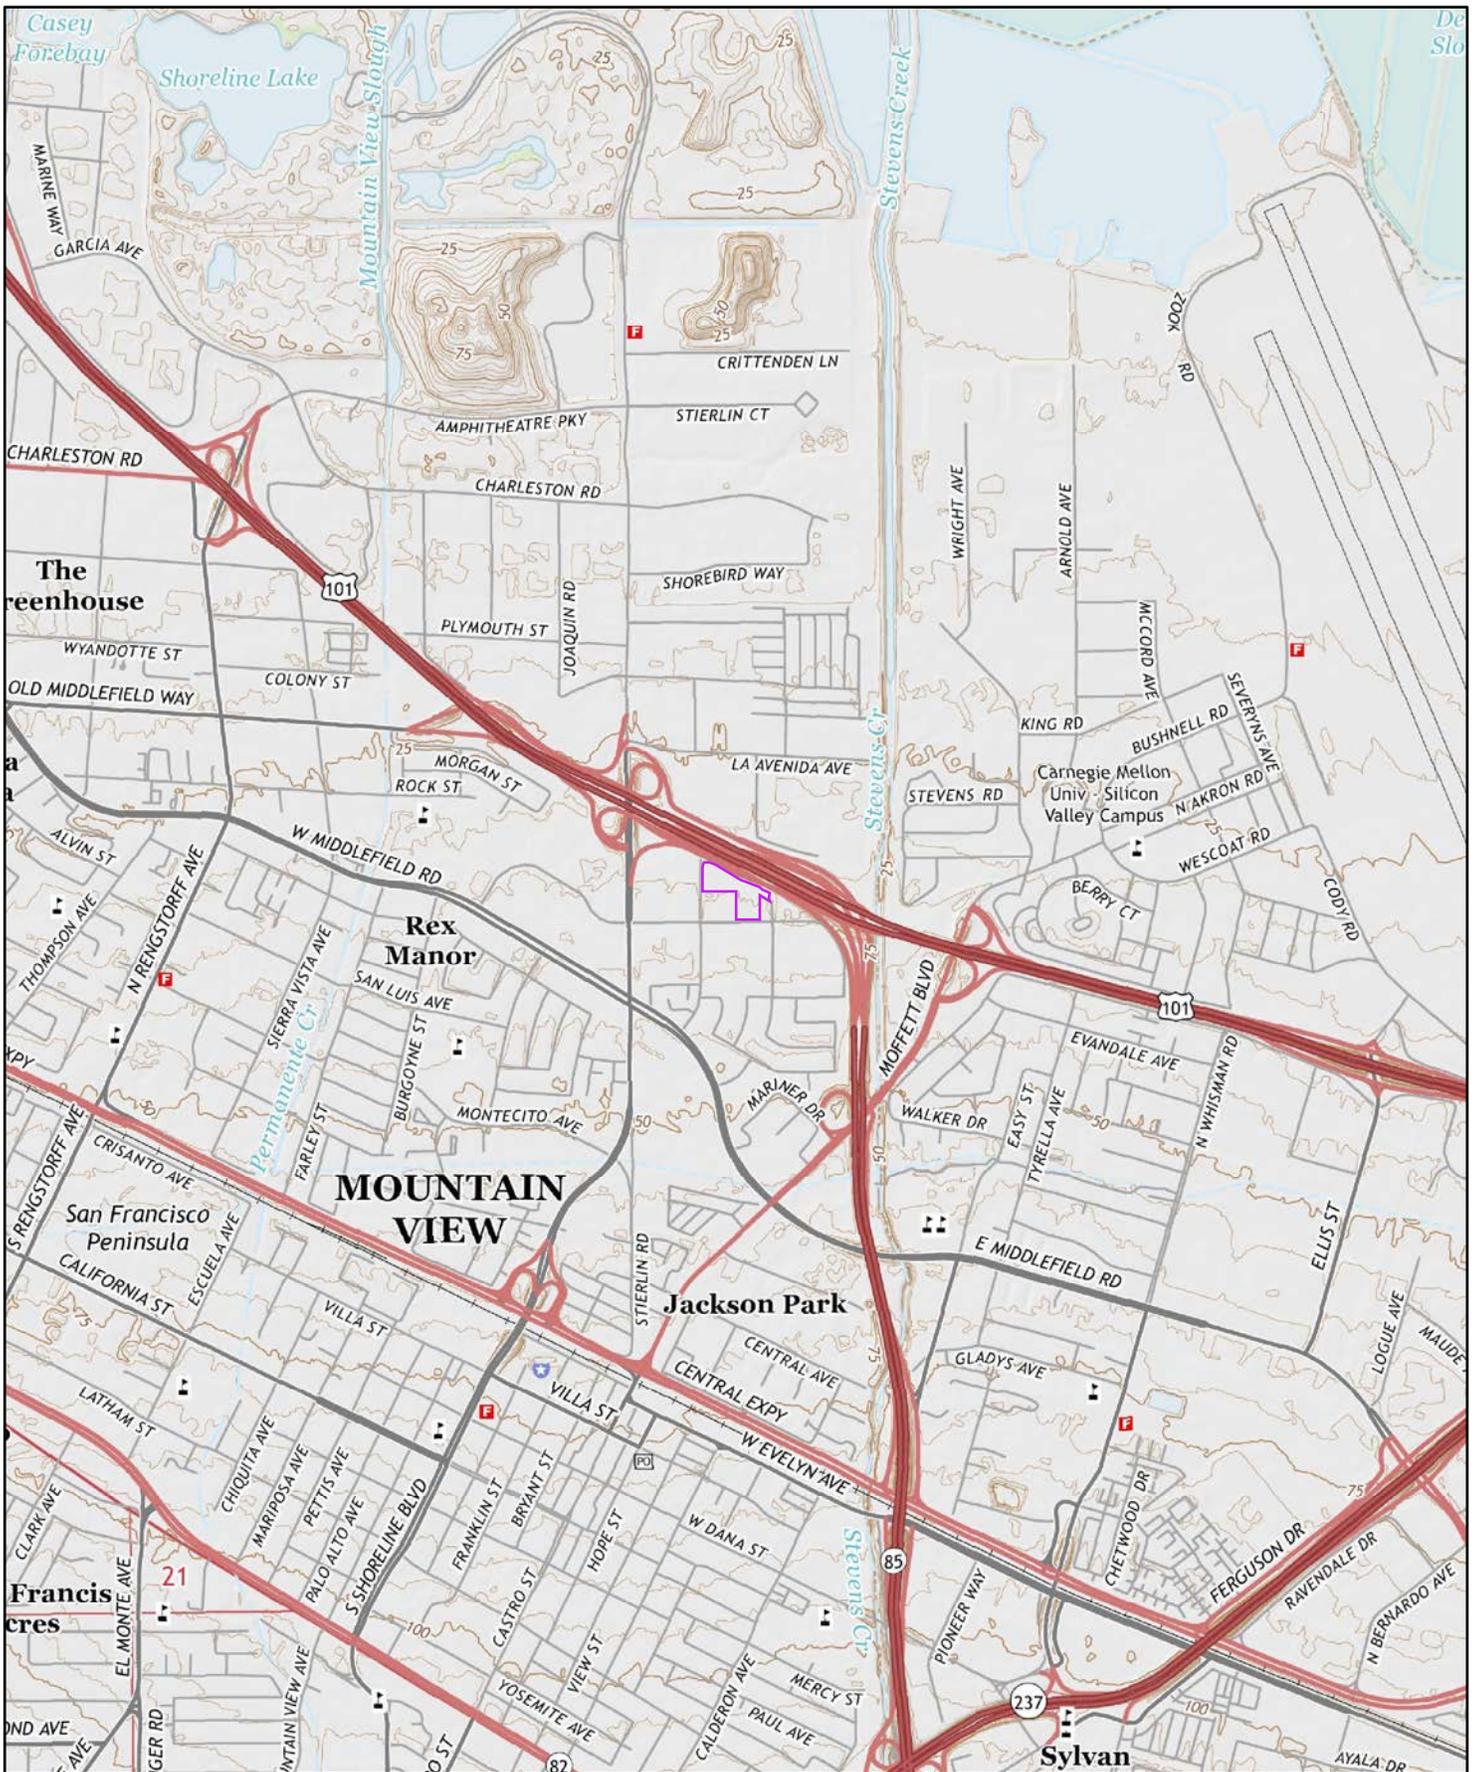

Topographic Maps included in this report are produced by the USGS and are to be used for research purposes including a phase I report. Maps are not to be resold as commercial property.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc.(in the US) and ERIS Information Limited Partnership (in Canada), both doing business as 'ERIS', using Topographic Maps produced by the USGS. This maps contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Appendix H: Historical City Directories

CITY DIRECTORY

Project Property: *19-4587-Terra Bella-PS20113
1055 San Leandro Ave and 1020 Terra Bella Ave
Mountain View, CA 94043*

Project No: *19-4587-Terra Bella-PS20113*

Requested By: *CRESurveys, LLC*

Order No: *20191023141*

Date Completed: *October 29, 2019*

October 29, 2019
RE: CITY DIRECTORY RESEARCH
19-4587-Terra Bella-PS20113
1055 San Leandro Ave and 1020 Terra Bella Ave Mountain View, CA

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

970-1140 of Terra Bella Avenue
950-1099 of Linda Vista Ave

Appendix K: Resumes

John O. Krusinski, Environmental Professional

Surveyor Environmental, Inc. Senior Project Manager and Environmental Consultant

This firm specializes in providing Environmental consulting, investigation and remediation services, property condition assessments, zoning services, construction consulting/management and training worldwide.

John Krusinski has completed thousands of successful projects worldwide since 1990.

Projects included:

Environmental Phase One Assessments

ALTA/ACSM surveys,

Property condition assessments

Zoning

Construction, Project managers and special inspections

Industrial Auditing/Consulting

Environmental Subsurface Investigations

Environmental Remediation Projects

Underground Storage Tank removal and management

Spill plan development

NEPA surveys and consulting

Biological assessments

Wetland delineation, mitigation and consulting

Project management

Site acquisition specialists

Construction management

Historical surveys and consulting

Archeological studies and consulting

Hazardous material evaluation and management

Asbestos Building inspector/management planner

The Orin Group, LLC - President/CEO/Founder

4/15/1992-6/12/2012

The Orin Group, LLC was an international consulting firm. I developed this company from a business plan to an internationally utilized and respected Company.

•Offices located in: Ohio, California, Rhode Island, Colorado, Virginia, Florida, Brazil, England and China.

•“Orin” quickly became an internationally respected consulting firm

- Progressive background in Operations Management and Human Resources, Sales and Marketing
- Proven business-building and management capabilities. Skilled in designing, implementing and tracking the effectiveness of programs to enhance productivity while motivating employees.
- Effective communication with a proven track record in project management, contract negotiation, problem negotiation and creative resolution
- Experienced in diversified environments including consulting, employee negotiation and management to creatively utilize employee skills and abilities
- Created and enforced a national diversity employment program
- Performed continuing research to update policies and procedures
- Promoted company image and established a system of recruitment for all employees
- Designed and implemented all in-house and in-field training
- Employee relations, employment and labor laws in multiple states
- Employees consisted of the following disciplines: Biologists, Geologists, Chemists, Engineers, Environmental Managers, Community Planners, Forestry Specialists, Historical Architects, Archeologists, Historians, Graphic Design Artists, Engineers and Surveyors

Oringen, Inc. – President

This company utilized technology invented at KSU to create devices that could identify organisms utilizing liquid crystal technology.

Standing Rock Imaging, LLC - President

Created products, systems and methods for the real time display and manipulation of extremely large data sets using real time volume rendering and display of stereoscopic volumetric images using all the data for extremely large data sets.

McCabe/Orin - Partner

This national company builds and upgrades cellular towers for the telecommunication industry.

Project Management International, LLC - Partner

This company provides project management for the US Government, military and local governments.

Kent State University, College of Arts and Sciences Advisory Board: 1998 -2013

Former Director of Environmental Technology, Kent State University

Military Services Personnel Corporation - Executive Vice President of Environmental Programs

This company serves the United States Government as a contractor worldwide. Project areas include: Environmental Investigation/Remediation, Construction, Providing administrative personnel, Project management and training.

Academy of Environmental Sciences, Inc. - Founder- A national company, which provided training nationwide on environmental and construction/real estate topics. Clients included Real Estate agents to receive continuing education credits for the Ohio Board of Realtors, Asbestos workers to become, and maintain, certification with the Environmental Protection Agency. Environmental consultants can receive training in wetland consulting and other environmental topics.

Founder, President and CEO

1993-1998

*Developed this company from a business plan and staffed it with employees from Orin

- This corporation was created as a for profit company
- Value added considerations include: Improved corporate image for the Academy and Orin Environmental, Inc. It was also utilized as an incentive program for the staff
- Presented training courses and lectures for classes varying in size from a handful to over 100 participants
- Wrote and designed course objectives and goals at the same time assuring that they met state and/or federal requirements

Environmental Support Network - Hired to establish and create a regional office and complete work as an environmental consultant

ACRT Inc. - Hired to market and complete environmental assessments

T. Environmental Consulting -Environmental Consultant. Completed Environmental Site assessments, subsurface investigations, Underground tank removal, Environmental remediation and provided consulting to industrial clients on employee training, OSHA and other work place regulations.

Valley Fire and Rescue - Lieutenant,

University of Michigan – Research, The effects of acid rain on the Great Lakes region. 1987-1991

Certifications

Building Inspector (Asbestos)

Management Planner (Asbestos)

Certified Hazardous Material Evaluator

Los Altos, CA 94022

SUBJECT: REPORT – SOIL AND GROUNDWATER SAMPLING & ANALYSIS
1020 Terra Bella Avenue
Mountain View, California

Dear Mr. Saviano:

E₂C, Inc. is presenting herein our report to document the soil and groundwater sampling and analysis for the subject site (Site) located at 1020 Terra Bella Avenue in Mountain View, California (Figure1). The purpose of this investigation is to determine if the Site has been impacted by the migration of contamination via groundwater from off-site source(s). The following Scope of Services addresses the present investigation

SCOPE OF WORK

The Scope of Work for the soil and groundwater sampling is as follows:

- Advance four hydropunch sample points at various locations at the Site,
- Collect one shallow soil sample and one grab groundwater sample from each of the hydropunch locations,
- Analyze soil and groundwater samples, and
- Prepare a final report, documenting the soil and groundwater sampling.

BACKGROUND

Environmental Solutions, Inc. completed a Phase I Environmental Site Assessment (ESA) at the Site dated December 1993. The following is a summary of environmental related findings from the ESA.

- The property was purchased by Mr. Gilbert Taylor in 1980. At that time the Site consisted of a residence, a detached building on a grass covered lot
- Mr. Taylor intended to use the rear of the Site for equipment storage by laying down baserock. However, Mr. Taylor did not store equipment at this location.
- During the mid to late 1980's Varsity Towing stored towed vehicles at the Site. However, onsite car dismantling or repair was not allowed.

E₂C INC
ENVIRONMENTAL / ENGINEERING CONSULTANTS
S i n c e 1 9 7 0

382 Martin Avenue, Santa Clara, CA 95050-3112 Tel: 408.327.5700 Fax: 408.327.5707

- From about 1990 to an unknown date, the Site was leased to "911" an ambulance company for storing vehicles, equipment and for housing ambulance crews. Vehicle repair was not allowed on the premises. In the early 1990's the site was asphalted to create paved parking areas for the ambulance company.
- An Environmental Risk Information & Imaging Services report for the Site from 1993 indicated that there were 138 environmentally listed sites within a one-mile radius of the Site.
- Mr. Taylor indicated in 1993 that to the best of his knowledge, there were no spills, leaks, tanks or hazardous material storage during his ownership.

SHALLOW SOIL AND GRAB GROUNDWATER SAMPLING AND ANALYSIS

Shallow soil and grab groundwater sampling and analysis were performed to assess the presence or absence of chemicals in shallow soil and groundwater at the Site.

Shallow Soil and Grab Groundwater Sampling

An E2C, Inc. employee was on-site along with the Environmental Testing Company on December 7, 2001 to advance four hydro-punch borings (HP-1, HP-2, HP-3, and HP-4) at the Site, for the collection of shallow soil and grab groundwater samples. Borings HP-1 and HP-2 were advanced at down gradient locations at the Site, whereas HP-3 and HP-4 were advanced at upgradient locations at the Site (Figure 2).

The Hydropunch method consisted of continuous core sampling driven by vehicle-mounted direct-push equipment. Using the weight of the vehicle, a 4-foot long, 2-inch diameter core sampler containing acetate sample tubing, is advanced into the ground. The core sampler is then removed from the ground and the tubing containing the soil core is retained for lithologic description and soil sample collection. The soil sample for laboratory analysis is obtained by cutting off a section of the sample tubing and then covering the ends of the section with a small sheet of Teflon and tight-fitting caps. Soil obtained from 1 to 2 feet, bgs, in each boring was selected for laboratory analysis.

The four borings were then advanced to depths from 12 to 14 feet, bgs. Olive gray, Silty Clay soil was encountered in each boring to depths ranging from 7.5 to 10 feet, bgs. Underlying the Silty Clay to the total depth of each boring was Gravelly Silt. This zone was saturated with groundwater. After the desired depth was achieved, 1-inch diameter well screen was temporarily placed in the boring. Groundwater in the hydropunch borings rose to depths ranging from 3.5 to 7.7 feet, bgs. This response indicates that groundwater occurs under confining conditions at the Site. Descriptions of soils encountered in each boring are presented in the boring logs contained in Appendix A.

After installation of the well casing at each boring, grab groundwater samples were collected with ¾-inch diameter disposable bailers and dispensed into three VOAs, one 250 ml plastic bottle and one 1-liter amber jar, which are appropriate for the required analyses. The containers were filled in a manner to minimize the evaporation of volatile constituents and eliminate any entrapped air or headspace. The containers were secured, labeled, and placed in an iced cooler for transport to the laboratory.

After advancement and sample collection, all borings were backfilled using a Type II Portland cement grout that was tremied into the borings and brought to existing grade.

Laboratory Analysis

Grab groundwater samples were analyzed at McCampbell Analytical Labs, Inc. of Pacheco, California, for the following:

- Benzene, toluene, ethylbenzene, and total xylenes (BTEX) and MTBE by EPA Method 8020;
- Volatile organic compounds (VOCs) by EPA Method 8010;
- TPH as diesel by EPA Method 8015 MOD. (Extractable);
- TPH as gasoline by EPA Method 8015 MOD. (Purgeable); and
- LUFT 5 Metals: Chromium, Copper, Lead, Nickel, and Zinc by EPA Method 6010/200.7

Results of Shallow Soil Analytical Testing

Laboratory reports and chain-of-custody records for shallow soil samples (HP-1-1, HP-2-1, HP-3-1 and HP-4-1) collected from the borings on December 7, 2001 are presented in Appendix B. Results of analytical testing of the shallow soil samples are summarized in Table 1.

VOCs, TPHg, BTEX, and MTBE were not detected at or above the reported method detection limits in any of the soil samples. As such, these compounds are not a concern.

Chromium, Copper, Lead, Nickel, and Zinc were detected in the four shallow soil samples at concentrations summarized in Table 1. These concentrations are well below Preliminary Remediation Goals (PRGs) for residential soil and industrial as established by Region 9 of the EPA. As such, we believe these five metals do not significantly impact the shallow soils at the Site.

TPHd was detected in samples HP-1-1 and HP-2-1 concentrations of 11 and 14 milligrams per kilogram (mg/kg). The laboratory noted that the detected TPHd contained significant oil range compounds. Since TPHd is a chemical compound the reported concentrations cannot be compared to PRG's. However, the detected TPHd concentrations are well below the generally accepted action level of 100 mg/kg. Therefore, the TPHd concentrations in shallow are not a concern.

Results of Grab Groundwater Analytical Testing

Laboratory reports and chain-of-custody records for grab groundwater samples HP-1-G, HP-2-G, HP-3-G and HP-4-G collected from the borings on December 7, 2001 are presented in Appendix B. Results of analytical testing of the grab groundwater samples are summarized in Table 2.

LUFT 5 Metals, TPHg, BTEX, and MTBE were not detected at or above the reported method detection limits in any of the grab groundwater samples. As such, these compounds are not a concern.

VOCs were not detected in grab groundwater samples HP-1-G, HP-2-G, HP-3-G and HP-4-G at or above the method detection limit, except that 1,1-dichloroethane (1,1-DCA) was detected at a concentration of 0.51 micrograms per liter ($\mu\text{g/l}$) in HP-4-G. The

concentration of 1,1-DCA detected in HP-4-G is well below the 1,1-DCA maximum contaminant level (MCL) of 5.0 $\mu\text{g/l}$ established by the State of California. It should be noted that 1,1-DCA was previously detected in groundwater at an upgradient property occupied at the time by the El Camino Paving Company.

TPHd was detected in the grab groundwater samples at concentrations ranging from 180 to 850 $\mu\text{g/l}$. Since TPHd is a chemical compound the reported concentrations cannot be compared to PRG's. Although the TPHd concentrations detected in the grab-groundwater samples appear somewhat elevated, they may not represent true groundwater conditions. In our experience, TPHd may be detected at higher concentrations in sediment laden grab groundwater samples than from groundwater samples collected from properly developed groundwater monitoring wells. The highest concentration (850 $\mu\text{g/l}$) of TPHd was detected in grab-groundwater sample HP-4-G, which, is an upgradient sampling location. It should be noted that TPHd was not detected in shallow soil samples HP-3-1 and HP-4-1, suggesting that the Site is not a source of the TPHd detected in the grab groundwater samples. As such, TPHd does not appear to be a concern.

FINDINGS AND CONCLUSIONS

The findings and conclusions of this investigation are as follows:

- There appear to be no known spills, leaks, tanks or hazardous materials stored at the Site.
- VOCs were not detected in shallow soil or grab groundwater samples collected from Hydropunch borings HP-1, HP-2, HP-3 and HP-4, except that 1,1-DCA was detected in grab groundwater from HP-4-G at a concentration less than the applicable MCL. The 1,1-DCA more likely than not originated at an upgradient/offsite source.
- TPHg, MTBE and BTEX compounds were not detected in shallow soil or grab groundwater samples collected from Hydropunch borings HP-1, HP-2, HP-3 and HP-4. Therefore these compounds are not concern.
- The LUFT 5 Metals: chromium, copper, lead, nickel and zinc were detected in shallow soil at the Site at concentrations lower than the applicable PRGs for residential soils. Therefore LUFT 5 metals are not a concern.
- TPHd was detected in all grab groundwater and two of the shallow soil samples. The TPHd detected in the grab groundwater samples may have originated from offsite source. The TPHd detected at relatively low concentrations in two of the four shallow soil samples are not a concern.

RECOMMENDATION

No further environmental investigation is recommended at this time.

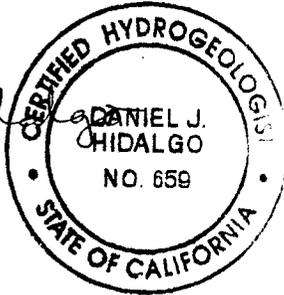

REPORT CERTIFICATION

To the best of our knowledge, all statements presented in this report are true and correct. Should you have any questions or require supplemental information, please feel free to contact us.

Sincerely,

Daniel Hidalgo

ANALYSIS REQUESTED

TURNAROUND REQUIREMENTS
 24 hr
 48 hr
 6 day
 Standard
 Other (Specify)
 Provide Verbal Preliminary Results
 Requested Report Date

REPORT REQUIREMENTS
 I. Routine Report
 II. Report Includes DUP, MB, MBD, as required, may be changed as samples
 III. Data Validation Report (Include All Raw Data)
 RWOCB

REMARKS
 Please fax results to Ken Price as soon as they are available

85028
 85028

MTBE
 Cr, Cu, Pb, Ni, Zn

CAN METALS 8010/700

GCMS 824/824/820 VOLATILE ORGANICS

801/8010 HALOGENATED VOLATILES

802/8020 BTEX

802/8020 DIESEL FCO GASOLINE

801/8020/802 TRH GAS/BTEX

% Recovery Surrogate	92	101	94	100
Comments		i		i

* water and vapor samples and all TCLP & SPLP extracts are reported in ug/L, soil and sludge samples in ug/kg, wipe samples in ug/wipe
 Reporting limit unless otherwise stated: water/TCLP/SPLP extracts, ND<0.5ug/L; soils and sludges, ND<5ug/kg; wipes, ND<0.2ug/wipe

ND means not detected above the reporting limit; N/A means analyte not applicable to this analysis

(b) tribromomethane; (c) tetrachloromethane; (d) (2-chloroethoxy) ethene; (e) trichloromethane; (f) dichloromethane; (g) chloroethene; (h) a lighter than water immiscible sheen is present; (i) liquid sample that contains greater than ~5 vol. % sediment; (j) sample diluted due to high organic content

DHS Certification No. 1644
