Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address: 800 SAN CLEMENTE ST
City,State,Zip: NEEDLES, CA 92363
Site ID: 102491
CERS ID: 10001698
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 102491
Site Name: Caltrans-Needles
Violation Date: 03-11-2020
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.

Violation Notes: OBSERVATION: The hazardous materials inventory submitted via CERS is not accurate based upon what was observed on-site. CORRECTIVE ACTION: Update the chemical inventory via CERS to match what was observed on-site and re-submit all CERS documents within 30 days.

Violation Division: San Bernardino County Fire Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 102491
Site Name: Caltrans-Needles
Violation Date: 03-11-2020
Citation: HSC 6.67 25270.4.5 (a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5 (a)

Violation Description: Failure to complete a review and evaluation of the SPCC Plan at least once every five years, document the completion of the review, and sign a statement as to whether the SPCC Plan will be amended.
Violation Notes: OBSERVATION: The SPCC plan was last reviewed/written on 11/22/2013, which is over 5 years ago. CORRECTIVE ACTION: Submit a signed statement indicating that the 5-year review has been performed, documented and SPCC plan amended if necessary.

Site ID: 102491
Site Name: Caltrans-Needles
Violation Date: 11-28-2017
Citation: HSC 6.95 25508.1(a)-(f) - California Health and Safety Code, Chapter 6.95, Section(s) 25508.1(a)-(f)
Violation Description: Failure to electronically update business plan within 30 days of any one of the following events: A 100 percent or more increase in the quantity of a previously disclosed material. Any handling of a previously undisclosed hazardous materials at or above reportable quantities. A change of business address, business ownership, or business name. A substantial change in the handler's operations that requires modification to any portion of the business plan.
Violation Notes: Returned to compliance on 12/15/2017. Observed (1) 55 gallon drum of Orang-Solv Plus on site at the time of the inspection. This material was not listed in the hazardous materials inventory submitted via CERS. Update the maximum daily amount of used motor oil disclosed in the hazardous materials inventory to 250 gallons; per the container size observed on site at the time of the inspection. Change the response to "does this facility generate hazardous waste" to "yes" in the CERS business activities. Compliance Requirement: Sign the Certificate of Compliance in attestation that the hazardous materials inventory has been updated to disclose all hazardous materials stored on site above reportable thresholds, and all hazardous waste; and that, the business activities has been updated to disclose that this facility generates hazardous waste.

Comments: Not reported
Description: Caller reported that hydraulic oil discharged from a ruptured hydraulic hose on a garbage truck. The material sprayed onto the yard and driveway killing plants and grass in the affected area. The spill occurred three weeks ago and the responsible pparty applied kitty litter to the oil in the street and driveway, but oil is still seeping up from the cement.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to include in the SPCC Plan a prediction of the direction, rate of flow, and total quantity of oil that could be discharged for each type of major equipment failure where experience indicates a reasonable potential for equipment failure. The rate of flow is not required on a Tier I qualified facility SPCC Plan.

Violation Notes: Returned to compliance on 03/11/2020. OBSERVATION: OBSERVED NO RATE OF FLOW, PREDICTION OF DIRECTION AND TOTAL QUANTITY DISCHARGED FOR EACH TYPE OF MAJOR EQUIPMENT FAILURE IDENTIFIED IN SPILL SCENARIOS IDENTIFIED IN YOUR SPCC PLAN. CORRECTIVE ACTION: UPDATE PLAN TO INCLUDE, RATE OF FLOW, PREDICTION OF DIRECTION AND TOTAL QUANTITY DISCHARGED FOR EACH TYPE OF MAJOR EQUIPMENT FAILURE LISTED IN SPCC PLAN. SUBMIT STATEMENT INDICATING SPCC PLAN IS UPDATED WITH REQUIRED INFORMATION ALONG WITH SIGNED CERTIFICATE OF COMPLIANCE WITHIN 30 DAYS. 6/24/20 UPDATED SPCC plan recieved on 3/11/19. Discharge prediction was found in Section 3.9 Spill scenarios. Violation corrected PS

Violation Description: 6.67, Section(s) 25270.4.5(a)
Failure to include in the SPCC Plan: 1. A contact list and phone numbers for the facility response coordinator, National Response Center, cleanup contractors with an agreement for response, and all Federal, State, and local agencies who must be contacted in case of a discharge 2. Information and procedures that would enable a person reporting an oil discharge to relate all information as described in 40 CFR 112.7(a)(4), unless facility submitted a Facility Response Plan.

Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: OBSERVED CONTACT LIST MISSING CUPA EMERGENCY CONTACT NUMBER. CORRECTIVE ACTION: ADD CUPA EMERGENCY CONTACT NUMBER, (909)386-8425 OR (800) 33-TOXIC TO CONTACT LIST ON SPCC PLAN. SUBMIT A SIGNED CERTIFICATE OF COMPLIANCE WITH STATEMENT INDICATING CUPA EMERGENCY CONTACT NUMBER IS ADDED TO CONTACT LIST WITHIN 30 DAYS. 3/11/19- CERS plan updated with required information. PS Violation corrected.

Violation Division: San Bernardino County Fire Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 116847
Site Name: FLEET MGMT NEEDLES YARD
Violation Date: 01-23-2019
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: "Failure to prepare an SPCC Plan which fulfills all basic requirements that include: 1. The SPCC Plan must be prepared in accordance with good engineering practices. 2. Have full approval of management at a level of authority to commit the necessary resources to fully implement the SPCC Plan. 3. Prepare the SPCC Plan in writing. 4. Follow the sequence of the SPCC rule or include a cross-reference. 5. If the SPCC Plan calls for additional procedures, methods, or equipment not yet fully operational, discuss the items in separate paragraphs."

Violation Notes: Returned to compliance on 03/11/2019. OBSERVATION: SPCC PLAN DID NOT HAVE REQUIRED MANAGEMENT APPROVAL STATEMENT. SPCC PLAN DID NOT FOLLOW THE SEQUENCE OF THE SPCC RULE OR HAVE A CROSS REFERENCE. CORRECTIVE ACTION: SUBMIT A SIGNED STATEMENT INDICATING YOUR SPCC PLAN HAS BEEN UPDATED TO MEET ALL BASIC REQUIREMENTS ALONG WITH SIGNED CERTIFICATE OF COMPLIANCE WITHIN 30 DAYS. 6/24/20 updated SPCC plan recieved on 3/11/19. Management approval stmt and reference section available. Violation corrected PS.

SIC Code: 7033
SIC Code 2: 4952
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste: DOMEST
Waste Type2: Not reported
Waste2: Domestic Sewage
Primary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Violation Description: Failure to test leak detection equipment as required every 12 months (VPH, sensor, LLD, ATG, etc.) and/or submit monitoring system certification to the CUPA within 30 days of completion of the test
Violation Notes: Returned to compliance on 04/07/2015. OBSERVATION: TECHNICIAN WAS UNABLE TO TEST THE TWO LINE LEAK DETECTORS. THE FUEL IN THE TANKS WERE LOW, WHICH PREVENTED THE TEST FROM BEING OPERATED. COMPLIANCE REQUIREMENT: WITHIN 30 DAYS, TEST THE TWO LINE LEAK DETECTORS. TEST OF THE TWO LINE LEAK DETECTORS MUST BE WITNESSED BY THIS DEPARTMENT

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/26/2022	Source: EPA

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMs by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/20/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 06/28/2022	Last EDR Contact: 06/21/2022
Number of Days to Update: 7	Next Scheduled EDR Contact: 10/03/2022

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/16/2022	Source: Department of the Navy
Date Data Arrived at EDR: 05/19/2022	Telephone: 843-820-7326
Date Made Active in Reports: 07/29/2022	Last EDR Contact: 08/03/2022
Number of Days to Update: 71	Next Scheduled EDR Contact: 11/21/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 05/16/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/24/2022	Telephone: 703-603-0695
Date Made Active in Reports: 07/29/2022	Last EDR Contact: 08/17/2022
Number of Days to Update: 66	Next Scheduled EDR Contact: 12/05/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 05/16/2022	Source: Environmental Protection Agency

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

	Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/08/2022	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 05/09/2022	Telephone: 860-424-3375

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

October 4, 2022

Mr. Colin Drukker

Placeworks

3 MacArthur Place, Suite 1100

Santa Ana, CA 92707

Subject: Needles Transportation Element – Level of Service (LOS) and Vehicle Miles Traveled (VMT)
 Analysis

Dear Mr. Drukker:

KOA Corporation presents this level of service (LOS) and vehicle miles traveled (VMT) analysis report for the Transportation Element Update for the City of Needles General Plan. This report documents the potential transportation impacts associated with the project per the California Environmental Quality Act (CEQA). The analysis methodology, assumptions, and results of the LOS and VMT analysis are presented herein.

The analysis has been prepared for your review and submittal to the City of Needles. Please contact our office if you have any questions or comments about the report, or if you need additional information. If there are any comments that require response or revisions, please notify our office as soon as possible for prompt revision.

Sincerely,

Joel Falter
Principal

1.0 INTRODUCTION

BACKGROUND

On September 27, 2013, Governor Jerry Brown signed into law Senate Bill 743 (SB 743), which updated the transportation impact metrics evaluated under the California Environmental Quality Act (CEQA). Following the passage of SB 743, the State of California Governor's Office of Planning and Research (OPR) was tasked with developing new guidelines for evaluating transportation impacts under CEQA. These guidelines are intended to promote the reduction of greenhouse gas emissions and develop a multimodal and diverse transportation network by shifting the transportation performance metric from automobile delay and Level of Service (LOS) to Vehicle Miles Traveled (VMT). As a result, OPR determined that under the proposed update to the CEQA guidelines, VMT would be established as the primary metric for evaluating environmental and transportation impacts. In December 2018, OPR published the revised CEQA Guidelines incorporating the transition to VMT, along with the *Technical Advisory on Evaluating Transportation Impacts in CEQA* (December 2018) [the "Technical Advisory"], to assist local municipalities with the implementation of the revised CEQA Guidelines. As of July 1, 2020, all environmental documents presented for public review must use VMT for determining transportation impacts. As such, the VMT analysis presented herein has been prepared for the City of Needles Transportation Element update.

Within the Technical Advisory, the OPR provides local jurisdictions the flexibility to establish and implement guidelines for the evaluation of VMT that align with the character and nature of the local environment. Thus, in order to conform with the changes to the CEQA Guidelines, cities and governing bodies have developed and adopted transportation impact analysis guidelines that establish the methodology and thresholds to apply for VMT analyses. The City of Needles (the "City") has not yet established thresholds for the evaluation of VMT impacts within the City. Thus, guidance from the OPR Technical Advisory was followed in order to evaluate the VMT impacts associated with the planned land use changes. The methodology, assumptions, and results of this analysis are presented herein.

In addition, as discussed in the Technical Advisory, local jurisdictions are still allowed to require the evaluation of other transportation metrics in order to maintain compliance with the local and regional general/transportation plans. Per the Circulation, Transportation, and Scenic Highways Element of the City's General Plan, one of the City's transportation-related goals is to "provide a complete and efficient circulation system which takes into account convenience of access and safety while minimizing disruptive unnecessary traffic within residential neighborhoods." Thus, the use of LOS to evaluate intersection and roadway operations has been maintained to ensure consistency with the City's General Plan. An analysis of LOS conditions has also been prepared and is presented within this report for the proposed land use changes associated with the update to the Transportation Element (the "Project").

CITY OF NEEDLES SETTING

The City is located at the far eastern edge of San Bernardino County in the Mojave Desert, as shown in Figure 1. To the east, the City borders the Colorado River and State of Arizona, which includes the adjacent unincorporated communities of Mohave Valley and Fort Mohave. The Fort Mohave Indian Reservation is also located along the Colorado River and encompasses areas within Needles and the nearby Tri-State area of Arizona, California, and Nevada. To the west and south of the City are vast expanses of unpopulated desert. Other nearby communities include Laughlin, which is located approximately 26 miles north of Needles in the State of Nevada, and Bullhead City, which is located approximately 23 miles northeast of

Needles in the State of Arizona. There is considerable distance between the City and other major population centers, with the closest being the City of Las Vegas at 111 miles northwest of Needles. The Cities of Blythe and Barstow are located approximately 85 miles south and 135 miles west of Needles, respectively.

Several physical and geographic features significantly affect vehicle, pedestrian, and bicycle connectivity within Needles and between the City and its adjacent jurisdictions. On the eastern edge of Needles, the Colorado River is a significant physical feature affecting transportation connections. Access between Needles and communities east of the Colorado River is limited to North K Street, which becomes the Mohave Valley Highway (State Route 95) in Arizona. The nearest roadway connections to cross the Colorado River are located approximately 12 miles upriver (north) and 12 miles downriver (south) of the North Bridge crossing in Needles. To the north, Aztec Road crosses the river adjacent to the Avi Resort & Casino in the Fort Mohave Reservation, while Interstate 40 provides a crossing to the unincorporated community of Topock to the southeast.

Interstate 40 and the adjacent BNSF railroad tracks are key transportation infrastructure components in the City, but they also limit access points to destinations within the City, including the Colorado River. Connections across Interstate 40 within the City of Needles are limited to Needles Highway, California Avenue (pedestrian only), L Street, J Street, D Street/Lillyhill Drive and Broadway Street. Crossings across the BNSF railroad tracks are currently limited to West Broadway Street and K Street (pedestrian only).

TRANSPORTATION ELEMENT TRAFFIC ANALYSIS STUDY LOCATIONS

Study intersections were identified as those that may potentially be impacted by the project. The intersection analysis of potential project traffic impacts examined weekday conditions during the morning (AM) and afternoon (PM) peak hours and weekend conditions during the midday (MD) peak hour.

The study area includes the following study intersections:

- | | |
|--|--|
| 1. Needles Highway at Budweiser Road | 9. J Street at WB I-40 Ramps |
| 2. Needles Highway at Park Road | 10. J Street at EB I-40 Ramps |
| 3. Needles Highway at WB I-40 Ramps/Balboa Place | 11. Bailey Avenue at Washington Street |
| 4. Needles Highway at EB I-40 Ramps/Pashard Street | 12. Bailey Avenue at J Street |
| 5. North K Street at River Road/Smokestack Avenue | 13. Bailey Avenue at Lillyhill Drive |
| 6. North Broadway Avenue/N Street at Needles Highway | 14. San Clemente Street at Casa Linda Street |
| 7. North K Street at Needles Highway | 15. East Broadway Street at I-40 EB Ramps |
| 8. J Street at West Broadway Street | 16. East Broadway Street at I-40 WB Ramps |
| | 17. East Broadway Street at Goodwill Street |
| | 18. D Street at Third Street |
| | 19. Palm Way at West Broadway Street |
| | 20. East Broadway Street at Victory Drive |

Additionally, the following roadway segments were evaluated for existing traffic operations within the study area:

- | | |
|---|--|
| 1. Needles Highway between Budweiser Road and Northern City Limits | 3. Needles Highway between Park Road and National Trails Highway |
| 2. Park Road between I-40 Ramps/National Trails Highway and Needles Highway | 4. Needles Highway North of I-40 WB Ramps/Balboa Place |

5. Needles Highway between I-40 Ramps and North Broadway Avenue
6. Needles Highway between North Broadway Avenue and North K Street
7. North K Street between Needles Highway and River Road

2.0 EXISTING TRANSPORTATION FACILITIES

EXISTING ROADWAY SYSTEM

The key roadways within the study area are described below. The discussion presented here is limited to specific roadways that traverse and serve the study area. Figure 2.1 illustrates the existing traffic controls and approach lane geometries at the study intersections. These lane configurations and traffic controls represent the conditions at the study locations during the count collection period, and thus were implemented for the evaluation of Existing (2021) intersection operations.

Interstate Highway 40 (I-40): Classified as a Major Highway, I-40 runs through the southern portion of the United States between Barstow, California and Wilmington, North Carolina. I-40 is an east/west aligned freeway, however, runs north/south as it cuts through the City. I-40 provides regional access to the Mojave National Preserve and serves as a connection across the Colorado River, approximately 12 miles southeast of the City. I-40 connects Needles to Barstow and U.S. Route 95 (US 95). Within the vicinity of the City, this freeway provides two travel lanes in each direction. Freeway on- and/or off-ramps are provided on Needles Highway, J Street, and E Broadway Street. South of the interchange with J Street within the City, this facility exhibits annual average daily traffic (AADT) of approximately 18,000 vehicles.

Needles Highway: Classified as a Secondary Highway, Needles Highway is primarily a north/south aligned roadway which runs parallel to the Colorado River. This roadway runs from the Laughlin Highway (Nevada State Route 168) in the City of Laughlin, Nevada to River Road in the City. North of I-40, Needles Highway provides one lane in each direction with a solid double yellow median for majority of the study corridor. Within the City, this roadway provides two travel lanes in each direction between the I-40 eastbound ramps and Broadway Avenue. Within the City, land uses along Needles Highway are primarily commercial with intermittent residential uses located east of the roadway along the northern portion of the segment. The posted speed limit ranges from 30 miles per hour (mph) in developed areas of the City to between 50 and 55 mph along the northern stretches of the roadway. On-street parking is prohibited along the study corridor except westbound between W Broadway Street and N K Street.

Broadway Avenue/Street: Classified as a Secondary Highway, Broadway Avenue/Street travels primarily north-south between Needles Highway and the southern City limits. North of L Street, the roadway provides one lane in each direction. Between L Street and the I-40 ramps, the roadway provides two travel lanes in each direction. South of the I-40 freeway, the roadway continues with one lane in each direction as US Route 95. Broadway Avenue/Street runs through the City, connecting Needles Highway with Downtown Needles and South Needles and provides direct access to a variety of commercial uses. Parking is not permitted along all segments of Broadway Avenue/Street. The posted speed limit along this roadway ranges from between 25 and 30 mph in Downtown Needles between Needles Highway and Cibola Street. Between Cibola Street and I-40, the speed limit increases to between 40 and 45 mph. Along Broadway Street/US Route 95, the roadway's speed limit increases to 55 mph.

3rd Street: Classified as a Collector Street, 3rd Street is a northwest-southeast roadway traversing between J Street and C Street in Downtown Needles. The roadway provides access to a variety of commercial, municipal, and residential uses. 3rd Street provides one travel lane in each direction, with parking generally permitted along its extent.

Bailey Avenue: Classified as a Local Street north of J Street and a Collector Street between J Street and Lillyhill Drive, Bailey Avenue is a north-south aligned roadway. North of J Street, the roadway provides access to residential and educational uses, while institutional and residential uses are located along the roadway south of J Street. The roadway provides one travel lane in each direction with a center two-way left-turn lane (TWLTL) south of J Street. Parking is generally permitted along Bailey Avenue and has a posted speed limit of between 25 and 35 mph.

D Street: Classified as a Collector Street, D Street travels north-south between Front Street and I-40, where the roadway continues south as Lillyhill Drive. This roadway provides one travel lane in each direction, with parking generally permitted along all segments. The posted speed limit along D Street is 25 mph.

J Street: Classified as a Collector Street from Coronado Street to Broadway Street and a Local Street along all other segments, J Street is an east/west aligned roadway. J Street provides one travel lane in each direction with a solid double yellow median along the whole study corridor. The posted speed limit ranges from 25 mph to 35 mph. On-street parking is permitted along the study corridor except between I-40 to W Broadway Street. On- and off-ramp connections are provided with the I-40 freeway along J Street.

K Street: Classified as a Secondary Highway north of Needles Highway and a Collector Street south of Needles Highway, K Street serves as a major thoroughfare for traffic traveling between the City and the State of Arizona. Along this segment, K Street crosses the Colorado River where it continues northward as the Mohave Valley Highway (Arizona State Route 95). Along its extent, this roadway provides one travel lane in each direction with on-street parking generally permitted south of Needles Highway. The posted speed limit along K Street is 30 mph.

Lillyhill Drive: Classified as a Collector Street, Lillyhill Drive is primarily an east/west aligned roadway traveling between Parkway Street and I-40, where the roadway continues northward as D Street. Lillyhill Drive consists of one lane in each direction with a solid double yellow median along the whole study corridor. The posted speed limit ranges from 25 mph to 30 mph. On-street parking is generally permitted along the entire study corridor.

River Road: Classified as a Local Street, River Road is an east-west roadway extending from K Street and provides access to a variety of residential and recreational uses along the Colorado River. The roadway features one travel lane in each direction and does not permit on-street parking. The posted speed limit along River Road is 30 mph.

San Clemente Street: Classified as a Collector Street, San Clemente Street is an east-west roadway located west of the I-40 freeway. The roadway runs between Clary Drive and Broadway Street, providing access to residential and industrial uses. The roadway provides one travel lane in each direction, separated by a solid double yellow median. The posted speed limit along San Clemente Street is 25 mph.

FIGURE 2.1: EXISTING INTERSECTION GEOMETRIES

EXISTING TRANSIT SERVICES

Local Transit Service

The City is served by one Needles Area Transit (NAT) route. All NAT buses are equipped with wheelchair lifts and operate once an hour from 7:00 AM to 6:55 PM, Monday through Friday, and from 10:00 AM to 4:55 PM on Saturday. The bus route stops directly next to a majority of the City's activity generators, including Downtown Needles, the commercial corridors along Needles Highway and East Broadway Street, the Sheriff's Department, Library, Colorado River Medical Center, Regional Senior Center, and Elks Lodge. While the nearest Needles transit stop is a 3- to 5-minute walk from Vista Colorado Elementary School/Needles Middle School and a 7-minute walk from Needles High School, Needles Unified School District (NUSD) provides bus services to its schools, with free transportation provided to students in Kindergarten through 3rd grade. There are currently no transit options available to recreational facilities east of the train tracks, which include Ed Parry Park, Jack Smith Park & Launching Facility, Needles Golf Course, Needles Marina, and other areas of public access to the Colorado River. The NAT bus route is displayed graphically in Figure 2.2.

Regional Transit Service

Amtrak train service is available in Needles via the Southwest Chief train, with the train station located directly adjacent to the El Garces building in Downtown. Daily service departs at 12:31 AM westbound to Los Angeles Union Station, with stops in Barstow, Victorville, San Bernardino, Riverside, and Fullerton. The eastbound train departs daily at 12:18 AM, with service to Chicago. Stops directly to the east of Needles include Kingman, Flagstaff, and Winslow in Arizona.

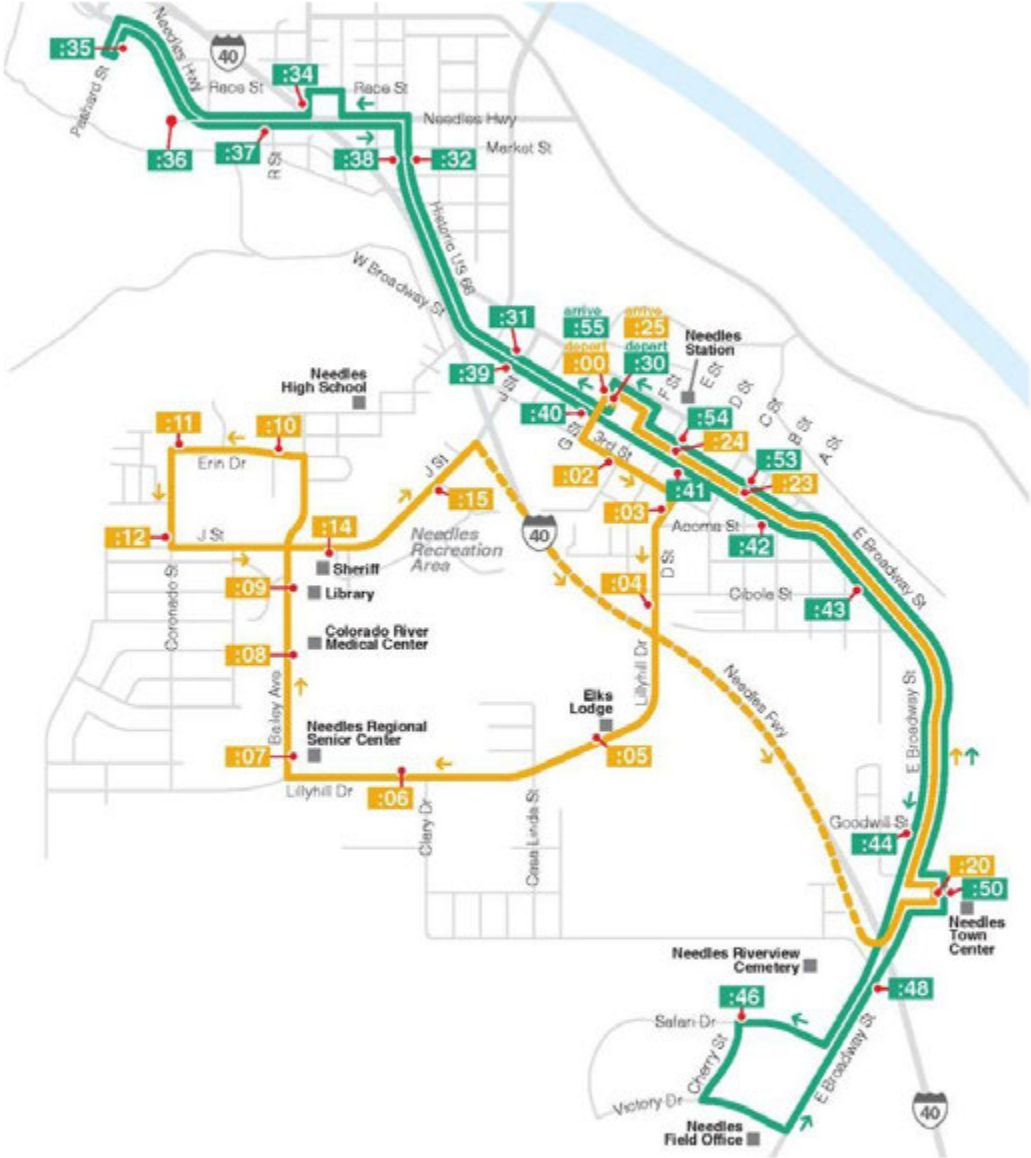

The Victor Valley Transportation Authority operated a bus route on Fridays adjacent to the Amtrak train station in Downtown Needles that provides transit service to the Barstow library, Victorville Court House, and Victorville Civic Center. However, this transit service was suspended in August 2020 due to ongoing impacts of COVID-19 and the service has yet to be restored. When the service was operational, westbound service departed Needles at 6:15 AM to arrive in Barstow at 9:30 AM and Victorville at 10:15 AM. Eastbound service departed Victorville at 2:30 PM to arrive in Needles at 7:15 PM.

EXISTING BICYCLE AND PEDESTRIAN FACILITIES

Although there are no designated bikeways or multi-use trails in the City of Needles, bicycle-parking facilities are provided at Vista Colorado Elementary School, Needles Middle School, and Needles High School. Additionally, bicycle-parking facilities are also available at the Needles Recreation Center and Needles Branch Library.

While there are sidewalks located along the majority of roadways in urbanized sections of Needles, notable gaps in the sidewalk network are present in the more rural, northern portion of Needles between Needles Highway and the Colorado River, as well as in the Gates residential neighborhood in south Needles. However, noticeable gaps in sidewalks exist in the urbanized section of Needles, with the largest gaps occurring along River Road, River Street, and Marina Way just east of Downtown Needles. This area contains a majority of the City's publicly accessible waterfront and recreational facilities, including Ed Parry Park, Manny Morris Park, Jack Smith Park & Launching Facility, and the Needles Golf Course. Additional areas with occasional gaps in sidewalk facilities include residential streets north of Needles Highway, east of Interstate 40, and west of K Street, as well as along Lillyhill Drive and Bailey Avenue south of J Street.

FIGURE 2.2: EXISTING TRANSIT SERVICE

3.0 LOS ANALYSIS METHODOLOGY, IMPACT CRITERIA, AND ANALYSIS SCENARIOS

ANALYSIS METHODOLOGY

Transportation analyses performed for projects within San Bernardino County frequently utilize the Highway Capacity Manual (HCM) methodology to analyze signalized and unsignalized intersections. This methodology is based on procedures outlined in the *Highway Capacity Manual, Sixth Edition: A Guide for Multimodal Mobility Analysis*. The HCM methodology determines intersection LOS based on operational delay. For signalized intersections and all-way stop-controlled intersections, the operational delay corresponds to the overall delay for all movements at the intersection, whereas for two-way stop-controlled intersections, the operational delay corresponds to the delay for the stop-controlled movements. This method uses a “gap acceptance” technique to predict driver delay. The analysis at the study intersections was undertaken using Trafficware’s Synchro Studio, which includes both Synchro and SimTraffic software that were used to model the traffic operations at the study intersections.

The term LOS describes the quality of traffic flow. LOS values A through C indicate excellent-to-decent traffic flow conditions. LOS D corresponds with fair conditions that may experience substantial delays during portions of the peak hours, but without excessive backups. LOS E represents poor conditions, with volumes at or near the capacity of the intersection and long lines of vehicles may have to wait through several cycles. LOS F is characteristic of failure (i.e., the intersection is overloaded, vehicular movements may be restricted or prevented, and delays and queue lengths become increasingly longer). The LOS ranges from the HCM methodology are shown in Table 3.1 for signalized and unsignalized intersections.

Table 3.1: Level of Service Descriptions

Level of Service	Definition	Signalized: Average Control Delay (seconds/vehicle)	Unsignalized (All-Way Stop-Control): Average Control Delay (seconds/vehicle)	Unsignalized (Two-Way Stop-Control): Minor Street Delay (seconds/vehicle)
A	Excellent Operation. Free-flow Speeds prevail. Vehicles are almost unimpeded in their ability to maneuver within the traffic stream.	≤10	≤10	≤10
B	Very good operation. Reasonably free-flow speeds are maintained. The ability to maneuver within traffic is only slightly restricted.	>10 to 20	>10 to 15	>10 to 15
C	Good operation. Flow with speeds at or near free-flow speed of the roadway. Freedom to maneuver within the traffic stream is noticeably restricted and lane changes require more care and vigilance on the part of the driver.	>20 to 35	>15 to 25	>15 to 25
D	Fair operation. Speeds begin to decline slightly with increasing flows. In this range, density begins to increase somewhat more quickly with increasing flow. Freedom to maneuver within the traffic stream is noticeably limited.	>35 to 55	>25 to 35	>25 to 35
E	Poor operation. Operation at capacity with no usable gaps in the traffic stream. Any disruption to the traffic stream has little or no room to dissipate.	>55 to 80	>35 to 50	>35 to 50
F	Forced Flow. Represents jammed conditions. Backups from locations downstream or on the cross street may restrict or prevent movements of vehicles out of the intersection approach lanes: Therefore, volumes carried are not predictable. Potential for stop-and-go type traffic flow.	> 80	> 50	> 50

Source: Highway Capacity Manual, Special Report 209, Transportation Research Board, Washington D.C., 2000 and Interim Manuals on Highway Capacity, NCHRP Circular 2012, 1982.

Roadway segment LOS was calculated using the volume-to-capacity (V/C) ratio for each roadway segment. The capacity of each segment was determined based on the Average Daily Traffic (ADT) carrying capacities defined in the HCM for urban street segments and two-lane highways and are summarized in Table 3.2. The carrying capacity for each segment was defined as the operating capacity at LOS E, as facilities operating at this LOS generally represent operating conditions at or near the capacity level.

Table 3.2: Roadway Segment Daily Capacity Threshold Assumptions

Street Type	Daily Capacity
	LOS E
Two-Lane Highway	16,400
Urban Street Segment (4-lane)	26,900
Urban Street Segment (2-lane)	13,400

Source: Highway Capacity Manual, 6th Edition

SIGNIFICANT IMPACT THRESHOLDS

The City has not adopted formal Transportation Impact Analysis guidelines that guide transportation analysis for projects proposed within the City. As such, standards have not been established to determine the minimum acceptable LOS at which intersections and roadway segments within the City should operate. Per the *San Bernardino County Congestion Management Program* (June 2016), LOS E is established as the minimum acceptable LOS for intersection and roadway segment operations. However, due to the rural nature of the City, it was determined that more conservative standards should be applied to maintain the character of the City and its roadway network. Therefore, for this study, LOS D was selected as the minimum acceptable LOS for the operation of facilities within the City of Needles.

Thus, based on this minimum acceptable LOS standard, intersections or roadway segments operating or projected to operate at LOS E or F were considered to result in an adverse conditions. For locations operating at deficient LOS, the project is required to identify feasible measures which can be installed in order to bring roadway operations to the acceptable LOS.

These impact thresholds were applied to the study intersections and roadway segments analyzed for the Transportation Element update and were used to determine whether the project is anticipated to result in adverse conditions at the study locations.

ANALYSIS SCENARIOS

The existing condition analysis year was selected in accordance with the collection of study location count data which occurred in July 2021. Additionally, in order to align with the analysis window presented within the San Bernardino Transportation Analysis Model (SBTAM), a future buildout year of 2040 was selected for evaluation. Due to its rural nature, limited development is anticipated for the City and the surrounding area absent land use changes proposed as part of the General Plan/Transportation Element update. Therefore, operating conditions for the Future Without Project implementation scenario are expected to closely resemble operating conditions under the Existing scenario. Therefore, to be conservative, Future With Project conditions were compared to Existing conditions. Based on these assumptions the following analysis scenarios were evaluated to determine whether the project would result in deficient conditions along the City's roadway network:

- Existing (2021) conditions
- Future (2040) With Project conditions

4.0 VMT ANALYSIS METHODOLOGY, IMPACT THRESHOLDS, AND ANALYSIS SCENARIOS

ANALYSIS METHODOLOGY

As of July 1, 2020, all land use projects within the State of California are required to prepare a VMT analysis. Since the City has yet to adopt formal VMT analysis requirements, the analysis criteria and methodology outlined in the OPR Technical Advisory were used to evaluate potential VMT impacts for the project. Per the Technical Advisory, VMT metrics are often presented on a per capita (resident) or per employee basis, based on the proposed land use. Since the Project is a land use plan comprised of both residential and employment-based uses, the total VMT per service population metric was used to evaluate the changes in VMT associated with the land use changes proposed for the City. Total VMT accounts for all trip types and the service population corresponds to the total number of residents and employees within a defined area. This approach aligns with OPR's *Technical Advisory*, which suggests that VMT be presented on an efficiency (per capita) basis, which allows the impact thresholds to apply more broadly across a wide range of project sizes and types. This metric is also well suited for the evaluation of the project, since the City is comprised of different uses (including both commercial and residential uses). Analyzing total VMT allows all trip types to be considered in the VMT analysis, which would encompass the trips associated with the various uses currently located in and proposed for the City.

This metric was calculated under both existing and future conditions to establish a baseline and determine the project impacts for the land use generated VMT. The SBTAM was used to estimate the VMT metrics associated with the City.

To determine the VMT associated with trips originating in or destined for locations within the City (land use generated VMT), the average vehicle trip lengths between Transportation Analysis Zones (TAZs) in the SBTAM were multiplied by the number of vehicle trips between zones. This was achieved by utilizing the Origin-Destination (OD) methodology.

The OD methodology was used to calculate the total VMT as this methodology incorporates VMT associated with internal to external [IX] and external to internal [XI] trips. Since this methodology cannot differentiate VMT associated with individual trip types, this methodology is typically not applicable to land use projects for which the VMT for individual land use types are to be reported separately. However, as total VMT was selected for use as the evaluation metric for the identification of impacts associated with project-generated VMT, this calculation methodology was selected for conducting the analysis. In this methodology, the Highway Skim (Length) matrices were multiplied by the OD vehicle trip matrices for the corresponding assignment time periods to determine the VMT traveling to and from each TAZ. The VMT matrices for the different assignment time periods were summed to determine the daily VMT.

To determine the VMT on a per service population basis, the inbound and outbound VMT for the City TAZs was then extracted from the VMT matrices. The summed inbound and outbound VMT was then divided by the appropriate population or employment groupings. For the total VMT metric, the appropriate population grouping is the service population, which includes both residents and employees. Estimates of residents and employees within each TAZ were taken from the SBTAM socioeconomic data assumptions (with adjustments to align with the City's existing and proposed uses). To find the overall VMT per service population for the City or the City's sphere of influence, the VMT for all TAZs in the

corresponding area was summed and divided by the total number of residents and/or workers in those TAZs.

The evaluation of VMT metrics was evaluated over three geographic areas: (1) the City of Needles TAZs, (2) the Needles Sphere of Influence TAZs, and (3) San Bernardino County. The evaluation of VMT metrics over these three areas allows for comparison of VMT generation across different areas. The City of Needles TAZs include those TAZs that contain the majority of the land uses within the City. While the area covered by these TAZs includes a majority of the area covered by the City (in addition to undeveloped areas outside of the City's jurisdiction), this area excludes parts of the southern, undeveloped portions of the City. The Needles Sphere of Influence TAZs include all TAZs which contain a portion of the City. While the area covered by these TAZs encompasses all land within the City's jurisdiction, it also includes large areas outside of the City boundary. This includes distant communities such as Havasu Lake and Big River, approximately 25 and 50 miles south of the City, respectively, which generate VMT at much different rates than the City. For this reason, the City of Needles TAZs area was analyzed to provide a focused evaluation of the VMT impacts associated with the City's uses. The overlap between the City of Needles TAZ area and Needles Sphere of Influence TAZ area are shown in Figure 4.1. Finally, the San Bernardino area includes all TAZs within the County, including those within the more developed, southwestern portion of the County. The evaluation of this geography allows the City's VMT metrics to be compared with the County overall.

SIGNIFICANT IMPACT THRESHOLDS

The Technical Advisory recommends that proposed projects generate a VMT per capita or per employee that is fifteen percent below that of the existing development in order to not result in a significant impact. However, the Technical Advisory also notes the difficulties rural communities face in order to reduce VMT. Therefore, significant thresholds for these areas can be determined on a case-by-case basis. Therefore, in order to comply with the State's goal of reducing VMT, for the purposes of this analysis, the following threshold was established for the identification of significant impacts:

- The Citywide VMT per service population under future with General Plan Buildout conditions exceeds the Citywide VMT per service population under existing conditions.

This impact threshold was applied based on the VMT metrics calculated for the project and were used to determine whether the project is anticipated to result in a significant VMT impact.

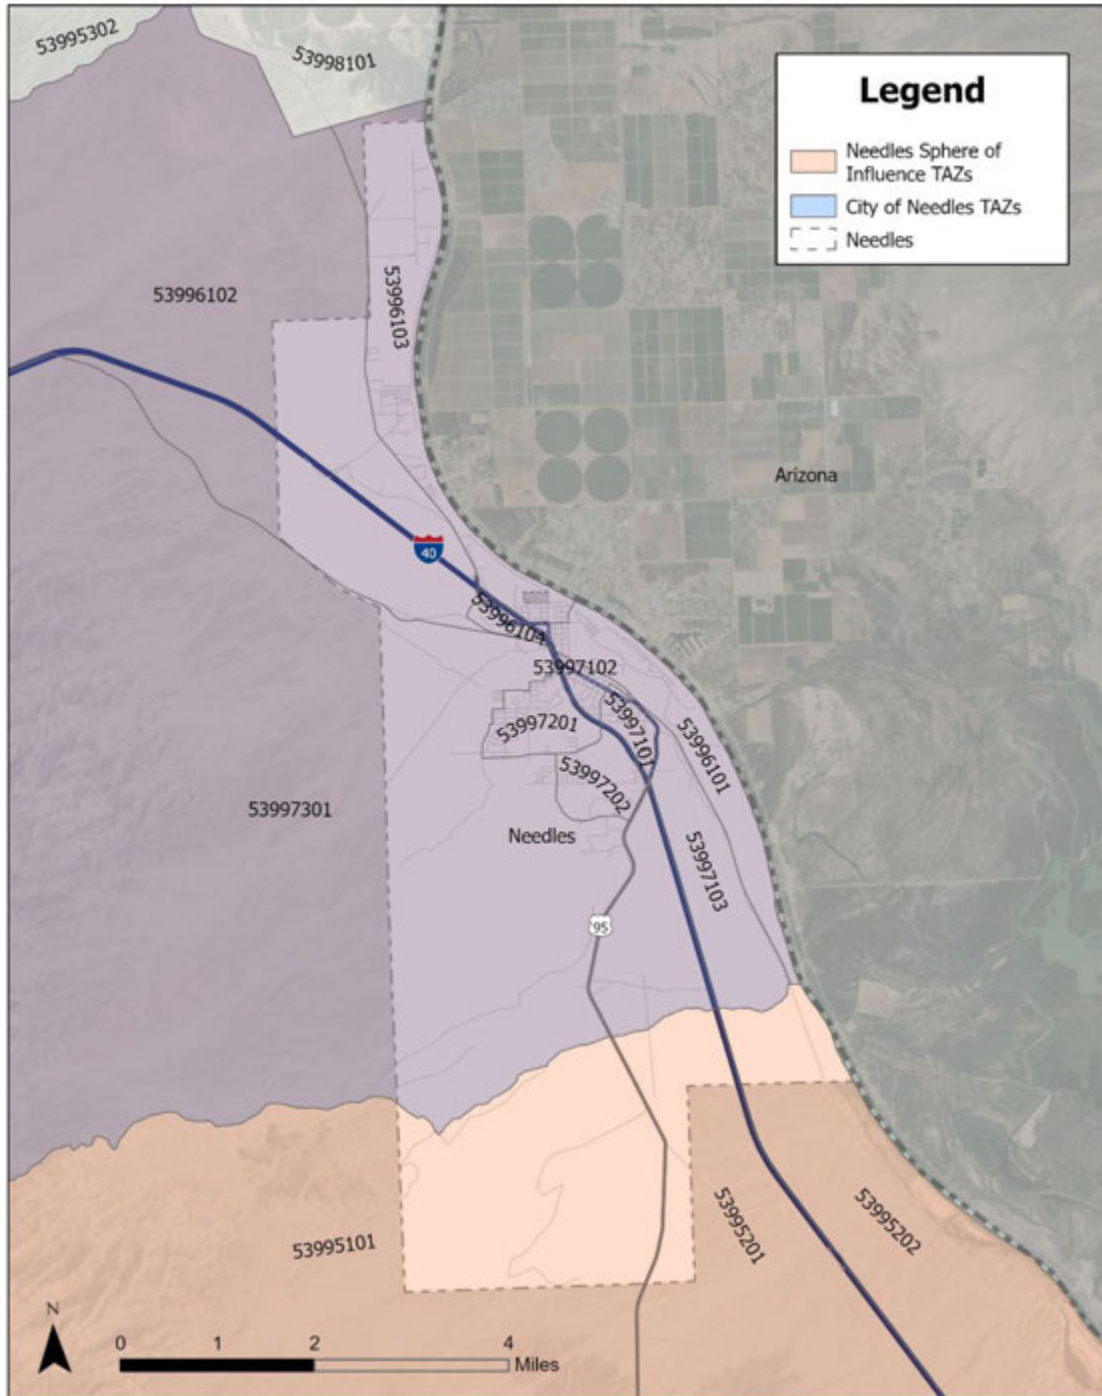

ANALYSIS SCENARIOS

The same two analysis scenarios selected for analysis for the LOS analysis were also used for the VMT analysis to determine whether the project would result in a significant VMT impact:

- Existing (2021) conditions
- Future (2040) With Project conditions

The VMT metrics under existing conditions were calculated based on model output files for the SBTAM baseline (2016) conditions, with adjustments made for the TAZs within the City in order to accurately represent the existing active land uses. VMT results for the Future With Project conditions were determined by running the SBTAM with appropriate socioeconomic data (SED) inputs to account for the land use changes resulting from the General Plan update. The changes to the SED assumptions are detailed in the following sections.

FIGURE 4.1: CITY OF NEEDLES TAZ MAP

5.0 EXISTING (2021) CONDITIONS

EXISTING (2021) TRAFFIC VOLUMES

Traffic volumes at these study locations were obtained from automatic and manual traffic counts conducted in July 2021. Average daily traffic (ADT) volumes were collected over three consecutive days, encompassing a “typical” weekday (Thursday), and two weekend days (Friday and Saturday). These counts were collected July 15-17, 2021 using pneumatic tube counters. Intersection turning movement counts were collected on both a “typical” weekday and a weekend day to capture changes in traffic patterns that occur within the City that result from differing levels of business and recreational activities in the study area. The turning movement counts were collected on Thursday, July 15, 2021 and Saturday July 17, 2021. Weekday counts were collected during the morning (7:00 – 9:00 AM) and afternoon (4:00 – 6:00 PM) peak commute periods, while the Saturday counts were collected during the midday (12:00 PM- 2:00 PM) peak period. The intersection turning movement counts included the classification of vehicles such as passenger vehicles, trucks, and buses, as well as documentation of pedestrian and bicycle activity at the study intersections. Traffic data sheets are included in Appendix A. Figures 5.1 and 5.2 illustrate the existing peak hour volumes at the study intersections during a typical weekday and a typical weekend day, respectively. The intersection and roadway segment counts formed the basis of the existing operating conditions at the study locations.

EXISTING (2021) INTERSECTION LEVEL OF SERVICE

Table 5.1 summarizes the results of the HCM analysis for the Existing Year (2021) conditions. As shown on Table 5.1, all of the study intersections are currently operating at acceptable level of service (LOS D or better) during the weekday AM and PM peak hours and the weekend midday peak hour. Except for two intersections, all intersections operate with an overall LOS A during the weekday and weekend peak hours. The intersections of North K Street & Needles Highway and North Broadway Avenue/N Street & Needles Highway are the intersections operating at an overall LOS B during the peak hours, with delays ranging between 10.6 and 13.9 seconds. Appendix B contains the Existing Conditions analysis worksheets.

¹ Two-way stop-controlled intersection. Per the Highway Capacity manual, Sixth Edition: A Guide for Multimodal Mobility Analysis, at two-way stop-controlled intersections, LOS is not defined for the intersection or for the major-street approaches.

² Signalized intersection.

³ All-way stop-controlled intersection.

FIGURE 5.1: EXISTING YEAR (2021) WEEKDAY AM/PM PEAK HOUR TRAFFIC VOLUMES

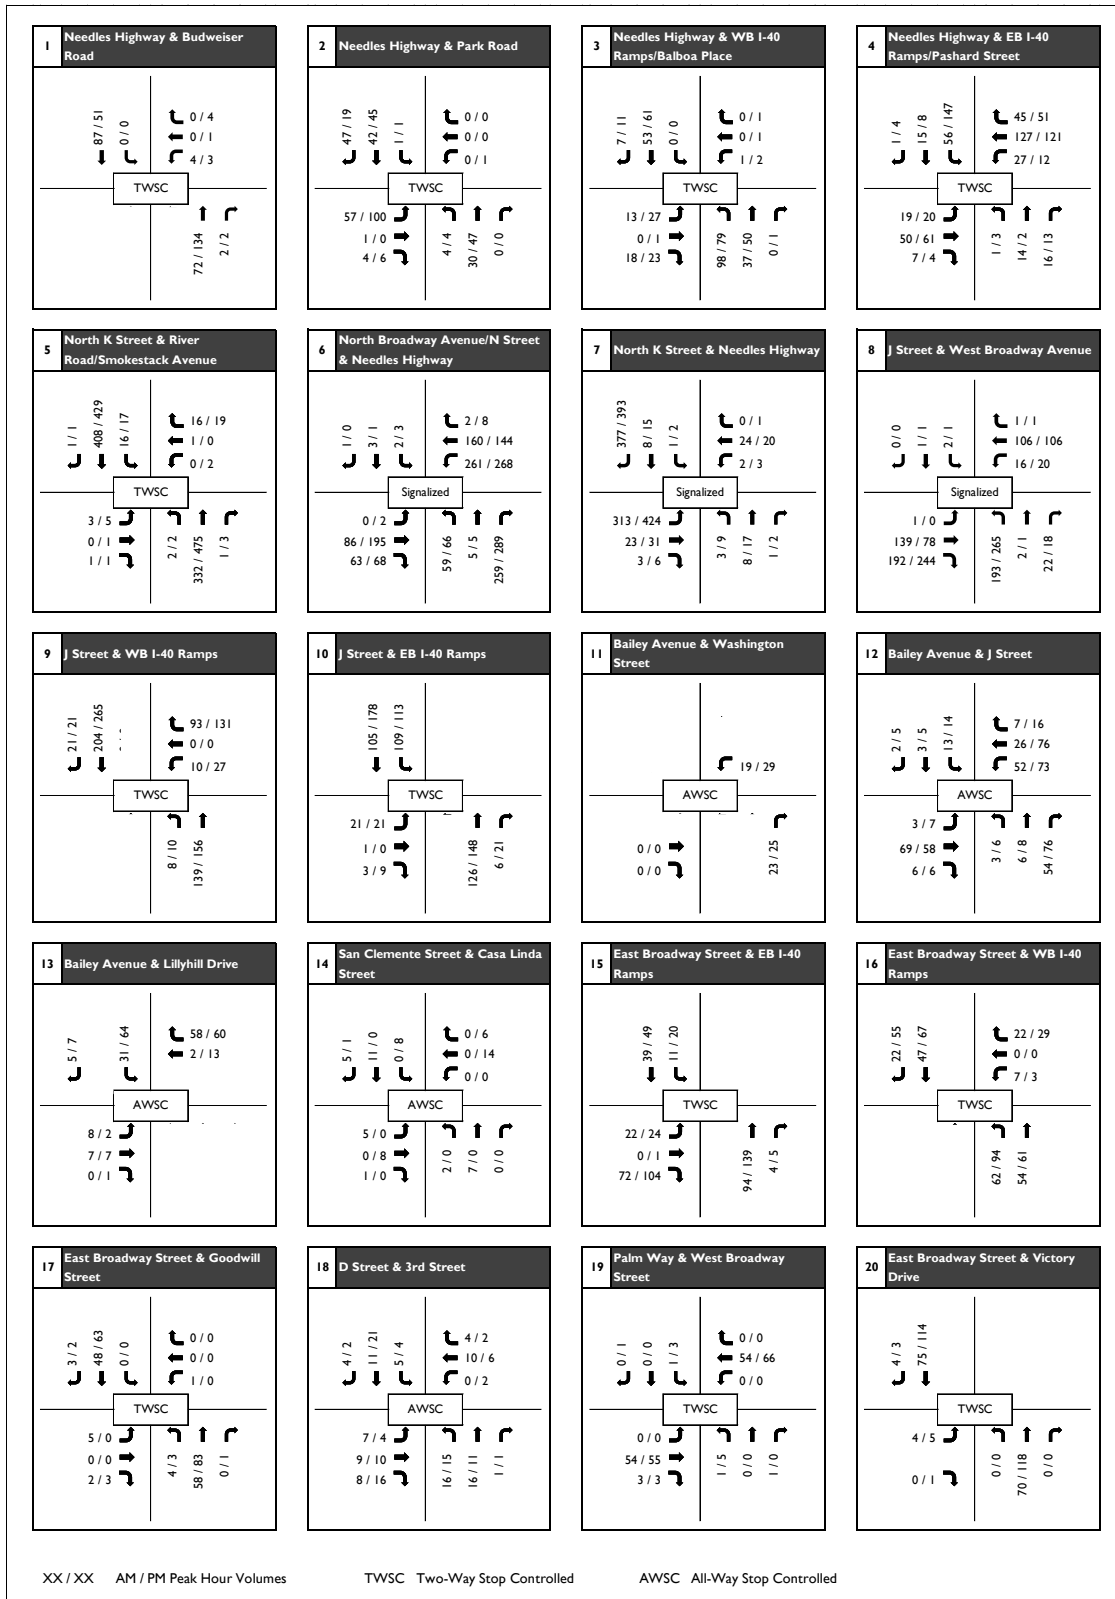

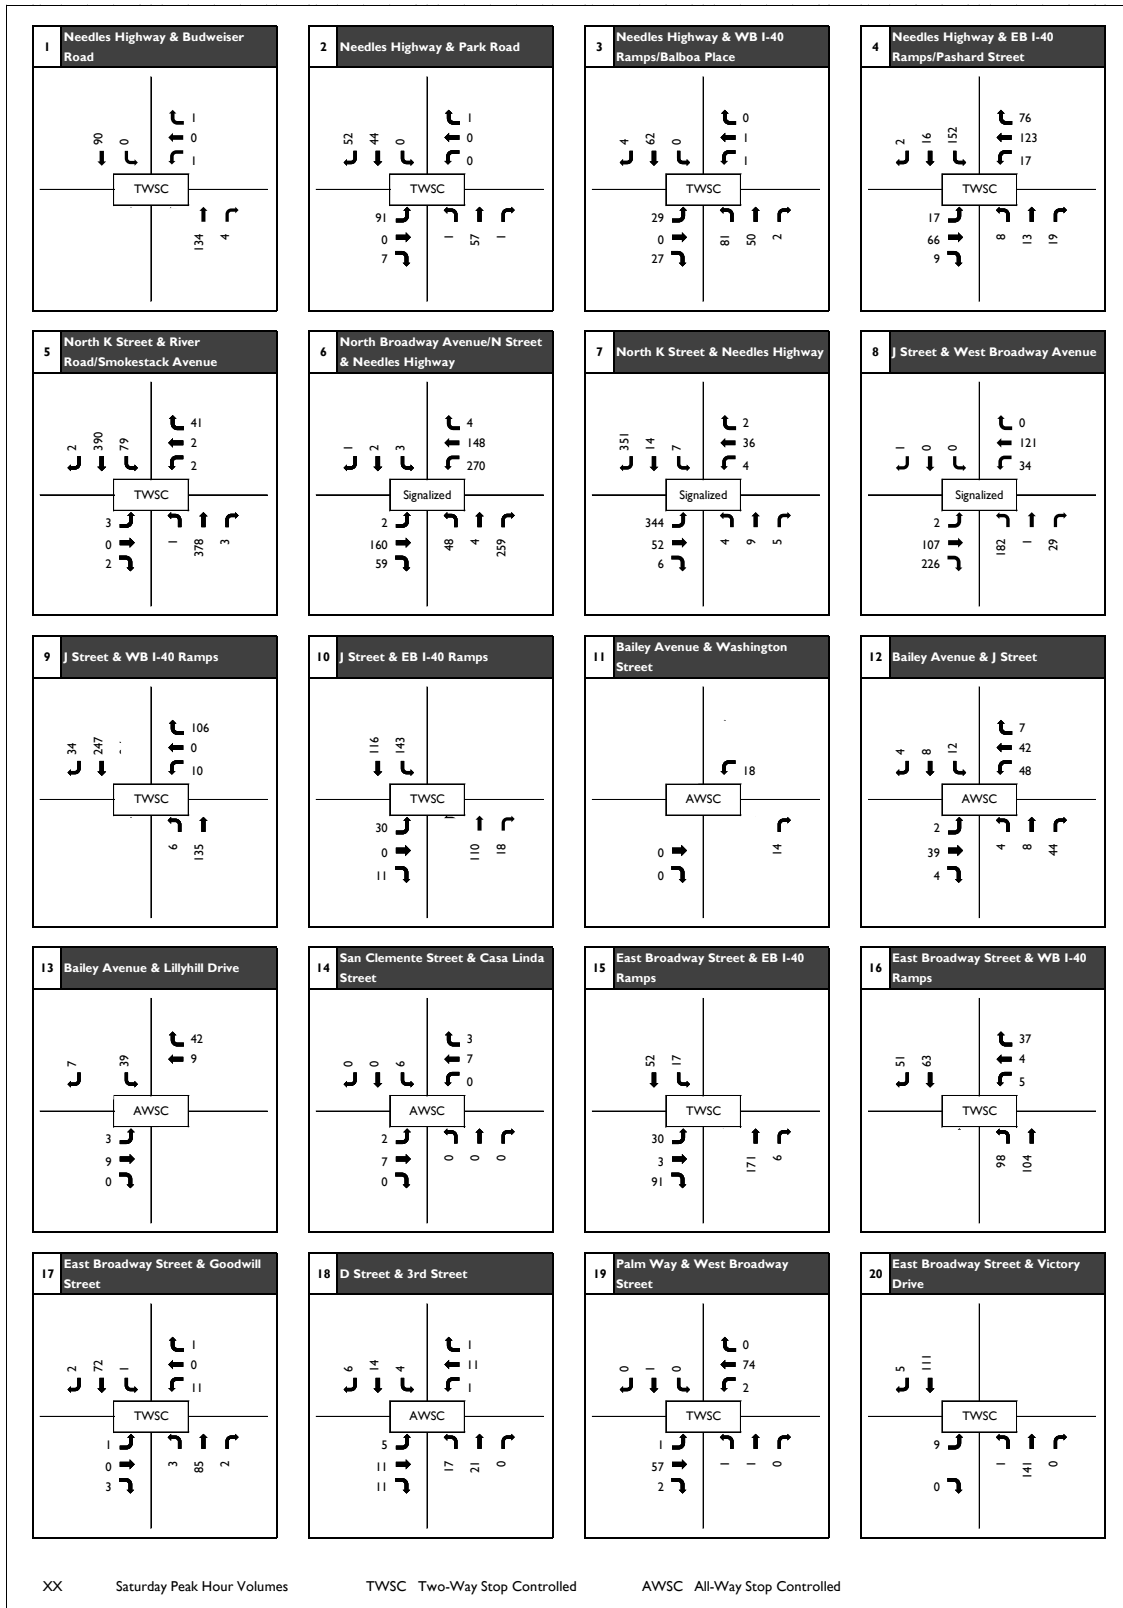

FIGURE 5.2: EXISTING YEAR (2021) WEEKEND MD PEAK HOUR TRAFFIC VOLUMES

EXISTING (2021) ROADWAY SEGMENT LEVEL OF SERVICE

Table 5.2 summarizes the results of the roadway analysis for the Existing Year (2021) conditions. As shown on Table 5.2, all 20 study roadway segments operate at an acceptable LOS under existing conditions. The most congested segments within the City are Needles Highway between N Broadway Avenue and North K Street; North K Street between Needles Highway and River Road; and Broadway Avenue between Needles Highway and J Street. These segments operate at LOS D on a typical weekday and LOS C during a typical weekend day. The only other roadway segment that operates below LOS A on either a weekday or a weekend day is the segment of J Street between the I-40 Ramps and Broadway Avenue, which operates at LOS B on a typical weekday.

Table 5.2: Existing Year (2021) Traffic Conditions, Study Roadways

Notes:

^[1] Between Needles Highway and J Street, Broadway Avenue provides two travel lanes in each direction for a majority of the route, aside from the segment crossing the railroad tracks between Walnut Street and L Street (which provides one lane in each direction). To be conservative, this segment was analyzed as a two-lane facility.

Note: ADT = Average Daily Traffic; V/C = volume-to-capacity (V/C) ratio; LOS = Level of Service

EXISTING (2021) YEAR MODEL FORECASTING

In order to establish the baseline VMT conditions for the City under existing (2021) conditions, the SBTAM was used to estimate trips generated by the City's land uses, as well as the associated trip lengths. In order to accurately model the existing active land uses with the City, the SED assumptions for the SBTAM model base year were reviewed and compared to existing household and population data collected for the City. A summary of the existing year SED assumptions for the TAZs within the City of Needles Sphere

of Influence are presented in Table 5.3. The detailed SED assumption for the SBTAM base year are presented in Appendix C. These SED assumptions were used as inputs in the SBTAM to forecast the number and length of trips that would serve as the foundation for the VMT analysis under existing (2021) conditions. As these SED assumptions were adjusted to represent existing conditions within the City, the resulting model output files were assumed to represent conditions for existing year 2021. These output files from the adjusted SBTAM base year model were used to calculate the existing (2021) VMT metrics for the City

Table 5.3: City of Needles Sphere of Influence Existing (2021) SED Assumptions

TAZ #	Households	Population	Employment Population
53995101	1	3	2

53997301	281	728	129

PROJECT-GENERATED VMT

As discussed previously, the baseline VMT generated by uses in City and was calculated under existing conditions using data from the SBTAM for the model base year with adjustments to account for the existing uses within City for existing year 2021. The total VMT associated with all trip types was calculated for all trips originating in or destined for the TAZs within the City of Needles area, the Needles Sphere of Influence area, and the San Bernardino County. Table 5.4 summaries the total VMT per service population for these three geographies. As shown, the area covered by the TAZs containing the land uses within the City generates approximately 40.72 total VMT per service population. When this area is expanded to cover all TAZs touching the bound of the City (including large areas of land outside of the City), the area generates approximately 67.23 VMT per service population. The County of San Bernardino overall generates 32.52 total VMT per service population. Therefore, while the City generates VMT at a higher rate than the County average, the developed areas of the City generate VMT at a lower rate than the surrounding region.

Table 5.4: Total VMT per Service Population Results, Existing Conditions

EXISTING (2021) CONDITIONS									
Area	Passenger Vehicle VMT	Light-Duty Truck VMT	Medium-Duty Truck VMT	Heavy-Duty Truck VMT	Total VMT	Residents	Employees	Service Population	Total VMT/SP

6.0 FUTURE (2040) CONDITIONS

FUTURE VOLUME FORECASTING METHODOLOGY

Intersection Turning Movement Volumes

The SBTAM was used to forecast future traffic growth at the study intersections for the future (2040) analysis year. As only the Future (2040) With Project conditions were analyzed, the SBTAM model was run with appropriate SED inputs to account for the land use changes resulting from the General Plan land use changes under the future scenario. In order to ensure that the SBTAM accounts for proposed levels of development in the project area, the SED input data for the model base and future years were reviewed. As discussed previously, the SED assumptions for the City's TAZs under the base model year scenario were updated to align with the City's existing population, housing and employment data (as presented in Table 5.3 and Appendix C). Adjustments were also made to the SED assumptions for the model future year account for household, resident, and employment growth associated with the proposed land use changes. The adjustments to the SED assumptions are detailed below.

The SED assumptions for the SBTAM future year (2040) were adjusted to account for residential, household, and employment growth assumptions within the City. For the future year (2040) With Project conditions, the SED adjustments assumed to be added by the proposed General Plan uses were added to the existing baseline SED assumptions, shown previously in Table 5.3. Together, the existing and proposed population, household, and employment estimates for the City's uses comprised the SED assumptions for the SBTAM future year (2040) model run. Additionally, resident, household, and employment estimates added to the Project TAZ were also proportionately removed from surrounding non-Project TAZs to maintain a constant level of regional growth for the SBTAM future year. Maintaining a constant level of employment growth in the region ensures consistency with the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). Therefore, SED assumptions for TAZs within the region surrounding the City were reviewed to identify the appropriate TAZs to which adjustments were made. A summary of the future model year SED assumptions for the TAZs within the City of Needles Sphere of Influence are presented in Table 6.1. The detailed SED assumptions for the SBTAM future year are presented in Appendix D for the TAZs within the City and the surrounding region.

The outputs from the future year model run were used to estimate traffic volume growth at the study intersections and along study roadway segments. In order to develop the future volumes at the study locations, roadway link volumes were gathered from the SBTAM runs. Link volumes were collected from the final trip assignment for the weekday daily and AM and PM peak periods for the various roadways connecting to or represented by the 20-study intersection and 20 study roadway segment locations. It should be noted that due to the structure of the SBTAM network and TAZs, additional post-processing of model volumes had to be conducted in order to estimate growth along the study segments and at the study intersections. This post-processing of model data was conducted for the model base and future year outputs.

Table 6.1: City of Needles Sphere of Influence Future (2040) With Project SED Assumptions

TAZ #	Households	Population	Employment Population
53995101	1	3	2
53995201	652	1,650	453
53995202	0	0	0
53996101	418	1,082	353
53996102	50	130	171
53996103	423	1,095	186
53996104	27	70	123
53997101	332	860	169
53997102	317	821	501
53997103	1	3	73
53997201	599	1,552	373
53997202	447	1,157	159
53997301	384	995	285

To establish the future volume growth for the Future (2040) With Project conditions, link volumes were extracted from both the base (2021)¹ and future (2040) year model runs. The bidirectional link volumes along these segments for the model base year and future year were used to establish the baseline and projected traffic volumes entering and exiting each intersection leg for 2021 and 2040, respectively. A comparison of these link volumes was used to determine the traffic volume growth expected between the model's baseline and future years (2021 and 2040). The total traffic volume growth along each link represents the total peak period traffic growth between the existing count year (2021) and the buildout analysis year (2040). The peak-period link volumes were converted to peak-hour link volumes by applying peak-period factors to the AM and PM peak-period volumes. Peak-period factors of 0.38 and 0.28 were selected for the AM and PM peak periods, respectively, as these are the peak period factors for the SBTAM. As the SBTAM does not forecast weekend traffic growth, a weekend midday to weekday PM peak hour factor was determined from the existing counts and applied to the weekday PM peak hour volume growth to estimate weekend midday peak hour volume growth. The hourly link volume calculations for the study intersections under Future Year (2040) With Project conditions are shown in Appendix E.

Once the Future (2040) With Project peak hour link volumes were determined for the roadway segments adjoining the study intersections, the link volumes were converted to turning and through movements using the Directional Method iterative procedure for refining model outputs described in Chapter 6 of the *National Cooperative Highway Research Project (NCHRP) Report 765: Analytical Travel Forecasting Approaches for Project-Level Planning and Design* (Transportation Research Board, 2014). This method uses existing turning movement counts to convert projected link volumes to turning movement estimates. In this method, the existing turning movement counts were input into a turning movement matrix and the

¹ Typically, the SBTAM base year coincides with data from 2016. However, as mentioned previously, the base year population, housing, and employment assumptions were adjusted for the base year model run to align with the City's existing demographic data for 2021. Therefore, it was assumed that the conditions represented by the output files for the adjusted SBTAM base year model run align with the existing year (2021).

approach (inbound) and departure (outbound) movement flows were alternatively balanced until the forecast inbound and outbound link volumes were met to an acceptable level of accuracy. A maximum of 20 iterations were conducted to allow the adjusted turning movements to converge. The calculation worksheets using the NCHRP Report 765 Directional Method iterative procedure for the Future (2040) With Project conditions are presented in Appendix F. Figures 6.1 and 6.2 illustrate the weekday and weekend peak hour volumes at the study intersections, respectively, under the Future (2040) With Project conditions.

The LOS calculation methodologies described in Section 3.0 were then used in conjunction with the Future (2040) With Project peak hour intersection turning movement volumes to determine the future operating conditions of the study locations.

Roadway Segment ADT Volumes

As for the intersection turning movement volumes, outputs from the SBTAM future year model run were used to develop the future year roadway segment ADT volumes at the 20 study segment locations. The daily link volumes were compared between the SBTAM model runs from the base (2021) and future years (2040) to determine the daily growth expected along each study segment. This growth was then added to the 2021 ADT count volumes to determine the 2040 future ADT volumes. As with the turning movement counts, a weekend-to-weekday factor was determined using the collected ADT counts, which was then applied to the weekday growth to estimate the weekend growth in ADT volumes. Future year roadway segment volume development is presented in Appendix G.

FUTURE (2040) CONDITIONS INTERSECTION GEOMETRIES

In order to properly analyze future traffic conditions, an investigation was conducted to determine whether transportation improvements to the roadway system infrastructure have been implemented since the count collection period or are planned for implementation prior to the future year (2040) at the study locations. No projects increasing roadway or intersection capacity are currently proposed within the City. Thus, the traffic controls and approach lane geometrics shown previously in Figure 2.1 were assumed to prevail under future conditions.

FIGURE 6.1: FUTURE YEAR (2040) WITH PROJECT WEEKDAY AM/PM PEAK HOUR TRAFFIC VOLUMES

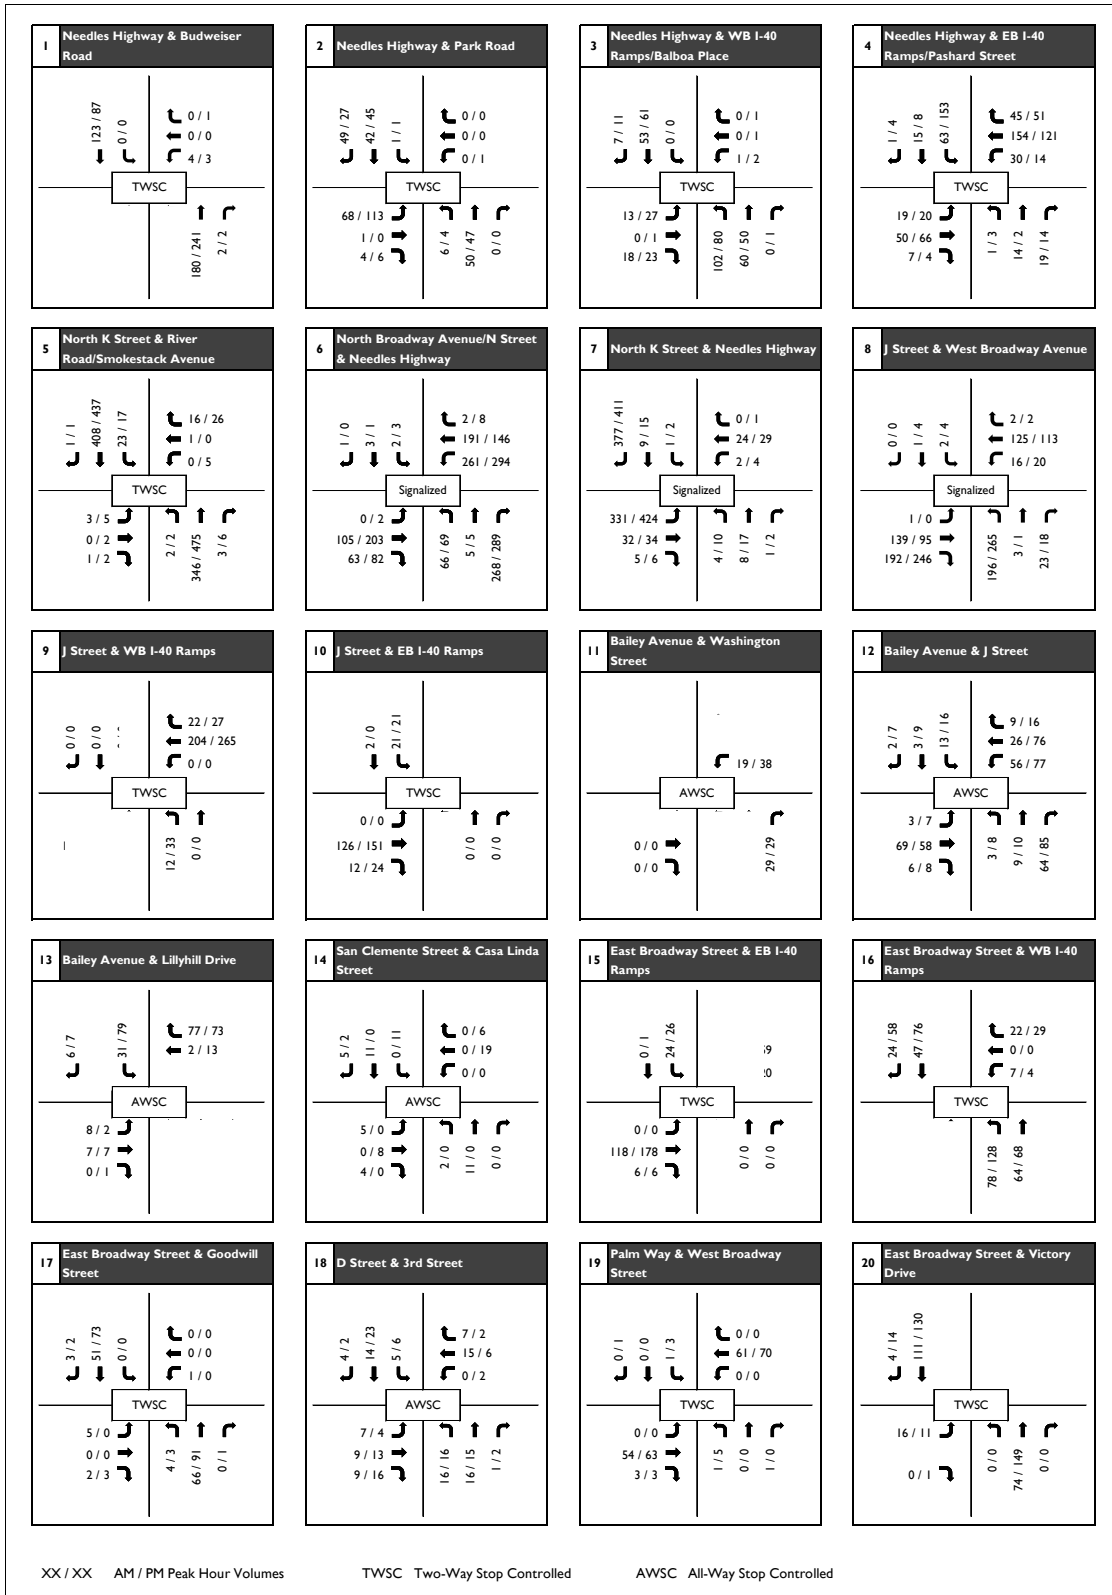

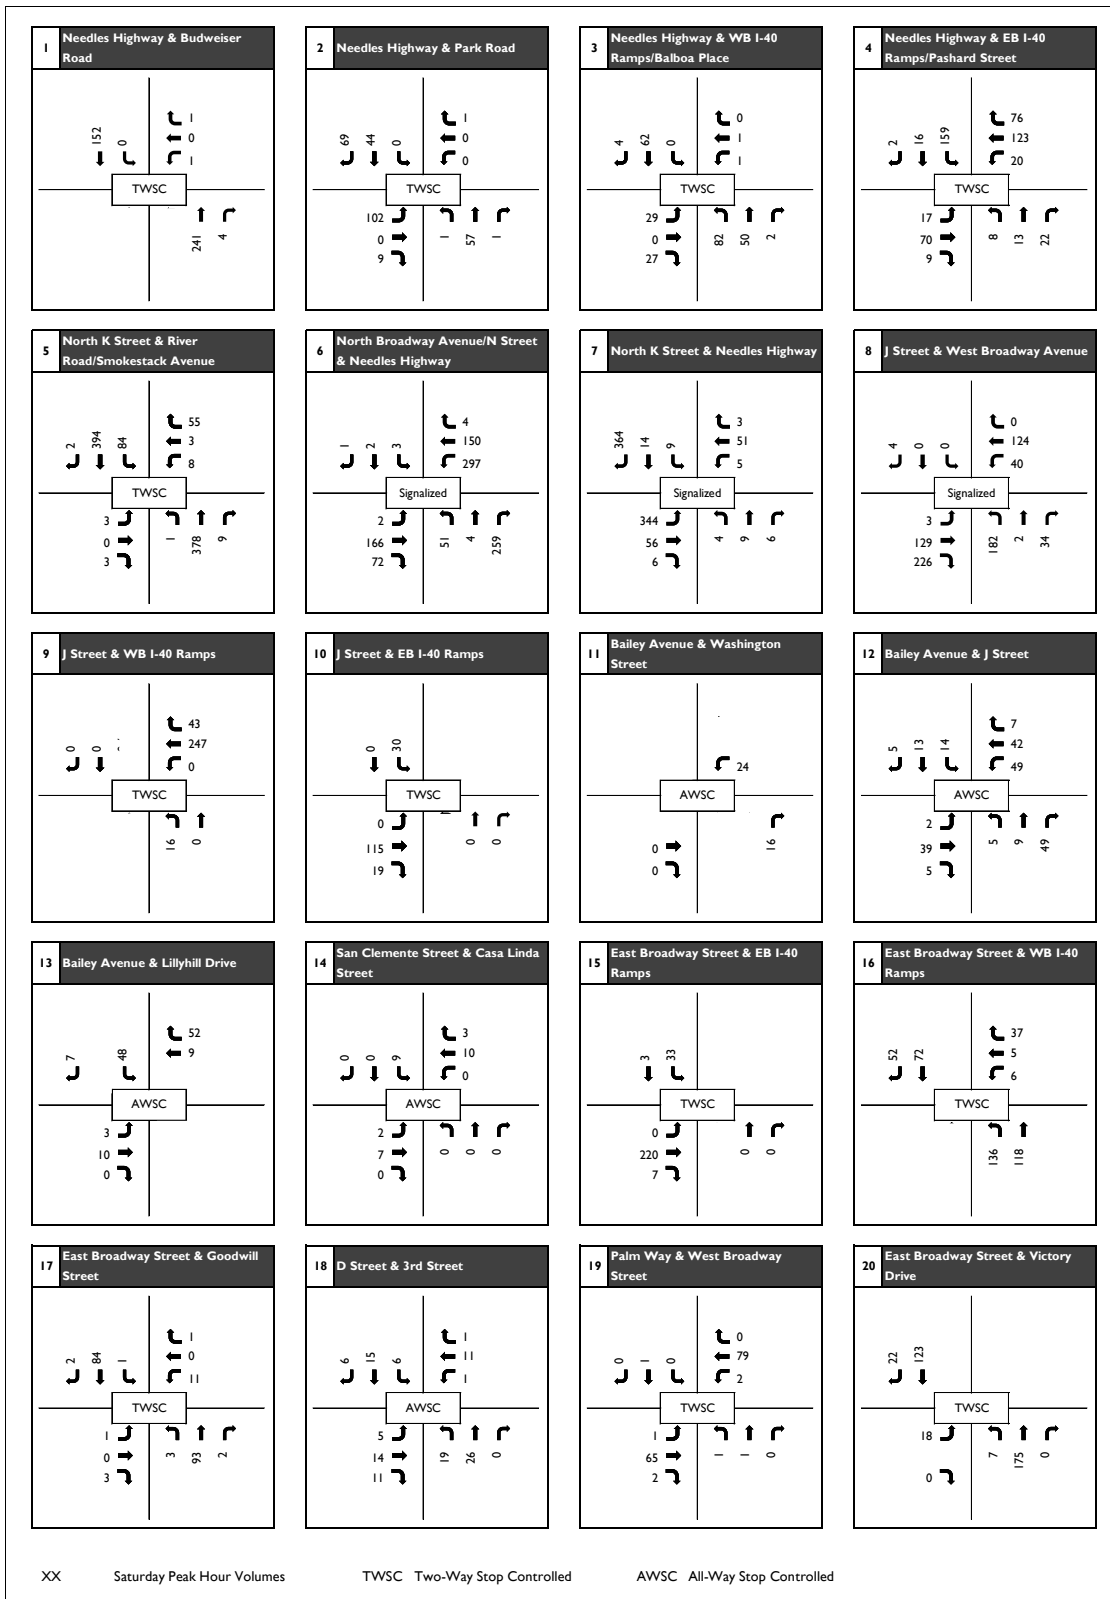

FIGURE 6.2: FUTURE YEAR (2040) WITH PROJECT WEEKEND MD PEAK HOUR TRAFFIC VOLUMES

FUTURE (2040) WITH PROJECT INTERSECTION LEVEL OF SERVICE

Table 6.2 summarizes the results of the HCM analysis for the Existing (2021) and Future Year (2040) With Project conditions. As shown on Table 6.2, all 20 study intersections are expected to operate at acceptable level of service during the weekday AM and PM peak hours and the weekend midday peak hour under Future (2040) With Project conditions. Similar to Existing (2021) conditions, 18 of the 20 study intersections are expected to operate at LOS A during the weekday and weekend peak hours. The intersections of North K Street & Needles Highway and North Broadway Avenue/N Street & Needles Highway are expected to continue to operate at LOS B during all three peak hours.

When compared with Existing conditions, the overall intersection LOS at the three signalized and five all-way stop-controlled study intersections will remain the same under the Future (2040) With Project scenario. In addition, the LOS along most stop-controlled approaches of the 12 two-way stop-controlled intersections would remain the same between existing (2021) and future (2040) conditions. The following intersection approaches would degrade in LOS during one or more peak hours between existing (2021) and future (2040) conditions:

- Westbound Budweiser Road at Needles Highway (Weekday AM & PM Peak, Weekend MD Peak)
- Eastbound Park Road at Needles Highway (Weekday AM Peak)
- Westbound River Road at North K Street (Weekday PM Peak, Weekend MD Peak)
- Eastbound I-40 Off-Ramp at East Broadway Street (Weekday AM Peak)
- Westbound I-40 Off-Ramp at East Broadway Street (Weekend MD Peak)
- Eastbound Victory Drive at East Broadway Street (Weekday PM Peak)

While these intersection approaches would degrade in LOS, they would all continue to operate at LOS C or better during the weekday and weekend peak hours.

Increases in overall intersection and approach delay at the study intersections between existing (2021) and future (2040) conditions, following implementation of the General Plan land use changes, are expected to be minor, ranging between 0.1 and 4.2 seconds, with the majority of delay increases being under one second. The following intersections and intersection approaches are those expected to have increases in delay of more than one second:

- Needles Highway & Budweiser Road – Westbound Approach: Weekday AM Peak (1.4 seconds), Weekday PM Peak (1.0 second), Weekend MD Peak (1.2 seconds)
- Needles Highway & EB I-40 Ramps/Pashard Street – Southbound Approach: Weekday AM Peak (1.1 seconds)
- North K Street & River Road/Smokestack Avenue – Westbound Approach: Weekday PM Peak (2.1 seconds), Weekend MD Peak (4.2 seconds)
- North K Street & Needles Highway: Weekday PM Peak (1.3 seconds)
- East Broadway Street & Victory Drive – Eastbound Approach: Weekend MD Peak (1.3 seconds)

Despite the increases in delay expected at some intersections throughout the City, these increases in delay will not degrade intersection operations following the increased development resulting from the General Plan land use changes. Appendix H contains the Future With Project Conditions analysis worksheets.

¹ Two-way stop-controlled intersection. Per the Highway Capacity manual, Sixth Edition: A Guide for Multimodal Mobility Analysis, at two-way stop-controlled intersections, LOS is not defined for the intersection or for the major-street approaches.

² Signalized intersection.

³ All-way stop-controlled intersection.

FUTURE (2040) WITH PROJECT ROADWAY SEGMENT LEVEL OF SERVICE

Table 6.3 summarizes the results of the roadway analysis for the Existing (2021) and Future Year (2040) With Project conditions. As shown on Table 6.3, all 20-study roadway segments would continue to operate at acceptable LOS conditions under Future (2040) With Project conditions. All roadway segments are expected to operate at the same LOS under Future (2040) With Project conditions as under Existing (2021) conditions. Thus, the following segments are those that are expected to operate below LOS A on either a weekday or a weekend day:

- Needles Highway between North Broadway Avenue and North K Street: Weekday (LOS D), Weekend (LOS C)
- North K Street between Needles Highway and River Road: Weekday (LOS D), Weekend (LOS C)
- Broadway Avenue between Needles Highway and J Street: Weekday (LOS D), Weekend (LOS C)
- J Street between I-40 Ramps and Broadway Avenue: Weekday (LOS B)

Despite the increases in daily volumes along these roadway segments, they are expected to continue to operate at an acceptable LOS and will be able to accommodate the additional traffic demand resulting from the changes in land use associated with the update to General Plan. However, should additional development be proposed within the City outside of the currently proposed land use changes, especially near the intersection of Needles Highway & North K Street, potential roadway capacity enhancements may need to be explored in order to accommodate the additional vehicular demands along these roadways.

Table 6.3: Future Year (2040) Traffic Conditions, Study Roadways

Notes:

^[1] Between Needles Highway and J Street, Broadway Avenue provides two travel lanes in each direction for a majority of the route, aside from the segment crossing the railroad tracks between Walnut Street and L Street (which provides one lane in each direction). To be conservative, this segment was analyzed as a two-lane facility.

Note: ADT = Average Daily Traffic; V/C = volume-to-capacity (V/C) ratio; LOS = Level of Service

FUTURE (2040) WITH PROJECT - PROJECT-GENERATED VMT

The VMT generated by uses in the City was also calculated for the Future (2040) With Project conditions. The total VMT associated with all trip types was calculated for all trips originating in or destined for the land uses with the TAZs within the City of Needles area, the Needles Sphere of Influence area, and the San Bernardino County, assuming the General Plan land use changes are implemented. Table 6.4 summarizes the projected total VMT per service population for these three geographies. As shown, the area covered by the TAZs containing the land uses within the City is expected to generate approximately 39.17 total VMT per service population. When this area is expanded to cover all TAZs touching the boundary of the City (including large areas of land outside of the City), the area is expected to generate approximately 91.58 VMT per service population. The County of San Bernardino overall will generate on average 33.40 total VMT per service population. Therefore, while the City is still expected to generate VMT at a higher rate than the County average, the developed areas of the City will continue to generate VMT at a lower rate than the surrounding region.

In order to determine whether the General Plan land use changes will result in a significant VMT impact, the Future (2040) With Project VMT metrics for the City must be compared with the Existing (2021) VMT metrics. The City of Needles TAZs was determined to be the appropriate area to use in order to evaluate the impact of the City's Transportation Element update. This area encompasses the vast majority of the uses within the City of Needles (including all proposed land uses as part of the General Plan). In addition, this area excludes the distant communities which generate VMT at a much different rate than the City itself. Table 6.5 below compares the VMT for the City of Needles TAZs between the existing (2021) and future (2040) conditions. As shown, the addition of the General Plan land use changes would result in an approximately 3.8 percent decrease in the total VMT per service population generated by the City's land uses. Therefore, the Transportation Element update is not expected to result in a significant VMT impact.

Table 6.4: Total VMT per Service Population Results, Future (2040) With Project Conditions

FUTURE (2040) WITH PROJECT CONDITIONS									
Area	Passenger Vehicle VMT	Light-Duty Truck VMT	Medium-Duty Truck VMT	Heavy-Duty Truck VMT	Total VMT	Residents	Employees	Service Population	Total VMT/SP

City of Needles TAZs	40.72	39.17	-3.8%	No

FUTURE (2040) WITH PROJECT WITH LANE REDUCTION SCENARIO

As part of the General Plan, the City is exploring the potential of a “Main Street” concept within Downtown Needles along Broadway Avenue. For this concept, potential lane reductions are being considered to create a more vibrant commercial district. The existing four-lane facility between L Street and A Street would be reduced to provide one travel lane in each direction with on-street angled parking.

In order to evaluate traffic impacts associated with this lane reduction, future condition roadway configurations have been adjusted to analyze Future (2040) conditions. The lane reduction would only affect the lane geometries at one study intersection: J Street & Broadway Avenue. The traffic controls and approach lane geometrics shown in Figure 6.3 were assumed to prevail under Future (2040) With Project With Lane Reduction conditions at the study intersections. In addition, the lane reduction would only affect the number of travel lanes for the segment of Broadway Avenue between J Street and G Street. The LOS conditions at these two locations were reevaluated for the Future (2040) With Project With Lane Reduction scenario as discussed below.

The reduction of the number of travel lanes may result in the trip diversions away from the roadway being treated to nearby parallel roadways. However, based on the traffic volumes and LOS conditions along Broadway Avenue, trip diversions are expected to be negligible as this roadway currently exhibits substantial excess capacity with minimal vehicular delays. Even with the reduction in travel lanes, the traffic volumes experienced by this roadway are expected to be well below capacity. Thus, no further adjustments to the traffic volumes were deemed necessary to account for the lane reduction along Broadway Avenue. As no trip diversions are anticipated in association with the lane reduction, the City’s VMT metrics would be the same under future (2040) conditions with or without the lane reduction. Thus, while LOS conditions were evaluated for the two affected study locations, no additional VMT analysis was conducted for the Future (2040) With Project With Lane Reduction scenario.

Table 6.6 summarizes the results of the HCM analysis for the Future Year (2040) With Project and With Project With Lane Reduction conditions at J Street & Broadway Avenue. As shown on Table 6.6, this study intersection is expected to operate at LOS A during the weekday AM and PM peak hours and the weekend midday peak hour under both future scenarios.

Table 6.6: Future Year (2040) With Lane Reduction Traffic Conditions, Study Intersections

FIGURE 6.3: FUTURE (2040) WITH LANE REDUCTION INTERSECTION GEOMETRIES

7.0 CONCLUSIONS AND RECOMMENDATIONS

This report was prepared to evaluate the potential VMT impacts associated with the City's Transportation Element update, as well as operational conditions of intersections and roadway segments within the City of Needles to ensure compliance with the City's General Plan. The introduction of the land uses proposed as part of the update to the General Plan are expected to result in an approximate four percent reduction in VMT generated by the uses within the City. As the project will reduce the per capita VMT for the City, the land use changes are not expected to result in a significant VMT and would not require the implementation of mitigation measures under CEQA.

As LOS and delay are no longer the metrics used for evaluating transportation impacts under CEQA, the results of the LOS analysis presented herein cannot be used to identify significant CEQA impacts. However, the results can be used to determine whether the project would result in non-CEQA adverse conditions to the surrounding roadway network that would require corrective actions or improvements. The LOS standards established as part of this analysis were used to determine whether the Transportation Element update would result in any adverse conditions in order to ensure that the local roadway network continues to operate efficiently. As presented in the previous section, the project is not expected to result in adverse conditions at any of the 20 study intersections or 20 roadway segments. Thus, the project is not required to implement corrective actions at the study locations to maintain compliance with the City's General Plan.

While no mitigation measures or corrective actions are required, reducing the number and length of vehicle trips are common objectives established by local jurisdictions in order to align with the goals of reducing VMT and congestion. As such, a listing of potential voluntary measures that can be implemented by the City and private developers have been provided should the future development require the need to implement trip reduction measures. The California Air Pollution Control Officers Association (CAPCOA) published the *Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity* in December 2021, which provides local governments, communities, and project developers with guidance regarding methods and tools for reducing impacts to the environment, combatting climate change, and promoting the development of healthy communities. This document has compiled research regarding the VMT reduction potential of various Transportation Demand Management (TDM) measures and provides equations quantifying the relationship between TDM measure implementation and VMT reduction based on either preferred or alternative literature sources. This document have been used to select the TDM measures appropriate for potential application within the City. The potential TDM measures and corresponding VMT reduction potential are summarized in Table 7.1 and are described in further detail in this section. It should be noted that the VMT ranges presented in the table below have been quantified for urban and suburban communities, and therefore may have a lesser VMT reduction potential within the City.

Table 7.1: TDM Strategies

TDM Measure	Maximum VMT Reduction
Neighborhood/Site Enhancement Measures	
Establish a Carshare Program	0.18%
Implement a Bikeshare/Scootershare Program	0.07%
Construct/Improve Bicycle Facility ¹	0.8%
Trip Reduction Program Measures ²	
Provide Ridesharing Program	8%
Provide End-of-Trip Bicycle Facilities	4.4%

¹ VMT reduction percentage for the construction of a bicycle facility applies to VMT along the parallel roadway.

² VMT reduction for trip reduction programs only applies to commute trip VMT.

TDM STRATEGIES

Neighborhood/Site Enhancement Measures

Establish a Carshare Program

This TDM measure would establish a carsharing program that would allow residents, employees, and visitors with access to short-term rentals of a private automobile. This program offers convenient access to a vehicle for infrequent personal or commute trips and, thus, supports the use of alternative travel modes for most trips and reduces the need for automobile ownership. This program can consist of a conventional program in which traditional, combustion engine vehicles are deployed or a program which implements the use of electric vehicles, further reducing greenhouse gas emissions.

Implement a Bikeshare/Scootershare Program

Bikeshare and scootershare programs provide users with access to short-term rentals of bike and scooters without having to contend with the up-front costs of purchasing one of these mobility devices. These programs encourage a shift to alternative mode travel for short trips that traditionally would have been taken via private automobile. This TDM measure accounts for the reduction of VMT that accompanies the implementation of one of these programs. To qualify for the VMT reduction benefits of these programs, projects would be required to contribute to the establishment of a Citywide bikeshare or scootershare program.

Construct/Improve Bicycle Facility

Construction or improvement of a bicycle lean facility (not inclusive of Class III facilities) would provide local residents and employees with transportation facilities that support the use of alternative mode travel. These dedicated facilities provide dedicated roadway space for bicycle travel, which promotes safety for these vulnerable roadway users.

Trip Reduction Program Measures

Provide Ridesharing Program

This program would establish a ridesharing program, at either a place of employment or a multifamily housing development, which would match employees and residents with other commuters who live/work

in a similar location. This measure would seek to reduce the number of single-occupancy vehicle commute trips, which tend to account for the largest share of daily VMT for residents within the City. The ridesharing program should include site features that promote the program, including designated rideshare parking spaces, passenger loading area, and message board for coordinating rides.

Provide End-of-Trip Bicycle Facilities

When employment locations provide bicycle facilities at the end of commute trips, employees are more likely to use alternative modes to arrive at and depart from work. These end-of-trip facilities can include bike lockers, showers, and personal lockers. Provision of such features, which can be relied upon consistently, will support employees transitioning to bicycling for their primary commute mode.

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Ms. Loudbear,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. Although the City previously initiated the consultation process in its August 22, 2022 letter to Mr. David Harper, the City is sending this letter as additional notification based on direction from the Native American Heritage Commission (NAHC). The NAHC indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).⁷

The City will also create a single-map system that brings its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

⁷ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

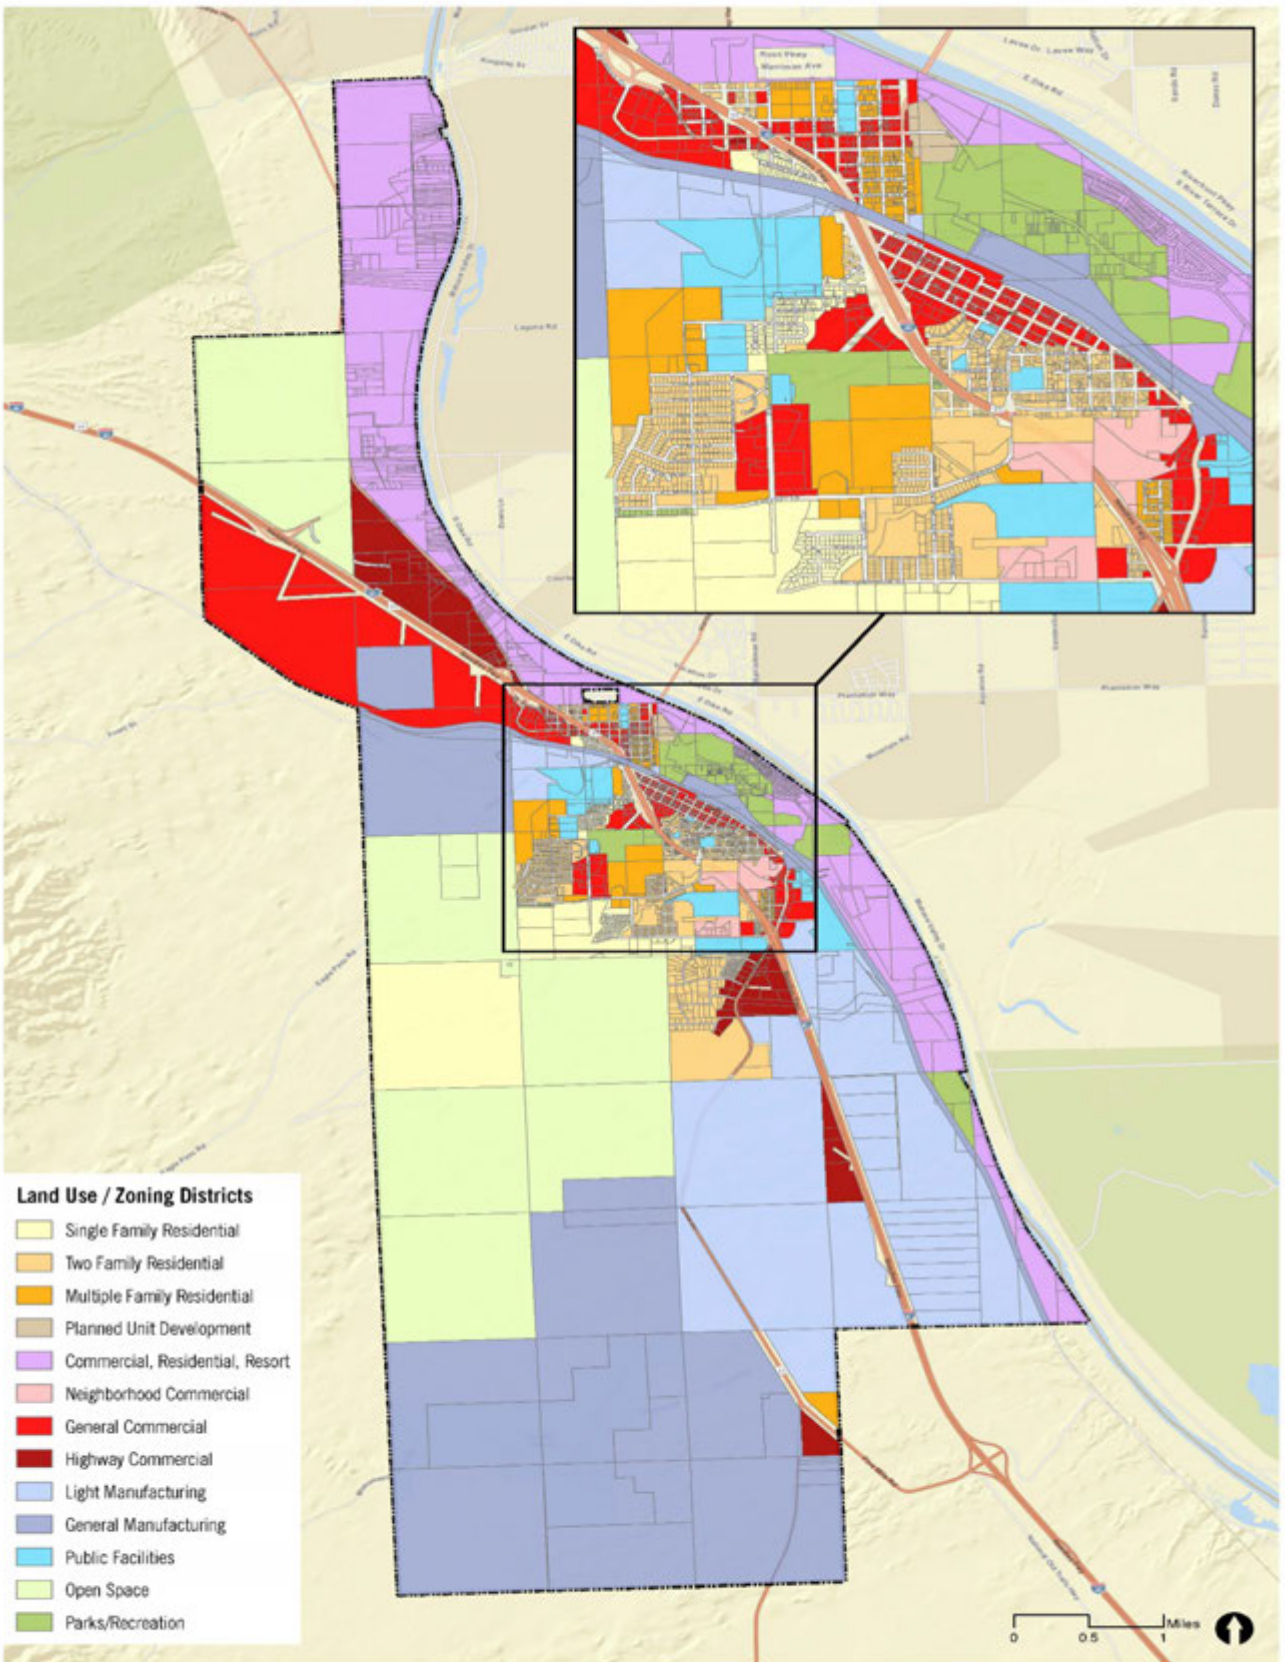

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe’s request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
 Community Development Manager

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Mr. Williams,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. Although the City previously initiated the consultation process in its August 22, 2022 letter to Ms. Linda Otero, the City is sending this letter as additional notification based on direction from the Native American Heritage Commission (NAHC). The NAHC indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).⁸

The City will also create a single-map system that brings its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

⁸ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).²

The City will also create a single-map system that brings its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

² The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
Community Development Manager

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Ms. Pencille,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).⁶

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

⁶ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).⁹

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

⁹ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
 Community Development Manager

This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).¹⁵

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

¹⁵ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
 Community Development Manager

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Ms. Lucero,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).¹⁶

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

¹⁶ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Mr. Macarro,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).²¹

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

²¹ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).²²

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

²² The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
 Community Development Manager

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Mr. Hamilton,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).²³

The City will also create a single-map system that brings its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

²³ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).²⁸

The City will also create a single-map system that bring its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter). Table 1, *Buildout Statistical Summary*, provides a statistical summary of the buildout potential associated with the Proposed Land Use Element compared to existing conditions. The City's transportation systems will be updated to enhance mobility in and around Needles for more efficient and safer motorized and nonmotorized circulation, with a focus on aligning future growth projections and necessary roadway improvements.

²⁸ The majority of unincorporated SOI is north, south, and west of the incorporated boundaries; the exception is an 18-acre area that is owned by the Fort Mojave Indian Tribe and entirely surrounded by incorporated lands. The City assumes County land use designations for all unincorporated SOI areas, most of which are not associated with residential or nonresidential building activities (either Open Space or Resource/Land Management). The unincorporated land owned by the Fort Mojave Indian Tribe is designed for Rural Living by the County.

Table 1 Buildout Statistical Summary

Scenario	Acres	Units	Population	Non-res Sq. Feet	Employment
Exist. Conditions (2021)	19,124	2,829	5,225	1,876,869	1,403
Proposed GP (2040)	19,124	3,907	7,750	2,743,154	2,395
Potential Growth	--	1,078	2,525	866,285	992

The proposed project is designed to achieve the following primary objectives:

- Facilitate more flexible and innovative mix of land uses that will revitalize the downtown and provide new housing opportunities throughout the city
- Support economic growth through the cannabis industry while ensuring land use compatibility and preserving City identity and history
- Improve public access to and increase tourism related to the Colorado River
- Provide better alternatives to driving with expanded access for people walking, bicycling, and taking transit
- Manage growth to ensure safe and fiscally sustainable infrastructure systems

Under California State Law, the Project is subject environmental review under the California Environmental Quality Act (CEQA), and the City will be preparing documentation pursuant to CEQA to evaluate the potential impacts of the Project. Please note the City is proposing the update the General Plan to guide future development in the City and no individual development projects are proposed at this time.

The Native American Resource Protection Act (Assembly Bill 52, Public Resources Code Section 21080.3.1) requires the City to notify California Native American Tribes of the decision to undertake the Project and allows Tribes 30 days to request consultation regarding possible significant effects that implementation of the Project may have on tribal cultural resources. In addition, Senate Bill 18 (Chapter 905, Statutes of 2004) requires the City to contact California Native American Tribes prior to amending a specific plan and allows Tribes 90 days to request consultation.

If consultation with the City regarding this Project is desired, please respond to this letter with a request in writing and identify a lead contact person. Within 30 days of receiving the tribe's request, the City will initiate consultation.

Whether or not the Tribe wishes for consultation with the City, the City welcomes comments from the Tribe as part of the environmental review process the City is conducting to comply with CEQA.

Sincerely,

Patrick Martinez,
 Community Development Manager

Re: Tribal Consultation Pursuant to SB 18 and AB 52
City of Needles General Plan Update

Dear Mr. Cochrane,

The City of Needles (City) is currently reviewing its General Plan Land use and Circulation Elements for the purposes of updating both. The City is providing an opportunity to consult with the City regarding the updating of these elements to identify any potential to impact Tribal Cultural Resources in accordance with California State Law. The Native American Heritage Commission (NAHC) indicated that the Sacred Lands File check was positive. This letter is being sent to both via email and postal service using the contact information provided by the NAHC.

PROJECT LOCATION: The City of Needles is located on the far eastern edge of San Bernardino County, is bounded by the Colorado River to the east, and is surrounded by the Mojave Desert on the north, west, and south sides. Interstate 40 bisects the City, running diagonally northwest to southeast.

PROJECT DESCRIPTION: The Land Use and Transportation elements form the backbone of the City's general plan and guide the long-term growth and improvement of the Needles community. The proposed project updates the Land Use and Transportation elements of the general plan to guide the City's growth and development for the next 20 years through 2040. The City intends to limit growth and development to its incorporated boundaries and does not plan on promoting growth or changing land use or circulation in its unincorporated sphere of influence (SOI).³⁰

The City will also create a single-map system that brings its General Plan and Zoning maps into consistency, and introduce mixed-use development into the City's downtown and the creation of a Downtown (DT) designation and corresponding changes to the Development Code (see attached map as page 3 of this letter).
