Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 RB Case Number: BNSFNR
 File Location: Regional Board
 Potential Media Affected: Soil
 Potential Contaminants of Concern: Diesel
 Site History: In the 1970s a 2-million gallon above ground storage tank (AST) was operated at the site. The AST was approximately 115 feet in diameter and 30 feet high . The diesel fuel was conveyed to the fueling platform mostly by aboveground piping. In the late 1970's the fueling operations were consolidated to another railyard and the fueling facilities at the Needles railyard were decommisioned. The AST was demolished and removed for scrap in 2005. During the demolition activities it was noted that the pad under the tank was oily and noted two nearby areas where tar/heavy oil staining was observed on the ground surface. To evaluate the extent of the impacted soil, an investigation was conducted in 2005. The results of the examination indicated that the oily soil was limited to the footprint of the AST and was extended to a depth of approximately 5 to 10 feet beneath ground surface (bgs). The volume of the excavted contaminated soil was estimated to be approximately 4,500 tons. Construction of a soil Biocell was chosen as the most cost effective remediation for the diesel contaminated soil. Construction and operation of the Biocell was completed in May of 2008. The as-buil Biocell dimesions are approximately 320 feet long and 75 feet wide at the base and approximately 6 feet high. Four low volume air blowers supply ambient air to perforated PVC piping throughout the Biocell to enhance the aerobic bioremediation process. In July of 2008 a thin layer of gunnite was sprayed on the Biocell to replace the plastic sheeting that prevented wind erosion and drying. As of the Fourth Quarter of 2008, quarterly soil sampling is ongoing at the site.

included multiple aboveground storage tanks (ASTs) and USTs. Of these ASTs and USTs only one UST pertains to this claim. The Site lot is about 54-acres. The Site is currently used for offices maintenance crews, and a crew change location. Corrective action activities have been ongoing since a Cleanup and Abatement Order (CAO) 88-126 dated June 25, 1988 was issued by the Regional Water Board. At least nine ASTs reportedly existed onsite, containing either oil or diesel, one of which was a 2.3-million-gallon diesel AST (removed in 2005). Reports indicate that the ASTs were removed in the 1970s. A total of five USTs (containing either heavy oil, tar, or soil) were removed January 1989. Of the five USTs removed only one (T-2) pertains to this claim. The history of corrective actions and the RSR will focus mainly on this UST. The area of contamination attributed to the former UST T-2 is within the southern portion of the Site. The tank was adjacent to an area referenced as Former East Fueling Platform. Free product has not been observed in wells related to the former UST T-2. No soil excavation within the area of former UST T-2 has been reported. An above ground, ex-situ, soil biocell remediation system was in operation from May 2008 and April 2011. The system was designed to provide oxygen to soil beneath the Former Fueling Platform area and in the former UST T-2 area to enhance aerobic bioremediation in soil. Free product removal, soil excavation, and in-situ soil remediation did occur at other areas of the Site; however, appears to be related to corrective actions for the Site Cleanup case (Global ID SL0607134791). Active remediation has not been conducted at the Site since 2011. Since 1984, 31 groundwater monitoring wells have been installed; of which six have been abandoned. Five wells have been regularly monitored on an annual basis. According to groundwater data, water quality objectives (WQOs) have been achieved for all constituents. Site remediation has been taking place for this site since 1988.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description:	At some point in the past, a fence post was installed which punctured a natural gas service line in a commercial area. This afternoon, an individual removed the fence post allowing the natural gas release to the atmosphere to occur. Southwest Gas crews, the local police department, and the local fire department are on-scene. No fires or injuries occurred and no evacuations were necessary. The release is expected to be under control in a short period of time. Permanent repairs are pending.

WATER TREATMENT PLANT
TRANSIENT NON-COMMUNITY WATER SYSTEM
ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:
 California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23,
Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill
prevention equipment requirements: Alert the transfer operator when
the tank is 90 percent full by restricting the flow into the tank or
triggering an audible and visual alarm; or Restrict delivery of flow
to the tank at least 30 minutes before the tank overfills, provided
the restriction occurs when the tank is filled to no more than 95
percent of capacity; and activate an audible alarm at least five
minutes before the tank overfills; or Provide positive shut-off of
flow to the tank when the tank is filled to no more than 95 percent of
capacity; or Provide positive shut-off of flow to the tank so that
none of the fittings located on the top of the tank are exposed to
product due to overfilling. Install/retrofit overfill prevention
equipment that does not use flow restrictors on vent piping to meet
overfill prevention equipment requirements when the overfill
prevention equipment is installed, repaired, or replaced on and after
October 1, 2018. For USTs installed before October 1, 2018, perform an
inspection by October 13, 2018 and every 36 months thereafter. For
USTs installed on and after October 1, 2018, perform an inspection at
installation and every 36 months thereafter. Inspected within 30 days
after a repair to the overfill prevention equipment. Inspected using
an applicable manufacturer guidelines, industry codes, engineering

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes: Returned to compliance on 11/19/2018. Observed (1) 55 gallon drum containing waste tac oil that had exceeded it's accumulation time frame for this facility. CORRECTIVE ACTION: Sign the Certificate of Compliance in attestation that the observed waste tac oil has been transported off site by a licensed hazardous waste transporter. Provide a copy of the hazardous waste disposal record to this Division regarding the disposal of the observed waste tac oil.

Description:	Southwest Gas received an odor complaint from a customer. A crew was dispatched to the home. The crew was able to isolate the leak (1/2 inch underground service line) and stop the release. One person was evacuated from the home pending the completion of repairs. It is expected the resident will be allowed to reenter the residence within one hour.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW: Not reported
Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Aesthetic impairment would include nuisance from a waste treatment facility.
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxic wastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
COMMUNITY WATER SYSTEM
WATER TREATMENT PLANT
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

UORS (California - Used Oil Recycling System). California Integrated Waste Management Board (CIWMB) helps communities establish and promote convenient collection opportunities for used oil and used oil filters.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Local Case Number: 2000033
Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Gasoline
Site History: Inactive service station and mini-market The UST system was removed from the site in November 2000. Following UST system removal, site assessments and feasibility/remedial work have been conducted. A total of 15 soil borings (B1 through B9, AS-1, AS-2, and MW-1 through MW-4) have been advanced and sampled to assess the presence and distribution of the fuel related hydrocarbons and/or oxygenates in the subsurface beneath the site. The site was adequately assessed and remediated. The case was closed April 1 2014. For complete details see the "Case Closure Summary included in the document entitled" Low Threat Underground Storage Tank Closure Policy," dated 04/01/2014.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
