Present Land Use/Zoning/General Plan Designation:

Agricultural Watershed (AW)

Project Description: *(please use a separate page if necessary)*

The culvert at the mouth of Campbell Creek conveys the water in Campbell Creek beneath Dry Creek Road into Dry Creek along the south edge of the paved roadway. The culvert is undersized for flood stage flows and is a barrier to fish passage. The Project is a proposal by Napa County to replace the existing corrugated metal pipe culvert with a bottomless arch bridge precast culvert (bottomless culvert) composed of concrete. In addition to replacement of the culvert, the Project is intended to improve the hydrologic function of Campbell Creek at the culvert's outlet and along approximately 160 linear feet of creek upstream of the culvert's inlet by resolving channel incision and reconnecting the creek to its historical floodplain. The Project would be constructed in three phases. Each phase would last between 2 to 4 weeks during a single construction season in the summer/fall of 2024. The Project would require closure of a single lane of Dry Creek Road; however, two-way traffic would be maintained via an active traffic control plan.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
 If you have already sent your document to the agency please denote that with an "S".
