GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

Overall Inspection Comments

On site for routine hazardous materials and business emergency plan inspection. Consent to enter and inspect was given by (EDDIE MILLACCI - BUILDING ENGINEER). EMAIL: EMILLACCI@RATKOVICH.COM

Observed the facility and inspected hazardous materials storage.

Annual employee safety training records were maintained.

The facility is responsible for identifying all hazardous materials, to include hazardous wastes, which are above disclosure thresholds. If there is a change in the type or amount of chemicals that are maintained on site, please submit revised documents (electronically) within 30 days of the change

This report shall serve as a "NOTICE TO COMPLY" for Minor Violations, and a "NOTICE OF VIOLATION" for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Overall Inspection Comments

Consent to enter, inspect, and take photographs was given by: Danny Adams & Cruz Oropeza

Documents uploaded to CERS were reviewed and field verified. The Spill Prevention Control and Countermeasure plan and related inspection and testing logs were reviewed on site. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation.

NOTE:

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. The California Health and Safety Code (CHAPTER 6.67 SECTION 25270) requires that facilities meeting either of the following requirements be added to the APSA (Aboveground Petroleum Storage Act) program and comply with the regulations set forth in the CHSC. Storage of any liquid petroleum based product stored in above ground tanks 55 gallons or greater that either; have a total storage capacity of 1320 gallons or greater or; are stored below grade.

*****Upon the resolution of all the above mentioned violations, please respond via email to the issuing inspector to have the corrections reviewed and the violations cleared. *****

Reports emailed to:

This report shall serve as a "NOTICE TO COMPLY" for Minor Violations, and a "NOTICE OF VIOLATION" for Major violations. Formal enforcement and/or penalty assessment may be initiated for any violations noted, and for those not corrected in a timely manner. You are, hereby, ordered by the Fire Chief to correct the above noted violations **WITHIN 30 DAYS, OR FORTHWITH IF INDICATED IN THE CORRECTION SUMMARIES PROVIDED.**

Overall Inspection Comments

Consent to enter, inspect and take photographs was given by: Danny Adams

The Business Activities, Owner/Operator Identification, Hazardous Materials Inventory, Site Map, Emergency Response/Contingency Plan and Employee Training Plan sections were reviewed in CERS and field verified. Review and correct any violations indicated previously in this report, on or before the COMPLY BY date associated with each violation. New user instructions are provided below.

NOTE:

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA **** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change. For new CERS users, please follow the procedures below:

1. Visit <http://cers.calepa.ca.gov> to create a user name and password. The approval will take 2-3 days and Confirmation will be sent to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory items equal to or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each of the same material the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN form can be found on the CERS website. When properly completed, this form will satisfy the Health and Safety code reporting requirements for both the Emergency Response and Employee Training sections in CERS.

As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help section for any questions that you may have.

Los Angeles Fire Department - Official Inspection Report
ABOVE GROUND STORAGE TANK (Tier II)
RE-INSPECTION - OFFSITE
 200 N. Main Street
 Los Angeles, CA 90012
 (213) 978-3680

BUSINESS:
700 SOUTH FLOWER PLAZA

FACILITY ID:
FA0023490

NOTICE#:
DAJVATHY8

INSPECTION DATE:
05/03/2019

NVO = No Violation Observed OUT = Out of Compliance NA = Not Applicable UD = Undetermined COS = Corrected On Site RPT = VDG =

General SPCC Requirements

38 Person has been designated as accountable for discharge prevention and reports to management

■ NVO □ OUT □ NA □ UD □ COS □ RPT

39 Spill prevention briefings are conducted annually

■ NVO □ OUT □ NA □ UD □ COS □ RPT

40 SPCC addresses security measures-lighting, access to handling/storage, valves/pumps/transfer equip

■ NVO □ OUT □ NA □ UD □ COS □ RPT

41 Handling areas, valves, pumps/starter controls, load/unload connections secured, lighting adequate

■ NVO □ OUT □ NA □ UD □ COS □ RPT

42 SPCC adequately discusses facility tank car and tank truck loading/unloading rack

■ NVO □ OUT □ NA □ UD □ COS □ RPT

43 Loading rack containment has capacity to contain single largest compartment of tank car/truck

■ NVO □ OUT □ NA □ UD □ COS □ RPT

44 Vehicular departure warning system in place at facility with a loading/unloading rack

■ NVO □ OUT □ NA □ UD □ COS □ RPT

46 Brittle fracture evaluation of field-constructed aboveground tanks performed

■ NVO □ OUT □ NA □ UD □ COS □ RPT

47 Oil filled operational equipment containment standards are met

■ NVO □ OUT □ NA □ UD □ COS □ RPT

SPCC Requirements for Onshore Facilities

48 Facility drainage or drainage controls adequately discussed

■ NVO □ OUT □ NA □ UD □ COS □ RPT

49 Facility drainage adequately restrained unless conditions met

■ NVO □ OUT □ NA □ UD □ COS □ RPT

50 Valves used for drainage are manual (not flapper-type) to prevent a discharge

■ NVO □ OUT □ NA □ UD □ COS □ RPT

51 Drainage from undiked areas or diversion systems designed to retain final discharge in facility

■ NVO □ OUT □ NA □ UD □ COS □ RPT

52 Lift pumps provided for treated drainage waters when more than one treatment unit

■ NVO □ OUT □ NA □ UD □ COS □ RPT

53 Adequate discussion of all bulk storage containers located at the facility

■ NVO □ OUT □ NA □ UD □ COS □ RPT

54 Material and construction of all containers are compatible with the material stored

■ NVO □ OUT □ NA □ UD □ COS □ RPT

55 Adequately sized secondary containment provided and maintained for bulk storage containers

■ NVO □ OUT □ NA □ UD □ COS □ RPT

Overall Inspection Comments

Second Notice of Violation Inspection Report

Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on 1/25/2019, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. New user instructions are provided below.

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:

**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.
 Second Notice of Violation Inspection Report

Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on XXXXXXXX, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. New user instructions are provided below.

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:

**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year. Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.
 For new CERS users, please follow the procedures below:

1. Visit <http://cers.calepa.ca.gov> to create a user name and password. The approval will take 2-3 days and Confirmation will be sent to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory items equal to or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each of the same material the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN form can be found on the CERS website. When properly completed, this form will satisfy the Health and Safety code reporting requirements for both the Emergency Response and Employee Training sections in CERS. As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help

Overall Inspection Comments

Second Notice of Violation Inspection Report

Documents uploaded to CERS were reviewed. Indicated previously in this report are violations, originally issued on XXXXXXXX, that have not been resolved by the original COMPLY BY date. These violations have been re-issued and the violation class upgraded. Review and correct all violations indicated in this report, on or before the new COMPLY BY date associated with each violation. Failure to resolve these violations will result in this facility being subject to formal enforcement. New user instructions are provided below.

The LAMC, Sections (L.A.M.C. SECTIONS 57.105.1.4; 57.120.3; 57.121.2 and 57.121.2.1.) requires businesses that store, use or handle hazardous materials in the City of Los Angeles to obtain a Consolidated Permit from the Los Angeles Fire Department CUPA. To receive a Consolidated Permit you must satisfy the following requirement:

**** Annual submission of a Hazardous Materials Business Plan into CERS is required between January 1 and March 1 of every year.

Please remember that any change in inventory of greater than 100 percent will require new submission within 30 days of that change.

For new CERS users, please follow the procedures below:

1. Visit <http://cers.calepa.ca.gov> to create a user name and password. The approval will take 2-3 days and Confirmation will be sent to the email provided.
2. Fill out owner/operator and business activity information on CERS. Verify that owner and business information in CERS is correct. Please remember to add your EPA ID number if you generate or store hazardous waste.
3. Complete your chemical inventory in CERS. All inventory items equal to or greater than 200 cubic feet of compressed gas, 55 gallons of liquid, or 500 pounds of solid, needs to be reported. This would include all containers of the same product added together. If you had a total of 11 containers of 5 gallons each of the same material the total would be 55 gallons and would need to be reported. In addition to your chemical inventory please upload a copy of your site map.
4. Upload a copy of your Emergency Response Plan/Contingency Plan, in the plan section of CERS. A CONSOLIDATED EMERGENCY RESPONSE / CONTINGENCY PLAN form can be found on the CERS website. When properly completed, this form will satisfy the Health and Safety code reporting requirements for both the Emergency Response and Employee Training sections in CERS. As a reminder, you must complete all the required sections in CERS. This includes the owner/operator and business activities section, inventory and site map section, and the contingency plan and employee training section. The CERS site has a very detailed help section for any question that you may have.

RE: PRA of October 20, 2019, Reference # H015838-102019.

Dear Ms. Carol Noland,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 700 S. Flower Street
Los Angeles CA 90017**

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction [click here](#).

Re: Phase I Environmental Site Assessment
700 South Flower and 711 South Hope
Los Angeles, California 90017
IVI Project No.: PC21102317

Dear Mr. Kindberg:

IVI Assessment Services, Inc. ("IVI") is pleased to submit this copy of our Phase I Environmental Site Assessment on the above-referenced property. This report outlines the findings of IVI's site reconnaissance, historical land use research, review of governmental records, interviews, and our Pre-Survey Questionnaire.

I declare that, to the best of my professional knowledge and belief, I meet the definition of *environmental professional* as defined in § 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the *subject property*. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Please contact the undersigned at (619) 254-3124 or by email at scott.pritchard@ivi-intl.com should you have any questions.

Sincerely,

IVI Assessment Services, Inc.

Scott Pritchard, REA I
Environmental Professional

Previous Reports F

This report documents IVI's findings from our Phase I Environmental Site Assessment on the 700 South Flower and 711 South Hope, located at 700 South Flower and 711 South Hope, Los Angeles, California (the "Subject"). The property, which is situated in an urban area characterized by commercial, retail and office development, consists of a 4.3-acre parcel improved with a 39-year-old (built in 1973), office, hotel, and retail complex. The building was built in three phases. Phase I consists of two office towers, Phase II consists of a retail mall and a parking structure, and Phase III consists of a Sheraton Hotel. In plan, the complex consists of a single building, which is rectangular in shape containing two towers set on a connecting retail plaza occupying the first three floor levels with numerous retail tenants including a Macy's anchor tenant. In addition, there is an at-grade parking garage on the southern portion of the site. Prior to the construction of the existing improvements, the site was improved with single family residences, apartments, a YMCA, hotels, stores, restaurants and parking lots.

The purpose of this Phase I Environmental Site Assessment was to assess existing site conditions and render an opinion as to the identified or potential presence of recognized environmental conditions in connection with the property within the scope and limitations of ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-05 and the limitations identified herein. Exceptions to or deletions from the scope of work are described in Section 2.0.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject; however, the following items of environmental concern were identified which warrant mention:

Asbestos-Containing Material (ACM)

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

Methane Hazard Zone

Based on information provided by the City of Los Angeles, the Subject is located in an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. From review of oil and gas field maps of the area, it does not appear that any active or inactive oil wells, landfills or oil fields have been located on the Subject property. Of note, methane is a non-toxic, non-carcinogenic gas that is extremely flammable at certain concentrations. No rotten egg-like odors, indicative of methane gas, have been reported in the building. Based on this information, the Subject's location within a Los Angeles City's designated Methane Zone is not suspected to be of a significant environmental concern. However, should future additions, alterations, repairs, changes of use or changes of occupancy to the existing building take place, the Subject may continue to be required to comply with the methane mitigation requirements set forth by the City of Los Angeles.

2.1 General

IVI was retained by National Real Estate Advisors (“Client” or “User”) to prepare a Phase I Environmental Site Assessment, in conformance with ASTM International's Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process E 1527-05 on the Subject in accordance with our Agreement dated November 29, 2012.

This Report was specifically prepared for the use and reliance of National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund (“INDURE”), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC, potential mortgagees and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1 as an aid in underwriting and evaluating the collateral that would secure the Subject’s mortgage. This Report is exclusively for the use of National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund (“INDURE”), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1 and is not for the use and benefit of, nor may it be relied upon by, any other person or entity, for any purpose, without the advance written consent of IVI or as described in this Report.

2.2 Purpose and Scope**2.2.1 Purpose**

The purpose of this report is to identify Recognized Environmental Conditions in connection with the property, using the methodology recommended by ASTM International in order for a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defenses to CERCLA liability and/or to help understand potential environmental conditions that could materially impact the operation of the business associated with the Subject. Specifically, this methodology is referred to as *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation: E 1527-05.

The term Recognized Environmental Condition is defined by ASTM Standard E 1527-05 as “...the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

2.2.2 Scope

In general, the scope of this assessment consisted of reviewing readily available information and environmental data relating to the property; interviewing readily available persons knowledgeable about the site; reviewing readily available maps, aerial photographs and records maintained by federal, state, and local regulatory agencies; and conducting a site visit.

Of importance, the client is advised that federal, state, and local laws may impose environmental assessment obligations beyond the scope of this practice. Client is also notified that there are likely to be other legal obligations with regard to hazardous substances or petroleum products discovered on the Subject that are not addressed in this practice and that may pose risks of civil and/or criminal sanctions for non-compliance.

The specific scope of this assignment included the following:

2.2.2.1 Performing a site reconnaissance to characterize on-site conditions and assess the site’s location with respect to surrounding property uses and natural surface features. In addition, IVI conducted a reconnaissance of the surrounding roads and readily accessible adjacent properties to identify obvious potential environmental conditions on neighboring properties. Photographs taken as part of the site reconnaissance are provided in Appendix A.

The site visit was conducted on December 12, 2012, by Carol Noland representing IVI. The site was represented by Mr. Phillip Lee, the Property Manager. It was partly cloudy and the temperature was approximately 55° F at the time of our site survey. IVI conducted the site reconnaissance in a systematic manner focusing initially on the exterior, which was surveyed in a grid pattern. IVI also surveyed a representative sampling of the interior spaces in a systematic manner.

- 2.2.2.2** Interviewing persons familiar with the property to obtain information on present and previous on-site activities potentially resulting in the environmental degradation of the site or adjoining properties. A Pre-Survey Questionnaire to be filled out and returned to IVI by someone knowledgeable about the site was provided to Mr. Phillip Lee. A copy of the returned Pre-Survey Questionnaire is provided in Appendix B.

The following table presents a summary of the individuals contacted or to whom requests for documentation were made as part of this assessment:

Name	Affiliation	Telephone No.
Custodian of Records	County of Los Angeles Public Health Investigation	(626) 430-5569
Customer Service Representative	Los Angeles Department of Water & Power (LADWP)	(800) 342-5397
Representative	Los Angeles County Department of Public Works –Environmental Programs	(626) 458-3517
Katie Fernandez	Los Angeles Fire Department	(213) 482-7115
Representative	California Department of Conservation – Division of Oil Gas & Geothermal Resources	(714) 816-6847
Phillip Lee	Subject Property – Property Manager	(213) 624-2891
Jeff Jorgensen	Subject Property – Chief Engineer	(213) 265-1968
Sam	Owner – Kodak Express Digital Solutions	(213) 629-4000
Ian Gee	General Manager – Sheraton Hotel	(213) 488-3500

- 2.2.2.3** If provided, reviewing of information such as previously prepared appraisals, building plans and specifications, and environmental reports.
- 2.2.2.4** Reviewing readily available historical documents, such as topographic maps, aerial photographs, city directories, Sanborn Fire Insurance Maps and atlases, to identify previous activities on and in the vicinity of the Subject. Copies of these documents are included in Appendix C.
- 2.2.2.5** Reviewing readily available environmental databases maintained by federal, state, and local agencies within the approximate minimum search distances as described within the Regulatory

Review Section 6.0 of this report. A copy of the Computerized Environmental Report, provided by Environmental Data Resources, Inc. can be referenced in Appendix D.

- 2.2.2.6** Conducting a visual survey of readily accessible common areas to identify the presence of the most obvious and common types of suspect asbestos containing materials (ACM). The basis for “suspect” determination is taken from the materials listed in Appendix G of the United States Environmental protection Agency (USEPA) publication Managing Asbestos in Place (also known as the Green Book). All building materials listed within Appendix G of the Green Book are considered to be suspect ACMs at the Subject. This screening is not intended to be used for demolition, abatement, renovation, or repair work.

THIS LIMITED SURVEY IS NOT TO BE CONSTRUED AS A COMPREHENSIVE ASBESTOS SURVEY, WHICH OFTEN ENTAILS DESTRUCTIVE TESTING OR THE SURVEY OF AREAS BEHIND WALLS, ABOVE CEILINGS, IN TENANT SPACES AND IN OTHER TYPICALLY INACCESSIBLE AREAS. MOREOVER, IVI DOES NOT WARRANT THAT ALL ACMs AT THE SUBJECT HAVE BEEN IDENTIFIED.

- 2.2.2.7** Reviewing published radon occurrence maps to determine whether the site is located in an area with a propensity for elevated radon concentrations.
- 2.2.2.8** An analysis of mold and/or mold issues was beyond the scope of this report.
- 2.2.2.9** Assessing the age of the Subject to determine whether it is predisposed to contain lead-based paint. During our walkthrough survey, IVI noted the condition of the paint observed. Note, a compliance audit for lead paint was not conducted.
- 2.2.2.10** Testing, if any, was designed solely to meet the requirements of the client’s scope of work, not to meet any local, State or Federal regulations and shall not be utilized as such.

2.3 Data Gaps

According to § 3.3.20 of ASTM Standard E 1527-05 a data gap is a lack of or inability to obtain information required by the ASTM Standard despite good faith efforts to gather same. Data gaps may result from incompleteness in any of the activities required by the ASTM Standard. The following data gaps occurred in connection with this report:

Data Gap	Explanation	Significance of Gap
Site History	History not conducted back to a time when the site was undeveloped land (See § 5)	Low - not likely to alter Report's conclusions due to IVI's search of standard historical sources of information such as aerial photographs, historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, reviews of previous investigations and interviews with knowledgeable individuals who were familiar with the property.
Site History	Site history not conducted in 5-year intervals (See § 5)	Low - not likely to alter Report's conclusions due to IVI's search of standard historical sources of information such as aerial photographs, historic topographic maps, city directory abstracts, Sanborn Fire Insurance Maps, reviews of previous investigations and interviews with knowledgeable individuals who were familiar with the property.
User Interview	AAI User Questionnaire not returned to IVI	Low - not likely to alter Report's conclusions
Former Owner or Operator Interview	Unable to interview former site owner or operator due to inability to locate	Low - not likely to alter Report's conclusions
Governmental Records	FOIAs not returned (See § 8.6)	Unknown - However, if receipt of FOIAs alters the Report's conclusion, the client will be notified
Inaccessible Areas	IVI was not able to access two on-site transformer vaults owned by the Los Angeles Department of Water and Power. On-site personnel have no access to these areas. Accordingly, we make no representations with respect to same.	Low - not likely to alter Report's conclusions

3.0 SALIENT ASSIGNMENT INFORMATION

700 South Flower and 711 South Hope
Los Angeles, California

Salient Assignment Information	
IVI Project No.:	PC21102317
Project Name:	700 South Flower and 711 South Hope
Street Address:	700 South Flower and 711 South Hope
City, State and Zip:	Los Angeles, California 90017
Primary Use:	Office, hotel, and retail
Year Built and Age of Improvements:	1973; 39 years-old
Site Area:	4.3 Acres
Building Size:	Verizon Center Tower – 673,553 SF Sheraton Hotel – 450,000 SF Macy’s Store – 243,762 SF Plaza Mall – 104,452 SF Parking Garage – 833,000 SF
Number of Buildings:	4 + parking garage above Macy’s

4.1 Property Location

The site is located at 700 South Flower and 711 South Hope in Los Angeles, Los Angeles County, California and is identified on local tax maps as Parcel Nos. 5144-010-401 through 5144-010-410. The address of 750 West 7th Street is also associated with the Subject. Please refer to the Site Plan and maps provided within Appendix C.

4.2 Surrounding Land Use

The property is located in an urban setting characterized by commercial retail and office development. The following is a tabulation of surrounding property usage:

Direction	Adjacent Properties	Surrounding Properties
North	Across 7 th Street is The Roosevelt office building with several retail stores and restaurants on the ground floor.	Surrounding properties to the north are improved with mixed urban use office, residential loft and retail development.
South	Across 8 th Street are a construction site, and the Gas Company Lofts building (with International House of Pancakes as a ground floor tenant).	Surrounding properties to the south are improved with mixed urban use office, residential loft and retail development.
East	Across Hope Street is an office building occupied by Rite Aid Pharmacy, a small building occupied by a Christian Science Reading Room, a parking Lot, and two public parking garages.	Surrounding properties to the east are improved with mixed urban use office, residential loft and retail development.
West	Across Flower Street are two parking garage structures, a surface parking lot, and an office building with retail stores and restaurants on the ground floor.	Surrounding properties to the west are improved with mixed urban use office, residential loft and retail development.

4.3 Physical Site Setting

4.3.1 Size and Shape of Parcel

The property is rectangular in shape and 4.3-acres in size.

4.3.2 Topography

The site slopes gently from the northeast to southwest. The topography of the area is best described as gently sloping. Properties to the northeast are at a higher topographic elevation. According to the United States Geological Survey (USGS) *Hollywood, CA 7.5 Minute Series* topographic

map, the Subject's topographic elevation ranges from 269' above mean sea level (msl) on the northeast end to approximately 260' above msl on the southwest end.

4.3.3 Surface Waters and Wetlands

Surface Waters

There are no surface water bodies or streams on or adjacent to the Subject. The closest open surface water to the Subject is the Los Angeles River, which is located approximately 1.5 miles to the east.

Wetlands

IVI reviewed a wetlands map of the subject area prepared using the US Department of the Interior, Fish and Wildlife Service's Internet Wetland Interactive Mapper. The source material used to produce the National Wetlands Inventory digital data for these maps was prepared primarily by stereoscopic analysis of high altitude aerial photographs. Based on this review, IVI did not identify any federally regulated wetlands on the subject property. Additionally, IVI did not observe vegetation characteristic of wetlands on the subject site.

4.3.4 Soils, Geology and Groundwater

Soils

According to the *Soil Survey of Los Angeles County, California*, dated 1969, issued by the United States Department of Agriculture, Soil Conservation Service, the soils at the site are mapped as Hanford association, 2 to 5 percent slopes. The soils of this association occur on gently sloping alluvial fans. Hanford soils are over 60 inches deep, are well drained, and have moderately rapid subsoil permeability. They have a pale-brown coarse sandy loam surface layers approximately 8 inches thick underlain by light yellowish-brown coarse sandy loam and gravelly loamy coarse sand substratum.

Geology

The site is located within the western portion of the Coastal Plain of Los Angeles County, a deep northwest trending depositional basin bounded to the northeast by the Puente Hills and Whittier Fault, to the southwest by the folds and faults of the Newport-Inglewood structural zone, and to the southeast by the Santa Ana Mountains.

Deposits of recent alluvium of up to 175 feet in thickness underlie the site vicinity. The upper part of these deposits consist of stream channel deposits and unconsolidated and semi-consolidated alluvial fan and flood plain sediments consisting of gravel, sand, silt, and clay.

Groundwater

Under natural, undisturbed conditions, shallow groundwater flow generally follows the topography of the land surface and, on this basis, the topography suggests that groundwater flow across the site is in a south-southwesterly direction. However, localized conditions can alter flow direction and thus the presumed flow may not coincide with the actual in the subject area. Shallow groundwater in the vicinity of the site is anticipated to be encountered at a depth of approximately 50' below ground surface.

4.4 Site Improvements

4.4.1 Utilities

The Subject is served with the following utilities:

Water:	Los Angeles Department of Water & Power
Sanitary Sewer:	City of Los Angeles Bureau of Sanitation
Storm Sewer:	City of Los Angeles Public Works Department
Electric:	Los Angeles Department of Water & Power
Natural Gas:	The Gas Company

According to the most recent water quality report published by the Los Angeles Department of Water and Power, the water supplied to the Subject meets federal and state water quality standards.

Stormwater runoff collected by catch basins and roof drains is discharged into the municipal stormwater management system.

4.4.2 Building Description

The Subject is improved with a 39-year-old, office/retail complex which consists of a 33-story office tower, a 26-story hotel tower, a 3-story department store with 6 levels of parking above (9 total stories), and a 2-story shopping mall. The building features a two level basement, which underlies the entire complex, with cast-in-place concrete and concrete masonry unit (CMU) walls. The basement floors are used primarily for the central mechanical plant, loading docks, and some parking. The superstructure is of fireproofed structural steel. Exterior walls feature a glass and concrete panel curtainwall system and brick. The flat roofs are covered with a single-ply EPDM system.

Interior finishes include floor coverings of carpet, resilient floor tile, ceramic tile, and marble tile; walls of painted and papered gypsumboard, and brick; and ceilings of painted drywall, a suspended systems with inlaid acoustical ceiling tiles, and an open system that exposes the underside of the roof.

Heating is provided by natural gas-fired boilers located in the central plant, and air conditioning is provided by a chilled water system with a cooling tower located on the top level of the parking garage.

Vertical transportation for the office tower is provided by two banks of traction elevators (hi-rise and low-rise), with a total of 15 passenger and two freight elevators. The parking structure and the Macy’s store are served by a common bank of five passenger and two freight elevators, one of which is hydraulic. The hotel is served by four traction passenger elevators, one electric freight elevator, and two hydraulic elevators.

The mall area and Macy’s are also served by four electric escalators, and the hotel is served by six electrical escalators.

4.5 Current Property Use

The Subject is developed with an office, hotel, and retail. The following table summarizes the site’s tenants and their activities:

Tenant	Description of Operation
Office building	Multiple professional office uses
Sheraton Hotel	Hotel
Macy’s	Department store
Broadway Plaza Cleaners	Drop-off only dry cleaner
Kodak Express Digital Solutions	Photo developing
Mirror Image Car Wash	Car wash
Bally Total Fitness	Fitness center
Express	Women’s clothes
Lady Foot Locker	Women’s shoes
Plaza Suit & Tuxedo	Men’s clothing
Victoria’s Secret	Women’s clothing
Bath & Body Works	Accessories
Bombay Eyebrow Threading Bar	Beauty salon
GNC	Health food store
Ultima Beauty Supply	Cosmetics
Dr. Regier, Optometrist	Optometry
U.S.P.O.	Post office
AT&T	Cell phone store

Tenant	Description of Operation
Hallmark Gold Crown	Cards and gift store
Jewelry Pavilion	Jewelry store
Mr. G's Toys	Toy store
Radioshack	Electronics store
Smoke & Stuff	Smoking accessories
Sports Iconic	Sports memorabilia store
T-Mobile	Cell phone store
The Brasserie	Restaurant
Carl's Jr.	Restaurant
Checker Cab Pizza	Restaurant
China Best Express	Restaurant
Coffee Walk & Yogurt Talk	Restaurant
Fresh & Tasty	Restaurant
Gourmet Fruit Bowl	Restaurant
The Lovin Oven	Restaurant
The Mad Burrito	Restaurant
Pam's Deli	Restaurant
Robek's Juice	Restaurant
Super Lunch	Restaurant
Wakana Sushi	Restaurant

Kodak Image Center Solutions utilizes photo developing equipment which generates a silver-containing development waste stream. The spent photo developer solution is passed through a silver-recovery unit prior to discharge to the municipal sewer system. The silver recovery unit filters are picked up by a contracted waste hauler (ERSI) on a regular basis.

Dry cleaning is not conducted on-site. Broadway Plaza Cleaners is a “drop-off” point only. This was confirmed during our site walkthrough. According to Property Management and the cleaner’s manager, they have always been a drop off only cleaners.

4.6 Environmental Permits

Air Emissions

Based on our research, the Subject has registered with the South Coast Air Quality Management District (SCAQMD) and obtained permits to operate equipment that releases pollutants into the air. The Subject has obtained permit Nos. G12592, G12593, G13947, G14664, F77029, F77033, F77028, and F77030. The Subject maintains these permits for the emissions from emergency generators, fire pumps and boilers. No current violations were noted with the SCAQMD. As such, these permits do not represent a significant environmental concern to the Subject.

4.7 Plans and Specifications

Neither building drawings nor specifications were provided for our review.

5.1 Historical Summary

Prior to the construction of the existing improvements, the site contained single family residences, apartments, a YMCA, hotels, stores, restaurants and parking lots.

5.2 Topographic Maps

IVI reviewed historic USGS *Hollywood, CA 7.5 Minute Series* topographic maps of the Subject area provided by EDR. The following maps were provided for our review:

Year Revised	Subject Property	Surrounding Properties
1964	The Subject is shaded pink, denoting dense development. A building labeled as the YMCA is located in the northeastern-most corner in the location of the current hotel.	All surrounding areas are shaded pink, denoting dense development. Two churches are depicted to the southeast and southwest, and Pershing Square is shown to the northeast. A fire station is located to the northwest.
1975	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed
1982	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed
1994	Similar to the previous topographic map reviewed	Similar to the previous topographic map reviewed

The topographic maps do not identify individual buildings or development on the Subject due to the concentration of structures in the highly urbanized Los Angeles area, but rather shows the area to be shaded denoting urbanized land use, and identifies only landmarks as distinct structures. Nevertheless, the topographic maps do not identify any industrial complexes, landfills or wetlands on or adjacent to the subject site.

5.3 Historical Maps

Sanborn Fire Insurance Maps (Sanborn Maps)

IVI had a search conducted for Sanborn Maps, which reference the property. The findings of this review are summarized below:

Year	Subject Property	Adjacent and Surrounding Properties
1888	The north and central portions of the subject property are depicted as vacant land except for one residences located in the northeast corner. Six single-family dwellings, one with a conservatory, are located near the southwest portion of the	Vacant land, a shed, and a single family dwelling are depicted on the adjoining properties to the north, with single family dwellings located beyond to the east. Vacant land and the Los Angeles College are located to the south, across 8 th Street.

Year	Subject Property	Adjacent and Surrounding Properties
	subject property, two dwellings and sheds are located near the center of the east side of the property, and a multifamily dwelling is located near the southeast portion of the subject property.	Several dwellings, a buggy shed, two liveries, and a small school are located to the west, across Flower Street. Two dwellings and vacant land a located to the north, across 7 th Street. Sixth Street Baseball Park is located further north.
1894	A greenhouse, two hen houses, a small dwelling and several outbuildings are present on the northern end of the Subject. Three additional homes are present on the southeastern end of the property. No other significant changes were noted.	Several houses and the Simpson M. E. Tabernacle are present to the east across South Hope Street. The First English Lutheran Church and the Abbotsford Inn are located to the south across West 8 th Street. Dwellings and a Lutheran church are located to the west across South Flower Street. No other significant changes were noted.
1906	The subject property is improved with flats, a dwellings and three small stores near the northern portion; dwellings and the Chateau Frontenac along the western portion; dwellings, a Swedish Baptist Church, two hotels, and a boarding house along the southern end; and dwellings along the eastern side.	Surrounding properties to the north, across 7 th Street, include lodging, Hotel Orena, dwellings, and vacant land. Across 8 th Street to the south are a church, dwellings, and the Abottsford Inn. Surrounding properties to the east, across South Hope Street, include flats, dwellings, and an auditorium.
1920	Similar to the previous map reviewed.	Similar to the previous map reviewed.
1950	The former flats located on the northern portion of the Subject have now been converted to retail stores. A YMCA building with a restaurant and a swimming pool is located on the northeastern end of the property. Stores, a clinic, and parking lots are located along the western portion of the subject property. Stores, restaurants, parking, and a sign painting area are located near the southern portion of the subject property.	Surrounding properties to the north, across West 7 th Street, consist of restaurants, Hotel Victoria, stores, and a parking lot. Surrounding properties to the east, across South Hope Street, include a large department store, a church, a parking lot, several stores, and parking garages. The western adjacent area is improved with several office buildings, a parking garage, a piano store, and a large furniture store.
1955-1958	Similar to previous map reviewed.	Similar to previous map reviewed.
1960	The stores on the northern portion of the subject property have not changed significantly. The entire western portion of the subject property has been cleared and is utilized as a parking lot. The southwestern corner of the site is improved with a hotel and several stores. The southeastern portion of the subject property is improved with stores, restaurants, a parking garage, and a parking lot.	The northern surrounding area is improved with commercial retail and office buildings. The Southern California Gas Company Building was constructed on an adjacent property to the south. The remaining adjacent and surrounding properties appear unchanged.
1962-1963	Similar to previous map reviewed.	Similar to previous map reviewed.

Year	Subject Property	Adjacent and Surrounding Properties
1967	The stores on the northern portion of the site have been razed, and the area is developed with a parking lot. The YMCA is still present on the eastern end, along with several stores, a motel, and a parking lot. The western area parking lot and hotel and stores near the southwestern portion remain unchanged.	Surrounding properties to the north, across West 7 th Street, consist of the Republic Federal Savings Building, stores, restaurants, bars, and offices. The remaining adjacent and surrounding properties appear unchanged.
1970	The stores on the northern portion of the site have been razed, and the area is developed with a parking lot. One small motel is present on the eastern end. The southeastern portion of the Subject has also been cleared and is used as a parking lot. The western area parking lot and hotel and stores near the southwestern portion remain unchanged.	Similar to previous map reviewed.

5.4 Aerial Photographs

Aerial photographs frequently provide visual documentation of site conditions at the time of the photographs. Activities such as dumping or industrial use of a site can often be discerned through the examination of aerial photographs. IVI reviewed historic aerial photographs provided by EDR and GoogleEarth (online). The following is a synopsis of the aerial photographs reviewed:

Year	Subject	Surrounding Properties
1928	The Subject appears developed with several larger commercial and structures.	The surrounding area appears densely developed, primarily with smaller residential-type structures to the south and east, with some larger commercial structures to the north and west.
1938	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
1947	Similar to the previous aerial photograph reviewed.	Several larger commercial buildings are present to the east and south. No other significant changes were noted.
1952	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
1960	Similar to the previous aerial photograph reviewed.	Several commercial structures and parking lots are visible in the surrounding area. The 110 freeway is located approximately 0.25 mile to the west.
1971	The Subject appears to contain no structures, and to be used as parking lot.	The surrounding area appears relatively unchanged, although several larger office buildings are present.
1982	The Subject is improved with the existing structure.	Similar to the previous aerial photograph reviewed.

Year	Subject	Surrounding Properties
1994	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
2004	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.
2011	Similar to the previous aerial photograph reviewed.	Similar to the previous aerial photograph reviewed.

5.5 Chain-of-Ownership

A copy of the Subject's Chain-of-Title has not been provided to IVI for review.

5.6 Previous Reports

IVI reviewed several previous environmental assessments prepared on the Subject. The information obtained was not verified for accuracy by IVI and a critique of the report was beyond the scope of this assessment. The following documents were provided for review:

- *Phase I Environmental Site Assessment of Hyatt Regency Los Angeles, 711 South Hope Street, Los Angeles, California*, dated February 17, 2000, prepared by IVI Environmental Inc. (IVI), on behalf of Commercial Capital Initiatives, Inc. According to this report, the hotel was attached to the MCI Center, which was not a part of this assessment. The report noted that the hotel's mechanical systems and central plant were located off-site (within the MCI Center central plant). The Subject was improved with various commercial and residential buildings prior to construction of the existing improvements.

This report did not identify any recognized environmental conditions in connection with the Subject. However, the report identified friable fireproofing and acoustic ceiling texture, as well as non-friable flooring and wallboard assemblies, and roofing materials as asbestos-containing. All of the suspected and identified ACM throughout the property is considered to be in good condition with a low potential for disturbance. All of the asbestos on-site was noted as being properly managed under an Operations and Maintenance (O&M) Program which appeared adequate, and in use.

- *Phase I Environmental Site Assessment of MCI Center and Macy's Plaza, 700 South Flower Street, Los Angeles, California, 90017*, dated February 18, 2000, prepared by IVI Environmental, Inc. (IVI), on behalf of Commercial Capital Initiatives, Inc. This report did not include the adjoining hotel. According to this report, improved with various residential and commercial structures prior to construction of the existing improvements.

This report did not identify any recognized environmental conditions in connection with the Subject. However, the report identified fireproofing material, floor tile assemblies, wallboard assemblies, fire door insulation, and pipe insulation tape as asbestos-containing materials (ACMs), and cooling tower fill material and the built-up roofing materials as suspect ACMs. The report recommended the continued management of ACMs under the existing Operations and Maintenance Plan (O&M). The report also recommended that the aboveground storage tanks serving the emergency generators and fire pumps be properly registered.

- *Asbestos Operations and Maintenance Program Manual, The Complex Containing The MCI Center Office Tower, The Hyatt Hotel, The Macy's Plaza Department Store and Shopping Center, and a Parking Garage in the Block Bounded by 7th, 8th, Flower and Hope in Los Angeles, CA, dated June 24, 2003, prepared by Masek Consulting Services, Inc. (Masek), on behalf of Cushman & Wakefield of California, Inc.*

The O&M plan was prepared to assist those involved with the Subject to prevent exposure to the actual and assumed asbestos-containing materials (ACMs) present in the building, and to assist the owner and management in complying all al asbestos-related regulations, and to minimize exposure of people in the building. The O&M plan identified the following ACMs at the site:

- 1) Fireproofing applied to structural steel, including overspray
 - 2) Drywall joint compound
 - 3) Insulation on an abandoned water line
 - 4) Elbow/joint insulation on four fire-suppression water pipes
 - 5) White, soft, rubbery insulation tape
 - 6) Asbestos-insulated fire doors
 - 7) Composition roofing
 - 8) Vinyl floor tile or cove base and/or associated mastic
 - 9) Heavy acoustic texture on the concrete deck above the former department store restaurant kitchen
 - 10) Acoustic ceiling texture in hotel gift shop
 - 11) 2 x4 suspended ceiling panels in storage areas
 - 12) Miscellaneous sheet vinyl flooring
- *Phase I Environmental Site Assessment Report, MCI Center, 700 South Flower Street, Los Angeles, California, 90017, dated April 11, 2005, prepared by EBI Consulting (EBI), on behalf of Wells Fargo Bank. According to this report, the Subject was single family residences, hotels, boarding schools, stores, restaurants and parking lots prior to construction of the existing improvements.*

This report did not identify any recognized environmental conditions in connection with the Subject, except for the following:

- 1) EBI noted several ASTS at the Subject, specifically two 8,800-gallon diesel ASTs located in the sub-basement of the building. Diesel fuel is supplied to these tanks and then automatically distributed through internal lines to remote day tanks connected to various emergency generators and the fire pumps. EBI noted that a Veeder Root leak detection system is in-place, and that all ASTs appeared to be properly labeled and in good condition. No staining or evidence of leakage was observed. No further action was recommended.
 - 2) EBI also noted ACM in the form of fireproofing, drywall joint compound, vinyl floor tile and other products. The identified ACM was in good condition, and was managed under an O&M plan. EBI recommended additional sampling and removal should building construction or renovation activities occur.
 - 3) EBI also noted PCB-containing fluorescent lighting ballasts at the Subject, which appear to have been appropriately removed by a licensed contractor. No further action was recommended, other than the continued appropriate disposal of the lighting ballasts.
 - 4) EBI noted several historical tenants of potential environmental concern, including Sun-Sun Laundry, B’Nai B’Rith Messenger Newspaper, Allied Artists & Photographers and Ralph Sanford garage. EBI was not able to determine whether Sun-Sun Laundry conducted dry cleaning on-site or whether any hazardous materials usage actually occurred at the Subject. EBI noted, however, that the entire footprint of the Subject was excavated for two subterranean levels during construction, and that these historical uses were no longer of specific concern. No further action was recommended.
 - 5) EBI also noted that a car wash operates in the underground parking garage below Macy’s which uses a clarifier. The clarifier is reportedly pumped out on a regular basis, and no further action was recommended.
- *Phase I Environmental Site Assessment, 700 S. Flower Street, 700 South Flower Street, Los Angeles, California, 90017, dated December 2, 2005, prepared by IVI Due Diligence Services, Inc. (IVI), on behalf of GE Capital Corporation. This Phase I did not include the adjoining hotel. According to this report, the Subject was single family residences, hotels, boarding schools, stores, restaurants and parking lots prior to construction of the existing improvements.*

This report did not identify any recognized environmental conditions in connection with the Subject, but did note the presence of ACM, as reported above. This report recommended the continued use of the existing O&M plan.

- *Phase I Environmental Site Assessment of Sheraton Downtown Los Angeles, 711 South Hope Street, Los Angeles, Los Angeles County California 90017*, dated November 2, 2006, prepared by Property Solutions Inc. (PSI), on behalf of UBS Real Estate Investments, Inc. This report did not cover the adjoining office building or shopping mall. According to this report, the Subject was occupied by a YMCA, a parking lot, and various retail spaces prior to construction of the existing improvements. The report noted that renovations including some asbestos abatement occurred in 1989.

This report did not identify any recognized environmental conditions in connection with the Subject.

5.7 City Directories

A Historical City Directory Abstract obtained from EDR was reviewed. This Abstract provides site occupant listings by address. Historical site addresses include 700-754 South Flower Street, 701-757 South Hope Street, 700-762 West 7th Street, and 701-733 West 8th Street. However, EDR did not provide a summary of addresses on South Hope Street or West 8th Street. Previous site occupants were primarily residential and commercial in nature, and included the following significant listings:

1924 – C&S Lubricating Service, 742 South Flower Street
1929 – Harold Schimke, gas station, 708 South Flower Street
1951 – Allied Typographers & Photographers, 718 South Flower Street

Of note, no evidence of the presence of a gasoline station at 708 South Flower Street was found. The 1920 Sanborn maps depicted that address as containing a residential flat, and the 1950 Sanborn map, the next available, depicts a small store at that location. It is possible that the listing was indicative of Mr. Schimke's occupation, rather than what was actually present on the site. Notwithstanding, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil from any previous uses would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

No significant listings, other than Plaza Cleaner and Kodak Imaging, two current tenants discussed elsewhere in this report, were identified after the current complex was constructed in 1973.

5.8 Interviews

According to Jeff Jorgensen, the Chief Building Engineer, who has been involved with the property for the past 12 years, the Subject was constructed in 1973. He had no other knowledge of the history of the property.

5.9 Municipal Records**Tax Assessor Records**

According to the tax assessor records reviewed, the Subject buildings were constructed in 1973.

5.10 Internet Search

IVI conducted a cursory internet search for the Subject's name and address using the Google search engine on December 14, 2012. No environmentally related information was identified on the first page of the Google search engine.

A copy of regulatory database information contained within a Computerized Environmental Report (CER) provided by Environmental Data Resources, Inc. (EDR) appears in Appendix D. The CER is a listing of sites identified on select federal and state standard source environmental databases within the approximate minimum search distance specified by ASTM Standard Practice for Environmental Site Assessments E 1527-05. IVI reviewed each environmental database to determine if certain sites identified in the CER are suspected to represent a material negative environmental impact to the Subject. The following table lists the number of sites by regulatory database within the prescribed minimum search distance appearing in the CER.

Databases Reviewed	Approximate Minimum Search Distance (AMSD)	Number of Sites Within AMSD
Federal National Priorities List (NPL) Site List	One-Mile	0
Federal Delisted NPL Site List	One-Half Mile	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)	One-Half Mile	2
Federal CERCLIS No Further Remedial Action Planned (NFRAP) Sites	One-Half Mile	0
Federal Resource Conservation and Recovery Information System (RCRIS) Treatment, Storage, and Disposal (TSD) List	One-Half Mile	0
Federal RCRIS Generators List	On-Site and Adjoining Properties	3
Federal Corrective Action Tracking System (CORRACTS)	One-Mile	0
Federal Emergency Response Notification System (ERNS) List	On-Site	0
Federal Institutional/Engineering Control Registries	On-Site	0
Facility Index Systems (FINDS)	On-Site	2
California and Tribal Lists of NPL Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	One-Mile	0
California and Tribal Lists of CERCLIS Equivalent Hazardous Waste Sites Identified for Investigation and/or Remediation	One-Half Mile	8
California and Tribal Landfills or Solid Waste Facilities List	One-Half Mile	0
California and Tribal Registered Underground Storage Tank (RUST) Facility List	On-Site and Adjoining Properties	2
California and Tribal Leaking UST/Spill List	One-Half Mile	27
California and Tribal Institutional/Engineering Control	On-Site	0

Databases Reviewed	Approximate Minimum Search Distance (AMSD)	Number of Sites Within AMSD
Registries		
California and Tribal Voluntary Cleanup Sites	One-Half Mile	0
California and Tribal Brownfields Sites	One-Half Mile	0
California Haznet	On-Site	6
California Emissions Inventory (EMI)	On-Site	2

The CER identified 20 "Orphan Sites". "Orphan Sites" are those sites that could not be mapped or "geocoded" due to inadequate address information. Refer to the CER for a list of these "Orphan Sites". IVI attempted to locate these sites via a review of street maps, vehicular reconnaissance and/or interviews with people familiar with the area. "Orphan Sites" that were identified in this manner were analyzed in their respective regulatory database below.

A description of the databases reviewed by IVI and an analysis of sites identified within the prescribed search area are presented below.

6.1 Federal Databases

NPL

The NPL database is a listing of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or "Superfund"). A site must be on the NPL to receive money from the Trust Fund for Remedial Action.

Analysis/Comment: The CER did not identify NPL sites within the AMSD.

Delisted NPL Site List

The EPA may delete a final NPL site if it determines that no further response is required to protect human health or the environment. Under Section 300.425(e) of the National Contingency Plan (55 FR 8845, March 8, 1990). Sites that have been deleted from the NPL remain eligible for further Superfund-financed remedial action in the unlikely event that conditions in the future warrant such action. Partial deletions can also be conducted at NPL sites.

Analysis/Comment: The CER did not identify Delisted NPL sites within the AMSD.

CERCLIS

CERCLIS is the USEPA's system for tracking potential hazardous-waste sites within the Superfund program. A site's presence on CERCLIS does not imply a level of federal activity or progress at a site, nor does it indicate that hazardous conditions necessarily exist at the location. Within one year of being entered into CERCLIS, the USEPA performs a preliminary assessment of a site. Based upon the results of the preliminary assessment, the USEPA may conduct additional investigation, which could lead to a site being listed on the NPL.

Analysis/Comment: The CER identified the following CERCLA sites within the AMSD:

Property Name/ Address	Distance (Miles)	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Kirk-Rich Dials 404 West 7 th Street, Suite 1215	0.23	Southeast	Crossgradient	Stabilized. removal; no site assessment work required
Democratic National Convention 1111 S. Figueroa Street	0.44 (corrected)	Southwest	Downgradient	Removal only; no site assessment work required

These sites are located a sufficient distance from the Subject so as not to be reasonably suspect of having impacted same. In addition, these sites are located hydrogeologically crossgradient/downgradient from the Subject and groundwater flow across these sites is not suspected to be in the direction of the Subject. As such, IVI does not suspect these sites of having had a significant negative environmental impact on the Subject.

CERCLIS No Further Remedial Action Planned (NFRAP) Sites

As of February 1995, CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from the CERCLIS list. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to warrant Federal Superfund Action or NPL consideration.

Analysis/Comment: The CER did not identify CERCLA NFRAP sites within the AMSD.

RCRIS TSD

The RCRIS TSD contains information pertaining to those facilities that treat, store, or dispose of hazardous waste. While these facilities represent some form of hazardous waste activity, they are most significant if determined to be out of compliance or to have violations.

Analysis/Comment: The CER did not identify RCRIS TSD facilities within the AMSD.

RCRIS Generators

IVI reviewed the list of sites, which have filed notification with the USEPA in accordance with RCRA requirements. These sites include generators of hazardous waste regulated under RCRA. Under RCRA, hazardous waste generators are classified by the quantity of hazardous waste generated in a calendar month into the following categories: Large Quantity Generator (LQG), greater than 1,000 kilograms (kg); Small Quantity Generator (SQG), 100 to 1,000 kg; and Conditionally-Exempt Small Quantity Generator (CESQG), less than 100 kg. RCRA Generators, while they represent some form of hazardous waste activity, are most significant if they are determined to have Class I Violations or to be non-compliant.

Analysis/Comment: The CER identified the following RCRA Generators located within the AMSD:

Property Name/ Address	Distance	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Broadway Plaza/700 S. Flower Street	On-Site	NA	NA	Compliant/No Violations
Broadway Plaza Photo/750 W. 7 th Street	On-Site	NA	NA	Compliant/No Violations

The Subject was identified on the RCRIS database twice due to the on-site photo developing and the generation of lighting ballasts and waste oils from the building mechanicals. No violations or compliance infractions were identified with respect to these two listings. The generation and removal of hazardous waste from the Subject is further discussed in Section 7.3.

Property Name/ Address	Distance	Direction	Presumed Hydrogeologic Relationship	Regulatory Status
Bullock's/800 S. Hope Street	Adjacent	S	Downgradient	Compliant/No Violations

No violations or compliance infractions were identified in connection with the above-referenced RCRA site. In addition, this site is located hydrogeologically

downgradient from the Subject and groundwater flow across this site is suspected to be away from the Subject. As such, IVI does not suspect this site of having had a significant negative environmental impact on the Subject.

Corrective Action Tracking System (CORRACTS)

CORRACTS is a list of facilities that are found to have had hazardous waste releases and require RCRA corrective action activity, which can range from site investigations to remediation.

Analysis/Comment: The CER did not identify CORRACTS sites within the AMSD.

ERNS

The ERNS is a database of notifications of oil discharges and hazardous substance releases made to the Federal government. These notifications are used by “On-Scene Coordinators” to determine an emergency response and release prevention. When a call is made to the National Response Center or one of the 10 USEPA Regions, a report is created containing all of the release information that the caller provided. This report is transferred to an appropriate agency to evaluate the need for a response and the records are electronically transferred to the ERNS database. As such, if a reported release of oil or a hazardous substance is deemed to require a response, it should also be listed in the appropriate federal or state environmental database such as CERCLIS, state equivalent CERCLIS, or state leaking underground storage tank or spills lists.

Analysis/Comment: The CER did not identify the Subject on the ERNS database.

Federal Institutional Control/Engineering Control Registries

These Federal registries contain listings of those sites which have either engineering and/or institutional controls in place. Engineering controls include various physical control devices such as fences, caps, building slabs, paved areas, liners and treatment methods to eliminate pathways for regulated substances to enter the environment or affect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions (Activity and Use Limitations) are generally required as part of institutional controls.

Analysis/Comment: The CER did not identify the Subject on the Federal Institutional or Engineering Control registries.

FINDS

FINDS contains both facility information and “pointers” to other environment database sources that contain additional detail. These other databases include: RCRIS, PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]), CERCLIS, DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), FRDS (Federal Reporting Data System), SIA (Surface Impoundments), CICIS (TSCA Chemicals in Commerce Information System), PADS, RCRA-J (medical waste transporters/disposers), TRIS and TSCA.

Analysis/Comment: The CER identified the Subject on the FINDS database under the name of Broadway Plaza and Broadway Plaza Photo. The listings are related to the Subject’s designation as a RCRA hazardous waste generator.

Nevertheless, these listings were not cross-referenced on any regulatory databases that report releases or contamination conditions, such as the SHWS, LUST or SLIC databases. Based on the above information, these listings are not suspected to be of a significant environmental concern to the Subject.

6.2 California Environmental Protection Agency (Cal/EPA) Databases

Response and Tribal NPL Equivalent Hazardous Waste Sites (HWS)

The Response database is a list of confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Analysis/Comment: The CER did not identify sites within the AMSD.

Envirostor, HIST Cal-Sites, and Tribal CERCLIS Equivalent Hazardous Waste Sites (HWS)

The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used

to assess potential impacts to public health and the environment at contaminated sites.

The HIST Cal-Sites database is a list of facilities subject to investigation concerning likely or threatened releases of hazardous substances. These sites are either being actively remediated, or are currently under evaluation for further action, if necessary. This database has been replaced by Envirostor and is no longer being updated.

Tribal CERCLIS Equivalent HWS list is an inventory of toxic sites listed by Tribal Environmental and Health Authorities. These sites are either under remediation, or are currently under evaluation for further action, if necessary.

Analysis/Comment: The CER identified eight California and/or Tribal CERCLIS Equivalent Hazardous Waste sites within the AMSD (<0.5 mile). All of the identified sites are located a sufficient distance (>0.20 mile), and are in a crossgradient/downgradient location from the Subject so as not to be reasonably suspected of having impacted same.

California and/or Tribal Solid Waste Facilities (SWF) List

The SWF list is an inventory of active, closed and inactive landfills and other sites that manage solid wastes.

Analysis/Comment: The CER did not identify SWF sites within the AMSD.

California and/or Tribal Registered Underground Storage Tanks (UST), HIST USTs and SWEEPS UST Facility Lists

The UST facility list is an inventory of registered liquid bulk storage tanks. The HIST UST database, aka the Hazardous Substance Storage Container Database, is a historical listing of UST sites. The SWEEPS UST database, aka the Statewide Environmental Evaluation and Planning System, is a list of USTs that was updated and maintained by a company contacted by the State Regional Water Quality Control Board in the early 1980’s. This listing is no longer updated or maintained but has historical significance.

Inclusion of a site on these lists does not necessarily constitute environmental contamination, but instead merely indicates the presence of registered bulk storage tanks.

Analysis/Comment: The CER identified the following Registered Storage Tank sites within the AMSD:

Property Name/	Distance	Direction	Presumed Hydrogeologic	Regulatory
----------------	----------	-----------	------------------------	------------

Address			Relationship	Status
Hammerson Properties/655 S. Hope Street	Adjacent	NE	Upgradient	Active
Bullock's/800 S. Hope Street	Adjacent	S	Downgradient	Active

The registered storage tank sites listed above have an Active regulatory status. However, these sites are not listed on other environmental databases indicative of contamination such as the leaking underground storage tank list or the inventory of State Hazardous Waste Sites. Since the registered storage tank list is only an inventory of storage tanks, and does not necessarily indicate subsurface contamination, in the absence of additional information, it is not suspected that these registered storage tank sites have had a negative environmental impact on the Subject.

California and Tribal Leaking Underground Storage Tanks (LUST) List and Spills, Leaks, Investigations and Cleanups (SLIC) Records

The LUST list is an inventory of reported spills and leaks, both active and inactive maintained by the various California Regional Water Quality Control Boards. It includes stationary and non-stationary source spills reported to state and federal agencies, including remediated and contaminated leaking UST sites. SLIC records, which are maintained by the various Regional Water Quality Control Boards, document unauthorized discharges from spills and leaks from sources other than UST and other regulated sites.

Analysis/Comment: The CER identified 27 LUST/SLIC sites within the AMSD, 19 of which have been granted a Case Closed status. A Case Closed status is granted to those sites that do not exhibit levels of contamination requiring clean-up, have been remediated to the satisfaction of the lead regulatory agency, or are not suspected to represent a significant threat to human health or the environment. As such, absent additional information to the contrary, it is unlikely that contamination originating at sites with a Case Closed status have had a significant negative environmental impact on the Subject.

All of the remaining open sites are located a sufficient distance (>0.25 mile), and are in a crossgradient/downgradient location from the Subject so as not to be reasonably suspected of having impacted same.

California Deed Restriction Listing and Tribal Institutional Control/Engineering Control Registries

The DTSC SMBRP list includes sites remediated under the program's oversight that have active deed restrictions. The DTSC Hazardous Waste Management Program Facility Sites (HWMP) list includes current and former hazardous waste facilities with deed/Land Use Restrictions that have been recorded with the County. The type of land use restrictions includes deed notices, deed restrictions, or a land use restriction that binds current and future owners.

The Tribal Institutional Control/Engineering Control Registries contain listings of those sites which have either engineering and/or institutional controls in place. Engineering controls include various physical control devices such as fences, caps, building slabs, paved areas, liners and treatment methods to eliminate pathways for regulated substances to enter the environment or effect human health. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions (Activity and Use Limitations) are generally required as part of institutional controls.

Analysis/Comment: The CER did not identify the Subject on the SMBRP, HWMP or Tribal Institutional or Engineering Control registries.

California and Tribal Voluntary Cleanup Program (VCP) Sites

The California VCP properties list includes "low" threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that the DTSC oversee the investigation and cleanup.

Analysis/Comment: The CER did not identify VCP sites within the AMSD

California and Tribal Brownfield Sites

A Brownfield site was defined in the 2002 Small Business Liability Relief and Brownfields Revitalization Act (Brownfields Law) as "real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant". In connection with the passage of the Brownfields Law, the Environmental Protection Agency grants awards to states and tribes for activities under Section 128 (a).

Analysis/Comment: The CER did not identify Brownfield sites within the AMSD.

California HAZNET

The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Analysis/Comment: The Subject has two active EPA ID numbers for the removal of hazardous waste, CAL000334972 under the name of 700 South Flower LLC, and CAL000195592, under the name of Macy's West. In addition, several other EPA ID numbers have been associated with the Subject addresses, which are currently inactive. Wastes removal under these EPA ID numbers include asbestos-containing waste, waste oil, paint sludge, organic solids, and hydrocarbon solvents.

This database provides information on quantities and types of wastes generated and not on spills or cleanups. The Subject was not identified on any regulatory databases that report releases or contamination conditions, such as the SHWS, LUST or SLIC databases. Based on the above information, these listings are not suspected to be of a significant environmental concern to the Subject.

Emissions Inventory Data (EMI)

Database of toxics and criteria pollutant emissions data collected by the California Air Resources Board. This database provides information on facilities with air emissions permits and not on spills or cleanups. Therefore, inclusion on this database does not represent an adverse impact on the subject property.

Analysis/Comment: The Subject was identified on the EMI database, under the names of Broadway Plaza and Hope & Flower BP Partnership. It is likely that these listings are related to the use of diesel-powered generators, diesel-powered fire pumps, natural gas-powered boilers, and natural gas-powered charbroilers at the Subject. No violations were listed, and none were found on the South Coast Air Quality Management District website. Based on this information, these listings are not suspected to be of a significant environmental concern to the Subject.

6.3 EDR Proprietary Databases**EDR Historic Auto Stations**

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories

of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

Analysis/Comment: The CER identified the Subject on the historical auto stations database. Specifically, C S Lubricating Service listed at 742 S. Flower Street in 1924. No other evidence of the presence of on-site auto stations was found. A 1920 Sanborn map was reviewed but did not indicate individual occupants, but that area appeared to be occupied by houses. A 1950 Sanborn map was also reviewed which showed that area to be a parking lot at that time.

In addition, one adjacent site was listed, the Auto Center Garage at 746 S. Hope Street, located adjacent to the east. No reported releases were found for this site.

Although the exact nature of these listed sites cannot be confirmed, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

EDR Historic Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

Analysis/Comment: The CER identified the Subject on the historical cleaners database. Specifically, J Tanaka listed at 709 W. 8th Street in 1924, Steve Pappas listed at 721 W. 8th Street in 1928-1937, and James Robertson listed at 715 S. Hope Street in 1937. No other evidence of the presence of on-site dry cleaners was found. A 1920 Sanborn map was reviewed but did not indicate individual occupants. A 1950 Sanborn map was also reviewed which showed that 709 and 721 W. 8th Street were identified as stores and 715 S. Hope Street was part of the YMCA at that time.

In addition, one adjacent site was listed, Rudder O'Brien at 744 S. Hope Street, located adjacent to the east. The 1950 Sanborn map shows this located to be a parking garage at that time.

Although the exact nature of these listed sites cannot be confirmed, it should be noted that the entire footprint of the Subject was excavated for the construction of two subterranean levels. It is likely that any potential residual impacts to the soil would have been removed at that time. As such, these listings are not considered to be a significant environmental concern to the Subject.

In addition, Broadway Plaza Cleaners, a current tenant, appears in this database for a listing from 1994. As noted elsewhere within this report, Broadway Plaza Cleaners is a drop-off facility only. No actual dry cleaning occurs on the Subject. According to Jeff Jorgensen, as well as the previous Phase I ESAs reviewed, no dry cleaning has ever occupied at this location. As such, this listing is not considered to be a significant environmental concern to the Subject.

EDR Manufactured Gas Plants

This database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to the 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of wastes. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Analysis/Comment: The CER did not identify the Subject or any adjacent properties on the manufactured gas plant database.

7.1 Chemical Storage and Usage

IVI noted two, 75-gallon plastic containers and one, 100-gallon plastic container of cooling tower chemicals. The containers are stored within a secondary containment berm and are located in a labeled chemical storage room in the basement. In addition, chemicals customarily used for routine building maintenance, including six, 5-gallon containers of oil for the compressors, as well as paints, were noted on-site. For the most part, the maintenance chemicals are stored in various locations in the basement within flammable cabinets. Of note, floor drains were not observed in the vicinity of the chemical storage areas. In addition, housekeeping was generally considered satisfactory. The chemicals, which are stored in their original containers, do not appear to represent an impact to the environmental quality of the site provided that they are used as intended, properly handled, and the regulations pertaining to their usage are followed.

7.2 Bulk Storage Tanks**Underground Storage Tanks (USTs)**

No USTs were identified on the subject property and no common indicators of USTs such as vent pipes, fill ports, manways, pavement cuts, fuel gauges or dispensers were observed. In addition, according to Jeff Jorgensen, there are no USTs on-site. Furthermore, the Subject was not identified on the California list of registered UST facilities.

No underground storage tanks were reportedly removed, closed-in-place or abandoned at the site and no common indicators of closed tanks were observed.

Aboveground Storage Tanks (ASTs)

ASTs per the following schedule were observed:

Tank No.	Location	Capacity (Gallons)	Product	Visible Condition	Secondary Containment
1	Basement	8,800	Diesel	Satisfactory	Yes
2	Basement	8,800	Diesel	Satisfactory	Yes
3	Loading Dock	1,500	Diesel	Satisfactory	Yes
4	Generator room/basement	60	Diesel	Satisfactory	Yes
5	Generator room/basement	60	Diesel	Satisfactory	Yes
6	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
7	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
8	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes
9	Fire Pump Room/basement	40	Diesel	Satisfactory	Yes

There are two large diesel tanks, a transfer tank, and several day tanks that supply diesel fuel to the two emergency generators and fire pumps. The tanks are provided with secondary containment, appeared to be in good condition, void of leaks. The secondary containment structures appear to be in good condition and void of breaches. All the tanks are correctly permitted under the Los Angeles Fire Department.

Of note, one of the tenants, AT&T, has an emergency generator on the 3rd floor, for which it is responsible. That generator is equipped with a 60-gallon diesel day tank which is fed from one of the 8,800-gallon diesel supply tanks.

7.3 Site Waste and Wastewater

Solid Waste

Non-hazardous solid waste is disposed of in dumpsters and is removed from the Subject on a regular basis by Key Disposal. Potential sources of contamination, such as waste oil or automobile batteries, were not observed in the vicinity of the dumpsters.

Sanitary Sewage

Sanitary sewage disposal is provided by the City of Los Angeles Bureau of Sanitation. IVI did not observe any sources of wastewater or liquid discharge into the sewer other than sanitary sewage.

Hazardous Waste

Hazardous waste streams per the following schedule are generated on the subject site:

Generator	Location	Generated Waste	Quantity (Gallons)	Storage Conditions	Disposal Entity
Kodak Image Center Solutions	Tenant space	Silver-containing filter canisters	1 canister	Satisfactory	ERSI
Jamison Services	Pump Room/Basement	Waste Pump Oil	55	Satisfactory	Not reported

The Subject has two active EPA ID numbers for the removal of hazardous waste, CAL000334972 under the name of 700 South Flower LLC, and CAL000195592, under the name of Macy's West. Waste pump oils are stored in a 55-gallon drum in the basement sump room. Silver-containing filters are generated and stored in the Kodak Image Center Solutions tenant space. Of note, floor drains were not observed in the vicinity of the chemical storage areas. Hazardous waste manifests maintained

on-site appeared to be in order. Housekeeping was observed to be satisfactory. For the most part, the hazardous waste containers were undamaged and capped and the immediate storage areas did not exhibit obvious evidence of significant spills or leakage. Moreover, the hazardous waste containers are stored on spill containment structures. In any event, the hazardous wastes do not appear to represent an impact to the environmental quality of the site, provided that the existing storage conditions are representative of past and future hazardous waste storage conditions.

Of note, several other EPA ID numbers have been associated with the Subject addresses, which are currently inactive. Wastes removed under these EPA ID numbers included asbestos-containing waste, waste oil, paint sludge, organic solids, and hydrocarbon solvents.

7.4 Stained Soil, Stained Pavement, or Stressed Vegetation

There was no evidence of significant soil staining, stained pavement, or stressed vegetation observed on-site.

7.5 Liquid Discharges

No visible evidence of liquid discharges, suspected to represent an environmental concern were observed during our survey.

7.6 Pools of Liquid

IVI did not observe significant standing surface water or pools containing liquids likely to be hazardous substances or petroleum products.

7.7 Pits, Ponds, or Lagoons

false

No pits, ponds or lagoons suspected of containing hazardous substances or petroleum products were identified on-site.

7.8 Wells

IVI did not identify on-site dry wells, irrigation wells, injection wells, observation wells, monitoring wells, potable water wells, recovery wells or abandoned wells.

7.9 On-Site Fill

Based on our observations, other than typical engineered fill used in foundation construction, it does not appear that a significant amount of fill has been imported onto the Subject.

7.10 Drums and Containers for Storing Waste

IVI observed a 55-gallon drum containing waste pump oil located on a spill containment pad in the basement. That drum is only partially filled, according to Jeff Jorgensen, the Chief Engineer. In addition, three, 55-gallon drums labeled for waste sorbents generated on-site are also kept on the spill containment pad. Those drums were reported empty, according to Mr. Jorgensen. The drums, which are labeled, are stored on a spill containment structure, and were observed to be in generally in good condition.

7.11 Floor Drains and Sumps

IVI did not identify any floor drains or sumps that were stained, emitting foul odors, or connected to an on-site sewage disposal system, or located adjacent to chemical storage areas. Two sets of sump pumps for storm water and sanitary sewage are present in the basement of the complex. The on-site car wash utilizes a 750-gallon clarifier which is pumped out every six months. In addition, several above-ground grease traps are present throughout the Subject and are used by the on-site restaurants. These grease traps are also pumped out every six months. The presence of this equipment is not suspected to be of a significant environmental concern to the Subject.

7.12 Odors

IVI did not identify strong, pungent, or noxious odors suspected to represent an environmental concern.

7.13 Air Emissions

The on-site boilers, emergency generators and fire pumps, generate air emissions which are permitted through the South Coast Air Quality Management District. There are no environmental concerns regarding these emissions.

7.14 Polychlorinated Biphenyls (PCBs)**Transformers**

Utility-owned electrical transformers are maintained within an inaccessible vault, which was not observed by IVI. Based on the age of the improvements, the transformers may contain PCBs. In accordance with *Title 40—Protection of*

Environment, Chapter 1—Environmental Protection Agency, Subchapter R—Toxic Substance Control Act (TSCA), Part 761—Polychlorinated Biphenyls (PCBs), Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions, the owner of the transformers, the Los Angeles Department of Water and Power, is responsible for the transformers' maintenance and remediation in the event of a leak.

Elevators

IVI identified three hydraulic elevators at the Subject. Since the elevators were installed prior to the 1979 ban on the manufacturing of PCB-containing hydraulic fluid, IVI was of the opinion that, although unlikely, the elevator hydraulic fluid may potentially contain PCBs. No significant staining or pools of hydraulic fluid were observed in the elevator machine room.

Lighting Ballasts

Waste fluorescent lighting ballasts which may potentially contain PCBs, were previously noted at the Subject. According to Jeff Jorgensen, the Chief Engineer, all previously suspected PCB-containing light ballasts have been changed out.

Trash Compactor

IVI observed four hydraulic solid waste compactors near the loading docks. According to Mr. Jorgensen, the compactors were brought to the Subject at various times from 2001 to 2005 by Key Disposal. Based on the age of the compactors, the hydraulic components are not suspected to contain PCBs. In any event, the compactor was observed to be in good condition, with no evidence of releases.

7.15 Asbestos-Containing Material (ACM)

IVI reviewed an asbestos document entitled *Asbestos Operations and Maintenance Program Manual, The Complex Containing The MCI Center Office Tower, The Hyatt Hotel, The Macy's Plaza Department Store and Shopping Center, and a Parking Garage in the Block Bounded by 7th, 8th, Flower and Hope in Los Angeles, California*, dated April 23, 2003, prepared by Masek Consulting Services, Inc., on behalf of Cushman & Wakefield. This document contains bulk sampling data, air sampling data, and abatement documentation for the Subject. According to this report, work on the document began in 1999 with the collection of 328 bulk samples of the building materials. Based on the sampling and abatements conducted as of the writing of this document, the following ACMs were identified as remaining on-site:

1. Fireproofing applied to structural steel, including overspray. Substantial portions of the original asbestos containing fireproofing have been removed and replaced with non- asbestos materials. The major remaining areas of fireproofing include:

- Most of the columns in the hotel, except the free-standing corner columns in the corner rooms;
 - Beams in the hotel where the detailed cleaning of the old fireproofing by the abatement crew was inadequate. Such residue would only be an issue if there is a need to cut a hole in, or weld onto, the beams;
 - The portions of the beams in the hotel above the walls, in phone closets, and in chases, plus overspray;
 - Small strips of fireproofing formerly above walls (Photo 102), strips of fireproofing on beams in the corridor with ducts close to or touching the beam, and some scattered areas above bathrooms and at intersections between bathrooms and bedrooms in the hotel;
 - The 24th floor of the hotel, mostly encapsulated;
 - The hotel office area on the 2' floor;
 - Most core areas in the office tower and hotel (elevators shafts, chases, stairs, and mechanical rooms), including strips above core walls;
 - The perimeter beams (inaccessible without removal of the glass);
 - Suite 1406 in the office tower;
 - Most of the mezzanine floor in the office tower (Photos 1 and 2);
 - The half of the 2 floor in the office tower towards 7th Street;
 - Columns in the office tower on the 4th floor, many on the 5th floor, on the floor 11th, most on the 12th floor, many on the 14th floor, three columns on the 15th floor, on the 21 floor of the office tower, half of the columns on the 23 floor, half of the columns on the 29th floor, and columns in Suites 3210 and 3212; and
 - Scattered small strips and patches of fireproofing in the office tower at former wall and suite entrance locations.
2. Drywall joint compound. The major areas present are:
- The walls throughout the hotel (the ceilings were removed and replaced);
 - The base building walls and ceilings in the office tower (the core, mechanical, storage, basement, and most of the upper and lower perimeter walls);
 - The base building walls and ceilings of the retail area; and
 - Some tenant improvement walls.
3. Various other asbestos containing materials present include:
- Insulation on an abandoned water line formerly used by the fire department to refill the tank from the street, running up through A level, and through Garden Level to the street connection between column lines H, M, 1, and 3;
 - Elbow/joint insulation on four fire-suppression water pipes which run from the street to Garden Level, down through A Level, and to the basement between column lines J, K, 1 and 3;

- White soft rubbery insulation tape used throughout the complex on some pipe joints, valves, and on some fittings under sinks, as in the 6th floor men's room of the office tower, and painted in some areas;
- Asbestos insulated fire doors: Some were identified, and more may be present. All insulated doors throughout should be assumed to contain asbestos;
- The composition roofing under the red rocks and tar above portions of the second 2 floor;
- Some vinyl floor tile or cove base and/or the mastic adhering it in scattered locations, such as the hotel basement corridor areas, some basement storage areas, and a variety of various other rooms. Almost all of the total floor area of the complex is covered with non-asbestos materials;
- Heavy acoustic texture on the concrete deck above the former department store restaurant kitchen, and debris on the top of the suspended finish ceiling structure below;
- Acoustic ceiling texture in the hotel gift shop;
- The 2x4 suspended ceiling panels in storage areas R26 and R9 (except for rooms R9E, and R9CIB); and
- Miscellaneous materials, such as sheet vinyl flooring on shelves in the former department store restaurant.

According to a letter from Masek Consulting Services, Inc., to Cushman & Wakefield, dated June 4, 2003, they estimate that approximately 50% of the asbestos originally installed in the Macy's and Macy's Plaza is still present (primarily walls and ceilings with asbestos joint compound, acoustic material above the Macy's kitchen, and fireproofing in various areas); and, approximately 20% of the asbestos originally installed in the MCI Center office tower is still present (primarily drywall on core & perimeter walls with asbestos joint compound, fireproofing on the outside of the perimeter beams, and fireproofing in core areas).

The materials listed above that were observed during our inspection were in good condition. The O&M program appears adequate and in use.

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

7.16 Lead-in-Drinking Water

Based on our conversations with utility personnel, the water at the Subject is not expected to contain elevated levels of lead.

7.17 Radon

Based on statistical information maintained within the U.S. Department of the Interior and U.S. Geological Survey's *Geologic Radon Potential*, dated 1993, radon concentrations in Los Angeles County average 0.7 picocuries per liter (pCi/L), which is below the 4.0 pCi/L action level established by the USEPA. Based solely on this data, it is unlikely that radon represents an environmental concern at this time.

7.18 Lead-Based Paint (LBP)

Since the Subject was constructed prior to the Consumer Product Safety Commission's 1978 ban on the sale of LBP to consumers and the use of LBP in residences, there is a potential that LBP may have been applied at the Subject.

Limited LBP sampling took place in 2005. It was noted that the majority of the painted surfaces observed during this limited survey were constructed after the 1978 LBP ban during tenant renovations and changeovers. As such, the focus was on areas where renovations were not reported to have been conducted. The results of this limited testing is summarized below:

Location	Surface Checked	Paint Condition	Test Result % by weight
Freight elevator molding, basement	Gray paint on metal	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair-Some Peeling	0.005
Loading dock support column	Yellow paint on concrete	Fair-Some Peeling	BDL
Upper level parking garage stairway railing	Gray paint on metal	Fair-Some Peeling	0.0108
Pump room light switch	White paint on metal	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair-Some Peeling	BDL
Basement hallway wall	Off white paint on concrete surface	Fair	BDL
Basement hallway wall	Off white paint on concrete surface	Fair	0.0108
Basement hallway wall	Off white paint on concrete surface	Fair	BDL

BDL = Below Detectable Limits

The U.S. Department of Housing and Urban Development (HUD) defines LBP as paint containing 0.5 % by weight or more of lead. Based on the above results, LBP was not detected on surfaces sampled. Notwithstanding, painted surfaces were generally in good condition indicating only minor peeling and no evidence of pervasive peeling or flaking.

Of note, the Bally's Total Fitness tenant space has a small child care area. According to Mr. Jorgensen this area was built-out in 2003. As such, the surfaces in this area is not suspected to be covered with LBP.

In December 2012, an extensive lead-based paint survey was conducted at the Subject. Over 3,500 samples were analyzed using XRF throughout the Subject, however only 160 samples were found to contain measureable quantities of lead. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified lead-based paint is being prepared.

7.19 Mold

Although mold is ubiquitous and may occur in a very short time span, an effort was made to identify conspicuous mold growth in the common areas surveyed. Moreover, our Pre-survey Questionnaire requested information pertaining to known mold growth or tenant complaints regarding same.

Based on the above efforts, conspicuous mold growth was not identified at the time of our survey.

8.1 Questionnaires

IVI sent a Pre-Survey Questionnaire and an AAI User Questionnaire to the site contact and the User, respectively. The purpose of these questionnaires was to disclose any previous or existing hazardous waste or toxic material conditions, which may not have been apparent at the time of our site reconnaissance and to satisfy the User interview all appropriate inquiry requirements.

The completed Pre-Survey Questionnaire is attached hereto as Appendix B. The questionnaire did not identify any recognized environmental conditions in connection with the Subject. However, the PSQ noted the storage of paint, solvents, and petroleum (diesel) at the Subject, but only for building maintenance purposes. The PSQ also noted that a spill of cooling tower chemicals had occurred in the chemical storage room on an unreported date. The spill was completely contained within the storage containment wall, and was subsequently cleaned up by Safety Kleen.

8.2 User**8.2.1 Title Records**

A copy of the Subject's Chain-of-Title has not been provided to IVI for review.

8.2.2 Environmental Clean Up Liens and Activity and Use Limitations (AULs)

The User has not returned the AAI User Questionnaire.

8.2.3 Specialized Knowledge

The User has not returned the AAI User Questionnaire.

8.2.4 Relationship of Purchase Price to Fair Market Value Due to Contamination in Connection with the Subject

The User has not returned the AAI User Questionnaire.

8.2.5 Common Knowledge or Reasonably Ascertainable Information

The User has not returned the AAI User Questionnaire.

8.2.6 Purpose for Conducting the Phase I Environmental Site Assessment

The User has not returned the AAI User Questionnaire.

8.2.7 Proceedings Involving the Property

The User has not returned the AAI User Questionnaire.

8.3 Key Site Manager**8.3.1 Historic Site Use**

According to Phillip Lee, the General Manager and site contact, who has been involved with the property for the past 3 months, the Subject was constructed in 1973. He had no other knowledge of the history of the Subject.

According to Jeff Jorgensen, the Chief Engineer, who has been involved with the property for the past 12 years, the Subject was constructed in 1973. He had no other knowledge of the history of the Subject.

8.3.2 Proceedings Involving the Property

Neither Mr. Lee nor Mr. Jorgensen had any knowledge of pending, threatened, or past litigation, administrative proceedings, or notices from governmental agencies regarding violations of environmental laws regarding hazardous substances or petroleum products.

8.4 Occupants

Mr. Ian Gee, who has been the Manager of the Sheraton Hotel for the last 4 years, has no knowledge of the history of the Subject. In addition, Mr. Gee was unaware of any environmental problems in connection with the Subject.

Sam (last name withheld), owner of Kodak Express Digital Solutions, had no knowledge of the history of the Subject. In addition, he was unaware of any environmental problems in connection with the Subject. He indicated that he generates only small quantities of waste photoprocessing solution and recovered silver, and that all waste is removed every six months by ERSI.

8.5 Past Owners

IVI was unable to locate the site's former owner.

8.6 Local Regulatory Agency Interviews and/or File Reviews**Fire Department**

IVI has sent a request to the Los Angeles Fire Department for environmental information pertaining to the subject property. According to Ms. Katie Fernandez, the Fire Department has no records of underground storage tanks at the Subject addresses of 700 S. Flower Street, 711 S. Hope Street or 750 W. 7th Street.

Health Department

IVI has sent a request to the Los Angeles County Public Health Investigation for environmental information pertaining to the subject property. The agency responded that it had no files for the addresses of 700 S. Flower Street and 711 S. Hope Street. The agency provided copies of files it maintains for the address of 750 W. 7th Street. This information included a Hazardous Waste Generator form dated December 2009 from Macy's for the removal of 400 lbs. of waste liquid (old cosmetics and perfume), 30-gallons of waste oil from the HVAC system, 5-gallons of waste oil from a generator, and 15-gallons used water-based paint. In addition, the Los Angeles County Fire conducted an inspection of Macy's in March 2010 which no noted violations. The Fire Department also conducted an inspection of Broadway Plaza Cleaners in July 2000, and found that no dry cleaning is conducted at the site and no hazardous waste is generated.

County Department of Public Works Records

According to a representative of the Los Angeles County Department of Public Works (DPW), the DPW has no records pertaining to the Subject's address.

Tax Assessor

A cursory review of property tax files at the Los Angeles County Tax Assessor did not identify any environmental liens with respect to the subject property.

Department of Planning and Zoning

Review of available zoning records maintained by the Los Angeles City Planning Department indicates that the Subject is currently zoned C2-4D for Commercial uses. According to the planning and zoning records, no additional zoning changes were listed for the Subject.

Building Department Records

IVI contacted the City of Los Angeles Department of Building and Safety (DBS) in an attempt to obtain historical building permits and records for the Subject.

However, according to DBS personnel, a file review request must be submitted, which could take up to a month to process. Based on the current and past use of the Subject, this department is not anticipated to have any environmentally significant information. Therefore, a FOIA request was not submitted.

However, IVI reviewed a Parcel Profile Report for the Subject available from the City of Los Angeles website. This report notes that the Subject is located in a Methane Buffer Zone, an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. However, IVI reviewed a map of oil and gas fields in the Subject area, and no active or inactive oil wells were identified within ¼ mile of the Subject.

California Division of Oil, Gas and Geothermal Resources Records

IVI reviewed California Division of Oil, Gas and Geothermal Resources (DOGGR) maps in an attempt to determine if any oil production wells are or have historically been located on the Subject. From review of DOGGR maps, it does not appear that any oil wells have been located on the Subject site. However, one well, which was determined to be a dry hole and was subsequently plugged and abandoned, was noted to be within 200 feet east of the Subject. Another well, which was also plugged and abandoned, was noted to be within 0.13 mile south of the Subject, on the current site of the Los Angeles Convention Center. Due to the extensive redevelopment of this area, it is unlikely that these previous wells are likely to have any negative impact on the Subject.

IVI has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-05 of the 700 South Flower and 711 South Hope, located at 700 South Flower and 711 South Hope, Los Angeles, California. Any exceptions to, or deletions from, the standard practice are described within Section 2.0 of this report.

This assessment has revealed no evidence of recognized environmental conditions (RECs) in connection with the Subject; however, the following items of environmental concern were identified which warrant mention:

Asbestos-Containing Material (ACM)

In December 2012, Environmental Testing Associates conducted an asbestos survey at the Subject, the results of which were reported in three separate reports, prepared for the Ratkovich Company. Positive asbestos results were detected in samples of drywall and tape, joint compound, fireproofing material, wall and ceiling texture, transite panels, thermal systems insulation, floor tile and mastic, carpet mastic and glue, cove base mastic, exterior stucco, leveling compound, and pipe wrap. The positive samples were found in various locations throughout the Subject. All of the positive samples were found to be in good condition, except for a fire door located in Carl's Jr., which was noted as damaged, and fireproofing debris noted in the ceiling area of Room 2424 in the Sheraton Hotel, which was noted as significantly damaged. IVI has been informed that an Operations and Maintenance Plan (O&M) for the management of the identified asbestos-containing materials is being prepared.

Methane Hazard Zone

Based on information provided by the City of Los Angeles, the Subject is located in an area that has been identified as a potential methane hazard site due to its proximity to methane gas sources such as landfills, oil wells, oil fields and underground gas storage facilities. The locations of these methane gas sources are based on data from the California Division of Oil, Gas and Geothermal Resources and the City of Los Angeles Department of Environmental Affairs. From review of oil and gas field maps of the area, it does not appear that any active or inactive oil wells, landfills or oil fields have been located on the Subject property. Of note, methane is a non-toxic, non-carcinogenic gas that is extremely flammable at certain concentrations. No rotten egg-like odors, indicative of methane gas, have been reported in the building. Based on this information, the Subject's location within a Los Angeles City's designated Methane Zone is not suspected to be of a significant environmental concern. However, should future additions, alterations, repairs, changes of use or changes of occupancy to the existing building take place, the Subject may continue to be required to comply with the methane mitigation requirements set forth by the City of Los Angeles.

- 10.1** This report has been prepared in compliance with the ASTM standard entitled “Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process” E1527-05.
- 10.2** The observations described in this report were made under the conditions stated herein. The conclusions presented in the report were based solely upon the services described therein, and not on scientific tasks or procedures beyond the scope of described services within the constraints imposed by the client. The work described in this report was carried out in accordance with the Terms and Conditions of the contract.
- 10.3** In preparing this report, IVI has relied on certain information provided by federal, state, and local officials and other parties referenced therein, and on information contained in the files of governmental agencies, that were readily available to IVI at the time of this assessment. Although there may have been some degree of overlap in the information provided by these various sources, IVI did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this site assessment. Observations were made of the site and of the structures on the site as indicated in this report. Where access to portions of the site or to structures on the site was unavailable or limited, IVI renders no opinion as to the presence of direct or indirect evidence relating to petroleum substances, hazardous substances, or both, in that portion of the site and structure. In addition, IVI renders no opinion as to the presence of indirect evidence relating to hazardous material or oil, where direct observation of the ground surface, interior walls, floors, ceiling or a structure is obstructed by objects or materials, including snow, covering on or over these surfaces.
- 10.4** As part of this assessment, IVI submitted requests for information via the Freedom of Information Act (FOIA) to various governmental agencies. As of the preparation of this report these requests may not have been fulfilled. The conclusions of this report are subject to change upon receipt of a response from these FOIA requests.
- 10.5** IVI does not represent that the site referred to herein contains no petroleum or hazardous or toxic substances or other conditions beyond those observed by IVI during the site walkthrough.
- 10.6** IVI has produced this document under an agreement between IVI and National Real Estate Advisors. All terms and conditions of that agreement are included within this document by reference. Any reliance upon this document, or upon IVI’s performance of services in preparing this document, is conditioned upon the relying party’s acceptance and acknowledgement of the limitations, qualifications, terms, conditions and indemnities set forth in that agreement, and property ownership/management disclosure limitations, if any. It is not to be relied upon by any party other than National Real Estate Advisors, National Real Estate Advisors, LLC, IBEW-NECA Diversified Underwritten Real Estate Fund (“INDURE”), The Ratkovich Company, NREA 700 Investors LLC, NREA 711 Investors, Inc., NREA-TRC 700 LLC, NREA-TRC 711 LLC, BVSEF III 700 REIT LLC, BVSEF III 711 NON REIT LLC and U.S. Bank National Association, a national banking association organized and existing under the laws of the United States of America, not in its individual capacity but solely in its capacity as Trustee for the registered holders of LB-UBS Commercial Mortgage Trust 2007-C1, Commercial Mortgage Pass-Through Certificates, Series 2007-C1, nor used for any purpose other than that specifically stated in our Agreement or within this Report’s Introduction section without IVI’s advance and express written consent. The Phase I report is only valid if completed within 180 days of an acquisition or the transaction necessitating the report.
- 10.7 TIME LIMITATION TO ENACT CLAIM AGAINST IVI** If in the opinion of the client, or any third party claiming reliance on IVI’s report or services, that IVI was negligent or in breach of contract, such aforementioned parties shall have one year from the date of IVI’s site visit to make a claim.
- 10.8** Unless specifically identified within Section 2, Chinese drywall, indoor air quality and any other non-ASTM scope issues as identified in ASTM E1527-05, Section 13.1.5, are excluded from the scope of this assessment.

**Phase I Environmental Site Assessment
Pre-Survey Questionnaire**

Someone familiar with the site should complete this questionnaire prior to our site visit. For those questions that are not applicable, please respond "N/A", and "U/K" for those questions in which the answer is not known. If you have any questions about how to answer any of the questions, please call IVI. If additional pages for responses are necessary, please attach hereto and reference it to the appropriate question number. Upon completing this form, please fax it to the above fax number. This document and your written response will be included as an exhibit in the final report.

Subject Name: 700 South Flower and 711
South Hope

Project Manager: Carol Noland

Street: 700 South Flower and 711 South
Hope

IVI Project No.: PC21102317

City/State: Los Angeles, California

Date: December 10, 2012

Key Site Contact: Phillip Lee
Telephone: 213 - 624-2891
Fax: (213) 688-0176

A. GENERAL

PREPARER

1. Name, title and telephone number of person completing this questionnaire:

Phillip Lee
Name
General Manager
Title

Signature
(213) 624-2891
Telephone Number

2. How long has the preparer been familiar with the site or facility? 3 months
If less than five years, who held the position prior? Sandy Nam

3. Property Owner/Occupant Information

700 South Flower Plaza, LLC
Owner's Name
700 S. Flower St. #1100, LA, CA 90017
Owner's Address

Occupant's Name

Occupant's Address

VALUATION REDUCTION

Was/is the purchase price of the Subject property significantly less than the purchase price of comparable properties due to environmental conditions?

Yes No U/K

If yes, please explain below.

B. Property Description

1. Land

- a. Size of Parcel? 4.28 Acres
- b. Shape of Parcel? Rectangular Irregular Other
- c. Are there any surface waters or wetlands on the site? Yes No U/K
- d. Is there a well on the site? Yes No U/K

If so, what type of well is it?:

- Drinking Water
- Irrigation
- Monitoring
- Dry Well

Have contaminants in excess of governmental guidelines been identified in the water? Yes No

- e. Was or is there a septic system on the property? Yes No U/K
 If so, is the septic system currently in use? Yes No
- f. Has fill been imported onto the Subject? Yes No U/K
- g. Are there currently or has there previously been waste treatment or disposal pits, ponds, or lagoons on the site? Yes No U/K
- h. Where is the site's stormwater discharged to? _____

B. PROPERTY DESCRIPTION – continued

2. **Site Improvements** This includes all buildings N/A

- a. Describe the size (square foot) of the existing building(s).
- b. How old is the building(s)?
- c. Describe the heating and cooling system.
- d. Who provides the following utilities?

Water: _____

Sanitary Sewer: _____

Storm Drainage: _____

Natural Gas: _____

Electric: _____

- e. Are there any floor drains on the site? Yes No U/K
 If so, where do they discharge to?

3. **Site History**

- a. Were there any buildings or other improvements on the property prior to the existing improvements? Yes No U/K
 If so, what were they?
- b. Is or has the property been used for industrial or agricultural purposes, or as a gasoline station, auto repair, dry cleaner, junkyard, or landfill? Yes No U/K
 If so, please describe.

B. PROPERTY DESCRIPTION – continued

4. Site Operations

To the best of your knowledge, do any of the following operations take place on the Subject or have ever taken place on the Subject:

- | | | |
|--|---|--|
| • Dry Cleaning: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Battery Storage/Sales: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Paint Storage/Sales: | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| • Petroleum Storage/Sales: | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| • Photo or X-Ray Finishing: | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| • Electronic Equipment
Assembly or Manufacturing: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Solvent Storage or Sales: | Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |
| • Chemical Manufacturing/Sales: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Automobile Storage, Repair, or Disposal: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Agriculture: | Yes <input type="checkbox"/> | No <input checked="" type="checkbox"/> |
| • Medical or Dental Offices: | <i>Eye Doctor</i> Yes <input checked="" type="checkbox"/> | No <input type="checkbox"/> |

5. Previous Studies/Documentation

- a. Do you have any knowledge of previously prepared Environmental Site Assessment Reports, asbestos surveys, lead-based paint studies or testing (soil, groundwater, tank tightness testing, lead-based paint testing, asbestos testing, indoor air quality, mold (bacteria and fungi testing), etc.) conducted on the site? If so, please either provide copies of the reports or list the title, date, preparer and recipient of such report(s) below:

I have no knowledge of any environmental related studies or reports prepared on the Subject.

- b. Are you in possession of a title report, site drawings, building drawings and specifications and/or a survey for the site? Yes No

If so, please provide copies of same.

Please provide all available environmental information from yours or your Client's records including, but not limited to, documentation in connection with any pending or threatened public or private proceedings or litigation with respect to environmental liability, environmental permits and permit applications, underground and above ground tank registration and information (including removal and testing of such tanks), environmental reports, asbestos, lead-based paint or indoor air quality studies, spill information and compliance information and programs.

C. SURROUNDING PROPERTIES

1. Has any adjoining properties been used for industrial purposes, or as a gasoline station, auto repair shop, junkyard, dry cleaner or landfill? Yes No U/K
If so, please explain.
2. Are you aware of any contamination conditions on adjoining or nearby properties? Yes No U/K
3. Are there any open surface waters or wetlands adjacent to the site? Yes No U/K
4. Are you aware of any active or former waste treatment or disposal pits, ponds, or lagoons on adjacent or nearby sites? Yes No U/K
5. Is any neighboring property engaged in the storing, transporting or disposal of hazardous waste, or chemicals? Yes No U/K

D. REGULATORY

1. Are you aware of any pending, threatened, or past litigation relevant to *harardouse substances* or *petroleum products* in, on, or from the *property*? Yes No U/K
If so, please explain.
2. Are you aware of any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes No U/K
If so, please state the circumstances.
3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*? Yes No U/K
If so, please explain.

E. ASBESTOS

1. Do you have knowledge of any materials or substances on the site that are known or suspected to contain asbestos? Yes No U/K
If so, what materials and where are they located?

SEE MASEK Report

E. ASBESTOS – continued

2. Has an inspection for asbestos ever been conducted on the Subject? Yes No U/K
3. Has asbestos been removed from the Subject? Yes No U/K
4. Does the building have:
- Spray-on or troweled-on fireproofing, insulation or finishes? Yes No U/K
 - Insulation on piping, boilers, tanks, chillers, or other mechanical equipment? Yes No U/K
 - Transite used in cooling towers, exterior walls, ceilings fascia panels, etc.? Yes No U/K
 - Resilient floor tile? Yes No U/K
 - Suspended acoustical ceiling tiles? Yes No U/K
 - A built-up or rolled roofing system? Yes No U/K

F. PCBs

1. Are there any on-site electrical transformers? Yes No U/K
- If so, do any of the transformers contain PCBs? Yes No U/K
- Who owns the transformers and where are they located?
2. Did any on-site transformers formerly contain PCBs, but later had the dielectric fluid replaced? Yes No U/K
3. Is there any hydraulic equipment such as elevators or automotive lifts on-site? Yes No U/K
- If so, who services the equipment? *Schindler*
- Are you aware of any hydraulic fluid leaks or evidence of leakage such as unexplained fluid loss in connection with the hydraulic equipment? Yes No U/K

F. Storage Tanks

1. Are there any (active or inactive) Underground Storage Tanks (UST) or Aboveground Storage Tanks (AST) on the site? Yes No U/K

If so, please fill out the following schedule:

Active or Inactive Tanks

Location of Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Age of Tank (Years)	Does the Tank Have Corrosion Protection? (Yes/No)	Does the Tank Have Leak Detection? (Yes/No)	Is the Tank In-Use? (Yes/No)
B-LEVEL	8,800	AST	Diesel	39	YES	YES	YES
B-LEVEL	8,800	AST	DIESEL	39	YES	YES	YES
B-LEVEL	1,000	AST	DIESEL	39	YES	YES	YES

Have any of the tanks been tightness tested? Yes No U/K

1. Do you have any knowledge of tanks that were either removed or closed in-place at the site? Yes No U/K

If so, please fill out the following schedule:

Tanks Removed or Closed In-Place

Location of Former Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Tank Removal Company	Year Tank Was Removed

H. LEAD

1. Are you aware of any lead-based paint (LBP) applications on the site? Yes No U/K
2. Has LBP testing been conducted? Yes No U/K
3. Have there been any reported incidences of children with elevated blood lead levels residing at the site? Yes No U/K
4. Are there any children younger than 7 years old residing at the site or frequenting the site on a daily basis? Yes No U/K
5. Have any LBP abatements been conducted? Yes No U/K
6. Has the water been tested for lead? Yes No U/K

If so, please provide a copy of the results

I. HAZARDOUS MATERIALS

1. Are hazardous materials or chemicals stored or used on-site? Yes No U/K

If so, please fill out the following schedule (attach separate page if more room is required):

Schedule of Hazardous or Toxic Substances Stored On-Site

Material Type	Quantity (Gallons)	Location
Cooling Tower Chemicals	2 (100 gal) Tank	B-LEVEL

2. Are there any hazardous or medical waste or fluids generated or used that employ an outside service for their periodic supply and removal? Yes No U/K

If so, please provide the name, address, & telephone number of the disposal company and the facility generating the waste.

Hotel generates blood borne stuff

J. INDOOR AIR QUALITY

1. Have strong mold odors and/or mold staining been observed onsite? Yes No U/K
2. Has there been any employee or tenant reports of symptoms consistent with mold contamination or other indoor air quality concerns? Yes No U/K
3. Are you aware of elevated radon gas concentrations on-site? Yes No U/K

K. AAI USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLP) offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "Brownfield's Amendments"), the user must provide the following information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law? Yes No U/K

2. Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law? Yes No U/K

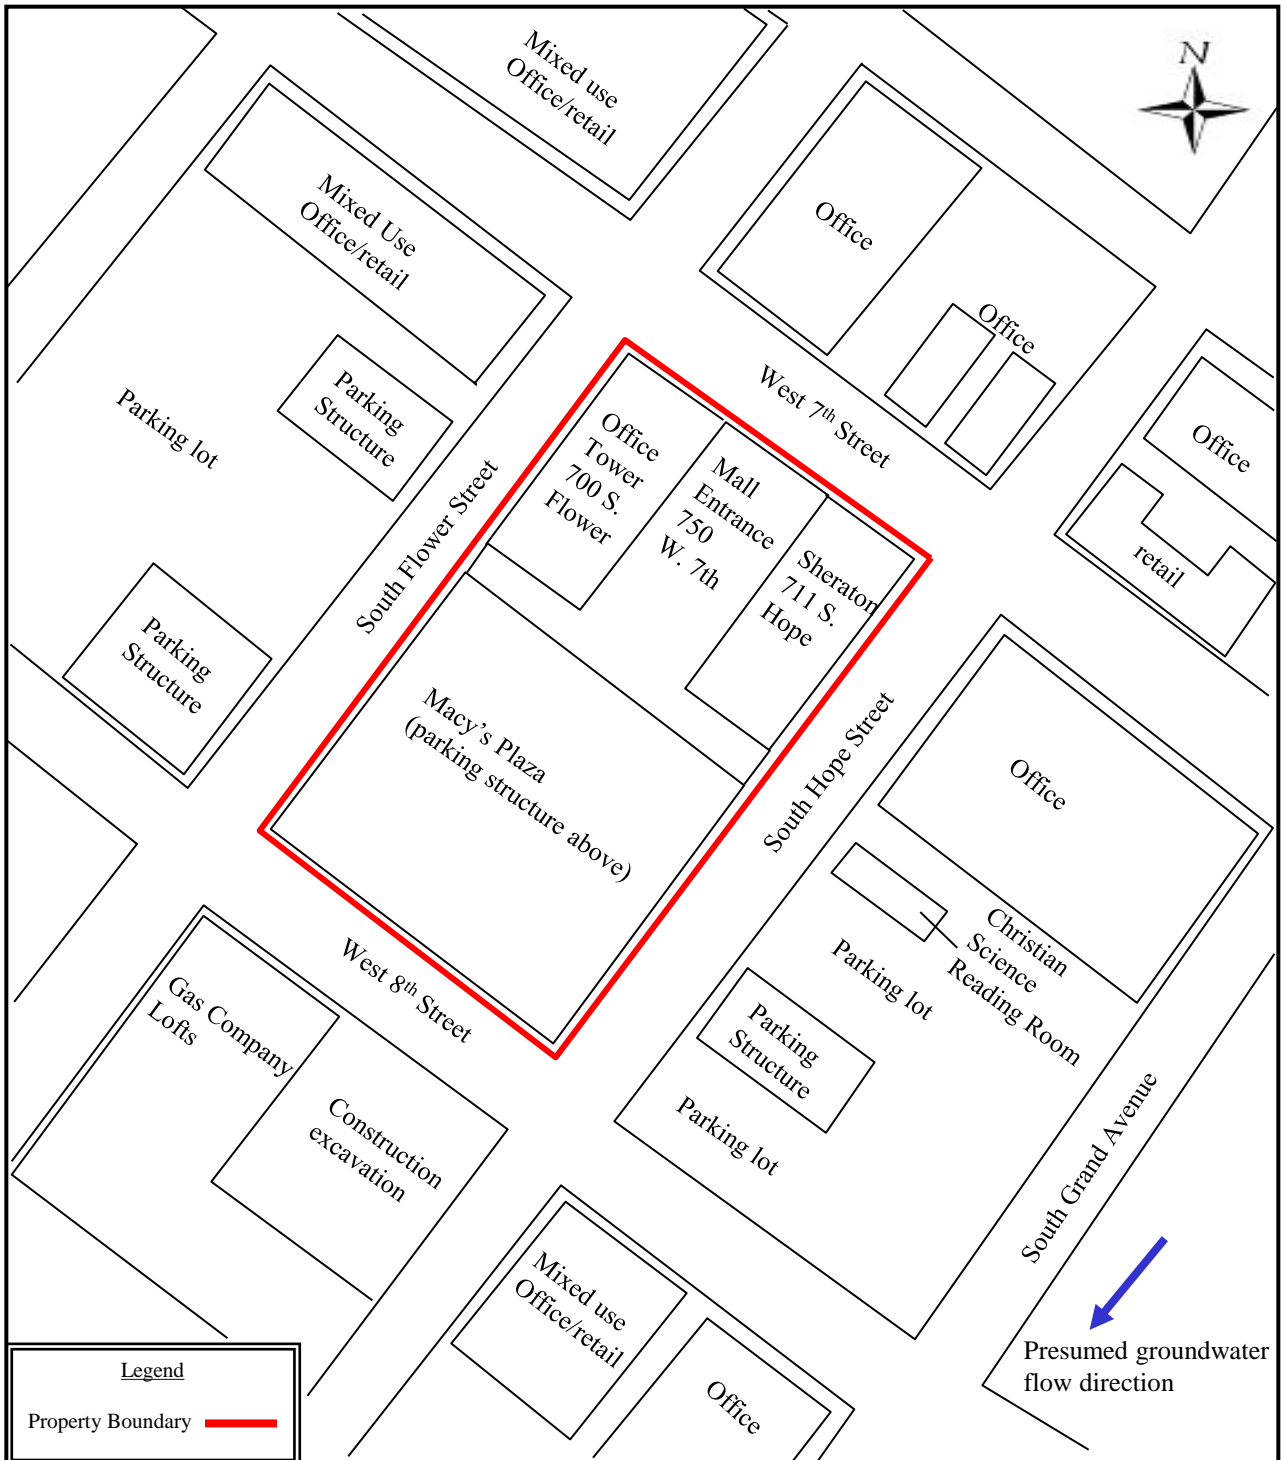

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes No U/K

4. Does/Did the purchase price paid for this property reasonably reflect the fair market value of the property? Yes No U/K

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes No U/K

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:
 - (a.) Do you know the past uses of the property? Yes No U/K
 - (b.) Do you know of specific chemicals that are present or once were present at the property? Yes No U/K
 - (c.) Do you know of spills or other chemical releases that have taken place at the property? Yes No U/K
 - (d.) Do you know of any environmental cleanups that have taken place at the property? Yes No U/K

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the property? Yes No U/K

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 12/27/2011 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 2 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/11/2012 has revealed that there are 39 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 09/11/2012 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 11/05/2012 has revealed that there are 18 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 10/17/2012 has revealed that there are 15 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

AST: The Aboveground Storage Tank database contains registered ASTs. The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the AST list, as provided by EDR, and dated 08/01/2009 has revealed that there are 2 AST sites within approximately 0.25 miles of the target property.

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 49 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 09/11/2012 has revealed that there are 5 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

DRYCLEANERS: A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaners' agents; linen supply; coin-operated laundries and cleaning; drycleaning plants except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

A review of the DRYCLEANERS list, as provided by EDR, and dated 01/19/2012 has revealed that there is 1 DRYCLEANERS site within approximately 0.25 miles of the target property.

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 42 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Owner/Op start date: 10/30/2003
 Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
 Mixed waste (haz. and radioactive): No
 Recycler of hazardous waste: No
 Transporter of hazardous waste: No
 Treater, storer or disposer of HW: No
 Underground injection activity: No
 On-site burner exemption: No
 Furnace exemption: No
 Used oil fuel burner: No
 Used oil processor: No
 User oil refiner: No
 Used oil fuel marketer to burner: No
 Used oil Specification marketer: No
 Used oil transfer facility: No
 Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
 Waste name: CADMIUM

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D002
 Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
 Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

inorganic salts and heavy metals) are included in this category.

Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Land type: Facility is not located on Indian land. Additional information is not known.
Classification: Small Small Quantity Generator
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

Actual:
267 ft.

Owner/Operator Summary:

Owner/operator name: WILLIAM BLOOMFIELD
Owner/operator address: 412 W 6TH ST
LOS ANGELES, CA 90014
Owner/operator country: Not reported
Owner/operator telephone: (213) 627-3998
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

northwest, 4th Street on the northeast, Flower Street on the southeast, and 5th Street on the southwest. The Site consists of approximately 3.5 acres and is occupied by a 500,000 square-foot building with 36 stories consisting of guest rooms, retail space, meeting rooms, offices, and subterranean parking. Laundry services, including a dry cleaning system, are located in a basement area measuring approximately 25 feet by 25 feet. Previous investigations completed at the Site detected concentrations of tetrachloroethene up to 1,610 micrograms per kilogram (a%/kg) in soil and up to 87.5 micrograms per liter (a%/L) in groundwater. The Site is currently monitoring groundwater on a quarterly basis.

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

Completed Document Type: School Cleanup Agreement
 Completed Date: 02/12/1992
 Comments: SMALL CERTIFICATION: On February 12, 1993, the Department entered into an En- forceable agreement with the LAUSD, for the oversight of a removal action for remediation of Parcel 10831. The re- moval action consisted of the excavation and off-site disposal of 122 tons of soil contaminated with volotile organic hydrocarbons, petroleum hodorcarbons, and heavy metals.

Completed Area Name: PROJECT WIDE
 Completed Sub Area Name: Not reported
 Completed Document Type: * Discovery
 Completed Date: 10/22/1990
 Comments: Facility identified LA Unified School District submitted a Phase 2 Site Investigation Report to the Dept. for review. Sample Results: TPHC up to 21700 mg/kg.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A

Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 06/07/2012	Source: EPA
Date Data Arrived at EDR: 07/05/2012	Telephone: N/A
Date Made Active in Reports: 09/18/2012	Last EDR Contact: 10/11/2012
Number of Days to Update: 75	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

Number of Days to Update: 36	Next Scheduled EDR Contact: 01/21/2013
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/11/2012	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 09/12/2012	Telephone: 202-307-1000

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012

	Data Release Frequency: Quarterly

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 11/26/2012
Number of Days to Update: 25	Next Scheduled EDR Contact: 03/11/2013
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2009	Source: EPA

	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/23/2011	Source: EPA
Date Data Arrived at EDR: 12/13/2011	Telephone: (415) 947-8000
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 09/11/2012
Number of Days to Update: 79	Next Scheduled EDR Contact: 12/24/2012
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/20/2012	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/20/2012	Telephone: 860-424-3375
Date Made Active in Reports: 09/20/2012	Last EDR Contact: 11/19/2012

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

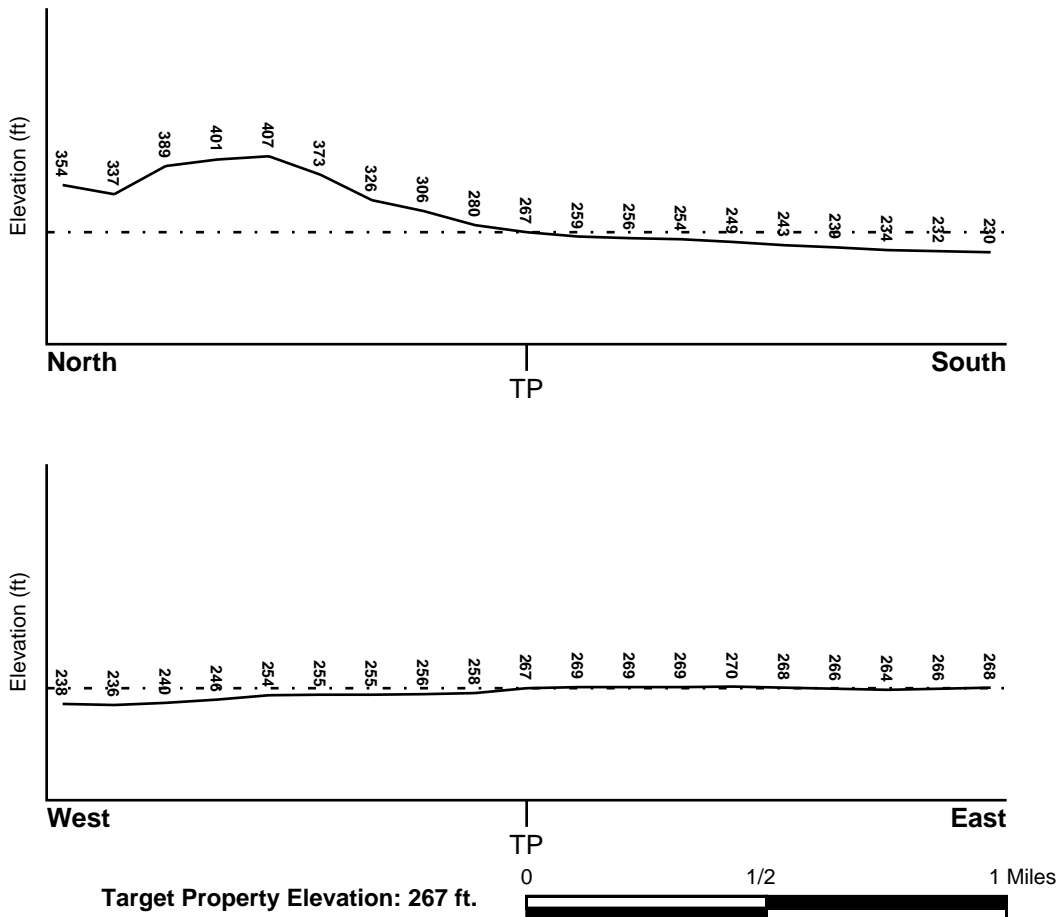

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
LOS ANGELES, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06037C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
HOLLYWOOD	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile East
Site Name:	SO CALIF RAPID TRANSIT DISTRICT
Site EPA ID Number:	CAD981989841
Groundwater Flow Direction:	GENERALLY SE.
Measured Depth to Water:	approximately 37 feet.
Hydraulic Connection:	The uppermost aquifer at the site is the Gaspar aquifer. The Gaspar aquifer is hydraulically connected to underlying aquifers.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Miocene
Code: Tm (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Surficial Soil Types: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 silty clay
 sand

Deeper Soil Types: gravelly - sandy loam
 sandy loam
 very gravelly - sandy loam
 stratified
 very fine sandy loam
 weathered bedrock
 sand
 gravelly - fine sandy loam
 silty clay loam
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Business Owner/Operator Identification (LACoCUP, Form 2730)

Please submit the Business Activities page, the Business Owner/Operator Identification page (Form 2730), and Hazardous Materials - Chemical Description pages (Form 2731) for all hazardous materials inventory submissions. For the inventory to be considered complete, this page must be signed by the appropriate individual. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. FACILITY ID NUMBER This number is assigned by the CUPA. This is the unique number which identifies your facility.
3. BUSINESS NAME Enter the full legal name of the business.
100. BEGINNING DATE Enter the beginning year and date of the report. (YYYY/MM/DD, ex. 1999/07/01)
101. ENDING DATE Enter the ending year and date of the report. (YYYY/MM/DD, ex. 2000/06/30)
102. BUSINESS PHONE Enter the phone number, area code first, and any extension.
103. BUSINESS SITE ADDRESS Enter the street address where the facility is located. No post office box numbers are allowed.
104. CITY Enter the city or unincorporated area in which the business site is located.
105. ZIP CODE - Enter the zip code of the business site. The extra 4 digits in the zip code may also be added.
106. DUN & BRADSTREET Enter the Dun and Bradstreet number for the facility. The Dun & Bradstreet number may be obtained by calling (610) 892-7748 or by visiting Dun and Bradstreet on the internet at www.dnb.com.
107. SIC CODE Enter the primary Standard Industrial Classification Code number for primary business activity. Report only the first four digits.
108. COUNTY Enter the county in which the business site is located.
109. BUSINESS OPERATOR NAME Enter the name of the business operator.
110. BUSINESS OPERATOR PHONE Enter business operator's phone number including any extension, if different from the business phone.
111. OWNER NAME Enter name of the business owner, if different from the business operator.
112. OWNER PHONE Enter the business owner's phone number if different from the business phone, area code first, and any extension.
113. OWNER MAILING ADDRESS Enter the owner's mailing address if different from the business site address.
114. OWNER CITY Enter the name of the city for the owner's mailing address.
115. OWNER STATE Enter the 2 character state abbreviation for the owner's mailing address.
116. OWNER ZIP CODE Enter the zip code for the owner's address. The extra 4 digits in the zip code may also be added.
117. ENVIRONMENTAL CONTACT NAME Enter the name of the person, if different from the Business Owner or Operator, who receives all environmental correspondence and will respond to enforcement activity.
118. CONTACT PHONE Enter the phone number at which the environmental contact can be contacted including any extension.
119. CONTACT MAILING ADDRESS Enter the mailing address where all environmental contact correspondence should be sent.
120. CITY Enter the name of the city for the environmental contact's mailing address.
121. STATE Enter the 2 character state abbreviation for the environmental contact's mailing address.
122. ZIP CODE Enter the zip code for the environmental contact's mailing address. The extra 4 digits in the zip code may also be added.
123. PRIMARY EMERGENCY CONTACT NAME Enter the name of a representative that can be contacted in case of an emergency involving hazardous materials at the business site. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
124. TITLE Enter the title of the primary emergency contact.
125. BUSINESS PHONE Enter the business number for the primary emergency contact, area code first, and any extensions.
126. 24-HOUR PHONE Enter a 24-hour phone number for the primary emergency contact. The 24-hour phone number must be one answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
127. PAGER NUMBER Enter the pager number for the primary emergency contact, if available.
128. SECONDARY EMERGENCY CONTACT NAME Enter the name of a secondary representative that can be contacted in the event that the primary emergency contact is not available. The contact shall have FULL facility access, site familiarity, and authority to make decisions for the business regarding incident mitigation.
129. TITLE Enter the title of the secondary emergency contact.
130. BUSINESS PHONE Enter the business telephone number for the secondary emergency contact, area code first, and any extension.
131. 24-HOUR PHONE Enter a 24-hour phone number for the secondary emergency contact. The 24 hour phone number must be one which is answered 24 hours a day. If it is not the contact's home phone number, then the service answering the phone must be able to immediately contact the individual stated above.
132. PAGER NUMBER Enter the pager number for the secondary emergency contact, if available.
- 133a. UNINCORPORATED AREA Check "Yes" if your facility is located in an unincorporated area of the County (ex. East LA, Marina Del Rey etc.).
- 133b. E-MAIL ADDRESS Enter the e-mail address of the corresponding primary or secondary emergency contact if an e-mail address exists.
- 133c. LOCALLY COLLECTED INFORMATION Enter your business's tax identification number or social security number. The TIN number may be obtained from the Internal Revenue Service (IRS). Also, include the business owner's/president's name, position in the business, date of birth and driver's license number with the State issued in abbreviation.
- 133d. Number of Employees for facility: For Retail and service type businesses; the number of employees is determined by the actual number of employees directly related to the hazardous waste generating activity (s). For manufacturing type businesses; the total number of employees in the business shall be used for determining the hazardous waste licensing fee.
- 133e. Businesses will be identified by the following twelve codes: 01)-Corporation, 02)-Individual Owner, 03)-Partnership, 04)-Local Government Agency, 05)-County Government Agency, 06)-State Government Agency, 07)-Federal Government Agency, 08)-LA County Fire Department Facilities, 09)-Unknown Classification (Other), 10)-City Fire Facilities, 11)-LA County Sheriff Facilities, 12)-Other Police Facilities.
- 133f. MAILING/BILLING ADDRESS Enter the address that all correspondence and bills should be sent.
- 133g. MAILING/BILLING CITY Enter the city for the mailing/billing address.
- 133h. MAILING/BILLING STATE Enter the 2 character state abbreviation for the mailing/billing address.
- 133i. MAILING/BILLING ZIP CODE Enter the zip code for the mailing/billing address. The extra 4 digits in the zip code may also be added.
134. DATE Enter the date that the document was signed. (YYYYMMDD, ex. 1999/07/01)
135. NAME OF DOCUMENT PREPARER Enter the full name of the person who prepared the inventory submittal information.
136. NAME OF SIGNER Enter the full printed name of the person signing the page.
SIGNATURE OF OWNER/ OPERATOR OR DESIGNATED REPRESENTATIVE The Business Owner/Operator, or officially designated representative of the Owner/Operator, shall sign in the space provided. This signature certifies the signer is familiar with the information submitted, and based on the signer's inquiry of those individuals responsible for obtaining the information, it is the signer's belief that the information is true, accurate and complete.
137. TITLE OF SIGNER Enter the title of the person signing the page.

Business Activities

Please submit the Business Activities page, the Business Owner/Operator Identification page (Form 2730), and Hazardous Materials Inventory - Chemical Description pages (Form 2731) for all submissions. Please number all pages of your submittal. This helps your CUPA or PA identify whether the submittal is complete and if any pages are separated.

1. **FACILITY ID NUMBER** Leave this blank. This number is assigned by the Certified Unified Program Agency (CUPA) and identifies your facility.
2. **EPA ID NUMBER** If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California Identification number. For facilities in California, the number usually starts with the letters "CA". If you need a CA EPA number, complete and submit DTSC Form 1358 located at http://www.dtsc.ca.gov/IDManifest/ID_Numbers.cfm to the Department of Toxic Substances Control (DTSC), or for a federal EPA number call (415) 495-8895 <http://www.epa.gov/region09/waste/epanums.html#rcranum>.
3. **BUSINESS NAME** Enter the full legal name of the business. This is the same as the terms "Facility Name" or "DBA - Doing Business As".
4. **HAZARDOUS MATERIALS ONSITE** Check the box to indicate whether you have hazardous materials onsite. You have a hazardous material if:
 - It is handled in quantities equal to or greater than 500 pounds, 55 gallons, or 200 cubic feet of gas (calculated at standard temperature and pressure),
 - It is handled in quantities equal to or greater than the applicable federal threshold planning quantity for an extremely hazardous substance listed in 40 CFR Part 355, Appendix A,
 - Radioactive materials are handled in quantities for which an emergency plan is required to be adopted pursuant to Part 30, Part 40, or Part 70 of Chapter 10 of 10 CFR, or pursuant to any regulations adopted by the state in accordance with these regulations.

If you have hazardous materials onsite, then you must complete the Business Owner/Operator Identification page (OES Form 2730) and the Hazardous Materials Inventory - Chemical Description page (OES Form 2731), as well as an Emergency Response Plan (i.e. Consolidated Contingency Plan) and Training Plan. Do not answer "YES" to this question if you exceed only a local threshold, but do not exceed the state threshold.

5. **OWN OR OPERATE UNDERGROUND STORAGE TANK (UST)** Check the appropriate box to indicate whether you own or operate USTs containing hazardous substances as defined in Health and Safety Code (HSC) §25316. If "YES", then you must complete one UST Facility page and UST Tank pages for each tank. **You must also submit a plot plan and a monitoring program plan.**
6. **UPGRADE/INSTALL UST** Check the appropriate box to indicate whether you intend to install or upgrade USTs containing hazardous substances as defined in HSC §25316. If "YES", then you must complete the UST Installation - Certificate of Compliance page in addition to UST Facility and Tank pages, plot plan and monitoring program plan.
7. **UST CLOSURE** Check the appropriate box if you are closing an UST and complete the closure portion of the UST Tank pages for each tank.
8. **OWN OR OPERATE ABOVEGROUND PETROLEUM STORAGE TANK (APST)** To calculate the storage capacity of petroleum oil, add the volume capacities of all containers and tanks that store 55 gallons or more of petroleum oil in your calculation. Do not include underground storage tanks. In the H&SC, Section 25270.2 (g) defines petroleum oil and Section 25270.2 (a)(4) lists the types of petroleum oil that are exempt. Until the CUPA provides a tank facility statement, document your consolidated contingency plan with the following tank information: (1) facility name, address, and owner or operator; (2) total storage capacity, and (3) the location, size, age, and contents of each storage tank that exceeds 10,000 gallons of petroleum oil. If you have 1,320 gallons or more of petroleum oil, prepare a spill prevention control and countermeasure plan.
9. **HAZARDOUS WASTE GENERATOR** Check the appropriate box to indicate whether your facility generates hazardous waste. A generator is the person or business whose acts or processes produce a hazardous waste or who causes a hazardous substance or waste to become subject to State hazardous waste law. If your facility generates hazardous waste, you must obtain and use an EPA identification number (ID) in order to properly transport and dispose of it. Report your EPA ID number in #2. Hazardous waste means a waste that meets any of the criteria for the identification of a hazardous waste adopted by DTSC pursuant to HSC §25141. "Hazardous waste" includes, but is not limited to, federally regulated hazardous waste. Federal hazardous waste law is known as the Resource Conservation and Recovery Act (RCRA). Unless explicitly stated otherwise, "hazardous waste" also includes extremely hazardous waste and acutely hazardous waste.
10. **RECYCLE** Check the appropriate box to indicate whether your facility recycles more than 100 kilograms per month of recyclable material under a claim that the material is excluded or exempt per HSC §25143.2. Check "YES" and complete the Recyclable Materials Report pages, if you either recycled onsite or recycled excluded recyclable materials which were generated offsite. Check "NO" if you only send recyclable materials to an offsite recycler; you do not need to report.
11. **ONSITE HAZARDOUS WASTE TREATMENT** Check the appropriate box to indicate whether your facility treats hazardous waste onsite. "Treatment" means any method, technique, or process which is designed to change the physical, chemical, or biological character or composition of any hazardous waste or any material contained therein, or removes or reduces its harmful properties or characteristics for any purpose. "Treatment" does not include the removal of residues from manufacturing process equipment for the purposes of cleaning that equipment. Amendments (effective 1/1/99) add exemptions from the definition of "treatment" for certain processes under specific, limited conditions. Refer to HSC §25123.5 (b) for these specific exemptions. Treatment of certain laboratory hazardous wastes do not require authorization. Refer to HSC §25200.3.1 for specific information. Please contact your CUPA to determine if any exemptions apply to your facility. If your facility treats hazardous waste onsite, complete the Onsite Hazardous Waste Treatment Notification - Facility page and one set of Onsite Hazardous Waste Treatment Notification - Unit pages for each unit.
12. **FINANCIAL ASSURANCE** Check the appropriate box to indicate whether your facility is subject to financial assurance requirements for closure of an onsite treatment unit. Unless they are exempt, Permit by Rule (PBR) and Conditionally Authorized (CA) operations are required to provide financial assurance for closure costs (per 22 CCR §67450.13 (b) and HSC §25245.4). If your facility is subject to financial assurance requirements or claiming an exemption, then complete the Certification of Financial Assurance page.
13. **REMOTE WASTE CONSOLIDATION SITE** Check the appropriate box to indicate whether your facility consolidates hazardous waste generated at a remote site. Answer "YES" if you are a hazardous waste generator that collects hazardous waste at remote sites and transports the hazardous waste to a consolidation site you also operate. You must be eligible pursuant to the conditions in HSC §25110.10. If your facility consolidates hazardous waste generated at a remote site, then complete the Remote Waste Consolidation Site Annual Notification page.
14. **HAZARDOUS WASTE TANK CLOSURE** Check the appropriate box to indicate whether the tank being closed would be classified as hazardous waste after its contents are removed. Classification could be based on your knowledge of the tank and its contents, the mixture rule, testing of the tank, the listed wastes in 40 CFR 261.31 or 40 CFR 261.32, or inability to remove hazardous materials stored in the tank. If the closed tank would be classified as hazardous waste, then complete the Hazardous Waste Tank Closure Certification page.
- 15a. **LOCAL REQUIRED INFORMATION: REGULATED SUBSTANCES (RS)** Check the box to indicate whether Regulated Substances (RS) are stored onsite. An RS is any substance, listed in CCR, Title 19, Section 2770.5. See attached Regulated Substance list. If you handle an RS at greater than the threshold planning quantities then complete the Regulated Substance Registration in addition to forms required under item number 4.
- 15b. **LOCAL HAZARDOUS MATERIALS THRESHOLD** Check the appropriate box to indicate if you are subject to reporting hazardous materials at a level established by your local CUPA or PA. Check with your local CUPA or PA for details.
- 15c. **LOCAL REQUIRED INFORMATION: HAZARDOUS WASTE** Check the "yes" box if your facility answered yes to item number 9 and generates hazardous waste. If you checked the "yes" box, complete the Hazardous Waste Generator Form (LA County).

**INSTRUCTIONS FOR THE UNIFIED PROGRAM (UP) FORM
HAZARDOUS WASTE GENERATOR PAGE (LA COUNTY)**

The waste generator page is used to identify your generator status and all waste streams generated at your facility.

1. **FACILITY ID NUMBER** Leave this blank. The Certified Unified Program Agency assigns this number (CUPA) and identifies your facility.
2. **EPA ID #** If you generate, recycle, or treat hazardous waste, enter your facility's 12-character U.S. Environmental Protection Agency (U.S. EPA) or California identification number. For facilities in California, the number usually starts with the letters "CA". If you do not have a number, contact the Department of Toxic Substances Control (DTSC) at (916) 324-1781, (800) 61-TOXIC or (800) 61-86942, to obtain one.

3. **BUSINESS NAME** Enter the full legal name of the business.

133b. **NUMBER OF EMPLOYEES** Enter the total number of employees currently working at your facility.

A. **TYPE OF GENERATOR** Check the box that most closely apply to your facility.

RCRA GENERATOR Check the box that best describes the amount of Federal listed and regulated hazardous waste generated by your facility. Leave blank if your facility doesn't generate hazardous waste regulated under Subtitle C of RCRA (the Resource Conservation and Recovery Act of 1976).

NON - RCRA GENERATOR Check the box that that best describes the amount of California-only listed and regulated hazardous waste generated by your facility. Leave blank if your facility doesn't generate non-RCRA hazardous waste.

Boxes include:

- ◆ Large Quantity Generator (greater than 1000 kg per Hazardous Waste per month)
- ◆ Small Quantity Generator (less than 1000 kg per month but greater than 100 kg Hazardous Waste per month)
- ◆ Conditionally Exempt Small Quantity Generator (less than 100 kg Hazardous Waste per month)

Note:

1. 1 kg = 2.2 lbs.
2. For Acutely Hazardous Waste or Extremely Hazardous Waste, facilities that generate greater than 1 kg per month are considered Large Quantity Generators and facilities that generate less are considered Conditionally Exempt Small Quantity Generators.

B. **PROCESS** Briefly describe all processes that generate hazardous waste(s) at your facility. Example: plating, machining, painting, etc.

C. **WASTE DESCRIPTION** Describe the type of waste that is generated from each process listed. Example: heavy metal sludge, waste oil, etc.

D. **WASTE ID** List the Waste ID #'s for all RCRA and non-RCRA hazardous waste. Refer to 22 CCR § 66261.126.

E. **AMOUNT PER YEAR** List the amount of hazardous waste generated from each separate process in kilograms, pounds, gallons, or tons per year.

F. **STORAGE METHOD** Enter the letter that corresponds to the type of storage used at your facility for each of the hazardous waste streams listed.

- A = Drums
- B = Underground Tank
- C = Aboveground Tank
- D = Waste Pile
- E = In Process Equipment

G. **DISPOSAL METHOD** Enter the letter in the space provided to describe the disposal method used at your facility for each of the hazardous waste streams listed.

- A = Treatment Onsite
- B = Treatment Offsite
- C = Recycle Onsite
- D = Recycle Offsite

H. **OWNER/OPERATOR NAME** Indicate the name of the person who signed the form.

I. **OWNER/OPERATOR TITLE** Indicate the title of the person who signed the form.

J. **DATE** Indicate the date the form was signed.

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Phillip Lee	
Of: Subject – General Manager (Jamison Services, Inc.)	
Location: Los Angeles, CA	Phone: (213) 624-2891
Recorded By: Carol Noland	Of: IVI
At (time): 10:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
Summary of Communication: Mr. Lee is the General Manager of the Subject, but has only been at the site for 3 months. He indicated that the Subject was constructed in 1973, but had no other information regarding the site history.	
Mr. Lee knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 1	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Jeff Jorgensen	
Of: Subject – Chief Engineer (Jamison Services, Inc.)	
Location: Los Angeles, CA	Phone: (213) 265-1968
Recorded By: Carol Noland	Of: IVI
At (time): 10:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
<p>Summary of Communication: Mr. Jorgensen has been the Chief Engineer at the Subject since 2000. He indicated that the Subject was constructed in 1973, but had no other information regarding the site history.</p> <p>Mr. Jorgensen accompanied IVI on the site inspection, and provided information regarding the on-site building systems, including the emergency generators and elevators. He had no knowledge of any USTs at the Subject, but pointed out the locations of the on-site ASTs, grease interceptors, and sump pumps. He also provided information regarding the small quantity of waste oil which is generated at the Subject. Mr. Jorgensen knew of no significant environmental issues associated with the Subject.</p>	
Conclusions/Required Action/Follow-up: no	
ROC 2	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Sam	
Of: Subject – Owner, Kodak Express Digital Solutions	
Location: Los Angeles, CA	Phone: (213) 629-4000
Recorded By: Carol Noland	Of: IVI
At (time): 10:00 am	On (date): December 12, 2012
Re: Hazardous waste generation	
Summary of Communication: Sam is the current owner of Kodak Express. He indicated that he does very little processing of film, but pointed out the developing chemicals and the solver recovery equipment. He stated that the spent chemicals and silver are picked up every 6 months by ERSI. He knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no	
ROC 3	

RECORD OF COMMUNICATION	
Site Name: 700 Flower and 711 Hope	Location (city): Los Angeles, CA
Communication with: Ian Gee	
Of: Subject – General Manager, Sheraton Hotel	
Location: Los Angeles, CA	Phone: (213) 488-3500
Recorded By: Carol Noland	Of: IVI
At (time): 11:00 am	On (date): December 12, 2012
Re: General knowledge of the site	
Summary of Communication: Mr. Gee is the General Manager of the Sheraton Hotel and has been at the site for over 4 years. He had no information regarding the site history. He also knew of no significant environmental issues associated with the Subject.	
Conclusions/Required Action/Follow-up: no

Asbestos Operations and Maintenance Plan

The Bloc

700 South Flower/750 West 7th Street

September 2014

Prepared for:
The Bloc

CERTIFICATION AND LIMITATION STATEMENT

This document was prepared by Mr. John Mitchell, California Certified Asbestos Consultant, CAC 97-2289, and Mr. Kevin Riley, NV-1JPM-1674. This document was prepared for NREA-TRC 700 LLC in compliance with federal, state and local asbestos regulations. This Operations and Maintenance (O&M) plan is dynamic and should be continuously modified and updated to reflect changing conditions and materials in the field.

Environmental Testing Associates, (ETA) prepared the O&M plan based on a combination of previous asbestos inspection data prepared and provided by others along with limited asbestos investigation performed at the property during the due diligence stage prior to the purchase of the property. Except as set forth in a separate agreement, ETA makes no representations regarding the accuracy of the referenced data and will not be held responsible for any incidental or consequential loss or punitive damages including but not limited to, loss of profits or revenues, loss of use of a facility or land, delay in construction or action of regulatory agencies

REVIEW AND APPROVAL

We, the undersigned, approve the Asbestos Operations and Maintenance Plan for The Bloc located at 700 South Flower Street/750 West 7th Street, Los Angeles, California.

Certified Asbestos Consultant:

GLOSSARY OF TERMS

AHERA: Asbestos Hazard Emergency Response Act, Implemented 1986

Air erosion: the passage of air over friable ACBM which may result in the release of asbestos fibers.

Asbestos: the asbestiform varieties of Chrysotile (serpentine); crocidolite (riebeckite); amosite (cummingtonitegrunerite); anthophyllite; tremolite; and actinolite.

Asbestos-containing material (ACM): any material or product which contains more than 1 percent asbestos.

Asbestos-containing building material (ACBM): surfacing ACM, thermal system insulation ACM, or miscellaneous ACM that is found in or on interior structural members or other parts of a school building.

Asbestos debris: pieces of ACBM that can be identified by color, texture, or composition, or means dust, if the dust is determined by an accredited inspector to be ACM.

Damaged friable miscellaneous ACM: friable miscellaneous ACM which has deteriorated or sustained physical injury such that the internal structure (cohesion) of the material is inadequate or, if applicable, which has delaminated such that its bond to the substrate (adhesion) is inadequate or which for any other reason lacks fiber cohesion or adhesion qualities. Such damage or deterioration may be illustrated by the separation of ACM into layers; separation of ACM from the substrate; flaking, blistering, or crumbling of the ACM surface; water damage; significant or repeated water stains, scrapes, gouges, mars or other signs of physical injury on the ACM. Asbestos debris originating from the ACBM in question may also indicate damage.

Damaged friable surfacing ACM: friable surfacing ACM which has deteriorated or sustained physical injury such that the internal structure (cohesion) of the material is inadequate or which has delaminated such that its bond to the substrate (adhesion) is inadequate, or which, for any other reason, lacks fiber cohesion or adhesion qualities. Such damage or deterioration may be illustrated by the separation of ACM into layers; separation of ACM from the substrate; flaking, blistering, or crumbling of the ACM surface; water damage; significant or repeated water stains, scrapes, gouges, mars or other signs of physical injury on the ACM. Asbestos debris originating from the ACBM in question may also indicate damage.

Damaged or significantly damaged thermal system insulation ACM: thermal system insulation ACM on pipes, boilers, tanks, ducts, and other thermal system insulation equipment where the insulation has lost its structural integrity, or its covering, in whole or in part, is crushed, water-stained, gouged, punctured, missing, or not intact such that it is not able to contain fibers. Damage may be further illustrated by occasional punctures, gouges or other signs of physical injury to ACM; occasional water damage on the protective coverings/jackets; or exposed ACM ends or joints. Asbestos debris originating from the ACBM in question may also indicate damage.

Encapsulation: the treatment of ACBM with a material that surrounds or embeds asbestos fibers in an adhesive matrix to prevent the release of fibers, as the encapsulant creates a membrane over the surface (bridging encapsulant) or penetrates the material and binds its components together (penetrating encapsulant).

Enclosure: an airtight, impermeable, permanent barrier around ACBM to prevent the release of asbestos fibers into the air.

EPA Worker Protection Rule: extends the protection afforded by OSHA to all employees in asbestos abatement who may have been excluded from protection by OSHA.

Fiber release episode: any uncontrolled or unintentional disturbance of ACBM resulting in visible emission.

Friable: when referring to material in a school building means that the material, when dry, may be crumbled, pulverized, or reduced to powder by hand pressure, and includes previously nonfriable material after such previously nonfriable material becomes damaged to the extent that when dry it may be crumbled, pulverized, or reduced to powder by hand pressure.

Friable asbestos-containing material (ACM): any material containing more than one percent asbestos which has been applied on ceilings, walls, structural members, piping, duct work, or any other part of a building, which when dry, may be crumbled, pulverized, or reduced to powder by hand pressure. Includes non-friable asbestos-containing material after such previously non-friable material becomes damaged to the extent that when dry it may be crumbled, pulverized, or reduced to powder by hand pressure.

Friable asbestos-containing building material (ACBM): any friable ACM that is in or on interior structural members or other parts of a school or public and commercial building.

Functional space: a room, group of rooms, or homogeneous area (including crawl spaces or the space between a dropped ceiling and the floor or roof deck above), such as classroom(s), a cafeteria, gymnasium, hallway(s), designated by a person accredited to prepare management plans, design abatement projects, or conduct response actions.

High-efficiency particulate air (HEPA): refers to a filtering system capable of trapping and retaining at least 99.97 percent of all monodispersed particles 0.3 μ m in diameter or larger.

Homogeneous area: an area of surfacing material, thermal system insulation material, or miscellaneous material that is uniform in color and texture.

Inspection: an activity undertaken in a school building, or a public and commercial building, to determine the presence or location, or to assess the condition of, friable or non-friable asbestos-containing building material (ACBM) or suspected ACBM, whether by visual or physical examination, or by collecting samples of such material. This term includes re-inspections of friable and non-friable known or assumed ACBM which has been previously identified. The term does not include the following:

- 1) Periodic surveillance of the type described in 40 CFR 763.92(b) solely for the purpose of recording or reporting a change in the condition of known or assumed ACBM;
- 2) Inspections performed by employees or agents of Federal, State, or local government solely for the purpose of determining compliance with applicable statutes or regulations; or
- 3) Visual inspections of the type described in 40 CFR 763.90(i) solely for the purpose of determining completion of response actions.

Major fiber release episode: any uncontrolled or unintentional disturbance of ACBM, resulting in a visible emission, which involves the falling or dislodging of more than 3 square or linear feet of friable ACBM.

Management Plan: a site-specific guidance document that the responsible person must follow in managing the ACBM present in a subject property.

Minor fiber release episode: any uncontrolled or unintentional disturbance of ACBM, resulting in a visible emission, which involves the falling or dislodging of 3 square or linear feet or less of friable ACBM.

Miscellaneous ACM: other, mostly nonfriable ACM, products and materials (found on structural components, structural members or fixtures) such as floor tile, ceiling tile, construction mastic for floor and ceiling materials, sheet flooring, fire doors, asbestos cement pipe and board, wallboard, acoustical wall tile, and vibration damping cloth.

Miscellaneous material: interior building material on structural components, structural members or fixtures, such as floor and ceiling tiles, and does not include surfacing material or thermal system insulation.

Nonfriable: material in a building which when dry may not be crumbled, pulverized, or reduced to powder by hand pressure.

Operations and maintenance program: a program of work practices to maintain friable ACBM in good condition, ensure clean-up of asbestos fibers previously released, and prevents further release by minimizing and controlling friable ACBM disturbance or damage.

PACM: Presumed Asbestos Containing Materials.

Potential damage: circumstances in which:

- 1) Friable ACBM is in an area regularly used by building occupants, including maintenance personnel, in the course of their normal activities.
- 2) There are indications that there is a reasonable likelihood that the material or its covering will become damaged, deteriorated, or delaminated due to factors such as changes in building use, changes in operations and maintenance practices, changes in occupancy, or recurrent damage.

Potential significant damage: circumstances in which:

- 1) Friable ACBM is in an area regularly used by building occupants, including maintenance personnel, in the course of their normal activities.
- 2) There are indications that there is a reasonable likelihood that the material or its covering will become significantly damaged, deteriorated, or delaminated due to factors such as changes in building use, changes in operations and maintenance practices, changes in occupancy, or recurrent damage.
- 3) The material is subject to major or continuing disturbance, due to factors including, but not limited to, accessibility or, under certain circumstances, vibration or air erosion.

Preventive measures: actions taken to reduce disturbance of ACBM or otherwise eliminate the reasonable likelihood of the material's becoming damaged or significantly damaged.

Public and commercial building: the interior space of any building which is not a school building, except that the term does not include any residential apartment building of fewer than 10 units or detached single-family homes. The term includes, but is not limited to: industrial and office buildings, residential apartment buildings and condominiums of 10 or more dwelling units, government-owned buildings, colleges, museums, airports, hospitals, churches, preschools, stores, warehouses and factories. Interior space includes exterior hallways connecting buildings, porticos, and mechanical systems used to condition interior space.

Removal: the taking out or the stripping of substantially all ACBM from a damaged area, a functional space, or a homogeneous area in a school building.

Repair: returning damaged ACBM to an undamaged condition or to an intact state so as to prevent fiber release.

Response action: a method, including removal, encapsulation, enclosure, repair, operations and maintenance that protect human health, and the environment from friable ACBM.

Routine maintenance area: an area, such as a boiler room or mechanical room that is not normally frequented by students and in which maintenance employees or contract workers regularly conduct maintenance activities.

School: any elementary or secondary school as defined in section 198 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 2854).

School building:

- 1) Any structure suitable for use as a classroom, including a school facility such as a laboratory, library, school eating facility, or facility used for the preparation of food.
- 2) Any gymnasium or other facility which is specially designed for athletic or recreational activities for an academic course in physical education.
- 3) Any other facility used for the instruction or housing of students or for the administration of educational or research programs.
- 4) Any maintenance, storage, or utility facility, including any hallway, essential to the operation of any facility described in this definition of "school building" under paragraphs (1), (2), or (3).
- 5) Any portico or covered exterior hallway or walkway.
- 6) Any exterior portion of a mechanical system used to condition interior space.

Significantly damaged friable miscellaneous ACM: damaged friable miscellaneous ACM where the damage is extensive and severe.

Significantly damaged friable surfacing ACM: damaged friable surfacing ACM in a functional space where the damage is extensive and severe.

Small-scale, short-duration activities (SSSD): tasks such as, but not limited to:

- 1) Removal of asbestos-containing insulation on pipes.
- 2) Removal of small quantities of asbestos-containing insulation on beams or above ceilings.
- 3) Replacement of an asbestos-containing gasket on a valve.
- 4) Installation or removal of a small section of drywall.
- 5) Installation of electrical conduits through or proximate to asbestos-containing materials.

SSSD can be further defined by the following considerations:

- 1) Removal of small quantities of ACM only if required in the performance of another maintenance activity not intended as asbestos abatement.
- 2) Removal of asbestos-containing thermal system insulation not to exceed amounts greater than those which can be contained in a single glove bag.
- 3) Minor repairs to damaged thermal system insulation which do not require removal.
- 4) Repairs to a piece of asbestos-containing wallboard.
- 5) Repairs, involving encapsulation, enclosure, or removal, to small amounts of friable ACM only if required in the performance of emergency or routine maintenance activity and not intended solely as asbestos abatement. Such work may not exceed amounts greater than those which can be contained in a single prefabricated mini-enclosure. Such an enclosure shall conform spatially and geometrically to the localized work area, in order to perform its intended containment function.

Surfacing ACM: interior ACM that has been sprayed on, troweled on, or otherwise applied to surfaces (structural members, walls, ceilings, etc.) for acoustical, decorative, fireproofing, or other purposes. Surfacing material that is ACM.

Surfacing material: material in a school building that is sprayed-on, troweled-on, or otherwise applied to surfaces, such as acoustical plaster on ceilings and fireproofing materials on structural members, or other materials on surfaces for acoustical, fireproofing, or other purposes.

Thermal system insulation TSI: material in a school building applied to pipes, fittings, boilers, breeching, tanks, ducts, or other interior structural components to prevent heat loss or gain, or water condensation, or for other purposes.

Thermal system insulation ACM: insulation used to control heat transfer or prevent condensation on pipes and pipe fittings, boilers, breeching, tanks, ducts, and other parts of hot and cold water systems; heating, ventilation, and air-conditioning (HVAC) systems; or other mechanical systems that is ACM.

Vibration: the periodic motion of friable ACBM which may result in the release of asbestos fibers.

EXECUTIVE SUMMARY

This Asbestos Operations and Maintenance (O&M) Plan was prepared for The Bloc by Environmental Testing Associates, Incorporated. The Asbestos O&M Plan prescribes a program for controlling exposure to asbestos in the recently purchased mixed-use structure. The principal elements of this program involve requirements and responsibilities for material identification (surveys), employee notifications, proper work procedures for activities that the potential to disturb ACM and proper disposal of asbestos waste. The following Table – 1 describes the buildings/areas including in this plan.

TABLE - 1
BUILDINGS/AREAS INCLUDED IN THE 2014 ASBESTOS O&M PLAN

Building/Area	Description	Year of Construction	Date(s) Surveyed
700 South Flower/750 West 7th Street	Office Spaces		December 2012
750 West 7th Street	Retail Spaces		December 2012
700 South Flower/750 West 7th Street	Parking Components		December 2012

The Asbestos O&M Plan was prepared for the NREA-TRC 700 LLC Asbestos Management Program. The objective of the NREA-TRC 700 LLC Asbestos Management Program is to limit personnel exposure to airborne asbestos fibers in occupied NREA-TRC 700 LLC buildings and work spaces through cost-effective management of ACM. The program contains the following three key elements:

- Survey and material evaluation
- O&M program
- Design and abatement

This Asbestos O&M Plan was written and developed in accordance with the United States Environmental Protection Agency (EPA) Managing Asbestos in Place (Green Book), EPA Guidance for Controlling Asbestos-Containing Materials in Buildings (Purple Book), 40 CFR 61 Subpart M National Emissions Standards for Hazardous Air Pollutants (NESHAP) Asbestos Regulations, 40 CFR 763 Subpart G Asbestos Worker Protection, 29 CFR 1910.134 Respiratory Protection, 29 CFR 1910.1001 Asbestos in General Industry Standard, 29 CFR 1926.1101 Asbestos, and SCAQMD Rule 1403. Work practices and procedures dealing with asbestos will be performed in accordance with the referenced guidance documents and regulations.

This O&M plan will remain effective until all ACM or presumed asbestos-containing material (PACM) is removed from the locations listed in Table - 1 or until the buildings containing asbestos are demolished. ETA has been designated Asbestos Program Manager (APM) and is an accredited Asbestos Hazard

Emergency Response Act (AHERA) Building Inspector, Management Planner, and Project Designer. The APM will implement this O&M Plan and update it as necessary. The APM shall perform the following tasks:

- Notify building occupants of buildings with ACM via memo or asbestos awareness training.
- Ensure that workers directly involved in ACM abatement activities are EPA-accredited.
- Provide contractors/contract workers who may come in contact with asbestos with information regarding the exact location of ACM in their work vicinity.
- Post warning labels directly on ACM. If direct labeling is not possible, post a warning sign on the entry doors. Post warning signs on the doors of all mechanical rooms where ACM may be encountered.
- Conduct periodic surveillance of ACM to identify changes in condition until ACM is removed for abatement, maintenance, renovation, or demolition.
- Ensure that South Coast Air Quality Management District (SCAQMD) notification application for asbestos removal is properly completed and that authorization is given prior to the start of any asbestos work.
- Review and approve work plans written for asbestos abatement or O&M work prior to the beginning of work activities.
- Ensure that asbestos work activities are performed in accordance with federal, state and local rules, regulations, and requirements.

SECTION 1 INTRODUCTION

1.1 OBJECTIVE

The O&M plan is one of the key elements of the NREA-TRC 700 LLC Asbestos Management Program. The O&M Plan provides a responsible alternative to asbestos removal by developing a proactive, in-place management program for asbestos present in and around NREA-TRC 700 LLC buildings. The objective of the O&M Plan is to ensure that personnel are properly trained and protected from asbestos exposure caused by inadvertent disturbance of asbestos-containing material (ACM). The O&M Plan provides NREA-TRC 700 LLC with a living document for the purposes of managing and recording asbestos-related actions.

The O&M plan minimizes the exposure of building occupants, maintenance workers, and contractors to asbestos fibers by establishing work practices and procedures with the following purposes:

- Maintain existing ACM in good condition.
- Ensure proper clean-up of asbestos fibers previously released.
- Prevent further release of asbestos fibers.
- Monitor the condition of ACM.

The O&M Plan specifies the requirements for the management of ACM, including surfacing material, thermal system insulation, floor and ceiling tiles, fabrics, etc. Both friable and non-friable materials are to be monitored and managed appropriately.

Federal and state regulations require friable and non-friable ACM that may become friable during disturbance to be removed from buildings before demolition or renovation that will disturb ACM or presumed asbestos-containing material (PACM). The O&M plan does not present a permanent solution, but covers only management in place and the intentional disruption of ACM for repair or removal of small areas of significantly damaged material, or small areas where removal is necessary to facilitate maintenance/renovation activities.

1.2 O&M PLAN ELEMENTS

As specified by the *Managing Asbestos in Place* (Green Book), United States Environmental Protection Agency (EPA), an O&M plan includes the following seven elements:

- **Notification:** A program to notify building occupants, maintenance and custodial personnel, visitors, and contractors of the location of ACM and to identify procedures to avoid disturbing ACM.

- **Periodic Surveillance/Re-inspection:** Regular surveillance of ACM to note, assess, and document changes in condition. Perform periodic surveillance on an annual basis, in conjunction with the annual building safety or facility inspection. Document and report changes in the condition of ACM to the Asbestos Program Manager (APM). In addition, EPA-certified inspectors shall perform a complete re-inspection every three years.
- **Work Controls/Permits:** A system to review all work requests or trouble tickets for the likelihood of disturbing ACM.
- **Work Practices:** Establish work practices to avoid or minimize asbestos fiber release during activities that affect ACM. Work practices are detailed in *Guidance Manual: Asbestos Operations & Maintenance Work* (National Institute of Building Sciences [NIBS] *and the Green Book*).
- **Recordkeeping:** Document all O&M activities including the inspection and collection of survey data that documents the physical condition of the ACM, any response and abatement actions, employee training, and medical and respiratory program information.
- **Training:** Train personnel involved with ACM management, as follows: 1) the APM and asbestos removal workers shall receive training in accordance with EPA regulations and accredited courses; and 2) maintenance and custodial personnel whose work activities may result in the disturbance of ACM shall receive training in proper O&M procedures in accordance with EPA regulations. Proper training reduces disturbance of ACM and asbestos fibers.
- **Worker Protection:** Requirements are set forth in Federal and California Occupational Safety and Health Administration medical and respiratory standards.

1.2.1 ACM CATEGORIES

This O&M Plan addresses ACM present in buildings. A material is considered to contain asbestos if the material contains more than one percent asbestos as specified by 40 CFR Part 763. ACM is classified in one of the three following categories:

- **Surfacing Material:** Examples include ACM sprayed or troweled onto surfaces, such as decorative plaster on ceilings, acoustical ACM on the underside of concrete slabs or decking, and fireproofing materials on structural members.
- **Thermal System Insulation (TSI):** Examples include ACM applied to pipes, boilers, tanks, and ducts to prevent heat loss or gain, or condensation.
- **Miscellaneous ACM:** Examples include asbestos-containing ceiling or floor tiles, textiles, and other components such as asbestos-cement panels, asbestos siding, transite panels, and roofing materials.

This O&M Plan includes those materials not tested but presumed to contain asbestos, or PACM, and considers ACM and PACM to be equivalent. Only laboratory analysis of bulk samples, conducted by an accredited laboratory, can demonstrate that PACM is non-asbestos-containing; otherwise, all asbestos regulatory requirements apply to PACM.

1.3 SCOPE

This O&M Plan provides the framework for NREA-TRC 700 LLC to manage and document asbestos-related actions. An active and aggressive program as outlined in the O&M Plan and implemented by the APM protects personnel by ensuring that ACM or PACM is tested before a maintenance or repair operation disturbs it, and that proper work practices are employed whenever ACM is disturbed. This O&M defines three types of projects:

- **Those unlikely to involve any direct contact with ACM**, such as routine cleaning of shelves and counter tops or other surfaces in a building (provided ACM debris is not present). Generally, such activities would not disturb ACM.
- **Those that may cause accidental disturbance of ACM**, such as maintenance work above a suspended ceiling in an area that may have surfacing ACM overhead.
- **Those that involve minor disturbances of ACM** (maintenance, repair, or installation projects involving less than 25 linear feet of TSI or less than 10 square feet of surfacing ACM), such as the installation of new light fixtures on, or in, an ACM ceiling. Another example is a single glove bag operation to remove a small amount of TSI to repair a pipe in a boiler room.

OSHA defines the following four classes of asbestos work:

- **Class I:** Activities involving the removal of TSI and surfacing ACM and PACM.
- **Class II:** Activities involving the removal of ACM or PACM that is not TSI or surfacing material. This includes removal of floor tile, roofing products, construction mastics, etc.
- **Class III:** Repair and maintenance operations likely to disturb ACM or PACM.
- **Class IV:** Custodial and housekeeping operations where minimal contact with ACM or PACM may occur.

Larger scale projects (Classes I and II) involving more complex procedures for the intentional removal of ACM are considered asbestos abatement projects and include ACM removal prior to demolition and enclosure during renovation. These projects require asbestos control and abatement procedures that are outside the scope of this O&M Plan but require an update to inventory records to document changes in condition, amount, and accessibility. Contracted projects require the abatement contractor to forward copies of updated building drawings to the APM that document the locations of removed and remaining ACM, NESHAP notifications, disposal records, and final air clearance sampling results.

1.4 APPLICABLE STANDARDS AND GUIDANCE DOCUMENTS

Federal, state, and local regulations provide the basis for developing an activity's O&M plan. Table 1-1 identifies asbestos regulations applicable to NREA-TRC 700 LLC. Summaries of those regulations are presented in Appendix A. Utilize these standards as references for the O&M plan. Because rules and regulations affecting asbestos management are constantly revised, some conflicting information may be found within the listed documents. In such cases, follow the more restrictive requirement or guideline.

Table 1-2 shows the applicability of state and local requirements to Navy activities conducting asbestos removal and disposal. Appendix A provides additional Federal regulation guidance.

**TABLE 1-1
APPLICABLE STANDARDS AND GUIDANCE**

REGULATION/ GUIDANCE	TYPE	CITATION	REMARKS
NESHAP Subpart M	Federal Regulation	40 CFR 61	<ul style="list-style-type: none"> Regulates asbestos demolition, construction, and removal activities. Defines friable and non-friable asbestos at 1% by area.
Ca/OSHA	State Regulation	Title 8 CCR 1529	<ul style="list-style-type: none"> Defines ACCM as any manufactured construction material which contains more than one tenth of 1 percent asbestos by weight.
South Coast Air Quality Management District	State/Local Regulation	40 CFR Part 61	<ul style="list-style-type: none"> Enforces NESHAP requirements.

1.5 BACKGROUND AND ASBESTOS SURVEYS

This Asbestos O&M Plan was prepared by ETA for NREA-TRC 700 LLC under the supervision of the Certified Asbestos Consultant, John Mitchell. The O&M Plan is geared toward the management and maintenance of materials, assumed or confirmed to contain asbestos, identified in the asbestos surveys and will be updated as required by subsequent building inspections and re-inspections.

Use the previous Asbestos Survey Reports to determine the specific locations and conditions of ACM.

**FIGURE 1-1
HOW TO MANAGE ACM**

SECTION 2 ASBESTOS PROGRAM MANAGER

NREA-TRC 700 LLC has appointed ETA as the APM. To implement all aspects of the asbestos program, the APM shall be properly qualified through training and experience. ETA is an Asbestos Hazard Emergency Response Act (AHERA) Certified Building Inspector, Management Planner, and Project Designer. Contact information for ETA is presented in Table 2-1.

The APM is actively involved in asbestos-control activities and has the authority to oversee inspections, O&M activities, and abatement actions. The APM shall provide training for building workers performing O&M procedures. In addition, the APM shall verify that custodial and maintenance staffs, contractors, and outside service vendors are in compliance with current asbestos regulations when performing asbestos-related activities. Maintenance and repair activities dealing with ACM, whether friable or non-friable, are to be approved by the APM prior to implementation.

The APM shall implement the following procedures:

- Initiate the provisions of this O&M plan.
- Ensure the proper cleanup of damaged ACM.
- Initiate monitoring and surveillance of identified ACM and ACCM.
- Initiate and define regulated areas to control unauthorized access to ACM.
- Assess the need for other control measures.
- Oversee abatement projects if additional corrective action is necessary.

The duties and responsibilities of the APM will continue until all ACM is removed from all NREA-TRC 700 LLC buildings.

2.1 ASBESTOS CONTROL PROGRAM OVERSIGHT COMMITTEE

This O&M Plan establishes an Asbestos Control Program Oversight Committee. The committee meets when appropriate to discuss current and upcoming projects that impact asbestos. The APM is responsible for establishing a meeting time and place.

The committee shall comprise the APM, Respiratory Protection Program Manager (RPPM), Industrial Hygienist, and representatives of the Facilities Management Department, the Safety Department, and all other offices involved in asbestos management. Members of the committee are listed in Table 2-1.

**TABLE 2-1
ASBESTOS OVERSIGHT COMMITTEE MEMBERS**

TITLE	NAME	DEPARTMENT	PHONE
APM	ETA	Environmental Testing Associates	800-550-7806
Facilities Manager			
RPPM	ETA	Environmental Testing Associates	800-550-7806
Industrial Hygienist	ETA	Environmental Testing Associates	800-550-7806
Safety Manager

ENVIRONMENTAL			X				X							
COUNTY AGENCIES							X	X						X
BUDGET								X						
ADMIN. SERVICES			X											

The following numbered paragraphs correspond to the numbered responsibilities presented in Table 2-2.

1. **Program Oversight:** The APM will administer, as well as ensure, regulatory compliance for asbestos-related projects accomplished at NREA-TRC 700 LLC buildings. In addition, the APM will provide technical support to customers in conjunction with inspection, sampling, awareness training, etc.
2. **Inventory:** NREA-TRC 700 LLC will maintain records from completed asbestos building inventories. Additional inventories and sample collections shall be completed by AHERA-Certified Inspectors. Information from these surveys shall be incorporated by the APM into the inventory record. Periodic re-inspections will be performed according to applicable regulations.
3. **Training:** The APM will work with the Facilities Department to ensure applicable personnel certifications are current and to conduct awareness training when and where applicable. The Safety Office will be responsible for issues related to the respirator program. Administrative services will procure outside training vendors as necessary and assist in recordkeeping for asbestos-related training, certification, and respirator program documentation.

4. **Project Initiation:** Asbestos abatement projects are either customer-generated or submitted by the APM and Facilities.
5. **Project Design:** The APM will participate in support of project design by Facilities (Building) Maintenance.
6. **Abatement Plan:** The APM will consult with the Industrial Hygiene, Safety, and Facilities (Building) Maintenance offices during the preparation of abatement plans. (An AHERA-Certified Project Designer must approve abatement plans submitted for projects to be accomplished by Facilities Maintenance personnel.) Abatement projects being performed by contractor personnel require submittal of an abatement plan, proof of certification for personnel and equipment, and a copy of the permit package.
7. **Environmental Compliance:** The APM shall assume responsibility for all compliance issues regarding county, state, federal, and local regulations relative to asbestos and asbestos abatement policies and procedures at NREA-TRC 700 LLC. Facilities is responsible for complying with county, state, federal and local asbestos regulations while performing or overseeing asbestos and asbestos abatement projects at NREA-TRC 700 LLC. Contracts shall require adherence to county, state, federal and local asbestos regulations and requirements on all asbestos and asbestos abatement projects.
8. **Permitting:** The APM shall ensure that required permitting is accomplished.
9. **Notification:** The APM will notify building occupants, custodial workers, contractors, and maintenance staff of the presence and condition of ACM, and of the need to avoid disturbance of ACM. The Facilities Maintenance Division or contractors performing asbestos abatement or O&M activities will be required to notify building occupants prior to beginning the project.
10. **Abatement:** During asbestos abatement projects, the Facilities-provided Competent Person (CP) or contractor CP will have authority over abatement actions. The CP is responsible for ensuring that the entire abatement conforms to the approved abatement plan and all county, state, federal and local asbestos regulations and the policies of NREA-TRC 700 LLC. Facilities and the APM will perform oversight of the contractor CP and abatement projects.
11. **Worker Protection:** The CP will assume responsibility for the safety of his crew during all phases of the abatement. The APM will coordinate with the CP and the Safety Office on related issues in conjunction with abatement operations.
12. **Air Sampling:** The Industrial Hygienist is responsible for any air monitoring deemed necessary by the APM in conjunction with work performed. Contractors are responsible for conducting any air monitoring required in association with an abatement project. Contractors shall provide copies of air monitoring sample analyses to the APM.
13. **Materials:** The APM will support the Facilities Maintenance Division with technical data concerning required equipment, type, and location of materials affected by abatement or O&M projects. Facilities Maintenance or the contractor will be responsible for maintaining an adequate inventory of supplies and equipment.
14. **Disposal:** All applicable regulations shall apply to the disposal of ACM. Disposal of non-friable ACM will be coordinated with the Environmental Protection Specialist for disposal.

SECTION 3 NOTIFICATION

The APM notifies building tenants, occupants, maintenance workers, and contractors about the location and physical condition of ACM that they might disturb, and about the need to avoid disturbing the ACM. Notification informs people of the potential hazards in the vicinity. Informed persons are less likely to unknowingly disturb ACM and cause the release of fibers into the air. Methods of notification and specific information given depend on the type, location, and condition of ACM.

NREA-TRC 700 LLC or the APM shall inform employees how to avoid disturbing ACM and who to contact if they detect damaged ACM. New employees are provided asbestos awareness notification during the new hire orientation program before they begin work.

Additional notification may also be made in writing or by posting signs or labels. Clear lines of communication with building occupants, custodial workers, contractors, and maintenance staff is an integral part of this O&M Plan. This approach, along with information regarding the presence, location, and condition of ACM, encourages understanding that the presence of asbestos is not necessarily hazardous and that ACM can be effectively managed in place.

3.1 NOTIFICATION REQUIREMENTS

In regulated service and maintenance areas, such as boiler rooms, or areas known to contain friable damaged ACM, place signs that state: "**Caution - Contains Asbestos Fibers**" adjacent to the ACM to alert and remind contractors and maintenance staff of the presence of ACM. In areas with boilers or pipes, or other service areas where the potential for damage to ACM may occur, place prominent warning signs next to or on the ACM.

The APM conducts information briefings to reinforce and clarify written notices and signs, and to provide an opportunity to answer questions. Persons likely to disturb ACM are included in the notification program. The NREA-TRC 700 LLC informs new employees about the presence of ACM before they begin work. The specific information the APM provides for each building depends on the tasks of the building occupants and service workers. NREA-TRC 700 LLC is required to notify all potentially exposed personnel about asbestos hazards via warning signs and labels.

The APM determines the notification method used to notify building occupants, custodial workers, contractor, and maintenance staff. The information method, at a minimum, shall contain the following information:

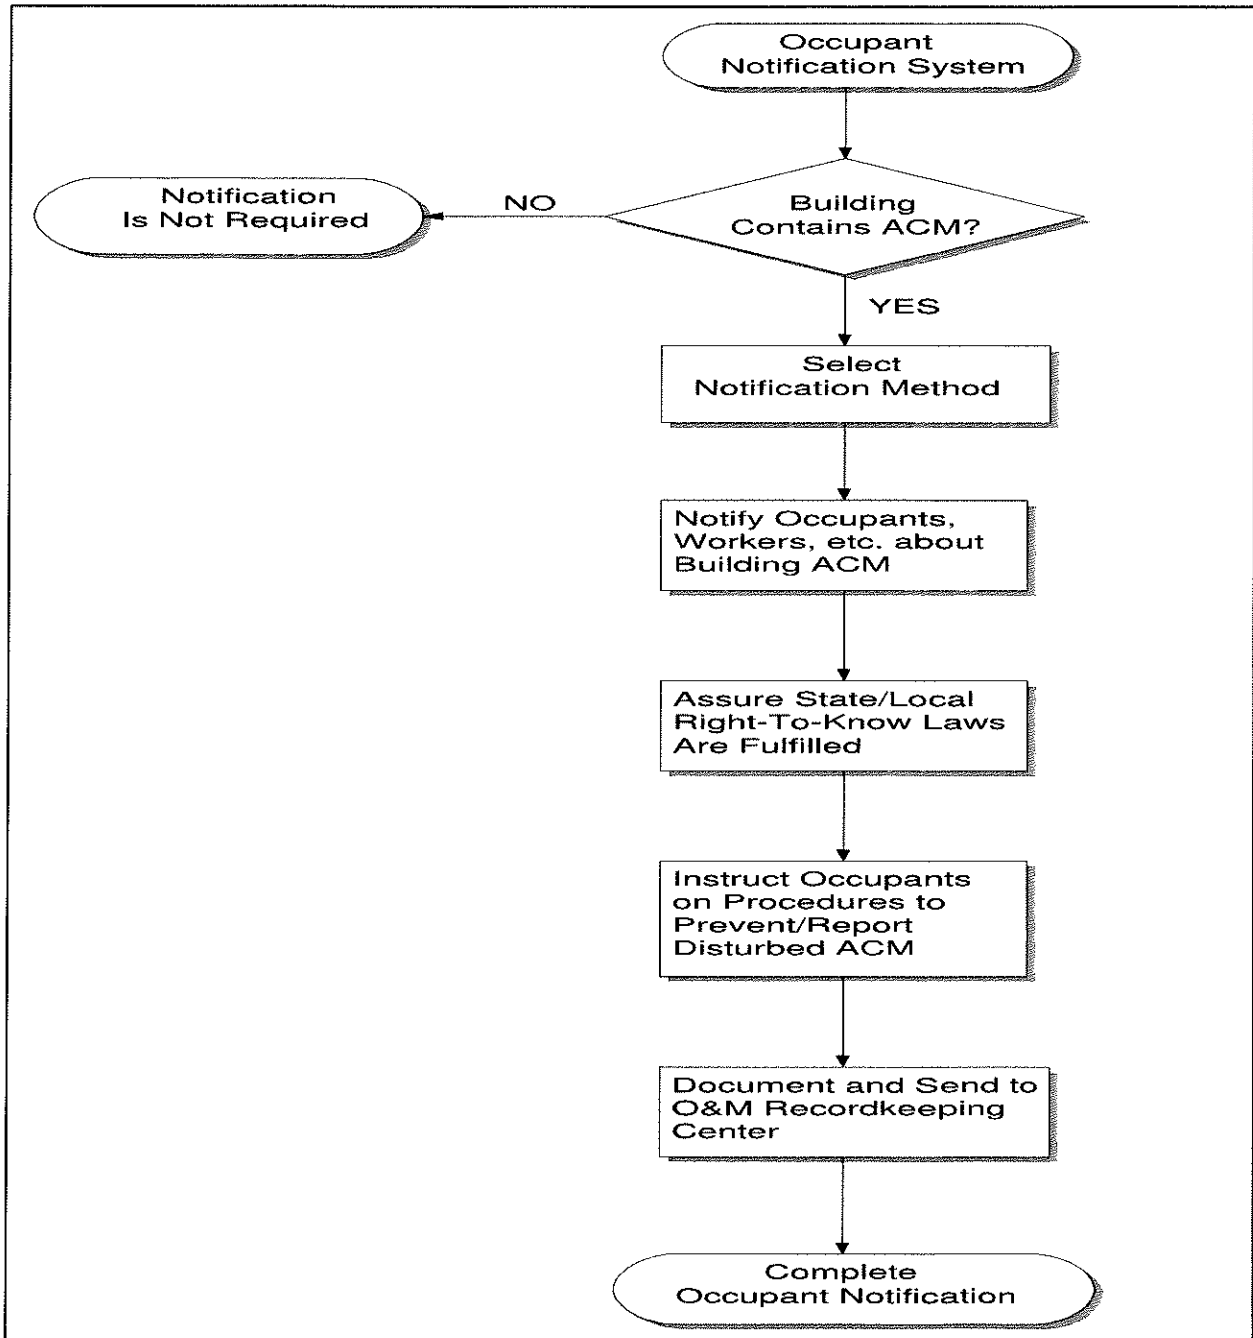

- Location of ACM around or within the building and where it might be disturbed
- Condition of the ACM and the appropriate response if that condition changes
- Information regarding the inhalation health hazards of friable, airborne asbestos
- Notification that intact and non-friable ACM does not represent a health hazard
- Warning not to disturb ACM while performing routine work tasks

- Directives for persons to report evidence of disturbance or damage of the ACM and the name, location, and phone number of the APM
- Notification to report any dust or debris that might come from the ACM, any change in the condition of the ACM, or any improper action by building personnel to the APM
- Instructions to custodial, contractors, and maintenance workers who are taking special precautions during work activities to properly clean up any asbestos debris and guard against disturbing ACM
- Results of any asbestos area air sampling conducted in the building
- Record of ACM inspection and appropriate action taken, if any, to protect the health of people potentially exposed to ACM
- Notice that periodic re-inspection will occur

Additional notification to building occupants is required whenever an asbestos abatement project is initiated. The APM shall send a memo, or ensure that the abatement contractor sends a memo, to building occupants prior to beginning an asbestos project. Post the memo outside the regulated area. Include a copy of the memo in the building O&M file. The memo must include the following information:

- Project location(s)
- Project dates
- Point of contact with phone number
- Information regarding what is being done to minimize/prevent any fiber release
- Information on periodic surveillance to ensure that remaining ACM remains in good condition

**FIGURE 3-1
OCCUPANT NOTIFICATION SYSTEM**

SECTION 4 TRAINING

Training is one of the keys to a successful O&M program. In general, training provides background information regarding asbestos uses and health hazards, asbestos regulations, respiratory and other personal protection equipment, key concepts of asbestos hazard control, and the O&M training presented in this document. Trained personnel reduce the risk faced both by building workers and occupants from the release of asbestos fibers due to improper work practices.

All custodial and maintenance workers, abatement workers and contractors, or other persons involved in asbestos-related activities shall receive training if they have the potential to disturb ACM, enter an asbestos regulated area, or perform ACM related activities. Table 4-2 lists the training requirements for each type of asbestos operation.

Training complies with OSHA General Industry Standard for Asbestos (29 CFR 1910.1001); OSHA Construction Industry Standard for Asbestos (29 CFR 1926.1101); OSHA Respiratory Protection Standard (29 CFR 1910.134); EPA National Emission Standard for Hazardous Air Pollutants (40 CFR 61, Subpart M); EPA Asbestos Worker Protection (40 CFR 763, Subpart G) and EPA AHERA Regulations (40 CFR 763, Subpart E).

TRAINED PERSONNEL

The APM maintains a record of trained personnel. Table 4-1 lists certified NREA-TRC 700 LLC personnel. The APM maintains the attendance roster of custodial and maintenance workers who receive two-hour asbestos awareness training (OSHA Class IV Training).

**TABLE 3-1

4.1 OSHA CLASS IV 2-HOUR ASBESTOS AWARENESS TRAINING FOR CUSTODIAL AND MAINTENANCE WORKERS

This 2-hour Asbestos Awareness Training Course is required for OSHA Class IV Asbestos Work and requires a minimum of two hours of training per 40 CFR 763.92(a) (1). This training is for custodial and maintenance workers, contractors, and employees involved in cleanup tasks, such as sweeping, mopping, dusting, cleaning, and vacuuming of ACM. The following topics are included:

- Background information on asbestos
- Health effects of asbestos
- Worker protection programs
- Location of ACM in Facility buildings
- Recognition of ACM damage and deterioration
- Review of this O&M Plan
- Proper response to fiber release episodes

4.2 OSHA CLASS III 16-HOUR OPERATIONS & MAINTENANCE TRAINING

The 16-Hour Operations & Maintenance Course covers O&M procedures for OSHA Class III Asbestos Work and is required for workers involved in repair and maintenance operations where ACM, including TSI and surfacing materials, is likely to be disturbed. Examples include repair or removal of a small section of damaged pipe insulation or the installation of electrical conduit in an air plenum containing ACM or ACM debris. This course includes more detailed discussions of topics covered in the 2-hour Asbestos Awareness Training Course (Section 4.1), and the following additional topics per 40 CFR 763.92(a)(2):

- Federal, state and local asbestos regulations
- Proper asbestos-related work practices
- Proper methods of handling ACM, including waste handling and disposal
- Respirator use, care, and fit testing
- PPE donning, use, and handling
- Hands-on exercises for techniques such as glove bag work and high-efficiency particulate air filter (HEPA)-vacuum use and maintenance
- Appropriate and proper worker decontamination procedures

4.3 OSHA CLASS I & II AHERA WORKER TRAINING

This 4-day AHERA Worker course is required for workers who conduct asbestos abatement (OSHA Class I and II) or have direct intentional contact with ACM. The worker is trained how to perform an ACM removal job, construct an enclosure, and encapsulate a surface containing ACM. In addition to the elements of the 2-hour Asbestos Awareness Training Course (Section 4.1) and the 16-Hour Operations & Maintenance course (Section 4.2), the AHERA Worker. The course includes the following specialized topics:

- Pre-asbestos abatement work activities
- Work area preparation
- Establishment of decontamination units
- PPE, including respirator selection, use, fit testing, and protective clothing
- Worker decontamination procedures
- Safety considerations in the abatement work area
- Practical hands-on exercises
- Proper handling and disposal of ACM wastes

4.4 AHERA CONTRACTOR SUPERVISOR TRAINING

Supervisors of OSHA Class I and II work are required to complete the 5-day AHERA Contractor Supervisor Course, which also designates the individual as a "competent person". In addition to the 5-day AHERA Contractor Supervisor Course, the APM and the Deputy APM shall also have completed the 2-day AHERA Management Planner Course and the 3-day AHERA Project Designer Course. The AHERA Contractor Supervisor Course includes the following topics:

- Physical characteristics of asbestos and ACM
- Potential health effects related to asbestos exposure
- Employee PPE
- State-of-the-art work practices
- Personal hygiene
- Additional safety hazards
- Medical monitoring
- Air monitoring

- Relevant Federal, State, and local regulatory requirements, procedures, and standards
- Respiratory Protection Programs and Medical Monitoring Programs
- Insurance and liability issues
- Recordkeeping for asbestos abatement projects
- Supervisory techniques for asbestos abatement activities
- Contract specifications
- Course review

4.5 AHERA BUILDING INSPECTOR COURSE

Certification as an AHERA Building Inspector is required for all personnel who survey and inspect buildings for ACM. An inspection includes those activities undertaken to specifically determine the presence or location of, and assess the condition of, friable or non-friable ACM or PACM. An accredited 3-day AHERA Building Inspector Course is required for certification. The course includes the following topics:

- Background information on asbestos
- Potential health effects related to asbestos exposure
- Functions/qualifications and the role of inspectors
- Legal liability and defenses
- Understanding of building systems
- Public/employee/building occupant relations
- Pre-inspection planning and review of previous inspection records
- Inspecting for friable and non-friable ACM and assessing the condition of friable ACM
- Bulk sampling/documentation of asbestos
- Respiratory protection and personal protective equipment
- Recordkeeping and writing the inspection report
- Regulatory review
- Field trip
- Course Review

4.6 AHERA MANAGEMENT PLANNER COURSE

AHERA Management Planner certification is required only for people who prepare management plans for schools (Kindergarten to Grade 12), but is also recommended for personnel responsible for implementing and managing the O&M Plan, such as the APM and the Assistant APM. The 3-day AHERA Building Inspector Course is a prerequisite of the 2-day AHERA Management Planner Course. The AHERA Management Planner Course is beneficial to the APM for administering the O&M Plan and includes the following topics:

- Course overview
- Evaluation/interpretation of survey results
- Hazard assessment
- Legal implications
- Evaluation and selection of control options
- Role of other professionals
- Development of an O&M plan
- Regulatory review
- Record keeping for management planner
- Assembling and submitting the management plan
- Financing abatement actions
- Course Review

4.7 AHERA PROJECT DESIGNER COURSE

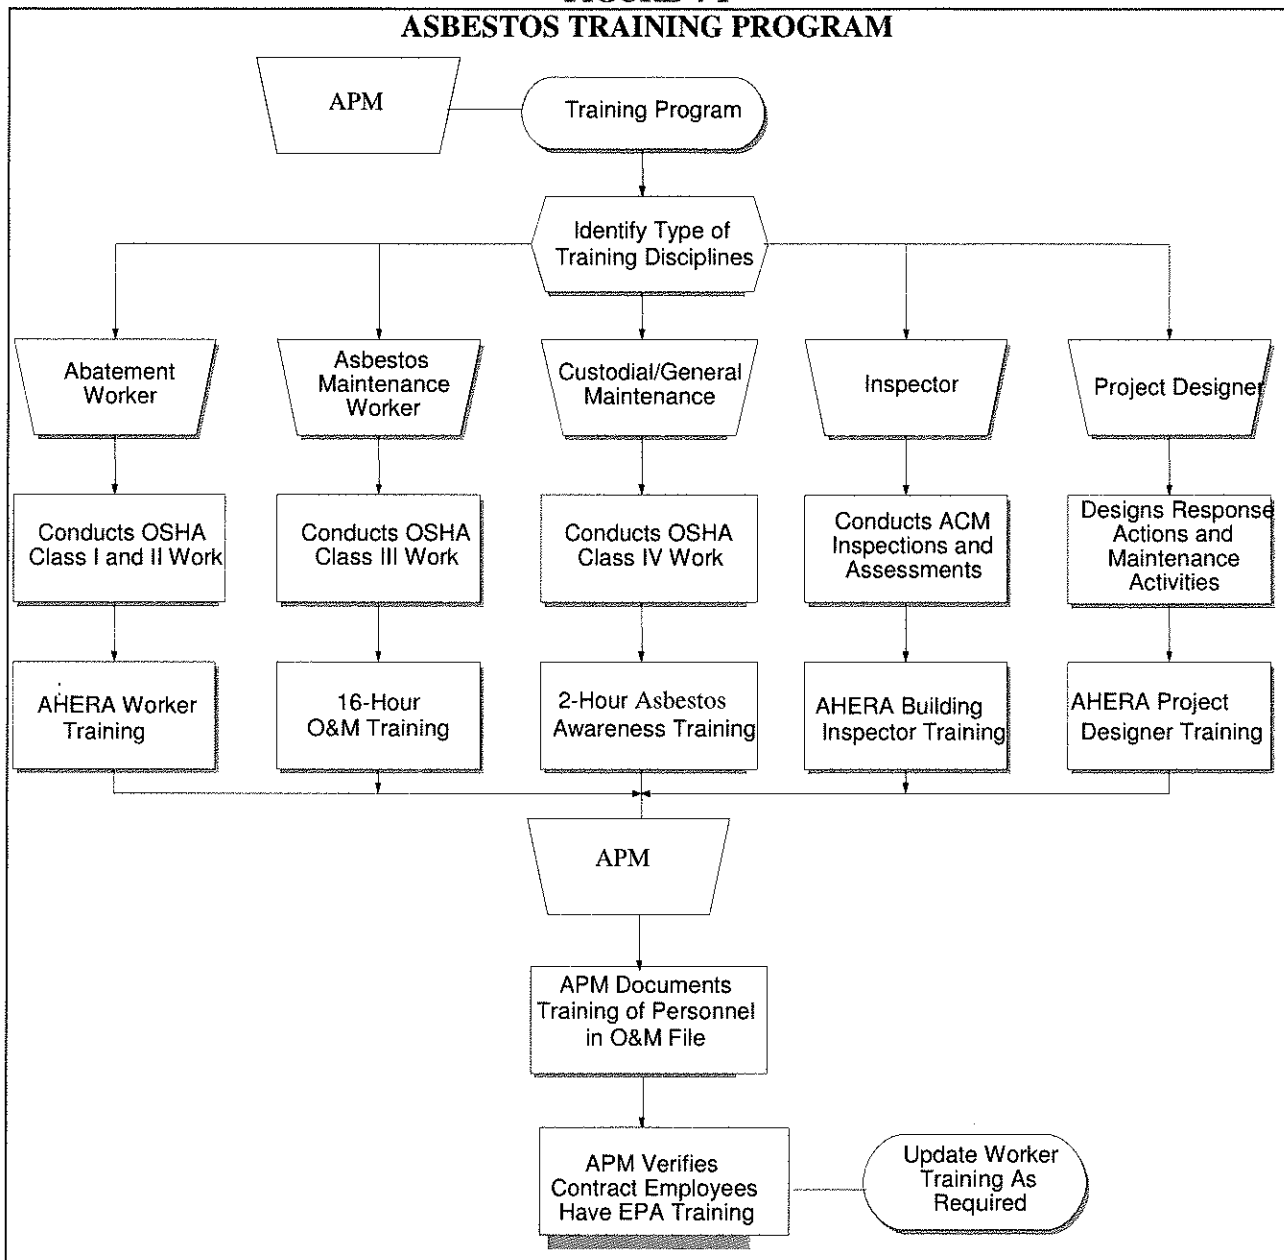

AHERA Project Designer certification is required for a person who designs: (1) a response action, other than an OSHA Class III work activity; (2) a maintenance activity other than an OSHA Class III work activity that disturbs friable ACM; and, (3) a response action for a major fiber-release episode. Project designers shall complete a 3-day AHERA Project Designer Course. The course includes the following topics:

- Background information on asbestos
- Potential health effects related to asbestos exposure
- Overview of abatement construction projects
- Safety system design specifications

- Field trip
- Employee PPE
- Additional safety hazards
- Fiber aerodynamics and control
- Designing abatement solutions
- Final clearance process
- Budgeting and cost estimating
- Writing abatement specifications
- Preparing abatement drawings
- Contract preparation and administration
- Legal/liabilities/defenses
- Replacement
- Role of other consultants
- Relevant Federal, State, and local regulatory requirements, procedures, and standards
- Course review

FIGURE 4-1

ASBESTOS TRAINING PROGRAM

SECTION 5 WORKER PROTECTION

A worker protection program includes medical surveillance, PPE, personal exposure monitoring, and engineering controls. Engineering controls are the preferred method for worker protection. Contractors conducting maintenance and repair operations will notify the APM, in writing, that they have an asbestos worker protection program in place. In addition, OSHA regulations require a written respiratory protection program whenever an O&M plan specifies that service workers wear respirators or where respirators are made available to workers. The APM must verify and approve these programs prior to allowing any asbestos work to begin.

5.1 WORKER PROTECTION DURING ROUTINE O&M

5.1.1 MEDICAL SURVEILLANCE

OSHA 29 CFR 1926.1101 requires workers who wear respirators or who are exposed to asbestos at concentrations equal to or in excess of the permissible exposure limit (PEL) of 0.1 fibers per cubic centimeter (f/cc) for 30 days or more per year to be enrolled in a medical surveillance program.

A baseline medical exam documents the state of a worker's health before the employee begins an assignment with a potential for asbestos exposure. Annual medical exams are used to detect and document any changes in employee health from year to year and relative to the baseline medical exam. The baseline and annual medical exams are crucial in identifying any asbestos-related medical conditions. The earlier that asbestos complications and disease are found, the greater the chances for successful treatment. By law, NREA-TRC 700 LLC must provide all exams.

Asbestos medical exams must include at least the following four parts:

- A work history, to determine whether the worker has ever worked with materials that might have damaged the lungs. This is an official questionnaire, required by OSHA, asking the worker about past work, smoking habits, lung disease, etc.
- A general physical examination that concentrates on the worker's lungs, heart, and stomach to see whether these organs are normal and without any medical problems that exposure to asbestos could make worse. After the general physical exam, the doctor will determine whether the worker can wear a respirator, and whether they can work with asbestos.
- A breathing test, called a pulmonary function test (PFT), to make sure that the lungs are not damaged before beginning work. It is used as a baseline for later tests.
- A chest X-ray to make sure that the worker's lungs are not damaged before beginning work. It is compared to future X-rays to detect any changes that take place in the lungs over the year.

NREA-TRC 700 LLC requires employees working with asbestos to enroll in the Asbestos Medical Surveillance Program. The APM is responsible to ensure required employees attend a company acceptable Medical facility.

Contractors shall verify the medical file for all workers or other persons who may perform work in a regulated area, or who wear respirators, or who are exposed to asbestos at levels equal to or in excess of the permissible exposure limit (PEL) of 0.1 fibers per cubic centimeter (f/cc) for 30 days or more per year to ensure that their workers have passed the physical examination and have received a respiratory compliance letter from a doctor.

5.1.2 PERSONAL PROTECTIVE EQUIPMENT

PPE is designed to protect workers from inhalation or dermal exposure to free or releasable asbestos fibers. PPE consists of disposable Tyvek® coveralls, head covering, protective glasses or goggles, disposable gloves, disposable shoe covers, and a proper respirator. In general, upon completion of asbestos O&M work in a regulated area (under direction of the APM) workers will HEPA-vacuum PPE in the decontamination zone. Leaving the respirator in place, the worker will then removes PPE and fold it inside out as it is removed. All disposable PPE and respirator filters are disposed of as asbestos-containing wastes.

PPE is available through NREA-TRC 700 LLC. The APM shall train asbestos O&M workers in the proper use, removal, and disposal of PPE. Some asbestos O&M activities may not require the use of PPE. The APM will assess PPE need(s) on a case-by-case basis.

5.1.3 RESPIRATORY PROTECTION

When effective engineering controls are infeasible or while engineering controls are being implemented, the APM will ensure that appropriate respirator protection is used. The Safety Manager, ETA, is designated as the RPPM for NREA-TRC 700 LLC. RPPM responsibilities include providing training in proper respirator use and limitations and ensuring that each worker is physically fit to wear a respirator.

The RPPM provides NREA-TRC 700 LLC employees respirators with HEPA filters and conducts fit testing. Employees are responsible for using the respiratory protection provided in accordance with the instructions and training given by the RPPM. Facilities maintenance employees and contractors doing maintenance repair, or asbestos abatement projects shall provide appropriate respirators and fit test to contractor employees.

Respirator selection is based on an asbestos fiber concentration of 0.01 f/cc inside the respirator. Respirators are selected by first performing air sampling to determine the asbestos concentration exposure level and then applying the respirator protection factor. An asbestos concentration exposure level equal to the PEL of 0.1 f/cc would require a protection factor greater than 10. Workers disturbing asbestos without air sampling data must wear full-face, powered air-purifying respirators (PAPR) approved by National Institute of Occupational Safety and Health (NIOSH).

5.1.4 EXPOSURE MONITORING

Employees who expect to exceed the PEL of 0.1 f/cc shall receive proper training and participate in the medical surveillance program. NREA-TRC 700 LLC contractors performing abatement, construction, and maintenance activities with the potential to disturb ACM shall provide the following information to the APM.

- Documentation of the contractor respiratory protection program
- Daily personal exposure monitoring results and records
- Employee notification plan to communicate air monitoring
- Documentation of the establishment of an asbestos-regulated negative-pressure enclosure area in cases where the concentration of airborne asbestos exceeds the PEL
- Names of designated competent person(s)
- Proof of certification of asbestos abatement personnel

5.1.5 AIR MONITORING

Laboratories must be accredited by the National Institute of Standards and Technology (NIST) and/or the American Industrial Hygiene Association (AIHA) for asbestos analysis. Phase contrast microscopy (PCM) is used to determine airborne fiber concentration following NIOSH Method 7400 counting rules. PCM analysis is not asbestos fiber-specific; consequently, its use for baseline or limited clearance samples. However, PCM is quite useful during asbestos abatement when airborne fibers are likely to be asbestos. PCM results can be available with little lead time, and PCM is more economical than the costly, but more accurate, transmission electron microscopy (TEM) analysis. TEM analysis is specific to asbestos fibers and has a more precise detection level. Cal/OSHA T8 CCR 1529 and OSHA 29 CFR 1926.1101 require employers to use PCM to determine whether employees are exposed in excess of the PEL and PCM is sufficient for O&M baseline air monitoring.

If air sampling indicates that airborne fiber levels inside the containment area exceed 1.0 f/cc, cease work and immediately implement additional engineering controls to reduce airborne fiber levels. If fiber levels outside a regulated area reach 0.01 f/cc, notify the APM, extend the regulated area, evacuate people from the affected area, limit access, and control the release of airborne fibers. If fiber levels exceed 0.1 f/cc, medical monitoring will ensue and respirators shall be worn.

5.1.6 EQUIPMENT AND SUPPLIES

Maintenance workers or asbestos abatement contractors assisting with O&M activities in areas where ACM may be disturbed shall have the necessary equipment and supplies to contain ACM and to perform abatement and decontamination in regulated ACM areas. Refer to the NIBS asbestos guidance manual for a listing of required equipment.

5.2 WORKER PROTECTION DURING ASBESTOS ABATEMENT

5.2.1 PERSONAL PROTECTIVE EQUIPMENT

PPE is worn to prevent asbestos fibers contamination to employee clothing and prevent carrying the contamination from the workplace to the home. NREA-TRC 700 LLC personnel and contractors performing asbestos abatement or other O&M functions shall comply with Sections 5.1.2 and 5.1.3 whenever PPE is required.

Decontamination procedures are essential for protecting both worker and property from the spread of asbestos fiber contamination. Everyone leaving the work area for any reason, including lunch breaks, rest breaks, phone calls, and equipment retrieval must strictly adhere to these decontamination procedures.

5.2.2 WORKER TRAINING

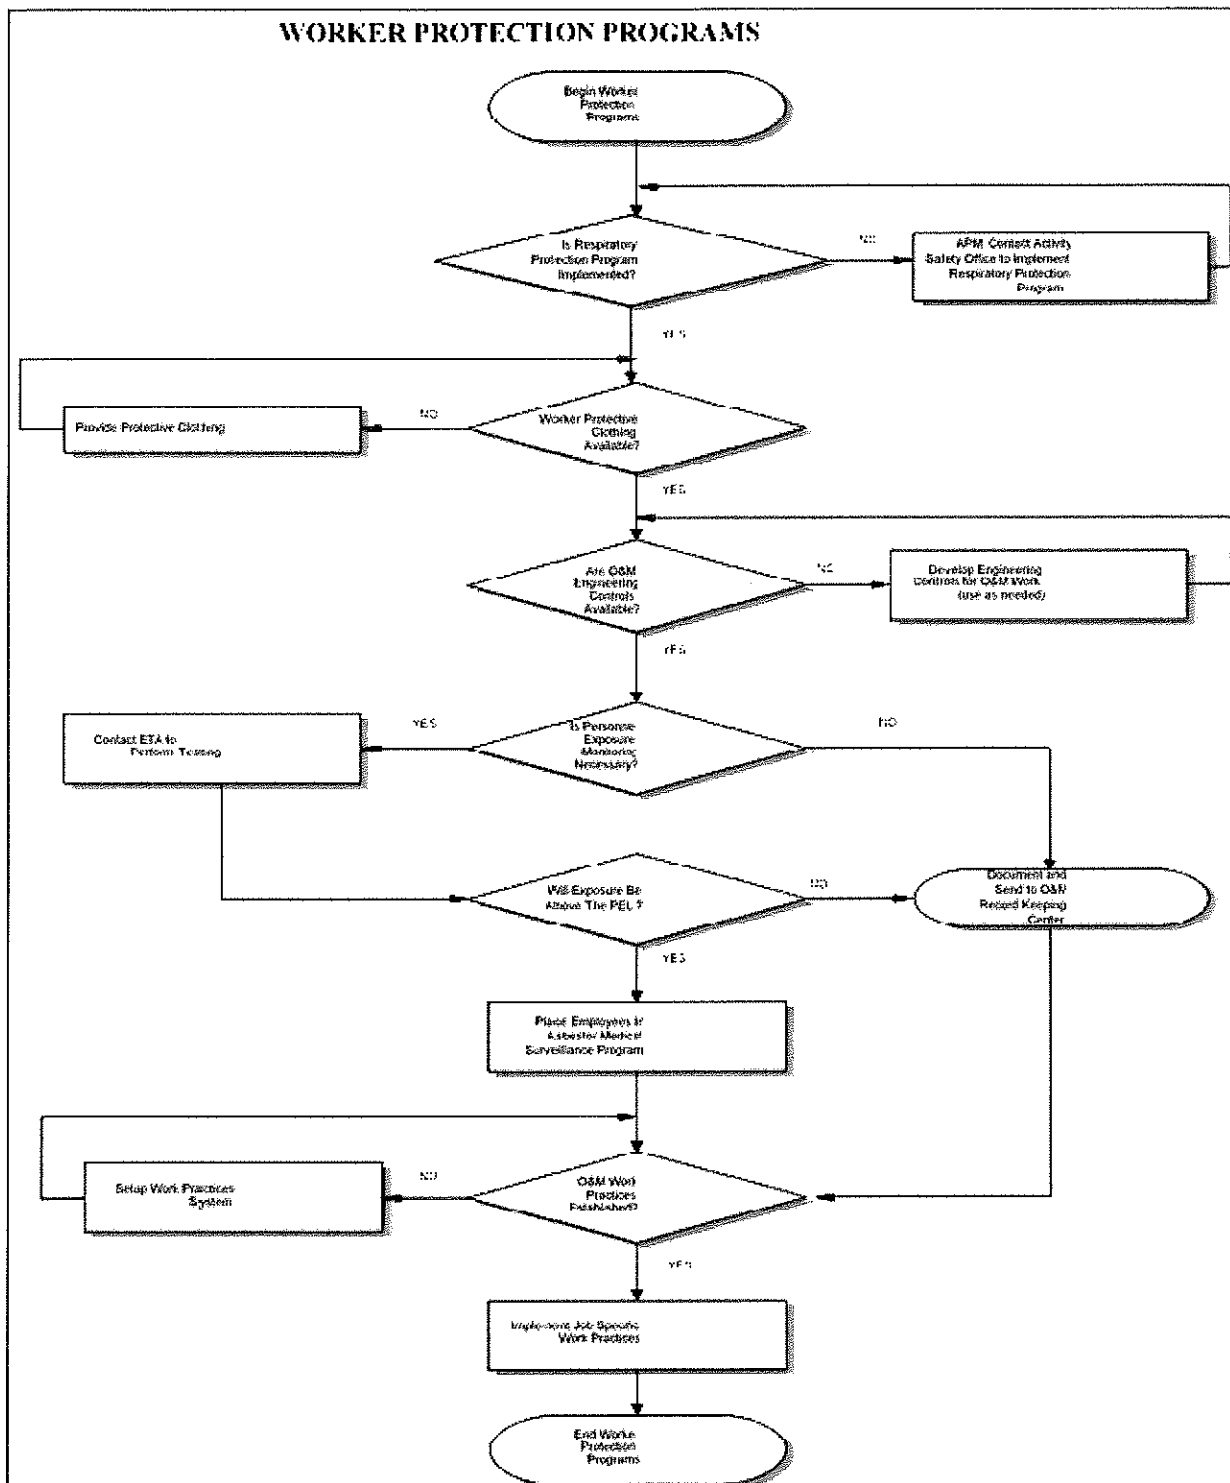

Workers undergo rigorous training on the health risks of asbestos exposure. Such training includes the use of, care of, and fit-testing of respirators. Give attention to abatement procedures and policies and other hazardous materials handling. Refer to Section 4.3 for appropriate asbestos training requirements.

5.2.3 SMOKING AND EATING

Asbestos fibers are hazardous when inhaled and may be hazardous when ingested. To protect against such hazards, smoking, drinking, eating, chewing gum or chewing tobacco is prohibited in any area requiring the use of PPE.

FIGURE 5-1 WORKER PROTECTION

WORKER PROTECTION PROGRAMS

SECTION 6 WORK PRACTICES

This O&M plan focuses on a special set of asbestos work practices for custodial, maintenance, and construction staff. Work practices and standard operating procedures used in this plan are based on information in *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996).

In addition, Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry, requires the following work practices and engineering controls regardless of the levels of exposure or classes of asbestos work:

- HEPA-equipped vacuums
- Wet methods
- Prompt cleanup and disposal of waste/debris

Additional engineering controls may be necessary to achieve PEL/excursion limit compliance including:

- Negative-pressure systems with local exhaust ventilation and HEPA filters
- Process enclosure and/or isolation
- Ventilation of regulated areas

The following work practices are prohibited regardless of measured exposure or the results of initial exposure assessments:

- Use of high-speed abrasive saws without attached HEPA-filtered point-of-cut ventilator or HEPA-filtered enclosure
- Use of compressed air
- Dry sweeping, shoveling, or other dry clean-up method
- Employee rotation to reduce exposure

The APM develops work practices for asbestos activities. Work practices are reviewed annually for recurring asbestos activities. NREA-TRC 700 LLC Facilities Management Department is responsible for ensuring that proper work practices are in place when conducting asbestos-related maintenance and cleanup work. Facilities Management shall notify the APM, in writing, of the nature and location of the asbestos-related work, the estimated duration, and the completion date. The APM shall provide work practices applicable to each job to employees.

Proper implementation of the O&M worker protection plan is essential to ensure worker safety. Asbestos-trained and certified maintenance staff or contractors will perform all O&M work that involves direct contact with friable ACM or disturbance of friable or non-friable ACM using the methods detailed in the *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996) or equivalent.

Large-scale abatement projects require complex controls and procedures that are site-specific and outside the scope of this O&M plan. Large-scale abatement projects shall be performed in accordance with the asbestos specifications or written work plan prepared by the APM or NREA-TRC 700 LLC contractor. Contractors shall be bound by contract to comply with the provisions of the asbestos abatement specifications or work plan. The APM shall be informed of the extent of the asbestos abatement project by reviewing the drawings, contract, and attending the pre-construction meeting.

6.1 CLASS I AND II ASBESTOS WORK PRACTICES

Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry, defines Class I Asbestos Work as any activity involving the removal of TSI and surfacing ACM. The definition also includes Class III repair and maintenance work where more than one standard waste bag or standard glove bag is needed (a standard glove bag/waste bag shall not exceed 60 inches in length and width). Class II Asbestos Work is defined as any activity involving the removal of ACM that is not TSI or surfacing material (i.e., wallboard, flooring, roofing, siding, mastics, and gaskets).

The following are requirements for Class I Asbestos Work:

- Designate a regulated area.
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use critical barriers or other effective means of isolation.
- Not required when disturbed ACM is less than 25 linear feet or 10 square feet.
- Seal HVAC systems with a double layer of 6-millimeter plastic or equivalent.
- Use impermeable drop cloths below removal area and place drop cloths over objects remaining in the regulated area.
- Ventilate area away from workers breathing zone towards a HEPA-filtered collection device.
- Use of one or more of the following specific control methods (each method includes specifications and work practices):
 - Negative Pressure Enclosure System (NPE)
 - Glove bag System
 - Negative Pressure Glove bag System
 - Negative Pressure Glove Box System
 - Water Spray Process System
 - Walk-In Mini-Enclosure
- Use alternative methods if certified by a CIH or PE who is also an AHERA Project Designer:
 - Provide OSHA a copy of the evaluation and certification when removed ACM is greater than 25 linear feet or 10 square feet.
 - A competent person can make this certification if removed ACM is less than 25 linear or 10 square feet.

- Use full decontamination procedures with a shower (use remote shower where contiguous shower is infeasible):
 - Drop cloth decontamination is permitted where removed ACM is less than 25 linear feet or 10 square feet.

The following are requirements for Class II Asbestos Work:

- Designate a regulated area
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use critical barriers or other effective means of isolation.
- Use impermeable drop cloths below removal area.
- Alternative methods may be used if demonstrated that the PEL cannot be exceeded. A competent person must certify the method in writing.
- Use a drop cloth where clothes can be HEPA-vacuumed for decontamination process.

6.2 CLASS III AND IV ASBESTOS WORK PRACTICES

Cal/OSHA T8 CCR 1529 and OSHA Standard 29 CFR 1926.1101, Construction Industry defines all O&M work that involves direct contact with friable ACM, or disturbance of friable or non-friable ACM as Class III or Class IV Asbestos Work.

Class III Asbestos Work is defined as repair and maintenance operations, where ACM, including TSI and surfacing material, is likely to be disturbed. The maximum amount of disturbed material must not exceed that which will fit into one standard glove bag or standard waste bag. The standard glove bag/waste bag shall not exceed 60 inches in length and width. The following are the minimum requirements for Class III Asbestos Work:

- Designate a regulated area.
- Use wet methods, HEPA-filtered vacuums, and prompt cleanup.
- Use a negative pressure system with local exhaust ventilation and HEPA filters when feasible.
- Use impermeable drop cloths below removal area.
- Use glove bags or mini-enclosures whenever disturbance involves drilling, cutting, abrading, sanding, chipping, breaking, or sawing TSI or surfacing materials.
- Isolate area if PEL is exceeded.
- Decontamination process includes HEPA-vacuuming clothes over a drop cloth.

Class IV Asbestos Work is defined as maintenance and custodial activities during which employees contact ACM, and activities that involve the cleanup of waste and debris containing ACM. The following are the requirements for Class IV Asbestos Work:

- HEPA-filtered vacuum or steam-clean all carpets.
- HEPA-filtered vacuum or wet clean all other floors and other horizontal surfaces.
- Prompt cleanup.
- HEPA-filtered vacuum clothes over drop cloths for decontamination purposes.
- Disposal of all debris, filters, mop heads, and cloths in sealed leak-tight containers.

Additional cleaning shall be determined and recommended in writing by the APM. Methods and frequency shall be considered.

Cal/OSHA T8CCR 1529, OSHA 29 CFR 1926.1101 and 29 CFR 1910.1001 specify the following work practices for vinyl and asphalt asbestos flooring material:

- Prohibit sanding of flooring material.
- Vacuums shall be equipped with HEPA filter, disposable dust bag, and a metal floor tool (no brush) shall be used to clean floors (applies to floor removal/renovation or areas containing accessible TSI or surfacing ACM/PACM, or visibly deteriorated ACM)
- Strip finishes using low-abrasion pads (speed lower than 300 rotations per minute) and wet methods.
- Burnish or dry buff only on floorings that have sufficient finish so that the pad cannot contact the material.

6.3 FIBER RELEASE EPISODES

NREA-TRC 700 LLC employees and staff shall notify the APM of an ACM disturbance or episode that causes the release of asbestos fibers. Access shall be prohibited to the area until the APM can make an estimate of the extent of contamination. The area will be isolated until the APM determines the area is safe for re-entry.

If moderate-to-relatively large amounts of ACM are disturbed, the APM must use the following general procedures to address the hazard:

- Keep ACM wetted, if possible.
- Ascertain scope of the asbestos episode.
- Evacuate workers, identify and isolate the regulated area.

- Limit entry to the regulated area by persons other than those necessary to perform the maintenance project; isolate the building HVAC system, if applicable.
- Post signs to prevent entry by unauthorized persons.
- Institute O&M work practices and worker protection.
- Institute personal exposure monitoring activities.
- Determine need for medical surveillance of workers.
- Establish perimeter air monitoring stations, if possible.
- Repair/replace damaged ACM with asbestos-free material.
- Clean all fixtures or other components in the immediate work area, using either wet methods or a HEPA-filtered vacuum.
- Place asbestos debris and other cleaning material in labeled, double-sealed bags or impermeable leak-tight containers.

Special procedures are generally needed to minimize the spread of fibers throughout the building after an asbestos fiber release occurs, such as the partial collapse of an ACM ceiling or wall, or the accidental disturbance of ACM. These procedures are needed whether the ACM disturbance is intentional or unintentional. Under AHERA regulations, a “major fiber release” (large asbestos episode) is defined as one involving more than three square feet or three linear feet of ACM. The procedures followed will vary according to the amount of ACM affected, the extent of fiber released from the ACM, the relationship of the release area to the air handling systems, and whether the release site is accessible to building occupants. Depending on the severity of the episode, asbestos consultants and contractors may be needed to develop a strategy for conducting the cleanup operations.

In general, for major fiber releases, wet the ACM and isolate the area by closing doors and erecting temporary barriers to restrict airflow. Restrict access to the site to prevent persons not involved in the cleanup operation from inadvertently entering the area. If asbestos fibers could enter the HVAC system, shut down the supply and return air system of the affected area, and seal off the system to prevent fiber entry. The final steps will include a thorough cleanup, a careful inspection, and final clearance air monitoring to verify satisfactory cleanup.

More specific procedures for controlling asbestos fiber releases are discussed in the *Guidance Manual: Asbestos Operations & Maintenance Work Practices* (NIBS, 1996). In general, “critical barriers” or “mini-containment structures” are required for access to regulated areas or activities that may disturb ACM. Critical barriers are necessary to contain ACM and may include barriers at doorways, hatches, open ceilings, shafts, and holes in plenum walls. Mini-containment structures are one- or two-chamber polyethylene structures designed to provide a barrier and decontamination area for entry and exit of workers and equipment. Contained areas will be posted per OSHA regulations.

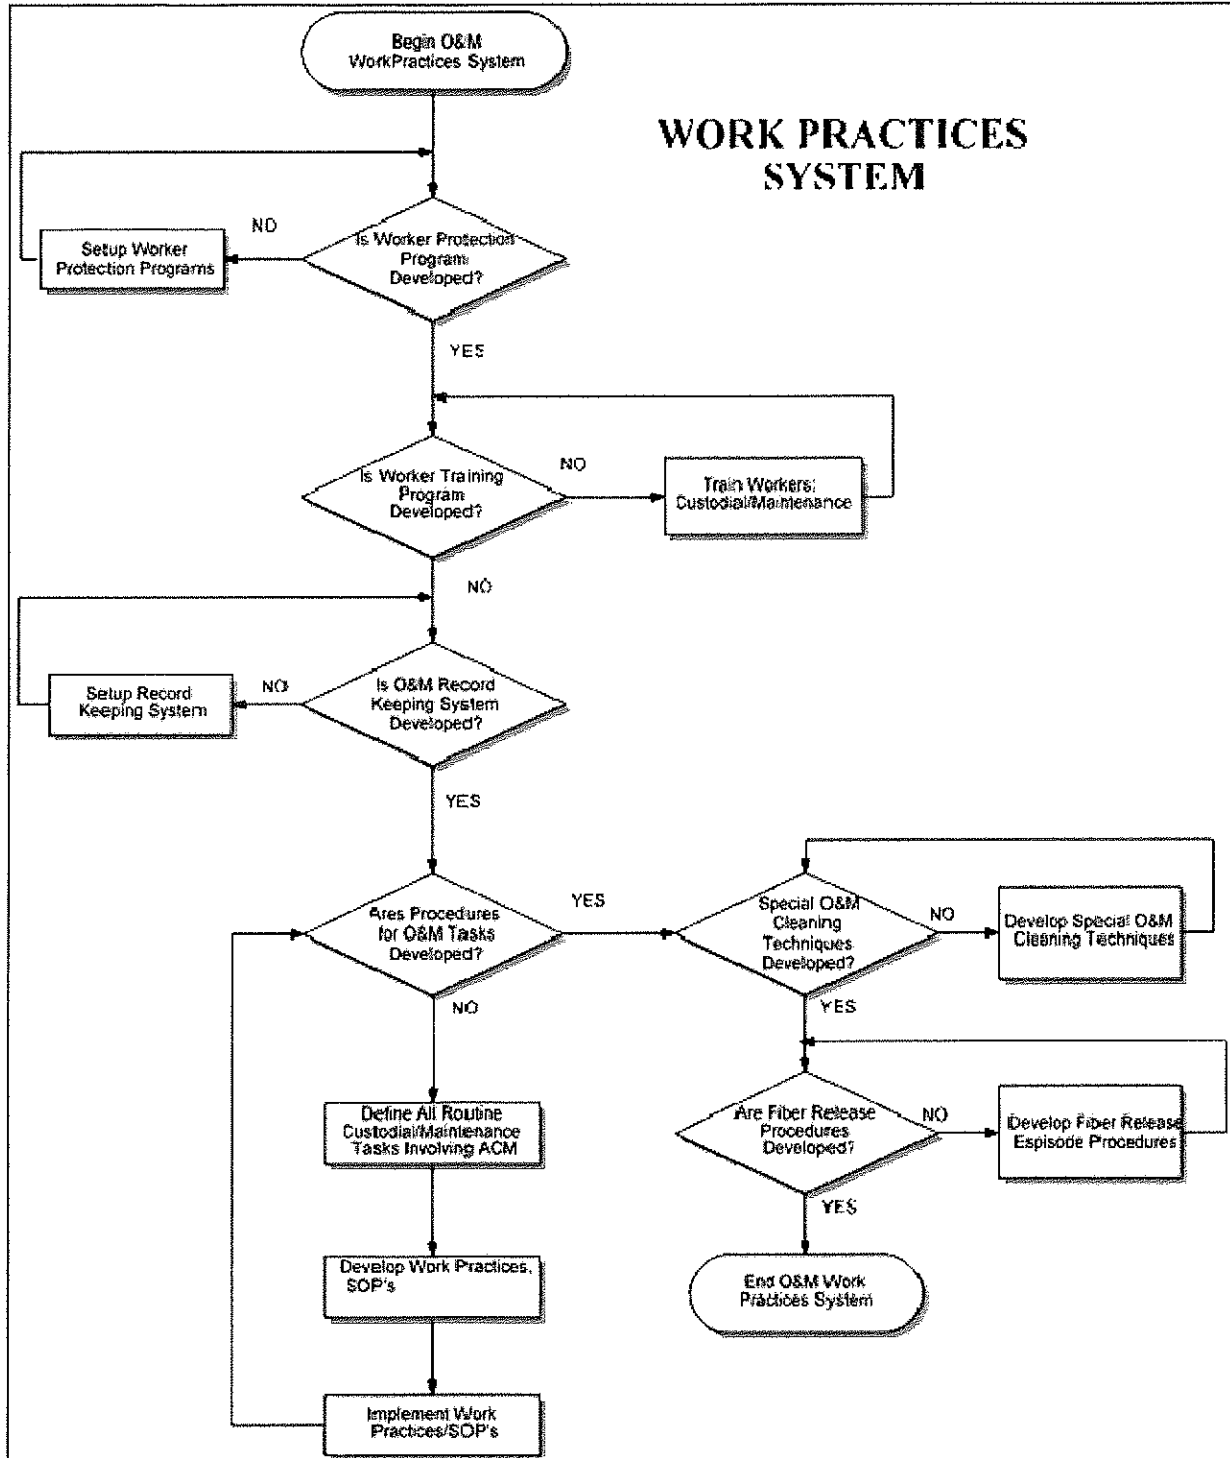

6.4 REGULATED AREAS

The primary method used to control access to and operations with ACM is the establishment of specific regulated areas. Regulated areas are defined by OSHA as those areas where Class I, II, and III asbestos work is conducted; any area where debris and waste from such work accumulates; and, work areas where the fiber concentration may exceed the PEL of 0.1 f/cc. Implement restrictive work procedures, with engineering controls, to reduce fiber release. In addition, use health and safety protocols to protect workers in these areas.

Limit access to regulated areas or activities that may disturb ACM by installing critical barriers or mini-containment structures. Critical barriers are necessary to contain ACM and may include barriers at doorways, hatches, open ceilings, shafts, and holes in plenum walls. Mini-containment structures are one- or two-chamber polyethylene structures designed to provide a barrier and decontamination area for entry and exit of workers and equipment. Post signs indicating regulated areas per OSHA regulations

Locations of friable or damaged (friable and non-friable) ACM are considered "regulated areas." The APM can also define other areas as regulated areas. An ACM work control/permit is required for all activities in regulated areas due to the high potential for disturbing the friable or damaged ACM. Documentation of contact, both accidental and intentional, is placed on record at the APM's office.

**FIGURE 6-1
WORK PRACTICES
SYSTEM**

SECTION 7 ACM WORK CONTROLS AND PERMITS

7.1 WORK CONTROLS/PERMITS

The purpose of a work control/permit system is to ensure that the contractor employees who conduct maintenance and repair are aware of the location of ACM and the restrictions and requirements of the O&M plan.

The work control/permit system allows review of work plans by the APM so that particular engineering and health procedures are implemented during the work activity. A work control/permit system, such as using *work permits*, is required for all activities in regulated areas and for any activities that may disturb or damage ACM.

The following O&M activities shall require an asbestos work permit:

- Access to regulated areas or asbestos abatement containments
- Decontamination of small amounts of asbestos debris resulting from unintentional disturbance of ACM
- Building maintenance, repair, or installation activities that are conducted in areas with damaged or friable ACM
- Building maintenance or repair activities that require the disturbance of ACM in any area

7.2 WORK CONTROL/PERMIT SYSTEM

Trouble Tickets and Work Requests shall be reviewed by the APM. Any trouble ticket that may involve building materials (doors, floor tile, pipes) is submitted to the APM for review. The APM consults the asbestos inventory or, if necessary, conducts additional sampling. If the work involves asbestos, the APM provides work practices and guidance to employees. If the work falls under project status and not O&M, the work is assigned to contract. After reviewing, the APM will forward the trouble ticket/work request to the Facilities Management Department head for final authorization.

7.3 CONTRACT PROJECTS

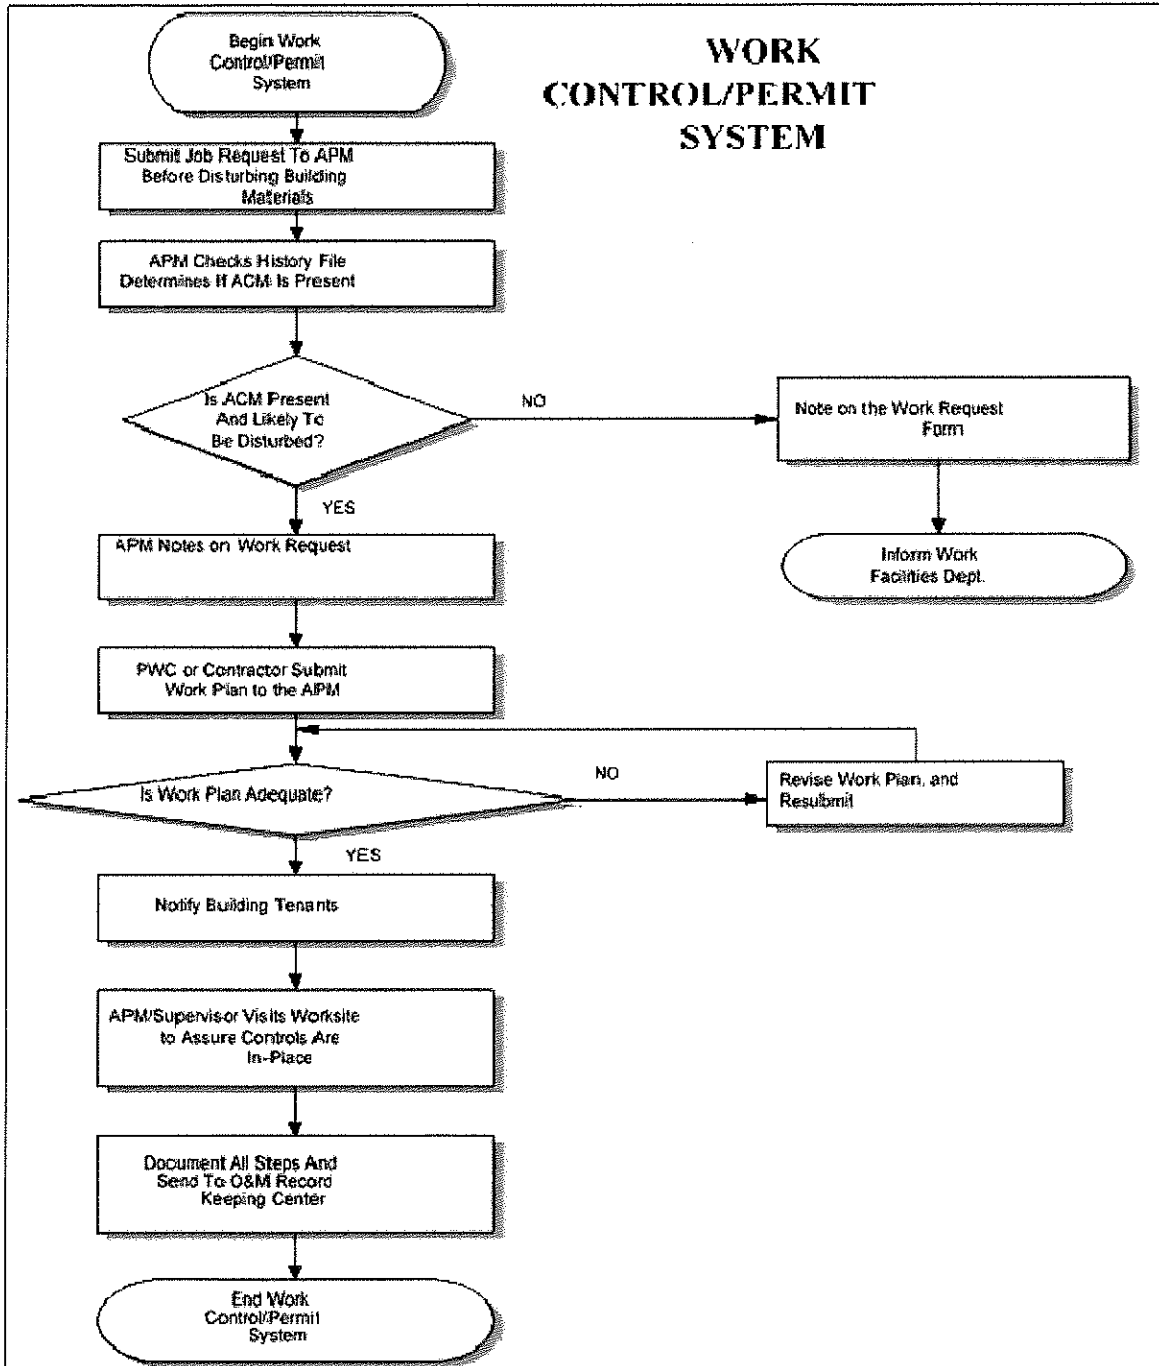

The APM will ensure that work performed by an independent contractor that may involve the release of asbestos fibers shall incorporate the appropriate references and/or specific contract clause or clauses necessary to assure that the following actions occur:

- The contractor is aware of the potential hazard to his/her employees.
- The contractor takes special precautions to comply with references 29 CFR 1910.1001; 29 CFR 1926.1101; 40 CFR Part 61, National Emission Standards for Hazardous Air Pollutants; Asbestos NESHAP Revision, November 20, 1990 rule to protect his/her employees from exposure to asbestos fibers in excess of the PEL.

- The contractor measures and controls asbestos fibers outside the asbestos boundary to less than 0.01 f/cc as required by Cal/OSHA T8CCR 1529 and 29 CFR 1926.1101. In addition, controlled/regulated areas shall meet this criterion prior to release for unrestricted access. Appropriate monitoring and enforcement of the contract provisions is the responsibility of the official responsible for contract compliance. In addition, coordinate with the industrial hygienist and the APM. Forward documentation of final air clearance levels to the APM for inclusion in the building files.
- The contractor notifies the APM, in writing, that they have an asbestos worker protection program in place.
- Contractor personnel are trained in accordance with the provisions of 29 CFR 1910.1001, Cal/OSHA T8CCR 1529 and 29 CFR 1926.1101. Forward documentation of training to the APM for inclusion in the building files.

Upon completion of the project, the contractor shall forward documentation on the type, amount, and location of the ACM removed to the APM for inclusion in the building files.

**FIGURE 7-1
WORK CONTROL/PERMIT
SYSTEM**

SECTION 8 INSPECTIONS, PERIODIC SURVEILLANCE, AND RE-INSPECTIONS

8.1 INSPECTION

An asbestos inspection includes a survey of the building to locate and identify ACM and PACM, and an assessment of the material's condition. The inspection, conducted by an EPA-accredited inspector, includes identifying all suspect material, recording the location, quantity, characteristics, and condition of the material.

The inspection process focuses on identifying the following materials that are deemed likely to contain asbestos: (1) surface materials, (2) TSI, and (3) miscellaneous materials. Locate these materials and define homogeneous sampling areas (HAs). Sample and analyze suspect material for asbestos. At a minimum, take identification bulk samples of damaged and significantly damaged HAs. Collect bulk samples following the guidelines of AHERA, as detailed in 40 CFR 763 (see Appendices A and B). Analyze samples using polarized light microscopy (PLM) to determine the asbestos content of the suspect material prior to allowing any O&M work that could disturb the material. TEM may be required to distinguish between false negatives and true negatives from PLM. Analyze samples at a certified asbestos laboratory. If bulk samples of suspect ACM are not taken, presume that the material contains asbestos until laboratory analysis proves otherwise. Follow the appropriate O&M practices and response actions for all areas assumed to contain asbestos.

Directions for conducting and recording an asbestos inventory are outlined in Appendix B.

Appendix B provides a quick reference for ACM identified in each building. The O&M plan is based upon material assumed and confirmed to contain asbestos identified in the initial inspection and subsequent re-inspections. A copy of all inspection results is located in the APM's office.

8.2 PERIODIC SURVEILLANCE

Periodic surveillance is one of the key objectives of an O&M plan. Combined with re-inspections, work control/permits, and ongoing reports from maintenance workers of changes in condition; periodic surveillance ensures that damaged or deteriorated material are identified. Periodic surveillance can be conducted by in-house personnel annually or more frequently as necessary.

Conduct periodic surveillance in conjunction with the annual facility or building inspection. The Safety Office conducts annual surveillance during the building safety inspection. If necessary, the APM will schedule more frequent surveillance for specific buildings. Document findings from the surveillance and add the information to the building's asbestos O&M file.

Each surveillance includes comments about the following assessment factors:

- Deterioration or delamination from underlying surfaces
- Water damage
- Physical damage, including the presence of debris
- Disturbance of ACM by employees

- Accessibility
- Number of people potentially exposed

Whenever damaged material is found, notify the APM immediately. The APM determines the change in condition, implements cleanup procedures, determines and initiates required corrective action, and documents the action for inclusion in the building's asbestos O&M file.

8.3 RE-INSPECTION

In addition to annual surveillance, a re-inspection of ACM is conducted every three years by an EPA-accredited building inspector. For that year the re-inspection is conducted in lieu of periodic surveillance.

The building inspector performs the following tasks:

- Visually inspecting all the functional spaces defined in the original survey report to identify and verify all suspect friable and non-friable ACM by HA
- Reviewing the periodic surveillance documents
- Reviewing abatement records, work evaluation forms, and fiber release reports
- Determining friability through touch
- Updating the survey report and the management plan accordingly

Update the information for HAs identified during the initial inspection and includes the date of the re-inspection and any comments. If changes in condition, quantity, friability, or accessibility occur, recalculate the HA rating score. Complete additional forms for any additional HAs areas discovered during subsequent re-inspections. Place the completed forms with the asbestos inspection records.

Collect bulk samples of previously not sampled suspect material and newly-identified HAs, as necessary, following the guidelines of AHERA, as detailed in 40 CFR 763. Analyze samples using PLM to determine the asbestos content. TEM may be required to distinguish between false negatives and true negatives from PLM.

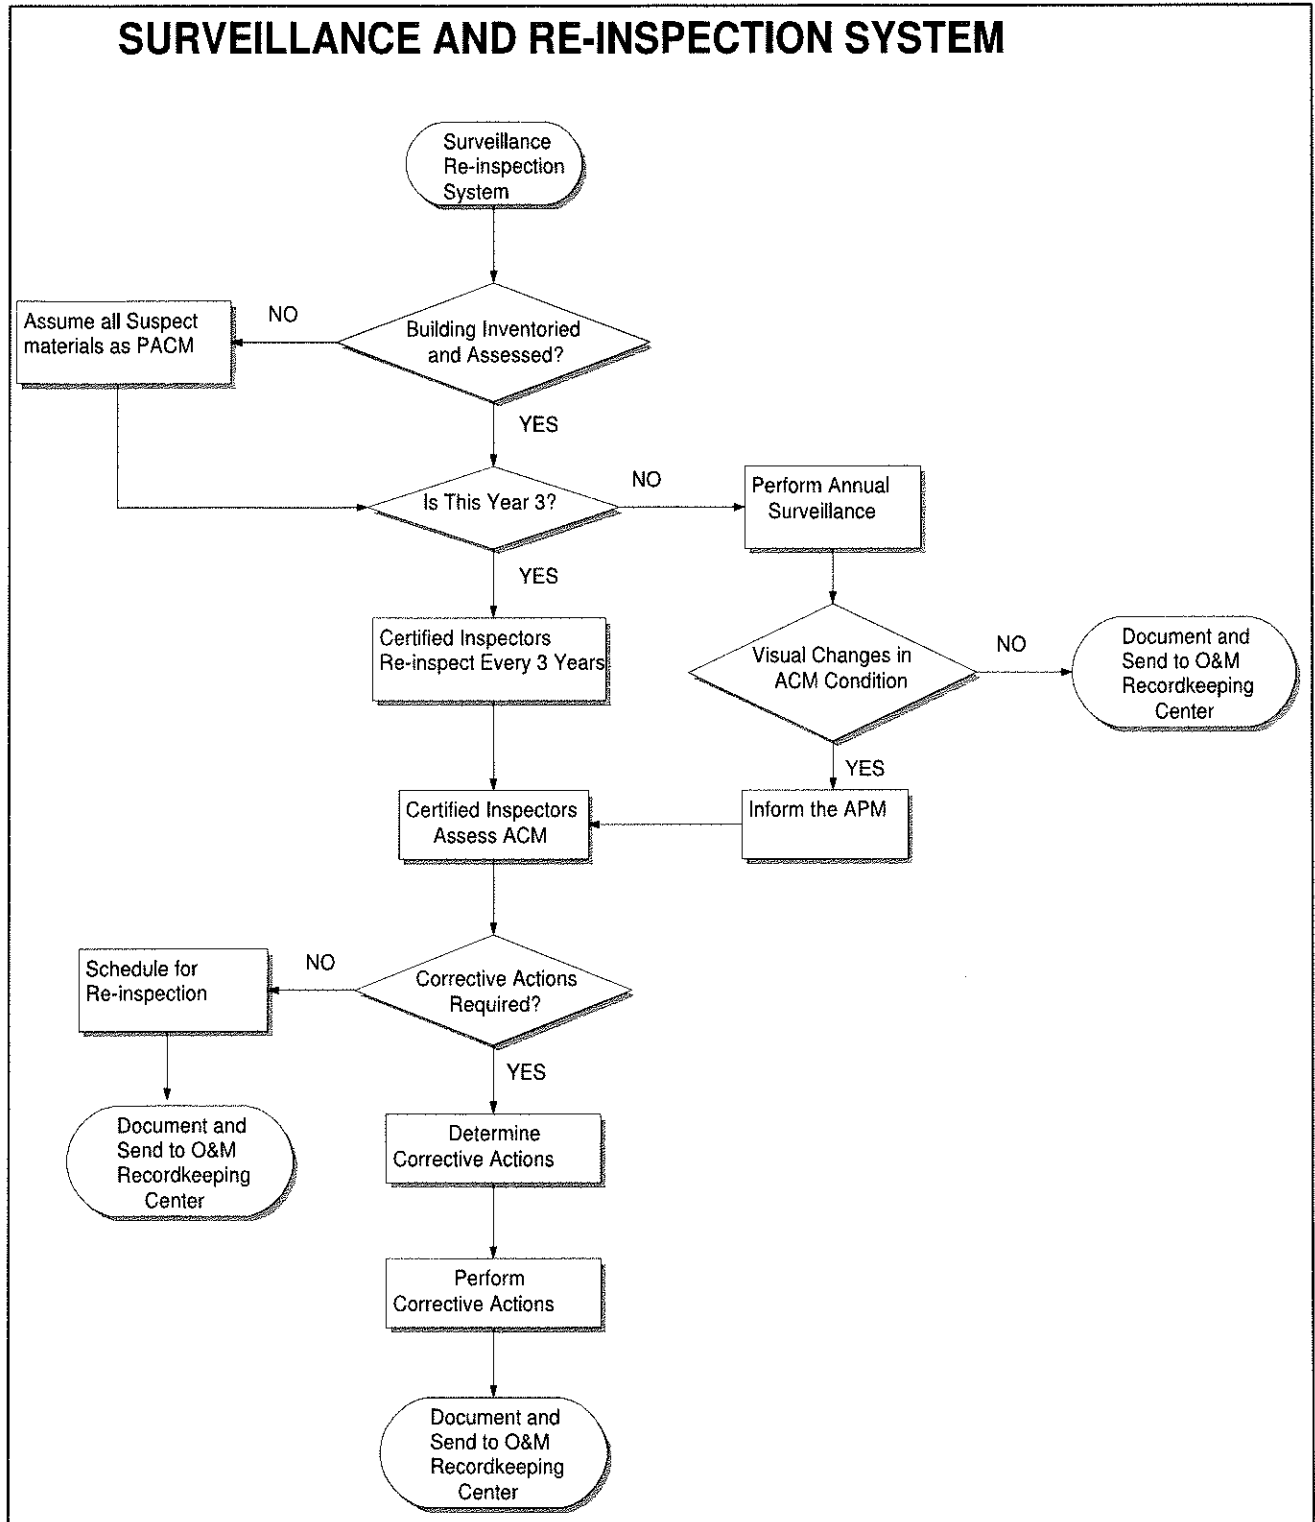

An accredited laboratory shall analyze bulk samples to confirm the presence or absence of asbestos. Only the following laboratories should be used:

- Laboratories accredited by AIHA
- Laboratories accredited by NIST

8.4 HAZARD ABATEMENT

Prepare a Hazard Abatement Application form for each building containing friable, accessible, and damaged asbestos that meets the requirements specified in Appendix C. Include general recommendations and a rough cost estimate for removal, encapsulation, enclosure, or replacement with non-ACM in the Hazard Abatement Application.

FIGURE 8-1 SURVEILLANCE AND RE-INSPECTION SYSTEM

SECTION 9 RECORDKEEPING

The purpose of an O&M recordkeeping system is to establish and maintain a standardized system that clearly documents the implementation of an asbestos control program. The steps taken to identify ACM and associated hazards, and to minimize the potential exposure to employees and building occupants are recorded for future reference. EPA, and OSHA have specific requirements concerning the various records and documentary information that must be maintained.

The recordkeeping system tracks the following types of data:

- Building information including, inspection or survey data, physical condition of the ACM, and response actions taken to manage or remove the ACM
- Employee training and medical program information
- Data on work practices and procedures
- Additional federal/state/local recordkeeping requirements

9.1 BUILDING INFORMATION

The APM retains building asbestos management documents in a permanent O&M file organized by building. The O&M building file includes the following records and information:

- **Inspection and Assessment Information.** Record the details regarding the location, quantity, characteristics, and assessment of the condition of suspect material. Record bulk sampling locations and results from laboratory analyses. Update the records with data collected during re-inspections, periodic surveillance, and maintenance work. Include information regarding ACM not identified during the initial inspection/assessment as it is located and sampled.
- **Work Control/Permit System.** As maintenance and renovation activities occur, a work control/permit system is necessary to insure that untrained workers do not inadvertently disturb ACM and that trained workers use the proper procedures when they are authorized to disturb ACM. Fully document the review and authorization of work requests. See Section 7.3 for details of the work control/permit system.
- The work control/permit system is also tied into the personnel asbestos training and medical records to insure that only trained individuals with proper medical clearance are allowed to perform activities that might potentially disturb asbestos.
- **Work Practices and Procedures.** The APM determines the proper O&M work practices to use whenever asbestos is disturbed during maintenance activities. The APM reviews and approves the work practices used for maintenance activities performed by contract personnel. The APM documents and maintains records of these work practices in the O&M building files. The APM also documents and maintains standard operating procedures for asbestos removal operations in the O&M building files.

- **Work Evaluation/Response Action Data.** Upon completion of maintenance or renovation work, a Facilities Maintenance worker documents all changes in the location or condition of ACM. The information is forwarded to the APM for inclusion in the O&M building files and database. For removal jobs the information will include certification that the work area is asbestos-free, final air sampling results, and the waste shipment record. For enclosure or encapsulation work, the information will include final air sampling results. In addition, the APM retains copies of asbestos abatement contract drawings and specifications, the work plan, final air clearance results, documentation of worker training, and documentation on the type, amount, and location of the material removed. Maintain a copy of the waste shipment record to the Environmental Department. Include, as part of the contract, the submittal of the above information to the APM.
- **Re-inspection and Surveillance.** The re-inspection and periodic surveillance process involves updating HA information, identifying new HAs, and determining abatement actions. Conduct periodic surveillance and re-inspections as part of the annual Building Safety Inspection. Conduct periodic surveillance annually and report any changes in ACM condition to the APM for re-inspection by an EPA-certified inspector. Every three years a certified inspector will conduct a re-inspection to reassess the condition of the ACM. Document changes in ACM condition, enter the information into the asbestos database, file it in the O&M building file, and determine the required cleanup and corrective actions.
- **Building Occupant Notification.** Prior to any renovation or removal project, affected building occupants are notified of the exact location of the project, the methods used to prevent fiber release, and the methods used to ensure the remaining ACM stays in good condition. The building occupants are notified by the APM, via memo. Post a copy of the memo at the project site.

9.2 EMPLOYEE RECORDS

Employee records are typically organized into the following categories:

- Medical Surveillance Program
- Respiratory Protection Program
- Training

NREA-TRC 700 LLC retains documentation of the Medical Surveillance Program. The RPPM retains the Respiratory Protection Program records, including those for training, medical surveillance, and respirator fit-testing.

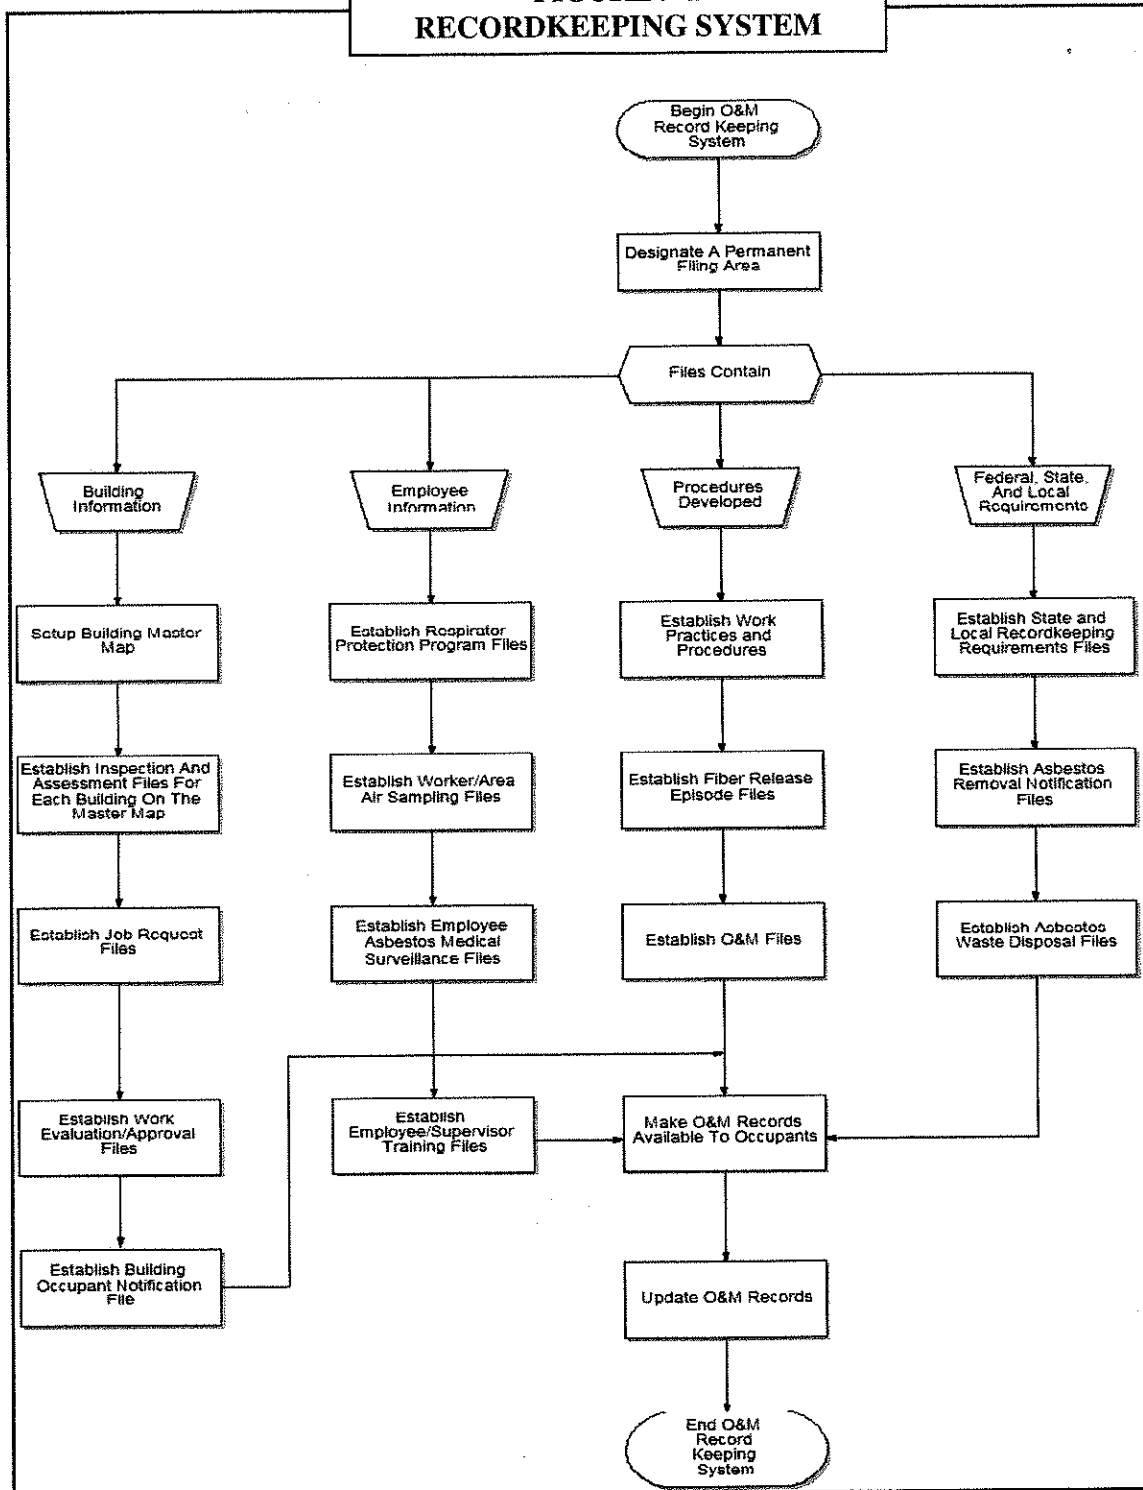

The APM retains a copy of the EPA certifications for asbestos abatement workers, building inspectors, project designers, and competent persons. The APM also maintains class attendance records for activity maintenance workers who have attended the 16-hour Asbestos O&M Awareness Course and custodial and maintenance workers who have attended the 2-hour Asbestos Awareness Course.

9.3 O&M DOCUMENTS

Many different records are required for asbestos-related work and depend on the type and extent of the asbestos-related activity being performed. Information included in the building asbestos files includes:

- Regulatory requirements
- Agency notifications
- Inspection reports, updates, and surveillance records
- Employee training records
- Employee medical and personal air monitoring records
- Notification requirements for building occupants and workers
- Sign and labeling information and regulatory agencies
- Asbestos abatement records
- Waste disposal requirements
- Work permits for activities that might disturb ACM

**FIGURE 9-1
RECORDKEEPING SYSTEM**

SECTION 10 ASBESTOS WASTE DISPOSAL

10.1 TYPES OF ASBESTOS WASTE

Material disposed of as ACM waste includes any designated as contaminated ACM waste such as ceiling tiles, lighting fixtures, fiberglass insulation, electrical fittings, and other construction materials that cannot be decontaminated. In some cases, items such as carpets, furniture, and drapes may also be designated as contaminated ACM waste. Other materials for disposal as ACM waste include PPE, all filters (including those used in respirators), HEPA-filtered exhaust units, HEPA vacuum cleaners, and water filtration units.

In some situations, certain construction materials may be cleaned and disposed of as non-asbestos contaminated waste, or the materials may be reused. In all cases, efforts are to be made to minimize the amount of asbestos waste generated.

10.2 REQUIREMENTS FOR BAGS, BARRELS, OR DRUMS

All ACM wastes must be wetted and sealed in 6-mil polyethylene plastic bags (double-bagged), or in barrels or drums that are double-lined with 6-mil polyethylene. Barrels or drums are used to contain pipe hangers or other sharp objects that could puncture or tear waste disposal bags. All bags, barrels, and drums must be permanently sealed before they are removed from the worksite and must be labeled in accordance with OSHA, EPA and Department of Transportation (DOT) requirements.

ACM containment area construction materials also must be bagged for disposal as the area is disassembled following final air clearance testing.

There are three required labels for each bag, drum or container of ACM waste.

Label #1: Required by Cal/OSHA T8 CCR 1529, OSHA 29 CFR 1926.1101, 1915.1001, and 29 CFR 1910.1001.

**DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD**

Label #2: Required by DOT, pursuant to changes that were published in the Federal Register (No. 225, November 25, 1986, page 42175) and that became effective on July 1, 1987.

**Hazardous Waste, Solid, N.O.S.,
ORM-E, NA 9188 (Asbestos) RQ**

The DOT does not require placards on vehicles transporting ACM waste.

Label # 3: As required by EPA 40 CFR 61.150 (a) (i) (v), label containers or wrapped materials that contain asbestos waste material, and that will be transported off the facility, with the name of the waste generator, and the location at which the waste was generated. For example:

ASBESTOS WASTE
State and Federal Laws prohibit improper disposal. If found, contact [Names and phone numbers of applicable agencies]
Waste Generator's Name: _____
Waste Generator's ID# (if applicable) ¹ _____
Waste Generation Location: (Address, City, State, Zip Code) _____

10.3 TRANSPORTATION REQUIREMENTS

EPA and DOT regulate the transport and disposal of asbestos-containing waste. Hand trucks, pushcarts, or other devices that are used to transport waste to a trash receptacle must be plastic-lined and kept free of ACM debris. The transport cart must be thoroughly cleaned before being used for another purpose.

The APM is responsible for ensuring the proper disposal of asbestos contaminated waste. A registered waste hauler must be used to transport ACM waste from the site. A manifest shall be prepared and certified by the hauler and disposal site operator. A copy of the manifest is forwarded to the APM for inclusion in the O&M files. The waste shall be hauled directly from the site to the pre-approved landfill. No intermediate storage or transfer is permitted.

In no case may loose asbestos waste be transported. Asbestos waste must be handled in such a way as to comply with NESHAP regulations. Absolutely no emission to the atmosphere is allowed.

10.4 LANDFILL AND DISPOSAL REQUIREMENTS

Asbestos-containing waste must be deposited at a waste disposal site that is operated in accordance with NESHAP, 40 CFR 61.154. Cal/EPA can provide current information regarding landfills that are allowed to accept ACM. A Waste Shipment Record (WSR) must accompany all asbestos-containing waste to the landfill. If a copy of this WSR, signed by the operator of the designated disposal site, is not received within 35 days of leaving the facility, contact the waste transporter or designated disposal site to determine the status of the waste shipment. If a copy of the WSR is not returned within 45 days, report in writing to Cal/EPA of the NESHAP regulation. Consult the regulation to determine what information must be reported.

APPENDIX A
REGULATIONS SUMMARY

FEDERAL REGULATIONS

40 CFR Part 61 Subpart M - National Emissions Standard for Hazardous Air Pollutants (NESHAP)

NESHAP governs asbestos demolition, construction, and removal activities in all facilities. The rule prohibits visible emissions of asbestos during demolition, renovation, and removal activities and requires appropriate work practices and procedures for the control of emissions if friable ACM is disturbed. This also includes any ACM that may become friable.

The regulation identifies friable ACM as material that can be pulverized or crumbled by hand pressure and that contains more than one percent asbestos as determined by polarized light microscopy (PLM). Category I non-friable ACM includes such materials as gaskets, resilient floor coverings, and asphalt roofing products. Category 2 non-friable ACM includes materials that cannot be crumbled by hand pressure such as transite, cement, plaster, stucco, paint, and mastic.

40 CFR Part 763 - Asbestos Hazard Emergency Response Act (AHERA)

The final rule and notice for asbestos-containing materials in schools was published in the Federal Register on 30 October 1987. Although many provisions of AHERA apply only to schools, the training requirements have been applied to all federal and commercial facilities.

In general, AHERA provides the technical definitions now used for all asbestos-related activities, including inventory, assessment, operations and maintenance (O&M), and abatement actions. AHERA requirements for personnel training, monitoring, inspection, routine cleaning, and maintenance and repair actions are also outlined in the body of this plan.

AHERA has the following requirements:

- Identify friable and non-friable asbestos.
- Monitor and periodically reinspect ACM.
- Develop and update management plans.
- Determine and implement response actions, and an O&M plan.
- Notify building occupants and outside contractors of ACM identified in the building.
- Perform all required actions by accredited persons.

Under AHERA, suspect materials may be assumed to contain ACM. To determine whether suspect materials contain ACM, bulk sampling must be conducted according to AHERA sampling protocol. Samples are required to be analyzed by an accredited laboratory. All friable and non-friable ACM must be located and categorized as to condition.

Options for management and control of ACM under AHERA include encapsulation, enclosure, operations and maintenance, and removal. An O&M plan must be implemented where friable ACM is present or assumed to be present. Cal/OSHA T8 CCR 1529, OSHA Construction Standard (29 CFR 1926.1101), and Environmental Protection Agency (EPA) Worker Protection Rule (40 CFR 763.121) cover workers performing O&M and repair activities. The O&M plan must include surveillance of ACM at least once a year and directions for responding to fiber release episodes. Record-keeping requirements under AHERA include a detailed written description of the location and amount of asbestos; O&M management plan of any preventative or response action taken involving ACM; and records for air monitoring, training, surveillance, cleaning, fiber release episodes, and re-inspections.

Other requirements under AHERA include training and posting of warning labels.

Cal/OSHA T8 CCR 1529 and 29 CFR 1926.1101 - OSHA Construction Standard

Specifically covers employees who are likely to engage in demolition or construction activities that expose them to asbestos. Activities may include removal, encapsulation, alteration, repair, maintenance, insulation, spill emergency clean-up, transportation, and disposal and storage of ACM. According to this regulation, building occupants are also considered employees.

Asbestos exposure limits include the following:

- The permissible exposure limit (PEL) is 0.1 f/cc, 8-hour time weighted average, (8-hr/TWA). TWA refers to exposure over an 8-hour day.
- The excursion limit is 1.0 f/cc measured over a 30-minute period.

If employees are exposed to asbestos at or above the PEL level, the following steps must be initiated by the employer:

- Provide medical surveillance if the PEL level exceeds 30 or more days a year or if a negative pressure respirator is used.
- Record employees' exposure to asbestos through daily personal air monitoring.
- Notify employees of air monitoring results as soon as possible.
- Inform employees and reduce fiber levels if the PEL or excursion limits are exceeded.

If employees are exposed to asbestos that cannot be reduced to below the PEL, then the following steps must be taken by the employer:

- A regulated area must be established when the PEL or excursion limit is exceeded.
- Access to the regulated area must be limited.
- A negative pressure enclosure must be established around the regulated area.

- All persons must be provided with proper respirators.
- A "competent person" must be present on-site.

A "competent person" is equivalent to an EPA/AHERA-accredited abatement supervisor/contractor. "Competent person" responsibilities include identifying asbestos hazards, taking corrective actions as appropriate, ensuring the integrity of the negative pressure enclosure, controlling entry to and exit from the asbestos regulated area, ensuring that all employees have proper personal protective equipment (PPE), and that engineering controls are performed correctly.

Several engineering and housekeeping controls that can be utilized to reduce exposure include the use of high-efficiency particulate air filter (HEPA) ventilation and vacuums, wet cleaning methods, proper work practices, and PPE.

Hazard communication measures require the use of warning signs posted outside regulated areas. The signs read as follows:

**DANGER, ASBESTOS
CANCER AND LUNG DISEASE HAZARD
AUTHORIZED PERSONNEL ONLY
RESPIRATORS AND PROTECTIVE CLOTHING
ARE REQUIRED IN THIS AREA**

Hazard labels are to be attached to products or waste containers containing asbestos and must read as follows:

**DANGER
CONTAINS ASBESTOS FIBERS
AVOID CREATING DUST
CANCER AND LUNG DISEASE HAZARD**

Other requirements under OSHA include training, medical surveillance monitoring, record keeping, and respiratory protection.

29 CFR 1910.1001 - Asbestos, Tremolite, Anthophyllite, and Actinolite

This standard defines controlled areas and the PEL level requirements for airborne asbestos; outlines monitoring, air sampling and analysis; and discusses items such as the respiratory protection program warning signs and medical surveillance. This standard generally applies to industry and includes many of the same requirements as OSHA 29 CFR 1926.1101.

FEDERAL GUIDANCE

EPA 560/5-85-024 - Guidance for Controlling Asbestos-Containing Materials in Buildings

This document, also commonly referred to as the "Purple Book," offers guidance on the technical asbestos issues, the identification of asbestos in buildings, planning a control program, and choosing the proper corrective action, if necessary. Chapter 3 provides guidance on establishing an O&M Program and outlines the purpose, participants, and elements of the plan. Much of the information in this section of the "Purple Book" also appears in this O&M Program.

EPA 560-OPTS-86-001 - A Guide to Respiratory Protection for the Asbestos Abatement Industry

The elements for an asbestos operations respiratory protection program are outlined in this document. Guidance is provided for developing a standard operating procedure for respirator use, such as respirator selection, required training, fit testing, and maintenance. Much of the detailed information concerning respiratory protective equipment program requirements is incorporated into the O&M Plan.

APPENDIX B

ASBESTOS REASSESSMENT RESULTS

TABLE B-1

TABLE B-2

I. GENERAL CONCEPT

Whenever possible, take bulk samples of all suspect ACM for laboratory analysis. Suspect materials are presumed to contain asbestos if not sampled. As a minimum take bulk samples of damaged, and significantly damaged materials for immediate abatement action. Place all presumed asbestos containing materials (PACM) on the activities O&M plan.

II. ASBESTOS FACILITY INVENTORY INSTRUCTIONS

A. Facility Inspections

Have an EPA accredited inspector inspect each occupied or accessible facility space in an activity. A qualified inspector is one who has completed an EPA approved 3-day training course and obtained a minimum score of 70 percent on examination. The inspector must attend an annual half day refresher course to remain accredited.

The inspection process focuses on identifying (1) surfacing material, (2) thermal system insulation, and (3) miscellaneous materials. All of which are likely to contain asbestos. Locate these materials and define homogeneous sampling areas. Sample and analyze suspect materials for asbestos. If not sampled the suspect materials must be presumed to contain asbestos. Follow appropriate O&M practices and response actions for all areas presumed to contain asbestos. Sample all damaged or significantly damaged suspect materials.

EPA's "Asbestos in Buildings: Simplified Sampling Scheme for Friable Surfacing Materials," EPA Publication 560/5-85-030a, October 1985, also known as the "pink book", outlines specific inspection and assessment guidance. Each inventory/assessment shall include, but is not limited to:

1. Identifying all locations of suspected ACM through visual inspection;
2. Determining friability of all ACM through touch (using EPA guidance);
3. Identifying all suspected friable and non-friable homogeneous areas;
4. Identifying homogeneous areas assumed to contain asbestos (sampling is not required if the area is assumed to contain asbestos, but the area must be placed on the activity's O&M plan and treated as ACM);
5. Collecting and submitting samples for all areas of suspected material that are not assumed to be ACM;
6. Assessing the condition of material;
7. Recording the exact location of each sample number and the homogeneous area types on marked-up drawings, or other suitable permanent records as outlined by EPA guidance. Mark the area sampled with the sample number. Retain a complete set of records, including:
 - a. An inspection report that includes the inspection dates and signature of each accredited inspector;
 - b. Contractor's name, address, and phone number, and contractor's or inspector's State Accreditation number;
 - c. Inventory record of locations of all homogeneous areas (friable & non-friable) where samples have been collected including: exact sample location (building, room number, etc.) and dates of sample collection
 - d. A list of homogeneous areas where suspected friable material is assumed to contain asbestos (areas not sampled);
 - e. A list of homogeneous areas where suspected non-friable material is assumed to contain asbestos (areas not sampled);
 - f. A description of the manner/protocol used to determine sample locations;
 - g. A list of homogeneous areas by ACM types, i.e. surfacing materials, thermal system insulation, or miscellaneous materials;
 - h. Assessments made of friable and non-friable material conditions according to EPA definitions.

B. Sampling Strategy

It is important to group suspect materials into "homogeneous" sampling areas. A homogeneous area contains suspect materials that are uniform in texture and color and appears identical in every other respect. Materials installed at different times belong to different homogeneous areas. If there is any reason to suspect that materials might be different even though they appear uniform, assign them to separate homogeneous sampling areas. For example, material in different wings of a building, or on different floors should be assigned to separate homogeneous areas.

Collect the minimum number of samples listed below in a statistically random manner.

ACM TYPE	SIZE OF HOMOGENEOUS AREA	MINIMUM NO. OF SAMPLES
Surfacing Materials	less than or equal to 1000 square feet (sf)	3
	greater than 1000 sf and less than 5000 sf	5
	greater than 5000 sf	7
Thermal System Insulation	areas not assumed to be ACM	3
	patched areas (<6 linear feet (lf) or 6 sf)	1
Miscellaneous Material	sufficient samples from areas that are not assumed to contain ACM	1
Non-Friable Materials	sufficient samples from areas that are not assumed to contain ACM	1

NOTE: Areas that obviously contain fiberglass, foam glass, rubber, etc. do not require bulk samples. If an area is presumed to contain asbestos, then sampling is not necessary. However, follow all appropriate asbestos O&M practices and response actions whenever disturbance occurs.

C. Laboratory Analysis

The only way to determine if a homogeneous area contains asbestos is through laboratory analysis of bulk samples. Before disturbing any materials, analyze samples of the suspect materials by a laboratory to confirm the presence or absence of asbestos. Use a laboratory accredited by either the National Institute of Standards and Technology (NIST) or the American Industrial Hygiene Association (AIHA).

The EPA defines a homogeneous area as non-ACM if all samples tested contain less than 1% asbestos. Also, the National Emission Standards for Hazardous Air Pollutants (NESHAP) acknowledges 1% to be consistent with the preferred analytical methodology.

The laboratory analysis report should include the following:

1. Identification number of the sample.
2. Analytical technique used.
3. Laboratory quality control procedures.
4. Physical description of the sample as received.
5. Type(s) and estimated percentage of asbestos fiber.
6. Type(s) and percentage of other components.
7. Date of analysis.
8. Analyst name and signature.

NOTE: Notify safety and medical personnel of sample results for possible future workplace monitoring. Also, provide results to the activity Asbestos Program Manager to update files and building records.

ASBESTOS INVENTORY SUMMARY FORM AND ASBESTOS HOMOGENEOUS AREA SUMMARY FORM

The Asbestos Inventory Summary Form summarizes asbestos content and location of all homogeneous areas within a building. The form also provides building information, Asbestos Program Manager point of contact, and name of person who performed the inventory. Complete an Asbestos Inventory Summary Form for each inventoried building.

The Asbestos Homogeneous Area Summary Form describes and records data for each homogeneous area in a building. Complete an Asbestos Homogeneous Area Summary Form for each homogeneous area confirmed or suspected of containing asbestos material.

Nevertheless, if used properly as a qualitative hazard assessment guide, the Asbestos Facility Rating/Ranking System is a useful tool in scoring and ranking a buildings homogeneous areas for prioritizing abatement actions.

The Asbestos Facility Rating/Ranking Algorithm uses seven major parameters to standardize homogeneous area ratings:

1. Material Condition,
2. Percent (%) Asbestos,
3. Quantity,
4. Degree of Friability,
5. Exposure Potential,
6. Number of Personnel Potentially Exposed, and
7. Building Significance.

The Facility Asbestos Score is a combination of the material's condition (Significant Damage, Damage, or Potential Damage) and a numerical score. The material's condition is determined through a preliminary assessment following EPA guidance. The numerical score is the product of the multipliers chosen for each of the seven major parameters. The multipliers are obtained from the shaded boxes on the right side of the form.

The forms provide the activity permanent documentation of the inventory, and information on each homogeneous area. To request funding to abate damaged or significantly damaged material, transfer appropriate information to the Hazard Abatement Application Form.

Copies of the forms, and step by step instructions on how to complete the Asbestos Inventory Summary Form and the Asbestos Homogeneous Area Summary Form are as follows.

ASBESTOS INVENTORY SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
Building Number	Enter the building number found on the Property Record Card. If there is no assigned building number, note the number of an adjacent building and describe building location in the comment section.
NOTE: The following section is a summary of the information obtained from each of the Asbestos Homogeneous Area Summary Forms completed for the building.	
Number	Enter assigned homogeneous area number.
Asbestos (Y/N/A)	Enter the letter Y (Yes), N (No), or A (Assumed) to indicate if the homogeneous area contains asbestos. Choose "A" if an area has not been tested and is assumed to contain asbestos.
Location (Room No.)	Enter the appropriate room number for each homogeneous area.
Year Built	Enter the year the building was constructed from available building records
Building Type	Enter the type of building. Use the comments section on the reverse side of the form to explain unusual circumstance.
Building Significance	<p>Using the following guidelines, enter the appropriate building significance:</p> <p>CRITICAL: The mission of the command would be jeopardized without the use of this particular building. An example would be the activity's security building where the central alarm panels for the entire base are located and where operations cannot be shut down even momentarily. Any building with 24 hour industrial operations with specialized equipment that cannot be easily relocated or a communication station that cannot be shutdown are other examples.</p> <p>ESSENTIAL: Regardless of the importance of the function of the building, the function can be moved to another location at the activity.</p> <p>NON-ESSENTIAL: Facilities without operational requirements that are in a maintenance or care-taker status would fall into this category.</p>

ASBESTOS INVENTORY SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
Asbestos Program Manager	Provide the name and code of the Asbestos Program Manager overseeing the activity inventory. In most cases, the Asbestos Program Manager is located in either the Safety Office or the Environmental Department.
Phone	Enter the commercial number for the activity Asbestos Program Manager. If the commercial number is used, include the area code.
Inspector Name	Enter the name of the inspector who conducted the asbestos inventory.
Phone	Enter the inspector's phone number.
Signature	The signature of the inspector who conducted the asbestos inventory is required in the space provided.
EPA Accreditation Number	Enter the EPA Accreditation Number of inspector/contractor who conducted the asbestos inventory.
Survey Date	Enter the date(s) of the building survey. Use the Month/Day/Year format.
COMMENT SECTION	
Contractor	Enter name, address, and phone number of contractor conducting the inventory.
Comments	Use this area for additional comments or observations which will clarify existing conditions or actions

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
Homogeneous Area Number	Assign a number to the homogeneous area and enter in the space provided.

SECTION I. HOMOGENEOUS AREA SUMMARY

NOTE: Complete Section I after completing Sections II and III.

Asbestos (Y/N/A)	Enter the letter Y (Yes), N (No), or A (Assumed) to indicate if the homogeneous area contains asbestos. Choose "A" if an area has not been tested and is assumed to contain asbestos.
Friable (Y/N)	Enter the letter Y (Yes) or N (No) to indicate if the asbestos in this homogeneous area is friable.
Building Number	Enter the building number found and/or location. If there is no assigned building number, note the number of an adjacent building and describe building location in the comment section.
Rating Score	Enter the rating score for each homogeneous area as determined by the algorithm.
Quantity (SF/LF)	Enter the square footage area (or linear footage with an outside diameter) of the homogeneous area.
Public Access (Y/N)	Enter the letter Y (Yes) or N (No) if the building is accessed by the general public (i.e. security office, theaters, museum, etc.).
Room Number	Enter the appropriate room number for each homogeneous area.
O&M Action(s)	Determine best possible action to reduce hazard based upon guidance given in Section II, number 6. Enter the action taken in the space provided.

SECTION II. HOMOGENEOUS AREA DATA

1. Condition	<p>Circle the material condition and enter corresponding base score into shaded box to the right. Determine the materials condition using the categories listed below:</p> <p>SIGNIFICANT DAMAGE (SD): ACM significantly damaged, deteriorated or delaminated, or where the damage is extensive and severe (see definitions for each functional type of ACM such as thermal system insulation (TSI), surfacing materials, or miscellaneous ACM for significant damage examples).</p> <p>NOTE: As general guidance, SD versus D may be determined by the extent and the severity of damage. Areas with greater than 10% evenly distributed damage or greater than 25% localized damage are to be considered SD. The condition abbreviations SD, D, and PD must precede the Rating Score i.e. SD87, D36, etc.</p> <p>DAMAGE (D): ACM or covering is damaged, deteriorated, or delaminated (see definitions for each functional type of ACM such as thermal system insulation (TSI), surfacing materials, or miscellaneous ACM for damage examples).</p> <p>POTENTIAL DAMAGE (PD): ACM in an area regularly used by occupants (includes maintenance areas) in the course of normal activities and where the material may become damaged from changes in building use, operations and maintenance practices, change in occupancy or recurrent damage</p>
---------------------	--

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
<p>1. Condition (cont.)</p>	<p>NOTE: A specific description of the ACM's condition should be included in the comments section (on the reverse side of the form) when appropriate. Descriptions should include:</p> <p>(1) Type of damage: flaking, blistering, water damage, etc. (2) Severity of damage: major flaking, severely torn jacket, minor tears, etc. (3) Extend or spread of damage or the percentages of homogeneous area.</p>
<p>2. Quantity (SF/LF/D)</p>	<p>Measure the quantity of ACM in square feet (SF) for surfaces or linear feet (LF) for piping (include pipe diameter). Record the amount, the unit (SF or LF) and the pipe diameter in the space provided.</p>
<p>Quantity Range</p>	<p>Circle the appropriate quantity range, i.e. <1000 square feet or >5000 linear feet, and enter the corresponding multiplier into the shaded box to the right.</p>
<p>3. Friability</p>	<p>Circle the appropriate friability category and enter the corresponding multiplier into the shaded box to the right.</p> <p>A simple subjective test (while wearing proper personal protection equipment) will determine the degree of friability as outlined below:</p> <p>High - crumbles with the slightest touch Moderate - crumbles with very little hand pressure Low - crumbles with considerable hand pressure Non-friable - cannot be crumbled with hand pressure</p>
<p>4. Exposure Potential</p>	<p>Circle the exposure potential and enter the corresponding multiplier into the shaded box to the right. The exposure potential is determined based on the following definitions:</p> <p>ACCESSIBLE AND OCCUPIED: An area containing ACM that is occupied on a work shift or residential basis. This includes all areas where ACM is part of the immediate surroundings. For example, an overhead ACM insulated steamline even though the ACM was encapsulated in a lagging material. Another example is friable asbestos ceiling tile in an administration building that is normally occupied.</p> <p>INACCESSIBLE AND LIKELY TO EXPOSE: An area containing ACM that is entered infrequently with considerable effort to gain entry, but is likely to expose personnel. An example includes ACM insulated heating, ventilation and air conditioning (HVAC) duct that is located in a crawl space above the ceiling, but is known to leak and may cause asbestos fibers to be pulled into the duct and distributed throughout an accessible or occupied area. Another example includes a crawl space, used as a supply air plenum, which contains highly friable spray-applied ACM fireproofing.</p> <p>ACCESSIBLE AND NON-OCCUPIED: An area containing ACM that is entered for regular or preventative maintenance service, or entered on a regular basis. An example maybe a warehouse used for storage that is accessed daily, but not manned for an entire shift. Another example includes: a boiler room with friable asbestos boiler insulation where personnel normally do not occupy the facility, however, occasionally have access to the area to perform preventative maintenance activities. Another includes a parts storage warehouse with ACM ceiling tile that is accessed by personnel on a daily basis.</p>

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
<p>4. Exposure Potential (cont.)</p>	<p>INACCESSIBLE AND NOT LIKELY TO EXPOSE: An area containing ACM that is entered infrequently with considerable effort and is also unlikely to expose personnel. An example is ACM thermal system insulation encased inside a concrete slab.</p>
<p>5. Number of Persons Exposed</p>	<p>Enter the estimated number of persons likely to be exposed to this homogeneous area over an 8 hour period. Note 24 hour or other unusual schedules in the comments section on the reverse of the form.</p>
<p>Range of Personnel Exposed</p>	<p>Circle the range of the personnel likely to be exposed, based on the actual number of persons exposed, and enter the corresponding multiplier into the shaded box to the right.</p>
<p>6. Recommended Action(s)</p>	<p>Recommend a response action according to the criteria established in the EPA regulations and enter it in the space provided. The action should be sufficient to protect human health and the environment. Guidance in selecting the appropriate response action is as follows:</p> <p>I. Thermal System Insulation ACM -- Damaged or Significantly Damaged:</p> <ul style="list-style-type: none"> * Repair the damaged area (as a minimum) * Remove material if repair is infeasible <ul style="list-style-type: none"> * Maintain all TSI and covering in intact and undamaged condition (O&M Program) <p>II. Friable, Surfacing & Miscellaneous ACM -- Damaged:</p> <ul style="list-style-type: none"> * Repair the damaged area * Remove * Encapsulate * Enclosure <ul style="list-style-type: none"> * O&M Program <p>III. Friable, Surfacing & Miscellaneous ACM -- Significant Damage:</p> <ul style="list-style-type: none"> * Immediately isolate functional space * Restrict Access, if necessary * Remove * Encapsulate <ul style="list-style-type: none"> * Enclosure <p>IV. Friable, Thermal System Insulation, Surfacing Material, or Miscellaneous Material -- Potential for Damage:</p> <ul style="list-style-type: none"> * O&M Program <ul style="list-style-type: none"> * Preventative Measures <p>V. Friable, Thermal System Insulation, Surfacing Material, and Miscellaneous Material -- Potential Significant Damage</p> <ul style="list-style-type: none"> * Isolate area, if necessary * Restrict Access, if necessary * Initiate O&M Program * Initiate Preventative Measures <ul style="list-style-type: none"> * Remove the material as soon as possible <p>NOTE: Non-friable materials are subject to periodic surveillance and preventative measures as necessary.</p>

ASBESTOS HOMOGENEOUS AREA SUMMARY FORM INSTRUCTIONS

ITEM	DESCRIPTION
7. Homogeneous Area Location	Describe the location of the homogeneous area and enter it into the space provided. Use the comments section on reverse of form to explain unusual circumstances.
8. Asbestos Form	Enter the particular type or form of asbestos material identified in the space provided. The materials form and friability help to define exposure potentials and assist in the determination of abatement cost estimates. Explain other forms of ACM in the comments section on reverse side of the form.
9. Building Significance	Circle the appropriate building significance and enter the corresponding multiplier into the shaded box to the right. .

SECTION III. LABORATORY RESULTS

10. Sample Number	Enter the unique bulk sample number.
Total % Asbestos	Enter the total percentage of all asbestos identified from bulk sampling in the space provided.
Type(s)	Enter the type(s) of asbestos. There are six broad classifications including: chrysotile, amosite, tremolite, anthophyllite, crocidolite, and actinolite.
11. Percentage Asbestos	From the samples analyzed enter the largest total percent asbestos in the space provided.
Range	Circle the appropriate range based on the Percentage of Asbestos and enter the corresponding multiplier into the shaded box to the right.
12. Laboratory	Enter name and address of analytical laboratory.

SECTION IV. COMMENTS

13. Comments	Use this area for additional comments or observations which will clarify existing conditions or actions.
---------------------	--

SECTION V. AREA RE-INSPECTION

14. Area Re-inspection	If the homogeneous area remains in the building and contains or is assumed to contain asbestos, it must be placed on the activities O&M plan. This plan includes periodic re-inspection of all areas identified as ACM. The re-inspection is done to ensure there is no deterioration of the material and that it does not become a hazard to the building occupants.
-------------------------------	---

USER AND PRE-SURVEY QUESTIONNAIRES

AAI USER QUESTIONNAIRE

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfield's Revitalization Act of 2001 (the "*Brownfield's Amendments*"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "*all appropriate inquiries*" is not complete.

AAI USER QUESTIONS

1. Did a search of recorded land title records (or judicial records where appropriate, See Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Yes No NA

Note 1 – In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases, judicial records must be searched for environmental liens and AULs.

2. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Yes No NA

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes No NA

4. Does the purchase price paid for this property reasonably reflect the fair market value of the property? Yes No NA

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes No NA

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

(a.) Do you know the past uses of the property? Yes No NA

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes No NA

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes No NA

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes No NA

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes No NA

7. Do any of the following documents exist and, if so, can and will a copy be provided to CBRE provided that it falls within reasonable time and cost constraints: (If yes to any, please indicate which below)

Yes No NA

- Environment site assessment reports
- Environment compliance audit reports
- Environment permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
- Registrations for underground and above-ground storage tanks
- Registrations for underground injection systems
- Material safety data sheets
- Community right-to-know plan
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control plans; etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity and Use Limitations (AUL)

**Phase I Environmental Site Assessment
Pre-Survey Questionnaire**

Someone familiar with the site should complete this questionnaire prior to our site visit. For those questions that are not applicable or unknown, please respond "N/A" or "U/K", respectively. If you have any questions about how to answer any of the questions, please call CBRE. If additional pages for responses are necessary, please attach hereto and reference it to the appropriate question number. Upon completing this form, please email back to the sender. This document and your written response will be included as an exhibit in the final report.

Subject Name:

Project Manager:

Street:

Project No.:

City/State:

Date:

Key Site Contact:

Telephone:

Fax:

A. GENERAL

PREPARER

1. Name, title and telephone number of person completing this questionnaire:

Name

Title

Signature

Telephone Number

2. How long has the preparer been familiar with the site or facility?
If less than five years, who held the position prior?
3. Property Owner/Occupant Information

Owner's Name

Owner's Address

Occupant's Name

Occupant's Address

VALUATION REDUCTION

Was/is the purchase price of the Subject property significantly less than the purchase price of comparable properties due to environmental conditions?

Yes No U/K

If yes, please explain below.

B. Property Description

1. Land

- a. Size of Parcel? _____ Acres

- b. Shape of Parcel? Rectangular Irregular Other

- c. Are there any surface waters or wetlands on the site? Yes No U/K

- d. Is there a well on the site? Yes No U/K

If yes, what type of well is it?:

Drinking Water
Irrigation
Monitoring
Dry Well

- Have contaminants in excess of governmental guidelines been identified in the water? Yes No
- e. Was or is there a septic system on the property? Yes No U/K
 If yes, is the septic system currently in use? Yes No
- f. Has fill been imported onto the Subject? Yes No U/K
- g. Are there currently or has there previously been waste treatment or disposal pits, ponds, or lagoons on the site? Yes No U/K
- h. Where is the site's stormwater discharged to? _____

B. PROPERTY DESCRIPTION – continued

2. **Site Improvements** This includes all buildings N/A
- a. Describe the size (square foot) of the existing building(s).
- b. How old is the building(s)?
- c. Describe the heating and cooling system.
- d. Who provides the following utilities?
- Water: _____
- Sanitary Sewer: _____
- Storm Drainage: _____
- Natural Gas: _____
- Electric: _____
- e. Are there any floor drains on the site? Yes No U/K
 If yes, where do they discharge to?
3. **Site History**
- a. Were there any buildings or other improvements on the property prior to the existing improvements? Yes No U/K
 If yes, what were they?
- b. Is or has the property been used for industrial or agricultural purposes, or as a gasoline station, auto repair, dry cleaner, junkyard, or landfill? Yes No U/K

If yes, please describe.

B. PROPERTY DESCRIPTION – continued

4. Site Operations

To the best of your knowledge, do any of the following operations take place on the Subject or have ever taken place on the Subject:

- | | | | |
|--------------------------|--|------------------------------|-----------------------------|
| <input type="checkbox"/> | Dry Cleaning: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Battery Storage/Sales: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Paint Storage/Sales: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Petroleum Storage/Sales: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Photo or X-Ray Finishing: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Electronic Equipment
Assembly or Manufacturing: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Solvent Storage or Sales: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Chemical Manufacturing/Sales: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Automobile Storage, Repair, or Disposal: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Agriculture: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |
| <input type="checkbox"/> | Medical or Dental Offices: | Yes <input type="checkbox"/> | No <input type="checkbox"/> |

5. Previous Studies/Documentation

a. Do you have any knowledge of previously prepared Environmental Site Assessment Reports, asbestos surveys, lead-based paint studies or testing (soil, groundwater, tank tightness testing, lead-based paint testing, asbestos testing, indoor air quality, mold (bacteria and fungi testing), etc.) conducted on the site? If yes, please either provide copies of the reports or list the title, date, preparer and recipient of such report(s) below:

I have no knowledge of any environmental related studies or reports prepared on the Subject.

b. Are you in possession of a title report, site drawings, building drawings and specifications and/or a survey for the site? Yes No

If yes, please provide copies of same.

Please provide all available environmental information from yours or your Client's records including, but not limited to, documentation in connection with any pending or threatened public or private proceedings or litigation with respect to environmental liability, environmental permits and permit applications, underground and above ground tank registration and information (including removal and testing of such tanks), environmental reports, asbestos, lead-based paint or indoor air quality studies, spill information and compliance information and programs.

C. SURROUNDING PROPERTIES

1. Has any adjoining properties been used for industrial purposes, or as a gasoline station, auto repair shop, junkyard, dry cleaner or landfill? Yes No U/K
If yes, please explain.
2. Are you aware of any contamination conditions on adjoining or nearby properties? Yes No U/K
3. Are there any open surface waters or wetlands adjoining to the site? Yes No U/K
4. Are you aware of any active or former waste treatment or disposal pits, ponds, or lagoons on adjoining or nearby sites? Yes No U/K
5. Is any neighboring property engaged in the storing, transporting or disposal of hazardous waste, or chemicals? Yes No U/K

D. REGULATORY

1. Are you aware of any pending, threatened, or past litigation relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes No U/K
If yes, please explain.
2. Are you aware of any pending, threatened, or past administrative proceedings relevant to *hazardous substances* or *petroleum products* in, on, or from the *property*? Yes No U/K
If yes, please state the circumstances.
3. Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to *hazardous substances* or *petroleum products*? Yes No U/K
If yes, please explain.

E. ASBESTOS

1. Do you have knowledge of any materials or substances on the site that are known or suspected to contain asbestos? Yes No U/K
If yes, what materials and where are they located?

E. ASBESTOS – continued

2. Has an inspection for asbestos ever been conducted on the Subject? Yes No U/K
3. Has asbestos been removed from the Subject? Yes No U/K
4. Does the building have:
- Spray-on or troweled-on fireproofing, insulation or finishes? Yes No U/K
 - Insulation on piping, boilers, tanks, chillers, or other mechanical equipment? Yes No U/K
 - Transite used in cooling towers, exterior walls, ceilings fascia panels, etc.? Yes No U/K
 - Resilient floor tile? Yes No U/K
 - Suspended acoustical ceiling tiles? Yes No U/K
 - A built-up or rolled roofing system? Yes No U/K

F. PCBs

1. Are there any on-site electrical transformers? Yes No U/K
- If yes, do any of the transformers contain PCBs? Yes No U/K
- Who owns the transformers and where are they located?
2. Did any on-site transformers formerly contain PCBs, but later had the dielectric fluid replaced? Yes No U/K
3. Is there any hydraulic equipment such as elevators or automotive lifts on-site? Yes No U/K
- If yes, who services the equipment?
- Are you aware of any hydraulic fluid leaks or evidence of leakage such as unexplained fluid loss in connection with the hydraulic equipment? Yes No U/K

F. Storage Tanks

1. Are there any (active or inactive) Underground Storage Tanks (UST) or Aboveground Storage Tanks (AST) on the site? Yes No U/K

If yes, please fill out the following schedule:

Active or Inactive Tanks

Location of Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Age of Tank (Years)	Does the Tank Have Corrosion Protection? (Yes/No)	Does the Tank Have Leak Detection? (Yes/No)	Is the Tank In-Use? (Yes/No)

Have any of the tanks been tightness tested? Yes No U/K

1. Do you have any knowledge of tanks that were either removed or closed in-place at the site? Yes No U/K

If yes, please fill out the following schedule:

Tanks Removed or Closed In-Place

Location of Former Tank	Size of Tank (Gallons)	AST or UST	Tank Contents	Tank Removal Company	Year Tank Was Removed

H. LEAD

1. Are you aware of any lead-based paint (LBP) applications on the site? Yes No U/K
2. Has LBP testing been conducted? Yes No U/K
3. Have there been any reported incidences of children with elevated blood lead levels residing at the site? Yes No U/K
4. Are there any children younger than 7 years old residing at the site or frequenting the site on a daily basis? Yes No U/K
5. Have any LBP abatements been conducted? Yes No U/K

6. Has the water been tested for lead? Yes No U/K

If yes, please provide a copy of the results

I. HAZARDOUS MATERIALS

1. Are hazardous materials or chemicals stored or used on-site? Yes No U/K

If yes, please fill out the following schedule (attach separate page if more room is required):

Schedule of Hazardous or Toxic Substances Stored On-Site

Material Type	Quantity (Gallons)	Location

2. Are there any hazardous or medical waste or fluids generated or used that employ an outside service for their periodic supply and removal? Yes No U/K

If yes, please provide the name, address, & telephone number of the disposal company and the facility generating the waste.

J. INDOOR AIR QUALITY

1. Have strong mold odors and/or mold staining been observed onsite? Yes No U/K

2. Has there been any employee or tenant reports of symptoms consistent with mold contamination or other indoor air quality concerns? Yes No U/K

3. Are you aware of elevated radon gas concentrations on-site? Yes No U/K

AAI USER QUESTIONNAIRE

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30 and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

AAI USER QUESTIONS

1. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law? Yes No NA

Note 1 - In certain jurisdictions, federal, tribal, state or local statutes, or regulations specify that environmental liens and Activity and Use Limitations (AULs) be filed in judicial records rather than in land title records. In such cases, judicial records must be searched for environmental liens and AULs.

2. Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law? Yes No NA

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes No NA

4. Does the purchase price paid for this property reasonably reflect the fair market value of the property? Yes No NA

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property? Yes No NA

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

(a.) Do you know the past uses of the property? Yes No NA

(b.) Do you know of specific chemicals that are present or once were present at the property? Yes No NA

(c.) Do you know of spills or other chemical releases that have taken place at the property?

Yes No NA

(d.) Do you know of any environmental cleanups that have taken place at the property?

Yes No NA

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?

Yes No NA

7. Do any of the following documents exist and, if so, can and will a copy be provided to CBRE provided that it falls within reasonable time and cost constraints: (If yes to any, please indicate which below)

Yes No NA

- Environment site assessment reports
- Environment compliance audit reports
- Environment permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)
- Registrations for underground and above-ground storage tanks
- Registrations for underground injection systems
- Material safety data sheets
- Community right-to-know plan
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure and control plans; etc.
- Reports regarding hydrogeologic conditions on the property or surrounding area
- Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property
- Hazardous waste generator notices or reports
- Geotechnical studies
- Risk assessments
- Recorded Activity and Use Limitations (AUL)

Carol Noland

Project Manager, Newbury Park, CA

CBRE

M 805 574 0048
carol.noland@cbre.com

2375 Adrian Street
Newbury Park CA 91320

Experience

Carol Noland is a Project Manager in the Environmental Advisory Service of Valuation & Advisory Services. She has over 27 years of experience as an Environmental Professional performing Phase I Environmental Site Assessments throughout the United States, with primary experience in California and other western States. She has conducted over 3,000 Phase I ESAs on various types of properties, including large-scale industrial and manufacturing sites, as well as commercial, residential, and agricultural properties. She is also experienced in conducting radon sampling, asbestos surveys, lead-based paint testing, and lead-in-water testing.

Ms. Noland's skill and experience in the research, evaluation, and summarizing of various historical land use sources and regulatory records provide her with the ability to identify and provide practical responses to open environmental issues on due diligence studies.

CBRE

T 619-254-3124
M 619-549-7140
Scott.pritchard@cbre.com

5780 Fleet Street
Carlsbad, CA 92008

Experience

Mr. Pritchard is an Environmental Professional (EP) with more than 20 years of experience as an environmental consultant. Mr. Pritchard is a Director (Environmental Site Assessment Division) in CBRE's - Assessment & Consulting Services - West Coast Region; more specifically, southern California. He has in depth knowledge of regulatory guidelines and compliance requirements with the USEPA, ASTM and numerous local government agencies throughout the country. He has reviewed/managed over 3,000 Phase I Environmental Site Assessments (ESAs), and performed over 1,000 Phase I ESAs on various types of real estate to include commercial office and retail, multi-family residential, and industrial and light industrial developments. He has also performed Phase I ESAs throughout the continental U.S., Hawaii and Baja Mexico. In addition, he conducts third party reviews, government agency file reviews and asbestos and lead-based paint surveys as well as designs Operations and Maintenance (O&M) programs for same.

Mr. Pritchard's approach focuses on maximizing research and technical resources for early resolution of potential environmental issues before moving into the next phase. He has been responsible for the rapid development of practical alternatives to address open environmental issues on due diligence studies. His environmental skills and training enable him to provide timely recommendations tailored to the specific needs of real estate transactions. He is experienced in dealings with regulatory agencies and multi-party transactions. He has also managed day-to-day office operations and provided quality control along with staff training and mentoring.

In 2016 (winter), Scott was awarded CBRE's Ambassador Award. The award is presented to only a handful of the hundreds of nominees that embody CBRE's RISE values and who demonstrate leadership, show initiative, possess determination and provide superior service.
