

## Mitigation Monitoring and Reporting Program Mapes Road Modular Trailer Rental Yard - Conditional Use Permit 21-05080

CEQA, Section 21081.6, requires that a mitigation monitoring and reporting program (MMRP) be adopted upon certification of a Mitigated Negative Declaration to ensure that the mitigation measures are implemented. The mitigation monitoring and reporting program identifies the mitigation and when in the process it should be implemented. The **City of Perris** is the implementing responsible party for all measures. A record of the MMRP will be maintained at the City of Perris Planning Division, 135 North “D” Street, Perris, California 92570-2200.

| Impact/Threshold   | Project Mitigation Measures  | Monitoring / Timing Frequency                                    | Action Indicating Compliance  | Monitoring Party                 | Verification |      |         |

| <b>AESTHETICS</b>  |  |  |   |                                  |              |      |         |
| <i>Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?</i>  | <b>AES-1:</b> Prior to issuance of grading permits, the Project developer shall provide evidence to the City that any temporary nighttime lighting installed for security purposes shall be downward facing and hooded or shielded to prevent security light spillage outside of the staging area or direct broadcast of security light into the sky.  | Prior to issuance Notice to Proceed with Construction Contractor | Confirmation that construction contracts include required restriction | City of Perris Planning Division |              |      |         |
| <b>BIOLOGICAL RESOURCES</b>  |  |  |   |                                  |              |      |         |
| <i>Have a substantial adverse effect, either directly or through habitat modification, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?</i> | <b>BIO-1:</b> A pre-construction survey for resident burrowing owls shall be conducted by a qualified biologist within 30 days prior to commencement of grading and construction activities within those portions of implementing project sites containing suitable burrowing owl habitat and for those properties within an implementing project site where the biologist could not gain access. If ground disturbing activities in these areas are delayed or suspended for more than 30 days after the pre-construction survey, the area shall be resurveyed for owls. The pre-construction survey and any relocation activity shall be conducted in accordance with the current Burrowing Owl Instruction for the Western Riverside MSHCP. | Prior to issuance of Grading Permit                              | Monitoring report submitted to City of Perris Planning Division       | City of Perris Planning Division |              |      |         |

|                  |  |                               |                              |                  | Initials     | Date | Remarks |
|                  | <p>If active nests are identified during the pre-construction survey, the nests shall be avoided, or the owls actively or passively relocated. To adequately avoid active nests, no grading or heavy equipment activity shall take place within at least 250 feet of an active nest during the breeding season (February 1 through August 31), and 160 feet during the non-breeding season.</p> <p>If burrowing owls occupy any implementing project site and cannot be avoided, active or passive relocation shall be used to exclude owls from their burrows, as agreed to by the City of Perris Planning Division and the California Department of Fish and Wildlife (CDFW). Relocation shall be conducted outside the breeding season or once the young are able to leave the nest and fly. Passive relocation is the exclusion of owls from their burrows (outside the breeding season or once the young are able to leave the nest and fly) by installing 1-way doors in burrow entrances. These 1-way doors allow the owl to exit the burrow, but not enter it. These doors shall be left in place 48 hours to ensure owls have left the burrow. Artificial burrows shall be provided nearby. The implementing project area shall be monitored daily for 1 week to confirm owl use of burrows before excavating burrows in the impact area. Burrows shall be excavated using hand tools and refilled to prevent reoccupation. Sections of flexible pipe shall be inserted into the tunnels during excavation to maintain an escape route for any animals inside the burrow. The CDFW shall be consulted prior to any active relocation to determine acceptable receiving sites available where this species has a greater chance of</p> |                               |                              |                  |              |      |         |

|--|--|-------------------------------------|---|----------------------------------|--------------|------|---------|
|  |  |                                     |   |                                  | Initials     | Date | Remarks |
|  | successful long-term relocation. If avoidance is infeasible, then a DBESP shall be required, including associated relocation of burrowing owls. If conservation is not required, then owl relocation shall still be required following accepted protocols. Take of active nests shall be avoided, so it is strongly recommended that any relocation occur outside of the nesting season.   |                                     |   |                                  |              |      |         |
| <i>Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?</i> | <b>BIO-2:</b> Avian Monitoring. If construction occurs between February 1st and August 31st, a pre-construction clearance survey for nesting birds should be conducted within three (3) days of the start of any vegetation removal or ground disturbing activities to ensure that no nesting birds will be disturbed during construction. The biologist conducting the clearance survey should document a negative survey with a brief letter report indicating that no impacts to active avian nests will occur. If an active avian nest is discovered during the pre-construction clearance survey, construction activities should stay outside of a no-disturbance buffer. The size of the no-disturbance buffer will be determined by the wildlife biologist and will depend on the level of noise and/or surrounding anthropogenic disturbances, line of sight between the nest and the construction activity, type and duration of construction activity, ambient noise, species habituation, and topographical barriers. These factors will be evaluated on a case-by-case basis when developing buffer distances. Limits of construction to avoid an active nest will be established in the field with flagging, fencing, or other appropriate barriers; and construction personnel will be instructed on the sensitivity of nest areas. A biological monitor should be present | Prior to issuance of Grading Permit | Monitoring report submitted to City of Perris Planning Division | City of Perris Planning Division |              |      |         |

|                  |   |                               |                              |                  | Initials     | Date | Remarks |
|                  | <p>resources that may be unearthed during ground-disturbing activities and shall be empowered to temporarily halt or divert ground-disturbing equipment to allow time for the recording and removal of the resources.</p> <p>In the event that archaeological resources are discovered at the Project Site or within the off-site Project improvement areas, the handling of the discovered resource(s) will differ, depending on the nature of the find. Consistent with California Public Resources Code Section 21083.2(b) and Assembly Bill 52 (Chapter 532, Statutes of 2014), avoidance shall be the preferred method of preservation for Native American/tribal cultural/archaeological resources. However, it is understood that all artifacts, with the exception of human remains and related grave goods or sacred/ceremonial/religious objects, belong to the property owner. The property owner will commit to the relinquishing and curation of all artifacts identified as being of Native American origin. All artifacts, Native American or otherwise, discovered during the monitoring program shall be recorded and inventoried by the consulting archaeologist.</p> <p>If any artifacts of Native American origin are discovered, all activities in the immediate vicinity of the find (within a 50-foot radius) shall stop and the Project proponent and Project archaeologist shall notify the City of Perris Planning Division and the Soboba Band of Luiseño Indians and the Pechanga Band of Luiseño Indians.
