Project Summary: ***Please note**** An earlier version of this notice included previous square footage figures and also included a proposed garage, which has since been removed from the project description. This new notice serves to correct the noticed project description, as the current proposed project entails a reduced scope. The correct project description entails the following: a Coastal Permit application to construct a new one-story, 1,296 square-foot single-family residence on a vacant lot in Stinson Beach. The project no longer includes a proposed garage to serve the residence. Please review the Mitigated Negative Declaration for the full description and background of the project as proposed.
