

APPENDIX G/INITIAL STUDY FOR A NEGATIVE DECLARATION

**Environmental Checklist Form for:
Conditional Use Permit Application No. P21-01102**

1.	Project title: Conditional Use Permit Application No. P21-01102
2.	Lead agency name and address: City of Fresno Planning and Development Department 2600 Fresno Street Fresno, CA 93721
3.	Contact person and phone number: Thomas Veatch, Planner City of Fresno Planning and Development Department (559) 621-8076
4.	Project location: 2989 South Golden State Boulevard: North of intersection of South Railroad Avenue and South Golden State Boulevard (APN: 487-150-13, 487-150-14, 487-150-15, 487-150-16, 487-020-17, 487-020-18, and 487-020-19)
5.	Project sponsor's name and address: Penny-Newman Grain Company 2989 South Golden State Boulevard Fresno, CA 93725
6.	General & Community plan land use designation: Employment – Heavy Industrial
7.	Zoning: IH – Heavy Industrial

8.

Description of project:

Conditional Use Permit Application No. P21-01102 was filed on behalf of Penny-Newman Grain Company (Project Applicant). The following section describes the proposed Penny-Newman Storage Yard (proposed project).

Existing Conditions and Land Use Designations. The project site is an approximately 43-acre site located in an industrial area in the City of Fresno. See Figure 1, Regional and Local Location. The General Plan land use designation for the project site is Employment – Heavy Industrial. The zoning is IH – Heavy Industrial.

The existing site was previously used as a storage facility for railroad equipment. The site is completely paved and includes three existing buildings, totaling approximately 4,000 square feet. The existing buildings include a scale house, a storage building, and an office building. The office building is currently occupied by BNSF Railway, and is not a part of the proposed project. Fencing is located along the south and eastern project boundaries. The project site includes 81 existing designated parking spaces.

Proposed Project. The proposed project would change the use of an existing railroad storage and operations site into a storage and distribution facility for bulk agricultural commodities, such as cottonseed and canola meal and gypsum. Figure 2 shows the proposed site plan.

The proposed project would utilize the existing scale house and storage building for on-site for operations. No modifications would be made to the existing buildings.

The project would include the installation of a truck scale, portable belt conveyor devices, and a portable restroom for employees. Existing on-site lighting would be used and additional lighting would be installed as part of the project to assist in nighttime operations. As a result, 18 pole-mounted lights would be located along the perimeter of the site.

Agricultural commodities such as cottonseed, canola meal, and gypsum would be delivered via train to the project site and would be offloaded by on-site employees using front-end tractor loaders. Two train deliveries are expected per month.

The bulk agricultural commodities would be stored in open air storage piles within the project site.

The agricultural commodities would be covered during precipitation and high wind events.

Operations

The project would utilize six of Penny Newman’s existing employees to conduct project operations. Employees would load agricultural commodities on to customer trucks to

be transported off-site. Between 40 and 90 Class 8 trucks (semi trucks) are expected be loaded at the project site per day using front-end tractor loaders.

Vehicle access to the project site would be provided through an existing asphalt-paved, gate-controlled entrance located along South Golden State Front Road just north of North Avenue in South Fresno. Trucks would queue within the project site waiting for loading. Approximately 40 trucks could be accommodated within the project site.

The project would include two employees for truck scaling, loading, and unloading operations; and four additional employees for railcar unloading activities. The facility would be operational 6 days a week, from 6:00 a.m. to 6:00 p.m. for truck loading and shipping activities. Railcars would be unloaded in the facility intermittently 24-hours a day.

Existing on-site parking spaces will be utilized for proposed operations. Of the existing 81 existing parking spaces, 14 parking spaces would be allocated for customers and visitors, and 67 parking spaces would be used for office personnel and on-site vehicles and equipment.

Utilities

- Solid Waste. FNF Roll Off Services currently services the project site for solid waste and recycling materials collecting, approximately six 10-yard dumpsters per year, totaling approximately 36 tons.
- Water. The project site is currently served by an on-site well that is read by the City of Fresno and will continue to serve as its main water source under the proposed project. The project site currently uses approximately 854,275 gallons per year and the proposed project is expected to use up to 5,000 gallons of water per month for dust control operations.
- Wastewater. The project would not connect to City wastewater service. Portable restrooms would be used on-site for employees.
- Stormwater. The Fresno Metropolitan Flood Control District (FMFCD) provides flood control and urban storm water services in the surrounding areas. Stormwater from the project site would be drained through surface drainage infrastructure and directed towards adjacent ponding basins AW, HH, and LL.

Construction. The proposed project would primarily utilize existing infrastructure on the project site. Installation of the truck scale and portable conveyance devices and restrooms would be done within approximately two weeks of project approval.

9. **Surrounding land uses and setting:**

	Planned Land Use	Existing Zoning	Existing Land Use
North	PG&E Substation	IHV ¹	IHV / PG&E ²
East	IH / OBP ³	IH / OS ⁴	IH / OBP/ IL ⁵
South	IH	IH	IH
West	IH	IH	IH

¹ Heavy Industrial District

² Heavy Industrial District/PG&E

³ Industrial-Heavy/Office and Business Park Zone

⁴ Industrial-Heavy/ Open Space

⁵ Industrial-Heavy/ Office and Business Park Zone/ Industrial-Light

As shown in Figure 3, the project site is primarily surrounded by industrial uses that include warehousing, packing and distribution, industrial materials, supplies, and manufacturing. The project site is adjacent to a truck driving school, a diesel repair shop, packing and shipping companies, and recycling centers. A Fresno Metropolitan Flood Control District (FMFCD) ponding basin is located east of the project site. A Pacific Gas & Electric (PG&E) electrical substation is located north of the project site, at the joining of South Cedar Avenue and East Annadale Avenue. Calwa Elementary School is located approximately 0.6 miles to the north. A residential area is located approximately 0.10 mile northwest of the project site boundary.

10. **Other public agencies whose approval is required (e.g., permits, financing approval, or participation agreement):**

- City of Fresno, Conditional Use Permit
- San Joaquin Valley Air Pollution Control District, Air Impact Assessment

11. **Have California Native American tribes traditionally and culturally affiliated with the project area requested consultation pursuant to Public Resources Code (PRC) Section 21080.3.1? If so, has consultation begun?**

The State requires lead agencies to consider the potential effects of proposed projects and consult with California Native American tribes during the local planning process for the purpose of protecting Traditional Tribal Cultural Resources through the California Environmental Quality Act (CEQA) Guidelines. Pursuant to PRC Section 21080.3.1, the lead agency shall begin consultation with the California Native American tribe that is traditionally and culturally affiliated with the geographical area of the proposed project. Such significant cultural resources are either sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a tribe which is either on or eligible for inclusion in the California Historic Register or local historic register, or, the lead agency, at its discretion, and support by substantial evidence, choose to treat the resources as a Tribal Cultural Resources (PRC Section 21074(a)(1-2)). According to the most recent census data, California is home to 109 currently recognized Indian tribes. Tribes in California currently have nearly 100 separate reservations or Rancherias. Fresno County has a number of Rancherias such as Table Mountain Rancheria, Millerton Rancheria, Big Sandy Rancheria, Cold Springs Rancheria, and Squaw Valley Rancheria. These Rancherias are not located within Fresno city limits.

Conducting consultation early in the CEQA process allows tribal governments, lead agencies, and project proponents to discuss the level of environmental review, identify and address potential adverse impacts to tribal cultural resources, and reduce the potential for delay and conflict in the environmental review process. (See PRC Section 21083.3.2.) Information may also be available from the California Native American Heritage Commission's Sacred Lands File per PRC Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that PRC Section 21082.3(c) contains provisions specific to confidentiality.

Currently, the Table Mountain Rancheria and Dumna Wo Wah Tribes have requested to be notified pursuant to Assembly Bill 52 (AB 52). A certified letter was mailed to the above-mentioned tribes on **March 28, 2022**. The 30-day comment period ended on **April 28, 2022**. Neither tribe requested consultation.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

<input type="checkbox"/>	Aesthetics	<input type="checkbox"/>	Agriculture and Forestry Resources
<input type="checkbox"/>	Air Quality	<input type="checkbox"/>	Biological Resources
<input type="checkbox"/>	Cultural Resources	<input type="checkbox"/>	Energy
<input type="checkbox"/>	Geology/Soils	<input type="checkbox"/>	Greenhouse Gas Emissions
<input type="checkbox"/>	Hazards and Hazardous Materials	<input type="checkbox"/>	Hydrology/Water Quality
<input type="checkbox"/>	Land Use/Planning	<input type="checkbox"/>	Mineral Resources
<input type="checkbox"/>	Noise	<input type="checkbox"/>	Population/Housing
<input type="checkbox"/>	Public Services	<input type="checkbox"/>	Recreation
<input type="checkbox"/>	Transportation	<input type="checkbox"/>	Tribal Cultural Resources
<input type="checkbox"/>	Utilities/Service Systems	<input type="checkbox"/>	Wildfire
<input type="checkbox"/>	Mandatory Findings of Significance		

DETERMINATION: (To be completed by the Lead Agency)

On the basis of this initial evaluation:

X	I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
—	I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
—	I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT (EIR) is required.
—	I find that the proposed project MAY have a “potentially significant impact” or “potentially significant unless mitigated” impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An EIR is required, but it must analyze only the effects that remain to be addressed.
—	I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or

	NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

Planner Name, Title	Date
---------------------	------

EVALUATION OF ADDITIONAL ENVIRONMENTAL IMPACTS NOT ASSESSED IN PROGRAM ENVIRONMENTAL IMPACT REPORT SCH NO. 2019050005 PREPARED FOR THE APPROVED FRESNO GENERAL PLAN (GP PEIR):

Note to preparer: For projects that are consistent with the Fresno General Plan and Zoning (or where the zoning will be changed only for the purposes of achieving consistency with the General Plan), tiering pursuant to CEQA Guidelines Section 15152 may be used. If tiering will be used, please comply with the requirements of Section 15152(g).

For projects that are not completely consistent with the Fresno General Plan and Zoning (i.e. projects that include a General Plan Amendment and/or Rezone), the provisions of CEQA Guidelines Section 15152 do not apply. However, the GP PEIR and its analysis may still be incorporated by reference to provide a basis for the project’s initial study, to address regional influences, secondary effects, cumulative impacts, and broad alternatives pursuant to CEQA Guidelines 15168(d).

1. For purposes of this Initial Study, the following answers have the corresponding meanings:
 - a. “No Impact” means the specific impact category does not apply to the project, or that the record sufficiently demonstrates that project specific factors or general standards applicable to the project will result in no impact for the threshold under consideration.
 - b. “Less Than Significant Impact” means there is an impact related to the threshold under consideration, but that impact is less than significant.
 - c. “Less Than Significant with Mitigation Incorporation” means there is a potentially significant impact related to the threshold under consideration, however, with the mitigation incorporated into the project, the impact is less than significant. For purposes of this Initial Study “mitigation incorporated into the project” means mitigation originally described in the GP PEIR and applied to an individual project, as well as mitigation developed specifically for an individual project.
 - d. “Potentially Significant Impact” means there is substantial evidence that an effect may be significant related to the threshold under consideration.

2. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g., the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g., the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
3. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
4. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
5. "Negative Declaration: Less Than Significant With Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Than Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from, "Earlier Analyses," as described in (6) below, may be cross-referenced).
6. Earlier analyses may be used where, pursuant to the tiering, Program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063(c)(3)(D). In this case, a brief discussion should identify the following:
 - a. Earlier Analysis Used. Identify and state where they are available for review.
 - b. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in the PEIR or another earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
 - c. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project.
7. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g., general plans, zoning ordinances).

Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

8. Supporting Information Sources: A source list should be attached, and other sources used or individuals contacted should be cited in the discussion.
9. The explanation of each issue should identify:
 - a. The significance criteria or threshold, if any, used to evaluate each question; and
 - b. The mitigation measure identified, if any, to reduce the impact to less than significance.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
I. AESTHETICS – Except as provided in Public Resources Code Section 21099, would the project:				
a) Have a substantial adverse effect on a scenic vista?			X	
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?			X	
c) In nonurbanized areas, substantially degrade the existing visual character or quality of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?			X	
d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?			X	

DISCUSSION

a) Have a substantial adverse effect on a scenic vista?

A scenic vista is generally defined as a public vantage point with an expansive view of a significant landscape feature. The project site is located in a developed area of the City of Fresno intended for industrial uses and is not located in an area with expansive views. The proposed project would not require the construction of any new buildings or utility facilities. The project site is primarily surrounded by industrial and commercial uses including a truck driving school, a diesel repair shop, packing and shipping companies, and recycling centers. Therefore, the proposed project would result in less-than-

significant impacts on scenic vistas.

b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?

According to the California Department of Transportation,¹ the County of Fresno has one officially designated State Scenic Highway located along State Route 180, east of Fresno. Four eligible State Scenic Highways are also located within the County of Fresno, the nearest being State Route 168 located east of the City of Clovis. Since there are no eligible or officially designated State Scenic Highways within the immediate vicinity of the project site, the proposed project would not impact a State Scenic Highway. Furthermore, scenic resources located along officially designated and eligible State Scenic Highway segments, or their viewsheds, would not be impacted by the proposed project. Therefore, the proposed project would not have the potential to damage scenic resources from designated Scenic Highway and a less-than-significant impact would occur.

c) Substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?

The project site is currently used for railroad-related storage and operations. The proposed project would make use of the existing infrastructure on-site for the storage of agricultural commodities and gypsum. The proposed project is located in an urbanized area zoned as Heavy Industrial. The surrounding visual character is that of warehousing and manufacturing facilities. The proposed project would not substantially degrade the visual character or quality of the project site and its surroundings, and as a result, a less-than-significant impact would occur.

d) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

The project site is located in an urbanized, industrial area of the City of Fresno. Lighting in the vicinity is primarily used for industrial uses with varying hours of operations. The project site has pre-existing exterior lighting already in place and operational from previous operations on-site. The proposed project would not include the construction of new buildings or structures, but would include the installation of equipment, portable restrooms, and 18 pole-mounted lights throughout the project site. In compliance with Section 15-2015(B)(6) of the City's Development Code, all new lights would be required to be shielded to limit light spillage and glare onto public right-of-way and adjoining properties. In addition, all new lights would also be required meet the most recently

¹ California Department of Transportation (n.d.). *State Scenic Highways*. Available online at: <https://dot.ca.gov/programs/design/lap-landscape-architecture-and-community-livability/lap-liv-i-scenic-h> (accessed on September 8, 2021).

adopted criteria of the Illuminating Engineering Society of North America (IESNA) for "Cut Off" or "Full Cut Off" luminaries. As a result, the proposed project would not introduce new sources of substantial light and glare to the area. The proposed project would result a less-than-significant impact related to new sources of light and glare.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
<p>II. AGRICULTURE AND FORESTRY RESOURCES – In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state’s inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and forest carbon measurement methodology provided in Forest Protocols adopted by the California Air Resources Board. Would the project:</p>				
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?				X
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?				X
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?				X
d) Result in the loss of forest land or conversion of forest land to non-forest use?				X

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?				X

DISCUSSION

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

The project site is classified as “Urban and Built-Up Land” by California Department of Conservation Farmland Mapping and Monitoring Program (FMMP).² The project site is located within an urbanized area of Fresno. There are no agricultural production uses located within or adjacent to the project site. Therefore, development of the proposed project would not convert agricultural land to a non-agricultural use. The proposed project would not result in the conversion of Prime Farmland, Unique Farmland, or Farmland of Statewide Importance to a non-agricultural use and, no impact would occur.

b) Conflict with existing zoning for agricultural use or a Williamson Act contract?

The project site is designated Employment – Heavy Industrial in the City General Plan,³ which allows for manufacturing, assembly, wholesaling, distribution, storage, small scale commercial services, and ancillary offices uses. The project site is not subject to a Williamson Act contract. Therefore, development of the proposed project would not conflict with existing zoning for agricultural use or a Williamson Act contract, and no impact would occur.

c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?

As discussed above, the project site is located within an urbanized area in a Heavy

² California Department of Conservation, 2016. California Important Farmland Finder. Available online at: <https://maps.conservation.ca.gov/DLRP/CIFF/> (accessed October 4, 2021).

Industrial zoning district within the City of Fresno. The proposed project would not conflict with the existing zoning for, or cause rezoning of, forest land or conversion of forest land to non-forest uses. As a result, no impact would occur.

d) Result in the loss of forest land or conversion of forest land to non-forest use?

As discussed above, the project site is located within an urbanized area in a Heavy Industrial zoning district within the City of Fresno. The proposed project would not conflict with the existing zoning for, or cause rezoning of, forest land or conversion of forest land to non-forest uses. The proposed project would not result in the loss of forest land or conversion of forest land to non-forest uses. As a result, no impact would occur.

e) Involve other changes in the existing environment, which, due to their location or nature, could result in conversion of Farmland to non-agricultural use or conversion of forest land to non-forest use?

As discussed above, the project site is classified as “Urban and Built-Up Land” by California Department of Conservation FMMP.⁴ Proposed project would not convert agricultural land to a non-agricultural use, nor would the proposed project conflict with the existing zoning for, or cause rezoning of, forest land or conversion of forest land to non-forest uses. As a result, the proposed project would not adversely affect agricultural or forestry resources and no impact would occur.

Mitigation Measures

None

⁴ California Department of Conservation, 2016. op.cit.

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
III. AIR QUALITY – Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:				
a) Conflict with or obstruct implementation of the applicable air quality plan (e.g., by having potential emissions of regulated criterion pollutants which exceed the San Joaquin Valley Air Pollution Control Districts (SJVAPCD) adopted thresholds for these pollutants)?			X	
b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?			X	
c) Expose sensitive receptors to substantial pollutant concentrations?			X	
d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?			X	

DISCUSSION

a) Conflict with or obstruct implementation of the applicable air quality plan?

The City of Fresno is part of the San Joaquin Valley Air Basin (SJVAB), which is within the jurisdiction of the San Joaquin Valley Air Pollution Control District (SJVAPCD). The SJVAPCD is responsible for air quality regulation within the eight-county San Joaquin Valley region.

Both the State and the federal government have established health-based Ambient Air Quality Standards (AAQS) for six criteria air pollutants: carbon monoxide (CO), ozone (O₃), nitrogen dioxide (NO₂), sulfur dioxide (SO₂), lead, and suspended particulate matter (PM_{2.5} and PM₁₀). The SJVAB is designated as non-attainment for O₃ and PM_{2.5} for federal standards and non-attainment for O₃, PM₁₀, and PM_{2.5} for State standards.

CEQA requires that certain proposed projects be analyzed for consistency with the applicable air quality plan. An air quality plan describes air pollution control strategies to be implemented by a city, county, or region classified as a non-attainment area. The main purpose of the air quality plan is to bring the area into compliance with the requirements of the federal and State air quality standards. To bring the SJVAB into attainment, the SJVAPCD has developed the 2013 Plan for the Revoked 1-Hour Ozone Standard (Ozone Plan), adopted on September 19, 2013. The SJVAPCD also adopted the 2016 Plan for the 2008 8-Hour Ozone Standard in June 2016 to satisfy Clean Air Act requirements and ensure attainment of the 75 parts per billion (ppb) 8-hour ozone standard.

To assure the SJVAB's continued attainment of the USEPA PM₁₀ standard, the SJVAPCD adopted the 2007 PM₁₀ Maintenance Plan in September 2007. SJVAPCD Regulation VIII (Fugitive PM₁₀ Prohibitions) is designed to reduce PM₁₀ emissions generated by human activity. The SJVAPCD adopted the 2016 Moderate Area Plan for the 2012 PM_{2.5} standard to address the USEPA federal annual PM_{2.5} standard of 12 µg/m³, established in 2012. In addition, the SJVAPCD is in the process of developing an attainment strategy to address multiple PM_{2.5} standards (1997, 2006, and 2012 PM_{2.5} standards) and a plan to demonstrate maintenance of the 1987 PM₁₀ standard as required under the federal Clean Air Act.

For a project to be consistent with SJVAPCD air quality plans, the pollutants emitted from a project should not exceed the SJVAPCD emission thresholds or cause a significant impact on air quality. As discussed below and shown in Table 1, emissions associated with the proposed project would not exceed SJVAPCD established significance thresholds for annual ROG, NO_x, CO, SO_x, PM₁₀, or PM_{2.5} emissions. Therefore, the proposed project would not conflict with or obstruct implementation of SJVAPCD air quality plans. Therefore, impacts would be less than significant.

b) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?

The SJVAB is designated as non-attainment for O₃ and PM_{2.5} for federal standards and non-attainment for O₃, PM₁₀, and PM_{2.5} for State standards. The SJVAPCD's non-attainment status is attributed to the region's development history. Past, present, and future development projects contribute to the region's adverse air quality impacts on a cumulative basis. By its very nature, air pollution is largely a cumulative impact. No single project is sufficient in size to, by itself, result in non-attainment of ambient air quality

standards. Instead, a project's individual emissions contribute to existing cumulatively significant adverse air quality impacts. If a project's contribution to the cumulative impact is considerable, then the proposed project's impact on air quality would be considered significant.

In developing thresholds of significance for air pollutants, the SJVAPCD considered the emission levels for which a project's individual emissions would be cumulatively considerable. If a project exceeds the identified significance thresholds, its emissions would be cumulatively considerable, resulting in significant adverse air quality impacts to the region's existing air quality conditions. Therefore, additional analysis to assess cumulative impacts is unnecessary. The following analysis assesses the potential project-level construction- and operation-related air quality impacts.

Construction. Typically, short-term degradation of air quality may occur during construction activities due to the release of particulate emissions generated by grading, paving, building, and other activities.

As discussed in the Project Description, the proposed project would change the use of the project site from railroad-related storage and operations, to storing agricultural commodities that would be sold to customers. The proposed project would utilize the existing infrastructure on the project site for the new use. As such, the proposed project would not require substantial physical changes to the existing site (e.g., demolition, construction, modification of site access). Physical changes to the project site are limited to modifications related to operations, such as installation of equipment, portable restrooms, and 18 pole-mounted lights and placement of bulk agricultural commodities in piles throughout the project site. Therefore, construction would not result in a cumulatively considerable net increase of any criteria pollutant for which the region is in non-attainment under an applicable federal or State ambient air quality standards.

Operation. Long-term air pollutant emission impacts associated with the proposed project are those related to mobile sources (e.g., vehicle trips), energy sources (e.g., electricity and natural gas), and area sources (e.g., architectural coatings and the use of landscape maintenance equipment).

PM₁₀ emissions result from running exhaust, tire and brake wear, and the entrainment of dust into the atmosphere from vehicles traveling on paved roadways. Entrainment of PM₁₀ occurs when vehicle tires pulverize small rocks and pavement and the vehicle wakes generate airborne dust. The contribution of tire and brake wear is small compared to the other PM emission processes. Gasoline-powered engines have small rates of particulate matter emissions compared with diesel-powered vehicles. Energy source emissions result from activities in buildings for which electricity and natural gas are used. The quantity of emissions is the product of usage intensity (i.e., the amount of electricity or natural gas) and the emission factor of the fuel source. Typically, area source emissions consist of direct sources of air emissions located at the project site, including architectural coatings and the use of landscape maintenance equipment.

As discussed in the Project Description, the proposed project would change the use of the project site from railroad-related storage and operations, to storing agricultural commodities that would be sold to customers. The proposed project would utilize the existing buildings and equipment. Railcars may be unloaded intermittently 24 hours per day using up to three front end loaders, three skid-steer loaders, and two railcar movers. In addition, the three front end loaders and three skid-steer loaders would be used 12 hours per day, 6 days per week to load agricultural commodities on to customer trucks to be transported off-site. Between 40 and 90 trucks may visit the project site per day. It is assumed that typically, approximately 40 trucks per day are expected, but during busier times, a maximum of 90 trucks per day may occur. As discussed below, idling of trucks is limited to 5 minutes or less.

Emission estimates for operation of the proposed project were calculated using the California Emissions Estimator Model (CalEEMod) version 2020.4.0. To be conservative, this analysis assumes 180 round truck trips per day. In addition, this analysis assumes that the loaders would be used 168 hours per month for unloading the railcars and 288 hours per month for loading agricultural commodities on to customer trucks. In addition, this analysis assumes the railcars would be used 56 hours per month. Model results are shown in Table 1. CalEEMod output sheets are included in Appendix A.

Table 1: Project Operation Emissions (Tons per Year)

	ROG	NO_x	CO	SO_x	PM₁₀	PM_{2.5}
Area Source Emissions	<0.1	0.0	<0.1	0.0	0.0	0.0
Energy Source Emissions	<0.1	<0.1	<0.1	<0.1	<0.1	<0.1
Mobile Source Emissions	<0.1	1.8	0.6	<0.1	0.2	0.1
Offroad Source Emissions	0.4	3.8	3.1	<0.1	0.1	0.1
Total Project Operation Emissions	0.4	5.6	3.7	<0.1	0.3	0.2
SJVAPCD Significance Threshold	10.0	10.0	100.0	27.0	15.0	15.0
Exceed Threshold?	No	No	No	No	No	No

Source: LSA (August 2022).

CO = carbon monoxide

NO_x = nitrogen oxides

PM_{2.5} = particulate matter less than 2.5 microns in size

PM₁₀ = particulate matter less than 10 microns in size

ROG = reactive organic gas

SJVAPCD = San Joaquin Valley Air Pollution Control District

SO_x = sulfur oxides

The results shown in Table 1 indicate the proposed project's operational emissions would not exceed the significance criteria for annual ROG, NO_x, CO, SO_x, PM₁₀, or PM_{2.5} emissions. Therefore, the proposed project would not result in a cumulatively considerable net increase of any criteria pollutant for which the project region is in non-attainment under an applicable federal or State ambient air quality standards. As a result, impacts would be less than significant.

c) Expose sensitive receptors to substantial pollutant concentrations?

Sensitive receptors are defined as people that have an increased sensitivity to air pollution or environmental contaminants. Sensitive receptor locations include schools, parks and playgrounds, day care centers, nursing homes, hospitals, and residential dwelling units. The nearest sensitive receptors include residential receptors located approximately 500 feet north of the project site.

As discussed above, the proposed project would not require substantial physical changes to the existing site (e.g., demolition, construction, modification of site access). Therefore, the proposed project would not expose nearby sensitive receptors to construction equipment pollutants.

Once the project is operational, the project would include diesel truck traffic associated with loading and unloading of agricultural commodities. However, idling of trucks would be limited by the California Air Resources Board's (CARB) In-Use Off-Road Diesel Vehicles regulation, which limits idling to 5 minutes or less.

The SJVAPCD recommends conducting a screening analysis to identify projects which may have a significant health impact and provides a prioritization calculator for conducting this analysis. According to the SJVAPCD, a prioritization using the latest approved California Air Pollution Control Officer's Association (CAPCOA) methodology, is the recommended screening method. A prioritization score of 10 or greater is considered to be significant and a refined Health Risk Assessment should be performed. Based on the estimated project emissions shown in Table 1, the proposed project would result in a prioritization score of less than 1. Therefore, the project is not anticipated to result in a significant health risk impact and further analysis is not necessary. The prioritization calculator is included as Appendix B. Therefore, operation of the proposed project would not expose sensitive receptors to substantial pollutant concentrations. Potential impacts would be considered less than significant.

d) Result in other emissions (such as those leading to odors) adversely affecting a substantial number of people?

The bulk agriculture products that would be associated with the project, such as cottonseed and canola meal and gypsum, do not result in substantial odors. The proposed project would include truck and other off-road vehicle activity, which could result in diesel odor impacts. However, as discussed above, the nearest sensitive receptors include residential receptors located approximately 500 feet north of the project site. These odor emissions may be noticeable from time to time near the project site; however, they would be localized and are not likely to adversely affect people off-site by resulting in confirmed odor complaints. In addition, idling of trucks would be limited by the CARB's In-Use Off-Road Diesel Vehicles regulation, which limits idling to 5 minutes or less. Therefore, the proposed project would not create objectionable odors affecting a substantial number of people during project construction or operation, and this impact would be less than significant.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
IV. BIOLOGICAL RESOURCES – Would the project:				
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?			X	
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or US Fish and Wildlife Service?			X	
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?			X	
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?			X	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?			X	
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?			X	

DISCUSSION

a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service?

The City of Fresno identifies vegetation communities within the City that could serve as potential habitats for sensitive and special-status species in the General Plan. However, the project site is located in an urbanized, industrial area of the City of Fresno, and was previously a railroad storage facility. Due to the urban location and lack of landscaping within the project site and surrounding structures, the project site does not provide suitable habitat for special-status animal and plant species. Common wildlife species that are adapted to urban environments are expected to continue to use the project site and vicinity, as no structural modifications are proposed as part of the project. The project site is not occupied by, or suited for, any special-status species. Therefore, the proposed project would not result in direct or indirect adverse effects on special-status species, and would result in a less-than-significant impact.

b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations or by the California Department of Fish and Wildlife or the U.S. Fish and Wildlife Service?

No riparian habitat or other sensitive natural communities occur within the project site, or within the vicinity of the project site. The project site consists entirely of developed areas. As a result, the proposed project would result in a less-than-significant impact on riparian habitat and sensitive natural communities.

c) Have a substantial adverse effect on state or federally protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?

No aquatic resources are present in the project site, or within the near vicinity of the project site. The project site consists entirely of developed areas. As a result, the proposed project would result in a less-than-significant impact on protected wetlands.

d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?

The project site and surrounding areas are completely developed, and the proposed project would not interfere substantially with wildlife movement. As a result, implementation of the proposed project would result in a less-than-significant impact.

e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?

The proposed project would not conflict with any local policies or ordinances protecting biological resources. Though the proposed project is subject to provisions of the City's Municipal Code regarding trees on public property (Article 3 of Section 13 of the City of Fresno Municipal Code)⁵, the proposed project does not conflict with any of the existing ordinances. As a result, a less-than-significant impact would occur.

f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?

The City of Fresno is not located within the boundaries of any approved or draft Habitat Conservation Plan (HCP), Natural Community Conservation Plan (NCCP), or other adopted local, regional or state HCP. Therefore, development within the Planning Area would not result in any impacts to an adopted HCP or NCCP. As a result, a less-than-significant impact would occur.

Mitigation Measures

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
V. CULTURAL RESOURCES – Would the project:				
a) Cause a substantial adverse change in the significance of a historical resource as defined in Section 15064.5?			X	
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?			X	
c) Disturb any human remains, including those interred outside of formal cemeteries?			X	

DISCUSSION

a) Cause a substantial adverse change in the significance of a historical resource pursuant to Section 15064.5?

A historical resource defined by CEQA includes one or more of the following criteria: 1) the resource is listed, or found eligible for listing in, the California Register of Historical Resources (CRHR); 2) listed in a local register of historical resources as defined by Public Resources Code (PRC) Section 5020.1(k); 3) identified as significant in a historical resources survey meeting the requirements of PRC Section 5024.1(g); or 4) determined to be a historical resource by the lead agency (PRC Section 21084.1; CEQA Guidelines Section 15064.(a)). Under CEQA, historical resources include built-environment resources and archaeological sites.

Although the City of Fresno has determined that impacts to cultural resources could occur as a result of development within the City, and that unknown archaeological materials may be present underground, because no new construction or ground-disturbing activities would occur on the project site as a result of the proposed project, a less-than-significant impact on historical resources would occur.

b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to Section 15064.5?

According to the CEQA Guidelines, “When a project will impact an archaeological site, a lead agency shall first determine whether the site is an historical resource” (CEQA Guidelines Section 15064.5(c)(1)). Those archaeological sites that do not qualify as historical resources shall be assessed to determine if these qualify as “unique archaeological resources” (California PRC Section 21083.2). The proposed project does not include any ground-disturbing activities. As a result, no as-yet-unknown archaeological resources would be adversely affected by the proposed project, and a less-than-significant impact would occur.

c) Disturb any human remains, including those interred outside of formal cemeteries?

No known cemeteries or resting places for human remains have been identified on the project site or in the surrounding areas. The proposed project is in a developed area of the city intended for heavy industrial use and would not involve the construction of any new buildings or utility facilities that would necessitate ground-disturbing activities. The project site was paved for previous uses, and the proposed project intends to use the existing on-site infrastructure for future activities. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VI. ENERGY – Would the project:				
a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?			X	
b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?			X	

DISCUSSION

a) Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation?

The proposed project would use the existing buildings and structures within the project site, so no energy would be consumed from construction activities associated with the project. Installation of equipment, portable restrooms, and 18 pole-mounted lights would require small amounts of energy in the fuel consumption. Any modifications to the existing facilities, including lighting would be required to comply with any applicable requirements of the California Green Building Standards Code (Cal Green) (Title 24, Part 11), which encourages energy efficiency in new and existing developments. No other construction would occur as a part of the proposed project.

Operational energy usage is typically associated with electricity, natural gas, and fuel consumption. Since the proposed project would use the existing buildings and structures within the project site, the proposed project would not increase electricity and natural gas consumption. Therefore, operational energy usage would be limited to fuel associated with employee and truck trips and use of the loaders for loading and unloading activities. All or most of this energy would be derived from nonrenewable resources. Petroleum fuels (e.g., diesel and gasoline) would be the primary sources of energy for these activities. However, operational activities are not anticipated to result in an inefficient use of energy, as gasoline and diesel fuel would be conducted efficiently to would conserve the use of fuel to minimize costs. In addition, diesel and gasoline demand generated by

employee and truck trips and the use of loaders associated with the proposed project is assumed to be a minimal fraction of fuel consumption in Fresno County and Statewide.

Therefore, the proposed project would not result in significant impacts related to wasteful, inefficient, or unnecessary energy consumption. As a result, a less-than-significant impact would occur.

b) Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?

As discussed above, the construction and operation of the proposed project would not result in wasteful, inefficient, or unnecessary consumption of energy resources. The proposed project would not include the construction of new buildings or structures, but would include the installation of equipment, portable restrooms, and 18 pole-mounted lights throughout the project site. If any new structures would to be constructed within the project site, they would comply with California Green Building Standards Code (Cal Green) (Title 24, Part 11) and, therefore, would not conflict or obstruct State or local plans for renewable energy or energy efficiency. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VII. GEOLOGY AND SOILS – Would the project:				
a) Directly or Indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:			X	
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.			X	
ii) Strong seismic ground shaking?			X	
iii) Seismic-related ground failure, including liquefaction?			X	
iv) Landslides?			X	
b) Result in substantial soil erosion or the loss of topsoil?			X	
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			X	
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			X	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?			X	
f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?			X	

DISCUSSION

a) Directly or indirectly cause potential substantial adverse effects, including the risk of loss, injury, or death involving:

- i. **Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault (Refer to California Geological Survey Special Publication 42.).**

Surface rupture occurs when the ground surface is broken due to fault movement during an earthquake. Surface rupture generally occurs along an existing (usually active) fault trace. The California Geologic Survey (CGS) defines an active fault as one that has ruptured during the Holocene Epoch (i.e., the last 11,000 years). Areas susceptible to surface fault rupture are delineated by Alquist-Priolo Earthquake Fault Zones mapping performed by CGS⁶. The project site is not near an Alquist-Priolo Earthquake Fault Zone. In addition, no known active or potentially active faults or fault traces are located in the vicinity of the project site. The closest active faults are the Nunez Fault, located approximately 51 miles from the project site, and the Ortigalita Fault, located approximately 62 miles from the project site. Due to the distance of these known faults, no people or structures would be exposed to potential substantial adverse effects, including the risk of loss, injury, or death from the rupture of a known earthquake fault as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map, and this would be considered a less than significant impact.

⁶ California Department of Conservation, 2021. EQ Zapp: California Earthquake Hazards Zone Application. Available online at: <https://www.conservation.ca.gov/cgs/geohazards/eq-zapp> (accessed October 25, 2021)

ii. Strong seismic ground shaking;

The City of Fresno is located in an area with historically low to moderate levels of seismicity.⁷ The closest active faults are the Nunez Fault, located approximately 51 miles from the project site, and the Ortigalita Fault, located approximately 62 miles from the project site. Due to the distance to the known faults, hazards due to ground shaking would be minimal. As a result, a less-than-significant impact would occur related to strong seismic ground shaking.

iii. Seismic-related ground failure, including liquefaction;

Soil liquefaction is a phenomenon primarily associated with saturated soil layers located close to the ground surface. During ground shaking, these soils lose strength and acquire “mobility” sufficient to permit both horizontal and vertical movements. Soils that are most susceptible to liquefaction are clean, loose, uniformly graded, saturated, fine-grained sands that lie relatively close to the ground surface. However, loose sands that contain a significant amount of fine textured sediments like silt and clay may also liquefy. Based on the predicted seismic accelerations, and soil and groundwater conditions typically encountered in the region, general liquefaction potential is low in Fresno.⁸ As a result, a less-than-significant impact would occur.

iv. Landslides?

A landslide generally occurs on relatively steep slopes and/or on slopes underlain by weak materials. The project site is located on a relatively flat area and is not located next to any hills. In general, the potential for land sliding or slope failure in Fresno is very low and the project site would not be susceptible to landslides.⁹ As a result, a less-than-significant impact would occur.

b) Result in substantial soil erosion or the loss of topsoil?

Topsoil is defined as the upper part of the soil profile that is relatively rich in humus and is technically known as the A-horizon of the soil profile. The proposed project would not require the construction of any new buildings or utility facilities that would require soil grading and ground-disturbing activities. Therefore, impacts related to soil erosion and

⁷ City of Fresno, 2014. General Plan and Development Code Update: Geology and Soils. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2016/11/Sec-05-06-Geo-Fresno-MEIR.pdf> (accessed October 25, 2021)

⁸ City of Fresno, 2014. General Plan and Development Code Update: Geology and Soils. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2016/11/Sec-05-06-Geo-Fresno-MEIR.pdf> (accessed October 25, 2021)

⁹ City of Fresno, 2014. General Plan and Development Code Update: Geology and Soils. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2016/11/Sec-05-06-Geo-Fresno-MEIR.pdf> (accessed October 25, 2021)

loss of topsoil would be less than significant.

c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction, or collapse?

As described in a) above, soils on the project site would not be subject to liquefaction, lateral spreading, or landslides. No exposed soil is located within the project site, and the proposed project does not include construction of any new facilities. As a result, a less-than-significant impact would occur.

d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994, as updated), creating substantial direct or indirect risks to life or property?

Expansive soils are characterized by the potential for shrinking and swelling as the moisture content of the soil decreases and increases, respectively. Shrink-swell potential is influenced by the amount and type of clay minerals present and can be measured by the percent change of the soil volume. The soil in the project site is Hesperia fine sandy loam, which has a moderate infiltration rate and a moderately fine to moderately coarse texture. This soil type has a low to moderate shrink-swell potential. However, the proposed project does not include construction of any new facilities. As a result, a less-than-significant impact would occur related to expansive soils to a less-than-significant level.

e) Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

The project site is currently served by a wastewater conveyance system maintained by the City of Fresno. Wastewater from the City's collection system is treated at the City's wastewater treatment plant. Development of the proposed project would not involve the use of septic tanks or alternative wastewater disposal systems. As a result, a less-than-significant impact would occur.

f) Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?

No paleontological resources or unique geological features are known to exist within or in the vicinity of the project site, and the proposed project is not expected to alter or destroy a paleontological resource, site, or unique geologic feature. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
VIII. GREENHOUSE GAS EMISSIONS – Would the project:				
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?		X		
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?			X	

DISCUSSION

a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?

Greenhouse gas (GHG) emissions are present in the atmosphere naturally, and are released by natural sources, or are formed from secondary reactions taking place in the atmosphere. However, over the last 200 years, human activities have caused substantial quantities of GHGs to be released into the atmosphere. These extra emissions are increasing GHG concentrations in the atmosphere, and enhancing the natural greenhouse effect, which is believed to be causing global climate change. The gases that are widely seen as the principal contributors to human-induced global climate change are:

- Carbon dioxide (CO₂)
- Methane (CH₄)
- Nitrous oxide (N₂O)
- Hydrofluorocarbons
- Perfluorocarbons
- Sulfur Hexafluoride

Certain gases, such as water vapor, are short-lived in the atmosphere. Others remain in the atmosphere for significant periods of time, contributing to climate change in the long term. Water vapor is excluded from the list of GHGs above because it is short-lived in the atmosphere and its atmospheric concentrations are largely determined by natural processes, such as oceanic evaporation.

These gases vary considerably in terms of Global Warming Potential (GWP), which is a concept developed to compare the ability of each GHG to trap heat in the atmosphere relative to another gas. GWP is based on several factors, including the relative effectiveness of a gas to absorb infrared radiation and the length of time that the gas remains in the atmosphere (“atmospheric lifetime”).

The GWP of each gas is measured relative to CO₂, the most abundant GHG; the definition of GWP for a particular GHG is the ratio of heat trapped by one unit mass of the GHG to the ratio of heat trapped by one unit mass of CO₂ over a specified time period. GHG emissions are typically measured in terms of pounds or tons of “CO₂ equivalents” (CO₂e).

The *State CEQA Guidelines* indicate that a project would normally have a significant adverse green-house gas emission impact if the project would:

- Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment; or
- Conflict with an applicable plan, policy, or regulation adopted for the purpose of reducing the emissions of greenhouse gases.

Section 15064.4 of the *State CEQA Guidelines* states that: “A lead agency should make a good-faith effort, based to the extent possible on scientific and factual data, to describe, calculate or estimate the amount of greenhouse gas emissions resulting from a project.” In performing that analysis, the lead agency has discretion to determine whether to use a model or methodology to quantify greenhouse gas emissions, or to rely on a qualitative analysis or performance-based standards. In making a determination as to the significance of potential impacts, the lead agency then considers the extent to which the proposed project may increase or reduce greenhouse gas emissions as compared to the existing environmental setting, whether the project emissions exceed a threshold of significance that the lead agency determines applies to the proposed project, and the extent to which the proposed project complies with regulations or requirements adopted to implement a statewide, regional, or local plan for the reduction or mitigation of greenhouse gas emissions.

Therefore, consistent with the *State CEQA Guidelines*, Section 15183.5, if a project is consistent with an adopted qualified Greenhouse Gas Reduction Strategy that meets the standards, it can be presumed that the proposed project would not have significant greenhouse gas emission impacts.

The City of Fresno’s GHG Reduction Plan Update meets the requirements for a Qualified Greenhouse Gas Reduction Strategy and is designed to streamline environmental review of future development projects in the city, consistent with State CEQA Guidelines Section 15183.5.

The GHG Reduction Plan Update conforms with existing applicable State climate change policies and regulations to reduce local community GHG emissions to 40 percent below

1990 levels by the year 2030, consistent with the State objectives set by SB 32. The GHG Plan Update outlines strategies that the City will undertake to achieve its proportional share of GHG emission reductions. The GHG Reduction Plan Update includes a Consistency Checklist to help the City provide a streamlined review process for new development projects that are subject to discretionary review pursuant to CEQA. This analysis evaluates the proposed project's consistency with the City's GHG Reduction Plan Update.

The GHG Reduction Plan Update requires an analysis of GHG emissions to ensure that the change in land use designation would not result in a significant increase in GHG emissions compared to the existing land use designation. The proposed project would not require a change the General Plan land use designation or the current zoning and would be consistent with the City's General Plan and Zoning Ordinance. Therefore, an analysis of the proposed project's estimated GHG emissions would not be required.

As stated above, the GHG Reduction Plan Update includes a Consistency Checklist to help the City provide a streamlined review process for new development projects that are subject to discretionary review pursuant to CEQA. The project's Consistency Checklist is included in Appendix C. As shown in the Consistency Checklist, since the proposed project would primarily utilize existing infrastructure on the project site, the proposed project would not conflict with measures related to energy conservation and renewable energy, water conservation, or solid waste diversion and recycling. In addition, the proposed project would not require roadway improvements and would have under 100 employees, therefore the proposed project would also not conflict with land use and transportation demand management measures. As such, the proposed project would not conflict with the applicable strategies from the GHG Reduction Plan Update.

Therefore, the proposed project would be consistent with the City's GHG Reduction Plan and would not generate GHG emissions that may have a significant effect on the environment. As such, the proposed project's GHG impact would be less than significant.

b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?

The SJVAPCD has adopted a Climate Change Action Plan (CCAP), which includes suggested best performance standards (BPS) for proposed residential development projects. However, the SVJAPCD's CCAP was adopted in 2009 and was prepared based on the State's 2020 GHG targets, which are now superseded by State policies (i.e., the 2019 California Green Building Code) and the 2030 GHG targets, established in SB 32. As such, absent any other local or regional Climate Action Plan, the proposed project was analyzed for consistency with the goals of AB 32 and the AB 32 Scoping Plan. The following discussion evaluates the proposed project according to the goals of AB 32, the AB 32 Scoping Plan, Executive Order B-30-15, SB 32, and AB 197.

AB 32 is aimed at reducing GHG emissions to 1990 levels by 2020. AB 32 requires the California Air Resources Board (CARB) to prepare a Scoping Plan that outlines the main

State strategies for meeting the 2020 deadline and to reduce GHGs that contribute to global climate change. The AB 32 Scoping Plan has a range of GHG reduction actions, which include direct regulations, alternative compliance mechanisms, monetary and non-monetary incentives, voluntary actions, market-based mechanisms such as a cap-and-trade system, and an AB 32 implementation fee to fund the program.

Executive Order B-30-15 added the immediate target of reducing GHG emissions to 40 percent below 1990 levels by 2030. CARB released a second update to the Scoping Plan, the 2017 Scoping Plan, to reflect the 2030 target set by Executive Order B-30-15 and codified by SB 32. SB 32 affirms the importance of addressing climate change by codifying into statute the GHG emissions reductions target of at least 40 percent below 1990 levels by 2030 contained in Executive Order B-30-15. SB 32 builds on AB 32 and keeps us on the path toward achieving the State's 2050 objective of reducing emissions to 80 percent below 1990 levels. The companion bill to SB 32, AB 197, provides additional direction to the CARB related to the adoption of strategies to reduce GHG emissions. Additional direction in AB 197 intended to provide easier public access to air emissions data that are collected by CARB was posted in December 2016.

As identified above, the AB 32 Scoping Plan contains GHG reduction measures that work towards reducing GHG emissions, consistent with the targets set by AB 32, Executive Order B-30-15 and codified by SB 32 and AB 197. The measures applicable to the proposed project include energy efficiency measures, water conservation and efficiency measures, and transportation and motor vehicle measures, as discussed below.

Energy efficient measures are intended to maximize energy efficiency building and appliance standards, pursue additional efficiency efforts including new technologies and new policy and implementation mechanisms, and pursue comparable investment in energy efficiency from all retail providers of electricity in California. In addition, these measures are designed to expand the use of green building practices to reduce the carbon footprint of California's new and existing inventory of buildings. The proposed project does not include construction of new structures or facilities nor necessitate any new connections to utilities; therefore, the proposed project would not conflict with any of the energy efficient measures.

Water conservation and efficiency measures are intended to continue efficiency programs and use cleaner energy sources to move and treat water. Increasing the efficiency of water transport and reducing water use would reduce GHG emissions. As noted above, the proposed project does not include construction of new structures or facilities nor necessitate any new connections to utilities; therefore, the proposed project would not conflict with any of the water conservation and efficiency measures.

The goal of transportation and motor vehicle measures is to develop regional GHG emissions reduction targets for passenger vehicles. The second phase of Pavley standards will reduce GHG emissions from new cars by 34 percent from 2016 levels by 2025, resulting in a 3 percent decrease in average vehicle emissions for all vehicles by 2020. As discussed above, the proposed project would generate between 40 and 90 daily

truck trips, and a negligible number of vehicle trips associates with employees. All vehicles traveling to the project site would comply with the Pavley II (LEV III) Advanced Clean Cars Program. Therefore, the proposed project would not conflict with the identified transportation and motor vehicle measures.

Therefore, the proposed project would comply with existing State regulations adopted to achieve the overall GHG emissions reduction goals identified in AB 32 and would be consistent with applicable plans and programs designed to reduce GHG emissions. Therefore, the proposed project would not conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of GHGs. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
IX. HAZARDS AND HAZARDOUS MATERIAL – Would the project:				
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?			X	
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?			X	
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?			X	
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?			X	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?			X	
g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury or death involving wildland fires?			X	

DISCUSSION

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?

As noted in the project description, construction associated with the project would be limited to the installation of equipment, portable restrooms and 18 pole-mounted lights. The construction and operation activities associated with the proposed project would involve the use of limited amounts of potentially hazardous materials, including but not limited to, solvents, paints, fuels, oils, and transmission fluids. However, all materials used during construction would be contained, stored, and handled in compliance with applicable standards and regulations established by the Department of Toxic Substances Control (DTSC), USEPA, and the Occupational Safety and Health Administration (OSHA). All storage, handling, and disposal of hazardous materials during project construction and operation would comply with applicable standards and regulations. As a result, a less-than-significant impact would occur.

b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and/or accident conditions involving the release of hazardous materials into the environment?

The construction and operation activities associated with the proposed project would involve the use of limited amounts of potentially hazardous materials, including but not limited to, solvents, paints, fuels, oils, and transmission fluids. All materials used during construction would be contained, stored, and handled in compliance with applicable standards and regulations established by DTSC, USEPA, and OSHA. All storage, handling, and disposal of hazardous materials during project construction and operation would comply with applicable standards and regulations. Due to the limited amounts of potentially-hazardous materials that would be used during construction and operational

activities, the proposed project would not result in a significant hazard to the public or the environment through a reasonably foreseeable upset or accident condition related to the release of hazardous materials. This impact would be considered less than significant.

c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?

The closest existing school is Calwa Elementary School located approximately 0.6 miles from the project site. As previously stated, the proposed project would not result in the use or emission of substantial quantities of hazardous materials that would pose a human or environmental health risk. In addition, all materials would be handled, stored, and disposed of in accordance with applicable standards and regulations. As a result, a less-than-significant impact would occur related to the use or emission of hazardous materials that would adversely affect an existing school.

d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?

According to the DTSC EnviroStor database,¹⁰ the project site is not located on a federal superfund site, State response site, voluntary cleanup site, school cleanup site, evaluation site, school investigation site, military evaluation site, tiered permit site, or corrective action site. A Phase I Environmental Site Assessment (ESA) was prepared for the proposed project in September 2021 (included as Appendix D of this IS/MND). The Phase I ESA identified several recognized environmental conditions (RECs) associated with the historical use of the project site, including use as a railroad yard, the use of an oil water separator, and the former use of a railroad maintenance and repair building (referred as a railroad roundhouse). The Phase I ESA determined that because the proposed project would not include any ground-disturbing activities or excavation, no further actions are required to address the existing RECs. As a result, a less-than-significant impact would occur.

e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

The nearest airports to the project site include the Fresno International Airport, located approximately 5.7 miles from the project site, Fresno Chandler Executive Airport, located approximately 4 miles from the project site, and the Sierra Sky Airport, located approximately 11 miles from the project site. Operations at the local airports are not expected to pose a safety hazard for people working at or visiting the project site.

¹⁰ California Department of Toxic Substances Control, 2007. *EnviroStor*. Available online at: <https://www.envirostor.dtsc.ca.gov/public/map/?myaddress=fresno> (accessed September 8, 2021).

Therefore, implementation of the proposed project would not expose persons to airport-related hazards, and there would be a less than significant impact.

f) Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?

The proposed project would not result in any alterations of existing roadways, and it would not physically interfere with any adopted emergency response plans or evacuation plans in Fresno. As a result, a less-than-significant impact would occur.

g) Expose people or structures, either directly or indirectly, to a significant risk of loss, injury, or death involving wildland fires?

The project site is located in an urban area and is not located in a very high fire hazard severity zone.¹¹ Therefore, the proposed project would not expose people or structures to a significant loss, injury or death involving wildland fires and a less than significant impact would occur.

Mitigation Measures

None

¹¹ Cal Fire, 2008. Fresno County Very High Fire Hazard Severity Zones in Local Responsibility Areas. Available online at: <https://osfm.fire.ca.gov/divisions/wildfire-planning-engineering/wildland-hazards-building-codes/fire-hazard-severity-zones-maps/> (accessed September 8, 2021).

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
X. HYDROLOGY AND WATER QUALITY – Would the project:				
a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?			X	
b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?			X	
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:			X	
i) Result in a substantial erosion or siltation on- or off-site;			X	
ii) Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site:			X	
iii) create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or			X	
iv) impede or redirect flood flows?			X	

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?			X	
e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?			X	

DISCUSSION

a) Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?

Construction of the proposed project would be limited to the installation of equipment and portable restrooms. This construction activity would not result in any ground-disturbance. Operation of the proposed project would not involve the handling of hazardous materials and pollutants that may be spilled or leaked that would have the potential to be transported via runoff during periods of heavy precipitation into water bodies. Operation of the proposed project would involve the use of limited amounts of potentially hazardous materials, including but not limited to, solvents, paints, fuels, oils, and transmission fluids. Furthermore, all storage, handling, and disposal of hazardous materials during project construction and operation would comply with applicable standards and regulations. Due to the limited amounts of potentially-hazardous materials that would be used during construction and operational activities, the proposed project would not violate water quality standards or substantially degrade surface or ground water quality. As a result, a less-than-significant impact would occur.

b) Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

As discussed in the Project Description, the project site is currently served by an on-site well that will continue to serve as its main water source under the proposed project. The project site is expected to use up to 5,000 gallons of water per month for dust control operations. The proposed project would not connect to City water service. In addition, the proposed project is not expected to increase impervious surfaces given that the proposed project would not involve the construction of new buildings, structures, or parking lots. Therefore, the proposed project would not substantially interfere with groundwater

recharge and would not substantially decrease groundwater supplies. The impact would be less than significant. The Project Applicant would be required to comply with all requirements of the City of Fresno Department of Public Utilities. As a result, a less-than-significant impact would occur.

c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces, in a manner which would:

i. Result in substantial erosion or siltation on- or off-site;

Implementation of the proposed project would not include ground-disturbing activities that would result in the exposure of native soils on the project site that would result in substantial erosion or siltation on- or off-site. Therefore, no mitigation measures would be needed for erosion or siltation control. The proposed project would result in a less than significant impact.

ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite;

Implementation of the proposed project would not introduce new impervious surfaces or substantially increase the rate or amount of surface runoff that would result in flooding on or off site. As a result, a less-than-significant impact would occur.

iii. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or

As discussed above, the proposed project would not result in an increase in impervious surfaces and therefore would not substantially increase runoff from the project site. The proposed project would not contribute runoff water that would exceed the capacity of an existing or planned storm water drainage system. As a result, a less-than-significant impact would occur.

iv. Impede or redirect flood flows?

The proposed project is not located within the 100-year flood hazard area as mapped by the Federal Emergency Management Agency (FEMA)¹². Therefore, the proposed project would not impede or redirect potential flood flows, and the proposed project would result in a less-than-significant impact.

¹² Federal Emergency Management Agency, 2020. FEMA Flood Map Service Center: Search By Address. Available online at: <https://msc.fema.gov/portal/search?AddressQuery#searchresultsanchor> (accessed October 12, 2021)

d) In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?

The construction and operation activities associated with the proposed project would involve the use of limited amounts of potentially hazardous materials, including but not limited to, solvents, paints, fuels, oils, and transmission fluids. However, all materials used during construction would be contained, stored, and handled in compliance with applicable standards and regulations established by the Department of Toxic Substances Control (DTSC), USEPA, and the Occupational Safety and Health Administration (OSHA). All storage, handling, and disposal of hazardous materials during project construction and operation would comply with applicable standards and regulations. In addition, the project site is not located in flood hazard, tsunami, or seiche zones. As a result, a less-than-significant impact would occur.

e) Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?

The City is located within the Kings Sub-basin, which is part of the larger San Joaquin Valley Groundwater Basin. The planning documents regarding water resources for the City include City of Fresno Urban Water Management Plan¹³, and City of Fresno Metropolitan Water Resources Management Plan.¹⁴ As noted above, construction of the proposed project would be limited to the installation of equipment and portable restrooms. This construction activity would not result in any ground-disturbance. Operation of the proposed project would not involve the handling of hazardous materials and pollutants that may be spilled or leaked that would have the potential to be transported via runoff during periods of heavy precipitation into water bodies. In addition, the project site is currently served by an on-site well that will continue to serve as its main water source under the proposed project. The project site is expected to use up to 5,000 gallons of water for dust control operations. The proposed project would not connect to City water service. As a result, the proposed project would not include any other waste discharges that could conflict with the Basin Plan. The impact would be less than significant.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XI. LAND USE AND PLANNING – Would the project:				
a) Physically divide an established community?				X
b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?			X	

Discussion

a) Physically divide an established community?

The physical division of an established community typically refers to the construction of a physical feature (such as an interstate highway or railroad tracks) or removal of a means of access (such as a local road or bridge) that would impair mobility within an existing community, or between a community and outlying areas. For instance, the construction of an interstate highway through an existing community may constrain travel from one side of the community to another; similarly, such construction may also impair travel to areas outside of the community.

The proposed project site is located in a developed area of Fresno. Heavy industrial land uses are located to the north, south and west, and heavy industrial, open space, and light industrial uses to the east of the project site. In addition, an existing railroad line is located directly adjacent to the project site. There is a PG&E substation to the north of the project site, a Fresno Metropolitan Flood Control District ponding basin to the east, and truck driving school, distribution centers, and open spaces to the south and west of the project site. The proposed project would not include the construction of any new buildings or utility facilities and would only add a truck scale, portable belt conveyors, and a portable restroom to the project site. These improvements would not affect connectivity and would not divide an established community. As a result, a less-than-significant impact would occur.

b) Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect?

The project site is designated Heavy Industrial in the General Plan. This land use designation is intended for a broad range of industrial uses including manufacturing, assembly, wholesaling, distribution, storage, small scale commercial services, and ancillary office uses. The project site is in a Heavy Industrial zoning district, which is intended for industrial, office, research and development, and flexible commercial use to provide employment opportunities and strengthen the City of Fresno's economy.

The proposed project would not require a change in the General Plan land use designation or the current zoning and would be consistent with the City's General Plan and Zoning Ordinance. Additionally, the proposed project would not conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect and therefore would result in a less than significant impact.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XII. MINERAL RESOURCES – Would the project:				
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?			X	
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?			X	

DISCUSSION

a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?

The Surface Mining and Reclamation Act (SMARA) regulates surface mining in California. SMARA was adopted in 1975 to protect the State’s need for a continuing supply of mineral resources and to protect the public and environmental health. In compliance with SMARA, the State Mining and Geology Board (SMGB) established Mineral Resources Zones (MRZs) to classify lands that contain mineral deposits. The project site is located within an urban area on an infill site. There are no known mineral resources within or in the vicinity of the project site. The principal area for mineral resources is located along the San Joaquin River Corridor. The Resource Conservation and Resilience Element of the City’s General Plan includes several policies to conserve aggregate mineral resources.¹⁵ The proposed project is not located near the San Joaquin River or other areas of identified mineral resources. The proposed project would not result in the loss of availability of a known mineral resource of value to the region or residents of the State. As a result, a less-than-significant impact would occur.

b) Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan, or other land use plan?

The project site is located within an urban area on an infill site and there are no known mineral resources within or in the vicinity of the project site. The proposed project would

¹⁵ City of Fresno, 2014. Fresno General Plan: Resource Conservation and Resilience. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2016/11/GP7ResourceConservation.pdf> (accessed on October 25, 2021)

not result in the loss of availability of any known locally-important mineral resource recovery sites. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIII. NOISE – Would the project result in:				
a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			X	
b) Generation of excessive groundborne vibration or groundborne noise levels?			X	
c) For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?				X

DISCUSSION

- a) Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or in other applicable local, state, or federal standards?**

Noise is usually defined as unwanted sound. Noise consists of any sound that may produce physiological or psychological damage and/or interfere with communication, work, rest, recreation, or sleep. Several noise measurement scales exist that are used to describe noise in a particular location. A decibel (dB) is a unit of measurement that indicates the relative intensity of a sound. Sound levels in dB are calculated on a logarithmic basis. An increase of 10 dB represents a 10-fold increase in acoustic energy, while 20 dB is 100 times more intense and 30 dB is 1,000 times more intense. Each 10 dB increase in sound level is perceived as approximately a doubling of loudness; and similarly, each 10 dB decrease in sound level is perceived as half as loud. Sound intensity

is normally measured through the A-weighted sound level (dBA). This scale gives greater weight to the frequencies of sound to which the human ear is most sensitive. The A-weighted sound level is the basis for 24-hour sound measurements that better represent human sensitivity to sound at night.

As noise spreads from a source, it loses energy so that the farther away the noise receiver is from the noise source, the lower the perceived noise level would be. Geometric spreading causes the sound level to attenuate or be reduced, resulting in a 6 dB reduction in the noise level for each doubling of distance from a single point source of noise to the noise sensitive receptor of concern.

There are many ways to rate noise for various time periods, but an appropriate rating of ambient noise affecting humans also accounts for the annoying effects of sound. Equivalent continuous sound level (L_{eq}) is the total sound energy of time-varying noise over a sample period. However, the predominant rating scales for human communities in the State of California are the L_{eq} , the community noise equivalent level (CNEL), and the day-night average level (L_{dn}) based on dBA. CNEL is the time varying noise over a 24-hour period, with a 5 dBA weighting factor applied to the hourly L_{eq} for noises occurring from 7:00 p.m. to 10:00 p.m. (defined as relaxation hours) and 10 dBA weighting factor applied to noise occurring from 10:00 p.m. to 7:00 a.m. (defined as sleeping hours). L_{dn} is similar to the CNEL scale, but without the adjustment for events occurring during the evening relaxation hours. CNEL and L_{dn} are within one dBA of each other and are normally exchangeable. The noise adjustments are added to the noise events occurring during the more sensitive hours.

A project would have a significant noise effect if it would substantially increase the ambient noise levels for adjoining areas or conflict with adopted environmental plans and goals of applicable regulatory agencies, including, as appropriate, the City of Fresno.

The City of Fresno Noise Element of the General Plan sets noise standards for transportation and stationary noise sources as shown in Table 2 and Table 3, below.

Certain land uses are considered more sensitive to noise than others. Examples of these land uses include residential areas, educational facilities, hospitals, childcare facilities, and senior housing. The nearest sensitive receptors include residential receptors located approximately 500 feet north of the project site.

The following sections describe potential long-term operational noise impacts of the proposed project.

Table 2: Transportation (Non-Aircraft) Noise Sources

Noise-Sensitive Land Use ¹	Outdoor Activity Areas ²	Interior Spaces	
	L _{dn} /CNEL, dB	L _{dn} /CNEL, dB	L _{eq} dB ²
Residential	65	45	-
Transient Lodging	65	45	-
Hospitals, Nursing Homes	65	45	-
Theaters, Auditoriums, Music Halls	-	-	35
Churches, Meeting Halls	65	-	45
Office Buildings	-	-	45
Schools, Libraries, Museums	-	-	45

Source: City of Fresno General Plan (2014).

¹ Where the location of outdoor activity areas is unknown or is not applicable, the exterior noise level standard shall be applied to the property line of the receiving land use.

² As determined for a typical worst-case hour during periods of use.

CNEL = community noise equivalent level

dB = decibel(s)

L_{dn} = day-night average noise level

L_{eq} = equivalent continuous sound level

Table 3: Stationary Noise Sources

	Daytime (7:00 a.m. to 10:00 p.m.)	Nighttime (10:00 p.m. to 7:00 a.m.)
Hourly Equivalent Sound Level (L _{eq}), dBA	50	45
Maximum Sound Level (L _{max}), dBA	70	60

Source: City of Fresno General Plan (2014).

¹ The Planning and Development Director, on a case-by-case basis, may designate land uses other than those shown in this table to be noise-sensitive, and may require appropriate noise mitigation measures.

² As determined at outdoor activity areas. Where the location of outdoor activity areas is unknown or not applicable, the noise exposure standard shall be applied at the property line of the receiving land use. When ambient noise levels exceed or equal the levels in this table, mitigation shall only be required to limit noise to the ambient plus five dB.

dB = decibel(s)

dBA = A-weighted decibel(s)

L_{dn} = day-night average noise level

L_{eq} = equivalent continuous sound level

L_{max} = maximum A-weighted sound level

Traffic Noise Impacts. Motor vehicles with their distinctive noise characteristics are the dominant noise source in the vicinity of the project site. The amount of noise varies according to many factors, such as volume of traffic, vehicle mix (percentage of cars and trucks), average traffic speed, and distance from the observer. A characteristic of sound is that a doubling of a noise source is required in order to result in a perceptible (3 dBA or greater) increase in the resulting noise level. The proposed project would include an ingress and egress of anywhere from 40 to 90 trucks and approximately 12 vehicle trips between the hours of 6:00 a.m. and 6:00 p.m., six days per week. As noted above, it would take a doubling of traffic volumes on the adjacent roadways to result in a perceptible increase traffic noise in the project vicinity. The proposed project is not expected to result in a doubling of daily trips on local roadways in the project site vicinity. Therefore, it is not expected that project daily trips would result in a perceptible noise

increase along any roadway segment in the project vicinity and would not result in a perceptible increase in traffic noise levels at receptors in the project vicinity. Therefore, traffic noise impacts would be less than significant.

Operational Activity Noise. Noise impacts associated with the long-term operation of the project must comply with the noise standards specified in the City's General Plan, as described above. The proposed project would not include the construction of new buildings or structures that would produce a perceptible increase in existing ambient noise levels. However, railcars and trucks may be unloaded intermittently 24 hours per day; therefore operational activity noise would be associated with loading and unloading activities.

Typical loading and unloading activities would result in maximum noise levels that would generate a noise level of 75 dBA L_{max} at 50 feet based on measurements previously conducted by LSA. As identified above, the nearest sensitive receptors include residential receptors located approximately 890 feet north of where loading operations on the project site would occur. At 890 feet, there would be a decrease of 25 dBA due to the increased distance from the baseline noise level of 75 dBA L_{max} at 50 feet. Therefore, maximum noise levels generated by loading and unloading activities would be approximately 50 dBA L_{max} at the closest sensitive receptors (without taking a reduction for intervening structures or other barriers). This noise level would not exceed the City's daytime (7:00 a.m. to 10:00 p.m.) noise level standard of 70 dBA L_{max} or nighttime (10:00 p.m. to 7:00 a.m.) noise level standard of 60 dBA L_{max} . In addition, peak noise levels from loading and unloading would be intermittent and when averaged over one hour, these sources would result in a L_{eq} of 44 dBA, which not exceed the City's daytime (7:00 a.m. to 10:00 p.m.) noise level standard of 50 dBA L_{eq} or nighttime (10:00 p.m. to 7:00 a.m.) noise level standard of 45 dBA L_{eq} . Additionally, given that the existing site is currently operational with industrial uses and is in an industrial area with industrial uses similar to the proposed project, noise associated with the proposed project would not cause an increase in noise levels of more than 3 dBA. Therefore, impacts associated with project operational noise would be less than significant.

b) Generation of excessive groundborne vibration or groundborne noise levels?

No permanent noise sources would be located within the project site that would expose persons to excessive groundborne vibration or noise levels. Construction activities associated with implementation of the proposed project are not expected to result in excessive groundborne vibration or groundborne noise levels, as minimal construction is expected. Therefore, implementation of the proposed project would not permanently expose persons within or around the project site to excessive groundborne vibration or noise. As a result, a less-than-significant impact would occur.

c) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

The nearest airports to the project site include the Fresno International Airport, located approximately 5.7 miles from the project site, the Fresno Chandler Executive Airport, located approximately 4 miles from the project site, and the Sierra Sky Park Airport, located approximately 11 miles from the project site. Each of these airports has an Airport Land Use Compatibility Plan (ALUCP) which guides approximate compatible land uses. The City of Fresno General Plan, other City land use plans, and all City land use decisions must be compatible with the adopted ALUCP. Each ALUCP includes CNEL noise contours based on projected airport and aircraft operations. The project site is not located within the contours for these airports. Therefore, project implementation would not expose people to airport-related excessive noise levels and no impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIV. POPULATION AND HOUSING – Would the project:				
a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?			X	
b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?				X

DISCUSSION

a) Induce substantial unplanned population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?

The proposed project site is designated Employment – Heavy Industrial in the Fresno General Plan and it is intended for industrial, office, research and development, and flexible commercial uses to provide employment opportunities and strengthen the City of Fresno’s economy. The proposed project would not include the construction of new buildings or additional infrastructure facilities. The only improvements that will be added to the project site include a truck scale, portable belt conveyors, and a portable restroom. It is anticipated that up to 5,000 gallons of water per day will be pumped from the on-site well for dust control purposes. The proposed project would not result in direct population growth as the proposed use is not residential and would not contribute to permanent residency on site. The proposed project would not generate growth beyond that anticipated in the General Plan. Therefore, the proposed project would not directly or indirectly induce population growth and would result in a less-than-significant impact.

b) Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?

The project site is located within a Heavy Industrial zoning district, and no housing units are located within the project site. Therefore, the proposed project would not displace

existing housing or require the construction of replacement housing and would result in no impact.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XV. PUBLIC SERVICES – Would the project:				
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?			X	
Police protection?			X	
Schools?			X	
Parks?			X	
Other public facilities?			X	

DISCUSSION

- a) **Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times, or other performance objectives for any of the public services:**

Fire protection

The City of Fresno Fire Department (FFD) would provide fire protection services to the proposed project. There are 23 FFD fire stations in Fresno, with the closest fire station, Fire Station Fire Station 7, located at 2571 South Cherry, approximately 1.3 miles from the project site. Planned growth under the General Plan would increase calls for fire protection service in the City. The proposed project is consistent with the project site's General Plan land use designation and zoning district and would not represent unplanned growth. The proposed project would be required to comply with all applicable codes for fire safety and emergency access.

The FFD would continue providing services to the project site and would not require additional firefighters to serve the proposed project. The construction of a new or expanded fire station would not be required. The proposed project would not result in a significant impact on the physical environment due to the incremental increase in demand for fire protection and life safety services. The incremental increase in demand for services is not expected to adversely affect existing responses times to the project site or within the City. As a result, a less-than-significant impact would occur.

Police protection

The City of Fresno Police Department (FPD) provides police protection to the project site. The FPD headquarters is located at 2323 Mariposa Street, approximately 3 miles from the project site. Planned growth under the General Plan would increase calls for police protection services in the City. The proposed project could result in an increase in the demand for police protection services in the area. However, the proposed project is consistent with the project site's General Plan designation and does not represent unplanned growth. The FPD would continue to provide services to the project site and would not require additional officers to serve the project site. The construction of new or expanded police facilities would not be required. Therefore, the proposed project would result a less-than-significant impact on police protection services.

Schools

The proposed project does not include any residential uses and would therefore not generate increased student demand or otherwise impact school services. As such, there would be a less than significant impact on school services.

Parks

Implementation of the proposed project would not increase the use of parks within the vicinity of the project site because the proposed project does not include any residential units. The proposed project is not expected to adversely affect the physical conditions of local and regional open space areas or recreational facilities, nor require

the provisions of new parks or facilities. Therefore, the proposed project would result in a less than significant impact on the demand of parks in the area.

Other public facilities

Development of the proposed project would not increase demand for other public facilities, such as libraries, hospitals and courts. Because the proposed project is not expected to result in unplanned population growth, the proposed project would not result in an increase of demand for public facilities to maintain service standards. Therefore, the impact would be considered less-than-significant.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVI. RECREATION - Would the project:				
a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?			X	
b) Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

DISCUSSION

a) Increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?

The proposed project would involve no new construction of buildings or utilities. Agricultural commodities would be transported to the project site via railroad cars, offloaded to storage areas, and loaded and shipped onto trucks between the hours of 6:00 a.m. and 6:00 p.m. The proposed project is not expected to generate population growth that would result in an increase in the use of existing neighborhood and regional parks or other recreational facilities. As a result, a less-than-significant impact would occur.

b) Include recreational facilities or require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment?

The proposed project would be limited to a conveyer and restroom facilities. The proposed project does not include or require the construction or expansion of recreational facilities that would result in additional environmental effects beyond those described in this document. As a result, no impact would occur.

Mitigation Measures
None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVII. TRANSPORTATION – Would the project:				
a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?			X	
b) Conflict or be inconsistent with CEQA Guidelines § 15064.3, subdivision (b)?			X	
c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?			X	
d) Result in inadequate emergency access?			X	

DISCUSSION

a) Conflict with a program, plan, ordinance or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?

The proposed project is located within Traffic Impact Zone (TIZ) IV according to the Mobility and Transportation Element of the City of Fresno General Plan. According to the Mobility and Transportation Element, projects in TIZ IV that generate more than 200 peak hour trips would require a detailed traffic analysis. The proposed project would generate between 40 and 90 daily truck trips and 12 employee trips, six days per week, between the hours of 6:00 a.m. and 6:00 p.m., which falls below the existing threshold for TIZ IV as determined in the General Plan.¹⁶

Bus stop facilities for the 38 FAX line bus run along East Calwa Avenue, East Jensen Avenue and South Cedar Avenue, all located approximately 2 miles northwest of the project site. The proposed project would not involve the alteration of any existing transit and pedestrian infrastructure in the surrounding area. Furthermore, because the traffic

¹⁶ City of Fresno, 2014. Fresno General Plan-Mobility and Transportation Element. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2019/07/General-Plan-4-Mobility-and-Transportation-7-19.pdf> (accessed January 21, 2022).

generated by the proposed project is consistent with the General Plan, the proposed project would not interfere with the operation of any transit, bicycle, and pedestrian facilities on the area. The proposed project is located in a Heavy Industrial zone, and the operations of the proposed project would be consistent with the permitted uses of the area. The proposed project would not conflict with applicable existing transportation programs and policies in the General Plan. Therefore, the proposed project would result in a less-than-significant impact.

b) Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?

Senate Bill (SB) 743 requires that relevant CEQA analysis of transportation impacts be conducted using a metric known as vehicle miles traveled (VMT) instead of Level of Service (LOS). VMT measures how much actual auto travel (additional miles driven) a proposed project would create on California roads. If the project adds excessive car travel onto our roads, the project may cause a significant transportation impact.

The State CEQA Guidelines were amended to implement SB 743, by adding Section 15064.3. Among its provisions, Section 15064.3 confirms that, except with respect to transportation projects, a project's effect on automobile delay shall not constitute a significant environmental impact. Therefore, LOS measures of impacts on traffic facilities is no longer a relevant CEQA criteria for transportation impacts.

CEQA Guidelines Section 15064.3(b)(4) states that “[a] lead agency has discretion to evaluate a project's vehicle miles traveled, including whether to express the change in absolute terms, per capita, per household or in any other measure. A lead agency may use models to estimate a project's vehicle miles traveled and may revise those estimates to reflect professional judgment based on substantial evidence. Any assumptions used to estimate used to estimate vehicle miles traveled and any revision to model outputs should be documented and explained in the environmental document prepared for the project. The standard of adequacy in Section 15151 shall apply to the analysis described in this section.”

On June 25, 2020, the City of Fresno adopted CEQA Guidelines for Vehicle Miles Traveled Thresholds, dated June 25, 2020, pursuant to Senate Bill 743 to be effective of July 1, 2020. The thresholds described therein are referred to herein as the City of Fresno VMT Thresholds. The City of Fresno VMT Thresholds document was prepared and adopted consistent with the requirements of CEQA Guidelines Sections 15064.3 and 15064.7. The December 2018 Technical Advisory on Evaluating Transportation Impacts in CEQA (Technical Advisory) published by the Governor's Office of Planning and Research (OPR), was utilized as a reference and guidance document in the preparation of the Fresno VMT Thresholds.

The City of Fresno VMT Thresholds adopted a screening standard and criteria that can be used to screen out qualified projects that meet the adopted criteria from needing to

prepare a detailed VMT analysis.¹⁷

For development projects in the City, which can include industrial projects like the proposed project, conditions may exist that would presume the project has a less than significant impact. These conditions include the following:

- The project is within 0.5 mile (mi) of a Transit Priority Area or a High-Quality Transit Area unless the project is inconsistent with the Regional Transportation Plan (RTP)/SCS, has a floor area ratio (FAR) less than 0.75, provides an excessive amount of parking, or reduces the number of affordable residential units. In accordance with SB 743, “Transit priority areas” are defined as “an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning horizon included in a Transportation Improvement Program. A Major Transit Stop means: “a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service of 15 minutes or less during the morning and afternoon peak commute periods.” A High-Quality Transit Area or Corridor is a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.
- The project generates a low volume of daily traffic, equal to or below 500 average daily trips (ADT).

The proposed project has a FAR less than 0.75. Additionally, the proposed project would generate between approximately 12 daily trips associated with the additional six employees. This daily traffic volume falls below the screening threshold of 500 ADT, making the impact less than significant.

Therefore, the proposed project is eligible to be screened out of a VMT analysis, and the project would result in a less-than-significant VMT impact and is consistent with CEQA Guidelines Section 15064.3(b).

c) Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?

The proposed project would not include any ground-disturbing activities and would not bring any equipment into the project site that is incompatible with industrial land use. The proposed project would include the installation of equipment to move agricultural commodities, portable restrooms, and 18 pole-mounted lights. Project operations would

¹⁷ City of Fresno, 2020. CEQA Guidelines for Vehicle Miles Traveled Thresholds for the City of Fresno. Available online at: <https://www.fresno.gov/darm/wp-content/uploads/sites/10/2020/06/CEQA-Guidelines-for-Vehicle-Miles-Traveled-Thresholds-June-2020-DRAFT.pdf> (accessed January 21, 2022)

not alter any public pedestrian or vehicle facilities and would be limited to off-loading of agriculture commodities on to the project and then loading those commodities on to customer's trucks. As a result, the proposed project would not substantially increase hazards due to design features, and the impact would be considered less than significant.

d) Result in inadequate emergency access?

The proposed project does not include any ground-disturbing activities that would affect existing emergency access to the project site or the surrounding area. Emergency vehicles would access the project site via South Railroad Avenue, and emergency access would not be modified as a result of the proposed project. Therefore, the impact would be less than significant.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XVIII. TRIBAL CULTURAL RESOURCES – Would the project:				
a) Cause a substantial adverse change in the significance of a tribal cultural resource, defined in PRC section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:				
i) Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in PRC section 5020.1(k), or,			X	
ii) A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of PRC section 5024.1. In applying the criteria set forth in subdivision (c) of PRC section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.			X	

DISCUSSION

- a) **Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American tribe, and that is:**

- i) *Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or*

As discussed in Section V, Cultural Resources, the project site does not contain historical resources listed or eligible for listing in the California Register of Historical Resources, or in any local listing for Fresno County or the City of Fresno. Furthermore, the area surrounding the project site does not contain any listed historical resources. As a result, a less-than-significant impact would occur.

- ii) *A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1. In applying the criteria set forth in subdivision (c) of Public Resource Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American tribe.*

The State requires lead agencies to consider the potential effects of proposed projects and consult with California Native American tribes during the local planning process for the purpose of protecting Traditional Tribal Cultural Resources through the CEQA Guidelines. Pursuant to PRC Section 21080.3.1, the lead agency shall begin consultation with the California Native American tribe that is traditionally and culturally affiliated with the geographical area of the proposed project. Such significant cultural resources are either sites, features, places, cultural landscapes, sacred places, and objects with cultural value to a tribe which is either on or eligible for inclusion in the California Historic Register or local historic register, or, the lead agency, at its discretion, and support by substantial evidence, choose to treat the resources as a Tribal Cultural Resources (PRC Section 21074(a)(1-2)).

Additional information may also be available from the California Native American Heritage Commission's Sacred Lands File per PRC Section 5097.96 and the California Historical Resources Information System administered by the California Office of Historic Preservation. Please also note that PRC Section 21082.3(c) contains provisions specific to confidentiality.

Assembly Bill (AB) 52, which became law January 1, 2015, requires that, as part of the CEQA review process, public agencies provide early notice of a project to California Native American Tribes to allow for consultation between the tribe and the public agency. The purpose of AB 52 is to provide the opportunity for public agencies and tribes to consult and consider potential impacts to Tribal Cultural Resources (TCR's), as defined by the Public Resources Code (PRC) Section 2107(a). Under AB 52, public agencies shall reach out to California Native American Tribes who have requested to be notified of projects in areas within or which may have been affiliated with their tribal geographic range. Pursuant to Assembly Bill 52 (AB 52), the Table Mountain Rancheria and Dumna Wo Wah Tribes were invited to consult. The contracted Tribes did not provide a response to invitations to consult.

The proposed project will not involve ground-disturbing activities that would require further monitoring. As a result, a less-than-significant impact would occur.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XIX. UTILITIES AND SERVICE SYSTEMS – Would the project:				
a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effect?				X
b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?			X	
c) Result in a determination by the wastewater treatment provider, which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?			X	
d) Generate solid waste in excess of state or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?			X	
e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?			X	

DISCUSSION

- a) Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?**

The Department of Public Utilities has determined that adequate sanitary sewer and water services would be available to serve the proposed project subject to the payment of any applicable connection charges and/or fees and extension of services in a manner which is compliant with the Department of Public Utilities standards, specifications, and policies.

Electric power, natural gas, and telecommunication facilities already have access to the project site from previous uses. As a result, the proposed project would not include relocation or construction or new or expanded utilities, and no impact would occur.

- b) Have sufficient water supplies available to serve the project and reasonably foreseeable future development during normal, dry and multiple dry years?**

The proposed project would make use of an on-site well to extract an estimated 5,000 gallons of water per month needed to control dust within the project site. As discussed in discussion b) of Section X, Hydrology and Water Quality, the project site is currently served by an on-site well that will continue to serve as its main water source under the proposed project. The project site is expected to use up to 5,000 gallons of water per month for dust control operations. In addition, the proposed project is not expected to increase impervious surfaces given that the proposed project would not involve the construction of new buildings, structures, or parking lots. Therefore, the proposed project would not substantially interfere with groundwater recharge and would not substantially decrease groundwater supplies. Sufficient water supply would be available to serve the project site, and as a result, the proposed project would result in a less-than-significant impact related to water supply.

- c) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?**

The project site is not connected to the City of Fresno wastewater system, and the proposed project would include the installation of portable restroom facilities. Due to the limited number of employees and customers, the proposed project would not result in a substantial increase of demand for wastewater treatment services above the provider's capacity. Therefore, the proposed project would result in a less than significant impact.

- d) Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?**

Solid waste disposed of in the City of Fresno is taken to Cedar Avenue Recycling and Transfer Station. Once trash has been off-loaded at the transfer station, it is sorted and non-recyclable solid waste is loaded onto large trucks and taken to the American Avenue Landfill located approximately 6 miles southwest of Kerman.

The American Avenue Landfill (i.e. American Avenue Disposal Site 10-AA-0009) has a maximum permitted capacity of 32,700,000 cubic yards and a remaining capacity of 29,358,535 cubic yards, with an estimated closure date of August 31, 2031. The maximum permitted throughput is 2,200 tons per day.¹⁸

Other landfills within the County of Fresno include the Clovis Landfill (City of Clovis Landfill 10-AA-0004) with a maximum remaining permitted capacity of 7,740,000 cubic yards, a maximum permitted throughput of 2,000 tons per day, and an estimated closure date of 2047.¹⁹

The project applicant estimates that the proposed project would use approximately six, ten-yard dumpster per year, totaling approximately 36 tons of solid waste per year. Given the available capacity at the landfills, the additional solid waste generated by the proposed project is not anticipated to cause the facility to exceed its daily permitted capacity. As such, the proposed project would be served by a landfill with sufficient capacity to accommodate the proposed project's waste disposal needs, and impacts associated with the disposition of solid waste would be less than significant.

e) Comply with federal, state, and local management and reduction statutes and regulations related to solid waste?

The proposed project would comply with all federal, State, and local solid waste statutes and/or regulations related to solid waste. The proposed project would generate approximately 36 tons of solid waste per year that would be sorted at Cedar Avenue Recycling and Transfer Station for recyclable and non-recyclable material. Therefore, the proposed project would result a less-than-significant impact related to solid waste regulations.

Mitigation Measures

None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XX. WILDFIRE – If located in or near state responsibility areas or lands classified as very high fire hazard severity zones, would the project:				
a) Substantially impair an adopted emergency response plan or emergency evacuation plan?			X	
b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?			X	
c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?			X	
d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?			X	

DISCUSSION

a) Substantially impair an adopted emergency response plan or emergency evacuation plan?

The California Emergency Services Act requires cities to prepare and maintain an Emergency Plan for natural, manmade, or war-caused emergencies that result in conditions of disaster or in extreme peril to life. The City's full-time Emergency Preparedness Officer (EPO) is responsible for ensuring that Fresno's emergency

response plans are up-to-date and implemented properly. The EPO also facilitates cooperation between City departments and other local, State and federal agencies that would be involved in emergency response operations. The City of Fresno Emergency Operations Center (EOC) serves as the coordination and communication between the City of Fresno and Fresno County Operational Area EOC. The proposed project would not result in any alterations of existing roadways that would block the circulation of emergency response services or introduce elements that would conflict with the operations of the EOC. Therefore, the proposed project would not interfere with emergency evacuation plans in the City, and this impact would be less than significant.

b) Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of a wildfire?

The project site is in an urban area and is not located within a very-high fire hazard severity zone.²⁰ The project site does not possess physical characteristics that would exacerbate wildfire risks. Therefore, the proposed project would not expose people or structures to a significant loss, injury or death involving wildland fires and there would be a less than significant impact.

c) Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?

The project site is located in a developed area of the City of Fresno, and it would not require the installation or maintenance of new infrastructure outside of what is already implemented according to City plans. The proposed project would not increase the risk of fire or result in temporary or ongoing environmental impacts. As a result, a less-than-significant impact would occur.

d) Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?

The project site is located on a relatively flat area and is not located adjacent to any hills. In general, the potential for land sliding or slope failure in the City of Fresno is very low and the project site would not be susceptible to landslides. The project site is also not located on a flood hazard zone and would not be susceptible to flooding because of post-fire drainage changes. Therefore, the proposed project would not expose people or structures to significant risks, and a less-than-significant impact would occur.

²⁰ Cal Fire, 2008. Fresno County Very High Fire Hazard Severity Zones in LRA. Available online at: <https://osfm.fire.ca.gov/divisions/wildfire-planning-engineering/wildland-hazards-building-codes/fire-hazard-severity-zones-maps/> (accessed September 8, 2021).

Mitigation Measures
None

ENVIRONMENTAL ISSUES	Potentially Significant Impact	Less Than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
XXI. MANDATORY FINDINGS OF SIGNIFICANCE				
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?			X	
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?			X	
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?			X	

DISCUSSION

- a) Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, substantially reduce the number or

restrict the range of an endangered, rare, or threatened species, or eliminate important examples of the major periods of California history or prehistory?

Due to the urban location and lack of landscaping within the project site, the project site does not provide suitable habitat for special-status animal species. Common wildlife species that are adapted to urban environments are expected to continue to use the project site and vicinity. The project site is not occupied by, or suited for, any special-status species. As a result, the proposed project would not have direct or indirect adverse effects on special-status plants or wildlife. The project site is not in an area where there are important examples of California history or prehistory. As a result, a less-than-significant impact would occur.

b) Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects.)

The project site is currently used for railroad related storage and operations. The proposed project would include no new construction of buildings or utility facilities but would add a truck scale, portable belt conveyors, and a portable restroom to the project site. Although the proposed project may incrementally affect other resources that were determined to be less than significant, the proposed project’s contribution to these effects is not considered “cumulatively considerable,” in consideration of the relatively nominal impacts of the proposed project. Therefore, this impact would be considered less than significant.

c) Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

The proposed project’s potential to result in environmental effects that could directly or indirectly impacts human beings has been evaluated in this Initial Study. As a result, all environmental effects that could adversely affect human beings would be less than significant.

Greenhouse Gas Reduction Plan Project Consistency Checklist

1. Project Information	
Contact Information	
Project No./Name:	Penny Newman Storage Yard Project
Address:	2989 South Golden State Boulevard
Applicant Name/Co:	Penny-Newman Grain Company
Contact Information:	2989 South Golden State Boulevard
	Fresno, CA 93725
Project Information	
1. What is the Site acreage of the Project?	approximately 43 acres
2. Identify all Applicable Proposed Land uses:	Storage and distribution
a. Residential (Indicate number of single-family units)	
b. Residential (Indicate number of multi-family units)	
c. Commercial (total square footage)	
d. Industrial (total square footage)	5,000 square feet
e. Other (describe)	
3. Is the project or a portion of the project located in a transit priority area? (Y/N)	No
4. Provide a brief description of the project proposed:	<p>The existing site was previously used as a storage facility for railroad equipment. The site is completely paved and includes three existing buildings, totaling approximately 5,000 square feet. The existing buildings include a scale house, and two outbuildings used for general storage.</p> <p>The proposed project would change the use of an existing railroad storage and operations site into a storage and distribution facility for bulk agricultural commodities. The proposed project would utilize the existing scale house and storage building for on-site for operations.</p> <p>The project would include the installation of a truck scale, portable belt conveyor devices, and a portable restroom for employees. Agricultural commodities such as cottonseed, canola meal, and gypsum would be delivered via train to the project site, and would be offloaded by on-site employees using front-end tractor loaders.</p>

2. Determining Land Use Consistency		
Checklist Item		
<p>As the first step in determining the consistency with the GHG Reduction Plan for discretionary development projects, this section allows the City to determine the project’s consistency with the land use assumptions used in the GHG Reduction Plan.</p>		
	Yes	No
<p>1. Is the proposed project consistent with the approved General Plan, Specific Plan, and Community Plan planned land use and zoning designations?</p> <p>If the answer is Yes, then proceed to the GHG Plan Update Consistency Checklist.</p> <p>If the answer is No, then proceed to question 2.</p>	x	
<p>2. If the proposed project is not consistent with the approved planned land use and zoning designation(s), then provide estimated GHG project emissions under both existing and proposed designation(s) for comparison. Compare the maximum buildout of the existing designation with the maximum buildout of the proposed designation.</p> <p>If the estimated project emissions at maximum buildout of the proposed designation(s) is equivalent to or less than the estimated project emissions at maximum buildout of the existing designation(s), then in accordance with the City’s Significance Determination Thresholds, the project’s GHG impact is less than significant. If there is a proposed development project associated with this plan amendment and or rezone then complete the GHG Plan Update Consistency Checklist and incorporate applicable measures, otherwise there is no further step required.</p> <p>If the estimated project emission at maximum buildout of the proposed designation(s) is greater than the estimated project emissions at maximum buildout of the existing designation(s), then in accordance with the City’s Significance Determination Thresholds, the project’s GHG impact is significant. The project must either show consistency with applicable GP objectives and policies (provide applicable GP objectives and policies here) or provide analysis and measures to incorporate into the project to bring the GHG emissions to a level that is less than or equal to the estimated project emission at maximum buildout of the existing designation(s) unless the decision-maker finds that a measure is infeasible in accordance with CEQA Guidelines Section 15091. If there is a proposed development project associated with this plan amendment and or rezone then complete the GHG Plan Update Consistency Checklist and incorporate applicable measures, otherwise there is no further step required.</p>	<p>The proposed project is consistent with the approved planned land use and zoning designations.</p>	

3. Greenhouse Gas (GHG) Reduction Plan Update - CEQA Project Consistency Checklist

GHG Plan Update consistency review involves the evaluation of project consistency with the applicable strategies of the GHG Plan Update. This checklist was developed based on the key local GHG reduction strategies and actions identified in the GHG Plan Update that are applicable to new development projects.

Checklist Item (Check the appropriate box and provide an explanation for your answer)	Yes	No	Not Applicable (NA)	Explanation
Strategy 1: Land Use and Transportation Demand Management				
Does the project provide complete streets for all roadway improvements? (Complete streets are roadways that include curb, gutter, and sidewalks on both sides of the street. For local and collector streets, adequate roadway width is provided to accommodate two-way vehicle traffic and bicycles and arterial streets include striping for bike lanes.)	<input type="checkbox"/>	<input checked="" type="checkbox"/>		The project would not require roadway improvements.
Is the project a large employer (over 100 employees) and if so will the project comply with SJVAPCD Rule 9410 and provide an Employer Trip Reduction Implementation Plan that will include trip reduction methods such as increasing transit use, carpooling, vanpooling, bicycling, or other measures? See the SJVAPCD website link for details: https://www.valleyair.org/rules/currentrules/r9410.pdf	<input type="checkbox"/>	<input checked="" type="checkbox"/>		The project would require six employees.
Strategy 2: Energy Conservation and Renewable Energy				
Does the project meet the mandatory energy efficiency measures of the California Green Building Standards Code (CalGreen)? If the Project exceeds mandatory CalGreen measures then provide the tier number that the project will meet in the explanation.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The proposed project would primarily utilize existing infrastructure on the project site.
For commercial projects, does it achieve net zero electricity? Mark NA if project will be permitted before 2030. Mark Yes if voluntary. Add source and capacity in explanation.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The project is not a commercial project.
Does the project include onsite energy generation using renewable energy? If no, mark NA. If yes, provide source and capacity in the explanation.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The project would not include onsite energy generation.
Strategy 3: Water Conservation				
Does the project meet the mandatory indoor water use measures of the CalGreen Code? If the project exceeds CalGreen Code mandatory measures provide methods in excess of requirements in the explanation. Examples may include water pipe insulation, pressure reducing valves, energy efficient appliances such as Energy Star Certified dishwashers, washing machines, dual flush toilets, point of use and/or tankless water heaters. Provide the measures, devices, or systems that the project will include in the explanation.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The proposed project would primarily utilize existing infrastructure on the project site.
Does the project meet the mandatory outdoor water use measures of the CalGreen Code? If the project exceeds CalGreen Code mandatory measures provide methods in excess of requirements in the explanation? Examples may include any outdoor water conservation measures such as; drought tolerant landscaping plants, compliant irrigation systems, xeriscapes etc. Provide the conservation measure that the project will include in the explanation.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	The proposed project would primarily utilize existing infrastructure on the project site.
Strategy 4: Solid Waste Diversion and Recycling				
When completed will the project implement techniques for solid waste diversion and reduction (i.e., recycling, composting, waste to energy technology, waste separation)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>		The project would be consistent with the CalRecycle Waste Diversion and Recycling Mandate.
During construction will the project recycle construction and demolition waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Terracon Project No. NA217045

Dear Mr. Meeker:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced site. This assessment was performed in accordance with Terracon Proposal No. Terracon Proposal No. PNA217045 dated July 7, 2021.

We appreciate the opportunity to be of service to you on this project. In addition to Phase I services, our professionals provide geotechnical, environmental, construction materials, and facilities services on a wide variety of projects locally, regionally and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

for

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with Terracon Proposal No. PNA217045 dated July 7, 2021 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Kristin Stout, Environmental Professional. Tamara K. Woods performed the site reconnaissance on July 22, 2021.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is located at 2989 South Golden State Boulevard and 4006 East Vine Avenue and is an approximately 27.2-acre parcel of land leased by Penny Newman Grain Company. The site consists of portions of Assessor Parcel Numbers (APNs) 48702017U, 48702018U, 48702019U, 48702020U, 48715014U, and 48715015U. Two small structures used as a scale house and a storage building, approximately 1,050 and 1,775 square-feet (SF), are located on-site. During the site reconnaissance, site operations included transloading of agricultural commodities including gypsum, cotton seed, cotton seed hulls, and almond hulls via heavy equipment, railroad, and semi-trucks.

Historical Information

Based on a review of the historical information, the site was developed with structures on the southern portion of the site, and apparent railroad spurs across the site, linking to the Topeka and Santa Fe Railroad, from as early as 1923 (subsequently becoming Burlington Northern & Santa Fe Rail Road [BNSF] in the late 1990's). By 1937, the structures appeared to have been reconfigured; additional structures were depicted on the central portion of the site; a semi-circular railroad roundhouse/turntable was visible on the southern central portion of the site, and apparent structures were visible throughout the site. By 1962, the roundhouse/turntable appeared to have been partially dismantled, and by 1998, some of the structures appeared to have been removed from the site, which included the remnant of the roundhouse/turntable. The configuration of the site has since appeared consistent through the present. The historical use of the facility as a railroad yard represents a recognized environmental condition (REC) to the site. In addition, evidence of a railroad roundhouse was observed on the central south portion of the site from prior to 1937 through 1998. Historically, railroad roundhouses performed significant maintenance and repair activities to railroad equipment and made use of petroleum products and hazardous

substances. Therefore, the presence of the former railroad roundhouse represents a REC associated with the site.

The surrounding properties consisted of the Topeka and Santa Fe Railroad, and associated railroad features from as early as 1923, with a few structures depicted northwest of the tracks, an apparent small community further north-northeast of the tracks, a road (North Road) depicted south of the site (with two small structures or dwelling depicted south of the road), an apparent canal (Fresno Colony Canal) west of the tracks, and development of apparent industrial facilities northwest of the tracks (which appeared to be associated with a railroad spur, based on the 1923 topographic map). By 1937, structures were visible further north-northwest of the tracks, and the land further north-northeast appeared developed for agricultural use; an apparent retention or water treatment pond (with six segments), and additional structures continued to be developed on the land east of the tracks; additional small structures or homesteads, and agricultural land were visible to the south (south of the road), and rectangular structures, were visible further southeast of the site (which appeared associated with a railroad spur). By 1946, an apparent tank was visible adjacent to the pond (to the east) and the land further east-southeast appeared developed for agricultural use, while the land to the west appeared to have expanded industrial development, followed by a four-lane highway (99 Freeway), and business route. By 1957, additional structures continued to be developed on the land to the west and northwest, and an apparent commercial or industrial facility was visible on the north-northeast. The tank, located on the east, appeared to have been removed, by 1957, and portions of the pond appeared to be dried, followed by the apparent abandonment of the pond, by 1967. Additionally, by 1967, the homesteads south of the road appeared to have been removed, and redeveloped with commercial or industrial structures. By 1984, agricultural activities appeared to have ceased, on the land to the east-southeast, and an apparent retention pond was visible further east. The land to the east-southeast appeared redeveloped, by 1998, with apparent industrial facility (Miller Milling Company, 2904 South Maple Avenue) and associated grain silos. The adjacent properties have since remained consisted through the present. RECs were not identified during the historical use of the adjoining properties.

Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site / parent parcel addresses of 2989 South Golden State Boulevard, 4006 East Vine Avenue and 9th and Vine Avenue are identified on multiple environmental and regulatory databases as Burlington Northern Santa Fe Intermodal Yard, Atchison, Topeka & Santa Fe (ATSF) Calwa Rail Yard, ATSF Railway, BNSF Railway Company, Eagle Intermodal Services, and Mi-Jack Products.

According to the leaking underground storage tank (LUST) listing, a release of diesel was reported to the aquifer used for drinking water supply. Terracon reviewed the State Water Resources Control Board (SWRCB) online database GeoTracker for additional formation. According to a case closure letter dated October 5, 2000, on June 1993 a 58,000-gallon diesel underground storage tank (UST) was removed from the site. Analysis of soil samples collected from the

removal of the UST detected diesel in the southern end of the UST where the piping was connected. In addition, diesel was also detected beneath a remote fuel dispenser approximately 300 feet northwest of the UST. In 1994, 22 borings and three monitoring wells were advanced in the vicinity of the release, and no petroleum hydrocarbons were identified in groundwater samples. Groundwater was encountered at 60 feet bgs with a northwest gradient. The highest concentrations of diesel was located between 30 to 35 feet bgs. No petroleum hydrocarbons were detected below a depth of 20 feet bgs near the former dispenser. Additional soil borings and monitoring wells were advanced throughout the years. Minimal concentrations of petroleum hydrocarbons as motor oil have been detected in groundwater at the site. The source of the motor oil is not known; however, the Regional Water Quality Control Board (RWQCB) staff indicated that the UST is not the source. The RWQCB estimated 3,000 cubic yards of contaminated soil remains in place with 26,000 pounds of diesel. Elevated levels of motor oil contamination were also identified in smear zone. The source of motor oil was unknown but determined to not be associated with the diesel UST. Based on the paving of the area above the diesel impacts and that groundwater is not expected to come into contact with the diesel impacts, the RWQCB granted the site regulatory closure on October 10, 2000. The diesel impacted soil remaining in place represents a conditional REC (CREC) to the site.

Site Reconnaissance

During the site reconnaissance, an air compressor, aboveground hydraulic lift, piles of gypsum, cotton seed products, and almond hulls, a Burlington Northern Santa Fe (BNSF) fueling area, oil water separator (OWS), concrete pads and pipe, six aboveground storage tanks (ASTs) (<500-gallons), two containers (waste oil and empty) (<10-gallons), two pole mounted transformers, one pad mounted transformers, one dry transformer, *de minimis* asphalt staining (<100 SF), minor amount of asphalt and metal debris, one groundwater well were observed. Based on the long-term railroad yard operations and unknown age of the OWS, the potential for undocumented spills and releases associated with the OWS represents a REC to the site. Additional RECs were not identified.

Adjoining Properties

The northern adjoining property consists of the BNSF railroad. The eastern adjoining properties consist of the BNSF railroad properties / parent parcels (4006 East Vine Avenue and 2989 South Golden State Boulevard) and an industrial property (2904 and 2908 East Maple Avenue). Properties to the adjoining south consist of the intersection of Golden State Boulevard and North Avenue followed by industrial properties (3021 South Golden State Boulevard and 2365 East North Avenue). The railroad abuts the site to the west followed by Golden State Boulevard and Railroad Avenue. RECs were not observed with the adjoining properties.

Significant Data Gaps

The following significant data gaps were identified:

Several petroleum hydrocarbon releases were reported for the parent parcel addresses; however, the exact location of the releases was not known which represents a significant data gap in connection with the site.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 of Penny-Newman Grain Company, located at 2989 South Golden State Boulevard and 4006 East Vine Avenue in Fresno, Fresno County, California 93725, the site. The following RECs were identified in connection with the site:

- **Historical use as a railroad yard:** Historically railroad yards may have used petroleum products and hazardous substances; therefore, the historical use as a railroad yard represents a REC associated with the site.
- **Oil Water Separator:** Based on the long-term railroad yard operations and unknown age of the OWS, the potential for undocumented spills and releases associated with the OWS represents a REC to the site.
- **Roundhouse feature:** In addition, evidence of a railroad roundhouse was observed on the central south portion of the site from prior to 1937 through 1998. Historically, railroad roundhouses were used to performed significant maintenance and repair activities to railroad equipment and may have used petroleum products and hazardous substances. Therefore, the presence of the former railroad roundhouse represents a REC associated with the site.

The following CREC is identified in connection with the site:

- **Diesel impacted soil remaining in place:** The RWQCB staff estimated 3,000 cubic yards of contaminated soil remains in place with 26,000 pounds of diesel fuel. The diesel impacted soil represents a CREC to the site.

The former railroad roundhouse is located approximately 215 feet northwest of the structures present at the site in a cross-gradient hydrogeologic direction. The OWS is also located 210 feet northwest of the structures. While several RECs were identified, remaining impacts are paved over and are not anticipated to represent a soil vapor intrusion to the site occupants.

Recommendations

It is Terracon's understanding that the Phase I ESA is being prepared to obtain a Conditional Use Permit (CUP) so that Penny-Newman Grain Company can continue to lease the facility. As long as Penny-Newman Grain Company does not excavate in the areas of identified significant data

gaps or RECs, the impacts will not have an effect on the operations and no further action is recommended.

In the future if any excavation activities are to occur, Terracon recommends that a Soil Management Plan should be developed to address potential exposure.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Penny-Newman Grain Company
Site Location/Address	2989 South Golden State Boulevard and 4006 East Vine Avenue Fresno, Fresno County, California Portions of Assessor Parcel Numbers (APNs): 48702017U, 48702018U, 48702019U, 48702020U, 48715014U, and 48715015U
Land Area	Approximately 27.2 acres.
Site Improvements	Two small structures, approximately 1,050 and 1,775 square feet (SF), potable groundwater well, and asphalt paved driveway.
Anticipated Future Site Use	Continued use as current development/use.
Purpose of the ESA	Requirement for a conditional use and air permit.

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the Fresno South, California and Malaga, California USGS 7.5-minute series topographic maps (2012). The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with Terracon Proposal No. PNA217045 dated July 7, 2021, and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Several petroleum hydrocarbon releases were reported for the parent parcel addresses; however, the exact location of the releases was not known which represents a significant data gap in connection with the site.
- Terracon also contacted Matthew Hans with BNSF for additional information regarding the USTs and observed site features. As of the date of this report, a response has not been received. This pending information is a significant data gap.

Phase I Environmental Site Assessment

Penny-Newman Grain Company ■ Fresno, California
September 17, 2021 ■ Terracon Project No. NA217045

- Reasonable attempts were made to contact the local government officials; however, at the issuance of this report, a response from the North Central Fire District and Central Valley Regional Water Quality Control Board have not been received. Based on the historical information and other agency responses, the absence of a response from the local agencies does not represent a significant data gap in connection with the site.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Penny-Newman Grain Company. Use or reliance by any other party is prohibited without the written authorization of Penny-Newman Grain Company and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Agreement for Services. The limitation of liability defined in the Agreement for Services is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third-party) than the user for whom the ESA was originally prepared, the third-party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Prior to the site visit, Mr. David Meeker, client’s representative, was asked to provide the following user questionnaire information as described in ASTM E1527-13 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client’s Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.			X
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.			X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.			X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X
Obvious Indicators of Contamination at the site.			X

Terracon’s consideration of the client provided information did not identify RECs. A copy of the questionnaire is included in Appendix C.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 290 feet above sea level.	See Exhibit 1 in Appendix A – Fresno South, California and Malaga, California (2012) USGS Topographic Map; Google Map Data (2021), www.google.com/maps
Topographic Gradient	Very gently sloping towards the west-southwest.	
Closest Surface Water	The Fresno Colony Canal (concrete-lined), is located approximately 140 feet south of the site.	
Soil Characteristics		
Soil Type	Hesperia fine sandy loam	Eastern Fresno Area, California; USDA-NRCS Web Soil Survey Area: https://websoilsurvey.sc.egov.usda.gov Issued: May 29, 2020
Description	Fine-grained soils; silts and clays (liquid limit less than 50%), and silt; moderate infiltration rates; soils are	

Physical Setting Information		Source
	deep and moderately deep, moderately well and well drained, with moderately coarse textures.	
Geology/Hydrogeology		
Formation	Quaternary fan deposits (Qf)	Geologic map of California: Fresno Sheet, California Division of Mines and Geology (Mathews, R.A. and Burnett, J.L., 1965) (Accessed on July 26, 2021)
Description	Sedimentary Quaternary fan deposits of the Great Valley	
Estimated Depth to First Occurrence of Groundwater	Groundwater was encountered at a depth of approximately 60 feet below grade surface (bgs) on-site in the late 1990s.	GeoTracker, Santa Fe Intermodal Yard (T0601900441), Case Closure – Underground Tank Leak dated October 10, 2000
*Hydrogeologic Gradient	Northwest	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area, in order to help identify RECs associated with past uses. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10- to 15-year intervals) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs and Sanborn maps are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from Environmental Data Resources, Inc. (EDR) to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site. site.

Historical Maps and Aerial Photographs

Direction	Description
Site	Depicted as developed in the 1923 topographic map, with structures on the southern portion of the site, and apparent railroad spurs across the site, linking to the <u>Topeka and Santa Fe Railroad</u> (1923); the structures appeared to have been reconfigured, additional structures were depicted on the central portion of the site, a semi-circular roundhouse/train car turntable was visible on the central southern portion of the site, and apparent structures were visible throughout the site (1937-1957); the roundhouse appeared to have been partially dismantled (1962-1987); some of the structures appeared to have been removed from the site, including the remnant of the roundhouse (1998-2016).
North	Depicted as developed with the Topeka and Santa Fe Railroad, running north-northwest, of the site, a few structures northwest of the tracks, followed by vacant land (1923); structures were visible further north-northwest of the tracks, and the land further north-northeast appeared developed agricultural land (1937-1950); additional structures continued to be developed to the northwest, and an apparent commercial or industrial facility was visible, to the north-northeast (1957-2016).
East	Depicted as developed with the Topeka and Santa Fe Railroad tracks east of the site, followed by rectangular structures, followed by an apparent small residential community (1923); an apparent retention or water treatment pond (with six segments), and additional structures continued to be developed east of the tracks (1937); an apparent tank was visible next to the pond, and the land further east-southeast appeared developed for agricultural use (1946-1950); the tank appears to have been removed, and the ponds appear partially abandoned (1957-1962); the remaining portions of the pond appeared to have been abandoned (1967-1973); agricultural activities appeared to have ceased, and an apparent retention pond was visible further east (1984-1987); the land to the east-southeast appeared redeveloped with apparent industrial facility (1998-2016).

Direction	Description
South	Depicted as developed with the Topeka and Santa Fe Railroad tracks south and south-southeast of the site, followed by a road (North Road) and two small structures or dwelling (1923); additional small structures or homesteads, and agricultural land were visible south of the road, and rectangular structures, were visible further southeast of the site, which appeared associated with a railroad spur (1937-1948); the homesteads south of the road appeared to have been removed and redeveloped with commercial or industrial structures (1967-2016).
West	Depicted as developed with the Topeka and Santa Fe Railroad tracks west of the site, followed by an apparent canal (Fresno Colony Canal), and development of apparent industrial facilities northwest of the tracks, which appeared to be associated with a railroad spur (1923-1942); the facilities appeared to have been expanded, followed by a four-lane highway (99 Freeway), and business route (1946-1948); apparent industrial facilities appeared developed west of the freeway (1950); continued industrial development (1957-2016).

The historical use of the site as a railroad yard represents a recognized environmental condition (REC) to the site. In addition, evidence of a railroad roundhouse was observed on the central south portion of the site from prior to 1937 through 1998. Historically, railroad roundhouses performed significant maintenance and repair activities to railroad equipment and made use of petroleum products and hazardous substances. Therefore, the presence of the former railroad roundhouse represents a REC associated with the site.

3.2 Historical City Directories

The Cole Information Services and R.L. Polk & Company Publishers city directories used in this study were made available through EDR (selected years reviewed: 1975 through 2017) and were reviewed at approximate five-year intervals, if readily available. South Golden State Boulevard street listings were not available prior to 1996, and East Vine Avenue was not identified in the city directories. The current street address for the site was not identified in the city directories.

The above underlined and italicized facilities were identified in the regulatory database and are further discussed in Section 4.1.

3.3 Site Ownership

Based on a review of information obtained from the California State Board of Equalization, the current site owner is the Burlington Northern Santa Fe Railroad (BNSF). Previous owners were not identified.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

At the direction of the client, performance of a review of environmental liens and activity and use limitations was included as part of the scope of services for which Terracon engaged Review Company of Company City State. Based on a review of the title provider's research, environmental liens or activity and use limitations were/were not identified. In addition, the EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases.

3.6 Interviews Regarding Current and Historical Site Uses

The following individuals were interviewed regarding the current and historical use of the site.

Interviews

Interviewer	Name / Phone #	Title	Date/Time
Tamara Woods	David Meeker / (559) 936-4159	Lessee Representative	July 19, 2021 / 6:29 PM
Kristin Stout	Doug McReynolds (817) 352-3613	Owner Representative	September 2, 2021

Terracon interviewed Mr. David Meeker, Compliance Manager for Penny-Newman Grain Company via questionnaire and during the site reconnaissance. Mr. Meeker indicated he has been associated with the site for approximately six years since Penny-Newman Grain Company has leased the site from owner Burlington Northern Santa Fe Railroad (BNSF). Mr. Meeker indicated the site is currently used for agricultural commodity transloading. He indicated the site was formerly a BNSF Intermodal Yard (years not reported). Mr. Meeker was not aware of prior environmental reports, investigations, or concerns associated with the site. Mr. Meeker was not aware of any pending, threatened or past environmental litigation, proceedings or notices of possible violations of environmental laws or liability or potential environmental concerns in connection with the site or vicinity.

Mr. Meeker indicated the site is currently equipped with air compressors, hydraulic lift, aboveground storage tanks (ASTs), truck scale, transformers and/or capacitors, stained pavement, and wells. Refer to Section 5.1 for further discussion.

Mr. Doug McReynolds, Director Environmental Project Controls & Real Estate with BNSF, stated that environmental concerns were not noted for the site. In addition, Mr. McReynolds stated that according to the Stormwater Pollution Prevention Plan, the three man-hole covers observed on the site is an unused oil water separator (OWS) associated with the former crane maintenance pad.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Previous reports were not provided by the client to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
CERCLIS	Comprehensive Environmental Response, Compensation, & Liability Information System	0.5	0
CERCLIS / NFRAP	Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	1
NPL	National Priorities List	1.0	1
NPL (Delisted)	National Priorities Delisted List	0.5	0
SEMS	Superfund Enterprise Management System	0.5	2
SEMS ARCHIVE	Superfund Enterprise Management System Archive	0.5	5

Database	Description	Distance (miles)	Listings
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1.0	2
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	10
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
AST	Aboveground Storage Tank Facilities	0.25	1
CA BOND EXP PLAN	Bond Expenditure Plan	1.0	2
CA FID UST	Facility Inventory Database	0.25	14
CERS	CalEPA Regulated Site Portal Data	0.25	2
CERS HAZWASTE	CERS Hazardous Waste	0.25	17
CERS TANKS	CERS California Environmental Reporting System Tanks	0.25	6
CHMIRS	California Hazardous Material Incident Report System	Site	1
CIWQS	California Integrated Water Quality System	Site	1
CONSENT	Superfund (CERCLA) Consent Decrees	1.0	1
CORTESE	“Cortese” Hazardous Waste & Substance Site List	0.5	17
CPS-SLIC	Spills, Leaks, Investigation & Cleanup	0.5	7
CUPA	Fresno County Certified Unified Program Agency	0.25	73
ECHO	Enforcement Compliance History Information	Site	2
ENVIROSTOR	State and tribal equivalent CERCLIS	1.0	27
HAZNET	Facility and Manifest Data	Site	1
HMIRS	Hazardous Materials Information Reporting System	Site	1
HIST CAL SITES	Calsites Database	1.0	4
HIST CORTESE	Hazardous Waste & Substance Site List	0.5	16
HIST UST	Hazardous Substance Storage Container Database	0.25	19

HWTS	Hazardous Waste Tracking System	Site	1
LUST	Leaking Underground Storage Tanks	0.5	17
NOTIFY 65	Proposition 65 Records	1.0	2
NPDES	NPDES Permits Listing	Site	1

Database	Description	Distance (miles)	Listings
PROC	Certified Processors Database	0.5	1
RCRA NONGEN / NLR	RCRA – Non-Generators / No Longer Regulated	0.25	26
RESPONSE	State and tribal equivalent NPL	1.0	2
RGA LF	Recovered Government Archive Solid Waste Facilities List	Site	1
RGA LUST	Recovered Government Archive Leaking Underground Storage Tank	Site	3
ROD	Records of Decision	1.0	2
SWEEPS UST	Statewide Environmental Evaluation & Planning System	0.25	19
SWF/LF	Solid Waste Facilities/Landfills	0.5	7
TOXIC PITS	Toxic Pits Cleanup Act Sites	1.0	2
UST	Underground Storage Tank Facilities	Site and adjoining properties	0
WMUDS/SWAT	Waste Management Unit Database/Solid Waste Disposal Sites	0.5	3

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local, and proprietary databases provided by the database firm. A list of the additional reviewed databases is included in the regulatory database report included in Appendix D.

The site was identified on the regulatory database report.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities within 500 feet are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
AT & SF-Calwa Rail Yard	Parent Parcel / Site	RGA LUST	REC, discussed below.
Burlington Northern		RGA LF	
Santa Fe Intermodal		LUST, CORTESE, HIST CORTESE, CERS, RGA LUST	
BNSF Railway Company		RCRA NONGEN / NLR, ECHO	

Phase I Environmental Site Assessment

Penny-Newman Grain Company ■ Fresno, California
 September 17, 2021 ■ Terracon Project No. NA217045

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
Atchison, Topeka & Santa Fe		SWF/LF, SWEEPS UST, CUPA, CERS, RGA LUST	
Eagle Intermodal Ser		AST	
Santa Fe Fresno Rail		NPDES, CIWQS	
Mi-Jack Products		RCRA NONGEN / NLR, ECHO, CUPA, HAZNET, HWTS	
2989 South Golden State Boulevard		CHMIRS, HMIRS	
Burlington Northern Ninth & Vine		CUPA	
AT & SF Railway 9th & Vine		SWEEPS UST, CA FID UST	
BNSF Railroad 4006 East Vine Avenue		SWF/LF, CHMIRS, HAZNET, HWTS	
West Valley Construction Co, Inc. 2793 South Golden State Boulevard	125 feet / West / Cross-gradient	RCRA-NonGen/NLR, CERS HAZ Waste, CUPA	No, based on regulatory status, topographic gradient, and distance.
National Pump Company, LLC 2790 South Railroad Avenue	175 feet / West / Cross-gradient	CUPA	No, based on regulatory status, topographic gradient, and distance.
Truck City 2768 South Railroad Avenue	175 feet / West / Cross-gradient	CUPA, LUST, SWEEPS UST, CA FID UST, Cortese, Hist Cortese	No, based on file review discussed below.
Selsor Construction Inc.	180 feet / West / Cross-gradient	CUPA, RCRA NonGen/NLR, CERS HAZ Waste,	No, based on file review discussed below.
Railroad Maintenance Station		SWEEPS UST, HIST UST, CA FID UST	

Phase I Environmental Site Assessment

Penny-Newman Grain Company ■ Fresno, California
 September 17, 2021 ■ Terracon Project No. NA217045

Facility Name And Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site

Northrup King 2850 South Golden State Boulevard		CUPA	

Parent Parcel / Site

The Parent Parcel / Site addresses were identified on multiple databases including Recovered Government Archive Leaking Underground Storage Tank (RGA LUST), Recovered Government Archive Solid Waste Facilities List (RGA LF), Leaking Underground Storage Tank (LUST), “Cortese” Hazardous Waste & Substance Site List (CORTESE), Hazardous Waste & Substance Site List (HIST CORTESE), Certified Environmental Reporting System (CERS), Resource Conservation Recovery Act (RCRA) / Non Generator No Longer Reported (NONGEN NLR), Enforcement and Compliance Data (ECHO), Solid Waste Facility / Landfill (SWF/LF), Statewide Environmental Evaluation and Planning System Underground Storage Tank (SWEEPS UST), California Facility Identification (CA FID) UST, California Environmental Reporting System (CUPA), Aboveground Storage Tank Facilities (AST), National Pollutant Discharge Elimination System (NPDES), California Integrated Water Quality System (CIWQS), Facility and Manifest Data (HAZNET), Hazardous Waste Tracking System (HTWS), California Hazardous Material Incident Report System (CHMIRS), and Hazardous Materials Information Reporting System (HMIRS).

2989 South Golden State Boulevard

- Atchison, Topeka & Santa Fe (ATSF) Calwa Rail Yard was identified on two RGA LUST listings between 1997 and 1998. Additional information was not provided in this RGA LUST listing.
- The site was also identified on the RGA/LF listing, but relevant information was not provided in the RGA/LFT listing.
- The site was identified on the SWEEPS UST as having a diesel UST in 1993.
- According to the LUST listing, a release of diesel was reported to the aquifer used for drinking water supply. Terracon reviewed the State Water Resources Control Board (SWRCB) online database GeoTracker for additional formation. According to a case

closure letter dated October 5, 2000, on June 1993 a 58,000-gallon diesel UST was removed from the site. Analysis of soil samples collected from the removal of the UST detected diesel in the southern end of the UST where the piping was connected. In addition, diesel was also detected beneath a remote fuel dispenser approximately 300 feet northwest of the UST. In 1994, 22 borings and three monitoring wells were advanced and no petroleum hydrocarbons were identified in groundwater samples. Groundwater was encountered at 60 feet bgs with a northwest gradient. The highest concentrations of diesel was located between 30 to 35 feet bgs. No petroleum hydrocarbons were detected below a depth of 20 feet bgs near the former dispenser. Additional soil borings and monitoring wells were advanced throughout the years. Minimal concentrations of petroleum hydrocarbons as motor oil have been detected in groundwater at the site. The source of the motor oil is not known; however, the Regional Water Quality Control Board (RWQCB) staff indicated that the UST is not the source. The RWQCB estimated 3,000 cubic yards of contaminated soil remains in place with 26,000 pounds of diesel. Elevated levels of motor oil contamination also identified in smear zone. The source of motor oil was unknown but determined to not be associated with the diesel UST. Based on the paving of the area above the diesel impacts and that groundwater is not expected to come into contact with the diesel impacts, the RWQCB granted the site regulatory closure on October 10, 2000. The diesel impacted soil remaining in place represents a conditional REC (CREC) to the site. The database listings for CORTESE, HIST CORTESE, CERS, and RGA LUST were related to the LUST listing.

- BNSF Railway Company was identified on the RCRA NONGEN / NLR listing. As of August 2020, the facility was reported as a non-generator of hazardous waste with no violations found.
- The Atchison, Topeka & Santa Fe Ry was identified on the SWL/LF as a closed solid waste disposal site.
- The CUPA Fresno listing identified the site as being in the UST removal program, former contaminated site with no further action, and a closed solid waste facility.
- Eagle Intermodal Services was identified on the AST listing; however, size and contents of the AST were not noted.
- A CHMIRS listing dated March 31, 2000 indicated 3-5-gallons of hydraulic oil were released. A note on the record indicated materials were dumped into a hole on the ground and no attempt was made to clean up the material.
- The facility was also identified on the ECHO database with no violations identified between October 2018 to July 2021.
- Another CHMIRS listing dated June or July 1997 indicated approximately 55-gallon drum of hazardous liquid (not specified) was leaking. The release was reportedly contained and pending cleanup.
- Santa Fe Fresno Rail Yard was identified on the NPDES and CIWQS databases. Based on a review of the listings, an industrial storm water permit issued to BNSF Railway Company (WDID: 5F10I005940) was terminated in 1992.
- Mi-Jack Products, an oil and gas field equipment manufacturer, was identified on the RCRA NONGEN / NLR, ECHO, CUPA, HAZNET, and HWTS listings. Based on a review

Phase I Environmental Site Assessment

Penny-Newman Grain Company ■ Fresno, California
September 17, 2021 ■ Terracon Project No. NA217045

of the listings, in 2015, waste streams included ignitable waste, lead, benzene, hydrocarbon solvents, unspecified oil containing waste, with no violations found.

9th and Vine Avenue

BNSF Rail Road (Facility ID FA0269422) is identified on the CUPA listings for UST Removal with six tanks. Note on the database record indicated it was a former contaminated site with no further action status. ATSF Railway is identified on the SWEEPS UST and CA FID UST databases. Based on a review of the listings a 60,000-gallon diesel UST was reported as active in 1989. Based on the reported details, Terracon assumes this CUPA and UST documentation is related to the diesel UST removed from the site in 1993 and described above.

4006 East Vine Avenue

The BNSF Railroad is identified on the SWF/LF, CHMIRS, HAZNET, and HWTS listings. Based on a review of the listings, SWF/LF listing the facility was listed as unpermitted. A CHMIRS listing dated January 25, 2021 indicated approximately 5-gallons of locomotive oil was released due to mechanical failure. The release was reportedly contained and cleaned up by Patriot Environmental.

Off-Site Facilities

2768 South Railroad Avenue

The above facility, identified as Truck City, located approximately 175 feet west of the site, and in a hydrogeologic cross-gradient position relative to the site, was listed in the CUPA, LUST, SWEEPS UST, CA FID UST, Cortese, and Hist Cortese regulatory databases. The databases indicated the facility, was a LUST Cleanup Site; Global ID No. T0601900563; Local Case No. FA0269427. According to the database review, the facility previously operated as a commercial truck stop and repair facility. In May 1995, a diesel leak was discovered during the removal process of seven USTs and associated product piping and dispensers. Soil and groundwater analysis determined lateral impact to be approximately 40 feet, with vertical impact to groundwater. Based on continued groundwater monitoring and remediation activities, the Central valley Regional Water Quality Control Board (CVRWQCB) issued a Public Notice of Case Closure Consideration, on July 30, 2019, and the case appears to be pending closure, with the last action being the issuance of a groundwater monitoring well destruction instruction notice. Based on the pending/approved case closure, the approximate distance from the site, and hydrogeologic cross-gradient position relative to the site, the Truck City listings do not appear to represent a REC to the site.

2796 South Railroad Avenue

The above facility, identified as CalTrans Fresno Area Maintenance Station (CalTrans/Fresno)/ Railroad Maintenance Station, located approximately 180 feet west of the site, and in a hydrogeologic cross-gradient position relative to the site, was listed in the SWEEPS UST, HIST UST, CA FID UST, RCRA-SQG, CUPA, HIST UST, LUST, Cortese, and Hist Cortese regulatory databases. The databases indicated the facility was a LUST Cleanup Site; Global ID No. T0601900016; Local Case No. FA0004680. According to the database review, a petroleum hydrocarbon release was reported to the FCCHD, in November 1987. The soil only case was closed with oversight from the FCCHD, with a no further action indicated, on January 4, 2000. Based on the case closure status (with soil only impact determination), with FCCHD oversight, the approximate distance from the site, and hydrogeologic cross-gradient position relative to the site, the CalTrans Fresno Area Maintenance Station listings do not appear to represent a REC to the site.

2962 South Cedar Avenue

The above facility, identified as Manna Pro Products and Fresno Mill, located approximately 236 feet west of the site, and in a hydrogeologic cross-gradient position relative to the site, was listed in the CUPA, LUST, Cortese, Hist Cortese, SWEEPS UST, Hist UST, SWF/LF, and CA FID UST regulatory databases. The databases indicated the facility, was a LUST Cleanup Site; Global ID No. T0601900717; Local Case No. FA0169129. According to the database review, a diesel release was reported to the Fresno County Community Health Department (FCCHD), in September 1998. The soil only case was closed on September 29, 2000. Based on the case closure status (with soil only impact determination), with FCCHD oversight, the approximate distance from the site, and hydrogeologic cross-gradient position relative to the site, the listings do not appear to represent a REC to the site.

The remaining facilities listed in the database report do not appear to represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report listed three facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, none of these facilities were identified as the site or adjacent properties. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Wikipedia / By <u>online</u> search	Based on a review of the website, the Atchison, Topeka, and Santa Fe Railway (ATSF) operated the railroad from as early as the 1870s through 1996 when it merged with Burlington Northern Railroad to form Burlington Northern & Santa Fe Rail Road (BNSF).

Agency Contacted/ Contact Method	Response
Fresno County Assessor / By e-mail	Terracon contacted the Fresno County Assessor for ownership information. On July 14, 2021 a representative from the agency indicated the site is assessed by the State of California and recommended contacting the California State Board of Equalization (BOE) Assessed Properties Division. Refer to discussion below.
Fresno County Department of Environmental Health / By online search	Refer to discussion below the table.
Fresno County HazMat Compliance Program / By e-mail	On July 16, 2021, Ms. Cindy Sauls provided a CUPA Solid Waste Programs Resource List. Based on a review of the list, the address of 2989 South Golden State Boulevard was identified in the UST Removal, former contaminated site/no further action, solid waste facility, hazardous material disclosure/closed site, and hazardous waste generator records. The address of 4006 East Vine Avenue was not found. Refer to Fresno County Department of Environmental Health below for further discussion regarding the records.
Fresno County Public Works, Building and Planning / By online search	Two Public Works permits were listed for 2989 South Golden State Boulevard. Permits were issued to Burlington Northern & Santa Fe DS. Application No. 21-00024418 and 21-00050850. There was no property or permit records found for the remaining parcel numbers or address.
North Central Fire District / By e-mail	At the issuance of this report, a response had not been received. Based on the historical information and other agency responses, the absence of a response from the agency does not represent a significant data gap in connection with the site
Department of Toxic Substances Control (DTSC) / By e-mail	On July 13, 2021, the DTSC indicated that they have no records for the site.
DTSC Clovis Regional Office / By e-mail	At the issuance of this report, a response had not been received. Based on the historical information and other agency responses, the absence of a response from the agency does not represent a significant data gap in connection with the site.
Central Valley Regional Water Quality Control Board / By e-mail	At the issuance of this report, a response had not been received. Based on a review of information provided on GeoTracker and other agency responses, the absence of a response from the agency does not represent a significant data gap in connection with the site.

Agency Contacted/ Contact Method	Response
<p>San Joaquin Valley AQMD / By online submission</p>	<p>On July 19, 2021, Ms. April Martinez provided a Notice of Violation dated December 16, 2019 which cited the Penny-Newman Grain company for operating without authorization to construct which was resolved by December 24, 2019. Based on a review of a Review Management Review (RMR) dated February 19, 2020, the site is a whole cottonseed, gypsum, railcar, truck receiving, open storage pile, with self-propelled conveyor and truck loadout operation. The 2020 RMR conducted a risk analysis for cancer and non-cancer health impacts associated with the site operations. The Air District concluded the site operations is low risk and approved the project. There were no records found for 4006 East Vine Street. Based on the project approval, RECs were not identified.</p>
<p>California State Board of Equalization (BOE) Assessed Properties Division / By e-mail</p>	<p>On July 21, 2021, Mr. John Diamond of the agency indicated the site parcels are owned and actively operated by the BNSF (Section 3.3). Mr. Diamond provided eight land identification maps / railroad maps which included all or portions of the site and indicated the maps were provided to the agency by the BNSF. The following three maps included details relative to the site.</p> <p>0804-10-011-B (Not dated): This map depicts the northwestern portion of the site including gasoline storage next to a scrap bin in the northern portion of the site, wheel tracks, buildings (lav, blacksmith), and utilities. BNSF Maintenance yards depicted on the northeastern side of the railroad tracks.</p> <p>0804-10-012-T (Date illegible): This map depicts all site but doesn't have same level of detail as the prior map. Multiple buildings, a round-house, and area identified as "Timothy Paige" are depicted. BNSF Intermodal facility is labeled northeast of the tracks. ATSF Company listed as operator. Adjoining land use includes cotton seed, crane trucking, chemical plant, feed, wine, or vacant.</p> <p>0804-10-012-W (Rev. 1999): This map shows the southeastern portion of the site. The map is illegible, with the exception of the location of the historic round-house. Map titled ATSF Station Map, Calwa, California. Copies of these maps have been provided in Appendix C. The gasoline storage noted in the northern portion of the site represents a REC to the site.</p>

Fresno County Department of Environmental Health

On July 13, 2021 Terracon reviewed the agency's "Facility Records" and "Other Hazardous Materials Documents" located on the Fresno County Department of Public Health, Environmental Health Document [Portal](#). Records were available for the site addresses of 2989 South Golden State Boulevard and 4006 East Vine Street.

2989 South Golden State Boulevard

The following two “Facility Records” files were located for this address. There were no “Other Hazardous Materials Documents” found for the address.

- Burlington Northern & Santa Fe (BNSF) (3 pages). Documents included the removal of a 50,000-gallon diesel UST and monitoring wells. Refer to Section 4.1 for further discussion regarding the UST. Documents additionally included records for discharge ponds located on the parent parcel approximately 690+feet north-northeast of the site. Based on distance and hydrogeologic gradient the discharge ponds do not represent a REC to the site.
- Eagle Intermodal Services (4 pages). Documents dating between 2001 and 2015 primarily included hazardous waste generator forms, correspondences, inspection reports, permits and business plans. Two site diagrams contained in the business plans depicted the facility at or near the northeastern corner of East North Avenue and the Santa Fe RR. It was unknown if the documents are associated with the site.

4006 East Vine Street

There were no “Facility Records” found for the address; however, four incident reports were found in the “Other Hazardous Materials Documents”. Three Hazardous Material Spill Reports and one Issue Alert were issued to BNSF railway company from the Office of Emergency Services (OES).

- December 19, 2019: OES Control # 19-8117 indicated approximately 2-gallons of oil was spilled in rail yard. Location was indicated as Milepost 995.2. No waterways were reported to be impacted. Cleanup was reported as a contractor.
- January 16, 2016: OES Control # 16-0332 indicated approximately 25-gallons of diesel fuel was released when a locomotive was overfilled, Locomotive Engine No. BNSF3118. No waterways were reported to be impacted. Location was indicated as subline Milepost 995.2 (Fresno Yard). Cleanup was reported as a contractor.
- March 18, 2015: OES Control # 19-8117 indicated approximately 10-gallons of diesel was released when a fuel line broke on Locomotive Engine No. BNSF5043. No waterways were reported to be impacted. Cleanup was reported as a contractor.
- January 26, 2005: An Issue Alert indicated approximately 2,000-gallons of diesel was released as a result of a train derailment. Approximately 350 to 400-gallons of diesel was captured in small swimming pools. The release was reportedly confined to BNSF property and no storm drains or waterways were affected.

It is unknown if the incidences for the address of 4006 East Vine Street occurred on the site.

3901 East Vine Street (9 pages)

Terracon additionally searched the records for this address as it was mentioned in correspondences in the site Eagle Intermodal Services records. Records for the BNSF Railway Company dating between 1988 and 2021 included payment, waste tire inspections records, auto maintenance repair, AST storage, hazardous waste generator, business plans, hazardous material disclosure, and correspondences. The following two “Other Hazardous Materials Documents” were available for review.

- September 8, 2015: OES Control [15-2571](#) indicated 0.5-gallons of lube oil was released to the ground and cleaned up by a contractor.
- February 14, 2014: OES Control # [14-0858](#) indicated 15-gallons of diesel was released to the ground and cleaned up by a contractor.

There were no site diagrams contained in the records that would indicate if the address of 3901 East Vine Street is associated with the site. The address and associated parcel number (APN 487-150-23U) are located approximately 360 feet north of the site as per the Fresno County GIS Portal [website](#); therefore, Terracon presumes the address of 3901 East Vine Street is not associated with the site.

EHD File Review Discussion Summary

Several petroleum hydrocarbon releases were reported for the parent parcel addresses; however, the exact location of the releases was not known which represents a data gap to the site.

4.3 Local Area Knowledge

Based on a review of the California Geologic Energy management Division (CalGEM) Well Finder [Website](#), formerly Division of Oil, Gas, and Geothermal Resources (DOGGR), there were no gas wells depicted on the site. One plugged dry hole well (API: 0401906061) was depicted approximately 1,250 feet southwest of the site. Based on distance and abandonment status, the well does not represent a REC to the site.

The National Pipeline Mapping System (NPMS) [Website](#), depicted a non-highly volatile liquid (hvl) product liquid pipeline along the southwestern site boundary along South Railroad Avenue. A gas transmission pipeline was depicted near the southern corner of the site along East North Avenue. The exact location of the pipelines was not readily available. There were no accidents (liquid) or incidents (gas) reported near the site or adjoining properties. Based on the absence of reported releases and development of the surrounding properties, the pipelines and/or easements do not represent a REC to the site.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Tamara K. Woods
Reconnaissance Date	July 22, 2021
Weather Conditions	Sunny, Clear, 99 F
Site Contact/Title	David Meeker / Client Representative

Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft ²)
Scale house	Scale operator, office, restroom	1930	1	1,050
Storage building	25% storage / 75% vacant	1930	1	1,775

Site Utilities	
Drinking Water	Well
Wastewater	City of Fresno
Electric	Pacific Gas and Electric
Natural Gas	Unknown

5.2 Overview of Current Site Occupants

The site is located at 2989 South Golden State Boulevard and 4006 East Vine Avenue and is a 27.2-acre parcel of land leased by Penny Newman Grain Company. The site consists of portions of Assessor Parcel Numbers (APNs) 48702017U, 48702018U, 48702019U, 48702020U, 48715014U, and 48715015U. Two small structures, approximately 1,050 and 1,775 square-feet (SF) are located on-site.

5.3 Overview of Current Site Operations

During the site reconnaissance, site operations included transloading of agricultural commodities including gypsum, cotton seed, cotton seed hulls, and almond hulls via heavy equipment, railroad, and semi-trucks.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	X
	Hydraulic lifts	X
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
Other processes or equipment	X	
Aboveground Chemical or Waste Storage	Aboveground storage tanks	X
	Drums, barrels and/or containers ≥ 5 gallons	X
	MSDS or SDS	X
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	X
	Pipeline markers	
	Interior floor drains	
Electrical Transformers/PCBs	Transformers and/or capacitors	X
	Other equipment	X

Category	Item or Feature	Observed or Identified
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

Air compressors

One air compressor was observed on the rear of the service trailer located east of the tipper. Staining and/or evidence of release was not observed on the ground surface near the compressor/trailer. Based on site observations, the air compressor does not represent a REC to the site.

Hydraulic lifts

An aboveground hydraulic semi-truck trailer tipper was observed on the central portion of the site. Staining (less than 20 SF) was observed near the associated hydraulic equipment located east of the tipper. The asphalt surrounding the equipment was covered with dry product which appeared to absorb the staining. According to Mr. Meeker, when a release occurs, the release is cleaned up and removed by a third-party contractor. Based on site observations, the tipper and associated hydraulic equipment does not represent a REC to the site.

Other processes or equipment

Piles of gypsum, cotton seed, cotton seed hulls and almond hulls were observed on the site. According to Mr. Meeker, the cotton seed is used in the production of cattle feed and the gypsum is used for agricultural soil amendments. Based on reported uses, the piles of product do not represent a REC to the site.

According to Mr. Meeker, a portion of the Penny Newman Grain Co. lease area is used by the BNSF as an AST fueling area. One AST (size unknown, estimated to be 500+-gallons) was observed in the area. Mr. Meeker indicated the AST was used by the BNSF for diesel; however, the AST was not in use. Mr. Meeker indicated two additional ASTs were formerly located in the area; however, BNSF had recently removed them.

Concrete pads and open pipes were observed east of the scale house and west of the almond hull pile; however, the purpose of the pipes was not known. Based on the historical aerial photographs and topographic maps, former on-site structures were apparently removed, between 1937 and 1998, which may account for the concrete remnant. Staining and/or evidence of release was not observed in the vicinity of the features. Based on site observations, RECs were not identified.

Aboveground Chemical or Waste Storage

Aboveground storage tanks

The following aboveground storage tanks (ASTs) were observed on the site.

Quantity	Approximate Size	Contents	Location	Staining (Size)	REC
1	500	Water	Trailer	No	No
1	Unknown (Estimated 500+)	Diesel	BNSF AST Fueling Area	No	No
1	25	Diesel	Service Trailer	No	No
1	25	Hydraulic Oil	Service Trailer	No	No
1	25	Motor Oil	Service Trailer	No	No
1	<50	Hydraulic Oil	Tipper Hydraulic Equipment	Yes (20 SF)	No
		Diesel			

Drums, barrels, and/or containers ≥ 5 gallons

One approximately 10-gallon container of waste oil and an empty approximately 10-gallon container were observed in the storage building west of the scale house. Mr. Meeker indicated hazardous materials containers are stored off site at the Penny Newman Grain Co. main facility and disposed by a third-party contractor. Staining and/or evidence of release was not observed in the vicinity of the containers. Based on interviews and site observations, RECs were not identified.

MSDS and/or SDS

Mr. Meeker indicated electronic SDS were available for the hazardous materials located on the site. Based on interviews and the reported chemicals stored on the site, the SDS do not represent a REC to the site.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Oil/water separators, clarifiers, sand traps, triple traps, interceptors

A series of three in-ground manhole covers with piping were observed in the BNSF fueling area (photo # 14 in Appendix B). According to Mr. McReynolds, Stormwater Pollution Prevention Plan indicated that the three man-hole covers observed on the site is an unused oil water separator (OWS) associated with the former crane maintenance pad. Mr. McReynolds did not know any additional information in regard to the OWS. Based on the long-term railroad yard operations and unknown age of the OWS, the potential for undocumented spills and releases associated with the OWS represents a REC to the site.

Electrical Transformers/PCBs

Transformers and/or capacitors

During Terracon's site visit, two pole mounted transformers were observed south of the scale house and one pad-mounted transformer was observed along the western boundary. According to Mr. Meeker, PG&E supplies electricity to the site. PG&E maintains responsibility for the transformers, and if the transformers were "PCB contaminated," PG&E is not required to replace the transformer fluids until a release is identified. Evidence of current or prior releases was not observed in the vicinity of the electrical equipment during the site reconnaissance. Based on site observations and absence of a release, the transformers are not anticipated to represent a REC to the site.

Other equipment

One "dry type" transformer was observed south of the storage building. Staining and/or evidence of release was not observed in the vicinity of the electrical equipment during the site reconnaissance. Based on site observations, the "dry-type" transformer does not represent a REC to the site.

Releases or Potential Releases

Stained pavement or similar surfaces

An approximately 100 SF stain was observed on the asphalt in the equipment storage area north of the scale house and storage building. Leaking equipment was also observed in the area. The pavement in the area of the staining was in fair to good condition. Based on site observations, the staining represents a *de minimis* condition and does not represent a REC to the site.

Trash, debris and/or other waste materials

A minor amount of broken asphalt, pieces of metal were observed along the western boundary near tarps and rubber tires. Staining and/or evidence of release was not observed in the vicinity of the storage area. Based on site observations, the debris does not represent a REC to the site.

Other Notable Site Features

Wells

One groundwater well and associated steel storage tank were observed on the central eastern portion of the site. Staining and/or evidence of release was not observed near the well head or vicinity. Based on site observations, the well does not represent a REC to the site.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	The north adjoining property consists of the BNSF railroad.
East	The eastern adjoining properties consist of the BNSF railroad properties / parent parcels (4006 East Vine Avenue and 2989 South Golden State Boulevard) and an industrial property (2904 and 2908 East Maple Avenue).
South	Properties to the adjoining south consist of the intersection of Golden State Boulevard and North Avenue followed by industrial properties (3021 South Golden State Boulevard and 2365 East North Avenue).
West	The railroad abuts the site to the west followed by Golden State Boulevard and Railroad Avenue.

RECs were not observed with the adjoining properties.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, additional services (e.g. asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 DECLARATION

I, Kristin Stout, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

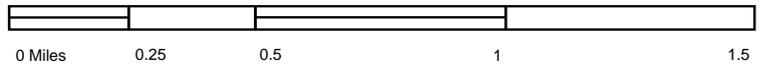

Kristin Stout
Environmental Department Manager

SITE PHOTOGRAPHS

Photo #1 View of the scale house and storage building located on the southern portion of the site.

Photo #2 View of a pole mounted transformer and a pile of almond hulls located east of the scale house.

Photo #3 View of a pole mounted transformer located south of the scale house.

Photo #4 View of a dumpster located south of scale house.

Photo #5 View of concrete pads and approximate two pipes located east of the scale house.

Photo #6 View of *de minimis* asphalt staining at the equipment parking area north of the storage building and scale house.

Photo #7 View of a restroom in the scale house.

Photo #8 Additional view of the storage building.

Photo #9 Interior view of the storage building and pile of mesh screen material.

Photo #10 View an approximately 10-gallon container of waste oil and an empty container in the storage building.

Photo #11 View of leaking equipment and absorbent located north of the storage building.

Photo #12 View of a 500-gallon container of water used for dust suppression.

Photo #13 View of a diesel AST (size unknown) and piping in the BNSF AST area.

Photo #14 View of a reported oil water separator located at the BNSF AST area.

Photo #15 Representative view of a pile of gypsum.

Photo #16 Representative view of multiple storm drains located along the eastern site boundary.

Photo #17 View of piles of cotton seed hulls.

Photo #18 View of tarps, broken asphalt, metal storage and rubber tires located on the western portion of the site.

Photo #19 View of a pad mounted transformer and electrical panel located along the western boundary.

Photo #20 View of the groundwater well tank.

Photo #21 Additional view of the well head.

Photo #22 View of the hydraulic truck tipper located on the central portion of the site.

Photo #23 View of the above ground hydraulic power source for the tipper containing diesel fuel and hydraulic oil.

Photo #24 View of a service trailer with air compressor, diesel, hydraulic oil and motor oil located east of the tipper.

Photo #25 View of the asphalt area west of the well looking southwest toward the tipper.

Photo #26 View of the approximately 30 foot tall mesh fence used to capture cotton lint.

Photo #27 View of gypsum and cotton seed piles located on the northern portion of the site.

Photo #28 View of a gypsum pile within a concrete block structure located on the northern portion of the site.

Photo #29 View from the northern corner of the site looking south (4006 East Vine Street).

Photo #30 View of the right-of-way / entrance at the southern corner of the site (APN 48702017U).

Photo #31 View of the northern adjoining BNSF railroad property (APN 48175015U) and eastern adjoining parent parcel (4006 East Vine Avenue).

Photo #32 View of the eastern adjoining BNSF railroad property / parent parcel (2989 South Golden State Boulevard).

Photo #33 View of the eastern adjoining (2904 and 2908 South Maple Avenue).

Photo #34 View of the southern adjoining BNSF property located on the parent parcel (APN 48702017U).

Photo #35 View of the southern adjoining properties (2147 and 2365 E. North Ave. and 3021 S. Golden State Blvd).

Photo #36 View of the western adjoining railroad property followed by Golden State Boulevard and Railroad Avenue.

APPENDIX C
HISTORICAL DOCUMENTATION AND USER QUESTIONNAIRE

Phase I ESA Owner/Site Contact Interview Form

Interviewee Name: **David Meeker** Title: Compliance Manager

Address: 2691 S. Cedar Ave, Fresno, CA 93725 Phone: 559-936-4159

Relationship to Property: Lessee Length of Relationship: 6 years

Name(s) of Owner(s) of the Property: Burlington Northern Santa Fe Railroad

Contact Information of Owner(s): Julie Alexander Date of Acquisition: Unknown

Property Address: 2989 S. Golden State Front Road, Fresno, CA

Previous Street Names/Numbers: _____

Total # of Buildings: 3 Square Footage of Each Building: N/A

of Stories: 1 Date Built: N/A

General Business Type/Present Property Use: Buld agricultural commodity transloading.

Past Property Uses (include dates): BNSF Intermodal Yard

Please indicate the provider for each of the following site utilities:

Drinking Water	Well
Wastewater	City Sewer
Electric	PG&E
Natural Gas	Unknown

Are you aware of any previous environmental reports/investigations associated with the site? If so, can you provide them?

Yes No

Notes: _____

Are you aware of any environmental concerns associated with the site, either historically or currently? If yes, please explain.

Yes No

Notes: _____

Are you aware of any pending, threatened or past environmental litigation, proceedings or notices of possible violations of environmental laws or liability or potential environmental concerns in connection with the site? If yes, please explain.

Yes No

Notes: An air district violation was issued for operating without a permit.

Have any of the following items/features been currently or historically associated with the site?

Item	Yes	No	Unknown	Location / Notes
Site Operations, Processes, and Equipment

Contact: Tamara Woods

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # D3AD-471F-8C49
PO # NA
Project NA217045

UNMAPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: D3AD-471F-8C49

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Terracon (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Summary Details:

Conditions at listing December 1982): The Purity Oil Sales, Inc., Site covers 6 acres in an industrial-residential area 2 miles south of Fresno in Malaga, Fresno County, California. To the north is a mobile home park, scrap metal recycling/reclaiming facility, and a combination service station, market, and coffee shop. An irrigation canal is to the south, Santa Fe Railroad to the west, and South Maple Avenue to the east. The Fresno Aquifer, about 30 feet below the surface, provides water for municipal, industrial, and agricultural purposes, as well as for a number of private wells. The area is also a ground water recharge one. Oily liquids and sludges have been disposed of on-site for many years. Some liquidwastes remain in a concrete pond. Former sludge disposal ponds have been filled with construction debris. Soil samples contain significant concentrations of PCBs, lead, copper, inc, and various volatile organics. An unknown sludge- like substance is oo ing from the filled areas and has, in places, entered adjacent properties. The site was closed in 1974. All buildings were removed, and the site was fenced. Status July 1983): The State has requested CERCLA funding for aremedial investigation/feasibility study to determine the type and extent of contamination at the site and identify alternatives for remedial action.

NPL:

Potential Media Affect: Aquifer used for drinking water supply
Potential Contaminants of Concern: Diesel
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Global Id: SLT5FT744548
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5F)
Latitude: 36.693447
Longitude: -119.752906
Case Type: Cleanup Program Site
Case Worker: CKN
RB Case Number: SLT5FT074
File Location: Archived
Potential Media Affected: Aquifer used for drinking water supply
Site History: A 1981 Central Valley Water Board staff inspection identified concern of potential pesticides in yard stormwater drainage, which discharged to an unlined drainage ditch in the southwest portion of the property. In 1982, Wilbur-Ellis identified pesticide residuals in shallow soil (and traces in shallow groundwater). In April 1982, 331 tons of pesticide-contaminated soil was excavated from the top one to four feet of soil from the unlined drainage ditch in the southwest portion of the site. In September 1983, an additional 50 tons of pesticide-contaminated soil was excavated. Excavated soils were disposed of as hazardous waste at a class I disposal facility. Subsequent site assessment confirmed residual pesticide impacts on soil (lindane, dieldrin, methoxychlor, toxaphene, chlordane, PCP, thiodane, DDT, Kelthane, ethion, parathion) and groundwater (lindane, phosphamidon & endosulfan) at the site. Groundwater impacts were below the current environmental screening levels at the time. Central Valley Water Board staff determined no further site assessment was required in 1982 and requested modifications to the facility and

MAP FINDINGS

WILBUR-ELLIS COMPANY-FRESNO PLANT (Continued)

S105124216

management practices to limit pesticide discharges on site. In 1983, Willbur-Ellis proposed to install a rainwater containment system in the areas of pesticide storage and formulation. The plan was approved by the Central Valley Water Board, DTSC, and Fresno County Environmental Health in 1986. The Central Valley Water Board issued a case closure letter in 1991, based on compliance with the "Conditions of Waiver of Waste Discharge Requirements at Retail Fertilizer Facilities", and facility renovation to be completed by 1994 - including installation of a pesticide rinse water recycling system.

WDS:

Name: BURLINGTON NO & SANTA FE CALWA
Address: 3901 E Vine Ave
City: FRESNO
Facility ID: 5F 10I013002
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 0
Facility Telephone: 5594577533
Facility Contact: HARRIS MIKE
Agency Name: BURLINGTON NORTHERN & SANTA FE
Agency Address: 740 Carnegie Dr
Agency City,St,Zip: San Bernardino 924083571
Agency Contact: HARDIN ME
Agency Telephone: 9093864081
Agency Type: ?
SIC Code: 0
Design Flow: 0
Baseline Flow: 0
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

WMUDS/SWAT:
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Primary Waste: SLDWST
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

 Name: REFINERY SERVICES (MALAGA PLANT)
 Address: SO OF FRESNO IN MALAGA
 City,State,Zip: MALAGA, CA 93725
 Region: STATE
Facility Status: Completed - Case Closed
 Status Date: 10/11/2013
 Global Id: SLT5FT584533
 Lead Agency: CENTRAL VALLEY RWQCB (REGION 5F)
 Latitude: 36.6905
 Longitude: -119.7496
 Case Type: Cleanup Program Site
 Case Worker: JYH
 RB Case Number: SLT5FT058
 Potential Media Affected: Aquifer used for drinking water supply
 Site History: Facility formerly recycled motor oil and had ponds for storing the oil. A cleanup and abatement order was issued in 1983. The contents of the ponds were emptied and disposed of at appropriately licensed facilities. Discolored sediments were excavated and confirmation samples collected for confirmation that no affected soils remained. The cleanup and abatement order was rescinded in 1985. A file review in 2013 indicated that remediation had been completed at the site and the case was closed.

Citation: 22 CCR 12 66262.12 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.12
Violation Description: Failure to obtain an Identification Number prior to treating, storing, disposing of, transporting or offering for transportation any hazardous waste.

Violation Notes: Returned to compliance on 05/11/2017.
Violation Division: Fresno County Department of Public Health
Violation Program: HW
Violation Source: CERS

Site ID: 432888
Site Name: ATP PARTS
Violation Date: 03-24-2017
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 06/05/2017.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: IGNITABLE WASTE

Waste Code: D002
Waste Description: CORROSIVE WASTE

Waste Code: D006
Waste Description: CADMIUM

Waste Code: D009
Waste Description: MERCURY

Waste Code: D016
Waste Description: 2,4-D (2,4-DICHLOROPHENOXYACETIC ACID)

Waste Code: D018
Waste Description: BENZENE

Waste Code: D035
Waste Description: METHYL ETHYL KETONE

Waste Code: F003
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Case Worker: HBL
RB Case Number: SL185224250
File Location: Regional Board
Potential Media Affected: Other Groundwater (uses other than drinking water)
Potential Contaminants of Concern: Other Acid or Corrosive, Other inorganic / salt
Site History: The Site is at 2356 E. North Avenue south of the City of Fresno. It is owned by Producers Holding Company, Inc. The Site occupies a total of 12 acres and 2.17 acres are the ponds. The Site is located in an industrial area. Between the winters of 1981 and 1985, the Discharger utilized an acid delinting process as part of the cotton planting seed preparation. Through this process, the cotton seeds were placed in sulfuric acid then rinsed with water. This process typically lasted between 30 and 60 days each year. During this time frame approximately 30,000 gallons per day (gpd) of rinse water was generated at the facility and discharged to two unlined ponds (south and southwest ponds). As a result of this process, the underlying groundwater has been degraded with high concentrations of sulfates. The discharger is still in the process of defining the lateral extent of degradation. The ponds were lined with a bentonite slurry and capped in 1991 and 1992. At that time -Four monitoring wells (MW-1 through MW-4) were installed in 1991. In 1992 additional groundwater monitoring work plans were completed and three additional wells were installed (MW-5 through MW-7). In 1992 WDR Order No. 92-195 was issued and continues to be in effect. In August of 2005 quarterly groundwater monitoring was completed.

WMUDS/SWAT:

Complexity: Category B - Any facility having a physical, chemical, or biological waste treatment system (except for septic systems with subsurface disposal), or any Class II or III disposal site, or facilities without treatment systems that are complex, such as marinas with petroleum products, solid wastes, and sewage pump out facilities.

Primary Waste: PROCES

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Tonnage: 0

Municipal Solid Waste: False

Superorder: False

Open To Public: False

Waste List: False

Agency Type: Private

Agency Name: PRODUCERS COTTON OIL COMPANY

Agency Address: 2365 E NORTH AVE

Agency City,St,Zip: FRESNO CA 93725

Agency Contact: DUNCAN MC COOK

Agency Telephone: 5594466415

Region: 5F

Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.

Primary SIC: 0723

Waste Discharge System: True

Solid Waste Assessment Test Program: False

Toxic Pits Cleanup Act Program: False

Resource Conservation Recovery Act: False

Department of Defence: False

Threat to Water Quality: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

WDS:

Name: FRESNO IRRIGATION DISTRICT
Address: 2907 S MAPLE AVE
City: FRESNO
Facility ID: San Joaquin 10NP00003
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Historical - Any regulated facility for which the Regional Board has rescinded all WDRs or consciously allowed an NPDES permit to expire.
NPDES Number: CAG990003 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 0
Facility Telephone: 5592337161
Facility Contact: RALPH YOCKEY
Agency Name: FRESNO IRRIGATION DISTRICT
Agency Address: 2907 SOUTH MAPLE AVE
Agency City,St,Zip: FRESNO 93725
Agency Contact: RALPH YOCKEY
Agency Telephone: 5592337161
Agency Type: Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)
SIC Code: 4971
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Local Agency: US ENVIRONMENTAL PROTECTION AGENCY
File Location: Regional Board
Local Case Number: TTFA0002271
Potential Media Affect: Soil, Under Investigation
Potential Contaminants of Concern: Gasoline, Diesel
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted. EPA link: <http://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0902019>

Background Info: The Purity Oil Sales site is an abandoned oil recycling facility which operated from 1934 to 1975. Open, unlined ponds and pits were used both to store oils for processing and to dispose of waste by-products. Leaks and spills from tanks and piping occurred over the years. In addition to oils, metals associated with the oils (lead, copper, and zinc) are also present in significant concentrations. Monitoring wells indicate groundwater contamination has migrated in a northwesterly direction. The groundwater contaminants include heavy metals and various organics, including 1,2-dichloroethane (1,2-DCE) and chloroform. In May 1985, EPA cleaned up two pits and numerous seeps. The site was fenced and posted. The State performed the initial remedial investigation. In 1986, EPA assumed lead role of the investigation. Based on public and State input, EPA elected to separate site remediation into two Records of Decisions (RODs). ROD #1, signed by EPA on September 26, 1989, outlined groundwater remediation goals and criteria. This ROD also authorized removing the seven above ground storage tanks and, by late 1991, providing an alternative water supply for owners of private wells affected by the Purity site. ROD #2, signed in June 1992, presented the selected remedy for soils at the Purity site, was based on the results of soil treatability studies conducted by EPA in July 1990. Removal of the seven above ground storage tanks was completed in November 1990. DTSC and EPA signed a Superfund Contract for removal action. In October 1993 the Design for groundwater pump and treat was approved in accordance with the requirements of ROD 1. The Design was implemented and continues to be operated by a consortium of

under a 1998 consent decree with EPA. In June of 1996 the Design for soil remedial measures as specified in ROD 2 were approved. These included capping, lining the adjacent canal, and installation of SVE capability. As this represented a modification to what was originally proposed in the ROD and Explanation of Significant Differences was also prepared. On October 18, 2000, EPA issued a conditional approval of the Removal Action Workplan (RAW). Construction began in October 2000. In November 2000, residents of the Mobile Home Park adjacent to the site were permanently relocated. A stop work order was issued by EPA on March 20, 2001 after new contaminants were discovered on adjacent properties.

CA BOND EXP. PLAN:
 Reponsible Party:
 Project Revenue Source Desc:

NPL SITE CLEANUP WORKPLAN
 No responsible party has been identified. This site has been included on the NPL; therefore, federal funding will be available to cover 100 percent of the RI/FS costs and 90 percent of the cost for final clean up. Bond funds will be used to fund the State's share (ten percent) of cleanup costs. The Department will undertake appropriate cost recovery action.

Site Description:

The site was used from 1934 to 1975 in the recycling of lubricating oils. Open ponds and pits were used to store the oil to be recycled and the wastes generated by the process. In addition, a number of spills occurred over the years, and a variety of areas have oil contamination. In addition to the oils, the metals associated with the oils (lead, copper and zinc) are also present in significant concentrations. Monitoring wells located at the site perimeter show ground water contamination, both from the site, and possibly, from offsite. The contaminants include heavy metals (lead, copper and zinc) and various volatile organics, including chloroform.

Hazardous Waste Desc:

The hazardous materials detected onsite are oil, grease, various hydrocarbons and sulfur compounds and the associated heavy metals of lead, zinc and copper. The three metals are associated with waste oil recycling. In addition, a variety of chlorinated hydrocarbons such as methylene chloride, chloroform and trichloroethylene (TCE) have been found in several samples. Elevated levels of

some contaminants have been found in private water wells adjoining the site. Insulating material coating one of the large above ground tanks contains approximately 50 percent asbestos. he large above ground tanks contains approximately 50 percent asbestos.

Threat To Public Health & Env: The site is completely fenced. Air emissions from the undisturbed site are minimal. There are various surface seeps within the fenced area and also in some areas outside of the site boundaries. Most of these have been controlled, but there is a potential for new seeps to appear. The ground water beneath the site is contaminated by a wide variety of organic and inorganic compounds. Contaminants of concern detected in ground water samples include volatile and semivolatile compounds, iron and manganese.

Site Activity Status: Most of the immediate remedial action items have been completed. The site has been fenced, a concrete sump emptied, many of the surface seeps have been treated. There are seven abandoned tanks onsite. Phase I of the remedial investigation has been completed; EPA is concluding the phase II (supplemental) remedial investigation. DHS will remove the seven large tanks as part of an interim remedial measure.

WDS:

Name: PICK N PULL AUTO DISMANTLERS
Address: 3230 E JENSEN AVE
City: FRESNO
Facility ID: 5F 10I015068
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 0
Agency Name: PICK N PULL AUTO DISMANTLERS
Agency City,St,Zip: 0
SIC Code: 0
Design Flow: 0
Baseline Flow: 0
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 03/05/1982
Comments: Facility identified from phone book.

Completed Area Name: PROJECT WIDE
Completed Document Type: Site Screening
Completed Date: 09/29/1992
Comments: This 15 acre site was owned by New Idria Mining and Chemical and sold to Frank and Florence Caglia. The site is composed of one building and a salvage yard. The yard contains approximately 850 empty drums, tires, metal scraps, unused autos and trucks, batteries, machinery and air chambers. Sample from onsite monitoring well indicate concentrations of cadmium, manganese and carbon tetrachloride above the Federal and State MCLs.

BOX 164 FRESNO, CA 93707 7209 NORTH INGRAM AVENUE FRESNO, CA 93650 3242 EAST GARRETT AVENUE, P.O. BOX 527 FRESNO, CA 93709 During preparations by Weir Floway, Inc. in March 1991 to erect a metal building on an existing foundation, a 300-gallon underground storage tank was discovered which prompted an investigation to determine the extent of petroleum wastes associated with past releases from the tank. It was determined that soil underlying parcels 12 and 13 had been impacted with petroleum waste constituents from various past operations on the parcels. It was also determined that chromium and TCE are present in groundwater underlying and downgradient of parcel 18. In 1993, soil-related activities on parcel 18 included the removal of concrete storage vaults and the drilling of seventeen soil borings. Soil samples for chemical analyses were collected during the drilling of the borings. Most of the borings were drilled to a depth of 60 feet and concentrations of hexavalent chromium increased with depth in several of the borings. Minimal historical information has been provided by the Vendo Company about specific waste disposal practices at the Site. A March 10, 1994 soil investigation report indicated that a possible chromium source exists at a former ponding basin south of monitoring well MW-10 on parcel 18. The soil investigation report noted that TCE appeared to be more diffusely distributed in soil thus making the determination of point source locations more difficult. A workplan dated March 5, 1995 proposed initiating a chromium source area investigation in the former ponding basin area, but the investigation was not conducted. Floway/Vendo is operating a pump and treat system designed to remove chemicals associated with past operations from groundwater at the Property. This system, operational since 1995, extracts and treats groundwater at a rate of 25 to 30 gallons per minute (gpm). Maximum chromium concentrations in groundwater in the vicinity of the Site appear to be located along a relatively long narrow band starting at the Floway/Vendo monitoring well MW-14, and extending to the Floway/Vendo monitoring wells MW-8, MW-5 and exploratory boring EBG-2. This band further extends to the FMC monitoring wells W-19, W-17 and W-15, and to the Zacky Farms supply wells 15A2 and 15A1. Groundwater samples are regularly collected from the Zacky Farms supply wells by representatives from the nearby FMC Site. During</p>

December 1998, trichloroethylene (TCE) was detected in samples from supply well 15A2 at concentrations of 6.7 and 6.5 micrograms per liter (ug/l). Chromium was detected at concentrations of 109 and 112 ug/l. The Maximum Contaminant Level for TCE is 5 ug/l and the MCL for chromium is 50 ug/l. Use of the underlying ground- by Zacky Farms has been discontinued.

The lateral and vertical extent of soil and groundwater contamination associated with the Floway Site has not been determined.

The primary routes of exposure for chromium and TCE from the Site would be through the potential ingestion, inhalation and absorption of affected groundwater. Potential exposure pathways for affected Site soil include ingestion and inhalation of soil particles, inhalation of vapors present in soil, and dermal contact with soil. The area surrounding the Site is generally devoted to industrial, residential and agricultural- related land uses. Groundwater in the vicinity of the Site is used as a drinking water source, and is also used for industrial and agricultural purposes.

An Imminent and Substantial Endangerment Determination and Remedial Action Order was issued by the Department of Toxic Substances Control in October 1999.

The site presently consists of four parcel numbers 12, 13, 18, 19 and has been the location of a succession of pump manufacturing operations since the 1930's. From 1939 to 1964, a portion of the site was leased to the Vendorlator Manufacturing Company. Information available suggests that chrome plating by Vendorlator may have begun between 1945 and 1950, and that use of trichloroethylene (TCE) as a solvent degreaser may have begun some time later.

Completed Document Type: Removal Action Workplan
Completed Date: 03/04/2008

Completed Area Name: PROJECT WIDE
Completed Document Type: Fieldwork
Completed Date: 01/28/2002
Comments: Initiation of Remedial Action. Extraction Well P-3 start up. The groundwater extraction system at the site is now operating with extraction Well P-2 pumping at 60 g.p.m. and well P-3 pumping at approximately 80 g.p.m.

Completed Area Name: PROJECT WIDE
Completed Document Type: Removal Action Workplan
Completed Date: 01/09/2001
Comments: Remedial Action Workplan completed interim removal of Off-Site groundwater impacts.

Completed Area Name: PROJECT WIDE
Completed Document Type: Remedial Action Completion Report
Completed Date: 06/30/1999
Comments: RMDL SOIL - Approval of "Remedial Action Completion Report, Revision B". This report documents the implementation of the remedial actions included in the final soil RAP dated June 1997.

Completed Area Name: PROJECT WIDE
Completed Document Type: Design/Implementation Workplan
Completed Date: 06/12/1998
Comments: DTSC approval of the "FINAL REMEDIAL DESIGN REPORT" for soil. The approved remedy includes the construction of a cap over contaminated soil and operation of a soil Vapor Extraction System.

Completed Area Name: PROJECT WIDE
Completed Document Type: Remedial Investigation / Feasibility Study
Completed Date: 04/21/1997
Comments: Remedial Investigation and Feasibility Study for On-Site and Off-Site groundwater.

Completed Area Name: PROJECT WIDE
Completed Document Type: Remedial Action Plan
Completed Date: 06/19/1997
Comments: RAP/SOIL -- Approval of final soil Remedial Action Plan. Plans are included for constructing a cap and for operating a soil vapor extraction system.

Completed Area Name: PROJECT WIDE
Completed Document Type: Removal Action Completion Report
Completed Date: 01/18/1995
Comments: On-Site Groundwater Report.

Completed Area Name: PROJECT WIDE
Completed Document Type: *Engineering Evaluation / Cost Analysis - Non-Time Critical
Completed Date: 02/14/1994
Comments: FRI/FS (SOIL) -- Focused soil investigation completed. The cost of this FRI/FS was paid for by the responsible party.

Completed Area Name: PROJECT WIDE
Completed Document Type: Design/Implementation Workplan
Completed Date: 08/19/1993
Comments: Revised "GROUNDWATER REMEDIATION SYSTEM WORK PLAN" DATED JUNE 3, 1993 Reviewed and approved by DTSC.

Completed Area Name: PROJECT WIDE
Completed Document Type: Record of Decision
Completed Date: 06/28/1991
Comments: Record of Decision signed by U.S. EPA.

Background Info: Industrial operations began at this site in 1931 when Sunland sulfur Company began processing sulfur for agricultural uses. FMC bought the Sunland facility in 1959 and began manufacturing liquid pesticides. During 1992, the production and storage of pesticides at the site ceased.
The FMC-Fresno site was used primarily as an agricultural chemical formulation plant. Wash and rinsewater, produced during chemical formulation and support operations, along with storm water runoff were discharged to surface impoundments, a vacant five-acre field and dry wells at the site. Also, rinsewater from a drum washing operation was sprayed onto an evaporation pad. During the 1970's, a claylined waste pond was constructed for wastewater disposal. The discharge of wastewater into this pond ceased during 1983.
Onsite soils and groundwater beneath the site have been contaminated with a variety of agricultural chemicals. Agricultural chemicals identified have included organochlorine pesticides such

as DDT and toxaphene, chlorinated herbicides such as dinoseb, DBCP and 1,2-dichloropropane. During the early 1980's, soil and groundwater assessment work was performed under the auspices of both DTSC and the RWQCB. In 1984, the site was proposed for the NPL. In 1985, DTSC turned over the regulatory lead for the site to U.S. EPA. In December 1986, U.S. EPA and FMC signed a consent order, a legally binding agreement, requiring FMC to perform a Remedial Investigation/Feasibility Study for the site. In 1989, the site was dropped from the proposed NPL as part of a RCRA ruling. A Record of Decision (ROD) was signed by U.S. EPA in 1991. U.S. EPA transferred regulatory lead oversight to DTSC in September 1991. FMC completed the RI/FS as outlined in a 1986 Consent Order with EPA. The RI/FS evaluated various cleanup alternatives and technologies for effectiveness. The cleanup alternatives were presented for public review in May 1991.

Since 1993, activities have included the following: 1) additional onsite soil assessment work; 2) onsite and off-site groundwater characterization and assessment work; 3) construction and operation of a groundwater extraction system; 4) soil washing and soil stabilization technology evaluations; and, 5) regular sampling of onsite and offsite groundwater monitoring and supply wells.

The on-site groundwater pump and treat system has been operational since early 1995. Groundwater is pumped at a flow rate of about 150 gallons per minute and treated water is injected into the underlying groundwater.

In 1997 s soil Remedial Action Plan was finalized. During 1998 an engineered cap was constructed over affected soil and soil vapor extraction system operations commenced. Soil Vapor Extraction operations are expected to last for about 120 months.

HWP:

EPA ID: CAD000629998
Name: FMC CORP
Address: 2501 S SUNLAND AVE
Cleanup Status: UNDERGOING CLOSURE
Latitude: 36.71062
Longitude: -119.7688
Facility Type: Historical - Non-Operating
Senate District: 14
Assembly District: 31
Quarterly Update: 06/13/2018 - Facility had variance status initially and then had consent agreement in 01-21-1987 to conduct a RI/FS. The facility submitted a closure plan back in 1987 and appears to still be undergoing closure activities. Cleanup PM, Thomas Berg, confirmed that the four interim status units for this facility are not technically closed due to unresolved closure issues between Cleanup staff and Permitting. However, it is anticipated that the Post-Closure permit rule will eventually allow Cleanup to close these units.
Permit Type: RCRA
Calenviroscreen Score: 96-100% (highest scores)

Activities:

EPA ID: CAD000629998

<p>Site Code: Senate District: Assembly District: Quarterly Update:</p> <p>Project Manager Lead: Permit Type: Permit Effective Date: Permit Expiration Date: Calenviroscreen Score:</p> <p>Activities:</p> <p>EPA ID: Facility Type: Facility Name: Project Manager Lead: Supervisor: Facility Status: Activity Type: Final Date: Type: Title Description: Unit Names: Event Description:</p> <p>Actual Date:</p> <p>EPA ID: Facility Type: Facility Name:</p>	<p>10027, 100271 14 31 QUARTERLY UPDATE Quarterly Update Period: July 1 2020 to September 30 2020 Safety Kleen is currently closing the hazardous waste operations at this facility. A Closure Certification was submitted to DTSC on 12/31/2018 along with a plan for further sampling to determine the extent of contamination. The additional plans were rejected with comments on July 17, 2019. A revised plan was submitted within a Class 1* Permit Modification on August 7, 2019. DTSC reviewed the modifications and approved the sampling plan on September 11, 2019. Additional field work was completed in October and December of 2019, including additional indoor air sampling in December 2019. The results of the October 2019 soil vapor monitoring were submitted in December 2019. The December 2019 soil vapor monitoring data was submitted April 15, 2020, along with certification of closure for the facility. DTSC has rejected the certification and is requiring a plan for additional closure activities by October 2020. Closure Activity: Facility completed decontamination October 5th 2017. Wipe, rinsate, air, and soil samples were taken to confirm decontamination. DTSC accepted a Class 1* Permit modification to extend the closure period from January 2018 to December 2018 to include a soil gas sampling plan in their Closure Plan. Facility submitted an updated schedule and sampling plan for DTSC review in February 2018. DTSC approved a final Closure work plan in June 2018. The closure activities including the removal of the underground storage tank and collection of soil samples were completed the week of October 22, 2018. Soil vapor monitors were installed and samples taken in the week of December 3, 2018. A Closure Certification Report was submitted to DTSC on December 31, 2018 and is currently under DTSC review. Class 1* modification request submitted by facility for SGV workplan in progress. Permit Activity: The facility permit expired on 7/23/17. A class 1* permit modification was completed to change their expected closure date from 2050 to 2017. Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Name: DOW BRANDS FACILITY (ON-SITE)
Address: 4787 EAST DATE AVE
City,State,Zip: FRESNO, CA 93725-2102
Region: STATE
Facility Status: Completed - Case Closed
Status Date: 04/13/2011
Global Id: SL185914262
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5F)
Latitude: 36.7014
Longitude: -119.7376
Case Type: Cleanup Program Site
Case Worker: JYH
RB Case Number: SL185914262
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: The Site is located at 4787 East Date Avenue in Fresno on approximately 25 acres. The Site was initially developed as polyethylene film plant by the Dobeckman Division of Extruders in March of 1960. TDCC acquired Dobeckman and began operations of the facility in 1963. From 1963 through 1997, the DowBrands division of TDCC used the facility for the production of plastic film and plastic bags. S.C. Johnson and Sons, Inc (SCJ). purchased the facility in January of 1998. Assessments conducted by SCJ in 1998 and 1999 indicated the presence of chlorinated volatile organic compounds (VOCs), specifically PCE, in soil and shallow groundwater beneath the Site in the area of an old transformer and under the main manufacturing building. SCJ subsequently installed 13 groundwater monitoring wells at the Site. They installed and operated a soil vapor extraction system from 2000 to 2002 to remove VOCs in soil and groundwater within the onsite source area. Approximately 16 pounds of VOCs were recovered. Soil excavation and disposal, 42 cubic yards, in the area of the transformer was began on August 28,2000 and completed on August 31, 2000. Since 2000 an offsite groundwater investigation

Name: DOW BRANDS FACILITY II (OFF-SITE)
Address: 4787 EAST DATE AVE
City,State,Zip: FRESNO, CA 93725-2102
Region: STATE
Facility Status: Open - Site Assessment
Status Date: 04/13/2011
Global Id: SL186294264
Lead Agency: CENTRAL VALLEY RWQCB (REGION 5F)
Latitude: 36.7014
Longitude: -119.7376
Case Type: Cleanup Program Site
Case Worker: JYH
RB Case Number: SL186294264
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply
Potential Contaminants of Concern: Tetrachloroethylene (PCE), Trichloroethylene (TCE)
Site History: This project only addresses off-site VOC plume. The on-site issues are addressed by Geotracker Case Number SL185914262. ONSITE HISTORY FOR BACKGROUND - The Site is located at 4787 East Date Avenue in Fresno on approximately 25 acres. The Site was initially developed as polyethylene film plant by the Dobeckman Division of Extruders in March of 1960. TDCC acquired Dobeckman and began operations of the facility in 1963. From 1963 through 1997, the DowBrands division of TDCC used the facility for the production of plastic film and plastic bags. S.C. Johnson and Sons, Inc. (SCJ) purchased the facility in January of 1998. Assessments conducted by SCJ in 1998 and 1999 indicated the presence of chlorinated volatile organic compounds (VOCs), specifically PCE, in soil and shallow groundwater beneath the Site in the area of an old transformer and under the main manufacturing building. SCJ subsequently installed 13 groundwater monitoring wells at the Site. They installed and operated a soil vapor extraction system from 2000 to 2002 to remove VOCs in soil and groundwater within the onsite source area. Approximately 16 pounds of VOCs were recovered. Soil excavation and disposal, 42 cubic yards, in the area of the transformer was began on August 28,2000 and completed on August 31, 2000. OFF SITE HISTORY - Since 2000 an offsite groundwater investigation has been conducted at the Site to determine the lateral and vertical extend of the plume. Given the mobile nature of the VOC plume, an exact site acreage is hard to determine. From 2000 to 2004 a series of groundwater monitoring wells and clusters of groundwater monitoring wells have been installed. Currently the plume extends laterally to Jensen Avenue and a vertically to 225 feet below grade.

City: FRESNO
Facility ID: 5F 10I013818
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board
Subregion: 0
Facility Telephone: 5594887612
Facility Contact: JOHN KANE
Agency Name: SC JOHNSON & SON INC
Agency Address: 1525 Howe St
Agency City,St,Zip: Racine 534032236
Agency Contact: THOMAS T STOCKDALE
Agency Telephone: 4142603812
Agency Type: Private
SIC Code: 0
Design Flow: 0
Baseline Flow: 0
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Local Case Number: FA0269541
Potential Media Affect: Under Investigation
Potential Contaminants of Concern: Diesel
Site History: The case was opened following an unauthorized release from an underground storage tank system at the subject site. Corrective action is underway as directed by the CVRWQCB. Corrective action may consist of preliminary site investigation, planning and implementation of remedial action, verification monitoring, or a combination thereof. A summary of the site history is available by clicking on either the "Cleanup Status History", "Regulatory Activities" or the "Site Maps/Documents" tab. For a complete site history the case file at the CVRWQCB should be consulted.

Completed Date: 08/24/2006

Completed Area Name: PROJECT WIDE
Completed Document Type: Technical Workplan
Completed Date: 09/27/2006
Comments: "Workplan for Off-Site Soil Sampling" dated August 28, 2006 approved in DTSC correspondence dated 9/27/2006.

Completed Area Name: PROJECT WIDE
Completed Document Type: Fieldwork
Completed Date: 10/12/2006
Comments: Off-Site soil samples collected from off-site locations during the week of October 10, 2006.

Completed Area Name: PROJECT WIDE
Completed Document Type: Other Report
Completed Date: 03/12/2007
Comments: PG&E's "Off-Site Soil Sampling Results" submittal approved in DTSC correspondence dated 3/22/2007. Review of the report by DTSC staff shows that there is no significant amount of PCB contamination on offsite property due to migration from the PG&E site. DTSC correspondence also includes comments on pending deed restriction that is to be finalized by the RWQCB.

Completed Info:

Completed Area Name: PROJECT WIDE
Completed Document Type: Site Screening
Completed Date: 04/29/1996
Comments: Site Screening completed. Chateau Fresno Landfill (CFL) is a Class III solid waste landfill. Volatile Organic Compounds (VOCs) and metals have been detected in groundwater samples. A June 13, 1991, Screening Site Inspection (SSI) did not disclose the results of the VOCs detected, but metals, including aluminum, arsenic, chromium, copper, lead and zinc were detected up to 158 ppb. A June 1988 spill of 5,400 gallons of diesel fuel was reported to Regional Quality Control Board (RWQCB). Fresno County Department of Health Services and RWQCB coordinated a cleanup of the spill. There are six on-site monitoring wells and RWQCB oversees monitoring of groundwater. Refer to RWQCB.

Completed Area Name: PROJECT WIDE
Completed Document Type: Site Screening
Completed Date: 09/25/1989
Comments: Site Screening Done: EPA completed Preliminary Assessment and recommends Screening Site Inspection. Site is located eight miles southwest of Fresno.

CA BOND EXP. PLAN:
Responsible Party:
Project Revenue Source Desc:

NPL SITE CLEANUP WORKPLAN

This site has been proposed to be removed from the list of sites proposed for the NPL. In the event that FMC fails to complete or make satisfactory progress on the project it would be proposed again for listing on the NPL and federal funds could be utilized to complete the project. This would require the expenditure of State matching funds for the selected remedial action. Currently, the RP is expected to complete remediation activities. The Department has budgeted \$100,000 of State Bond funds for oversight. If Bond funds are expended, the Department will undertake appropriate cost recovery actions.

Site Description:

FMC is an agricultural chemical formulation plant. Wash and rinse water produced during chemical formulation and support operations along with storm water runoff have, in the past, been discharged to surface impoundments, an open field and dry wells at the site. These discharges have resulted in the contamination of several areas onsite.

Hazardous Waste Desc:

Onsite soils and ground water beneath the site have been contaminated with a wide variety of agricultural chemicals, including DDT, endrin, toxaphene, dieldrin and ethion.

Threat To Public Health & Env:

Ground water beneath the site is contaminated and presents a potential threat to drinking water supplies. The site is fenced and posted, and access is controlled.

Site Activity Status:

FMC has undertaken a major RI/FS for the entire facility. Included in this project are a RCRA pond closure and CERCLA remediation. FMC is currently conducting the remedial investigation field work. EPA has negotiated a RI/FS consent order with FMC.

Count: 3 records.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

PENNY NEWMAN GRAIN COMPANY
2989 SOUTH GOLDEN STATE BOULEVARD
FRESNO, CA 93725

TARGET PROPERTY COORDINATES

Latitude (North):	36.697305 - 36° 41' 50.30"
Longitude (West):	119.753843 - 119° 45' 13.83"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	253972.8
UTM Y (Meters):	4064626.8
Elevation:	291 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5603172 FRESNO SOUTH, CA
Version Date:	2012
East Map:	5603192 MALAGA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

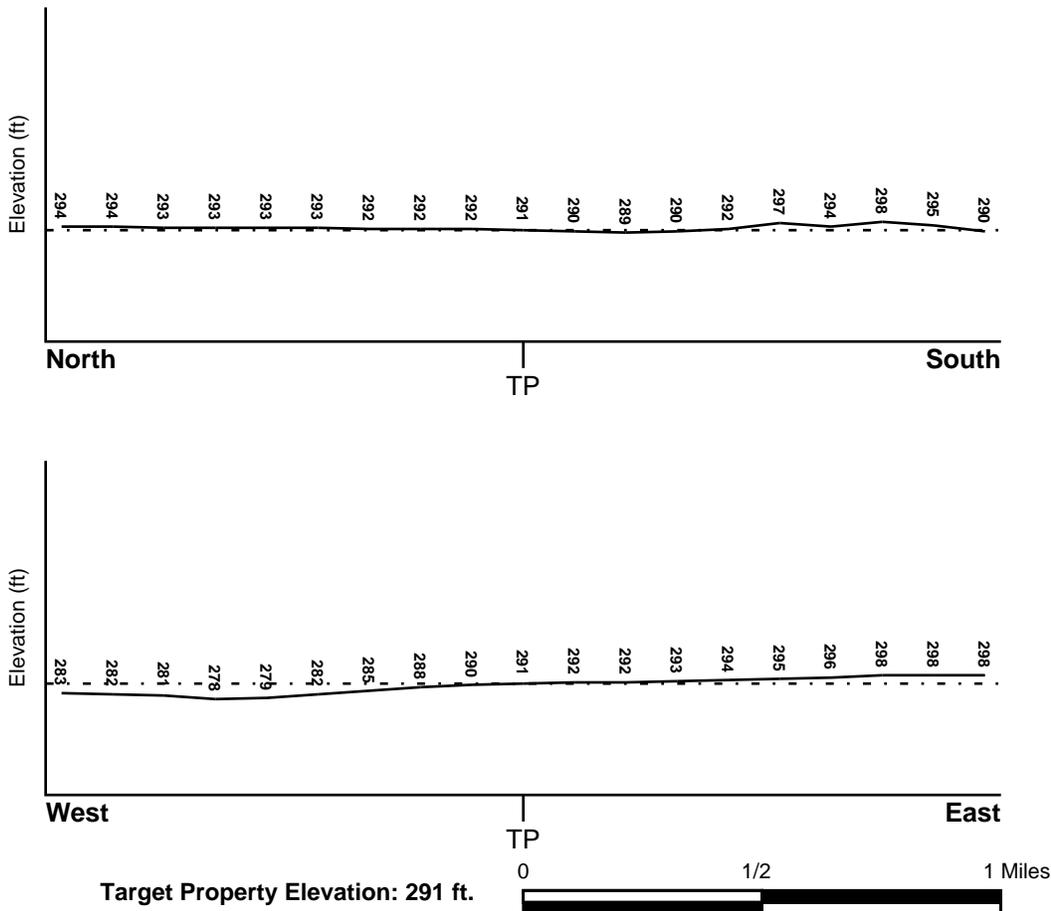

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
FRESNO SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: HESPERIA

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	11 inches	31 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	31 inches	42 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Resume

Laura Hedman

Staff Geologist

PROFESSIONAL EXPERIENCE

Ms. Hedman is a staff geologist in Terracon's Colton, CA office, Environmental Department. Ms. Hedman's professional experience includes Environmental Services, Phase I Environmental Site Assessments (ESAs), Limited Site Investigations (LSIs), soil and groundwater sampling, and groundwater monitoring projects. She has conducted site assessments on office facilities, warehouses, manufacturing facilities, automotive dealerships, restaurants, medical offices, telecommunication towers, vacant, and agricultural land. She prepares environmental site assessment reports; researches city directories and regulatory agency files; and reviews aerial photographs and topographic maps. In addition, she assists the Senior Project Manager in Phase I Environmental Site Assessments.

PROJECT EXPERIENCE

Office Buildings/Medical Office Building – California

Project Manager and Environmental Site Assessments on office properties, which includes multi-story financial, educational, medical office buildings, and a 95,000-square-foot community hospital.

Warehouse Buildings/Logistical Centers – California

Project Manager and Environmental Site Assessment on warehouses and logistical centers, which includes commercial facilities with 1.2 million-square-foot warehousing space.

Restaurants/Retail Buildings – California

Project Manager and Environmental Site Assessment on family-style restaurants, and retail lease spaces.

Auto Dealership/Automotive Service– California

Project Manager and Environmental Site Assessment on automotive dealerships, automotive maintenance facilities, and automotive collision repair centers.

Undeveloped/Vacant/Agricultural – California

Project Manager and Environmental Site Assessments on undeveloped, vacant, and agricultural land; from less than one-acre- to over 200-acre parcel of land.

EDUCATION

Bachelor of Science, Geology/Earth Science, University of California, Riverside, 2016

Mount San Jacinto College
Associate of Science, Geographic Information Systems (GIS), May 2014

CERTIFICATIONS

Geologist in Training (Fundamental of Geology), June 2017

PROFESSIONAL TRAINING

40-Hour OSHA HAZWOPER

24-Hour AHERA Asbestos Abatement Building Inspector

40-Hour AHERA Asbestos Supervisor Training

WORK HISTORY

Terracon, Colton, California
Staff Geologist
January 2018 to Present

United States Army, Master Sergeant, Retired;
Recruiting Battalion Operations Senior NonCommissioned Officer/
Senior Career Counselor
August 1988 to February 2011

APPENDIX F
DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	Description
ACM	<p>Asbestos Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining).</p> <p>Regulatory agencies have generally defined ACM as a material containing greater than one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable.</p> <p>Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.</p>
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally Exempt Small Quantity Generators
CFR	Code of Federal Regulations

Description of Selected General Terms and Acronyms

Term/Acronym	Description
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.”
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a “solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed.”
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.”

Description of Selected General Terms and Acronyms

Term/Acronym	Description
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large Quantity Generators
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	picoCuries per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in picoCuries per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave'). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TS Ds	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TS Ds	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. De minimis conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in clean up activities or is actively pursuing potentially responsible parties for clean up. Sometimes referred to as a State "CERCLIS" List.
SQG	Small Quantity Generator
SWF/LF	State and/or Tribal database of Solid Waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

Description of Selected General Terms and Acronyms

Term/Acronym	Description
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C.2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
	Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The <u>Corps of Engineers Wetlands Delineation Manual</u> (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present.
Wetlands	The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.
