

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Avenues Septic to Sewer Project

Lead Agency: Elsinore Valley Municipal Water District

Contact Name: Jason Dafforn

Email: jdafforn@evmwd.net Phone Number: 951-674-3146

Project Location: Wildomar, Riverside County
City County

Project Description (Proposed actions, location, and/or consequences).

The Project would convert 243 existing single-family residential septic customers to sewer, which involves installing about 16,190 linear feet of sewer pipelines. The new sewer lines would connect to one of two existing sewer mains underneath East Lakeshore Drive. The Project is anticipated to generate 62,500 gallons per day of wastewater, which would be transported to the EVMWD Regional Water Reclamation Facility. Existing septic tanks serving the residents would be abandoned per Riverside County Health Department requirements.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The proposed project would result in potential impacts in the following issue areas: biological resources (adverse impact to special status species, sensitive habitat, and riparian habitat); cultural resources (adverse change in the significance of historic and archaeological resources); geology and soils (potential geologic hazards and adverse impacts to paleontological resources); land use and planning (conflicts with policies adopted for the purpose of avoiding an environmental effect); and tribal cultural resources (change in significance of a tribal cultural resource).

Based on the IS/MND prepared for the project, it has been determined that the project will not have a significant effect on the environment that cannot be mitigated to a level of insignificance with the incorporation of mitigation measures.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known areas of controversy for the proposed project.

Provide a list of the responsible or trustee agencies for the project.
