You don't often get email from anicholson@srcity.org. [Learn why this is important](#)

Good morning Brian,

Thank you for your comments on the City of Santa Rosa General Plan 2050 Draft EIR. We will forward your comments to the Planning Commission for consideration at their meeting on November 14, 2024, when they will be conducting a Public Hearing and considering the adequacy of the Draft EIR. The meeting will be held at 4:30 pm in the City of Santa Rosa Council Chambers, at 100 Santa Rosa Avenue.

Following the close of the 45-day public review period, which extends from October 7, 2024, to November 20, 2024, all comments on the Draft EIR will be compiled, and the City's Consultant will prepare responses to the comments received. The Responses to Comments document and the Draft EIR, together constitute the Final EIR for the project.

Once these documents are complete, we will submit them to the Planning Commission for its review and recommendations to the City Council regarding certification of the EIR and approval of the project. The Council is expected to take action in the first quarter of 2025.

We appreciate your interest in the project and will ensure your email is included on the project mailing list for receiving notification regarding future meetings.

Thank you,
Amy

Document Title

Santa Rosa General Plan 2050

Document Type

DEIR - Draft EIR

Received

10/21/2024

Amy—

Thank you for providing the City’s Draft EIR for the 2050 Santa Rosa General Plan for our review. This email conveys the following recommendations from CGS concerning geologic issues within the General Plan document:

1. Fault Hazards

- The DEIR provides a discussion of earthquake surface fault rupture and CGS’ Alquist-Priolo Earthquake Fault Zones (APEFZ) in the region, including a map depicting the locations of APEFZ within the City limits (Figure 4.7-1). However, CGS notes the surfaces traces of the Rodgers Creek Fault Zone and related APEFZ were recently revised in February 2024. The City should update their figure with these new fault traces and zones.
- Current CGS APEFZ maps and GIS data are available here:
 - Alquist-Priolo Fault Zones - <https://cadoc.maps.arcgis.com/home/item.html?id=29d2f0e222924896833b69ff1b6d2ca3>
 - Fault Traces - <https://cadoc.maps.arcgis.com/home/item.html?id=15b355c071ab4ef78831daef25490a70>
 - EQZ App - <https://maps.conservation.ca.gov/cgs/informationwarehouse/index.html?map=regulatorymaps>
