

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

Project Title: Pedley Spreading Grounds Pond Enhancements

Lead Agency: City of Pomona

Contact Name: Jorge Anaya

Email: jorge.anaya@pomonaca.gov

Phone Number: (909) 772-4240

Project Location: Claremont

City

Los Angeles

County

Project Description (Proposed actions, location, and/or consequences).

The three existing basins receive flows from the adjacent (to the north) neighborhood through 42-inch and 18-inch storm drains, as well as process water from the adjacent Pedley Filtration Plant (PFP). The proposed project is a collaborative effort between the Cities of Pomona and Claremont to capture, treat, and infiltrate local urban runoff into the existing PSG to increase water supply through stormwater recharge and to decrease non-point source pollutants. The project includes: grading of the existing PSG basins to enhance percolation; modifications to an existing stormwater junction diversion structure; construction of a new control vault to improve stormwater conveyance to the basins; new water quality pretreatment structure; inlet storm drain extensions; energy dissipater and riprap pads; stilling basin and equalizer structures; spillways, access ramps and roadway improvements; and PFP outlet interconnect piping and controls. Additionally, the project includes implementation of improvements (pathway, plantings, educational signage, viewing area with benches, and a bike rack) at the Chaparral Park north of PSG.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Initial Study describes potentially significant impacts of the proposed project on biological resources, cultural resources, geology and soils, water quality, noise, transportation, Tribal cultural resources, and utilities and service systems. Mitigation measures have been defined to reduce impacts to less than significant levels. Other effects found to be less than significant are also described in the Initial Study. Mitigation measures focus on protection of nesting birds, impacts to riparian vegetation (mulefat), protection measures in the event of unanticipated discovery of cultural resources, preparation of noise and traffic mitigation plans, and control of water quality during construction.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

None known

Provide a list of the responsible or trustee agencies for the project.
