### **Initial Study/ Mitigated Negative Declaration**

**For the**

### **Cosumnes River College – Beach Volleyball Facilities Project**

**February 2023**

---

**PUBLIC REVIEW DRAFT**

**INITIAL STUDY/ PROPOSED MITIGATED NEGATIVE DECLARATION**

**FOR THE**

**Cosumnes River College – Beach Volleyball  
Facilities Project**

Prepared by  
Los Rios Community College District  
3753 Bradview Drive  
Sacramento, CA 95825  
February 2023

**NOTICE OF AVAILABILITY AND NOTICE TO OF INTENT  
TO ADOPT A MITIGATED NEGATIVE DECLARATION FOR THE  
LOS RIOS COMMUNITY COLLEGE DISTRICT  
COSUMNES RIVER COLLEGE – BEACH VOLLEYBALL FACILITIES PROJECT**

The Los Rios Community College District (District) has prepared an Initial Study pursuant to California Environmental Quality Act (CEQA) and the CEQA Guidelines (Public Resources Code, Division 13 and California Code of Regulations, Title 14, Chapter 3) evaluating the potential environmental impacts of the Cosumnes River College – Beach Volleyball Facilities Project. The District proposes to adopt a Mitigated Negative Declaration ("MND") because the Project construction and operation would not have a significant effect on the environment. This MND and the Initial Study describe the reasons that this project will not have a significant effect on the environment and, therefore, does not require the preparation of an environmental impact report under CEQA.

**PROJECT TITLE: COSUMNES RIVER COLLEGE – BEACH VOLLEYBALL FACILITIES PROJECT**

**PROJECT LOCATION:** The Project is located within an approximately 66,000 square foot boundary within the greater Cosumnes River College Campus (CRC), in Sacramento City, Sacramento County, approximately 0.5 mile west of Highway 99. The Cosumnes River College is located in a primarily suburban area, near the southern border of the City of Sacramento and the northern border of the City of Elk Grove. The Cosumnes River College address is 8401 Center Parkway, Sacramento, California, and consists of 145.92 acres of land (APN: 117-0140-044). The City of Sacramento General Plan designates the Campus as "Public/Quasi Public". A regional and project location map are included as Figures 1 and 2, respectively.

**PROJECT DESCRIPTION:** The Los Rios Community School District is proposing to construct six (6) beach volleyball courts located in recreational part of the Cosumnes River College campus, in the City of Sacramento, Sacramento County, California. The proposed Beach Volleyball Facilities Project consists of the construction of six (6) beach volleyball courts. Each court would be constructed with sand up to 18 inches in depth with individual drainage systems consisting of 6-in diameter perforated drainpipe, angular drain rock, and geotextile non-woven fabric. Other proposed plans include installation of chain link fencing around the perimeter of the beach volleyball court facilities, the removal of 12 trees, sport lighting, concrete hardscape, additional landscaping, an official's tent, referee stands, and a lockable electrical pedestal for a portable PA system. Power to new court lighting would be drawn from the existing mechanical room at the adjacent pool building.

The existing parking lots are adequately sized to facilitate events at the proposed facility, with anticipated vehicle loading between 20 to 40 vehicles for college level events and 40 to 100 vehicles anticipated for a community event. Circulation for traffic and pedestrians is considered adequate for the proposed project, therefore, no changes for the existing parking lot and/or traffic circulation layout are planned. In the event that a beach volleyball and pool facilities are utilized simultaneously, it is anticipated parking lots (adjacent north and south of proposed courts) would have adequate space to accommodate both. Anticipated entry to the proposed Project for construction and facility access will be from Bruceville Road, with secondary access from Calvine Road.

**PUBLIC REVIEW PERIOD:** As mandated by State law, the minimum public review period for this document is 30 days. The proposed Mitigated Negative Declaration will be circulated for a 30-day public review period, beginning on **Wednesday, March 1, 2023**, and ending on **Friday, March 31, 2023**. Copies of the Draft Negative Declaration are available for review at the following locations:

Los Rios Community College District  
3753 Bradview Drive  
Sacramento, CA 95827

Any person wishing to comment on the Initial Study and proposed Negative Declaration must submit such comments in writing **no later than 5:00 pm on Friday, March 31, 2023**, to the following address:

Tonya R. Scheftner  
Petalogix Engineering, Inc.  
26675 Bruella Road  
Galt, CA 95632

**A public hearing to receive comments will be held at Los Rios Community College District. This meeting is tentatively scheduled for Monday, March 27, 2023, at 10:00 a.m. at 3753 Bradview Drive, Sacramento.**

## **1. PROJECT TITLE**

Cosumnes River College – Beach Volleyball Facilities Project

## **2. LEAD AGENCY NAME AND ADDRESS**

Los Rios Community College District  
3753 Bradview Drive  
Sacramento, CA 95827

## **3. CONTACT PERSONS**

Reza Mirmiran: 916-856-3428

## **4. PROJECT LOCATION**

The Project is located within an approximately 66,000 square foot boundary within the greater Cosumnes River College Campus (CRC), in Sacramento City, Sacramento County, approximately 0.5 mile west of Highway 99. The Cosumnes River College is located in a primarily suburban area, near the southern border of the City of Sacramento and the northern border of the City of Elk Grove. The Cosumnes River College address is 8401 Center Parkway, Sacramento, California, and consists of 145.92 acres of land (APN: 117-0140-044). The City of Sacramento General Plan designates the Campus as “Public/Quasi Public”. A regional and project location map are included as Figures 1 and 2, respectively.

## **5. PROJECT SPONSOR'S NAME AND ADDRESS**

Los Rios Community College District  
3753 Bradview Drive  
Sacramento, CA 95827

## **6. PROJECT DESCRIPTION**

The Los Rios Community School District is proposing to construct six (6) beach volleyball courts located in recreational part of the Cosumnes River College campus, in the City of Sacramento, Sacramento County, California. The proposed Beach Volleyball Facilities Project consists of the construction of six (6) beach volleyball courts. Each court would be constructed with sand up to 18 inches in depth with individual drainage systems consisting of 6-in diameter perforated drainpipe, angular drain rock, and geotextile non-woven fabric. Other proposed plans include installation of chain link fencing around the perimeter of the beach volleyball court facilities, the removal of 12 trees, sport lighting, concrete hardscape, additional landscaping, an official's tent, referee stands, and a lockable electrical pedestal for a portable PA system. Power to new court lighting would be drawn from the existing mechanical room at the adjacent pool building.

The existing parking lots are adequately sized to facilitate events at the proposed facility, with anticipated vehicle loading between 20 to 40 vehicles for college level events and 40 to 100 vehicles anticipated for a community event. Circulation for traffic and pedestrians is

considered adequate for the proposed project, therefore, no changes for the existing parking lot and/or traffic circulation layout are planned. In the event that a beach volleyball and pool facilities are utilized simultaneously, it is anticipated parking lots (adjacent north and south of proposed courts) would have adequate space to accommodate both. Anticipated entry to the proposed Project for construction and facility access will be from Bruceville Road, with secondary access from Calvine Road.

## 7. SURROUNDING LAND USES AND SETTING

The proposed Project is located in the north-central portion of the Cosumnes River College Campus. To the north of the Campus is Cosumnes River Boulevard, followed by residential homes. To the south is Calvine Road, also followed by residential homes. To the west is Center Parkway, which is followed by residential homes as well. To the east is Bruceville Road, followed by the Sacramento Library, vacant lots, and residential homes. The surrounding area is designated primarily as Suburban, Suburban Corridor, and Parks and Recreation within the Sacramento County General Plan (2035). Suburban neighborhoods make up the majority of use in the surrounding area.

## 8. NECESSARY PUBLIC AGENCY APPROVALS

It is anticipated that the following “typical” permits and compliance may be needed for this Project:

- Los Rios Community College District: Lead agency with responsibility for approving the proposed Beach Volleyball Facilities.
- United States Fish and Wildlife Service – Compliance with the Federal Endangered Species Act: Construction activities would not directly or indirectly adversely affect a federally listed species or its habitat (see Biological Resources section of this document for additional information). Therefore, the proposed project would not be required to obtain Section 7 clearance from the U.S. Fish and Wildlife Service prior to SRF loan commitment.
- State Historic Preservation Office – Compliance with the National Historic Preservation Act: There are no prehistoric or historic archaeological resources, historic properties, or resources of value to local cultural groups within the project area. Therefore, the proposed project would not be required to demonstrate to the satisfaction of the State Historic Preservation Office that the project complies with Section 106 of the National Historic Preservation Act (see Cultural Resources section of this document for additional information).
- Native American Heritage Commission: Compliance with Assembly Bill 52 (AB 52). Lead agencies consult with Native American tribes who have previously contacted the Lead Agency early in the CEQA planning process. Assembly Bill applies to the project, but no tribes have requested notification at this time.
- Sacramento Metropolitan Air Quality Management District (SMAQMD): Air Quality Application for Authority to Construct and/or Permit to Operate.
- City of Sacramento: Preparation of a SWPPP to County of Sacramento (and City of Sacramento) standards. Pollutant Discharge Elimination Permit issued by the County of Sacramento (and City of Sacramento).

## 9. PROJECT CONSTRUCTION

Project construction is expected to begin by July 31, 2023. Completion of the proposed project is expected January 2024. Construction will consist of six (6) beach volleyball courts. Each court would be constructed with sand up to 18 inches in depth with individual drainage systems consisting of 6-in diameter perforated drainpipe, angular drain rock, and geotextile non-woven fabric. Other proposed plans include installation of chain link fencing around the perimeter of the beach volleyball court facilities, the removal of 12 trees, sport lighting, concrete hardscape, additional landscaping, an official's tent, referee stands, and a lockable electrical pedestal for a portable PA system.

Construction activity will first include vegetation clearing and demolition of currently existing concrete flatwork as needed. Based upon site topography, which is relatively flat, grading and some cut and fill is anticipated. Roadways will be swept clean as needed. Water will be applied to any potential dust-generating materials during construction.

The Project has been designed to eliminate environmental impacts by requiring the following measures:

- Air Quality Mitigation and Permitting as needed through SMAQMD.
- Preparation of a Stormwater Pollution Prevention Plan (SWPPP) to County of Sacramento and City of Sacramento standards.
- Pollutant Discharge Elimination Permit (Stormwater/Erosion Control) issued by the County of Sacramento and City of Sacramento.

A Stormwater Pollution Prevention Plan (SWPPP) and an Erosion and Sediment Control Plan will be prepared and implemented to avoid and minimize impacts on water quality during construction and operations. Best management practices (BMPs) for erosion control will be implemented to avoid and minimize impacts on the environment during construction.

Figure 3 - Project Extent Map

**10. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED**

The environmental factors checked below would be potentially affected by this project as indicated by the checklist on the following pages.

Environmental Factors Potentially Affected		
<input type="checkbox"/> Aesthetics	<input type="checkbox"/> Agriculture Resources	<input checked="" type="checkbox"/> Air Quality
<input checked="" type="checkbox"/> Greenhouse Gas Emissions	<input checked="" type="checkbox"/> Biological Resources	<input checked="" type="checkbox"/> Cultural Resources
<input type="checkbox"/> Geology/Soils	<input checked="" type="checkbox"/> Hazards & Hazardous Materials	<input type="checkbox"/> Hydrology/Water Quality
<input type="checkbox"/> Land Use/Planning	<input type="checkbox"/> Mineral Resources	<input checked="" type="checkbox"/> Noise
<input type="checkbox"/> Population/Housing	<input type="checkbox"/> Public Services	<input type="checkbox"/> Recreation
<input type="checkbox"/> Transportation/Traffic	<input type="checkbox"/> Utilities/Services Systems	
<input checked="" type="checkbox"/> None With Mitigation	<input type="checkbox"/> Mandatory Findings of Significance	

**11. ENVIRONMENTAL DETERMINATION**

- I find that the proposed project could not have a significant effect on the environment, and a Negative Declaration will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A Mitigated Negative Declaration will be prepared.
- I find that the proposed project MAY have a significant effect on the environment, and an Environmental Impact Report is required.
- I find that the proposed project MAY have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measure based on the earlier analysis as described on attached sheets. An Environmental Impact Report is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or Negative Declaration pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## 12. ENVIRONMENTAL CHECKLIST

### I. Aesthetics

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Have a substantial adverse effect on a scenic vista?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. In nonurbanized areas, substantially degrade the existing visual character or quality of public views of the site and its surroundings? (Public views are those that are experienced from publicly accessible vantage point). If the project is in an urbanized area, would the project conflict with applicable zoning and other regulations governing scenic quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

- a) **No Impact.** The Sacramento County General Plan does not identify any scenic vistas within the Project area. Therefore, there is no impact.
- b) **No Impact.** No State “designated scenic highways” or “eligible scenic highways” are located within the vicinity of the project site (California Scenic Highway Program). There are no rock outcroppings located on the project site; the project description does not include significant demolition to any existing buildings. This is no impact.
- c) **No Impact.** The Project is located in an urbanized area and is consistent with the designated zoning as “Public/Quasi Public”.
- d) **Less Than Significant Impact.** The proposed beach volleyball facilities will have sports lighting with the appropriate level of outdoor lighting for the convenience and security of the public during any nighttime activities. Nighttime lighting for the campus is currently present on the site. The light and glare associated with the project will remain within the project’s environment; this impact is therefore considered less than significant.

## II. Agricultural Resources

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<p><i>In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Dept. of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the Project:</i></p>				
<p>a. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program in the California Resources Agency, to non-agricultural use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>b. Conflict with existing zoning for agricultural use, or a Williamson Act contract?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>c. Conflict with existing zoning for, or cause rezoning of forest land (as defined in PRC Sec. 4526), or timberland zoned Timberland Production (as defined in PRC Sec. 51104 (g))?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>d. Result in loss of forest land or conversion of forest land to non-forest use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
<p>e. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?</p>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a-e) **No Impact.** According to the California Department of Conservation’s (DOC) Important Farmland Map accessed online, the project site is identified as “Urban and Built-Up Land”. According to the DOC, Urban and Built-Up Land is defined as land occupied by structures with a building density of at least 1 unit to 1.5 acres, or approximately 6 structures to a 10-acre parcel. Examples of land use with this designation include residential, institutional, commercial, and other developed purposes. The project is not in conflict with a zoning for agricultural use or Williamson Act contract, or conflict with existing forest land zoned for Timberland Production. The project will not involve the conversion of Farmland to non-agricultural use or result in the loss of forest land; therefore, the project will have **no impact**.

### III. Air Quality

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Result in a cumulative considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Expose sensitive receptors to substantial pollutant concentrations?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Create objectionable odors affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The proposed Project site is located within the City of Sacramento, in Sacramento County. The project site lies within the Sacramento Valley Air Basin (SVAB) which is within the jurisdictional boundaries of the Sacramento Metropolitan Air Quality Management District (SMAQMD). Air quality is monitored, evaluated, and regulated by federal, state, regional, and local regulating agencies, including the United States Environmental Protection Agency (EPA), the California Air Resources Board (CARB), as well as SMAQMD. The Sacramento Valley’s relatively flat topography and bowl shape is surrounded by elevated terrain, and its meteorological conditions are ideal for trapping air pollution and producing harmful levels of air pollutants, such as ozone and particulate matter. Sacramento County does not attain the following state and federal ambient air quality standards:

- 1-hour state ozone standard
- 8-hour federal and state ozone standards
- 24-hour federal particulate matter PM<sub>2.5</sub>
- 24-hour and annual state particulate matter federal PM<sub>10</sub>

Therefore, for Sacramento County, the criteria pollutants of greatest concern are ozone precursors which include reactive organic gases (ROG) and nitrogen oxides (NO<sub>x</sub>) along with particulate matter PM<sub>2.5</sub> (24 hour) and PM<sub>10</sub> (24 hour and annual state).

#### Standards of Significance

In accordance with Sacramento Metropolitan Air Quality Management District’s Guide to Air Quality Assessments in Sacramento County, December 2009, as revised April 2021, a project is considered to have a significant air quality impact if any of the following quantitative conditions occur:

- Ozone: The project will increase nitrogen oxide (NO<sub>x</sub>) levels above 85 pounds per day for construction phases and/or the project increases either ozone precursors nitrogen oxide (NO<sub>x</sub>) or reactive organic gases (ROG) above 65 pounds per day for operational phases.

- Particulate Matter (PM<sub>2.5</sub>): The project will increase 82 pounds per day and 15 tons per year despite employment of all best available management practices during either construction or operational phases.
- Particulate Matter (PM<sub>10</sub>): The project will increase 80 pounds per day and 14.6 pounds per year despite employment of all best available management practices during either construction or operational phases.

a-c) **Less Than Significant Impact.** The proposed Project site is located within the jurisdictional boundaries of the SMAQMD. According to SMAQMD, the procedure for assessing construction and operation emission impacts must be analyzed using the newer CalEEMod 2016 impact calculator. A CalEEMod analysis was conducted by our firm for the proposed project using the following project characteristics: Junior College Land Use, 3 m/s Wind Speed, 36.6 days Precipitation Frequency, Traffic Analysis Zone (TAZ) 716, Project Construction start July 31, 2023, Operational Year 2024, SMUD Utility Company, and 1.57-acre lot acreage. Where project-specific parameters are unknown, the default values in CalEEMod are used as they provide a conservative estimate of emissions.

## ASSESSMENTS AND FINDINGS

**Long Term Operational Emissions.** Long-term operational impacts to air quality are greatly determined by land uses and vehicle travel associated with these uses. The amount of long-term emissions that generally result from a project such as a school is largely based on the number of new vehicle trips to the school site as a result of the project. In the case of the proposed project, there should be essentially no significant changes in vehicle patterns to the site, with the exception of intermittent increases during the athletic season to accommodate tournaments; no new staff is anticipated.

The proposed project is planned for completion/operation beginning in January 2024. Based on the small size and low impact nature of the operational portion of six (6) beach volleyball facilities, the criteria pollutants (PM<sub>2.5</sub>, PM<sub>10</sub>, Nox, ROG, and CO) were below the reporting limit values for pounds per day and tons per year, at essentially zero, and are therefore of little concern. The operational period emissions for the project (Appendix A) are all below the thresholds of significance and not a concern for the project.

**Short Term, Construction Phase Emissions.** Short-term construction impacts to air include the emissions related to construction workers accessing the site, emissions from construction equipment and grading, and emissions related to the application of architectural coatings. The screening criteria used by the SMAQMD to assess and identify projects which may have less than significant construction impacts include projects that are 35 acres or less in size generally will not exceed the District's construction NOx threshold of significance and which do not:

- Include buildings more than 4 stories tall;
- Include demolition activities;
- Include significant trenching activities;
- Have a construction schedule that is unusually compact, fast paced, or involves more than 2 phases occurring simultaneously;
- Involve cut-and-fill operations; and

- Require import or export of soil materials that will require a considerable amount of haul truck activity.

The proposed project generally meets these screening criteria. Short-term emissions for this project are considered to be related to the construction phase of the project. Of the many emissions generated during this type of construction, however, Ozone, PM<sub>10</sub> and PM<sub>2.5</sub> are considered the pollutants of greatest concern. PM<sub>10</sub> emitted throughout the construction project can vary greatly, contingent on the level of activity, the specific operations, the equipment utilized, and other factors, making quantification difficult. The SMAQMD has adopted a set of Fugitive Dust Rules, collectively called Rule 403 which specifically address fugitive dust generated by construction related activities. The California Emissions Estimator Model (CalEEMod) was used to estimate the projects short term construction emissions. Detailed CalEEMod results are shown in Appendix A, with a summary of short-term operation project emissions presented in the table below:

**Table A-1. Estimated Construction Air Pollutant Emissions.**

Pollutant	SMAQMD Thresholds (tons/year)	SMAQMD Thresholds (lbs/day)	Unmitigated Emissions		Mitigated Emissions	
			(tons/year)	(lbs/day)	(tons/year)	(lbs/day)
NO <sub>x</sub>	—	85	0.27	1.49	0.27	1.49
ROG	—	—	0.03	0.18	0.03	0.18
PM <sub>10</sub>	14.6	80	0.07	0.37	0.07	0.37
PM <sub>2.5</sub>	15	82	0.04	0.21	0.04	0.20

Note: lbs/day reported are average daily max

The primary reason for estimating daily mass emissions for construction is to analyze the project's NO<sub>x</sub> emissions with respect to the District's construction NO<sub>x</sub> mass emissions threshold. As reported above, the unmitigated construction Nox emissions are the same, however, they are well below the SMAQMD Construction Phase Mass Emission Threshold of 85 pounds/day.

A mass emission threshold for ROG during construction is not provided by the SMAQMD Thresholds of Significance Table. SO<sub>2</sub> emissions during the construction phase are below that minimum reporting limit (<0.005 tons/year and <0.005 lbs/day) and are therefore of little concern. A cumulative significant impact for CO does not already exist in this region and CO emissions (0.29 tons/year or 1.58 lbs/day) during construction alone would not result in localized CO concentration above the SMAQMD thresholds. Both the mitigated and unmitigated values are below the thresholds of significance for estimated construction air pollutant emissions and are therefore not significant.

The analysis provided the maximum daily emissions for unmitigated construction, mitigated construction, unmitigated operational, and mitigated operational which reported all values below the SMAQMD thresholds of significance. As discussed below, after **Mitigation Measure Air – 1 and Mitigation Measure Air – 2** is implemented, impacts to air quality will be **less than significant with mitigation**.

## **Air Quality Mitigation 1**

The District shall not begin construction activities until first securing appropriate permits from the Sacramento Metropolitan Air Quality Management District.

**Air Quality Mitigation 2:** The following procedures will be adhered to by the construction contractor(s) in accordance with Air District Rule 403 and Enhanced Fugitive Dust Control Practices:

- Water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads.
- Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered.
- Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited.
- Limit vehicle speeds on unpaved roads to 15 miles per hour (mph).
- All roadways, driveways, sidewalks, parking lots to be paved should be completed as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used.
- Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes [required by California Code of Regulations, Title 13, sections 2449(d)(3) and 2485]. Provide clear signage that posts this requirement for workers at the entrances to the site.
- Maintain all construction equipment in proper working condition according to manufacturer's specifications. The equipment must be checked by a certified mechanic and determined to be running in proper condition prior to operation.

Soil Disturbance Areas:

- Water exposed soil with adequate frequency for continued moist soil. However, do not overwater to the extent that sediment flows off the site.
- Suspend excavation, grading, and/or demolition activity when wind speeds exceed 20 mph.
- Install windbreaks (e.g., plant trees, solid fencing) on windward side(s) of construction areas.
- Plant vegetative ground cover (fast-germinating native grass seed) in disturbed areas as soon as possible. Water appropriately until vegetation is established.
- Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The phone number of the District shall also be visible to ensure compliance.

Based on the highest estimated emissions, evaluated per the SMAQMD Thresholds of Significance; the implementation of **Mitigation Measure Air 1**, which requires appropriate permitting with the SMAQMD prior to construction; and the implementation of **Mitigation Measure Air 2**, which incorporates control of fugitive dust required by District Rule 403, and Enhanced Fugitive Dust Control Practices, the project Construction impacts to air quality will be **less than significant with mitigation**.

- d) **Less Than Significant Impact.** Sensitive receptors in the vicinity include the existing campus where the proposed project is located. Since the proposed project does not exceed any of the threshold criteria established by SMAQMD, it is not anticipated there would be a change in substantial pollutant concentrations.
- e) **No Impact.** The proposed project does not include any activities that would result in objectionable odors. Therefore, this is no impact.

#### IV. Greenhouse Gas Emissions

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Climate change is a global problem. Pollutants with localized air quality effects have generally short atmospheric lifetimes (approximately 1 day), greenhouse gas (GHG) emissions persist in the atmosphere for long enough periods of time (1 year to several thousand years) to be dispersed around the globe. The amount of GHGs required to ultimately result in climate change is not precisely known. What is known is that the amount is enormous, and no single project would measurably contribute to noticeable incremental change in the average global temperature. Thus, from the standpoint of CEQA, GHG impacts to global climate change are inherently cumulative.

Prominent GHGs of primary concern from land use development projects include carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), and nitrous oxide (N<sub>2</sub>O). There are other GHGs, such as chlorofluorocarbons, hydrofluorocarbons, and sulfur hexafluoride, however, these are less of a concern since construction and operational activities associated with land use development projects are not likely to generate these in substantial quantities. To quantify GHG, a standard of “CO<sub>2</sub>-Equivalent” or CO<sub>2</sub>E is used. Carbon dioxide equivalency (CO<sub>2</sub>E) refers to the amount of mixed GHGs that would have the same global warming potential when measured over a specified timescale (generally 100 years).

California has adopted a wide variety of regulations aimed at reducing the State’s greenhouse gas (GHG) emissions. These regulations include, but are not limited, to the following:

- **Assembly Bill (AB) 32.** The California Global Warming Solutions Act of 2006, requires California to reduce statewide GHG emissions to 1990 levels by 2020. AB 32 directs ARB to develop and implement regulations that reduce statewide GHG emissions.
- **Executive Order S-3-05.** This order establishes GHG emission reduction targets for California and directs the CAL-EPA to coordinate oversight efforts. The targets, which were established by Governor Schwarzenegger, call for a reduction of GHG emissions to 2000 levels by 2010; a reduction of GHG emissions to 1990 levels by 2020; and a reduction of GHG emissions to 80% below 1990 levels by 2050.
- **Senate Bill 375.** Senate Bill (SB) 375 was enacted in order to align regional transportation planning efforts, regional GHG reduction targets, and land use and house

allocation. SB 75 requires Metropolitan Planning Organizations (MPOs) to adopt a Sustainable Communities Strategy (SCS) or Alternative Planning Strategy (APS), which will prescribe land use allocation in the MPOs Regional Transportation Plan.

- **Executive Order B-30-15.** This order requires that greenhouse gas emissions in California are reduced by 40 percent below 1990 levels by 2030, and below 1990 levels by 2050.

#### **THRESHOLDS OF SIGNIFICANCE**

For this analysis, SMAQMD's recommended thresholds of significance are as stated:

- A significant impact would result if the proposed project would result in the emission of GHG gases (CO<sub>2</sub>E) in excess of 1,100 metric tons per year for either the construction period or operational phase of the project.

a) **Less Than Significant Impact.** The construction of the CRC Beach Volleyball Facilities project will create short-term, small impacts on GHG emissions from construction trips and equipment. Based on the CalEEMod Air Quality Model results (Appendix A), the proposed project construction GHG emissions will generate approximately 37.6 metric tons per year of CO<sub>2</sub> equivalent. This is below the SMAQMD's threshold of 1,100 metric tons per year. This is considered less than significant.

The long-term operations of the CRC Beach Volleyball Facilities project will create long-term, impacts on GHG emissions. Based on the CalEEMod Air Quality Model results (Appendix A), the proposed project, once operational, will generate approximately 0.11 metric tons per year of CO<sub>2</sub> equivalent. This is below the SMAQMD's threshold of 1,100 metric tons per year. This is considered less than significant.

b) **Less Than Significant Impact.** The proposed project is not anticipated to conflict with any policy or regulation adopted for the purposes of GHG reduction. This is a less than significant impact. The City of Sacramento has adopted Policies Addressing Climate Change (General Plan, 2035); however, it is anticipated that the proposed project would not conflict with these policies. The new expansion building is designed to meet current energy efficiency standards, which will further reduce GHG emissions. No significant conflict with GHG reduction policies is anticipated, therefore, there is a less than significant impact.

**V. Biological Resources**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the proposal:</i>				
a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	■	☐	☐
b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?	☐	☐	☐	■
c. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	☐	☐	☐	■
d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of wildlife nursery sites?	☐	☐	☐	■
e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	☐	☐	■	☐
f. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state habitat conservation plan?	☐	☐	☐	■

Moore Biological Consultants prepared a biological assessment (included in Appendix B) of the proposed project site and how the project could affect the environment within and adjacent to the sites. Their report, *Cosumnes River College Beach Volleyball Facilities Project, Sacramento, California, Biological Assessment* (Moore Biological, 2023) includes biological assessments for potentially regulated Waters of the U.S. and wetlands, Federal and State special-status species, or potentially suitable habitat for species within the project site, in accordance with the Federal Endangered Species Act (FESA), the Clean Water Act (CWA), the Rivers and Harbors Act, the Migratory Bird Species Act (MBTA), the California Endangered Species Act (CESA), the California Environmental Quality Act (CEQA), the Fish and Game Code of California, the Porter-Cologne Water Quality Control Act, and the California Native Plant Protection Act. The results of their assessment are hereby incorporated by reference (Moore Biological Consultants, 2023).

Moore Biological Consultants utilized the California National Diversity Database (CNDDDB) to identify wildlife and plant species that have been previously documented in the project vicinity or that have the potential to occur based on suitable habitat and geographical distribution. They

also conducted a field survey of the proposed project site, which included an assessment of potentially jurisdictional waters of the U.S., special-status species, and suitable habitat for special-status species.

- a) **Less Than Significant Impact with Mitigation Incorporated.** The proposed Beach Volleyball Facility site is manicured lawn with several ornamental trees, bounded by parking lots the north and south; the site is biologically unremarkable. Development of the proposed project will result in the removal of some ornamental trees and shrubs, which from a wildlife habitat perspective is less than significant impact. Due to the lack of suitable habitat, it is unlikely that special-status plants occur in the site (Moore Biological Consultants, 2023). The Project would not significantly modify, either directly or indirectly, habitats of any species identified as candidate, sensitive, or special status. Special-status species are plants and animals that are legally protected under the CESA, FESA, or other regulations.

The Federal Endangered Species Act (FESA) of 1973 (16 U.S.C. 1531-1543) and subsequent amendments provide guidance for the conservation of endangered and threatened species and the ecosystems upon which they depend. Section 7 of FESA requires Federal agencies to ensure that the actions they authorize, fund, or carry out are not likely to jeopardize the continued existence of threatened or endangered species or result in the destruction or adverse modification of critical habitat for these species. Critical habitat is areas mapped by United States Fish and Wildlife Service (USFWS) as being critical to maintain and/or manage in a relatively natural state for the recovery of a listed species. The site is not within designated critical habitat for any federally listed species.

The California Endangered Species Act (CESA) (Fish and Game Code 2050 et seq.) establishes the policy of the State to conserve, protect, restore, and enhance threatened or endangered species and their habitats. CESA mandates that State agencies should not approve projects that would jeopardize the continued existence of threatened or endangered species, if reasonable and prudent alternatives are available that would avoid jeopardy. The CDFW is required to issue a written finding indicating if a project would jeopardize threatened or endangered species and specifying reasonable and prudent alternatives that would avoid jeopardy.

CEQA Guidelines Section 15380 provides that a species not listed under the FESA or CESA may be considered rare or endangered under specific criteria. These criteria have been modeled after the definitions in FESA and CESA.

While the project site may have provided habitat for special-status species at some point in the past, development has substantially modified natural habitats in the greater project vicinity, which includes those within the site. Numerous special-status species have been documented in the Florin topographic quadrangle during a CNDDDB (2023) search; there are extensive records of burrowing owls (*Athene cunicularia*) in the north part of the campus dating back 30 years, with the most recent observation in 2016. There are additional records of other special-status species documented in the CNDDDB within a few miles of the site. Of the wildlife species records within the CNDDDB identified as occurring near the site, Swainson's hawk (*Buteo swainsoni*) and burrowing owl are the only species with potential to occur in or near the project site on more than a transitory basis.

The Swainson's hawk is a migratory hawk listed by the State of California as a Threatened species. The Migratory Bird Treaty Act and fish and Game Code of California protect

Swainson's hawks year-round as well as their nests during nesting season (March 1 through September 15). No Swainson's hawk were observed during the biological site survey, however, there are several trees with dense vegetation near the site that are suitable for nesting by Swainson's hawk. Swainson's hawk could be disturbed by noise if they nested in or near the project site during construction (Moore Biological Consultants, 2023).

Implementation of the following mitigation measure would reduce the above-identified impacts to biological resources to a less-than-significant level.

**Biological Resources Mitigation Measure 1 - Preconstruction Survey For Nesting Swainson's hawks**

A qualified biologist shall conduct a preconstruction survey for nesting Swainson's hawks within 0.25 miles of the project site if construction commences between March 1 and September 15. If active nests are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. This determination should be pursuant to criteria set forth by CDFW (Moore Biological Consultants, 2013).

The Migratory Bird Treaty Act (MBTA) and Fish and Game Code of California (FGCC) protect Swainson's hawk and burrowing owls year-round, as well as their nests during the nesting season (February 1 through August 31). The primary habitat requirement of the burrowing owl is small mammal burrows for nesting. As mentioned above, the CNDDDB (2023) contains records of nesting burrowing owls on the CRC campus dating back 3+ decades, with the most recent record being from 2016. The current state of the population is unknown. No burrowing owls were observed in or adjacent to the site during the early February survey, but this species could move into the site if burrow habitat becomes available.

Implementation of the following mitigation measure would reduce the above-identified impacts to biological resources to a less-than-significant level.

**Biological Resources Mitigation Measure 2 - Preconstruction Survey For Burrowing Owls**

Pre-construction surveys for burrowing owls in the site are recommended if construction commences between February 1 and August 31. If occupied burrows are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. The determination should be pursuant to criteria set fourth cy CDFW (CDFG, 2012)(Moore Biological Consultants, 2023).

**Biological Resources Mitigation Measure 3 - Preconstruction Survey For Nesting Birds**

On-site trees, shrubs, and grasslands may be used by nesting birds protected by the Migratory Bird Treaty Act of 1918 and Fish and Game Code of California. A qualified biologist shall conduct a preconstruction nesting bird survey if vegetation removal and/or project construction occurs between February 1 and August 31. If active nests are found within the survey area, vegetation removal and/or project construction should be delayed until a qualified biologist determines nesting is complete (Moore Biological Consultants, 2023).

- b) **No Impact.** The proposed project will have no adverse impacts on sensitive or regulated habitat because the Project site itself is devoid of native riparian vegetation or other sensitive natural community identified in local or regional plans, policies, regulations, or by the CDFW or USFWS (Moore Biological Consultants, 2013). Therefore, there is no impact.
- c) **No Impact.** There are no potentially jurisdictional Waters of the U.S. or wetlands in the site. The site consists entirely of landscaped areas that are highly disturbed. Specifically, there was no observed permanent or intermittent drainages, vernal pools, seasonal wetlands, marshes, ponds, lakes, or riparian wetlands of any variety within the site (Moore Biological Consultants, 2023). Therefore, there is no impact.
- d) **No Impact.** The project site is not located on or adjacent to a waterway. The proposed project will not interfere substantially with the movement of any other native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites. Therefore, this is no impact.
- e) **Less Than Significant Impact with Mitigation Incorporated.** The proposed project will result in the removal of some ornamental trees and shrubs. This is a **less than significant impact**.

Removal of trees may affect nesting birds protected by the federal Migratory Bird Treaty. In order to reduce any potential impacts to nesting migratory birds to a less than significant level, Biological Resources Mitigation Measure – 1 is required. With Biological Resources Mitigation Measures 1 through 2 incorporated, this is a **less than significant impact**.

- f) **No Impact.** The City of Sacramento does not have an adopted Habitat Conservation Plan (HCP) which covers the Cosumnes River College site. The nearest approved HCP covers North Natomas. The project will therefore have no impact on HCPs or other conservation plans.

**VI. Cultural Resources**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Cause a substantial adverse change in the significance of a historical resource as defined in §15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a substantial adverse change in the significance of an archaeological resource pursuant to §15064.5?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Disturb any human remains, including those interred outside of formal cemeteries.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Solano Archaeological Services (SAS) completed a *Cultural Resources Investigation – Cosumnes River College Beach Volleyball Courts Project* (February 2023) in support of environmental review of the proposed Project under CEQA (included as Appendix C). The investigation included a record search, literature review, historical society consultation, Native American Community Outreach, and a field survey of the entire project area. The report findings are summarized below.

a) **Less than Significant.** According to SAS (2023), a records search conducted through the California Historical Resources Information System archival research and an intensive field survey of the entire project area did not identify any prehistoric-period or historic period resources within or adjacent to the project area. Although prehistoric sites can be found in the general region surrounding the project area, none have been recorded within the half-mile search area. In addition, other than a channelized segments of Beacon creek about 1/4 -mile to the north, no natural drainages are located within or near the project area. The lack of documented early Native American sites in the immediate vicinity, and the absence of natural water sources (potentially attractive locations for early Native American settlement and activities) suggest the project area retains a low level of sensitivity for retaining traces of prehistoric habitation. Concerning historic period resources, historic mapping, aerial photographs, archival research, and the field survey indicate that no developments of any kind have occurred within the project area. Consequently, SAS proposes a low-level sensitivity for the project area to contain potentially significant historic-era sites, features, or artifacts. Therefore, the proposed Project would have no effect on historic properties per Section 106 or historical resources per CEQA Section 15064.5. This is a **less than significant impact**.

b) **Less than Significant with Mitigation Incorporated.** A significant impact would occur if the Project caused a substantial adverse change to an archaeological resource through demolition, construction, conversion, rehabilitation, relocation, or alteration. LRCCD contracted with Solano Archaeological Services (SAS) to perform a pre-construction archeological survey of areas that would sustain ground disturbance for the Project, which occurred on February 2, 2023. The survey was conducted by SAS Archaeologist Karena Skinner, and Mark Pense, which consisted of parallel transects spaced no greater than 10 meters apart in the portions of the Project area. The entire Project area was covered in mown grass with little in the way of ground surface visibility being available for examination. Small areas of bare ground were present at the base of trees within the project area, and to a small extent adjacent to road edges and curbs. No prehistoric or

early historic-era sites, features, or artifacts were noted within the Project area (SAS, 2023). However, archaeological resources may exist within the Project area. In the event that archaeological resources are observed during Project construction-related activities, **Mitigation Measure CR-1** is in place to reduce impacts to a less than significant level. Therefore, the impact on archaeological resources is considered **less than significant** with mitigation incorporated.

#### **Cultural Resources Mitigation Measure 1**

Should buried, unforeseen archaeological deposits be encountered during any Project construction activity, work must cease within a 50-foot radius of the discovery. If a potentially significant discovery is made, it must be treated in accordance with 33 CFR 325, which generally states that the lead federal agency (in this case the U.S. Army Corps of Engineers) must be notified immediately of the find to ensure that mitigation/management recommendations are developed.

- c) **Less than Significant with Mitigation Incorporated.** A significant impact may occur if grading or excavation activities associated with the proposed Project would disturb previously interred human remains. Implementation of **Mitigation Measure CR-2** would ensure that human remains encountered during Project activities are treated in a manner consistent with state law and reduce impacts to human remains to a less than significant level as required by CEQA. This would occur through the respectful coordination with descendant communities to ensure that the traditional and cultural values of said community are incorporated in the decision-making process concerning the disposition of human remains that cannot be avoided. The implementation of these mitigation measures would reduce this potential impact to a less than significant level.

#### **Cultural Resources Mitigation Measure 2**

In the event that human remains or any associated funerary artifacts are discovered during Project construction, all work must cease within the immediate vicinity of the discovery. In accordance with the California Health and Safety Code (Section 7050.5), the Sacramento County Sheriff/Coroner must also be contacted immediately. If the remains are deemed to be Native American, the coroner must notify the NAHC within 24 hours, which will in turn appoint and notify a Most Likely Descendent (MLD) to act as a tribal representative. The MLD will work with a qualified archaeologist to determine the proper treatment of the human remains and associated funerary objects. Construction activities will not resume until the human remains are exhumed and official notice to proceed is issued.

## VII. Energy

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Result in potentially significant environmental impact due to wasteful, inefficient, or unnecessary consumption of energy resources, during project or construction operation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Conflict with or obstruct a state or local plan for renewable energy or energy efficiency?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Setting:

Energy resources in California include electricity from renewable and non-renewable forms, natural gas, and petroleum.

- a) **No Impact.** Energy consumption will not be wasteful, inefficient, or unnecessary. Construction energy consumption is associated with the construction equipment and vehicles. The proposed Project will require construction equipment and vehicles to limit idling time to 5 minutes or less. Therefore, fuel consumption associated with the proposed Project would not result in an inefficient, wasteful, or unnecessary consumption of energy resources during Project construction. This is considered a **less than significant impact**.
- b) **Less than Significant Impact.** The proposed Beach Volleyball Facility will have energy efficient lighting. This is a **less than significant impact**.

**VIII. Geology and Soils**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i. Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. Strong seismic ground shaking?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. Seismic-related ground failure, including liquefaction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. Landslides?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in substantial soil erosion, or the loss of topsoil?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the Project, and potentially result in on-or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Be located on expansive soils, as defined in Table 18-1-13 of the Uniform Building Code (1994), creating substantial risks to life or property?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

**a) Less than Significant Impact.**

- i. **Less than Significant Impact.** The subject site is located in the California Central Valley Area, which is a relatively low to moderate seismically active area. The Project area is not listed within a State designated Alquist-Priolo Earthquake Fault Zone. There are no mapped surface or subsurface faults that traverse the Project area per review of Fault-Rupture Hazard Zones in California, Special Publication 42.
- ii. **Less than Significant Impact.** The project is located outside an Alquist-Priolo Earthquake Fault Zone, and does not incorporate structural components, therefore, ground shaking is considered **less than significant**.

- iii. **Less than Significant Impact.** Liquefaction is a mode of ground failure that results from the generation of excess pore-water pressures during earthquake ground shaking, causing loss of shear strength. This phenomenon generally occurs in areas of high seismicity, where groundwater is shallow and soils are loose and granular. Strong seismic shaking can also cause cyclic softening of saturated relatively non-plastic fine-grained soils. The California Geologic Survey (CGS) has designated certain areas within California as potential liquefaction hazard zones. These are areas considered at risk of liquefaction-related ground failure during a seismic event, based upon mapped surficial deposits and the likely presence of a relatively shallow water table. This site is not mapped within a designated area of potential liquefaction. In addition, the proposed Project does not involve structural components. This is a **less than significant impact**.
- iv). **No Impact.** The Project area is located on geographically level terrain (average grade less than five degrees) considered insufficient to produce a landslide. The Project area is not located within an earthquake-induced landslide zone (defined as “an area where previous occurrence of landslide movement, or local topographic, geological, geotechnical and subsurface water conditions indicate a potential for permanent ground displacement”) per the reviewed Official Maps of Seismic Hazard Zones provided by the State of California Department of Conservation. As a result, no impacts related to landslides are anticipated.
- b) **Less than Significant Impact.** The project is considerably small in surface area and will involve importing sand to cover the proposed Beach Volleyball Facilities; the remaining project area will consist of hardscape and landscape improvements. No substantial soil erosion or loss of topsoil will occur. **This is a less than significant impact.**
- c) **No Impact.** The proposed Project would not result in unstable soil conditions based on the nature of the project (Beach Volleyball Facilities with sand filled to approximately 18 inches). Therefore, the project will have no impact to off-site landslides, lateral spreading, subsidence, liquefaction or collapse.
- d) **No Impact.** No major structures will be constructed as part of the Beach Volleyball Facilities project, therefore no substantial risks to life or property will be associated with expansive soils and structures. This is considered no impact.
- e) **No impact.** The project is located on manicured lawn. No unique paleontological resource or site or unique geologic feature is located within the project boundaries.

**IX. Hazards and Hazardous Materials**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. For a Project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project result in a safety hazard or excessive noise for people residing or working in the Project area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a,b) **Less than Significant Impact with Mitigation Incorporated.** The project does not produce hazardous material. The proposed Beach Volleyball Facilities would not involve the routine use, transport, or disposal of hazardous material(s); however, there is the potential accidental release of hazardous material through possible spills associated with the construction equipment, such as oil and/or hydraulic fluid, during the construction phase of the project. With the implementation of Mitigation Measure Hazards and Hazardous Materials 1, which requires standard spill prevention measures and a procedure for spill response if one does occur, the projects potential to create a significant hazard to the public or the environment involving transport, use, disposal, or accidental

release of hazardous materials, the impact is less than significant with mitigation incorporated.

### **Hazards and Hazardous Materials Mitigation 1**

Spill Prevention and Control Measures will be implemented and include the following:

- Any fuel products, lubricating fluids, grease, or other products and/or waste released from the Contractor(s) vehicles, equipment, or operations, shall be collected and disposed of immediately, and in accordance with State, Federal, and local laws.
- Spill clean-up materials will be stored near potential spill areas (such as vehicle and equipment staging areas).
- Spill kits will include sorbent material (such as pads designed for oil and gas), socks and/or pads to prevent spread of hazardous material, and containers for storing and proper disposal.
- Employees and contractor(s) will be trained on proper hazardous spill clean-up practices.

- c) **Less Than Significant Impact.** Air Emission Facilities —California Department of Education Code Section 17213(b); Public Resources Code Section 21151.8(a)(2); and the California Code of Regulations, Title 5, Section 14011(i) requires a school district, in consultation with the local air pollution control district, to identify facilities within one-quarter mile of the proposed site that might reasonably be anticipated to emit hazardous air emissions or handle hazardous or acutely hazardous materials and substances of waste. The Sacramento Metropolitan Air Quality Management District (SMAQMD) is responsible for providing written notification of any findings to the school district.

A request was submitted to the SMAQMD online public records system requesting the identification and review of all sites potentially emitting hazardous air emissions within one-quarter mile of the proposed project site. Seven locations were identified by Virginia Muller of SMAQMD via email correspondence on received on February 1, 2023. The email identified two emergency standby engines and a fuel dispensing facility at the Cosumnes River College; three emergency standby engines located at 7500 Hospital Drive; one emergency standby engine at 8101 Cosumnes River Boulevard; one emergency standby engine at 7601 Shasta Avenue; one emergency standby engine at 7421 Stockton Boulevard and 7421 Stockton Boulevard; and one gas dispensing fuel facility at 7331 Stockton Boulevard. These are considered **less than significant**.

- d) **Less Than Significant Impact.** The project takes place within the boundary of the Cosumnes River College facility grounds. The project Site is not included in any hazardous materials sites compiled pursuant to Government Code Section 65962.5. In addition, one records requests was submitted with the Sacramento County Environmental Management Department (EMD) on January 25, 2023, as part of a *Phase I Environmental Site Assessment, Beach Volleyball Courts* (Petralogix, 2023) requesting Hazardous Waste/Hazardous Materials information for all parcels located within the boundary of the Cosumnes River College Campus. The Department of Toxic Substances Control ENVIROSTOR website and the State Water Resources Control Board GeoTracker website were additionally reviewed for the site and adjacent parcels, in an attempt to identify hazardous materials that would create a significant hazard to the public or the environment.

The available EMD records reviewed indicate the Cosumnes River College currently qualifies as a small quantity hazardous waste generator, with a valid operating permit, with no current violations on record. There is a Hazardous Materials Business Plan in effect for Cosumnes River College as of 2022, which addresses the site as a Small Hazardous Waste Generator, with three underground storage tanks (USTs) (one 5,000-gallon diesel, one 2,000 gallon unleaded gas and one 500-gallon waste oil), four above ground storage tanks (ASTs) (one 200-gallon muriatic acid, one 200-gallon sodium hypochlorite, one 250-gallon diesel fuel, and one 500-gallon liquid petroleum gas), as well as reports of various gas, such as argon, oxygen, and acetylene gas of unspecified amounts for welding. The records of aboveground and underground storage tanks for the site do not report any significant violations, hazards or potential hazards in connection with the Cosumnes River College and are not located within the project ground disturbance areas. In addition, the hazardous waste records reviewed for the site indicate there are no known hazards located within the footprint of the proposed project area. Therefore, the information reviewed collectively for the parcel within the Cosumnes River College are interpreted to have a less than significant impact. In addition, GeoTracker was reviewed for adjacent parcels. No hazardous materials impact was identified from any surrounding parcels.

### **Pipelines**

According to Pacific Gas & Electric online interactive natural gas transmission pipeline map, no hazardous pipelines have been identified within 1,500 feet of the project site. According to the Kinder Morgan referenced National Pipeline Mapping System, there are no gas transmission pipelines or hazardous liquid pipelines located within 1,500 feet of the project site. The contractor(s) responsible for construction phases of the project will call 811 prior to digging or excavation in order to assure no smaller pipelines that may be within the project site are damaged. There is **no impact** from gas transmission pipelines or hazardous materials pipelines.

### **High Voltage Transmission Lines**

No high voltage transmission lines were observed during the Phase I ESA (Petralogix, 2023) site reconnaissance dated February 2, 2023. There is **no impact** from high voltage transmission lines.

### **Railroad Tracks**

Based on review of Google Earth Maps, the proposed project site is located over 9,000 feet east from the nearest railroad tracks and 10,000 feet west from the next nearest railroad tracks. There is **no impact** to the site from railroad tracks.

### **Asbestos**

Asbestos is a generic term for the naturally occurring fibrous (asbestiform) variety of any of several minerals (crocidolite, tremolite, actinolite, anthophyllite, amosite and chrysotile) which separate into long flexible fibers and occur naturally in ultramafic rock formations. These igneous ultramafic rocks (pyroxenite, peridotite, dunite, and hornblendite) form below the earth's surface at very high temperatures and are exposed by uplift and erosion. During high-pressure processes involving tectonic deformation and burial, they may be altered to the metamorphic rock serpentinite. Chrysotile, the most common asbestos

mineral in California, forms fibrous crystals in small veins in serpentinite rock. According to the California Department of Conservation, Division of Mines and Geology Open File Report 2000-19, the subject property is not located in an area more likely to contain naturally occurring asbestos. Based on this information and given the geological conditions in the site area, the issue of naturally occurring asbestos from rock/soil is not expected to be a concern at the site. This is considered a **less than significant impact**.

Based on historical aerial photographs and topographic maps reviewed during the Phase I ESA (Petralogix, 2023), the project site footprint appears to have been undeveloped to present. In addition, the Cosumnes River College was constructed after the effect ban of most asbestos containing building materials, therefore, exposure to asbestos containing materials located in soil within the project site is considered **less than significant impact**.

### **Radon Potential**

Radon is a gas that is produced by the decay of uranium and radium. This naturally occurring, colorless, odorless, and tasteless gas is produced in most soil or rock. Consequently, all buildings have some radon, as well as the outdoor air. Radon can move with ease through any porous material through which a gas can move. Void spaces and pores are found in the soil underlying any building. Radon is a known carcinogen which the Surgeon General has warned is the second leading cause of lung cancer in the United States.

The National Radon Database has been developed by the United States Environmental Protection Agency and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years of 1986 through 1992.

According to EPA publication 402-R-93-025, titled EPA's Map of Radon Zones, California, dated September 1993, Sacramento County is reportedly in Zone 3. Zone 3 has a predicted average radon screening level of less than 2 pCi/l. This is considered to be the lowest value of geologic radon potential. Therefore, the impact to the site from radon is considered **less than significant**.

- e) **No Impact.** The California Department of Education requires, per Education Code Section 17215, that all airport runways and helipads (public or private) located within two miles of a proposed school site be identified. However, the Education Code pertains to the proposed acquisition or lease of a site and per Section 17215(f), this section does not apply to sites acquired prior to any additions or extensions to those sites.

Based on review of aerial photographs provided by Google Earth, along with the most recent topographic map (Florin, 2018), the nearest runway is the Sacramento Executive Airport, located approximately 5 miles northwest of the project site. The next closest airport is Borges-Clarkburg, located approximately 5.4 miles southwest of the site. Kaiser Permanente South Sacramento Medical Center has one ground level helipad located approximately 1 mile north-northeast of the proposed project extent. The project heights are below the Federal Aviation Administration notification limits, and the finished two-story addition will be of similar height to current buildings on campus. Therefore, this has **no impact** on the site.

- f) **Less Than Significant Impact.** The proposed project is not expected to interfere with road access, adopted emergency response plan or emergency evacuation plans for safety vehicles or personnel. The construction of the Project is not expected to generate excessive traffic for the area but will temporarily increase traffic at the Cosumnes River College Campus with construction traffic anticipated ingress/egress primarily via Bruceville Road with Calvine Road available as secondary access if needed. During construction, if POT items within the scope of the project represented as code compliant are found to be non-conforming beyond reasonable construction tolerances, they shall be brought into compliance. **Less than Significant Impact is expected.**
- g) **No Impact.** The Project is located within a region that consists of residential houses, commercial businesses, and vacant land. The Project will not expose people or structures to a significant risk of loss, injury or death involving wild land fires. Therefore, **no impact** is expected.

## X. Hydrology and Water Quality

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or through the addition of impervious surfaces in a manner which would:	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
i. result in substantial erosion or siltation on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
ii. substantially increase the rate of amount of surface runoff in a manner which would result in flooding on- or off-site;	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iii. create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff; or	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
iv. impede or redirect flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. In flood hazard, tsunami, or seiche zones, risk release of pollutants due to project inundation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

The project site is located within the Sacramento River Basin. The Sacramento River Basin is bounded by the Sierra Nevada to the east, the Cascade Range and Trinity Mountains to the north, the Delta to the southwest. The American River watershed is located on the western slope of the Sierra Nevada, which extends westward to the City of Sacramento. The American, Cosumnes, and Sacramento rivers within the watershed are regulated by penstocks, canals, pipelines, and dams for flood control, power generation, recreation, fisheries, water supply, and wildlife management. The Folsom Dam is located on the American River. The Sacramento, American, and Cosumnes Rivers are the primary surface water tributaries that recharge the Central Valley groundwater basin underlying the City of Sacramento.

The construction will take place on Los Rios Community School District owned land, within the boundaries of the Cosumnes River College, and not within county road ditches or waterways.

Construction impacts will be temporary and best management practices will be in place. The Project is subject to Construction General Permit Order No. 2009-009-DWQ. Construction activity subject to this permit includes clearing, grading, grubbing, and disturbances to the ground, such as excavation. The Construction General Permit requires the development and implementation of a Storm Water Pollution Prevention Plan (SWPPP). As such, the construction activities will include the preparation and implementation of a SWPPP to reduce construction impacts to waterways and sources.

- a) **Less Than Significant Impact.** The State Water Resources Control Board (SWRCB) has adopted a National Pollutant Discharge Elimination System (NPDES) general permit for Storm Discharges Associated with Construction Activity (state permit) which requires every construction project greater than one acre to submit a Notice of Intent (NOI) for coverage, and to prepare a Storm Water Pollution Prevention Plan (SWPPP). The ground disturbance for the project is estimated at approximately 1.0 to 1.5 acres, therefore, the project is subject to the NOI and SWPPP requirement. The project will comply with the terms and conditions of the NPDES, as approved by the State Water Resources Control Board under Section 402 of the Clean Water Act.

Compliance with the terms and conditions of the NPDES, development and implementation of a SWPPP, and compliance with the Regional Water Quality Control Board discharge requirements will ensure a **less than significant impact**.

- b) **No Impact.** The proposed project property connects to the City of Sacramento water utility services. Because the project will comply with the requirements of the City of Sacramento Utilities, impacts to groundwater supplies will be **less than significant**.

- c-d) **Less Than Significant Impact.** The Project is proposed to occur within the developed Cosumnes River College (CRC) campus property. No streams are located near the project site, therefore, there will be no alterations of stream courses. The CRC campus is located on relatively flat topography, with changes in elevation in order of approximately one foot across the site. No substantial erosion and no flooding will occur; the project will not substantially alter the existing drainage pattern of the site or area. Therefore, this is a less than **significant impact**.

**No Impact.** According to the Federal Emergency Management Agency (FEMA) Flood Insurance Map (FIRM) 06067C0308H, the proposed site is located within Flood Zone X – defined as an area determined to be outside the 0.2% annual chance floodplain and therefore of minimal flood hazard. Another zone, designated as “Other Flood Areas” Zone X surrounds the campus site; this zone is defined as areas of 0.2% annual chance flood, with average depths of less than 1 foot or with drainage areas less than 1 square mile, and areas protected by levees from 1% annual chance flood. Therefore, there is **no impact**.

**No Impact.** The Project will not be impacted by inundation by seiche, tsunami, or mudflow, because the project is not adjacent to any body of water that has the potential to experience a seiche or tsunami. The Project site is not in the path of any potential mudflow.

- e) **No Impact.** The project will remove water consuming lawn and replace it with sand and hardscape. Therefore, **no impact**.

**XI. Land Use and Planning**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Physically divide an established community?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Cause a significant environmental impact due to a conflict with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating on environmental effect?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a) **No Impact.** The project would be located within the parcel boundary of the established Cosumnes River College and would not result in the physical division of a community. Therefore, there is **no impact** related to physical division of an established community.

b) **No Impact.** The City of Sacramento’s 2035 General Plan designates the Cosumnes River College (CRC) as “Public/Quasi-Public”. The proposed Beach Volleyball Facility Project is consistent with the current site land use. The Project also does not propose to change any existing zoning. Thus, there is **no impact**.

## Mineral Resources

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the State?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Result in the loss of availability of a locally important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

According to the City of Sacramento 2035 General Plan, ER 5.1.1 Mineral Resource Zones, the City shall protect lands designated MRZ-2, as mapped by the California Geologic Survey.

a,b) **No Impact.** According to the State Aggregate Resource Areas Map, the proposed Project site is not located within an area of primary extractive resources. Therefore, there is **no impact.**

**XII. Noise**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Generation of excessive groundborne vibration or groundborne noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. For a Project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the Project expose people residing or working in the Project area to excessive noise levels?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Noise is defined as unwanted sound. Sound levels are generally measured in decibels (dB) with 0 being the threshold of hearing. Typical examples of noise decibel levels often used would be low decibel level of 50 dB for light traffic to high decibel level of 120 dB for a jet taking off at approximately 200 feet distance (FTA, 2006). There are different methods for assessing noise levels. CNEL refers to Community Noise Equivalent Level which is defined as the 24-hour average noise level, with noise occurring during evening hours (7 to 10 p.m.) weighted by a factor of three and noise occurring during nighttime hours weighted by a factor of 10 prior to averaging. Ldn, or Day Night Average Level, is similar to CNEL except the weighted measure of noise includes a 10 dB penalty added to noise occurring between 10 p.m. and 7 a.m. when people are generally more sensitive to noise. Equivalent Energy Noise Level (L<sub>eq</sub>) is a constant noise level that would deliver the same acoustic energy to the listener as the actual time-varying noise would deliver over the same exposure time – no “penalties” are added, so L<sub>eq</sub> would be the same regardless of time of day. dBA is a measurement unit for “a-weighted decibels,” which are commonly used for measuring environmental and industrial noise and the potential for hearing damage associated with noise health effects (General Plan, 2035).

a) **Less Than Significant Impact with Mitigation Incorporated.** The proposed Project is not expected to generate exterior noise levels exceeding the City of Sacramento 2035 General Plan Noise Environmental Constraint of 60 dBA at the project site. In addition, the proposed project is not predicted to generate or be exposed to exterior noise levels exceeding the standards of the City of Sacramento.

There would be a temporary increase in localized noise during Project construction; however, noise from temporary construction activities is exempt during designated daytime hours. The short-term construction-related noise impacts would be reduced further with the following Mitigation Measure Noise-1:

### **Mitigation Measure Noise-1**

The Los Rios Community College District shall ensure the construction contractor implements the following noise reduction measures:

- All equipment shall have sound-controlled devices no less effective than those provided by the manufacturer.
- Where practical, all equipment shall have muffled exhaust pipes.
- Stationary noise sources shall be located as far from sensitive receptors as possible.

The Project will have a **less than significant impact** with mitigation incorporated due to the above stated Mitigation Measure Noise-1, as well as compliance with the City of Sacramento Ordinance designated daytime hours for construction activities. Thus, no additional noise reduction measures are considered warranted. The impact from noise is expected to be **less than significant**.

- b) **Less Than Significant Impact.** There are several factors that could vary the degree of ground-borne vibrations, such as construction equipment types and operations, soil and subsurface conditions. Any potentially elevated noise associated with the Project will be short-term due to construction. The distance to the residential and commercial receptors, in conjunction with the trafficked roads dividing the project site from these receptors, further reduces potential ground-borne vibration impact. In addition, the City of Sacramento City Code states that noise from temporary construction activities are exempt during designated daytime hours; this is considered a **less than significant impact**.
- c) **No Impact.** The nearest runway is the Sacramento Executive Airport, located approximately 5 miles northwest of the project site. The next closest airport is Borges-Clarkburg, located approximately 5.4 miles southwest of the site. Kaiser Permanente South Sacramento Medical Center has one ground level helipad located approximately 1 mile north-northeast of the proposed project extent. Therefore, there is no noise impact associated with the construction and/or operation of this project relative to private airports or airstrips.

**XIII. Population and Housing**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
<i>Would the Project:</i>				
a. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (e.g., through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Displace substantial numbers of existing people or housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a-c) **No Impact.** The Project area is within Cosumnes River College campus. The Project would not include the creation of new housing nor displace any existing housing or people. Any workers needed for project construction and operation are anticipated to be drawn from the regional employment base; therefore, the Project would not result in local area population growth or lead to the creation of or necessity for new housing. Similarly, the Project would not indirectly induce substantial population growth through the extension of major infrastructure. Consequently, no impacts related to population and housing would occur.

**XIV. Public Services**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
--------	--------------------------------	----------------------------------------------------	------------------------------	-----------

Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

a. Fire protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Police protection?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Schools?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Parks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e. Other public facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a-e) **No Impact.** Construction and long-term operation of the proposed Project would not place any substantial adverse impacts on fire protection, police protection, schools, or parks because the project is being implemented in order to meet current administrative demands on campus. Therefore, the project will have **no impact**.

**XV. Recreation**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Would the Project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does the Project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a,b) **No Impact.** The proposed project will have no impact on the physical deterioration of any recreational facilities in the existing neighborhood. The proposed project is focused on creating more recreational opportunities within the campus recreational portion of the existing campus. There is **no impact**.

**XVI. Transportation/Traffic**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Conflict with a program plan, ordinance, or policy addressing the circulation system, including transit, roadway, bicycle and pedestrian facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Substantially increase hazards due to a geometric design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Result in inadequate emergency access?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a,b) **Less Than Significant Impact** The proposed Beach Volleyball Facilities project is not intended to facilitate further growth. Therefore, no significant increase in traffic will be generated by the anticipated operations once the expansion is completed. Instead, the traffic generated by this Project will be short-term as a result of construction. The construction of the Project is not expected to generate excessive traffic for the area but will temporarily increase traffic at the Cosumnes River College Campus. During construction, if POT items within the scope of the project represented as code compliant are found to be non-conforming beyond reasonable construction tolerances, they shall be brought into compliance. The Project is not expected to exceed, either individually or cumulatively, a level of service standard established by the county congestion management agency for designated roads. This is a **less than significant impact**.

c) **No Impact.** The proposed project does not include design features that would increase hazards or incompatible uses because the proposed project would not include the construction of any new streets or roads. The project site is located within the boundaries of the existing Cosumnes River College campus and will not require any new roads. The proposed project would not increase hazards due to a design feature, such as a sharp curve or dangerous intersection, incompatible uses, such as farming equipment, or inadequate emergency access. Therefore, the project would have **no impact**.

d) **No Impact.** The proposed project will not result in inadequate emergency access to the project area. During construction, if path of travel (POT) items are found to be non-conforming beyond reasonable construction tolerances, they shall be brought into compliance. Therefore, the project would have **no impact** to emergency access.

**XVII. Tribal Cultural Resources**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Would the project cause a substantial adverse change in the significance of a tribal cultural resource, defined in Public Resources Code section 21074 as either a site, feature, place, cultural landscape that is geographically defined in terms of the size and scope of the landscape, sacred place, or object with cultural value to a California Native American Tribe, and that is				
i. Listed or eligible for listing in the California Register of Historical Resources, or in a local register of historical resources as defined in Public Resources Code section 5020.1(k), or	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
ii. A resource determined by the lead agency, in its discretion and supported by substantial evidence, to be significant pursuant to criteria set forth in subdivision (c) of Public Resources Code Section 5024.1, the lead agency shall consider the significance of the resource to a California Native American Tribe.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Tribal Cultural Resources are defined in CEQA as sites, features, places, cultural landscapes, sacred places, and objects of cultural value to a California Native American tribe listed or eligible for listing on the California Register of Historical Resources or included in a local register of historical resources. Solano Archaeological Services (SAS) completed a *Cultural Resources Investigation – Cosumnes River College Beach Volleyball Courts Project* (February 2023) in support of environmental review of the proposed Project under CEQA (included as Appendix C).

**Sacred Lands File Search**

On January 27, 2023, on behalf of the LRCCD SAS emailed a letter and a map depicting the Project area to the Native American Heritage Commission (NAHC). The letter requested a search of the NAHC Sacred Lands File (SLF) database for cultural resources within the Project area. As of the time of publication, SAS has not received any responses from the NAHC. When information is provided by the NAHC, SAS will prepare an addendum to the Study (Appendix C).

**California Historical Resources Information System Records Search**

According to SAS (2023), a records search conducted through the California Historical Resources Information System archival research and an intensive field survey of the entire project area did not identify any prehistoric-period or historic period resources within or adjacent to the project area. Although prehistoric sites can be found in the general region surrounding the project area, none have been recorded within the half-mile search area. In addition, other than a channelized segments of Beacon creek about 1/4 -mile to the north, no natural drainages are located within or near the project area. The lack of documented early Native American sites in the immediate vicinity, and the absence of natural water sources

(potentially attractive locations for early Native American settlement and activities) suggest the project area retains a low level of sensitivity for retaining traces of prehistoric habitation. Concerning historic period resources, historic mapping, aerial photographs, archival research, and the field survey indicate that no developments of any kind have occurred within the project area. Consequently, SAS proposes a low-level sensitivity for the project area to contain potentially significant historic-era sites, features, or artifacts.

### **Assembly Bill 52 Native American Consultation**

Assembly Bill requires the lead agency to begin consultation with any California Native American tribe that is culturally and traditionally affiliated with the geographic area of the proposed Project if the California Native American tribe requested to the lead agency, in writing, to be informed by the lead agency through formal notification within 14 days of determining application complete or public agency's decision to undertake the Project. Upon formal notification, each California Native American tribe has 30 days to request consultation whereby the lead agency must initiate consultation within 30 days of the consultation request. On January 27, 2023, on behalf of the LRCCD, SAS emailed a letter and a map depicting the Project area to each of the individuals and organizations provided by NAHC to introduce the project, and to request a list of Tribal Contacts as part of the AB 52 CEQA outreach efforts. No response has been received to date. If any substantive contacts are made with the other Native American Community regarding the proposed project, an addendum to the report may be developed if needed.

#### **a) Less than Significant with Mitigation Incorporated.**

**i. Less than Significant with Mitigation Incorporated.** The North Central Information Center (NCIC) (NCIC File No. SAC-23-25) indicated that no prehistoric or historic-era cultural resources have been documented within the project area. Four historic-era sites were recorded within a half-mile search radius, and these consisted primarily of concentrations of features such as wells, ditches, walls, building and structure remains, and trash dumps recorded adjacent to Bruceville Road. The NCIC also reported that no previous studies included the current project area or were conducted within the half-mile search radius. An intensive survey conducted by SAS did not identify any prehistoric or historic-era sites, features, or artifacts within the project area. SAS proposes a low-level sensitivity for the project area to contain potentially significant historic-era sites, features, or artifacts. However, impacts of the proposed Project construction relating to ground disturbance may potentially impact tribal cultural resources, therefore, in the event that archaeological resources are observed during Project construction-related activities, **Mitigation Measure CR-1** is in place to reduce impacts to a less than significant level.

**ii. Less than Significant with Mitigation Incorporated.** On behalf of Los Rios Community College District, SAS requested contact information for tribal organizations and representatives who may have knowledge of cultural resources in the Project area. No response has been received to date.

Although unlikely, the ground disturbance related to the proposed Project construction activities could damage previously unrecorded buried tribal resources. If tribal resources are unearthed during Project activities, this would be considered a potentially significant impact, therefore, in the event that archaeological resources are observed during Project construction-related activities, **Mitigation Measure CR-1** is in place to reduce impacts to a less than significant level.

**XVIII. Utilities and Service Systems**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Require or result in the relocation or construction of new or expanded water, wastewater treatment or storm water drainage, electric power, natural gas, or telecommunications facilities, the construction or relocation of which could cause significant environmental effects?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Have sufficient water supplies available to serve the Project and reasonably foreseeable future development during normal, dry and multiple dry years?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Result in a determination by the wastewater treatment provider which serves or may serve the Project that it has adequate capacity to serve the Project's Projected demand in addition to the provider's existing commitments?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Generate solid waste in excess of State or local standards, or in excess of the capacity of local infrastructure, or otherwise impair the attainment of solid waste reduction goals?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Comply with federal, state, and local management and reduction statutes, and regulations related to solid waste?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

a,b,e) **Less Than Significant Impact.** The project would tie into existing electrical and municipal sewer infrastructure already in place at the Cosumnes River College. The proposed Project does not result in an increased demand that would exceed wastewater treatment requirements. The proposed Beach Volleyball Facilities building would utilize existing restrooms located in the community athletic center building. This is considered a **less than significant impact.**

c) **No Impact.** No increase in wastewater treatment will be required.

d) **No Impact.** Solid waste collection for Cosumnes River College is provided by Atlas Waste Services. No excess solid waste will be generated from the proposed Project.

e) **No Impact.** There is no conflict with federal, state, or local regulations. This is a **no impact.**

**XIX. Wildfire**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Substantially impair an adopted emergency response plan or emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Due to slope, prevailing winds, and other factors, exacerbate wildfire risks, and thereby expose project occupants to pollutant concentrations from a wildfire or the uncontrolled spread of wildfire?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Require the installation or maintenance of associated infrastructure (such as roads, fuel breaks, emergency water sources, power lines or other utilities) that may exacerbate fire risk or that may result in temporary or ongoing impacts to the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d. Expose people or structures to significant risks, including downslope or downstream flooding or landslides, as a result of runoff, post-fire slope instability, or drainage changes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a-d) **No Impact.** The proposed Project will have no impact on impairment of an emergency or evacuation plan and would not impact Project occupants to exacerbated wildfire risks. There is **no impact**.

**XX. Mandatory Findings of Significance**

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less-Than-Significant Impact	No Impact
a. Does the Project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Does the Project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a Project are considerable when viewed in connection with the effects of past Projects, the effects of other current Projects, and the effects of probable future Projects)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Does the Project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

- a) **Less than Significant with Mitigation Incorporated.** As discussed in Section 5, *Biological Resources* and Section 6, *Cultural Resources*, with the incorporation of the Mitigations Measures outlined, the Project does not have the potential to substantially reduce habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self- sustaining levels, eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory. Mitigation Measures included to address potential impacts to burrowing owls, Swainson’s hawk, nesting migratory birds, and potential impacts to cultural resources are reduced to less than significant levels.
- b) **Less than Significant Impact.** The proposed project would not result in cumulatively considerable impacts. The proposed project is designed to serve the existing administrative student and consolidation of student services at the Cosumnes River College. This is a **less than significant impact**.
- c) **Less than Significant Impact.** The proposed project site is not located within an Airport Community Planning Area, or within a Special Flood Hazard Zone. The proposed project site is not located on or near a hazardous materials site, or a known fault zone. The project does not have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly.

### 13. SUMMARY OF MITIGATION MEASURES

This section represents the required mitigation measures identified in Section 12.0 Environmental Checklist. Implementation of these mitigation measures would reduce all impacts of the proposed project to a less than significant level. The Los Rios Community District has committed to implementing all required mitigation measures.

#### AIR QUALITY

##### Air Quality Mitigation 1

The District shall not begin construction activities until first securing appropriate permits from the Sacramento Metropolitan Air Quality Management District.

**Air Quality Mitigation 2:** The following procedures will be adhered to by the construction contractor(s) in accordance with Air District Rule 403 and Enhanced Fugitive Dust Control Practices:

- Water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads.
- Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered.
- Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited.
- Limit vehicle speeds on unpaved roads to 15 miles per hour (mph).
- All roadways, driveways, sidewalks, parking lots to be paved should be completed as soon as possible. In addition, building pads should be laid as soon as possible after grading unless seeding or soil binders are used.
- Minimize idling time either by shutting equipment off when not in use or reducing the time of idling to 5 minutes [required by California Code of Regulations, Title 13, sections 2449(d)(3) and 2485]. Provide clear signage that posts this requirement for workers at the entrances to the site.
- Maintain all construction equipment in proper working condition according to manufacturer's specifications. The equipment must be checked by a certified mechanic and determined to be running in proper condition prior to operation.

##### Soil Disturbance Areas:

- Water exposed soil with adequate frequency for continued moist soil. However, do not overwater to the extent that sediment flows off the site.
- Suspend excavation, grading, and/or demolition activity when wind speeds exceed 20 mph.
- Install windbreaks (e.g. plant trees, solid fencing) on windward side(s) of construction areas.

- Plant vegetative ground cover (fast-germinating native grass seed) in disturbed areas as soon as possible. Water appropriately until vegetation is established.
- Post a publicly visible sign with the telephone number and person to contact at the lead agency regarding dust complaints. This person shall respond and take corrective action within 48 hours. The phone number of the District shall also be visible to ensure compliance.

## **BIOLOGICAL RESOURCES**

### **Biological Resources Mitigation Measure 1 - Preconstruction Survey Requirements**

A qualified biologist shall conduct a preconstruction survey for nesting Swainson's hawks within 0.25 miles of the project site if construction commences between March 1 and September 15. If active nests are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. This determination should be pursuant to criteria set forth by CDFW (Moore Biological Consultants, 2023).

### **Biological Resources Mitigation Measure 2 - Preconstruction Survey For Burrowing Owls**

The MTBA and FGCC protect burrowing owls year-round, as well as their nests during nesting season. Pre-construction surveys for burrowing owls within the site are recommended if construction commences between February 1 and August 31. If occupied burrows are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. The determination should be pursuant to criteria set forth by CDFW (CDFG, 2012) (Moore Biological Consultants, 2023).

### **Biological Resources Mitigation Measure 3 - Preconstruction Survey For Nesting Birds**

On-site trees, shrubs, and grasslands may be used by nesting birds protected by the Migratory Bird Treaty Act of 1918 and Fish and Game Code of California. A qualified biologist shall conduct a preconstruction nesting bird survey if vegetation removal and/or project construction occurs between February 1 and August 31. If active nests are found within the survey area, vegetation removal and/or project construction should be delayed until a qualified biologist determines nesting is complete (Moore Biological Consultants, 2023).

On-site trees, shrubs, and grasslands may be used by nesting birds protected by the Migratory Bird Treaty Act of 1918 and Fish and Game Code of California. A qualified biologist shall conduct a preconstruction nesting bird survey if vegetation removal and/or project construction occurs between February 1 and August 31. If active nests are found within the survey area, vegetation removal and/or project construction should be delayed until a qualified biologist determines nesting is complete (Moore Biological Consultants, 2023).

## **CULTURAL RESOURCES**

### **Cultural Resources Mitigation Measure 1**

Should buried, unforeseen archaeological deposits be encountered during any Project construction activity, work must cease within a 50-foot radius of the discovery. If a

potentially significant discovery is made, it must be treated in accordance with 33 CFR 325, which generally states that the lead federal agency (in this case the U.S. Army Corps of Engineers) must be notified immediately of the find to ensure that mitigation/management recommendations are developed.

### **Cultural Resources Mitigation Measure 2**

In the event that human remains or any associated funerary artifacts are discovered during Project construction, all work must cease within the immediate vicinity of the discovery. In accordance with the California Health and Safety Code (Section 7050.5), the Sacramento County Sheriff/Coroner must also be contacted immediately. If the remains are deemed to be Native American, the coroner must notify the NAHC within 24 hours, which will in turn appoint and notify a Most Likely Descendent (MLD) to act as a tribal representative. The MLD will work with a qualified archaeologist to determine the proper treatment of the human remains and associated funerary objects. Construction activities will not resume until the human remains are exhumed and official notice to proceed is issued.

## **HAZARDS AND HAZARDOUS MATERIALS**

### **Hazards and Hazardous Materials Mitigation 1**

Spill Prevention and Control Measures will be implemented and include the following:

- Any fuel products, lubricating fluids, grease, or other products and/or waste released from the Contractor(s) vehicles, equipment, or operations, shall be collected and disposed of immediately, and in accordance with State, Federal, and local laws.
- Spill clean-up materials will be stored near potential spill areas (such as vehicle and equipment staging areas).
- Spill kits will include sorbent material (such as pads designed for oil and gas), socks and/or pads to prevent spread of hazardous material, and containers for storing and proper disposal.
- Employees and contractor(s) will be trained on proper hazardous spill clean-up practices.

## **NOISE**

### **Mitigation Measure Noise-1**

The Los Rios Community College District shall ensure the construction contractor implements the following noise reduction measures:

- All equipment shall have sound-controlled devices no less effective than those provided by the manufacturer.
- Where practical, all equipment shall have muffled exhaust pipes.
- Stationary noise sources shall be located as far from sensitive receptors as possible.

# 1. Basic Project Information

## 1.1. Basic Project Information

Data Field	Value
Project Name	Cosumnes River College - Beach Volleyball Courts Project
Lead Agency	—
Land Use Scale	Project/site
Analysis Level for Defaults	County
Windspeed (m/s)	3.00
Precipitation (days)	36.6
Location	38.45462020038789, -121.4247185772885
County	Sacramento
City	Sacramento
Air District	Sacramento Metropolitan AQMD
Air Basin	Sacramento Valley
TAZ	716
EDFZ	13
Electric Utility	Sacramento Municipal Utility District
Gas Utility	Pacific Gas & Electric

## 1.2. Land Use Types

Land Use Subtype	Size	Unit	Lot Acreage	Building Area (sq ft)	Landscape Area (sq ft)	Special Landscape Area (sq ft)	Population	Description
User Defined Recreational	66,000	User Defined Unit	1.57	0.00	29,500	0.00	—	Beach Volleyball Courts

### 1.3. User-Selected Emission Reduction Measures by Emissions Sector

Sector	#	Measure Title
Construction	C-2*	Limit Heavy-Duty Diesel Vehicle Idling
Construction	C-6	Use Diesel Particulate Filters
Construction	C-10-B	Water Active Demolition Sites
Construction	C-12	Sweep Paved Roads

\* Qualitative or supporting measure. Emission reductions not included in the mitigated emissions results.

## 2. Emissions Summary

### 2.1. Construction Emissions Compared Against Thresholds

Criteria Pollutants (lb/day for daily, ton/yr for annual) and GHGs (lb/day for daily, MT/yr for annual)

## 6. Climate Risk Detailed Report

### 6.2. Initial Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	0	0	N/A
Extreme Precipitation	2	0	0	N/A
Sea Level Rise	N/A	N/A	N/A	N/A
Wildfire	1	0	0	N/A
Flooding	0	0	0	N/A
Drought	0	0	0	N/A
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	0	0	0	N/A

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores do not include implementation of climate risk reduction measures.

### 6.3. Adjusted Climate Risk Scores

Climate Hazard	Exposure Score	Sensitivity Score	Adaptive Capacity Score	Vulnerability Score
Temperature and Extreme Heat	1	1	1	2
Extreme Precipitation	2	1	1	3
Sea Level Rise	N/A	N/A	N/A	N/A
Wildfire	1	1	1	2
Flooding	1	1	1	2
Drought	1	1	1	2
Snowpack Reduction	N/A	N/A	N/A	N/A
Air Quality Degradation	1	1	1	2

The sensitivity score reflects the extent to which a project would be adversely affected by exposure to a climate hazard. Exposure is rated on a scale of 1 to 5, with a score of 5 representing the greatest exposure.

The adaptive capacity of a project refers to its ability to manage and reduce vulnerabilities from projected climate hazards. Adaptive capacity is rated on a scale of 1 to 5, with a score of 5 representing the greatest ability to adapt.

The overall vulnerability scores are calculated based on the potential impacts and adaptive capacity assessments for each hazard. Scores include implementation of climate risk reduction measures.

## 7. Health and Equity Details

### 7.3. Overall Health & Equity Scores

Metric	Result for Project Census Tract
CalEnviroScreen 4.0 Score for Project Location (a)	55.0
Healthy Places Index Score for Project Location (b)	39.0
Project Located in a Designated Disadvantaged Community (Senate Bill 535)	No
Project Located in a Low-Income Community (Assembly Bill 1550)	Yes
Project Located in a Community Air Protection Program Community (Assembly Bill 617)	South Florin

a: The maximum CalEnviroScreen score is 100. A high score (i.e., greater than 50) reflects a higher pollution burden compared to other census tracts in the state.

b: The maximum Health Places Index score is 100. A high score (i.e., greater than 50) reflects healthier community conditions compared to other census tracts in the state.

## 7.5. Evaluation Scorecard

Health & Equity Evaluation Scorecard not completed.

# **APPENDIX B**

# MOORE BIOLOGICAL CONSULTANTS

February 17, 2023

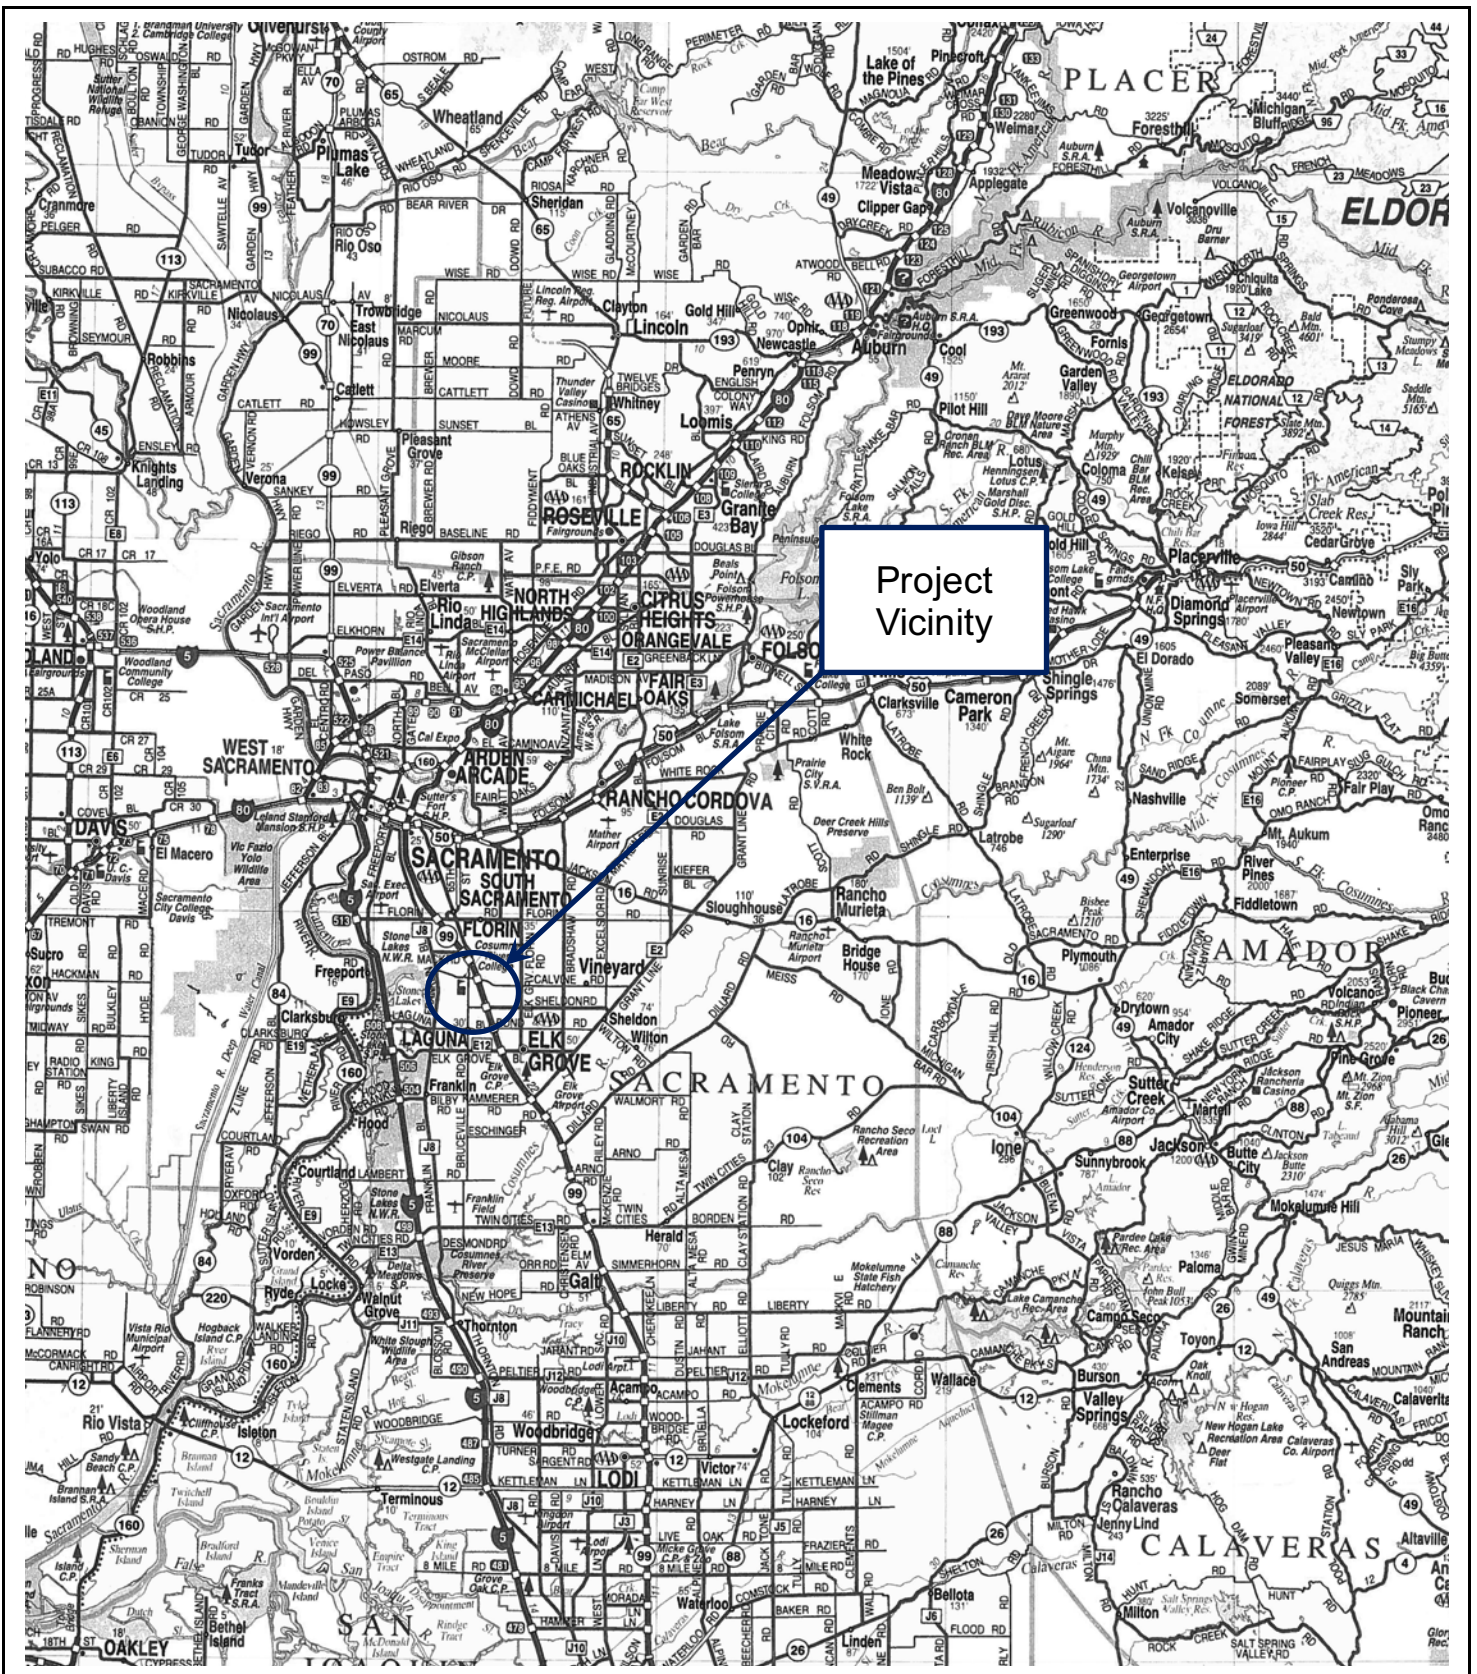

Ms. Tonya Scheftner  
Petralogix Engineering, Inc.  
212 Pine Street, Ste. 2  
Lodi, CA 95240

Subject: COSUMNES RIVER COLLEGE “BEACH VOLLEYBALL FACILITIES”  
PROJECT, SACRAMENTO, CALIFORNIA: BIOLOGICAL  
ASSESSMENT

Dear Tonya:

Thank you for asking Moore Biological Consultants to prepare a biological assessment of the Cosumnes River College (CRC) “Beach Volleyball Facilities” project in Sacramento, California (Figures 1 and 2 and Project Plans in Attachment A). The focus of our work was to assess the site for potentially regulated Waters of the U.S. and wetlands, and to search for special-status species or potentially suitable habitat for special-status species. This letter summarizes information related to biological resources that was compiled by reviewing databases and available documents, and conducting a reconnaissance-level field survey.

PROJECT OVERVIEW: The project is construction of beach volleyball courts and associated facilities in the west part of the overall Cosumnes River College campus (Figure 3 and Attachment A). The current land use in the area is an open manicured lawn with surrounding ornamental trees. Six courts will be built in the west part of the lawn area, which will also involve the removal of several trees. Athletes and visitors of the beach volleyball courts will be able to utilize surrounding parking areas and a nearby restroom that are already compliant with Americans with Disabilities Act (ADA) and will not require improvements.

Automobile Association

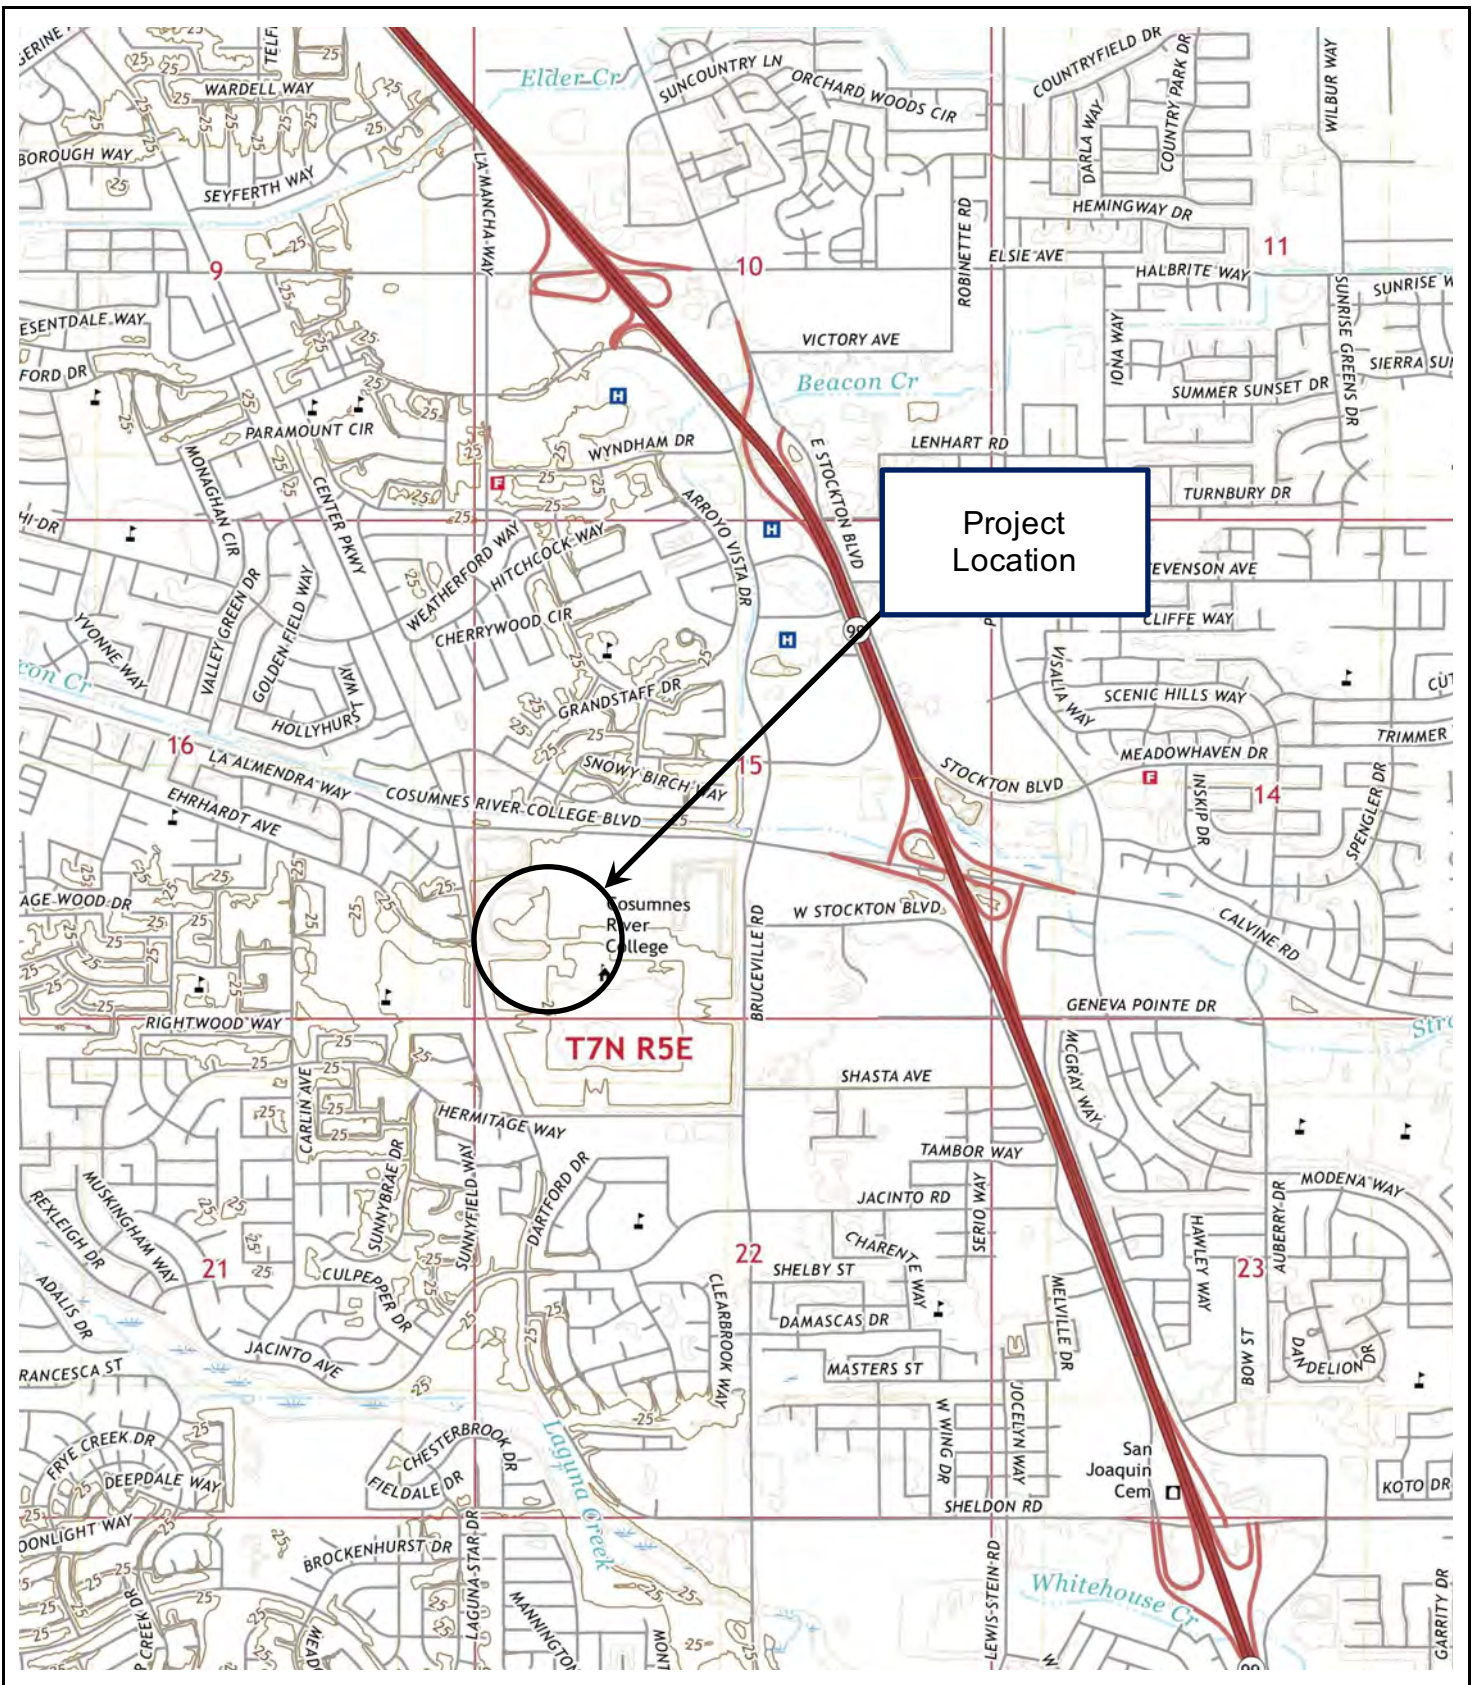

**Moore Biological  
Consultants**

**FIGURE 1**

**PROJECT VICINITY**

Source: USGS 7.5-minute Florin topographic quadrangle

**Moore Biological**

**FIGURE 2**

**PROJECT LOCATION**

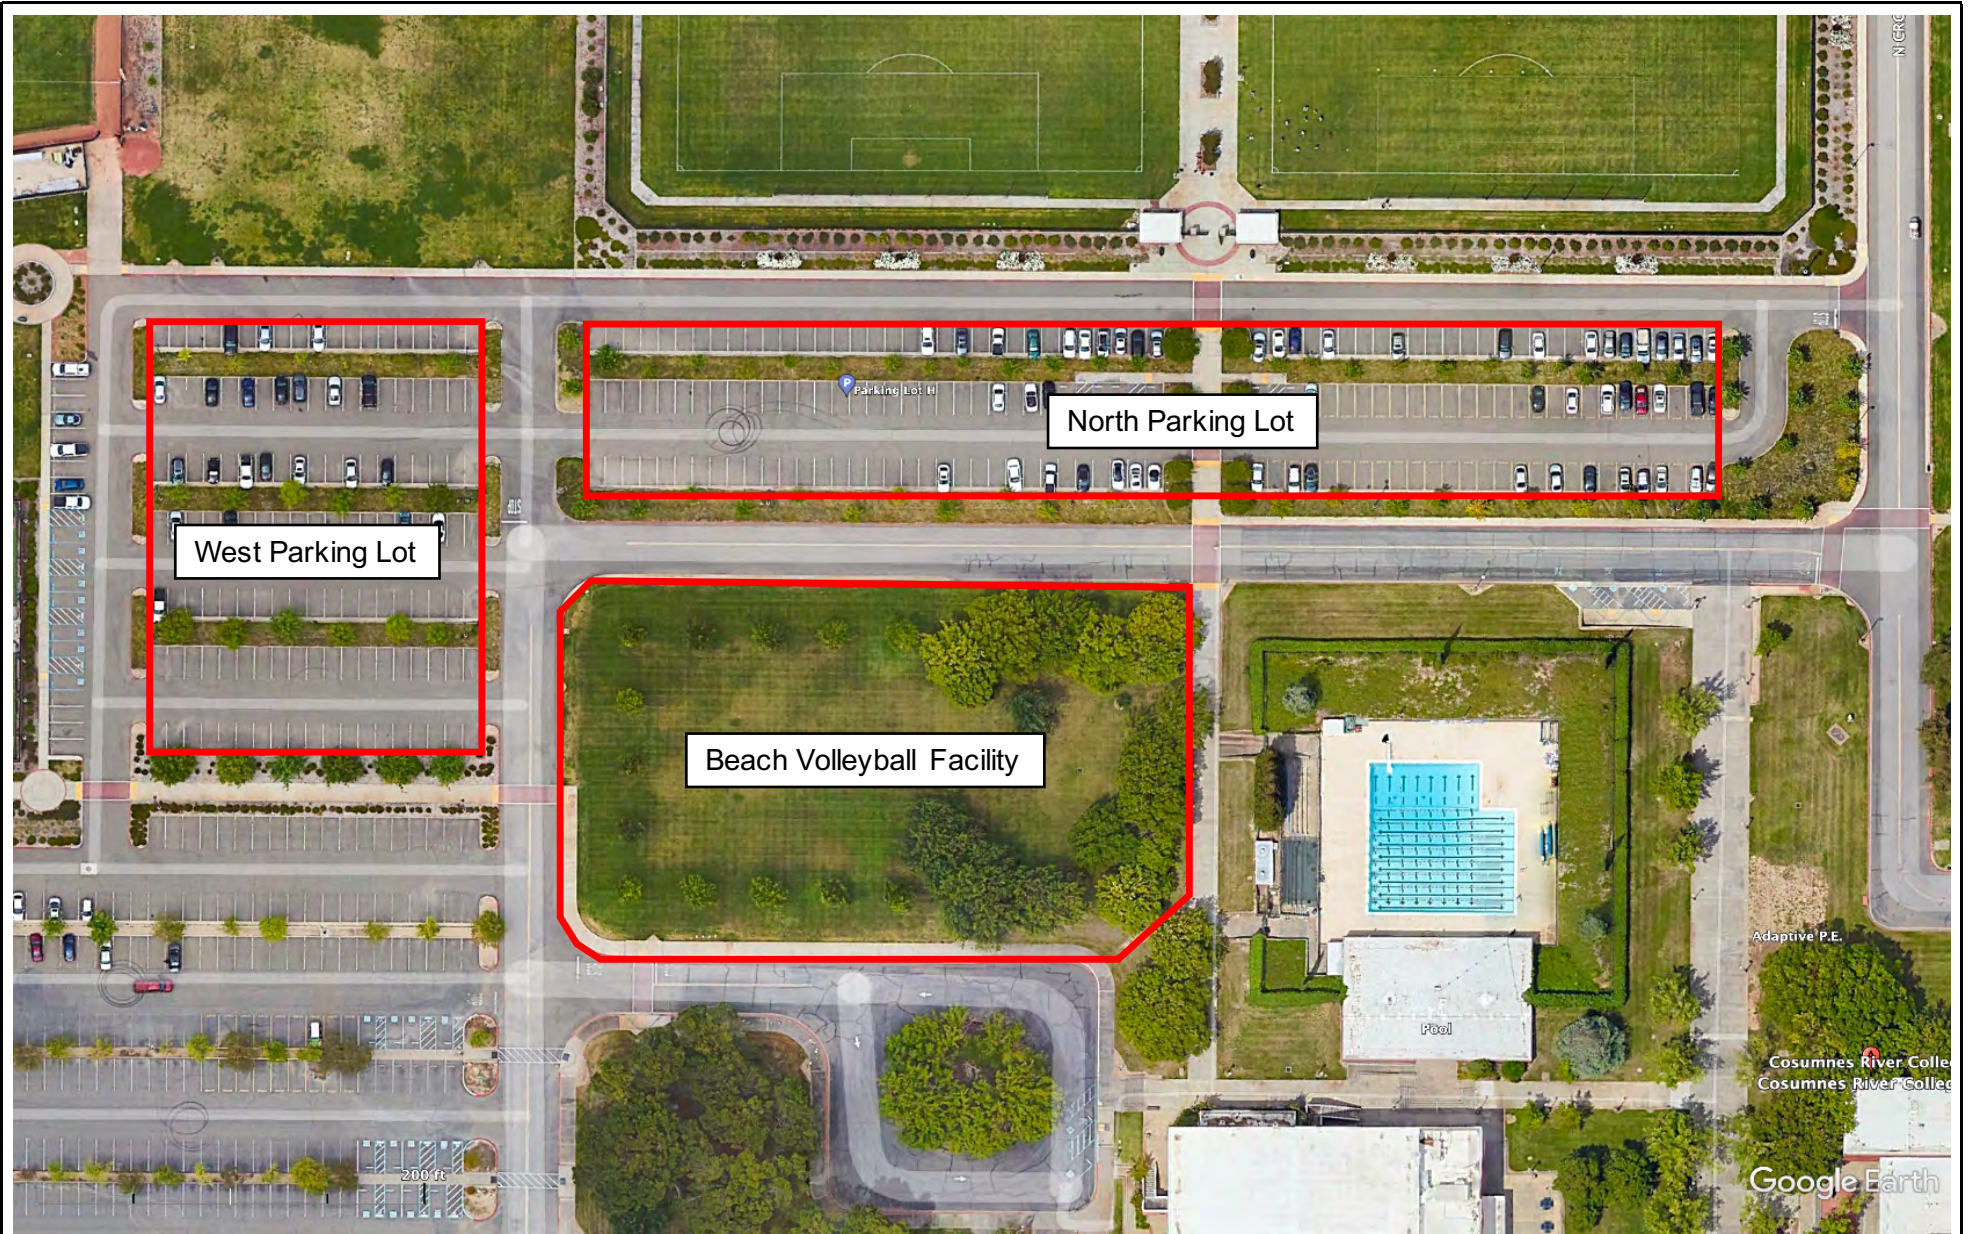

GENERAL SETTING: The project site is in south Sacramento, in Sacramento County, California (Figure 1). The site is in Section 15 within Township 7 North, Range 5 East of the USGS 7.5-minute Florin topographic quadrangle (Figure 2). The project site is in the west-central part of the campus (Figure 3).

The project site is an open manicured lawn with surrounding trees (“Beach Volleyball Facility”) bounded by established parking lots on two sides (“North Parking Lot” and “West Parking Lot”) (see Figure 3 and photographs in Attachment B). The site is in the recreational part of the campus with the swimming pool located to the east of the Beach Volleyball Facility, a soccer field to the north of the North Parking Lot, and a baseball diamond to the west of the West Parking Lot.

VEGETATION: A majority of the natural habitats in the project vicinity, including those in the site, have been replaced by development. Vegetation in the proposed Beach Volleyball Facility is manicured lawn comprised of grasses and weeds including Bermuda grass (*Cynodon dactylon*), annual bluegrass (*Poa annua*), and other common grassland species. There are a few trees in and around the large lawn and in landscaped strips in the parking lots (Figure 3 and photographs in Attachment B). Trees in and adjacent to the site are common ornamental varieties used for landscaping purposes. There are numerous large trees and shrubs located in other parts of the campus surrounding the site.

WILDLIFE: Only a few bird species were observed in the site during the field survey, all of which are commonly found in urban areas of Sacramento County. Turkey vulture (*Cathartes aura*), American crow (*Corvus branchyrhynchos*), California scrub jay (*Aphelocoma californica*), and yellow-rumped warbler (*Setophaga coronata*) are representative bird species observed at the site during the surveys. No California ground squirrels (*Otospermophilus beecheyi*) or their burrows were observed in the site.

Source (Basemap): Google Earth

Scale: 1 inch = 100+/- feet

**Moore Biological  
Consultants**

**FIGURE 3**

**AERIAL PHOTOGRAPH**

Relatively large trees in the site and in surrounding parts of the campus are suitable for nesting raptors and other protected migratory birds. A few of the larger trees surrounding the beach volleyball facility are highly suitable for a variety of nesting birds; while the trees in the two parking areas are smaller, they could potentially support nesting songbirds. During the time of the field survey, all of the trees in the site were in leaf-off condition and easily scanned for stick nests; no nests were observed. Given the presence of large trees in and near the site, it is likely a variety of songbirds, and possibly one or more pairs of raptors, nest in trees and shrubs in or near the project site during most years.

**WATERS OF THE U.S. AND WETLANDS:** Jurisdictional “wetlands” includes vegetated wetland areas, which meet the technical criteria described in the U.S. Army Corps of Engineers (ACOE) 1987 Wetlands Delineation Manual and the Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Supplement (2008), or water bodies or channels that meet the criteria identified in 33 CFR 328.4, which define “Waters of the U.S.”. Jurisdictional “Waters of the U.S” includes intermittent and perennial "blue line" streams mapped on USGS topographic maps, even when these features have been re-aligned and seasonal wetland swales and vernal pools that are hydrologically connected to or in proximity to tributary drainages.

There are no potentially jurisdictional Waters of the U.S. or wetlands in the site. Specifically, we observed no relatively permanent or intermittent drainages, vernal pools, seasonal wetlands, marshes, ponds, lakes, or riparian wetlands of any type in the Beach Volleyball Facility or adjacent parking lots.

**SPECIAL-STATUS SPECIES:** Special-status species are plants and animals that are legally protected under the state and/or federal Endangered Species Act or other regulations. The Federal Endangered Species Act (FESA) of 1973 declares that all federal departments and agencies shall utilize their authority to conserve endangered and threatened plant and animal species. The California

Endangered Species Act (CESA) of 1984 parallels the policies of FESA and pertains to native California species.

California Department of Fish and Wildlife's (CDFW) California Natural Diversity Database (CNDDDB, 2023) is helpful to identify special-status species that have been previously documented in the greater project vicinity or have the potential to occur based on presence of suitable habitat and geographical distribution.

Numerous special-status species have been documented in the Florin topographic quadrangle (see CNDDDB Search Results in Attachment C). There are extensive records of burrowing owls (*Athene cunicularia*) in the north part of the campus dating back 30 years, with the most recent observations in 2016. There are additional records of burrowing owls as well as records of other special-status species documented in the CNDDDB within a few miles of the site.

**Special-Status Plants.** Special-status plants generally occur in relatively undisturbed areas in vegetation communities such as vernal pools, marshes and swamps, chenopod scrub, seasonal wetlands, riparian scrub, and areas with unusual soils. The only “semi-natural” area in the project site is the open manicured lawn within the beach volleyball work area. No special-status plants or highly suitable habitat for special-status plants were observed in or adjacent to the site. The nearest occurrence of special-status plants in the CNDDDB (2023) search area is a record of Sanford’s arrowhead (*Sagittaria sanfordii*) located at the northeast corner of the campus; this record is from 1992 and was within Strawberry Creek. There are no creeks in the site or other suitable habitat in the site to support other special-status plants.

**Special-Status Wildlife.** While the project site may have provided habitat for several special-status wildlife species at some time in the past, development has substantially modified natural habitats in the greater project vicinity, including those within the project site. Although the project site is within a heavily developed area, there are a few open grassland fields in the project vicinity and large trees in and surrounding the site that could potentially support a few special-status species.

Of the wildlife species records within the CNDDDB (2023) identified as occurring near the site, Swainson's hawk (*Buteo swainsoni*) and burrowing owl are the only species with potential to occur in or near the project site on more than a transitory or very occasional basis. These two species are discussed in further detail below.

**SWAINSON'S HAWK:** The Swainson's hawk is a migratory hawk listed by the State of California as a Threatened species. The Migratory Bird Treaty Act (MBTA) and Fish and Game Code of California (FGCC) protect Swainson's hawks year-round, as well as their nests during the nesting season (March 1 through September 15). Swainson's hawks are found in the Central Valley primarily during their breeding season, a population is known to winter in the San Joaquin Valley.

Swainson's hawks prefer nesting sites that provide sweeping views of nearby foraging grounds consisting of grasslands, irrigated pasture, hay, and wheat crops. Most Swainson's hawks are migratory, wintering in Mexico and breeding in California and elsewhere in the western United States. This raptor generally arrives in the Central Valley in mid-March, and begins courtship and nest construction immediately upon arrival at the breeding sites. The young fledge in early July, and most Swainson's hawks leave their breeding territories by late August. The nearest record of Swainson's hawk is in a tree at Shasta Community Park, located just east of the southwest corner of the campus.

Swainson's hawks were not observed during the recent survey, which was conducted outside of the nesting season of this species while Swainson's hawks are still in Mexico. The manicured lawn in the project site provides low-quality but potentially suitable foraging habitat for Swainson's hawk, although the extent of use of this area by foraging Swainson's hawks, if any, is unknown. Due to the relatively small size of the site, surrounding development, and location in an urban setting, it is unlikely Swainson's hawks forage in the lawn area in the site

on more than an occasional basis; this species likely utilizes larger agricultural fields and grasslands in parcels further from the site for foraging.

The largest trees at the campus may provide nesting opportunities for Swainson's hawks. No raptor stick nests were observed within the large trees in the work area, which were in leaf-off condition and easily scanned during the field survey in early February. However, there are several large trees with dense vegetation in other parts of the campus, including near the site, that are suitable for nesting by Swainson's hawk. Swainson's hawk and other raptors may nest in trees in and near the site in the future.

**BURROWING OWL:** The MBTA and FGCC protect burrowing owls year-round, as well as their nests during the nesting season (February 1 through August 31). Burrowing owls are a year-long resident in a variety of grasslands as well as scrub lands that have a low density of trees and shrubs with low growing vegetation; burrowing owls that nest in the Central Valley may winter elsewhere.

The primary habitat requirement of the burrowing owl is small mammal burrows for nesting. The owl usually nests in abandoned ground squirrel burrows, although they have been known to dig their own burrows in softer soils. In urban areas, burrowing owls often utilize artificial burrows including pipes, culverts, and piles of concrete pieces. This semi-colonial owl breeds from March through August, and is most active while hunting during dawn and dusk.

As mentioned above, the CNDDDB (2023) contains records of nesting burrowing owls on the CRC campus dating back 3+ decades, with the most recent record being from 2016. The current state of this population is unknown.

The intensity of development in and surrounding the campus, including the site, reduces the likelihood of burrowing owls using the site for nesting. No burrowing owls were observed in the open manicured lawn area, which provides low-quality habitat. No ground squirrel burrows or burrowing owl were observed in or

adjacent to the site during the early February survey, but this species could move in to the site if burrow habitat becomes available in the future.

**CRITICAL HABITAT:** Critical habitat is areas mapped by the United States Fish and Wildlife Service (USFWS) as being critical to maintain and/or manage in a relatively natural state for the recovery of a listed species. The online “Critical Habitat for Threatened and Endangered Species” mapper was examined and confirmed that the project site is not in designated critical habitat of any federally listed species.

## **Conclusions and Recommendations**

- The proposed Beach Volleyball Facility site is manicured lawn and several ornamental trees, bounded by existing parking lots to the north and west. The site is biologically unremarkable.
- No potentially jurisdictional Waters of the U.S. or wetlands were observed in or adjacent to the site.
- There are no riparian habitats, sensitive natural communities, wildlife movement corridors, or native wildlife nursery sites in the site.
- Due to a lack of suitable habitat, it is very unlikely that special-status plants occur in the site.
- No special-status wildlife species are expected to occur in the site on more than a very occasional or transitory basis.
- Swainson’s hawk and burrowing owl could potentially nest in trees in or near the site, or nest within the lawn area, respectively. Swainson’s hawks and burrowing owls can be disturbed if loud and intensive construction activities occur in close proximity to their respective nesting areas. Even though the site is in an urban setting, loud construction activities such as

pavement grinding or jackhammering could result in disturbance to Swainson's hawks or burrowing owl, if any, nesting in or near the site.

- Pre-construction surveys for nesting Swainson's hawks within 0.25 miles of the project site are recommended if construction commences between March 1 and September 15. If active nests are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. The determination should be pursuant to criteria set forth by CDFW (CDFG, 1994) and the Swainson's Hawk Technical Advisory Committee (SHTAC) survey guidelines (SHTAC, 2000).
- Pre-construction surveys for burrowing owls in the site are recommended if construction commences between February 1 and August 31. If occupied burrows are found, a qualified biologist should determine the need (if any) for temporal restrictions on construction. The determination should be pursuant to criteria set forth by CDFW (CDFG, 2012).
- Trees, shrubs, and grasslands in and near the site may be used by nesting birds protected by the MBTA and FGCC. If vegetation removal and/or project construction occurs between February 1 and August 31, a pre-construction nesting bird survey is recommended. If active nests are found, vegetation removal and/or project construction should be delayed until a qualified biologist determines nesting is complete.
- The site is not in designated critical habitat for any federally listed species.

Please call me at (209) 745-1159 with any questions.

Sincerely,

Diane S. Moore, M.S.

Principal Biologist

# LOS RIOS COMMUNITY COLLEGE DISTRICT

## COSUMNES RIVER COLLEGE

### BEACH VOLLEYBALL COURTS

#### PROJECT OVERVIEW:

THE LEADERSHIP AT THE COSUMNES RIVER COLLEGE IS CONSIDERING CONSTRUCTING A BEACH VOLLEYBALL FACILITY ON THE CAMPUS IN THE LOCATION SHOWN IN THE VICINITY MAP ON THIS SHEET. IN ORDER TO DETERMINE THE FEASIBILITY OF THIS PROJECT, THE LOS RIOS COMMUNITY COLLEGE DISTRICT ENGAGED BLAIR, CHURCH & FLYNN CONSULTING ENGINEERS (BCF) TO COMPLETE A MULTI-STEP FEASIBILITY STUDY OF THE PROPOSED PROJECT. THIS EXHIBIT PACKAGE CONTAINS THE FINALIZED SCHEMATIC LAYOUTS CORRESPONDING TO THE ATTACHED ENGINEER'S OPINION OF PROBABLE COSTS AND WILL PROVIDE THE BASIS FOR DESIGN OF THE PROPOSED FACILITY.

#### VICINITY MAP

**SITE ASSESSMENT NOTES:**

A REPRESENTATIVE FROM BLAIR, CHURCH, AND FLYNN COMPLETED AN ASSESSMENT OF THE PROPOSED LOCATION FOR THE PROJECT, WITH THE FOLLOWING NOTES:

1. ACCESSIBLE PARKING STALLS NOTED ON THE PLAN ARE COMPLIANT WITH THE 2019 CALIFORNIA BUILDING CODE, SECTION 11B.
2. ACCESSIBLE PATH OF TRAVEL NOTED ON THE PLAN TO THE ACCESSIBLE PARKING STALLS AND THE RESTROOMS IN THE POOL FACILITY IS COMPLIANT WITH THE 2019 CALIFORNIA BUILDING CODE, SECTION 11B.
3. ANTICIPATED MAINTENANCE ACCESS IS NOTED ON THE PLAN.
4. ANTICIPATED PARKING FOR FACILITY USE IS NOTED ON THE PLAN - THE EXISTING PARKING LOT IS ADEQUATELY SIZED TO FACILITATE EVENTS AT THE PROPOSED BEACH VOLLEYBALL FACILITY (ANTICIPATED VEHICLE LOADING BETWEEN 20-40 VEHICLES FOR COLLEGE LEVEL EVENT AND 40-100 FOR A COMMUNITY CLUB EVENT).
5. CIRCULATION FOR TRAFFIC AND PEDESTRIANS ON THE SITE IS ADEQUATE FOR THE PROPOSED FACILITY - NO CHANGES TO THE EXISTING SITE LAYOUT ARE ANTICIPATED DUE TO THIS PROJECT, AND EVENTS AT THIS FACILITY SHOULD NOT INTERFERE WITH EVENTS AT OTHER LOCATIONS ON THE CAMPUS - THE CLOSEST FACILITY IS THE POOL - IN THE EVENT THAT THE POOL AND BEACH VOLLEYBALL FACILITIES ARE IN USE AT THE SAME TIME, THE PARKING LOTS TO THE NORTH AND WEST HAVE ADEQUATE SPACE TO HANDLE PARKING FOR BOTH EVENTS.
6. ANTICIPATED ENTRY TO THE SITE FOR FACILITY ACCESS AND FOR CONSTRUCTION WILL PRIMARILY COME FROM BRUCEVILLE ROAD, WITH SECONDARY ACCESS OPTION FROM CALVINE ROAD
7. INITIAL ASSESSMENT OF THE SITE DETERMINED THAT POWER CAN BE OBTAINED FROM THE MECHANICAL ROOM IN THE NORTHEAST CORNER OF THE POOL BUILDING AT THE SOUTH END OF THE POOL COMPLEX. IF CONTRACTIBILITY OR SIZING ISSUES BECOME APPARENT DURING DESIGN, POWER WILL BE OBTAINED FROM THE GYM BUILDING SOUTH OF THE POOL COMPLEX.
8. PREVAILING WINDS AT THIS LOCATION WERE DETERMINED FROM RECORD OBTAINED FROM THE NATIONAL OCEANIC AND ATMOSPHERIC ASSOCIATION (NOAA) AND VERIFIED BY PERSONAL EXPERIENCE FROM LOCAL RESIDENTS; PROPOSED COURT ORIENTATION MINIMIZES ADVANTAGE TO PLAYERS ON EITHER SIDE BASED ON THE POSITION OF THE SUN OR PREVAILING WINDS.

## CULTURAL RESOURCES TECHNICAL MEMORANDUM

Date: February 7, 2023  
To: Petralogix Engineering, Inc.  
From: Solano Archaeological Services, LLC  
Subject: Cultural Resources Investigation – Cosumnes River College Beach Volleyball Courts Project, City of Sacramento, Sacramento County, California

### INTRODUCTION

This technical memorandum summarizes the results of background research, Native American community outreach, pedestrian survey, and study findings for the Cosumnes River College Beach Volleyball Courts Project (the Project) located in the City of Sacramento, Sacramento County, California (Attachment A, Figure 1). The Project is subject to California Environmental Quality Act (CEQA) requirements, and Solano Archaeological Services, LLC (SAS) has prepared this report to support compliance with the cultural resources provisions of CEQA.

### PROJECT LOCATION

The project area consists of a single parcel adjacent to Parking Lot H, and the Community Athletic Center. The project area encompasses a total of approximately 1.46 acres (ac.) and is situated on the *Florin, California* U.S. Geological Survey (USGS) topographic 7.5-minute quadrangle in Township 7 North, Range 5 East, Section 15 (Attachment A, Figures 2, 3).

### PROJECT DESCRIPTION

Cosumnes River College proposes constructing a beach volleyball facility including six sand courts, restrooms, and associated infrastructure. Each court would be constructed with sand up to 18-inches (in.) in depth with individual buried drainage systems consisting of 6-in.-diameter perforated drainpipe, angular drain rock, and geotextile non-woven fabric. Construction of further parking for college and community events would not be necessary as it is anticipated that the current adjacent lots could accommodate presumed vehicle loading. Power to new court lighting would be drawn from the existing mechanical room at the adjacent pool building. The proposed project would also install access pathways to the courts and result in the removal of approximately 12 existing trees.

### REGULATORY SETTING

CEQA requires that public agencies having authority to finance or approve public or private projects assess the effects of those projects on cultural resources. Cultural resources include buildings, sites, structures, objects, or districts, each of which may have historical, architectural, archaeological, cultural, or scientific significance. CEQA states that if a proposed project would result in an effect that may cause a substantial adverse change in the significance of a significant cultural resource (termed a “historical resource”), alternative plans or mitigation measures must be considered. Because only significant cultural

resources need to be addressed, the significance of cultural resources must be determined before mitigation measures are developed.

CEQA §5024.1 (Public Resources Code [PRC] §5024.1) and §15064.5 of the State CEQA Guidelines (14 California Code of Regulations [CCR] §15064.5) define a historical resource as “a resource listed or eligible for listing on the California Register of Historical Resources.” A historical resource may be eligible for inclusion in the California Register of Historical Resources if it:

- 1) Is associated with events that have made a significant contribution to the broad patterns of California’s history and cultural heritage
- 2) Is associated with the lives of persons important to our past
- 3) Embodies the distinctive characteristics of a type, period, region, or method of construction; represents the work of an important creative individual; or possesses high artistic values
- 4) Has yielded, or may be likely to yield, information important to prehistory or history

In addition, CEQA also distinguishes between two classes of archaeological resources: archaeological sites that meet the definition of a historical resource, and “unique archaeological resources.” An archaeological resource is considered unique if it:

- Is associated with an event or person of recognized significance in California or American history or of recognized scientific importance in prehistory
- Can provide information that is of demonstrable public interest and is useful in addressing scientifically consequential and reasonable research questions
- Has a special or particular quality such as oldest, best example, largest, or last surviving example of its kind
- Is at least 100 years old and possesses substantial stratigraphic integrity; or
- Involves important research questions that historical research has shown can be answered only with archaeological methods (Public Resources Code §21083.2)

According to the CEQA Guidelines, a project with an effect that may cause a substantial adverse change in the significance of a historical resource, or a unique archaeological resource is a project that may have a significant effect on the environment (14 CCR §15064.5[b]). CEQA further states that a substantial adverse change in the significance of a resource means the physical demolition, destruction, relocation, or alteration of the resource or its immediate surroundings such that the significance of a historical resource would be materially impaired.

#### NATURAL AND CULTURAL SETTING

The project area is located in the Central Valley (also known as the Great Valley or Great Central Valley), an elongated depression between the Coast Ranges and the Sierra Nevada. The Central Valley was formed during the Quaternary Period, the most recent of the three periods of the Cenozoic era. The Cenozoic geological formations are the most important to the Central Valley in terms of the freshwater aquifer formations that make the valley an ideal location for farming and ranching.

The Cosumnes River College campus is situated where two large ecosystems overlap: the Sacramento-San Joaquin Delta Ecoregion and the California Great Valley Ecoregion (Hickson and Keeler-Wolf 2007; Olsen and Cox 2016). Both ecosystems have undergone vast changes in the past 150+ years and so both endemic and newly introduced flora and fauna must be discussed. Both these regions are included in the APE flora and fauna profile, because biologically, these regions are not sharply delineated.

The Delta region stretches from Sacramento in the north to just south of Tracy. Before agricultural development in the region, vegetation of the Delta was composed of freshwater and brackish marshes

with tules (*Schoenoplectus acutus* and *S. californicus*) and cattails (*Typha spp.*), broad riparian thickets of scrubwillows (*Salix spp.*), buttonwillow (*Cephalanthus occidentalis*), and native brambles (*Rubus ursinus*, *Rosa californica*). Extensive riparian forests of Fremont cottonwood (*Populus fremontii*), valley oak (*Quercus lobate*), Oregon ash (*Fraxinus latifolia*), box elder (*Acer negundo*), white alder (*Alnus rhombifolia*), and black willow (*Salix gooddingii*) occurred in lower areas, while upland non-riparian stands of valley oak and coast live oak (*Quercus agrifolia*) occurred in a mosaic with seasonally flooded herbaceous vegetation including vernal pools and alkali wetlands (Hickson and Keeler-Wolf 2007).

The California Great Valley Ecoregion (as defined by Buck-Diaz et al. 2012) overlaps with the Delta region in terms of environment and ecosystem around the project area. Vast grasslands, oak savannas, riparian marshes, vernal pools, and large lakes once covered the Central Valley. Like the ecosystems of the Delta regions, it has been significantly altered by urban and suburban development, farming, and ranching during the historic period. Examples of typical flora that are part of this ecosystem include California buckeye (*Aesculus californica*), Bermuda grass (*Cynodon dactylon*), California ash (*Fraxinus dipetala*), and California buckthorn (*Frangula californica*).

### *Prehistoric Setting*

Attempts to classify the prehistory of California date to at least the early decades of the 20<sup>th</sup> century, but it was the later work of Beardsley (1948, 1954) that formed the basis for cultural sequences used today. Based on documenting artifact similarities among sites in the San Francisco Bay region and the Sacramento-San Joaquin Delta, Beardsley formatted his findings into a cultural model known as the Central California Taxonomic System (CCTS). This system proposed a linear, uniform sequence of cultural succession in central California, and defined Early, Middle, and Late horizons for cultural change. Archaeological researchers subsequently refined and redefined aspects of the CCTS. For example, Fredrickson (1973, 1974, and 1994) reviewed general economic, technological, and mortuary traits between archaeological assemblages across the region. He separated cultural, temporal, and spatial units from each other and assigned them to six chronological periods: Paleo-Indian (12,000-8,000 B.P.); Lower, Middle, and Upper Archaic (8,000 B.P. to 1,500 B.P.) and Upper, and Lower Emergent (1,500 B.P. to 200 B.P.).

Fredrickson's (1974) Paleo-Archaic-Emergent cultural sequence was recalibrated by Rosenthal et al. (2007) who defined three broad periods: The Paleoindian (13,550–10,550 B.P.); the three-staged Archaic, consisting of the Lower Archaic 10,550–7,550 B.P.), Middle Archaic (7,550–2,550 B.P.), and Upper Archaic (2,550 cal. B.P.–2,100 B.P.); and the Emergent (2,100 B.P.–contact). The three divisions of the Archaic Period correspond to climate changes and the overall sequence is now commonly used to interpret central California prehistory.

### Paleo-Indian Period

This period began when the first people began to enter what is now known as the California culture area. It was commonly believed these first people subsisted on big game and minimally processed foods, (i.e., hunters and gatherers), and did not engage in long-range trade patterns. However, recent research indicates these people may have been more sedentary, relied on some processed foods, and were engaged in trade over fairly long distances (Rosenthal et al. 2007). Populations likely consisted of small groups traveling frequently to exploit plant and animal species seasonally available across wide landscapes.

### Archaic Period

This period was characterized by an increase in plant exploitation, more elaborate burial accoutrements, and increased trade network complexity. The three divisions that correspond to prehistoric climate change are characterized by the following traits (Rosenthal et al. 2007):

- Lower Archaic Period—Cycles of widespread floodplain and alluvial fan deposition have been documented during this period. Artifact assemblages from this time include flaked stone crescents, early wide-stemmed points, and marine shell beads. Obsidian from eastern Nevada and the north coast ranges has been found on sites dating to this period which indicates trade was occurring in multiple directions. A variety of plant and animal species were utilized, including acorns, wild cucumber, and manzanita berries.
- Middle Archaic Period—Rosenthal et al. (2007) identified two distinct settlement/subsistence patterns during this period which was significantly drier than the Lower Archaic: the foothill tradition, and the valley tradition. Functional artifact assemblages consisting primarily of locally sourced flaked stone and groundstone cobbles characterize the foothills tradition, with very few trade goods. Specialized tools, trade goods, and faunal refuse that suggests year-round occupation are evident on sites of the valley tradition. Distinct artifacts attributed to this tradition include one of the oldest dated shell bead assemblages in central California (4,160 B.P.) and a particular type of pestle used with a wooden mortar (Meyer and Rosenthal 1997).
- Upper Archaic Period—This period saw an abrupt change to wetter and cooler environmental climate conditions. Much greater cultural diversity can be seen in archaeological assemblages from this period. More specialized artifacts, such as bone tools, ceremonial blades, polished and groundstone plummets, saucer and saddle *Olivella* shell beads, *Haliotis* shell ornaments, and a variety of groundstone implements are characteristic of this period.

#### Emergent Period

This period saw the introduction of the bow and arrow, the emergence of social stratification linked to wealth, an expansion of trade networks, and the apparent use of clam shell beads as a form of currency (Moratto 1984). The Augustine pattern (the distinct cultural pattern of the Emergent Period) is characterized by the appearance of small projectile points (largely obsidian), rimmed display mortars, flanged steatite pipes, flanged pestles and chevron-decorated bird-bone tubes. Large mammals and small seeded resources appear to have made up a larger part of the diet during this period (Fredrickson 1968; Meyer and Rosenthal 1997; Rosenthal et al. 2007).

#### *Ethnographic Context*

Several ethnographers and historians conducted research in the Central Valley, and part of that body of research concerns the Plains Miwok. The term “Miwok” refers to a specific Utian language group, and the subdivisions refer to smaller divisions within the broader language group. The Plains Miwok were one of five divisions of the Eastern Miwok, and inhabited the Delta-Plains region of the Central Valley (Levy 1978). The application of a lexicostatistic model for language divergence applied to the Plains Miwok dialect suggested it has been a complex linguistic entity for 2,000 years (Levy 1978:398), and researchers infer this indicates the group inhabited the region for at least that long.

#### Political and Social Organization

The political organization of the Plains Miwok centered on the tribelet, a group composed of 300 to 500 people (Levy 1978:410). Each tribelet consisted of several villages that controlled a specific area of resources. These tribelets were divided along lineages localized to specific geographic settings, which represented a village site and associated satellite sites where the seasonal collection of resources occurred (Levy 1978). Each tribelet settlement was the headquarters of a localized patrilineage whose name reflected their origin location. Each settlement had a speaker who acted as the tribelet chief’s representative to their own individual settlements (Levy 1978).

Linage membership was dictated by moieties. The Eastern Miwok believed all living things belonged to one of two equal, but opposite, parts of the world. This distinction is important to social organization

because a person's lineage was distinguished by which part that one belonged. These two "sides" are land and water, and were also referred to by important representation animals. For instance, the Southern Sierra Miwok used blue jay and grizzly bear to represent the land side and coyote to represent the water side. Names of individuals corresponded to an animal or object that belonged to the same moiety as the person named (Gifford 1916 as cited in Cook 1955:35). Moieties were also intended as exogamous units, and most marriages followed this rule. They also played a part in ceremonies such as funeral and puberty rites (Gifford 1916 as cited in Cook 1955:35).

### Settlement and Subsistence

The settlement patterns of the Plains Miwok coincide with their subsistence patterns and practices. The Plains Miwok have been characterized as intensive hunter-gatherers with an emphasis on gathering (Bennyhoff 1977). The seasonal availability of floral resources dictated the limits of the group's economic pursuits. Their territory covered six seasonally productive biotic communities, and they had a rich body of resources to choose from in each of these zones. The storage of floral resources in the form of acorn granaries allowed for more stable use of the resource base (Bennyhoff 1977). Before appropriation of the acorn as a resource base, archaeological evidence suggests people in the same geographic area suffered from seasonal deprivation (Schultz 1981).

The Plains Miwok did not have cultivated plants or domesticated animals, and their main subsistence strategy was based on gathering plant food and hunting mammals. Although other groups of Miwok such as foothills groups practiced seasonal transhumance for resources, the fecund Central Valley had grasslands rich with seed-bearing annuals and groups of large fauna such as deer, tule elk, and antelope (Levy 1978). Fishing by the use of nets, bone hooks, harpoons and obsidian tipped spears contributed significantly to their diet (Levy 1978:404).

### Technology and Material Culture

The bow and arrow was both the principal hunting tool and primary weapon of war among the Plains Miwok. The bows were made of the wood of oak, willow, pepperwood, maple, or hazel and formed into the "sinew-backed" variety: several layers of sinew were glued together and glued to the back of the bow with an adhesive extracted from soaproot (Levy 1978:405).

Arrows were made in several different types. The arrows used for hunting large game or for war were made with a foreshaft designed to stay in the victim even if the main shaft was broken off; this is in contrast to ordinary hunting arrows where the arrowhead is attached directly to the main shaft (Levy 1978:405-406). The Plains Miwok used laurel-leaf points for their arrows and three-feathered radical fletching for their arrows, usually from red tail hawk feathers (Levy 1978:406).

The Plains Miwok produced intricate twined and coiled basketry that was employed for a variety of uses. Cordage from several plants, such as milkweed and hemp, were used in the construction of baskets. Twined basketry was used for gathering seeds, manufactured into cradles, used for open-air winnowing, and for storage. Coiled basketry was watertight and used for cooking and serving acorn mush (Levy 1978). The patterns woven into basketry were an expression of material adornment and decoration, which made them elements of material culture as well as utilitarian items. Each pattern represented something in the cultural worldview, such as an important animal or plant, and may have further represented moieties (Barrett and Gifford 1933).

### Religion

Shamanism was practiced amongst the Miwok, which is in contrast to the secret-society type of cult system practiced by other tribes in many areas of north-central California. The skills and position of a

shaman were inherited patrilineally, and were derived from a combination of instruction by an older shaman and the acquisition of supernatural power (Levy 1978:412).

A number of different types of shamans were recognized. The spirit doctor or sucking shaman was the most important within Miwok religion. They obtained their power through dreaming during normal sleep or hallucinations facilitated by the use of *Datura* (a genus of nine species of poisonous vespertine flowering plants). These spirit doctors cured patients by getting the help of guardian spirits in their hallucinatory vision quests, and locating the diseased object inside of a person and sucking it out (Levy 1978:412).

The Eastern Miwok possessed many elaborate religious ceremonies, the number and type of which held at any given village were determined by the position of that village within the tribelet. The most important ceremonies were only held in the capital of the lineage settlement. The geographical location of a tribelet also dictated the ceremonies held; a wider variety of ceremonies were held in the Central Valley than in other regions occupied by the Miwok (Levy 1978:412).

### *Historic Period Setting*

Various Spanish explorers, (i.e. Pedro Fages in 1772, and Jose Canizares in 1776), searching for sites for inland missions, visited the Central Valley in the 1700s. Francisco Eliza sailed into the unexplored Sacramento River in 1793. Expeditions were also conducted in the early 1800s, and included those of Gabriel Moraga, Jose Antonio Sanchez and Father Narciso Duran. These explorers were followed by trappers of the Hudson Bay Company, beginning with Jedidiah Strong Smith in the late 1820s, and Joseph Walker and Ewing Young in the 1830s (Hoover et al. 1990:285-286).

Permanent Euro-American settlement in the Sacramento Valley began when the Spanish and subsequently colonial Mexican governments issued large land grants to various individuals, often in return for military or other services rendered to the government. One of the grantees was Swiss immigrant John Augustus Sutter, who first settled in what would become the city of Sacramento in 1839. Sutter established a fort on a knoll away from the low-lying areas along the American and Sacramento Rivers, and from 1839 until January 1848, Sutter's Fort served as a destination for immigrants coming into California. In conjunction with his fort, Sutter also recognized the value of a riverfront location and laid out the town of Sutterville in 1844, several miles south of his fort.

In 1848, James Marshall's gold discovery on the South Fork of the American River started a mass western migration to California. The discovery fundamentally shaped California history. As word spread of the gold discovery California's population swelled from 20,000 nonnative people in 1848 to 100,000 in 1849 and over 200,000 by 1852. These new residents flocked first to gateway cities, such as Stockton, Sacramento, and Marysville for supplies and stories of riches, before pushing east into the gold country, a region along the western slope of the Sierra Nevada Mountains stretching from Plumas in the north, to Fresno County in the south (Myer 2002; Rice et al. 2002).

For most of its history following European occupation, the area surrounding Cosumnes River College had been a lightly settled agricultural area supporting Sacramento. In the years following the Second World War, Sacramento, as well as many other communities across the nation, experienced a phenomenon known as the "flight to the suburbs". During the war years, there was a general halt in residential building due to the lack of building materials—which were reserved for the war effort. Many large dwellings in the central area were then divided into multiple apartment units to accommodate the growth in employees in the Sacramento area involved in the military bases and war industries. Two large-scale employers, Campbell Soup and the U.S. Army Signal Depot, located in the Florin area (just the northeast of the project area) in the 1940s. When the war was over, the returning G.I.s joined the work force, married and

began raising families. To meet the demand for new single-family dwellings, new suburban subdivisions sprang up all over Sacramento resulting in the urban/suburban landscape seen today.

### Florin

The early settlers that migrated to the Florin area were generally of Portuguese, Italian, and Asian (primarily Japanese) descent who worked on and established ranches, dairies, orchards, and vineyards. In the 1850s, the world-renowned horticulturist, Mr. James Rutter, planted the prize winning “Florin Flame Tokay” grape. For almost a century, the Florin area was the center of the Tokay grape production which led to the establishment of a number of wineries (Florin Historical Society 2018).

During Florin's peak years (between late 1890s and early 1900s), the shipments of grapes, and strawberries netted up to 250 train cars per season. During this time, Japanese immigrants replaced Chinese laborers in the fields around Florin, which had been established along the railroad line about eight miles southwest of Sacramento. As farmers shifted from growing wheat and hay to more intensely cultivated strawberry fields and vineyards, the small town of Florin became one of the largest Nikkei agricultural settlements in California. By the 1910s, Japanese immigrants leased or owned over one thousand acres and Florin's Nihonmachi overshadowed other areas of town. Their prominence became so pronounced that the small community drew national attention and emerged as a target for anti-Japanese political campaigns. Politicians journeyed the short distance from the state capital to see the "Japanese problem" first-hand in Florin before passing the Alien Land Act of 1913, which restricted land ownership for "aliens ineligible for citizenship." A few years later the local school board segregated Florin's elementary school. Despite these pressures, Florin's Nihonmachi grew and served as the cultural, social and commercial center for Japanese farm families throughout the area (Californiajapantowns.org 2018).

Shortly after the Japanese attack on Pearl Harbor in December of 1941, President Roosevelt signed Government Order 9066 which mandated the relocation of Japanese citizens to internment camps throughout the southwestern U.S. Hundreds of families in the Sacramento area were forcibly removed from their homes and businesses including the farm families that concentrated in and around Florin. In general, agricultural production in Florin ceased and was never re-established to any great extent. By the 1950s, land development became more profitable, and Florin's once lush agricultural scene became less productive. This pattern of land use continues to the present day with little in the way of open space remaining in the area. Due to World War II, the depression, and the import of grapes from other parts of the world, the farming in Florin's production decreased dramatically and today the area is largely developed for residential and commercial purposes.

### NATIVE AMERICAN COMMUNITY OUTREACH

The PRC Sections 21080.1, 21080.3.1, and 21080.3.2 require public agencies to consult with the appropriate California Native American tribes identified by the Native American Heritage Commission (NAHC) for the purpose of mitigating impacts to cultural resources. To meet PRC requirements, on January 27<sup>th</sup>, 2023, SAS emailed a letter and a map depicting the project area and surrounding vicinity to the NAHC requesting a Sacred Lands File (SLF) search, and a list of Native American community representatives who might have an interest in, or concerns with the proposed Project (Attachment B). As of this report, SAS has not received any responses from the NAHC. When information is provided by the NAHC, SAS will prepare an addendum to this study.

### CALIFORNIA HISTORICAL RESOURCES INFORMATION SYSTEM RECORDS SEARCH

On January 27<sup>th</sup>, 2023, the North Central Information Center (NCIC) of the California Historical Resources Information System, provided the results of a record search for the Project (NCIC File No. SAC-23-25) (Attachment C). The NCIC indicated that no prehistoric or historic-era cultural resources have been documented within the project area. Four historic-era sites were recorded within a half-mile

(mi.) search radius, and these consisted primarily of concentrations of features such as wells, ditches, walls, building and structure remains, and trash dumps recorded adjacent to Bruceville Road. The NCIC also reported that no previous studies included the current project area or were conducted within the half-mi. search radius.

#### HISTORICAL MAP REVIEW

To ascertain patterns of land ownership and use within the project area and identify potential undocumented subsurface cultural deposits and sensitive landforms, SAS conducted additional archival research focused on historical mapping and land transfer records. This research consisted of reviews of the Bureau of Land Management's General Land Office (GLO) archives including patent records and plat maps, historical USGS topographic quadrangle maps, and other archival sources.

A review of the 1855, and 1872 GLO plat maps appears to indicate that no development had occurred within or in the vicinity of the project area during this period. The only historic-era feature depicted on the 1855 plat in Section 15 was the north-south trending *Upper Stockton Road* (generally present-day State Route 99) and a partial depiction of a field in the northeastern ¼ of the section.

The GLO land patent records indicate that only one transfer of federal land occurred that encompassed the project area. This consisted of the entire southwest ¼ of Section 15 as part of a much larger grant to the State of California of over 13,000 ac. under the 1841 Preemption Act. The Preemption Act permitted "squatters" who were living on federal government-owned land to purchase up to 160 ac. for \$1.25 per acre before the land would be offered for sale to the general public. The Act further provided that Ohio, Indiana, Illinois, Alabama, Missouri, Mississippi, Louisiana, Arkansas, and Michigan or any state thereafter admitted to the Union would be paid 10% of the proceeds from the sale of such public land. To qualify under the law, the "squatter" had to be the "head" of a household, a single man over 21 or a widow, a citizen of the U.S. or an immigrant intending to become naturalized, and a resident of the claimed land for a minimum of 14 months.

The Preemption Act allowed individuals to claim federal land as their personal property. To preserve ownership, the claimant had to accomplish specific things to legitimize the claim. One way was to reside on the land. Another was to work consistently to improve the land for at least five years. It was not necessary that the claimant have title to the land; living there and working toward improving the stake were enough. However, if the land remained idle for six months, the government could step in and take the property. The Act granted 500,000 ac. of land to each included state and provided that the proceeds from the sales of such lands "shall be faithfully applied to objects of internal improvement (Specifically, the construction of roads, railways, bridges, canals and improvement of water-courses, and draining of swamps) (Dworsky 1962).

In the adjacent southeast ¼ of Section 15 (near but outside the project area), the full 160 ac. of the southeast ¼ was granted to George G. Waters, and William George in 1860 under the Scrip Warrant Act of 1855 (10 Stat. 701). This Act provided for land grants to military veterans who had served in any wars the country had been engaged in since 1790. They were entitled to a certificate of warrant for 160 ac. of land as long as they had not deserted or been dishonorably discharged. A veteran's widow and children were entitled to receive a grant that the deceased would have been entitled to receive and grants could be assigned or transferred to non-veterans (CSU Monterey Bay 2020). This Act applied to William George who served in Captain Tracy's Company of California Volunteers during unspecified "Indian Disturbances". It would appear that George sold or otherwise transferred his grant (a common practice during the 19<sup>th</sup> century) to George G. Waters at the time of the patent award and this occurrence is recorded on the transfer document.

Aerial photography from 1947, 1957, 1964, and 1966 demonstrates that no developments of any kind occurred within or in the immediate vicinity of the project area. Dense residential and commercial development, and Cosumnes River College campus buildings and structures, however, are clearly depicted in 1984, the next available set of aerial photos. Similarly, USGS topographic mapping dating between 1909, and 1970 does not show any developments. It is not until the 1977 printing of the Florin quadrangle, that campus buildings are shown in Section 15 along with other developments and roadways in the surrounding area.

## FIELD SURVEY

### *Methods*

On February 2, 2023, SAS archaeologists Karena Skinner, and Mark Pense conducted an intensive pedestrian survey of the project area utilizing pedestrian transects spaced no greater than 10 meters apart. Particular attention was paid to rodent burrows, erosional exposures, and other areas where mineral soils were available for examination. A sub-meter accurate Trimble GPS unit was utilized to verify project area boundaries and to record locations of landscape features and cultural resources. Photographs of the project area and immediate vicinity were taken with digital media, and have been archived by SAS.

### *Results*

The entire project area was covered in mown grass with little in the way of ground surface visibility being available for examination. Small areas of bare ground were present at the base of trees within the project area, and to a small extent adjacent to road edges and curbs. No prehistoric or historic-era sites, features, or artifacts were noted.

## SUMMARY AND RECOMMENDATIONS

Archival research and an intensive field survey did not identify any prehistoric or historic-period cultural resources within or adjacent to the project area. Although prehistoric sites can be found in the general region surrounding the project area, none have been recorded within the half-mi. search area. In addition, other than a channelized segment of Beacon Creek about 1/4-mi. to the north, no natural drainages are located within or near the project area. The lack of documented early Native American sites in the immediate vicinity and the absence of natural water sources (potentially attractive locations for early Native American settlement and activities) suggest the project area retains a low level of sensitivity for retaining traces of prehistoric habitation. Concerning historic period resources, historic mapping, aerial photographs, archival research, and the field survey indicate that no developments of any kind have occurred within the project area. Consequently, SAS proposes a low level of sensitivity for the project area to contain potentially significant historic-era sites, features, or artifacts.

If human remains or any associated funerary artifacts are discovered during construction, all work must cease within the immediate vicinity of the discovery. In accordance with the California Health and Safety Code (Section 7050.5), the Sacramento County Sheriff/Coroner must be contacted immediately. If the Coroner determines the remains to be Native American, the Coroner will notify the Native American Heritage Commission, which will in turn appoint a Most Likely Descendent (MLD) to act as a tribal representative. The MLD will work with the Applicant and a qualified archaeologist to determine the proper treatment of the human remains and any associated funerary objects. Construction activities will not resume until either the human remains are exhumed, or the remains are avoided via Project construction design change.

**Re: Cosumnes River College Volleyball Courts Project, City of Sacramento, Sacramento County, California**

To Whom It May Concern:

Petralogix Engineering, Inc., has retained Solano Archaeological Services, LLC (SAS) to conduct a cultural resources inventory of an approximately 1.54-acre project area on the campus of Cosumnes River College in the City of Sacramento. The proposed Project would construct beach volleyball courts and associated infrastructure on a presently undeveloped parcel. The project area is located in Township 7 North, Range 5 East, Section 15 as depicted on the attached *Florin, California* USGS 7.5' topographic quadrangle map.

The cultural investigation will include an intensive survey and we would like to request a Sacred Lands File (SLF) review for any known but unrecorded cultural resources or sensitive properties within or near the project area. If you could also please provide a list of appropriate Native American individuals/organizations that may have knowledge of cultural resources in the vicinity, we would greatly appreciate it. Please be aware that this SLF review request and California Environmental Quality Act outreach effort to local tribal representatives is for planning purposes only.

Please email results back to [brian@solanoarchaeology.com](mailto:brian@solanoarchaeology.com).

If you have any questions, feel free to contact me by email or via phone at 530-417-7007.

Regards,

## ***Records Search Documentation***

1/27/2023

NCIC File No.: SAC-23-25

Jason Coleman  
Solano Archaeological Services, LLC  
P.O. Box 367  
Elmira, CA 95625

Re: Cosumnes River College

The North Central Information Center (NCIC) received your records search request for the project area referenced above, located on the Florin USGS 7.5' quad. The following reflects the results of the records search for the project area and a 1/2-mi radius.

As indicated on the data request form, the locations of resources and reports are provided in the following format:  custom GIS maps  GIS data

Recorded resources within project area:	None
Recorded resources outside project area, within radius:	P-34-799 P-34-824 P-34-1258 P-34-1259
Known reports within project area:	None
Known reports outside project area, within radius:	Not requested

Please forward a copy of any resulting reports and resource records from this project to NCIC as soon as possible. The lead agency/authority and cultural resources consultant should coordinate sending documentation to NCIC. Digital materials are preferred and can be sent to our office via our file transfer system. Please contact NCIC for instructions. Due to the sensitive nature of archaeological site location data, we ask that you do not include resource location maps and resource location descriptions in your report if the report is for public distribution. If you have any questions regarding the results presented herein, please contact the office at the phone number listed above.

The provision of CHRIS Data via this records search response does not in any way constitute public disclosure of records otherwise exempt from disclosure under the California Public Records Act or any other law, including, but not limited to, records related to archeological site information maintained by or on behalf of, or in the possession of, the State of California, Department of Parks and Recreation, State Historic Preservation Officer, Office of Historic Preservation, or the State Historical Resources Commission.

Due to processing delays and other factors, it is possible that not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

Should you require any additional information for the above referenced project, reference the records search number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Sincerely,

Paul Rendes, Coordinator  
North Central Information Center

Beach Volleyball Courts Project  
Cosumnes River College  
8401 Center Parkway  
City of Sacramento, CA 95823  
Portion of APN: 117-0140-044

Dear Mr. Mirmiran,

We are pleased to present the following report, which contains the findings and conclusions of our Phase I Environmental Site Assessment conducted for the subject site, which is a portion of the Cosumnes River College Campus. This report was designed to provide a Phase I Environmental Site Assessment in compliance with the ASTM E 1527-21 Standard and is in accordance with the All-Appropriate Inquiries (AAI) rule standard. This report is also developed in compliance with the scope as outlined in our original proposal dated January 9, 2023. Findings for this project have been provided in the body of the report and are listed in the executive summary.

Petralogix Engineering, Inc. uses professionals who meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. As an environmental consulting company, we have the specific qualifications (based on education, professional certification, training, and experience) to assess properties. Petralogix has developed and performed all appropriate inquiries in conformance with the standards and practices as set forth in 40 CFR 312.

We appreciate the opportunity to provide our expertise on this project and look forward to providing other services in the future. Please feel free to contact us if you have any questions.

Sincerely,  
Petralogix Engineering, Inc.

Tonya R. Scheftner

Daniel E. Kramer  
Professional Geologist No. 8657

# PHASE I ENVIRONMENTAL SITE ASSESSMENT – IMPORTANT CONSIDERATIONS AND LIMITATIONS

## *Contact Petralogix to Discuss all Questions*

It is important to contact our firm whenever you have any questions. The value in retaining our company for your environmental consulting needs is that we are here to help and guide. No question or comment is unimportant to Petralogix. We can save our clients time, money, and confusion by discussing development components at critical times within a project's timeframe. We are here to help regarding possible environmental conditions that could affect your project.

## *Limitations of the Phase I Environmental Site Assessment (ESA)*

When reviewing and considering the final Phase I ESA report it should be understood that it is not intended to be an all-exhaustive end all review. Rather, a Phase I Environmental Site Assessment is written to provide database search results, third party information, observations, and professional opinions regarding a specific site for a specific project, under a specific timeframe.

There are many uncertainties that can exist about a property even with appropriate review being met under the requirements of the AAI and ASTM standards. Additional research can be performed to aid in a higher level of certainty about a site's historic environmental risk. The amount of research required to do this depends on the type of property, the risk tolerance of the client, and information developed in the course of the property review.

This Phase I ESA Report is useable for 180 days from the date of completion. The Report is produced for the client and project owner, and may not be used by a different entity or person without also satisfying the User's Responsibilities and having express consent from Petralogix Engineering, Inc. This Phase I ESA report is a modified version based on DTSC discussions to focus on a specific smaller working area, within the context of a larger site, in order to achieve a streamlined approach and focus to environmental review and due diligence for a sub-set area within the boundaries of a larger campus property. This deviation from the typical ASTM standard should be noted.

## *Client & User Responsibilities*

The ASTM Standard E1527-21 requires the user to be involved in the process and adequately inform professionals of their whole knowledge for a site. In order to meet the requirements to qualify for the innocent landowner defense within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) the following items must be performed.

- **Required** - review title and judicial records for environmental liens or activities and use limitations (AULs).
- **Must** - communicate any specialized knowledge or experience to the environmental professional that is material to recognized environmental conditions in connection to the property.
- **Must** - communicate any actual knowledge of environmental liens or AULs encumbering the property to the environmental professional.
- **Shall** - consider the relationship of the purchase price of the property to the fair market value. If the amount is lower, a written explanation of the lower value is required.
- **Must** - communicate commonly known or reasonably ascertainable information about recognized environmental conditions in connection to the property to the environmental professional.

## PHASE I ENVIRONMENTAL SITE ASSESSMENT

### COSUMNES RIVER COLLEGE

8401 CENTER PARKWAY  
CITY OF SACRAMENTO, CALIFORNIA  
(PORTION OF APN: 117-0140-044)

OUR PROJECT NO: 06307-01

### 1.0 SUMMARY

Petralogix Engineering, Inc. has been retained by Reza Mirmiran of Los Rios Community College to conduct a Phase I Environmental Site Assessment for the portion of the Cosumnes River College (CRC) campus associated with the CRC Beach Volleyball Courts project subject to the California Environmental Quality Act (CEQA); the project is located with the campus, property, located at the 8401 Center Parkway, in the City of Sacramento, Sacramento County, California. The Site consists of an approximately 1.5-acre portion of the assessor parcel number (APN): 117-0140-044.

Our firm conducted a Public Records review, in which information was obtained from both federal and state databases. Petralogix uses Environmental Data Resources Inc. (EDR) to assist and supply many of these documents. In addition, we have supplemented this data with regional and local sources to determine whether or not obvious recognized or historically recognized environmental conditions (RECs) may exist (and/or be known to exist by regulatory agencies) for the Site. The search radius for this investigation extended to adjoining properties, and properties within a search distance varying from one-eighth to one mile, depending on the information type that was being researched.

Background and past uses of the subject property were investigated in great detail. Sources describing the physical characteristics of the property, many of the surrounding properties, and the general region were compiled for review. These sources were studied in order to determine the topography, geologic setting, and groundwater depth and flow direction beneath the property. Site reconnaissance of the subject property was also performed. Immediate surroundings were also reviewed during our site reconnaissance. The complete data review and summary required for compliance (under the ASTM and AAI standards) can be found in the body of this document. This assessment was conducted under the supervision of Daniel E. Kramer, Chief Professional Geologist (PG#8657).

### 1.1 Executive Summary

#### 1.1.1 Findings

The subject property is located at 8401 Center Parkway in the City of Sacramento, Sacramento County, California and consists of approximately 66,000-square feet (SF) portion of the 145.92-acre "parent site" identified as assessor parcel number (APN)117-0140-044. The subject property consists of the approximately 66,000 sf project site (Cosumnes River College Beach Volleyball Courts) existing within the existing Cosumnes River College campus. The subject property project area is located adjacent to Parking Lot H and Parking Lot A north and west, respectively, and within the Community Athletic Center. This Phase I ESA report is a modified version based on DTSC discussions to

focus on a specific smaller working area, within the context of a larger site, in order to achieve a streamlined approach and focus to environmental review and due diligence for a sub-set area within the boundaries of a larger campus property. This deviation from the typical ASTM standard should be noted.

Based on the historical aerial photographs and topographic maps, the subject property parent site was undeveloped land from at least 1894 to 1972 when the parent site was developed into a college campus; aerial photographs indicate the subject property was undeveloped land from at least 1894 to present. No RECs were observed during the review of historical aerial photographs and topographic maps.

The subject property parent site parcel is identified in several databases searched by EDR. EDR databases report three (3) underground storage tanks (USTs) removed under regulatory closure, three (3) active USTs subject to Sacramento County Environmental Management monitoring and reporting, and the campus listed as a Large Quantity Generator, with no violations reported. Facilities reviewed are not within 500 feet of the 66,000 square foot subject property. Based on the distance from the subject property and/or the regulatory status, the EDR database information reported are not considered a REC to the Site.

### 1.1.2 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 for the approximately 66,000 square foot subject property within the Cosumnes River College "parent site" located at 8401 Center Parkway, City of Sacramento, Sacramento County, with the APN: 117-0140-044. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has not identified any recognized environmental conditions (RECs) in connection with the subject property.

### 1.1.3 Recommendations

No further investigation is recommended at this time.

## **ENVIRONMENTAL PROFESSIONAL?**

*A person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding the presence of releases or threatened releases (per ASTM Standards E1527)*

**&**

*In California such a person must hold a current Professional Engineer's or Professional Geologist's license.*

## **2.0 INTRODUCTION**

### **2.1 Purpose**

In order to obtain State funding for school property acquisition or new construction, the California Educational Code (CEC) § 17213.1 requires a school district to conduct a comprehensive Phase I Environmental Site Assessments (ESA) be conducted to determine whether there has been, or may have been, a release of hazardous materials or the presence of naturally occurring hazardous material. The CEC requires DTSC to review the Phase I ESA and to make a determination regarding

any need for further action or remediation. The main objective of any study should be to determine current and/or past occupants (or surrounding land uses) which could adversely impact property development, the environment, or the human health.

**Performance of a Phase I Environmental Site Assessment according to ASTM Standard E1527-21 and the All Appropriate Inquiries (AAI) rule satisfies one of the requirements to qualify for landowner liability protections (LLPs) within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).**

The purpose of this Phase I Environmental Site Assessment is to identify to **the extent feasible**, pursuant to the processes prescribed by the AAI rule and in ASTM Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, recognized environmental conditions in connection with the property. Additional investigative procedures, designed to meet the due diligence criteria specified by many lending institutions, have also been implemented. As defined by ASTM<sup>1</sup> E1527-21, §1.1.1, the term "recognized environmental conditions" or (REC) refers to:

*"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any **release** to the environment; (2) under conditions indicative of a **release** to the environment; or (3) under conditions that pose a material threat of a future **release** to the environment."*

Under CERCLA the definition of a **release** is given as:

*42 U.S.C. § 9601(22) defines a "**release**" as "any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminant."*

It is important to note the issuance and consideration of Business Recognized Environmental Concerns, Historic Recognized Environmental Concerns (HREC), and/or Controlled Recognized Environmental Concerns (CREC). Each of these items is more clearly defined in the regulatory literature and standards. We have considered the application of these definitions as part of this review. We do this to help determine impact significance for sites which once had items of recognized

<sup>1</sup> American Society for Testing and Materials, [www.astm.org](http://www.astm.org)

## ***ASTM STANDARDS AND REQUIREMENTS***

*Phase I ESAs must be conducted in accordance with the current version of American Society for Testing and Materials International (ASTM) Standard E1527 "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process", ASTM International in conjunction with ASTM Standard E1528 "Standard Practice for Environmental Site Assessments: Transaction Screen Process", ASTM International. For referenced ASTM standards, visit the ASTM website, [www.astm.org](http://www.astm.org), or contact ASTM Customer Service at [service@astm.org](mailto:service@astm.org). Contact Petralogix to discuss these requirements in more detail. If preferred, we can come to your office and present a 30-minute power point on the ASTM Standard as topic for better understanding. Contact us at [questions@petraolgix.com](mailto:questions@petraolgix.com) to setup a presentation.*

concern due to use and or historic practice, but for which a cleanup or change of regulatory law and regulation has removed the hazardous condition from the site. This Phase I ESA report is a modified version based on DTSC discussions to focus on a specific smaller working area, within the context of a larger site, in order to achieve a streamlined approach and focus to environmental review and due diligence for a sub-set area within the boundaries of a larger campus property. This deviation from the typical ASTM standard should be noted.

### **2.2 Detailed Scope-of-Review**

The scope of work performed to develop the information contained in this Phase I Environmental Site Assessment report includes:

1. Collecting available information concerning the property
2. Review of other data pertinent to the specific site
3. Conducting a site visit to assess physical features, observe adjacent land use, and gather evidence of indiscriminate and/or illegal waste disposal
4. Conducting a review of regulatory agencies' records
5. Contacting appropriate regulatory personnel,
6. Reviewing regulatory files regarding the property in question.
7. Detailed discussions with both the Client and all previous owners who are available to discuss the history of the site.

This Phase I Environmental Site Assessment discusses all work performed by Petralogix to date with regard to this specific project. The principal findings are outlined throughout the body of this text and are summarized in the conclusion of this report.

### **2.3 Significant Assumptions**

No significant assumptions were made in the course of this assessment. To clarify, a significant assumption is defined in the following statement: "things and/or items that were based on speculative reports or study, or which were not verified through rigorous evaluation and objective review."

### **2.4 Limitations and Exceptions**

This report was compiled as a Phase I Environmental Site Assessment for the subject project. This report contains information and data that was provided to Petralogix by a variety of outside sources.

Petralogix cannot warrant the accuracy and/or completeness of the information which was provided to us by those sources.

When an assessment is completed without adequate subsurface exploration or chemical screening very little certainty (or conclusive statement) can be made about the conditions of the soil and groundwater beneath a particular site. As is the case with this study, uncertainty regarding latent subsurface conditions which may be the result of on-site or off-site sources exists. In order to best determine with certainty these conditions, physical testing would be required. *Therefore, the findings and conclusions of this report are not scientific certainty, but rather a statement of probability based on professional judgment. These statements of probability are based on the data gathered during the course of this investigation.*

Petralogix is not able to represent that the site or adjoining land contains no hazardous waste, oil, underground storage tanks, or other latent condition beyond that detected or observed by Petralogix during the Phase I Environmental Site Assessment. Without physical tests and additional review for those sites, we can determine no definite answer. A possibility always exists for contaminants to migrate through surface water, air, or groundwater. An investigation to determine whether or not contaminants are present in the surface and subsurface soil is not within the scope of work required to produce the Phase I Environmental Site Assessment. Chemical analysis of soil and groundwater samples to quantify levels of contamination are also not within the scope of work required to develop a Phase I Environmental Site Assessment.

As discussed in ASTM E1527-21, it is never possible to eliminate all uncertainty from an investigation of this type:

No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for recognized environmental conditions in connection with a property, and this practice recognizes reasonable limits of time and cost.

For this assessment, there were no specific limitations identified.

## **2.5 Special Terms and Conditions**

As part of this assessment, certain materials are not fully evaluated including Asbestos, Mold, Radon, Vapor, or Lead. These are discussed and considered, but we are not proposing to provide characterization of these items (nor is characterization required or intended within the ASTM scope). Intention here is directed towards screening.

Our office has not been provided with any specific criteria for the development of this report that is separate from the general request to evaluate the property in question for possible problems related to toxic or hazardous agents. We have not been directed to address any specific questions concerning the site. If there is a need to conduct an investigation into a specific question not addressed in this report, please contact Petralogix immediately regarding your concerns.

## 2.6 User Reliance

This report was prepared for the exclusive use of Los Rios Community College District. No other person or entity is entitled to use or rely upon this report without specific written authorization from Petralogix. Such reliance is subject to the same limitations, terms, and conditions as our original contract with the above stated client(s). Petralogix specifically rejects any responsibility for unauthorized use of this report. Unauthorized use is any use that is not consented for by Petralogix in writing. This Phase I ESA is only reliable for 180 days from the date of the completion, February 24, 2023.

### ***180 Day Limitation?***

*Phase I ESAs are only valid for 180 days. Many clients want a more detailed explanation of why. Over time, conditions may change at the site which cause an impact and form an environmental liability. There are many examples of this happening. One value of retaining the same professional with time is that the revised and updated Phase I ESAs are generally more simplified than if using multiple consultants.*

## 3.0 SITE DESCRIPTION

### 3.1 Location and Legal Explanation

The subject property is located at 8401 Center Parkway in the City of Sacramento, Sacramento County, California and consists of approximately 66,000-square feet (SF) portion of the 145.92-acre "parent parcel" identified as assessor parcel number (APN)117-0140-044. The subject property consists of the approximately 66,000 sf project site (Cosumnes River College Beach Volleyball Courts) existing within the existing Cosumnes River College campus. The subject property project area is located adjacent to Parking Lot H and Parking Lot A north and west, respectively, and within the Community Athletic Center.

A general location map (Vicinity Map – Plate 1) and a general site map showing survey photograph locations (Site Map – Plate 2) are attached to this report in **Appendix A**. Photographs from our onsite field survey of the subject property are attached to this report as **Appendix B**.

### 3.2 Site and Vicinity Features

The Site consists of an open manicured lawn with surrounding trees bounded by parking lots on two sides ("Parking Lot H" and "Parking Lot A"). The Site is within the recreational portion of the Cosumnes River College campus, with the swimming pool located adjacent east, a parking lot followed by a soccer field north of the Parking Lot H, and a baseball diamond to the west of the Parking Lot A. South of the Site is an asphalt road followed by trees and lawn.

### 3.3 Current Use - Property

The subject property consists of a manicured lawn with surrounding trees situated within the recreational portion of the Cosumnes River College campus, situs address 8401 Center Parkway, City of Sacramento, in the City of Sacramento, Sacramento County.

### 3.4 Descriptions of Structures, Roads, Other Improvements for the Site

The Site is undeveloped, with a manicured lawn and surrounding trees.

### 3.5 Current Uses - Adjoining Properties

The subject property is located within the CRC recreational facilities bounded by established parking lots ("Parking Lot H" and "Parking Lot A"), a swimming pool located adjacent east, and an asphalt road followed by lawn and trees to the south. The adjoining property is the "parent site" consisting of the greater Cosumnes River College campus.

### 3.6 Physical Setting

#### 3.6.1 Topography

According to the most recent United States Geological Survey Topographic map covering the subject property and vicinity<sup>2</sup>, the subject property elevation is approximately 25 feet above mean sea level. The general area slopes toward the southwest.

#### 3.6.2 Geology and Soils

According to the most detailed Geologic Map<sup>3</sup> covering the subject property and vicinity, the site consists of the Riverbank Formation alluvium (Qr), which generally consists of weathered reddish gravel, sand, and silt that form alluvial terraces and fans.

The site soil consists primarily of San Joaquin-Urban land complex (0-2 percent slopes) and is moderately well drained<sup>4</sup>.

#### 3.6.3 Hydrogeology

According to the most recent data obtained from the Sacramento County Water Resources Contour Maps<sup>5</sup>, groundwater elevation is approximately 25 feet below mean sea level (MSL) in the Spring 2007 and 30 feet below msl in the Fall of 2007. Based on the site elevation of approximately 55 feet above MSL, depth to groundwater may be approximately 50 to 55 feet below ground surface (bgs). The groundwater flow direction is anticipated to be coincident with topography, to the southwest.

## **4.0 USER PROVIDED DATA**

### **4.1 Title Records**

A preliminary title report was not provided by the User. Environmental Data Resources, Inc. (EDR) performed a Title Search to identify any Liens and AULs associated with the subject property parcel identifier APN 117-0140-044, Sacramento County, California. EDR identified a deed recorded with the Sacramento County Recorder recorded February 23, 1967, identifying subject property owner as Los Rios Junior College District of Sacramento. The previous owner was recorded as Valley-Hi Venture.

### **4.2 Environmental Liens or Activity and Use Limitations**

EDR performed a Lien and AUL search for the subject property parcel identifier APN 117-0140-044, Sacramento County, California. No environmental liens or AULs were found for the subject property. In addition, Petralogix reviewed the California EPA Department of Toxic Substances Control (DTSC) CalEPA databases of land use restricted sites: "Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions"<sup>6</sup> and "Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction."<sup>7</sup> The subject property was not listed on either database.

### **4.3 Specialized Knowledge and Awareness**

Chris Raines, Director of Administrative Services for Cosumnes River College indicated via a User Questionnaire (**Appendix F**) that no specialized knowledge or experience that is important or relevant to assessing or identifying recognized environmental conditions in connection with the subject property.

### **4.4 Commonly Known or Reasonably Ascertainable Data**

Chris Raines, Director of Administrative Services for Cosumnes River College indicated no knowledge of commonly known or reasonably ascertainable information related to the subject property that was relevant to this study or review.

### **4.5 Valuation Decrease for Environmental Matters**

Chris Raines, Director of Administrative Services for Cosumnes River College indicated valuation reduction of the subject property due to any environmental issues, or otherwise is not applicable to the subject property.

### **4.6 Owner, Property Manager, and Occupant Data**

Chris Raines, Director of Administrative Services for Cosumnes River College indicates he is currently the representative for Cosumnes River College, which is occupied as a junior college.

---

<sup>6</sup> <https://www.envirostor.dtsc.ca.gov/public/>

<sup>7</sup> <https://calepa.ca.gov/SiteCleanup/CorteseList/>

#### 4.7 Purpose for Performing Phase I ESA

Chris Raines, Director of Administrative Services for Cosumnes River College indicated that the Phase I ESA is requested as part of the development of the CRC Beach Volleyball Courts project.

### *Orphan Sites*

*An orphan site can be described as a toxic waste area where the polluter could not be identified, or the polluter refused to take action or pay for the cleanup. It therefore is of great significance for due diligence review.*

#### 5.0 RECORDS EXAMINATION

In preparing this report, Petralogix has engaged the services of Environmental Data Resources, Inc. (EDR) of Milford, Connecticut. EDR provided Petralogix with a list and profile of the recorded sites within the project study area that have been identified by regulatory agencies of significance.

EDR's report #7235068.2s is included as **Appendix D**. The date of the latest agency version of each database searched by EDR and the date EDR acquired the latest update are noted in the EDR report as part of the record for this Phase I ESA.

The EDR governmental database search included a list of "orphan sites." Orphan sites are locations which have a physical existence, but whose exact location is "fuzzy" and therefore, requires additional review to determine relevance to the site in question. These sites were not depicted on the EDR radius map of identified sites. Seven "orphan sites" were identified by EDR. The relevance of these sites are evaluated in section 5.3.3 below.

#### 5.1 Standard Environmental Records

A variety of standard environmental record sources have been reviewed based on the data provided by EDR in order to complete this report. Information on what sources were reviewed and search distances associated with those sources is listed in table form in **Appendix C**.

#### 5.2 Supplementary Environmental Records

In addition to the standard environmental record sources, additional environmental record sources have been reviewed as well. Those sources are listed on the last page of **Appendix C**.

#### 5.3 Environmental Record Discoveries

##### 5.3.1 Subject Property

The subject property "parent site" parcel is identified in several databases searched by EDR. Facilities reviewed are not within 500 feet of the subject property. Additional discussion for selected facilities is provided in the following summary table.

Subject Property Address	Source	Comments
Balfour Beatty Infrastructure 8401 Center Parkway	FINDS, ECHO, HAZNET, HWTS	This parent site is located on the HAZNET, HWTS, FINDS, AND ECHO databases for the handling and transport of hazardous waste associated with "heavy construction". No violations are reported. This is not considered a REC to the subject property.
ESS ENGINEERING 8401 Center Parkway	HWTS, HAZNET	Waste classified as organic solids was hauled to landfill. No violations reported. This is not considered a REC to the subject property.
Cosumnes River College 8401 Center Parkway	HAZNET, HWTS, CIWQS, Sacramento Co. ML, RCRA-LQG, UST, SWEEPS UST, HIST UST	<p>A petroleum leak reported near the library on campus in 2019. The fire department responded with the spill reportedly contained. Based on the distance from the Site, this is not considered a REC.</p> <p>Several CIWQS storm water construction permits are listed for the parent site.</p> <p>The parent site is listed as a Large Quantity Generator, with no violations reported.</p> <p>One (1) closed UST containing regular unleaded in 1989 with tank status reported as removed under Sacramento County Environmental Management Department (SCEMD). One (1) waste oil tank reported as removed and closure dated 2021 by SCEMD. The historic USTs are not considered a REC to the subject property based on regulatory closure.</p> <p>Three active USTs are reported for the parent site; one (1) 5000-gallon UST containing diesel, one (1) 500-gallon UST containing waste oil, and (1) 2,000-gallon UST containing regular unleaded. No violations are reported. The USTs are located in the automotive area of the parent site, which is approximately 1,000 feet cross-gradient to the subject property. The active USTs are not considered a REC to the Site.</p>

### 5.3.2 Surrounding Sites

The remaining facilities listed in the EDR database outside of the parent site were reviewed in detail, and do not appear to represent RECs to the subject property based upon regulatory status, hydrogeological gradient, and/or distance from the Site.

### 5.3.3 Orphan Sites

EDR identified seven "orphan sites." None of these facilities were identified as the Site or adjacent properties.

## 6.0 HISTORICAL USE DATA

### 6.1 Historical Aerial Photographs & Topographic Maps

Aerial photographs and topographic maps of the subject property provided by EDR were reviewed as part of this investigation:

#### Aerial Photograph Description Table

Date	Photo Description
1937	The subject property and parent site appears undeveloped. The general vicinity is undeveloped.
1947 1957 1964 1966	The subject property appears undeveloped. The southern portion of the parent site appears utilized for agriculture in 1947 and 1957, reverting back to undeveloped land. The general vicinity is undeveloped.
1972 1984 1993 1998 2006 2009 2012 2016 2020	The parent site is developed as the Cosumnes River College campus. The subject property within the parent site remains undeveloped. subject property now has what appears to be an orchard covering most of the parcel. The structure observed in 1937 and 1952 is still visible, and there may be a small structure located in the southwest corner of the Site, although the photographs are unclear. The parcel adjacent north to the subject property now has several structures. There are a few more structures in the general vicinity, which appears similar to previous years but with an increase in orchards as the agricultural use.

#### Topographic Maps

Date	Scale	Quadrangle	Map Description
1894 1909 1941 1947 1953 1968	1:100,000 1:24,000 1:62,500 1:62,500 1:24,000 1:24,000	Lodi Florin Franklin Galt Florin Florin	The subject property and parent site appear undeveloped. The parent site has electrical power lines labeled in the southeast portion of the site beginning in 1947. The surrounding area appears undeveloped.
1975 1980	1:24,000 1:24,000	Florin Florin	The parent site appears developed as the Cosumnes River College campus from 1975 on to

Date	Scale	Quadrangle	Map Description
2012	1:24,000	Florin	present. The surrounding area appears developed.
2015	1:24,000	Florin	
2018	1:24,000	Florin	

Based on the historical aerial photographs and topographic maps, the subject property parent site was undeveloped land from at least 1894 to 1972 when the parent site was developed into a college campus; aerial photographs indicate the subject property was undeveloped land from at least 1894 to present.

## 6.2 Sanborn Insurance Company Maps

An attempt was made by EDR to obtain Sanborn Insurance Company maps for the period covering the years 1860 through the present in order to determine what types of activities were conducted on the subject property and on adjoining properties. No Sanborn maps were found.

## 6.3 Local Street Directories

Haines Criss-Cross Directory and Cole Information Services<sup>8</sup> for Roseville were reviewed, including issues dated approximately every five years from 1999 through 2017. The subject property address is identified from 1994 through 2017 as a college facility. Nothing material to RECs were identified.

The cross-street, Ehrhardt Avenue, was also reviewed. Nothing material to RECs were identified.

City Directory listings are included in **Appendix E**.

## 7.0 SITE RECONNAISSANCE

A visual reconnaissance of the subject property was conducted on February 2, 2023 by Tonya Scheftner. A site map and photographs of the subject property are attached to this report in **Appendices A and B**.

### 7.1 Procedure and Restrictive Conditions

The subject property consists of an approximately 66,000 square-foot area encompassing the proposed beach volleyball courts situated within the Cosumnes River College ("parent site"). No restrictions were encountered during the site reconnaissance.

<sup>8</sup> Provided by EDR.

## 7.2 Petralogix Site Visit Worksheet

Observations made during the site visit are summarized in the following table:

<b>Site Visit Observations</b>	
<b>Subject Property</b>	
Describe the current use of the property.	Manicured lawn surrounded by trees.
Describe evidence of historic uses on the property.	None observed.
Is there a Potable Water Source?	None observed.
Is there a Sewage Disposal Source?	None observed.
Are there any onsite odors?	None observed.
Are there any pools of Liquid?	None observed.
Are there any electric or hydraulic equipment likely to contain PCBs?	None observed.
Are there any storage tanks located onsite?	None observed.
Are there any drums or other containers located onsite?	None observed.
<b>Observations – Structure Interior</b>	
Are there any heating/cooling system?	Not applicable.
Are there any stains or corrosion?	Not applicable.
Are there any sumps or drains?	Not applicable.
<b>Observations - Exterior</b>	
Are there any Ponds, Lagoons, and/or Pits?	None observed.
Is there any stained soil or pavement visible onsite?	None observed.
Was there any solid waste storage or deposition onsite?	None observed.
Any noticeable wastewater discharge?	None observed.

<b>Site Visit Observations</b>	
Are there any wells or septic systems visible onsite?	None observed.
<b>Observations - Vicinity Area</b>	
Describe the topography of property and vicinity.	The subject property and vicinity are relatively flat.
Describe the current use of adjoining properties.	To the north is Parking Lot H followed by a soccer field, to the west is Parking Lot A. South is an asphalt road followed by a lawn, west is hardscape followed by a pool.
Is there any evidence of past uses?	None observed.
Describe the current land uses in area.	Academic.
Describe any evidence of past uses.	None observed.

Nothing pertaining to RECs was observed during the site reconnaissance.

## **8.0 INTERVIEWS**

### **8.1 Interview with Owner / Site Manager and Key Individuals**

The Owner is Los Rios Community College District (LRCCD), who is the User for the Phase I ESA. See User Questionnaire (Section 4.0) for interview information.

### **8.2 Interviews with Local Government Offices**

#### **8.2.1 Sacramento County Environmental Management Department**

The Sacramento County Environmental Management Department (EMD) was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. Numerous documents were provided via request 23-340, dated January 25<sup>th</sup>, 2023. Records reviewed indicate the parent site for CRC has three underground storage tanks with a monitoring system certification up to date, a hazardous material plan, and removal documentation for three USTs removed. No RECs were indicated for the subject property consisting of an approximately 66,000 square foot area in the recreational portion of CRC.

### 8.2.2 City of Sacramento Community Development Department

EDR performed a search of building department records for the subject property and adjoining sites on behalf of Petralogix on January 26, 2023. EDR identified numerous permits for the subject property parent site, the CRC campus. Permits reviewed include, but are not limited to, commercial remodel activities for a cellular tower and campus building improvements. Nothing material to RECs for the subject property were found. The EDR permit summaries are included in **Appendix E**.

### 8.2.3 Sacramento County Assessor's Office

A deed for the subject property parent site provided by EDR indicates Los Rios Community College is the holds title for the parcel located in Sacramento County, California (APN: 117-0140-044) since at least 1967.

### 8.2.4 Sacramento Metropolitan Air Quality Management District

The Sacramento Metropolitan Air Management District was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. Virginia Muller, Air Quality Specialist, responded via email on February 1, 2023 and indicated a search of the District's databases returned several records concerning asbestos remediation connected to demolition of structures on file for this location. Based on a review of the parent site, this is not a concern for the subject property.

### 8.2.5 Sacramento County Office of Agricultural Commissioner

The Sacramento County Office of Agricultural Commissioner was contacted to determine whether any records were on file at that agency material to RECs in connection with the subject property. The representative, Elisa De Bord indicated no records of pesticides, herbicides, or any other substance in connection with the Site.

## 9.0 DEPARTMENT OF CONSERVATION DISTRICT OFFICE, DIVISION OF OIL AND GAS

The Department of Conservation District Office, Division of Oil and Gas<sup>9</sup> Well Finder was reviewed to evaluate the potential presence of curren or former oil fields, oil and gas wells, oil production areas, and natural gas production sites. Two well sites were identified between 0.5 and 1 mile west of the subject property. Both wells are reported as plugged. There is an oil and gas field (Freeport Gas) located approximately one-mile from the subject property. This is not considered a REC to the Site.

## 10.0 MOLD ASSESSMENT SCREENING

No obvious signs of mold were seen during our limited site visit. We are not certified mold experts. If the bank is concerned with the possibility of mold, a survey is applicable. However, mold inspection is not a required part of a Phase I ESA evaluation under the ASTM Standard.

---

<sup>9</sup> <https://www.conservation.ca.gov/calgem/Pages/Oil-and-Gas.aspx>

### **11.0 LEAD SCREENING EVALUATION**

No records of structures were identified for the subject property. The potential for lead-based paints and for lead-based paints and products leaching into the soil is considered low. We are not certified lead experts and lead inspection is not a required part of a Phase I ESA evaluation under the ASTM Standard.

### **12.0 ASBESTOS SCREENING EVALUATION**

No records of structures were identified for the subject property. We are not certified asbestos experts and asbestos inspection of building materials, and intact structures are not a required part of a Phase I ESA evaluation under the ASTM Standard. However, the potential for asbestos containing building material leaching into the soil associated with demolished structures is considered low.

### **13.0 RADON GAS ASSESSMENT**

Radon gas emissions from the natural breakdown of elements in soil is a concern in many areas around the country. In particular, Radon gas can buildup in confined spaces such as tunnels and basements. A survey of the subject property was not conducted, but a review based on government data was performed. The area in question is listed on the US EPA Radon Check Map as having 5 local tests having been historically performed. One-hundred percent of those tests were  $<4.0\text{pCi/L}$ , indicating, indicating a low to moderate potential for Radon. Based on this low potential, Radon is not a significant concern for the subject property.

### **14.0 PER- AND POLYFLUOROALKYL SUBSTANCES**

Per- and Polyfluoroalkyl Substances (PFAS) are hazardous substances considered “Non-Scope” and are not a required part of a Phase I ESA evaluation under the ASTM Standard because they are currently defined as an “emerging contaminant”. Potential sources of PFAS were considered during the investigation, which include industrial manufacturing facilities where PFAS-containing products are synthesized, areas where fluorine-containing Class B firefighting foams are stored, used, or released, waste management facilities such as landfills, and wastewater treatment for industrial wastewater discharge. Based on the history of the subject property as undeveloped land turned into a college campus, PFAS are not an environmental concern for the Site.

### **15.0 VEC & VAPOR INTRUSION SCREENING**

Based on our review, the subject property has a low potential for vapor intrusion/encroachment risk.

## 16.0 DISCOVERIES & FINDINGS

- The Site consists of an approximately 66,000 square foot project area within the Cosumnes River College (CRC) campus parent site. The Site consists of manicured lawn surrounded by trees in the recreational area of campus which is proposed to be converted into beach volleyball courts.
- Based on the historical aerial photographs and topographic maps, the subject property parent site was undeveloped land from at least 1894 to 1972, when the Site appears developed as the current Cosumnes River College campus; aerial photographs indicate the subject property was undeveloped land from at least 1894 to present.
- The subject property parent site parcel is identified in several databases searched by EDR. EDR databases report three (3) underground storage tanks (USTs) removed under regulatory closure, three (3) active USTs subject to Sacramento County Environmental Management monitoring and reporting, and the campus listed as a Large Quantity Generator, with no violations reported. Facilities reviewed are not within 500 feet of the 66,000 square foot subject property.
- There is an oil and gas field (Freeport Gas) located approximately one mile west of the subject property.

## 17.0 PROFESSIONAL OPINIONS

- The Site consists of an approximately 66,000 square foot project area within the Cosumnes River College (CRC) campus parent site. The Site consists of manicured lawn surrounded by trees in the recreational area of campus which is proposed to be converted into beach volleyball courts. No RECs were observed during the Site reconnaissance dated February 2, 2023.
- Based on the historical aerial photographs and topographic maps, the subject property parent site was undeveloped land from at least 1894 to 1972, when the parent site appears developed as the current Cosumnes River College campus; aerial photographs indicate the subject property was undeveloped land from at least 1894 to present. No RECs were observed associated with the historical photographs and topographic maps.
- The subject property parent site parcel is identified in several databases searched by EDR. EDR databases report three (3) underground storage tanks (USTs) removed under regulatory closure, three (3) active USTs subject to Sacramento County Environmental Management monitoring and reporting, and the campus listed as a Large Quantity Generator, with no violations reported. Facilities reviewed are not within 500 feet of the 66,000 square foot subject property. Based on the distance from the subject property and/or the regulatory status, the EDR database information reported are not considered a REC to the Site.

## **18.0 FINAL CONCLUSIONS**

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 for the approximately 66,000 square foot subject property within the Cosumnes River College “parent site” located at 8401 Center Parkway, City of Sacramento, Sacramento County, with the APN: 117-0140-044. Any exceptions to, or deletions from, this practice are described in the Limitations Section of this report. This assessment has not identified any recognized environmental conditions (RECs) in connection with the subject property.

## **19.0 RECOMMENDATIONS**

No further investigation is recommended at this time.

## **20.0 SPECIFIC DEVIATIONS**

This Phase I ESA report is a modified version based on DTSC discussions to focus on a specific smaller working area, within the context of a larger site, in order to achieve a streamlined approach and focus to environmental review and due diligence for a sub-set area within the boundaries of a larger campus property. This deviation from the typical ASTM standard should be noted. This is considered to be a deviation from the typical ASTM standard.

## **21.0 ADDITIONAL SERVICES**

No additional services were provided.

## 22.0 QUALIFICATIONS OF PETRALOGIX ENVIRONMENTAL PROFESSIONALS

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### **STANDARD ENVIRONMENTAL RECORDS**

#### ***Lists of Federal RCRA generators***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/21/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>ELK GROVE USD</i></b> EPA ID:: CAD981433642	<b><i>6300 ENRHARDT</i></b>	<b><i>WNW 0 - 1/8 (0.086 mi.)</i></b>	<b><i>B19</i></b>	<b><i>175</i></b>

#### ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/24/2022 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Lists of state and tribal registered storage tanks***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Hazardous waste / Contaminated Sites***

CERS HAZ WASTE: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

A review of the CERS HAZ WASTE list, as provided by EDR, and dated 01/05/2023 has revealed that there is 1 CERS HAZ WASTE site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>VALLEY HIGH SCHOOL</b>	<b>6300 EHRHARDT AVE</b>	<b>WNW 0 - 1/8 (0.086 mi.)</b>	<b>B18</b>	<b>167</b>

#### ***Local Lists of Registered Storage Tanks***

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **Other Ascertainable Records**

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/21/2022 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Program: UST  
Violation Source: CERS,

Site ID: 390658  
Site Name: COSUMNES RIVER COLLEGE  
Violation Date: 09-20-2017  
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 10/05/2017. Observation: Per review of the facility used oil hazardous waste disposal documentation, the facility accumulated used oil on site for greater than 180 days for the period from April 26, 2016 to June 6, 2017. Correction: Submit written documentation explaining how the facility will not accumulate hazardous wastes on site greater than the allowed generator status accumulation time allowed by regulation.

Violation Description: Failure to submit the Underground Storage Tank Statement of Understanding and Compliance Form.

Violation Notes: Returned to compliance on 05/31/2022. OBSERVATION: The Underground Storage Tank Statement of Understanding and Compliance Form in the California Environmental Reporting System list Walton Engineering as the Operator in the Relations to Underground Storage Tank(s) section. This section only requires either the Owner box or the Operator box to be checked and in both cases Cosumnes River College is the owner and operator. CORRECTIVE ACTION: Update and submit the Underground Storage Tank Statement of Understanding and Compliance Form in the California Environmental Reporting System. NOTE: This violation applies to all three tank systems onsite. NOTE: This is a repeat violation. Facility has 14 days to comply. NOTE: Please notify Brion McGinness at mcginnessb@saccounty.net following correction of this violation.

Violation Date: 04-17-2018  
Citation: 23 CCR 16 2665 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2665  
Violation Description: Failure to comply with one or more of the following: Failure to install or maintain a liquid-tight spill bucket. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill bucket/spill container. Be resistant to galvanic corrosion.  
Violation Notes: Returned to compliance on 06/07/2018. OBSERVATION: Upon testing the 87 tank direct bury spill container, it failed the one hour hydrostatic test. The service technician declared the test a fail. Spill containers must be able to contain five gallons of liquid to prevent any product from entering the subsurface. CORRECTIVE ACTION: The failed 87 tank direct bury spill container must be replaced by obtaining a permit from our department. Immediately hire a properly licensed contractor and submit a permit application to replace the failed 87 tank direct bury spill container.

Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Returned to compliance on 10/05/2017. Observation: A hazardous waste accumulation container of waste flammable paint thinner observed in a flammable storage cabinet behind the paint shed was missing a hazardous waste label. A hazardous waste accumulation container of waste contaminated vinegar observed in the biology lab was missing proper hazardous waste labeling. Various hazardous waste accumulation containers in the biology and chemistry labs were either missing the generator name/address or the hazardous properties. All hazardous waste accumulation containers are required to be labeled with the words 'Hazardous Waste,' the generator name and address, the physical state of the waste, the hazardous properties of the waste, the contents/composition, and the container accumulation start date. Correction: Properly label each of the hazardous waste accumulation containers listed above and submit photo documentation to EMD Specialist Ryan Artz showing correction.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overflow prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overflow prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overflow prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 05/02/2019. OBSERVATION: Overflow Prevention Inspection has not been completed and submitted. This inspection is required every 36 months as of October 13, 2018. CORRECTIVE ACTION: Hire a properly certified and licensed professional to complete the overflow prevention inspection. Submit the results to [mccormackz@saccounty.net](mailto:mccormackz@saccounty.net) within 30 days. NOTE: These forms can be found on <https://www.waterboards.ca.gov/ust/forms/>

Violations:

Site ID: 405797  
Site Name: Verizon Wireless Cosumnes  
Violation Date: 08-30-2017  
Citation: HSC 6.95 Multiple - California Health and Safety Code, Chapter 6.95, Section(s) Multiple  
Violation Description: Business Plan Program - Administration/Documentation - General  
Violation Notes: Returned to compliance on 08/31/2017. OBSERVATION: The facility does not have a current permit for hazardous materials storage/handling. CORRECTIVE ACTION: Immediately pay all permit fees to this department to obtain a new or renewed hazardous materials storage permit and maintain that permit as active as long as the facility is in operation and continues to store/handle hazardous materials.  
Violation Division: Sacramento County Env Management Department  
Violation Program: HMRRP  
Violation Source: CERS,

Site ID: 405797  
Site Name: Verizon Wireless Cosumnes  
Violation Date: 11-13-2014  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.  
Violation Notes: OBSERVATION: The CERS Plan chemical inventory has Northstar type batteries recorded and entered for the site. C&D type batteries are the actual units existing on site (24 units at 5 gallons electrolyte each).CORRECTIVE ACTION: Update Chemical inventory forms for items listed above electronically in this department's e-Reporting Portal or in the California Environmental Reporting System.  
Violation Division: Sacramento County Env Management Department  
Violation Program: HMRRP  
Violation Source: CERS,

Evaluation:

Eval General Type: Compliance Evaluation Inspection

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Lists of Federal NPL (Superfund) sites***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: N/A
Date Made Active in Reports: 11/15/2022	Last EDR Contact: 01/03/2023
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/10/2023
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Lists of Federal Delisted NPL sites***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/27/2022

## ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 08/25/2022  
Date Data Arrived at EDR: 09/06/2022  
Date Made Active in Reports: 12/05/2022

Next Scheduled EDR Contact: 04/10/2023  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 04/24/2023  
Data Release Frequency: Quarterly

## ***Lists of Federal CERCLA sites with NFRAP***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/27/2022	Source: EPA
Date Data Arrived at EDR: 11/01/2022	Telephone: 800-424-9346

## ***Lists of Federal RCRA TSD facilities***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023

## ***Lists of Federal RCRA generators***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022
Number of Days to Update: 14	Next Scheduled EDR Contact: 04/03/2023
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/21/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/21/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 12/05/2022	Last EDR Contact: 12/21/2022

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/02/2022	Source: Department of the Navy
Date Data Arrived at EDR: 11/08/2022	Telephone: 843-820-7326
Date Made Active in Reports: 01/10/2023	Last EDR Contact: 11/01/2022
Number of Days to Update: 63	Next Scheduled EDR Contact: 02/20/2023
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 08/15/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/17/2022	Telephone: 703-603-0695
Date Made Active in Reports: 10/24/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 68	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 08/15/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/17/2022	Telephone: 703-603-0695
Date Made Active in Reports: 10/24/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 68	Next Scheduled EDR Contact: 03/06/2023
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal ERNS list***

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/12/2022

Source: National Response Center, United States Coast Guard

Date Data Arrived at EDR: 12/14/2022

Telephone: 202-267-2180

Date Made Active in Reports: 12/19/2022

Next Scheduled EDR Contact: 04/03/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal (Superfund) equivalent sites***

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 10/24/2022

Source: Department of Toxic Substances Control

Date Data Arrived at EDR: 10/24/2022

Telephone: 916-323-3400

Date Made Active in Reports: 01/12/2023

Last EDR Contact: 01/24/2023

Number of Days to Update: 80

Next Scheduled EDR Contact: 05/08/2023

Data Release Frequency: Quarterly

## ***Lists of state- and tribal hazardous waste facilities***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 10/24/2022

	Data Release Frequency: Quarterly

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Brownfield lists***

##### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 02/23/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/10/2022	Telephone: 202-566-2777

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/25/2022	Source: DTSC and SWRCB

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

	Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 08/30/2019	Source: Department of Energy

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST\_HANDLING\_INSTR), Non-hazardous waste description (NON\_HAZ\_WASTE\_DESCRIPTION), DOT printed information (DOT\_PRINTED\_INFORMATION), Waste line handling instructions (WASTE\_LINE\_HANDLING\_INSTR), Waste residue comments (WASTE\_RESIDUE\_COMMENTS).

## PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

## PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

## PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

## PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

## AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

Data Release Frequency: Quarterly

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/08/2022	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/08/2022	Telephone: 860-424-3375
Date Made Active in Reports: 10/21/2022	Last EDR Contact: 11/16/2022
Number of Days to Update: 74	Next Scheduled EDR Contact: 02/20/2023
	Data Release Frequency: No Update Planned

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

COSUMNES RIVER COLLEGE  
8401 CENTER PKWY  
SACRAMENTO, CA 95823

### TARGET PROPERTY COORDINATES

Latitude (North):	38.45348 - 38° 27' 12.53"
Longitude (West):	121.422514 - 121° 25' 21.05"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	637649.3
UTM Y (Meters):	4257103.5
Elevation:	27 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	12021599 FLORIN, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06067C0308H	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06067C0305H	FEMA FIRM Flood data
06067C0309H	FEMA FIRM Flood data

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
FLORIN	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### ***Site-Specific Hydrogeological Data\*:***

Search Radius:	1.25 miles
Status:	Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: GALT

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
2	12 inches	31 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:
3	31 inches	59 inches	cemented	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	Not reported	Max: 0.01 Min: 0	Max: Min:

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

**Soil Map ID: 2**

Soil Component Name: SAN JOAQUIN

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

## OTHER STATE DATABASE INFORMATION

### Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

### California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

## RADON

### State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

## EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Petralogix were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

### UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

*The Sanborn Library LLC Since 1866™*

### Limited Permission To Make Copies

Petralogix (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

# EDR Environmental Lien and AUL Search

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

***Thank you for your business.***

Please contact EDR at 1-800-352-0050  
with any questions or comments.

RESOLUTION NO. 67-6

A RESOLUTION AUTHORIZING ACCEPTANCE OF DEEDS  
AND EXECUTION OF AGREEMENT

WHEREAS, the LOS RIOS JUNIOR COLLEGE DISTRICT OF SACRAMENTO, EL DORADO, PLACER, SOLANO and YOLO COUNTIES, a political subdivision of the State of California, in compliance with law, heretofore purchased the following described parcels of land for use as a site for a junior college to be constructed by said District, the sellers of the parcels purchased being Valley-Hi Venture, a partnership composed of Western Enterprises, Inc., a California corporation, and Northern California Developers, Inc., a California corporation, as to Parcel No. 1; C. L. Bowman & Associates, Inc., a corporation, as to Parcel No. 2; and Valley-Hi Associates, a partnership composed of Western Enterprises, Inc., a California corporation, Lentz Land Corporation, a California corporation, Phillip C. Wilkins, J. T. McDermott, American Title Company Inc., and Wesley E. Scott, as to Parcel No. 3; said parcels being described, respectively, as follows:

Parcel No. 1: All that portion of the Southwest one-quarter of Section 15, Township 7 North, Range 5 East, M.D.B.&M., more particularly described as follows:

Beginning at the corner common to Sections 15, 16, 21 and 22 as said corner is shown on that certain Record of Survey entitled "Portion of Sections 10 and 15T.7N., R.5E., M.D.B.&M.", recorded in the office of the Recorder of Sacramento County in Book 14 of Surveys, Map No. 24; thence, from said point of beginning and along the West line of said Section 15, North 00°01'51" East, 1345.72 feet and North 00°18'31" West, 159.15 feet to the Southwest corner of that certain tract of land described in the deed executed by Valley-Hi Venture, a partnership, to the State of California, recorded in the office of said Recorder in Book 66-05-26 of Official Records at page 11; thence, along the boundary of the State of California property the following seven (7) courses and distances: (1) North 81°29'00" East 477.43 feet, (2) North 84°28'52" East 12.82 feet, (3) North 80°09'48" East, 354.16 feet, (4) North 81°21'00" East, 380.01 feet, (5) North 84°53'22" East, 485.93 feet, (6) North 04°53'26" East, 553.50 feet and (7) North 89°30'12" East, 6.99 feet to the East line of that certain tract of land designated

"Western Enterprises 384.987 Acres", on said Record of Survey; thence, along said East line, South  $00^{\circ}29'48''$  East, 1231.19 feet to the Southeast corner thereof and the South line of said Section 15; thence, along said South line, South  $02^{\circ}10'10''$  West, 2614.57 feet to the point of beginning, containing 398.444 acres, more or less.

Parcel No. 2: All that portion of the Northwest one-quarter of Section 22, Township 7 North, Range 5 East, M. D. B. & M., and that portion of Lot 41 of Ehrhardt Acres, according to the official plat thereof, filed in the office of the Recorder of Sacramento County, California, on June 28, 1911, in Book 12 of Maps, Map No. 24, described as follows:

Beginning at the corner common to Sections 15, 16, 21 and 22 as said corner is shown on that certain Record of Survey entitled "Portion of Sections 10 and 15 T. 7N., R. 5E., M. D. B. & M.", recorded in the office of the Recorder of Sacramento County in Book 14 of Surveys, Map No. 24; thence, from said point of beginning and along the North line of said Section 22, North  $89^{\circ}10'10''$  East, 2644.57 feet to the Northeast corner of the Northwest one-quarter of said Section 22; thence, along the East line of said Northwest one-quarter South  $00^{\circ}44'23''$  East, 1006.91 feet; thence, South  $89^{\circ}30'12''$  West, 2284.97 feet; thence North  $21^{\circ}00'16''$  West, 957.37 feet; thence, along the arc of a curve to the right having a radius of 1000.00 feet, said arc being subtended by a chord which bears North  $18^{\circ}09'13''$  West, 99.47 to the North line of said Section 21; thence, along said North line, North  $89^{\circ}28'34''$  East, 1.74 feet to the point of beginning, containing 56.645 acres, more or less.

Parcel No. 3: All that portion of the Southeast one-quarter of Section 16, Township 7 North, Range 5 East, M. D. B. & M., more particularly described as follows:

Beginning at the corner common to Sections 15, 16, 21 and 22 as said corner is shown on that certain Record of Survey entitled "Portion of Sections 10 and 15 T. 7N., R. 5E., M. D. B. & M.", recorded in the office of the Recorder of Sacramento County in Book 14 of Surveys, Map No. 24; thence, from said point of beginning and along the South line of said Section 16, South  $89^{\circ}28'34''$  West 1.74 feet; thence, leaving said South line and along the arc of a curve to the right having a radius of 1000.00 feet, said arc being subtended by a chord which bears North  $12^{\circ}19'48''$  West, 103.72 feet; thence North  $09^{\circ}21'27''$  West, 174.74 feet to a point on the South boundary of that certain tract of land described as Parcel No. 3 in the deed executed by H. H. H. Associates, a partnership, to the State of California, recorded in the office of said Recorder in Book 66-05-26 of Official Records at Page 7; thence, along the Southerly boundary of the State of California property the following four (4) courses and distances: (1) North  $80^{\circ}37'46''$  East, 50.00 feet, (2) North  $01^{\circ}56'22''$  East, 280.44 feet, (3) North  $61^{\circ}43'01''$  East, 98.15 feet

20131

and (4) North 81°29'00" East, 53.24 feet to the Southwest corner of that certain tract of land described in the deed executed by Valley-Hi Venture, a partnership, to the State of California, recorded in the office of said Recorder in Book 66-05-26 of Official Records at Page 11, and the East line of said Section 16; thence, along said East line, South 00°18'31" East, 159.16 feet and South 00°01'51" West, 1345.72 feet to the point of beginning containing 3.824 acres, more or less.

WHEREAS, Parcel No. 2, above described, is presently encumbered with a utility easement and structures thereon used for the purpose of the transmission of electrical energy owned by the PACIFIC GAS AND ELECTRIC COMPANY, and pursuant to the purchase of the above-described parcels of real property by the LOS RIOS JUNIOR COLLEGE DISTRICT it is necessary to enter into an agreement between said District and said PACIFIC GAS AND ELECTRIC COMPANY and the sellers above described under which the said electrical energy transmission improvements will be removed and relocated to another location and said utility easement extinguished and quitclaimed to said District; and

WHEREAS, the above-described sellers have made, executed, acknowledged and delivered to said District their grant deeds to the above-described parcels of land dated February 20, 1967, conveying the above-described real property to said District;

NOW, THEREFORE, BE IT RESOLVED AND IT IS HEREBY RESOLVED by the Governing Board of the LOS RIOS JUNIOR COLLEGE DISTRICT OF SACRAMENTO, EL DORADO, PLACER, SOLANO and YOLO COUNTIES, a political subdivision of the State of California, that said grant deeds be, and the same are hereby approved and delivery thereof accepted by this Governing Board for and on behalf of said LOS RIOS JUNIOR COLLEGE DISTRICT, and that the Clerk of said District be, and he is hereby authorized and directed to evidence the acceptance by this Board of the delivery of said deeds by attaching thereto copies of this Resolution, and by recording said deeds and resolution in the office of the County Recorder of the County of Sacramento, State of California.

BE IT FURTHER RESOLVED that the Chairman of this Board is authorized, and he is hereby directed to execute in the name and in behalf of the LOS RIOS JUNIOR COLLEGE DISTRICT an agreement by and between the LOS RIOS JUNIOR COLLEGE DISTRICT and the PACIFIC GAS AND ELECTRIC COMPANY and the sellers of the parcels of land above described providing for the removal and relocation of the electrical energy transmission improvements situated upon Parcel No. 2 above described and the extinguishment of the above-described utility easement situated thereon, in accordance with the terms and form of that certain agreement annexed hereto as Exhibit "A".

IN WITNESS WHEREOF, we, the members of the Governing Board of LOS RIOS JUNIOR COLLEGE DISTRICT OF SACRAMENTO, EL DORADO, SACER, SOLANO and YOLO COUNTIES, have hereunto set our hands this 15th day of March, 1967.

Clerk of the Board

EXHIBIT "A"

THIS AGREEMENT entered into this 15 day of March, 1967, by and between VALLEY-HI ASSOCIATES, a partnership composed of WESTERN ENTERPRISES, a partnership; LENTZ LAND CORP., a corporation; PHILIP C. WILKINS, S. W. MOORE, JR., AMERICAN TITLE CO., INC. and WESLEY B. SCOTT; VALLEY-HI VENTURE, a partnership composed of WESTERN ENTERPRISES, a partnership and NORTHERN CALIFORNIA DEVELOPMENT INC., a corporation; G. L. DOWMAN & ASSOCIATES, INC., a corporation; and the LOS RIOS JUNIOR COLLEGE DISTRICT, hereinafter called "first party," and PACIFIC GAS AND ELECTRIC COMPANY, hereinafter called "second party,"

W I T N E S S E T H:

WHEREAS, first party contemplates construction of the Los Rios Junior College in the vicinity of State Highway 148 and Center Parkway, Sacramento County, California; and

WHEREAS, second party maintains certain encumbrances for electric transmission facilities (Big Bend-Croyton 115 kv Tower Line) hereinafter called "facilities," which will interfere with first party's project; and

WHEREAS, first party has requested and second party is willing to rearrange said facilities to eliminate such interference;

NOW, THEREFORE, it is hereby mutually agreed as follows:

1. Upon the receipt by second party of notice in writing from first party, second party will commence and thereafter diligently prosecute the rearrangement of its facilities as nearly as possible in accordance with the drawing attached hereto and marked Exhibit "A", provided, however, that second party shall not be obligated to

20131

perform such work until it has acquired necessary land with form satisfactory to second party for any of second party's facilities which must be replaced in a new location.

2. In the event the construction of temporary facilities is necessary, second party may use lands owned or controlled by first party for the purpose of making such temporary installation provided first party shall have approved the location thereof. Upon completion of construction of such facilities in their permanent location, second party shall remove all temporary facilities.
3. Upon the completion of the work, first party shall reimburse second party for the actual net cost which second party has incurred in effecting the arrangement of its facilities including costs, if any, involved in any temporary rearrangement. The actual net cost is presently estimated to be \$41,000.
4. First party will pay second party, in addition to the cost as provided for in paragraph 3 the amount of \$6,000 to compensate second party for the capitalized cost of ownership of the additional facilities required by the requested relocation.
5. First party shall convey or cause to be conveyed to second party all necessary land or land rights in a form satisfactory to second party to permit second party to install its facilities in a new location or reimburse second party for its costs incurred in acquiring such land or land rights. Two copies each of the necessary land rights are attached for execution. Second party will

convey or quitclaim to first party its land or land rights occupied by facilities to be abandoned or removed within the land or rights of way required by first party for the construction of its project.

6. Second party shall have such interference eliminated on or about *August 1, 1968* provided that (1) the existing Sacramento Municipal Utility District's pole line be eliminated within the area of second party's new alignment, (2) this agreement be fully executed by *MARCH 15* January 1, 1967, and (3) the necessary men and materials are available.

7. Actual cost will be determined in accordance with the uniform systems of account prescribed for utility companies by the Public Utilities Commission of the State of California or second party's regularly established accounting practices and will include, but will not be limited to, the following charges: Surveying costs, acquisition of land rights, labor and payroll taxes, materials and supplies, transportation, storage and fuel expense, depreciation and overheads, and an allowance for contractor's compensation and public liability and property damage insurance. First party will be allowed credit for salvage and depreciation in our itemized invoice.

8. Within thirty (30) days after receipt of second party's invoice for the amount due second party hereunder, first party shall reimburse second party for the amount billed, provided, however, that first party shall have reasonable access to second party's accounts and records for the purpose of auditing said invoice.

*Handwritten notes and initials:*  
OK  
GWS  
284

20131

9. The provisions hereof shall inure to the benefit of and shall run with the land and shall bind the heirs, assigns and successors of the parties hereto.

IN WITNESS WHEREOF, the parties have executed this Agreement by their duly authorized officers this day and year first hereinabove set forth.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

# EDR BUILDING PERMIT REPORT

## About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

## ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

## Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

## EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Petralogix on Jan 26, 2023.

### TARGET PROPERTY

8401 CENTER PKWY  
Sacramento, CA 95823

### SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

### RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## GLOSSARY

### General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

## GLOSSARY

### Permit Content Definitions

- **Permit Number:** The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

### Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

## **APPENDIX F**

PHASE I ENVIRONMENTAL SITE ASSESSMENT - USER QUESTIONNAIRE

ASSESSOR PARCEL NUMBER:

117-0140-044-0000

CITY OF SACRAMENTO, CALIFORNIA

Petralogix Engineering, Inc. is preparing a Phase I Environmental Site Assessment (Phase I ESA) for the above referenced property in order to assess the potential of onsite items which may be considered as Recognized Environmental Condition or Concern (RECs).

A Recognized Environmental Condition or Concern (REC) is one of the terms used to identify environmental liability within the context of a Phase I Environmental Site Assessment. ASTM defines the recognized environmental condition in the E1527-21 standard as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment". De minimis conditions are not recognized environmental conditions.

We ask that you complete the following questionnaire and email it to [tscheftner@petralogix.com](mailto:tscheftner@petralogix.com). We will include this in the Phase I ESA report as an appendix. We appreciate your time and encourage you to call us at 209-770-0731 with any questions about this or any of the items contained with this document.

REQUIRED QUESTIONS

Please provide the following information to our firm in order to qualify for the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"). Failure to provide this information could result in a determination that "all appropriate inquiry" was not completed. Any information that is falsely recorded, or knowingly is wrong, could also lead to an incomplete defense. For this reason, if an area is unclear or if there is a possibility that further clarification could be presented by another person, then call our firm at 209-770-0731 to discuss.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                      | No                                  |                                     |
| 2. Activity and land use limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).                                                                                                                                                                                                                                                                                                                                       |                          |                                     |                                     |
| Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?<br><i>(If yes, please discuss and attach relevant documentation.)</i>                                                                                                                                                                    | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                                     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                          |                                     |                                     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                      | No                                  |                                     |
| 3. Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).                                                                                                                                                                                                                                                                                                                                                                        |                          |                                     |                                     |
| As the user of this Environmental Site Assessment do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?<br><i>(If yes, please discuss and attach relevant documentation.)</i> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |                                     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                          |                                     |                                     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                      | No                                  | N/A                                 |
| 4. Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).                                                                                                                                                                                                                                                                                                                                                 |                          |                                     |                                     |
| a. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?                                                                                                                                                                                                                                                                                                                                                           | <input type="checkbox"/> | <input type="checkbox"/>            | <input checked="" type="checkbox"/> |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                          |                                     |                                     |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Yes                      | No                                  | N/A                                 |

b. If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

*(If yes, please discuss and attach relevant documentation, if any.)*

5. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Yes No

Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases?

For example, as user,

a. Do you know the past uses of the property?

*(If yes, please discuss and attach relevant documentation, if any.)*

b. Do you know of specific chemicals that are present or once were present at the property?

*(If yes, please discuss and attach relevant documentation, if any.)*

c. Do you know of spills or other chemical releases that have taken place at the property?

d. Do you know of any environmental cleanups that have taken place at the property?

Yes No

6. The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

ADDITIONAL QUESTIONS

The following additional questions will assist the environmental professional in preparation of the Phase I ESA report.

1. Why have you requested this Phase I ESA?
- To qualify for Landowner Liability Protection
  - Other Reason (please specify) Installing sand volleyball courts

2. What is your relationship to the subject property?
- Buyer                       Lender
  - Seller                       Other Facility Director

3. a. What type is the subject property?
- Commercial     Agricultural     Vacant
  - Residential     Industrial     Other school

b. What type of transaction is involved?

4. Provide the complete and correct address of the property (if not indicated on page 1).

5. Are you aware of any former addresses or previous assessor's parcel numbers (APNs) for the subject property? Include previous addresses/APNs even if subject property was split from a larger parcel. *(If yes, please discuss.)*

Yes    No

6. Do you have any other knowledge or experience with the property that may be pertinent to this investigation (for example, copies of previous environmental assessments, correspondence, etc. concerning the property and its environmental condition)? *(If yes, please discuss and attach relevant documentation, if any.)*

7. What is the proposed future use of the subject property?

8. Identify all additional parties who will rely on the Phase I ESA report (if any).

9. Identify the site contact and how the contact can be reached.

Name: *Chris Raines*

Address: *4401 Center Parkway*

Phone: *916-691-7257*

Relationship to property: ~~Director~~ *Director of Admin Serv*

DOCUMENTS/PROCEEDINGS

The following questions refer to documents or proceedings with regard to the subject property of which the user may be aware.

	Yes	No	Copies to be provided?
1. Available Documents Are you aware of the existence of any of the following documents for the subject property? <i>If so, please indicate whether you can provide copies of those documents to this office within reasonable time and cost constraints.</i>			
a. Environmental site assessment reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Environment compliance audit reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Registrations for underground and above-ground storage tanks	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Registrations for underground injection systems	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f. Material safety data sheets	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
g. Community right-to-know plan	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
h. Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
i. Reports regarding hydrogeological conditions on the property or surrounding area	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
j. Notices or other correspondence from any government agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Yes	No	Copies to be provided?
k. Hazardous waste generator notices or reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
l. Geotechnical studies	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
m. Risk assessments	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
n. Recorded Activity and Use Limitations (AULs)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

2. Proceedings Involving the Property

Are you aware of any of the following related to the subject property?  
(If so, please attach relevant documentation.)

- |                                                                                                                                                                                  |                          |                                     |                          |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-------------------------------------|--------------------------|
| a. Any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?                                              | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| b. Any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property?                               | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| c. Any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

ENDORSEMENT:

As the User of the Phase I Environmental Site Assessment being prepared for the property (or the duly authorized representative of such User), I hereby certify that to the best of my knowledge, information, and belief the information disclosed above is true and correct.
