INTRODUCTION

The client referenced above retained Magnolia Environmental to perform an asbestos-containing material (ACM) survey to investigate the subject property prior to demolition. The survey included the sampling of suspect asbestos containing materials, and a visual assessment of the interior spaces at the subject property. Andrea Pulsipher, Cal- OSHA Certified Asbestos Consultant (CAC) No. 17- 5929, performed the on-site survey on February 12, 2021.

Magnolia Environmental report is for the exclusive use of our client referenced above and applies only to the structures referenced above or portion thereof. No one other than our client or those contracted by our client may utilize, reference, or otherwise rely on this report without prior written consent from Magnolia Environmental.

PURPOSE AND SCOPE

The purpose of this investigation is to perform a hazardous asbestos materials survey in order to aid our client referenced above in investigating the subject property prior to demolition. Magnolia Environmental scope of work included:

- A visual reconnaissance of the impacted area on property to evaluate the possible presence of ACM.
- Collection of bulk samples of suspect ACM and submittal of samples to a NVLAP accredited laboratory for analysis.
- Assessment of the condition of potential ACM.
- Preparation of this report, which presents our data and summarizes the assessed materials.

METHODS

A. ASBESTOS

Suspect asbestos materials are sampled and later identified using the Polarized Light Microscopy (PLM) method in accordance with the EPA Interim method of the Determination of Asbestos in Bulk Samples (EPA/600/ R-93/116, July 1993). Sampling was performed in accordance with 40 CFR 763.86. Homogeneous areas were based on the total functional space. Number of samples per homogeneous area was taken as recommended under said section "Sampling Procedures".

The PLM Method is the most commonly used method to analyze building materials for the presence of asbestos. This method utilizes the optical properties of minerals to identify the selected constituent. The use of this method enables identification of the type and the percentage of asbestos in each sample. The detection limit of the PLM method for asbestos identification is about one (1) percent asbestos. Because the State of California recognizes asbestos-containing building material (ACBM) as any material, which contains greater than or equal to one tenth of one percent (.1) asbestos, materials containing "trace" amounts of asbestos are reported as ACBM in the State of California.

Documentation of the laboratory results should be retained as a reference for general building safety and maintenance, and for any future renovation/ demolition activities.

INSPECTION PROCEDURE (763.85)

Areas Inspected: The inspector performed a preliminary walk-through to designate the functional spaces. She also noted which areas had homogeneous materials.

The inspector then visually inspected each accessible room being impacted during the demolition. The inspector touched suspect materials to determine if they were friable. For each suspect material, the inspector noted its condition and the potential for disturbance.

Quantities: Suspect asbestos-containing materials identified at the site were quantified. For general functional space measurements were used. Such measurements provide "approximate square or linear footage" (763.93 (d)(2)(ii)). Suspect Asbestos-Containing Materials: were sampled for laboratory analysis or were visually identified as ACM. Magnolia Environmental collected a total of Twenty Four (24) bulk samples of suspect ACM. The samples were transferred following proper chain of custody protocol to Ecologics Laboratories, located at 2487 E. Orangethorpe Ave. Fullerton, CA 92831, for analysis. Ecologics Laboratories is an accredited laboratory for bulk asbestos analysis under the National Institute of Standards and Technology, National Voluntary Laboratory Accreditation Program (Certification Number 600190-0).

RESULT**A. ASBESTOS**

Twenty Four (24) bulk samples were taken using polarized light microscopy (PLM). The following table summarizes the results of the sample analysis and of the visual assessment. A complete list of sample results can be found in the laboratory sheets at the end of this report.

TABLE I: ACM RESULTS

MTL #	Material Description	Sample Location	F/NF ¹	Cond. ²	%ACM ³	# Samples	Est. Quantity
01	Acoustic Ceiling	Acoustic ceiling sampled from 6012 and 6014	F	G	0%	3	1,040 SF
02	Plaster	Plaster sampled from 6012 and 6014	NF	G	0%	3	1,040 SF
03	Black Mastic	Black mastic sampled from 6012	NF	G	3%	3	760 SF
04	Blue/Grey 12"x12" Floor Tile and Mastic – First Layer Flooring	Blue/Grey 12"x12" floor tile and mastic sampled from 6014	NF	G	0%	3	510 SF
04	Black/Yellow Mastic Associated with First Layer Flooring	Black/Yellow mastic associated with the first layer blue/grey 12"x12" floor tile and mastic sampled from 6014	NF	G	3%	3	510 SF
05	12"x12" Floor Tile and Mastic – Second Layer Flooring	12"x12" Floor tile mastic sampled from 6014	NF	G	0%	3	510 SF
06	Stucco	Stucco sampled from the exterior of the property	NF	G	0%	3	1,340 SF
07	Black/Grey Rolled Roofing	Black/Grey rolled roofing sampled from the roof of the property	NF	G	0%	3	1,340 SF
08	Roofing Penetration Mastic	Roofing penetration mastic sampled from the roof penetrations	NF	G	0%	3	15 SF
09	Duct Mastic	Duct mastic sampled from the roof ducting	NF	G	0%	3	6 SF

¹-F=Friable; NF= Non-Friable

²-Cond = condition of Materials. Either good (G), damaged (D), or significantly damaged (SD)

³- <1% = Calif. Code of Regulation, Title 8, Section 1529. "asbestos-containing construction" material means any manufactured construction material which contains more than one-tenth of 1 percent asbestos by weight. This material will be abated as asbestos containing material; however, it may be disposed of as construction debris.

*See the laboratory report and chain custodies for the complete list materials tested and the sampling locations.

**Should the demolition/renovation process reveal any additional suspect asbestos-containing materials; work must stop until the suspect materials are tested for asbestos content.

CONCLUSION / RECOMMENDATIONS

A. ASBESTOS

According to bulk sampling and visual inspection of impacted areas, asbestos-containing materials were present in the following materials sampled:

- Black mastic
- Black/Yellow Mastic Associated with the First Layer Flooring (Blue/Grey 12"x12" Floor Tile)

Abatement by a licensed abatement contractor is recommended prior to disturbance of asbestos containing materials.

It is always necessary to comply with the pertinent provisions of EPA, OSHA and AQMD regulations during any removal or repair activities that may disturb the asbestos-containing materials that may have been inaccessible and or untested during the survey. Not all areas of the home were tested, only impacted areas. Caution should be taken when inaccessible and untested areas are disturbed.

The Environmental protection Agency (EPA) and California OSHA (Cal/OSHA) define materials which contain more than one percent asbestos to be asbestos containing materials (ACM). In addition, Cal/OSHA defines any manufactured construction material more than 0.1% asbestos as asbestos-containing construction materials (ACCMs). Cal/OSHA also requires notification and registration of the contractor when disturbing materials with more than one-tenth of one percent asbestos and regulates worker protection whenever materials containing any detectable levels of asbestos are disturbed.

LIMITATIONS

Magnolia Environmental prepared this asbestos survey for the client referenced above. No warranties expressed or implied, are made by Magnolia Environmental or its employees as to the use of any information, apparatus, product or process disclosed in this report. Though reasonable efforts have been made to assure correctness, if a Contractor is employed, he should bring any discrepancies to the immediate attention of Magnolia Environmental.

We have employed state-of-the-art practices to perform this analysis of risk and identification, but this evaluation is severely limited in scope to areas accessible to a visual inspection or through reasonable means of the areas evaluated. No demolition or product review was performed in attempts to reveal material compositions. Our services consist of professional opinions and recommendations made in accordance with generally accepted engineering principles and practices and are designed to provide an analytical tool to assist the client. Magnolia Environmental or those representing Magnolia Environmental bear no responsibility for the actual condition of the structure or safety of a site pertaining to asbestos and/or asbestos contamination regardless of the actions taken by the client.

Magnolia Environmental appreciated having the opportunity to inspect your property. If you have any questions regarding this survey or other environmental hazards, please don't hesitate to contact us at (562) 922-3144 or at Office@Magnoliaenvironmental.com.

Paola Ducoing – Approved by

NAD = no asbestos detected; NA = not analyzed, PS = positive stop; Reporting Limits: CVES = 1%, 400 PT CT = 0.25%, 1,000 PT CT = 0.1%. The analyses of the samples in this report were performed and analyzed in accordance with the procedures outlined in EPA 600/R-93/116 (Method for Determination of Asbestos in Building Materials); EPA 600/M4-82-020 (Interim Method for the Determination of Asbestos in Bulk Insulation Samples) and US Federal Register 40 CFR 763, Subpart F, Appendix A. Samples were analyzed using Calibrated Visual Estimate (CVES), therefore results may not be reliable for samples with low concentration levels or other Non-Friable Organically Bound (NOB) materials. The limit of detection for this analytical method is less than one percent (<1%) and total sample constituents may total greater than 100% due to trace amounts. These results lie within the statistical limits of variability calculated with standard reference materials routinely analyzed in the laboratory. In multi-layer samples, unless otherwise specified, the asbestos concentration is reported for the layer where asbestos is found. This report only relates to the samples that were submitted and Ecologics Lab and its personnel assumes no responsibility and/or are not liable for any misinformation provided by the client such as "sample location" or "sample type." This report may contain specific data not covered by NVLAP and is identified if footnotes are present. This report was issued by Ecologics Lab which is accredited by NVLAP (Lab Code 600190-0) and may not be reproduced except in full, without written approval of this laboratory. This report may not be used by the client to claim product certification, approval or endorsement by NVLAP, NIST or any agency of the Federal Government.

INTRODUCTION

The client referenced above retained Magnolia Environmental to perform an asbestos-containing material (ACM) survey to investigate the subject property prior to demolition. The survey included the sampling of suspect asbestos containing materials, and a visual assessment of the interior spaces at the subject property. Andrea Pulsipher, Cal- OSHA Certified Asbestos Consultant (CAC) No. 17- 5929, performed the on-site survey on February 12, 2021.

Magnolia Environmental report is for the exclusive use of our client referenced above and applies only to the structures referenced above or portion thereof. No one other than our client or those contracted by our client may utilize, reference, or otherwise rely on this report without prior written consent from Magnolia Environmental.

PURPOSE AND SCOPE

The purpose of this investigation is to perform a hazardous asbestos materials survey in order to aid our client referenced above in investigating the subject property prior to demolition. Magnolia Environmental scope of work included:

- A visual reconnaissance of the impacted area on property to evaluate the possible presence of ACM.
- Collection of bulk samples of suspect ACM and submittal of samples to a NVLAP accredited laboratory for analysis.
- Assessment of the condition of potential ACM.
- Preparation of this report, which presents our data and summarizes the assessed materials.

METHODS

A. ASBESTOS

Suspect asbestos materials are sampled and later identified using the Polarized Light Microscopy (PLM) method in accordance with the EPA Interim method of the Determination of Asbestos in Bulk Samples (EPA/600/ R-93/116, July 1993). Sampling was performed in accordance with 40 CFR 763.86. Homogeneous areas were based on the total functional space. Number of samples per homogeneous area was taken as recommended under said section "Sampling Procedures".

The PLM Method is the most commonly used method to analyze building materials for the presence of asbestos. This method utilizes the optical properties of minerals to identify the selected constituent. The use of this method enables identification of the type and the percentage of asbestos in each sample. The detection limit of the PLM method for asbestos identification is about one (1) percent asbestos. Because the State of California recognizes asbestos-containing building material (ACBM) as any material, which contains greater than or equal to one tenth of one percent (.1) asbestos, materials containing "trace" amounts of asbestos are reported as ACBM in the State of California.

Documentation of the laboratory results should be retained as a reference for general building safety and maintenance, and for any future renovation/ demolition activities.

INSPECTION PROCEDURE (763.85)

Areas Inspected: The inspector performed a preliminary walk-through to designate the functional spaces. She also noted which areas had homogeneous materials.

The inspector then visually inspected each accessible room being impacted during the demolition. The inspector touched suspect materials to determine if they were friable. For each suspect material, the inspector noted its condition and the potential for disturbance.

Quantities: Suspect asbestos-containing materials identified at the site were quantified. For general functional space measurements were used. Such measurements provide "approximate square or linear footage" (763.93 (d)(2)(ii)). Suspect Asbestos-Containing Materials: were sampled for laboratory analysis or were visually identified as ACM. Magnolia Environmental collected a total of Twenty Six (26) bulk samples of suspect ACM. The samples were transferred following proper chain of custody protocol to Ecologics Laboratories, located at 2487 E. Orangethorpe Ave. Fullerton, CA 92831, for analysis. Ecologics Laboratories is an accredited laboratory for bulk asbestos analysis under the National Institute of Standards and Technology, National Voluntary Laboratory Accreditation Program (Certification Number 600190-0).

RESULT**A. ASBESTOS**

Twenty Six (26) bulk samples were taken using polarized light microscopy (PLM). The following table summarizes the results of the sample analysis and of the visual assessment. A complete list of sample results can be found in the laboratory sheets at the end of this report.

TABLE I: ACM RESULTS

MTL #	Material Description	Sample Location	F/NF ¹	Cond. ²	%ACM ³	# Samples	Est. Quantity
01	Acoustic Ceiling	Acoustic ceiling sampled from Units A, B, D, G, and H	F	G	0%	5	1,496 SF
02	Plaster	Interior plaster sampled from Units C, D, and G	NF	G	0%	3	4,200 SF
03	Beige Linoleum Flooring	Beige linoleum flooring sampled from the kitchen and bathroom of Unit D, and sampled from Unit A	NF	G	0%	3	600 SF
04	White Linoleum Sheet Flooring	White linoleum sheet flooring sampled from the laundry room	NF	G	0%	3	72 SF
05	Brown Patterned Linoleum Flooring	Brown patterned linoleum flooring sampled from the laundry room	NF	G	0%	3	70 SF
06	Stucco	Stucco sampled from the exterior of the property	NF	G	0%	3	4,600 SF
07	Rolled Roofing	Rolled roofing sampled from the roof of the property	NF	G	0%	3	4,117 SF
08	Roofing Penetration Mastic	Roofing penetration mastic sampled from the roof penetrations	NF	G	0%	3	40 SF

¹-F=Friable; NF= Non-Friable

²-Cond = condition of Materials. Either good (G), damaged (D), or significantly damaged (SD)

³- <1% = Calif. Code of Regulation, Title 8, Section 1529. "asbestos-containing construction" material means any manufactured construction material which contains more than one-tenth of 1 percent asbestos by weight. This material will be abated as asbestos containing material; however, it may be disposed of as construction debris.

*See the laboratory report and chain custodies for the complete list materials tested and the sampling locations.

**Should the demolition/renovation process reveal any additional suspect asbestos-containing materials; work must stop until the suspect materials are tested for asbestos content.

CONCLUSION / RECOMMENDATIONS

A. ASBESTOS

According to bulk sampling and visual inspection of impacted areas, asbestos-containing materials were not present in the materials sampled.

It is always necessary to comply with the pertinent provisions of EPA, OSHA and AQMD regulations during any removal or repair activities that may disturb the asbestos-containing materials that may have been inaccessible and or untested during the survey. Not all areas of the home were tested, only impacted areas. Caution should be taken when inaccessible and untested areas are disturbed.

The Environmental protection Agency (EPA) and California OSHA (Cal/OSHA) define materials which contain more than one percent asbestos to be asbestos containing materials (ACM). In addition, Cal/OSHA defines any manufactured construction material more than 0.1% asbestos as asbestos-containing construction materials (ACCMs). Cal/OSHA also requires notification and registration of the contractor when disturbing materials with more than one-tenth of one percent asbestos and regulates worker protection whenever materials containing any detectable levels of asbestos are disturbed.

LIMITATIONS

Magnolia Environmental prepared this asbestos survey for the client referenced above. No warranties expressed or implied, are made by Magnolia Environmental or its employees as to the use of any information, apparatus, product or process disclosed in this report. Though reasonable efforts have been made to assure correctness, if a Contractor is employed, he should bring any discrepancies to the immediate attention of Magnolia Environmental.

We have employed state-of-the-art practices to perform this analysis of risk and identification, but this evaluation is severely limited in scope to areas accessible to a visual inspection or through reasonable means of the areas evaluated. No demolition or product review was performed in attempts to reveal material compositions. Our services consist of professional opinions and recommendations made in accordance with generally accepted engineering principles and practices and are designed to provide an analytical tool to assist the client. Magnolia Environmental or those representing Magnolia Environmental bear no responsibility for the actual condition of the structure or safety of a site pertaining to asbestos and/or asbestos contamination regardless of the actions taken by the client.

Magnolia Environmental appreciated having the opportunity to inspect your property. If you have any questions regarding this survey or other environmental hazards, please don't hesitate to contact us at (562) 922-3144 or at Office@Magnoliaenvironmental.com.

NAD = no asbestos detected; NA = not analyzed, PS = positive stop; Reporting Limits: CVES = 1%, 400 PT CT = 0.25%, 1,000 PT CT = 0.1%. The analyses of the samples in this report were performed and analyzed in accordance with the procedures outlined in EPA 600/R-93/116 (Method for Determination of Asbestos in Building Materials); EPA 600/M4-82-020 (Interim Method for the Determination of Asbestos in Bulk Insulation Samples) and US Federal Register 40 CFR 763, Subpart F, Appendix A. Samples were analyzed using Calibrated Visual Estimate (CVES), therefore results may not be reliable for samples with low concentration levels or other Non-Friable Organically Bound (NOB) materials. The limit of detection for this analytical method is less than one percent (<1%) and total sample constituents may total greater than 100% due to trace amounts. These results lie within the statistical limits of variability calculated with standard reference materials routinely analyzed in the laboratory. In multi-layer samples, unless otherwise specified, the asbestos concentration is reported for the layer where asbestos is found. This report only relates to the samples that were submitted and Ecologics Lab and its personnel assumes no responsibility and/or are not liable for any misinformation provided by the client such as "sample location" or "sample type." This report may contain specific data not covered by NVLAP and is identified if footnotes are present. This report was issued by Ecologics Lab which is accredited by NVLAP (Lab Code 600190-0) and may not be reproduced except in full, without written approval of this laboratory. This report may not be used by the client to claim product certification, approval or endorsement by NVLAP, NIST or any agency of the Federal Government.

INTRODUCTION

The client referenced above retained Magnolia Environmental to perform an asbestos-containing material (ACM) survey to investigate the subject property prior to demolition. The survey included the sampling of suspect asbestos containing materials, and a visual assessment of the interior spaces at the subject property. Andrea Pulsipher, Cal- OSHA Certified Asbestos Consultant (CAC) No. 17- 5929, performed the on-site survey on February 12, 2021.

Magnolia Environmental report is for the exclusive use of our client referenced above and applies only to the structures referenced above or portion thereof. No one other than our client or those contracted by our client may utilize, reference, or otherwise rely on this report without prior written consent from Magnolia Environmental.

PURPOSE AND SCOPE

The purpose of this investigation is to perform a hazardous asbestos materials survey in order to aid our client referenced above in investigating the subject property prior to demolition. Magnolia Environmental scope of work included:

- A visual reconnaissance of the impacted area on property to evaluate the possible presence of ACM.
- Collection of bulk samples of suspect ACM and submittal of samples to a NVLAP accredited laboratory for analysis.
- Assessment of the condition of potential ACM.
- Preparation of this report, which presents our data and summarizes the assessed materials.

METHODS

A. ASBESTOS

Suspect asbestos materials are sampled and later identified using the Polarized Light Microscopy (PLM) method in accordance with the EPA Interim method of the Determination of Asbestos in Bulk Samples (EPA/600/ R-93/116, July 1993). Sampling was performed in accordance with 40 CFR 763.86. Homogeneous areas were based on the total functional space. Number of samples per homogeneous area was taken as recommended under said section "Sampling Procedures".

The PLM Method is the most commonly used method to analyze building materials for the presence of asbestos. This method utilizes the optical properties of minerals to identify the selected constituent. The use of this method enables identification of the type and the percentage of asbestos in each sample. The detection limit of the PLM method for asbestos identification is about one (1) percent asbestos. Because the State of California recognizes asbestos-containing building material (ACBM) as any material, which contains greater than or equal to one tenth of one percent (.1) asbestos, materials containing "trace" amounts of asbestos are reported as ACBM in the State of California.

Documentation of the laboratory results should be retained as a reference for general building safety and maintenance, and for any future renovation/ demolition activities.

INSPECTION PROCEDURE (763.85)

Areas Inspected: The inspector performed a preliminary walk-through to designate the functional spaces. She also noted which areas had homogeneous materials.

The inspector then visually inspected each accessible room being impacted during the demolition. The inspector touched suspect materials to determine if they were friable. For each suspect material, the inspector noted its condition and the potential for disturbance.

Quantities: Suspect asbestos-containing materials identified at the site were quantified. For general functional space measurements were used. Such measurements provide "approximate square or linear footage" (763.93 (d)(2)(ii)). Suspect Asbestos-Containing Materials: were sampled for laboratory analysis or were visually identified as ACM. Magnolia Environmental collected a total of Twenty Four (24) bulk samples of suspect ACM. The samples were transferred following proper chain of custody protocol to Ecologics Laboratories, located at 2487 E. Orangethorpe Ave. Fullerton, CA 92831, for analysis. Ecologics Laboratories is an accredited laboratory for bulk asbestos analysis under the National Institute of Standards and Technology, National Voluntary Laboratory Accreditation Program (Certification Number 600190-0).

RESULT**A. ASBESTOS**

Twenty Four (24) bulk samples were taken using polarized light microscopy (PLM). The following table summarizes the results of the sample analysis and of the visual assessment. A complete list of sample results can be found in the laboratory sheets at the end of this report.

TABLE I: ACM RESULTS

MTL #	Material Description	Sample Location	F/NF ¹	Cond. ²	%ACM ³	# Samples	Est. Quantity
01	1'x1' White Stapled Ceiling Tile	1'x1' White stapled ceiling tile sampled from floor 1 liquor shop	F	D	0%	3	890 SF
02	Rolled Roofing	Rolled roofing sampled from the roof of the property	NF	G	0%	3	1,518 SF
03	Roofing Penetration Mastic	Roofing penetration mastic sampled from the roof penetrations	NF	G	0%	3	10 SF
04	Thermal System Insulation	Thermal system insulation sampled from the floor 1 garage/storage	F	G	0%	3	60 SF
05	Gypsum Board	Gypsum board sampled from bedroom 1, bedroom 3, and bathroom 1	NF	G	0%	3	1,550 SF
06	Joint Compound	In-between gypsum boards sampled from bedroom 2, bedroom 4, and the living room	NF	G	0%	3	1,550 SF
07	Plaster	Interior plaster sampled from the floor 1 shop and underneath the stairs	NF	G	0%	3	1,518 SF
08	Grey Duct Mastic	Grey duct mastic sampled from the roof of the property	NF	G	0%	3	10 SF

¹-F=Friable; NF= Non-Friable

²-Cond = condition of Materials. Either good (G), damaged (D), or significantly damaged (SD)

³ - <1% = Calif. Code of Regulation, Title 8, Section 1529. "asbestos-containing construction" material means any manufactured construction material which contains more than one-tenth of 1 percent asbestos by weight. This material will be abated as asbestos containing material; however, it may be disposed of as construction debris.

*See the laboratory report and chain custodies for the complete list materials tested and the sampling locations.

**Should the demolition/renovation process reveal any additional suspect asbestos-containing materials; work must stop until the suspect materials are tested for asbestos content.

CONCLUSION / RECOMMENDATIONS

A. ASBESTOS

According to bulk sampling and visual inspection of impacted areas, asbestos-containing materials were not present in the materials sampled.

It is always necessary to comply with the pertinent provisions of EPA, OSHA and AQMD regulations during any removal or repair activities that may disturb the asbestos-containing materials that may have been inaccessible and or untested during the survey. Not all areas of the home were tested, only impacted areas. Caution should be taken when inaccessible and untested areas are disturbed.

The Environmental protection Agency (EPA) and California OSHA (Cal/OSHA) define materials which contain more than one percent asbestos to be asbestos containing materials (ACM). In addition, Cal/OSHA defines any manufactured construction material more than 0.1% asbestos as asbestos-containing construction materials (ACCMs). Cal/OSHA also requires notification and registration of the contractor when disturbing materials with more than one-tenth of one percent asbestos and regulates worker protection whenever materials containing any detectable levels of asbestos are disturbed.

LIMITATIONS

Magnolia Environmental prepared this asbestos survey for the client referenced above. No warranties expressed or implied, are made by Magnolia Environmental or its employees as to the use of any information, apparatus, product or process disclosed in this report. Though reasonable efforts have been made to assure correctness, if a Contractor is employed, he should bring any discrepancies to the immediate attention of Magnolia Environmental.

We have employed state-of-the-art practices to perform this analysis of risk and identification, but this evaluation is severely limited in scope to areas accessible to a visual inspection or through reasonable means of the areas evaluated. No demolition or product review was performed in attempts to reveal material compositions. Our services consist of professional opinions and recommendations made in accordance with generally accepted engineering principles and practices and are designed to provide an analytical tool to assist the client. Magnolia Environmental or those representing Magnolia Environmental bear no responsibility for the actual condition of the structure or safety of a site pertaining to asbestos and/or asbestos contamination regardless of the actions taken by the client.

Magnolia Environmental appreciated having the opportunity to inspect your property. If you have any questions regarding this survey or other environmental hazards, please don't hesitate to contact us at (562) 922-3144 or at Office@Magnoliaenvironmental.com.

NAD = no asbestos detected; NA = not analyzed, PS = positive stop; Reporting Limits: CVES = 1%, 400 PT CT = 0.25%, 1,000 PT CT = 0.1%. The analyses of the samples in this report were performed and analyzed in accordance with the procedures outlined in EPA 600/R-93/116 (Method for Determination of Asbestos in Building Materials); EPA 600/M4-82-020 (Interim Method for the Determination of Asbestos in Bulk Insulation Samples) and US Federal Register 40 CFR 763, Subpart F, Appendix A. Samples were analyzed using Calibrated Visual Estimate (CVES), therefore results may not be reliable for samples with low concentration levels or other Non-Friable Organically Bound (NOB) materials. The limit of detection for this analytical method is less than one percent (<1%) and total sample constituents may total greater than 100% due to trace amounts. These results lie within the statistical limits of variability calculated with standard reference materials routinely analyzed in the laboratory. In multi-layer samples, unless otherwise specified, the asbestos concentration is reported for the layer where asbestos is found. This report only relates to the samples that were submitted and Ecologics Lab and its personnel assumes no responsibility and/or are not liable for any misinformation provided by the client such as "sample location" or "sample type." This report may contain specific data not covered by NVLAP and is identified if footnotes are present. This report was issued by Ecologics Lab which is accredited by NVLAP (Lab Code 600190-0) and may not be reproduced except in full, without written approval of this laboratory. This report may not be used by the client to claim product certification, approval or endorsement by NVLAP, NIST or any agency of the Federal Government.

INTRODUCTION

The client referenced above retained Magnolia Environmental to perform a lead-based paint assessment (LBP) at the project site referenced above. The survey included the sampling of potential lead-based paint, and a visual assessment of the property. Jon Garcia, California Department of Public Health (CDPH) Certified Lead Sampling Technician No. LRC-00004217 performed the on-site hazard assessment and Andrea Pulsipher, CDPH Certified Lead Inspector/Assessor No LRC-00003897 reviewed the results of the assessments on January 5, 2023. Magnolia Environmental's report is for the exclusive use of our client referenced above and applies only to the structures referenced above or portion thereof. No one other than our client or those contracted by our client may utilize, reference, or otherwise rely on this report without prior written consent from Magnolia Environmental.

PURPOSE AND SCOPE

The purpose of this investigation is to perform a hazardous materials survey in order to aid our client referenced above in investigating the property for potential lead-based paint. Magnolia Environmental's scope of work included:

- A visual reconnaissance of the impact areas on property to evaluate the possible presence of LBP.
- Collection of paint was sampled for potential LBP by XRF
- Assessment of the condition of potential and LBP.
- Preparation of this report, which presents our data and summarizes the assessed materials.

METHODS

A. LEAD-BASED PAINT

Our inspector analyzed nine (9) paint samples from representative surfaces from 6012 Norwalk Blvd. Whittier, twelve (12) paint samples from representative surfaces from 6014 Norwalk Blvd. Whittier, eighteen (18) paint samples from representative surfaces from 6016 Norwalk Blvd. Whittier, and thirteen (13) paint samples from representative surfaces from 6018 Norwalk Blvd. Whittier that will be impacted areas disturbed during the demolition. The samples were analyzed via an XRF analyzer on site; results are attached in appropriate appendixes.

RESULTS

A. LEAD-BASED PAINT

Legend:

mg/cm² = milligrams per centimeter squared

¹Side: Side: A=Street side, B = To the left of side A, C = Across side A, D = To the right of side A

²Paint Condition: I = Intact, D = Deteriorated

³Classification:

BDL = Below the XRF's detection level; less than 0.1

mg/cm². LCP = Lead Containing Paints; any detectable concentration

LBP = Lead-Based Paints; equal to or exceeding 1.0 mg/cm² or 0.5 mg/cm² for City of San Diego or 0.7 mg/cm² for Los Angeles County.

*Paint conditions are based on visual observations in survey areas. Different conditions may be present in other areas of the Subject Property. Limit of Detection (LOD) is 0.1 mg/cm²

CONCLUSIONS / RECOMMENDATIONS

A. LEAD-BASED PAINT

Based on the field assessment and XRF analysis, Lead-based paint was detected on the following materials sampled:

6014 Norwalk Blvd. Whittier:

- Exterior black door jam

6016 Norwalk Blvd. Whittier:

- Laundry room yellow door
- Unit H kitchen white countertop
- Unit H bathroom white floor tile
- Unit H kitchen white sink

Please note that all kitchen countertop tile and white cast iron sinks in Units A, B, C, D, E, F, G and H of 6016 Norwalk Blvd. Whittier contain lead-based paint.

It is recommended that peeling/flaking lead-based paint in the surveyed areas be subjected to a scraping/stabilization process designed to remove loose/flaking paint chips. Such an effort, as well as any other future work involving disturbances to the lead-based paint identified during this survey, should only be performed by persons who are properly qualified and trained to perform lead-related work, with the work performed using proper work practices and controls and in accordance with applicable lead regulations (e.g., T8, CCR, §1532.1).

If, during future work, materials or surface coatings suspected to contain asbestos or lead are encountered that were not specifically addressed during this survey (e.g., under/behind existing materials or in areas that were not included in the scope of this survey), the newly discovered suspect materials/surface coatings should be appropriately evaluated for asbestos and/or lead content prior to initiating any work or activities involving their disturbance. It is always necessary to comply with the pertinent provisions of EPA, OSHA regulations during any removal or repair activities that may disturb the lead-containing materials that may have been inaccessible and untested areas during this survey. Caution should be taken when inaccessible and untested areas are disturbed.

LIMITATIONS

Magnolia Environmental prepared this lead survey for the client referenced above. No warranties expressed or implied, are made by Magnolia Environmental or its employees as to the use of any information, apparatus, product or process disclosed in this report. Though reasonable efforts have been made to assure correctness, if a Contractor is employed, he should bring any discrepancies to the immediate attention of Magnolia Environmental. Paint chip sample analysis show, there is not lead-based paint at the site that will be impacted by the proposed demolition and impacted activities.

We have employed state-of-the-art practices to perform this analysis of risk and identification, but this evaluation is severely limited in scope to areas accessible to a visual inspection or through reasonable means of the areas evaluated. No demolition or product review was performed in attempts to reveal material compositions. Our services consist of professional opinions and recommendations made in accordance with generally accepted engineering principles and practices and are designed to provide an analytical tool to assist the client. Magnolia Environmental or those representing Magnolia Environmental bear no responsibility for the actual condition of the structure or safety of a site pertaining to lead and/or lead contamination regardless of the actions taken by the client.

Magnolia Environmental appreciated having the opportunity to inspect your property. If you have any questions regarding this survey or other environmental hazards, please don't hesitate to contact us at (562) 355-7143 or at Office@Magnoliaenvironmental.com.

	Plaster	1.0
	Wood	1.0

BACKGROUND INFORMATION

EVALUATION DATA SOURCE AND DATE:

This sheet is supplemental information to be used in conjunction with Chapter 7 of the HUD *Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing* ("HUD Guidelines"). Performance parameters shown on this sheet are calculated using test results on building components in the HUD archive. Testing was conducted on 146 test samples in November 2015, with two separate instruments running software version 2.1-2 in Action Level test mode. The actual source strength of each instrument on the day of testing was approximately 2.0 mCi; source ages were approximately one year.

OPERATING PARAMETERS

Performance parameters shown in this sheet are applicable only when properly operating the instrument using the manufacturer's instructions and procedures described in Chapter 7 of the HUD Guidelines.

XRF CALIBRATION CHECK:

The calibration of the XRF instrument should be checked using the paint film nearest 1.0 mg/cm² in the NIST Standard Reference Material (SRM) used (e.g., for NIST SRM 2579, use the 1.02 mg/cm² film).

If the average (rounded to 1 decimal place) of three readings is outside the acceptable calibration check range, follow the manufacturer's instructions to bring the instrument into control before XRF testing proceeds.

SUBSTRATE CORRECTION VALUE COMPUTATION:

Chapter 7 of the HUD Guidelines provides guidance on correcting XRF results for substrate bias. Supplemental guidance for using the paint film nearest 1.0 mg/cm² for substrate correction is provided:

XRF results are corrected for substrate bias by subtracting from each XRF result a correction value determined separately in each house for single-family housing or in each development for multifamily housing, for each substrate. The correction value is an average of XRF readings taken over the NIST SRM paint film nearest to 1.0 mg/cm² at test locations that have been scraped bare of their paint covering. Compute the correction values as follows:

Using the same XRF instrument, take three readings on a bare substrate area covered with the NIST SRM paint film nearest 1 mg/cm². Repeat this procedure by taking three more readings on a second bare substrate area of the same substrate covered with the NIST SRM.

Compute the correction value for each substrate type where XRF readings indicate substrate correction is needed by computing the average of all six readings as shown below.

For each substrate type (the 1.02 mg/cm² NIST SRM is shown in this example; use the actual lead loading of the NIST SRM used for substrate correction):

$$\text{Correction value} = (1\text{st} + 2\text{nd} + 3\text{rd} + 4\text{th} + 5\text{th} + 6\text{th Reading})/6 - 1.02 \text{ mg/cm}^2$$

Repeat this procedure for each substrate requiring substrate correction in the house or housing development.

EVALUATING THE QUALITY OF XRF TESTING:

Randomly select ten testing combinations for retesting from each house or from two randomly selected units in multifamily housing.

Conduct XRF re-testing at the ten testing combinations selected for retesting.

Determine if the XRF testing in the units or house passed or failed the test by applying the steps below.

Compute the Retest Tolerance Limit by the following steps:

Determine XRF results for the original and retest XRF readings. Do not correct the original or retest results for substrate bias. In single-family and multi-family housing, a result is defined as a single reading. Therefore, there will be ten original and ten retest XRF results for each house or for the two selected units.

Calculate the average of the original XRF result and the retest XRF result for each testing combination.

Square the average for each testing combination.

Add the ten squared averages together. Call this quantity C.

Multiply the number C by 0.0072. Call this quantity D.

Add the number 0.032 to D. Call this quantity E.

Take the square root of E. Call this quantity F.

Multiply F by 1.645. The result is the Retest Tolerance Limit.

Compute the average of all ten original XRF readings.

Compute the average of all ten re-test XRF readings.

Find the absolute difference of the two averages.

If the difference is less than the Retest Tolerance Limit, the inspection has passed the retest. If the difference of the overall averages equals or exceeds the Retest Tolerance Limit, this procedure should be repeated with ten new testing combinations. If the difference of the overall averages is equal to or greater than the Retest Tolerance Limit a second time, then the inspection should be considered deficient.

Use of this procedure is estimated to produce a spurious result approximately 1% of the time. That is, results of this procedure will call for further examination when no examination is warranted in approximately 1 out of 100 dwelling units tested.

TESTING TIMES:

In the Action Level paint test mode, the instrument takes the longest time to complete readings close to the Federal standard of 1.0 mg/cm². The table below shows the mean and standard deviation of actual reading times by reading level for paint samples during the November 2015 archive testing. The tested instruments reported readings to one decimal place. No significant differences in reading times by substrate were observed. These times apply only to instruments with the same source strength as those tested (2.0 mCi). Instruments with stronger sources will have shorter reading times and those with weaker sources, longer reading times, than those in the table.

Mean and Standard Deviation of Reading Times in Action Level Mode by Reading Level		
Reading (mg/cm²)	Mean Reading Time (seconds)	Standard Deviation (seconds)
< 0.7	3.48	0.47
0.7	7.29	1.92
0.8	13.95	1.78
0.9 – 1.2	15.25	0.66
1.3 – 1.4	6.08	2.50
> 1.5	3.32	0.05

CLASSIFICATION OF RESULTS:

XRF results are classified as **positive** if they are **greater than or equal** to the stated threshold for the instrument (1.0 mg/cm²), and *negative* if they are *less than* the threshold.

DOCUMENTATION:

A report titled *Methodology for XRF Performance Characteristic Sheets* (EPA 747-R-95-008) provides an explanation of the statistical methodology used to construct the data in the sheets, and provides empirical results from using the recommended inconclusive ranges or thresholds for specific XRF instruments. The report may be downloaded at <http://www2.epa.gov/lead/methodology-xrf-performance-characteristic-sheets-epa-747-r-95-008-september-1997>.

This XRF Performance Characteristic Sheet (PCS) was developed by QuanTech, Inc., under a contract with the XRF manufacturer.

**PHASE I
ENVIRONMENTAL SITE ASSESSMENT**

**Mixed Commercial /Residential
6014, 6016, and 6018 S. Norwalk Blvd.
Whittier, California**

1.0 EXECUTIVE SUMMARY

In February 2021, a Phase I Environmental Site Assessment (Phase I ESA), consistent with American Society for Testing Materials (ASTM) Standard E1527-13, was performed for the mixed retail and residential use sites located at adjoining addresses 6014, 6016, and 6018 S. Norwalk Boulevard in Whittier, California (the Property, see **Figure 1** – Property Location Map).

Identified as County of Los Angeles Assessor Parcel Number (APN) 8174-041-028, the 0.47± acre parcel is currently developed with a retail smoke shop (6014), an 8-unit apartment complex (6016), and a liquor store with an apartment above it (6018). Asphalt paved parking areas and driveways comprise the remainder of the Property parcel. The Property is being considered for redevelopment. Research performed during this investigation indicates the same general use (retail/residential) at each Property address since roughly 1963 to present (50+ years). Historical environmental database and city directory reviews indicate dry cleaning use at the 6014 S. Norwalk Boulevard address from at least 1969 to 1993 (20+ years). Owner representatives asserted that the dry cleaner was a drop-off/pick-up site only and no actual dry cleaning was performed at the Property. Nonetheless, the former dry cleaner is considered a Recognized Environmental Condition (REC) at the Property, according to ASTM Standards.

On February 12, 2021, The Reynolds Group (TRG) conducted an inspection of the Property and vicinity and took photographs. No evidence of hazardous chemical use, storage, dumping, or disposal was

observed during the Property inspection at any of the three Property addresses (6014, 6016, and 6018 S. Norwalk Blvd.), nor were any noxious air emissions noted. Only typical household cleaners were observed at the Property.

The Property lies within a mixed commercial and residential area of Whittier. No issues of environmental concern were noted at sites immediately adjacent north, south, and west of the Property. An “open” leaking underground storage tank (LUST) case exists at the adjoining east gas stations, however, the case is near regulatory closure and soil and groundwater data points very close to the subject Property were generally clean (see Section 6.1 and **Appendix E**). A few other sites further away are also listed in the historical environmental database report, but they are not considered issues of concern to the Property for reasons detailed in Section 7.3, including distance from the Property and regulatory closure.

Based on historical research and the Property reconnaissance, the following REC was identified at the 6014 S. Norwalk Boulevard Property address:

1. Former dry cleaner for over 20 years (approximately 1969 to 1993) indicating potential for chlorinated solvent impact, particularly tetrachloroethylene (PCE), in soil and groundwater beneath the Property.

Although there was reason to believe that the dry cleaner was a drop-off/pick-up site only with no actual dry cleaning performed on the Property, in an abundance of caution, the prospective developer opted to perform a Phase II Soil Vapor Investigation to confirm or mitigate the dry cleaner REC (see Section 8.8 and **Appendix F – Phase II Soil Vapor Investigation Report**). Six shallow soil vapor probes (SV1 through SV6) were advanced inside and near the 6014 building on February 12, 2021. The results were essentially “clean”. No volatile organic compounds (VOCs), including PCE, were detected in any of the soil vapor samples collected. Additionally, no total petroleum hydrocarbons as gasoline (TPHg) were detected in SV1 through SV6.

The dry cleaner REC has been mitigated by the February 2021 soil vapor investigation, and no further environmental investigation of the Property is warranted at this time.

2.0 INTRODUCTION

2.1 Purpose

TRG was contracted by DLS Builders, Inc. (DLS), the Property developer, to perform the Phase I ESA at the Property. According to Warren Parchen, President of DLS, the work was performed as due diligence required by the City of Whittier prior to redevelopment of the Property.

The purpose of the Phase I ESA was to identify any RECs at the Property. The Phase I ESA was performed using generally accepted Phase I ESA industry standards in accordance with ASTM E1527-13, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. In this report, and as defined by the ASTM, a REC is “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property due to release to the environment; under conditions indicative of a release to the environment or under conditions that pose a material threat of future release. De minimis conditions are not recognized environmental conditions.”

2.2 Scope of Work

The following scope of work was performed to accomplish the Phase I ESA objectives:

- Visual Reconnaissance – A visual evaluation of the Property was conducted in readily accessible areas to identify RECs. Additionally, visual observations of adjoining properties were made from the vantage point of the subject Property as well as from public right-of-ways to determine the potential impact of these sites on the subject Property.

- Interviews – Verbal or written interviews with individuals knowledgeable and familiar with the Property.
- Records Review – Available environmental reports, agency records, appropriate permits, and historical aerial photographs of the subject Property and surrounding areas were reviewed.
- Agency Document Review – Appropriate regulatory agencies were contacted for information regarding any hazardous materials use, storage, and/or releases at the Property.
- Published Database Review – Reviewed published governmental agency databases to identify sites within ASTM-specified radii of the subject Property with a reported environmental concern or incident. TRG subcontracts the government agency database search to Environmental Data Resources, Inc. (EDR).
- Report Preparation – Prepare a summary report of the Phase I ESA work.
- Environmental Professional – All work associated with the project was performed by an environmental professional or under the supervision of an environmental professional.

2.3 Limitations and Exceptions

Topics not explicitly discussed within this document should not be assumed to have been investigated, such as physical testing, other than any specifically detailed in this report. The work performed in conjunction with this study and data developed are intended as a description of available information on the dates and at the locations described. This report does not warrant against future operations or conditions, nor does it warrant against:

- Operations that are not in evidence from visual observations or search of published agency records, or facts that were concealed, withheld, or not fully disclosed at the time the reconnaissance was conducted.
- Conditions that could only be determined by physical sampling or intrusive testing.

- Conditions or locations other than the Client-provided subject Property address and/or legal parcel description(s).

This report summarizes Phase I ESA work conducted by TRG in February 2021 at the subject Property. Although conditions at neighboring sites may impact the subject Property and, to the extent they were identified and included in the subject Property evaluation, this report does not serve as an assessment of sites other than the subject Property.

The conclusions and opinions presented are based upon the scope of work outlined in this report. Evaluation of potential issues such as geotechnical soil conditions, air quality, flood plain information, seismic conditions, asbestos-containing materials, mold, radon, lead-based paint, lead in drinking water and wetlands are not required by ASTM E1527-13 standards and, therefore, are not normally included in TRG's Phase I reports. TRG makes no warranties or guarantees as to the accuracy or completeness of information obtained from or compiled by others. Information may exist beyond the scope of this investigation. Additional information not found or available to TRG at the time of report writing may result in a modification of the conclusions and opinions presented. This report is not a legal opinion.

2.4 Reliance

The Phase I ESA was performed for the exclusive use of the Client and its investors, assignees, designees, and successors (collectively "Authorized Parties"). These Authorized Parties intend to rely upon this report as an assessment of the existing environmental condition of the subject Property. TRG recommends that any Authorized Party intending to rely upon the report independently determine whether the scope of services meets their expectations.

TRG's professional services were performed using that degree of care and skill ordinarily exercised, under similar circumstances, by reputable environmental professionals. No other warranty,

expressed or implied, is made as to the professional opinions described in this report. TRG is not responsible or liable for any claims that are associated with the interpretation of the available information. Additionally, TRG is not responsible for any claims from third parties not associated with the Client, unless this report is assigned in its entirety to a party acceptable to TRG.

TRG exercised usual and customary professional care in its efforts to assess property environmental law/code/regulation compliance. However, due to the existence of literally thousands of laws, codes, and regulations pertaining to the environment, TRG cannot provide a definitive opinion concerning compliance with all laws/codes/regulations.

2.5 Proprietary Notice

This document and its contents are privileged and confidential information and should not be duplicated or copied under any circumstances without the expressed permission of TRG. Any unauthorized reuse of TRG reports or data will be at the unauthorized user's sole risk and liability.

3.0 **USER PROVIDED INFORMATION**

3.1 Reason for Performing the Phase I ESA

TRG understands that the assessment was performed as due diligence prior to Property redevelopment (see **Appendix B**).

3.2 Title Records and Property Use Limitations

TRG obtained deed related information by Environmental Data Resources (EDR) as part of the Environmental Lien Search (see **Appendix D**), based on the property APN 8174-041-028. Lien Search results show the current Property owner as "Katherine A. Azzarella, Trustee of the Katherine

A. Azzarella Trust, dated 9-30-99 (50% Interest) and Sharon L. Serenbetz, Trustee of the Sharon L. Serenbetz Separate Trust, dated 5-20-13 (50% Interest). No Use Limitations are identified for the Property APN.

3.3 Value Reduction for Environmental Issues

With reference to the sale price versus fair market value of the subject Property, the current owner representative, Warren Parchan, indicated in the Owner Interview Questionnaire that the issue is not applicable since the Property is not being sold at this time (see **Appendix B**).

4.0 PROPERTY AND ADJOINING SITE CHARACTERISTICS

Figure 1 shows the Property location, **Figure 2** is a plot plan of the Property, **Figure 3** includes historical topographic maps of the area, and **Figure 4** consists of historical aerial photographs of the vicinity. Photographs of the Property and the immediate area by the Consultant in February 2021 are included in **Appendix A** of this report.

4.1 Location

The Property is located at the south side of S. Norwalk Boulevard, between Whittier Boulevard to the east and Rincon Drive to the west in a mixed retail and residential area of Whittier. Area landmarks include north-south trending Interstate 605 and the San Gabriel River approximately $\frac{1}{4}$ and $\frac{1}{2}$ mile west of the Property, respectively, and West Whittier Elementary School $\frac{1}{4}$ mile to the southwest.

4.2 Property Description

The total 0.47± acre Property consists of three free standing buildings, two at the east side (6014 and 6016 S. Norwalk) and one at the northwest corner of the Property (6018 S. Norwalk). Asphalt paved parking areas and driveways comprise the remainder of the Property parcel. A Property plot plan and photographs are included as **Figure 2** and **Appendix A** of this report, respectively. The Property's legal description is provided in the Environmental Lien Search portion of **Appendix D**. More detailed descriptions by Property address are as follows:

- 6014 S. Norwalk Boulevard: This single-story square-shaped building measures roughly 1,200 square feet. Building construction appears to be wood frame with cement walls. A retail smoke shop currently occupies west side of the space, although former barber shop signage remains outside the building. The east side of the building was vacant at the time of TRG's inspection. Interior improvements include linoleum flooring, acoustic ceiling, and fluorescent lighting. Building construction appears to be wood framing, stucco exterior, and glass pane windows and a canopy overhang at the north side of the building along S. Norwalk Boulevard. Asphalt paved customer parking is available at the north and west sides of the building.
- 6016 S. Norwalk Boulevard: This single-story, rectangular-shaped building on the Property parcel measures approximately 5,000 square feet (sf) and consists of eight separate apartments (A through H) and a small laundry room. This building too appears to be wood framed with stucco exterior construction. Only one representative apartment of the eight was made available for TRG to view the inside. Interior improvements consist of materials such as carpet and linoleum flooring, sheet rock walls and acoustic ceilings. A large asphalt paved tenant parking lot exists at the approximately center of the Property parcel.
- 6018 S. Norwalk Boulevard: A liquor store (Bottle House Liquor) currently occupies the ground floor of this 4,000± sf building, also constructed with wood framing and stucco exterior walls.

The 2nd floor is appears to be an apartment, however, access was not available to TRG. The liquor store is built-out with linoleum floors, refrigeration units, and a glass display checkout counter. Product within the store was typical of convenience stores including myriad alcohol choices, food snacks, and various other household items. Parking for the liquor store is available at the north and west sides of the building.

Potable water, sewer, and trash service for the Property are provided through the City of Whittier. Natural gas and electrical services are supplied by The Gas Company, and Edison Company, respectively.

4.3 Adjacent Sites

Sites in the immediate vicinity of the Property are mixed commercial and residential. Adjoining north of the Property, north of S. Norwalk Boulevard, are single family and multi-tenant residential housing units. Areas south and west of the Property, south and west of a public alley, are also single-family residential neighborhoods. Sites adjoining east of the Property include a gas station (east-northeast), an auto repair facility (east-center east), and a newer multi-tenant commercial building (east-southeast). **Figure 2** shows the general configuration of adjacent sites.

5.0 ENVIRONMENTAL SETTING

The Property is situated between approximately 178 feet above mean sea level (amsl) on land that slopes gently to the southwest.

According to the State's Geotracker web site (www.geotracker.swrcb.ca.gov, Global ID T0603793017, Arco adjoining east of Property), the Site is located in the north central section of the Los Angeles Basin. The Los Angeles Basin is a northwest-trending alluvial lowland plain that slopes gently south or seaward along the coast of southern California. The Basin is bound on the

north by the Santa Monica Mountains and San Joaquin Hills. The basin is underlain by a structural depression, parts of which have been discontinuous deposition and continuous subsidence and mainly marine deposits over time.

The Los Angeles Basin is divided into two hydrologic basins, the West Coast and Central Basins. The boundary between these two basins is the northwest trending Newport-Inglewood Structural Zone. The Property is located within the boundary of the San Gabriel River Spreading Ground of the Montebello Forebay. The upper-most water bearing aquifer located in the Montebello Forebay is the Gaspar Aquifer, which consists of recent alluvium the aquifer is encountered from ground surface to about 100 feet below grade. According to the Los Angeles Regional Water Quality Control Board (LARWQCB), the Property overlies an aquifer that is used as a community water supply.

Soil encountered at the adjoining east Arco case consists of dark brown to olive brown clayey silts from ground surface to 15 feet below ground surface (ft bgs). The clayey silt is reportedly underlain by an olive gray to greenish gray, silty, fine- to coarse-grained sand with poorly sorted gravels to the total depth explored of 55 ft bgs. Depth to groundwater measured approximately 60 ft at wells nearest the subject Property in the adjoining west alley (MW8 and MW9) in June 2020 with a flow direction toward the east.

6.0 PROPERTY RECONNAISSANCE

6.1 Property Inspection Observations

On February 12, 2021, a representative of TRG conducted an inspection of the Property. Weather conditions were overcast and in the low 50°s. Property photographs are included in **Appendix A**. The inspection was performed from the northeast corner (6014) moving south in an east-west grid pattern. The subject Property is described in detail in Section 4.2 of this report.

No hazardous chemical use or storage was noted at any of the three Property addresses (6014, 6016, and 6018 S. Norwalk Blvd.), nor was any hazardous dumping or disposal observed. The only chemicals observed were typical household cleaners such as Windex, Comet, and all-purpose cleaners.

No evidence of groundwater monitoring wells, underground storage tanks, hydraulic lifts, clarifiers, or any other potentially hazardous anomalies was noted on the Property during the inspection. Three groundwater wells associated with the adjacent east Arco LUST case exists in the public alley adjoining west and south of the Property (MW7, MW8, and MW9). According to the most recently available groundwater monitoring report available on Geotracker for the Arco case (ref: *4th Quarter 2020 Semi-Annual Groundwater Monitoring Well Sampling Report*, dated November 25, 2020, by Encon), groundwater samples from wells MW7, MW8, and MW9 near the subject Property have been non-detect or nearly non-detect since at least May of 2016 (3+ years). Prior to May 2016, only low concentrations of gasoline constituents, if any, were reported in MW7, MW8, and MW9. As such, they are not considered an offsite REC to the Property. Maintenance and ultimate destruction of MW7, MW8, and MW9, in the public alley adjoining the Property is the responsibility of the Arco case responsible party (RP).

No environmentally hazardous leaks or spills were observed on the Property and no staining or distressed vegetation was noted.

No electrical transformers were noted on the Property. Pole-mounted transformers exist in the sidewalk along S. Norwalk Boulevard adjoining the north boundary of the Property. No apparent leaking or spills were observed on any of the transformers that were accessible for viewing. Edison Company is responsible for maintenance of the transformers near the Property.

No pungent or noxious air emissions were noted during the Property inspection.

No pits, ponds, lagoons, other standing water or wetlands were observed on the Property during the inspection.

6.2 Adjacent Site and Vicinity Observations

Adjacent sites are described in Section 4.3 of this report. No obvious issues of environmental concern were noted during the adjacent site inspections, as viewed from public right of ways. The Arco case (adjacent east gas station) is addressed in Section 6.1 above and elsewhere in this report. A few sites further out from the Property are also listed in the Environmental Radius Map Report (see Section 7.1 and **Appendix C**), however, they are not considered issues of concern to the Property for reasons detailed in Section 7.1, including distance and direction from the Property and regulatory closure of the cases.

6.3 Interviews

Mr. Warren Parchan, representing the current Property owner (i.e. Azzarella and Serenbetz), provided a written response to environmental due diligence related to the Property's history. In his written response, Mr. Parchan stated that he was unaware of any environmental hazards at the Property nor was he aware of any previous environmental investigations at the Property. The completed questionnaire is provided as **Appendix B** of this report.

7.0 **REGULATORY AGENCY DATABASE REVIEW**

TRG retained EDR to provide a list of facilities within the Property vicinity that are currently under review, management, or notification by a regulatory agency as indicated in an EDR Radius Map with GeoCheck Report (see **Appendix C**). The following presents the regulatory files reviewed. The results of the subject Property and surrounding site listings are summarized in Sections 7.2 and 7.3.

Depending on the database, and in compliance with ASTM Standards, the approximate search distance includes only the subject Property or between 0.25 and 1.0 miles from the subject Property.

7.1 Government Databases Searched

The United States Environmental Protection Agency (EPA) National Priority List (NPL) and Delisted NPLs: The NPL is the EPA's database of uncontrolled or abandoned hazardous waste sites identified for priority remedial actions under the Superfund program. A site, to be included on the NPL, must either meet or surpass a predetermined hazard ranking system score, or be chosen as a state's top-priority site, or meet all three criteria of: 1) the US Department of Health and Human Services issues a health advisory recommending that people be removed from the site to avoid exposure; 2) EPA determines that the site represents a significant threat, and 3) EPA determines that the remedial action is more cost-effective. Delisted NPLs are those sites that may be deleted from the NPL where no further response is appropriate as determined by the EPA. The required minimum search distance is one mile from the Property for NPLs and ½ mile for Delisted NPLs.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) and CERCLIS No Further Remedial Action Planned (NFRAP): The CERCLIS database contains information on potentially hazardous waste sites that have been reported to the US EPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the CERCLA. CERCLIS contains sites which are either proposed to or on the NPL and sites which are in the screening and assessment phase for possible inclusion on the NPL. CERCLIS NFRAP contains information pertaining to facilities that have been removed from the CERCLIS database due to the absence of contamination following further investigation, sufficient remedial action of any contamination, or where contamination is not serious enough to warrant federal Superfund action or NPL consideration. The required minimum search distance for both CERCLIS and CERCLIS NFRAP is ½ mile from the subject Property.

Resource Conservation and Recovery Act (RCRIS): is a database which includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The list is developed and maintained by the EPA. The purpose of this listing is to summarize registration information and does not imply that contamination has occurred on the property, but does identify potential sources of contamination. The RCRIS database is divided into small quantity generator (SQG) sites, large quantity generator (LQG) sites, and transfer, storage and disposal (TSD) sites. The required minimum search distance for RCRIS SQG and LQG is limited to the subject Property and adjoining sites and is ½ mile for RCRIS TSD sites.

Institutional and Engineering Controls (IECs): IECs include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on the Property. Deed restrictions are generally required as part of the institutional controls and engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or affect human health. The search includes only the subject Property.

Emergency Response Notification System (ERNS): This listing is a database of incident notification information regarding incidents of reported releases of oil and hazardous substances. The search includes only the subject Property.

Consent: This database lists addresses involved in major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund). It is release periodically by the United States District Courts after settlement by the parties to the litigation matters. The search includes only the subject Property.

Records of Decision (RODs): RODs documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup. The required minimum search radius for RODs is one mile from the subject Property.

Mines: The Mines database is a record of mine locations maintained by the U.S. Department of Labor, Mine Safety, and Health Administration. The required minimum search radius is ¼ mile from the subject Property.

State Hazardous Waste Sites (SHWS): The SHWS database is maintained by the DTSC and is the State's equivalent to CERCLIS. The required minimum search distance from the subject Property is one mile.

Groundwater Contamination Inventory (GWCI): The GWCI is an inventory of all groundwater contamination cases. The required minimum search radius for this database is ½ mile from the Property.

Solid Waste Facilities/Landfills (SWF/LF): This is a database that is maintained by the Integrated Waste Management Board and identifies permitted solid waste facilities or landfills. These facilities may be active, inactive, or closed facilities, or open dumps that failed to meet RCRA criteria for solid waste landfills or disposal facilities. The required minimum search distance for the SWF/LF database is ½ mile from the Property.

Underground Storage Tanks (USTs) and Tribal USTs: is a list of registered underground storage tanks and those on Indian Land. The database is maintained by local agencies, most notably the fire departments, and contains a comprehensive listing of all registered USTs. The required minimum search distance is limited to the subject Property and adjacent sites for both USTs and Tribal USTs.

Leaking Underground Storage Tanks (LUST) and Tribal LUST: This is a list that compiles the State Water Resources Control Board (SWRCB) and Regional Water Quality Control Board (RWQCB) identified facilities that have had unauthorized releases from USTs and those on Indian Land. The required minimum search distance for both LUST and Tribal LUST cases is ½ mile from the subject Property.

Above Ground Storage Tanks (ASTs): The AST database is maintained by the RWQCB and contains listings of registered ASTs. The required search distance for this database is limited to the subject Property and adjacent sites.

Spill, Leaks, Investigations, and Clean-Ups (SLIC) is a database showing cases impacted by environmental incidents other than USTs. The required minimum search radius for the SLIC database is ½ mile from the subject Property.

Land Use Controls (AUL): This database lists sites in California that have institutional controls or engineering controls in place. The search requirement includes the subject Property only.

Voluntary Cleanup Program (VCP): The VCP is a listing of facilities and/or sites registered on the voluntary cleanup program database. Upon completion of the negotiated work in the VCP contract agreed upon by the DTSC and the non-responsible party, the non-responsible party received State Superfund liability protection. The required minimum search distance from the Property is ½ mile.

Dry Cleaners is a database listing dry cleaning facilities that have EPA ID numbers. The Dry Cleaning Facility Restoration Fund database is used to access, prioritize, and clean up contaminated registered dry-cleaning sites. The minimum required search distance for this database is ¼ mile from the subject Property.

Brownfields: The Brownfields is a component of the VCP, which allows a non-responsible party to acquire a contaminated property with State Superfund liability protection for existing contamination by agreeing to perform an environmental assessment and/or remediation. The required minimum search radius for the Brownfields database is ½ mile from the Property.

National Pollutant Discharge Elimination System (NPDES): The NPDES database maintains a database of wastewater treatment facility locations. The EDR search radius for this database is limited to the subject Property. The required minimum search distance is limited to the subject Property.

Airs: This is a database listing permitted air facilities. The required minimum search distance is limited to the subject Property.

The aforementioned databases and search distances include those that are required by ASTM standards. Other supplemental database information is available in the full environmental disclosure report provided in **Appendix C**.

7.2 Subject Property Database Summary

The subject Property is listed in one of the environmental databases as provided by EDR.

Database	Business Name/Address	Association with Listing	Concern to Property?
Hist. Cleaners	Sloan’s Dry Cleaners – 6014 S. Norwalk Blvd.	Former Dry Cleaner	No. Potential environmental impact from former dry cleaner use was mitigated with Phase II Soil Vapor Investigation (see Appendix F).

7.3 Adjacent and Nearby Sites Database Summary

The following summary includes potential “red-flag” sites adjacent to or near the subject Property within the ASTM E1527-13 search radii. Where available, information to the EDR database report was updated using the State’s Geotracker website (geotracker.swrcb.ca.gov).

Database	Business Name/Address	Association with Listing	Concern to Property?
RCRA-SQG	1. Shell – 10807 Whittier Blvd.	Small Quantity Hazardous Waste Generator	No, no violations reported.
ENVIROSTOR	1. So Cal Gas – 11815 Hadley St. 2. Grace Property Mngmt. – 4850 Gregg Rd. 3. Former Fred C. Nelle – 11850 Whittier Blvd.	Under investigation by the DTSC.	No. All three nearly one mile away from the subject Property.
LUST UST HIST UST SWEEPS UST HIST CORTESE CA FID UST	12 Different LUST sites within one half mile of the subject Property	Currently registered USTs, leaking USTs, and/or historical USTs.	No. Eleven (11) of the 12 LUST cases have received regulatory closure for having sufficiently cleaned up soil/groundwater impact. The 12 th case is the adjacent east Arco gas station which is under review for closure. Groundwater wells nearest the subject Property that are associated with the Arco LUST case have been non-detect for gasoline and its constituents since at least 2016.

8.0 PROPERTY HISTORY/LAND USE REVIEW

8.1 Historical Topographic Maps

Historical topographic maps provided by EDR were also reviewed. Maps were available for the years 1896 periodically to 2012. The Property is shown at an elevation of approximately 178 feet above mean sea level (amsl). The gradient on all maps where visible is shown in a west-southwesterly direction away from Sycamore Canyon and toward the San Gabriel River located approximately ½ mile northwest and west of the Property. Main features of the topographic maps are the San Gabriel Freeway and San Gabriel River east of the Property, Sycamore Canyon Hills roughly one mile to the northeast. Railroad tracks traverse the general area in earlier topographic maps. No structures are visible on the subject Property in any of the maps available between (possibly residential) may exist on the Property in the be seen on the Property in the 1896 to 1901 topographic maps.

Historical Topographic Maps as provided by EDR are included as **Figure 3** of this report.

8.2 Historical Aerial Photographs

Aerial photographs of the Property and vicinity, as provided by EDR, were reviewed in order to ascertain historical land uses that may have been responsible for the generation/or storage of potentially hazardous materials at and near the Property. Copies of the aerial photographs are provided as **Figure 4** of this report.

1928 and 1938

The Property appears with agricultural use, as do most parcels in the vicinity. A few farm houses are visible in the area in both photos, as well as a residential housing tract in the 1938 photo.

1947

A structure appears on the Property at the north side, although it does not appear to be configured like existing buildings. What is presumably a gas station has been constructed on the adjoining east parcel at the southwest corner of Whittier Boulevard and Norwalk Boulevard. Areas adjacent north, south, and west of the Property are residential use. Other than some commercial businesses (larger buildings) along each side of Whittier Boulevard and occasional agricultural plots, the area appears to be primarily residential developments.

1953

The Property now appears with a larger structure at the north side and smaller building at the southwest corner. The remainder of the Property parcel is vacant. Both residential and commercial construction continues to increase in the vicinity.

1963

What appears to be the existing building configuration has been developed on the parcel with one building at the northwest corner, one at the northeast corner, and a long rectangular building along the east boundary. A two-building apartment complex now

appears adjacent north-northwest, north of S. Norwalk Boulevard. There are no other notable changes to the Property or vicinity as compared to the 1953 photo.

1977 through 2016

The Property and area appear much like today. The subject Property is developed with three buildings and asphalt paved parking and driveways. Retail businesses operate adjacent east of the Property, including a gas station. Residential use adjoins the Property at the north, north of S. Norwalk Boulevard, south, and west. The San Gabriel Freeway first appears in the 1977 photo. What looks like a park now exists north of the Property at the northeast corner of S. Norwalk and Whittier Boulevard. The area can be characterized as primarily residential with some commercial use along each side of Whittier Boulevard, one parcel east of the Property.

8.3 Sanborn Fire Insurance Maps

Although Sanborn Fire Insurance Map coverage was provided by EDR for 1925, 1961, and 1962, the subject Property is not shown. The only area visible is north of the Property showing residential use and some retail (see **Appendix D**).

8.4 City Directory Search

TRG also retained EDR to perform a City Directory Search. The complete City Directory as provided by EDR is included in **Appendix D** of this report.

Listings for the Property within the City Directory are as follows:

- *6014 S. Norwalk Blvd.* - A dry cleaner is shown from 1969 to 1995, followed by a barber shop listing from 2005 to 2014.
- *6016 S. Norwalk Blvd.* – The address is listed from 1966 to 2014 with multiple individual names, suggesting residential use. No listings are provided prior to 1966.
- *6018 Norwalk Blvd.* – A liquor store is listed at the address from 1966 to 2014 with no listings prior to 1966.

8.5 Environmental Lien Search

A search for environmental liens was performed for the Property by EDR. No environmental liens or activity and use limitations currently exist for the subject Property (see **Appendix D**). Lien Search results show the current Property owner as “Katherine A. Azzarella, Trustee of the Katherine A. Azzarella Trust, dated 9-30-99 (50% Interest) and Sharon L. Serenbetz, Trustee of the Sharon L. Serenbetz Separate Trust, dated 5-20-13 (50% Interest). The Property’s full legal description is included in the Lien Search document.

8.6 Vapor Encroachment Screen

A search for vapor encroachment at the Property was performed by EDR in accordance with ASTM Standard Practice for Assessment of Vapor Encroachment into Structures on Property Involved in Real Estate Transactions (E 2600-10). This screening assist parties seeking to meet the search requirements in Real Estate Transactions. The only possible vapor risks appear to be the former dry cleaner at the Property and the Arco LUST case adjoining east of the Property at 10802 Whittier Boulevard. However, any potential vapor intrusion risk at the Property was mitigated by clean soil vapor survey results from the February 2021 Phase II ESA work (see Section 8.8 and **Appendix F**).

8.7 Agency Records Review

Agency file review findings are summarized below. Select file review documentation is provided in **Appendix E**.

- *City of Whittier Building Department (WBD)* – TRG submitted a public records request to the City of Whittier for each of the Property addresses. In an emailed response dated February 4, 2021, the City provided copies of permits to include 6014 S. Norwalk (new construction and signage permits for Sloan’s Dry Cleaner beginning in 1962) and 6018 S. Norwalk (new construction permits, HVAC, wall lathe and plaster, second story addition, and signage beginning in 1957). No records were provided for the Property address of 6016 S. Norwalk Boulevard.
- *Los Angeles County Fire Department (LACoFD)* – TRG requested a public record search from the LACoFD for all three Property addresses. In emailed responses on February 3, 2021, the LACoFD stated that they have no records for 6014, 6016, or 6018 S. Norwalk Boulevard.
- *Los Angeles Regional Water Quality Control Board (LARWQCB)* – A request for file review was submitted by TRG to the LARWQCB. In an emailed response dated February 12, 2021, the LARWQCB indicated they have no files for any of the three Property addresses.
- *State Water Resources Control Board Geotracker Web Site (geotracker.waterboards.ca.gov)* – The subject Property addresses are not listed on the Geotracker web site, nor are any adjacent sites to the north, south and west. The Arco LUST case, adjoining east of the Property is identified with Global ID #T0603793017. Based on additional information obtained from Geotracker, three groundwater wells associated with the adjacent east Arco LUST case exists in the public alley adjoining west and south of the Property (MW7, MW8,

and MW9). According to the most recently available groundwater monitoring report on Geotracker for the Arco case (ref: *4th Quarter 2020 Semi-Annual Groundwater Monitoring Well Sampling Report*, dated November 25, 2020, by Encon), groundwater samples from wells MW7, MW8, and MW9 near the subject Property have been non-detect or nearly non-detect since at least May of 2016 (3+ years). Prior to May 2016, only low concentrations of gasoline constituents, if any, were reported in MW7, MW8, and MW9. As such, they are not considered an offsite REC to the Property. Maintenance and ultimate destruction of MW7, MW8, and MW9, in the public alley adjoining the Property is the responsibility of the Arco case responsible party (RP). Further, any potential vapor intrusion from the offsite Arco case was mitigated with TRG’s February 2021 Phase II Soil Vapor Investigation (see **Appendix F**).

- *Division of Oil, Gas, and Geothermal Resources (DOGGR, www.conservation.ca.gov)* – TRG accessed the DOGGR web site to research oil well information at the Property. The map shows no oil wells at or near the Property.
- *South Coast Air Quality Management District (SCAQMD, <https://www.aqmd.gov/nav/FIND/facility-information-detail>)* - A search online of SCAQMD’s facility and information detail system (FINDS) show no listings for any of the Property addresses.

8.8 Synopsis of Previous Environmental Investigations

In February 2021, TRG performed a “Phase II” at the Site to confirm or mitigate the former dry cleaner REC identified during Phase I preliminary research (ref: *Phase II Soil Vapor Investigation Report*, dated February 19, 2021, see **Appendix F**).

On February 12, 2021, six soil vapor probes (SV1 through SV6) were advanced inside and near the former dry cleaner building to five feet below ground surface (ft bgs) in locations that might detect

former dry-cleaning chemicals Laboratory results were “non-detect” for all volatile organic compounds (VOCs) analyzed, including tetrachloroethylene (PCE). As such, it appears that no vapor intrusion risk exists to occupants of the Site.

9.0 CONCLUSIONS & OPINIONS

In February 2021, a Phase I Environmental Site Assessment (Phase I ESA), consistent with American Society for Testing Materials (ASTM) Standard E1527-13 was performed for the mixed commercial and residential Property located at adjoining addresses 6014, 6016, and 6018 S. Norwalk Boulevard in Whittier, California.

Based on historical research and the Property reconnaissance, the following REC was identified at the 6014 S. Norwalk Boulevard Property address:

1. Former dry cleaner for over 20 years (approximately 1969 to 1993) indicating potential for chlorinated solvent impact, particularly PCE, in soil and groundwater beneath the Property.

Although owner representatives assert that the dry cleaner was a drop-off/pick-up site only with no dry cleaning at the Property, in an abundance of caution, the prospective developer opted to perform a Phase II Soil Vapor Investigation to confirm or mitigate the dry cleaner REC (see Section 8.8 and **Appendix F – Phase II Soil Vapor Investigation Report**). Six shallow soil vapor probes (SV1 through SV6) were advanced inside and near the 6014 building on February 12, 2021. No VOCs, including PCE, were detected in any of the soil vapor samples collected. Additionally, no TPHg was detected in SV1 through SV6. As such, the dry cleaner REC at the Site has been mitigated and no vapor intrusion risk appears to exist.

It is the opinion of The Reynolds Group that no further environmental investigation of the Property is warranted at this time.

11.0 PROFESSIONAL CREDENTIALS

All work associated with this Environmental Site Assessment was performed by or under the direct supervision of F. Edward Reynolds, Jr. Mr. Reynolds has worked in the environmental industry for more than 30 years and holds several credentials including those of a Registered Environmental Property Assessor (#963067) and California Registered Civil Engineer (No. 38677). Mr. Reynolds meets the certification, licensing, education, and experience required under EPA's 40 CFR Part 312 for "Environmental Professionals". TRG, established in 1989, provides environmental consulting and contracting services.

Rosanne Fischer has worked in the environmental industry for more than 25 years. Ms. Fischer is a Registered Environmental Property Assessor (REPA No. 419564) and performs numerous Phase I Environmental Site Assessments each year. Ms. Fischer meets the certification, licensing, education, and experience required under EPA's 40 CFR Part 312 for "Environmental Professionals".

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by The Reynolds Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

RGA LUST.....	Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/26/2020 has revealed that there are 3 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 12 LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CERS TANKS: List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs.

A review of the CERS TANKS list, as provided by EDR, and dated 10/19/2020 has revealed that there are 3 CERS TANKS sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 10 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there are 7 HIST CORTESE sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 05/14/2017. OBSERVATION: Copies of hazardous waste disposal records for 2013-2017 were not available at time of inspection. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. Observed operator was not able to provide copies of manifests. Per employee, outside vendor (Fuel Markets Alliance) services the dispensers and sumps and removes waste after service. Provide copies of manifests or proof that hazardous waste is properly disposed. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 4/9/17.

Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 05/14/2017. OBSERVATION: Copies of hazardous waste disposal records for 2013-2016 were not found on site. Hazardous waste generators shall retain copies of all manifests signed off by the disposal facility and all receipts used in a consolidated manifesting procedure on site for three years and have them readily available for review. Operator was unable to provide copies of manifests for the following waste streams - used oil, waste antifreeze, and used oil filters. CORRECTIVE ACTION: Immediately locate a copy of all manifests and receipts for the last three years, maintain them on site, and submit copies to the CUPA by 4/9/17.

Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)

Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.

Violation Notes: Returned to compliance on 07/01/2019. OBSERVATION: Trash enclosure drums storing Hazardous Waste (HW) with deteriorated HW labels affixed (1) 55-gallon poly drum storing used coolant (1) 55-gallon metal drum storing water/gas mixture HW labeling missing (1) 55-gallon metal drum storing unpunctured/crush oil meta filter and paper oil filters
CORRECTIVE ACTION: Since the last disposal date and/or accumulation start date is unknown and the HW may have exceeded 180-days of storage, contact a registered hazardous waste transporter to dispose and submit a copy of the manifest/receipt to LACoFD.

Completed Document Type: Remedial Action Completion Report
Completed Date: 08/14/2012
Comments: The Final Groundwater Closure Report dated July 2012 has been approved.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Workplan
Completed Date: 04/20/2004
Comments: RAW approved 4/20/04.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 07/02/2003
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/04/1993
Comments: The Department completed review of the PEA on January 4, 1993. The levels of the contaminants at the site was above the regulatory limit. Therefore, the Department recommended further investigation and assessment of the site. Any proposed further investigation or assessment must be conducted under the supervision of the Department.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 07/14/1992
Comments: The site is a one-half acre property used for commercial business operations. It is believed that gas manufacturing begun on the site about 1903 and ended about 1915. The site is currently owned and occupied by Russell Bassett Company manufacturing of business interiors. The Dept. received a notice of intent to initiate a PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/19/2007
Comments: DTSC has determined that the Final Soil Closure Report dated January 2007 meets all of the conditions of the approved RAW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/06/2006
Comments: Response to DTSC comments received on 9/12/2006 is adequate and no revision of the report is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/02/2006
Comments: DTSC determines the 4th Quarterly Groundwater Monitoring Report dated September 2006 does not require revision, and that monitoring of

S102564455

Completed Document Type: Preliminary Endangerment Assessment Report
Completed Date: 01/04/1993
Comments: The Department completed review of the PEA on January 4, 1993. The levels of the contaminants at the site was above the regulatory limit. Therefore, the Department recommended further investigation and assessment of the site. Any proposed further investigation or assessment must be conducted under the supervision of the Department.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 07/14/1992
Comments: The site is a one-half acre property used for commercial business operations. It is believed that gas manufacturing begun on the site about 1903 and ended about 1915. The site is currently owned and occupied by Russell Bassett Company manufacturing of business interiors. The Dept. received a notice of intent to initiate a PEA.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Removal Action Completion Report
Completed Date: 03/19/2007
Comments: DTSC has determined that the Final Soil Closure Report dated January 2007 meets all of the conditions of the approved RAW.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 09/06/2006
Comments: Response to DTSC comments received on 9/12/2006 is adequate and no revision of the report is required.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 11/02/2006
Comments: DTSC determines the 4th Quarterly Groundwater Monitoring Report dated September 2006 does not require revision, and that monitoring of groundwater for chemicals of concern and parameters of bio-activity should continue.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 02/05/2007
Comments: DTSC agreed with the recommendation as presented in the document, dated November 2006, and that requires no revision on the document.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Monitoring Report
Completed Date: 07/06/2007
Comments: The Final 6th Quarterly Groundwater Monitoring Report dated June 2007 adequately address the comments dated 5/18/2007.

Completed Date: 12/08/1994
Comments: CalSites Validation Program confirms NFA for DTSC.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 07/01/1991
Comments: Disposal practices not known prior to 1987. Dolco has been on the site since 1967 and manufacturing food containers from styrofoam. Site was a vacant lot prior to 1967. From 1988 onwards the company began using DIFLUROCHLORO METHANE blowing agent. The wastes are styrofoam wastes, solvents & lubricating oils to maintain machinery. Styrofoam accepted from customers for recycling. LACDHS issued a notice of violation in 1984 to legally dispose hazardous waste and another one in 1987 to dis continue hazardous waste disposal to ground. Ground water table is below 40 feet. Railroad spur area is unpaved and potential for air releases. EPA recommends no further action under CERCLA in the pa report. Low priority PEA recommended for DHS because of the evidence of onsite disposal of hazardous waste. Not reported

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Telephone: 703-603-8704
Last EDR Contact: 12/23/2020
Next Scheduled EDR Contact: 04/12/2021
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/28/2020
Date Data Arrived at EDR: 11/05/2020
Date Made Active in Reports: 11/25/2020
Number of Days to Update: 20

Next Scheduled EDR Contact: 04/26/2021
Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/26/2021
	Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/14/2020	Source: EPA
Date Data Arrived at EDR: 12/17/2020	Telephone: 800-424-9346
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020

	Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/06/2020	Source: Department of the Navy
Date Data Arrived at EDR: 08/21/2020	Telephone: 843-820-7326
Date Made Active in Reports: 11/11/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 02/22/2021
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695
Date Made Active in Reports: 11/18/2020	Last EDR Contact: 11/05/2020
Number of Days to Update: 13	Next Scheduled EDR Contact: 03/08/2021
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/28/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/05/2020	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 09/21/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/22/2020	Telephone: 916-323-7905
Date Made Active in Reports: 12/11/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 80	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 08/31/2020	Source: DTSC and SWRCB

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
WHITTIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile NW
Site Name:	Dolco Packaging Plant
Site EPA ID Number:	CAD982050601
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	20 feet to 100 feet.
Hydraulic Connection:	A hydraulic connection exists between aquifers under the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

1G	1/4 - 1/2 Mile NW	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Surficial Soil Types: loam
 clay
 silt loam
 loamy sand
 sandy loam
 fine sand
 clay loam
 gravelly - sandy loam
 coarse sand
 gravelly - sand
 sand

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sand
 silty clay

Deeper Soil Types: stratified
 clay loam
 silty clay loam
 gravelly - sandy loam
 coarse sand
 sand
 weathered bedrock
 very fine sandy loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

FED USGS USGS40000139665

Organization ID:	USGS-CA		
Organization Name:	USGS California Water Science Center		
Monitor Location:	002S011W18L030S	Type:	Well
Description:	PR-11, 2IN PVC WELL ON BERM ,36 FT DEPTH		
HUC:	18070106	Drainage Area:	Not Reported
Drainage Area Units:	Not Reported	Contrib Drainage Area:	Not Reported
Contrib Drainage Area Units:	Not Reported	Aquifer:	California Coastal Basin aquifers
Formation Type:	Not Reported	Aquifer Type:	Not Reported
Construction Date:	19930108	Well Depth:	36
Well Depth Units:	ft	Well Hole Depth:	38
Well Hole Depth Units:	ft		

Ground water levels,Number of Measurements:	276	Level reading date:	2000-09-12
Feet below surface:	14.89	Feet to sea level:	Not Reported
Note:	Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE MAP FINDINGS

Level reading date:	2000-09-12	Feet below surface:	14.89
Feet to sea level:	Not Reported	Note:	Not Reported
Level reading date:	2000-08-17	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-17	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-15	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-15	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-08	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-08	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-04	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-04	Feet below surface:	Not Reported
Feet to sea level:	Not Reported		
Note:	An obstruction was encountered in the well above the water surface (no water level recorded).		
Level reading date:	2000-08-03	Feet below surface:	8.69

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Contact: Rosanne Fischer

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Reynolds Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Good afternoon Rosanne Fischer,

In response to your California Public Records Act (CPRA) request dated February 1, 2021 regarding historical building permits for 6014 S. Norwalk Blvd, 6016 S. Norwalk Blvd, and 6018 S. Norwalk Blvd, the City Clerk Department has compiled the following response:

- Attached are two documents containing building permit records for the subject properties.

This concludes the City's response to your CPRA request. If you have any questions regarding this matter, please call the City Clerk Department at (562) 567-9850.

Sincerely,

Iñah Casillas | Office Specialist
 City Clerk Department | 13230 Penn St. | Whittier, CA 90602

DO NOT SEPARATE

DECLARATIONS

The Declarations below are mandated by the State of California under Section 19825 of The Health and Safety Code.

- APPLICANT -

CONTRACTOR: FILL IN DECLARATION 1, 3, 4 AND 5

OWNER: FILL IN DECLARATION 2, 4 AND 5

1. LICENSED CONTRACTOR'S DECLARATION

I hereby affirm that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License Class c10 License No. 780658
Date 8-26-05 Contractor William Torres

2. OWNER-BUILDER DECLARATION

I hereby affirm that I am exempt from the Contractor's License Law for the following reason (Sec. 7031.5, California Business and Professions Code: Any City which requires a permit to construct, alter, improve, demolish or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he is a licensed contractor pursuant to the provisions of the Contractor's License Law (Ch. 9 (Commencing with Sec. 7000) of Div. 3 of the B. & P. C.) or that he is exempt therefrom and the basis for the alleged exemption. Any violations of Sec 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500.00).):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, B. & P. C.: The Contractor's License Law does not apply to an owner of property who builds or improves thereon, and who does such work himself or through his own employees, provided that such improvements are not intended or offered for sale. If, however, the building or improvement is sold within one year of completion, the owner-builder will have the burden of proving that he did not build or improve for the purpose of sale.)

I, as owner of the property, am exclusively contracting with licensed contractors to construct the project (Sec. 7044, B. & P. C.: The Contractors License Law does not apply to an owner of contracts for such projects with a contractor(s) licensed pursuant to the Contractor's License Law.)

I am exempt under Sec. _____, B. & P. C. for this reason:

Date _____ Owner _____

3. WORKER'S COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are:

Carrier _____

Policy Number _____

(The following section need not be completed if permit valuation is \$100 or less)

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the worker's compensation laws of California, and agree that if I should become subject to the workers' compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 8-26-05 Applicant: William Torres

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL, AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

4. CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued. (Section 3097, Civil Code).

Lender's Name _____

Lender's Address _____

5. I certify that I have read this application and state that the above information is correct. I agree to comply with all city and county ordinances and state laws relating to building construction, and hereby authorize representatives of this city to enter upon the above-mentioned property for inspection purposes.

Signature of Applicant or Agent Date 8-26-05

IMPORTANT

Application is hereby made to the Director of Building and Safety for a permit subject to the conditions and restrictions hereon.

- 1. Each person upon whose behalf this application is made and each person at whose request for whose benefit work is performed under or pursuant to any permit issued as a result of this application agrees to and shall, indemnify and hold harmless the City of Whittier, its officers, agents and employees.
2. Any permit issued as a result of this application becomes null and void if work is not commenced within ONE HUNDRED EIGHTY - (180) DAYS from date of issuance of such permit.

RE: PRA of February 03, 2021, Reference # H033374-020321.

Dear Environmental Assessor Rosanne Fischer,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

**Re: 6014 S Norwalk Boulevard
Whittier CA 90606**

The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

WHITTIER, CALIFORNIA**

SUBJECT: PHASE II SOIL VAPOR INVESTIGATION REPORT

Dear Mr. Parchen,

This report summarizes work performed by The Reynolds Group (TRG) in February 2021 at the mixed commercial and residential property located at adjoining addresses 6014, 6016, and 6018 Norwalk Boulevard in Whittier, California (see **Figure 1** – Site Location Map). Preliminary Phase I Environmental Site Assessment (ESA) research indicated that a dry cleaner once operated at the 6014 Site address from at least 1966 to 1995 (see **Attachment A** – City Directory). This is considered a recognized environmental condition (REC) as identified in ASTM Standard E1527-13 due to potential chlorinated solvent impact beneath the Site. Although no dry cleaning reportedly took place on Site (drop-off and pick-up only), in an abundance of caution, our Client opted to perform a soil vapor survey to confirm or mitigate the former dry cleaner REC.

1.0 EXECUTIVE SUMMARY

On February 12, 2021, six soil vapor probes (SV1 through SV6) were advanced inside and near the former dry cleaner building to five feet below ground surface (ft bgs). Probe locations are shown on the attached **Figure 2**. Laboratory results were “non-detect” for all volatile organic compounds (VOCs) analyzed, including tetrachloroethylene (PCE). As such, it appears that no vapor intrusion risk exists to occupants of the Site.

Based on results of the soil vapor survey detailed herein and the *Phase I Environmental Site Assessment Report*, dated February 19, 2021, the former dry cleaner REC at the Site has been mitigated. In TRG's opinion, no further environmental investigation at the Site is warranted at this time.

2.0 FIELDWORK

Prior to beginning the fieldwork, Dig-Alert was contacted for underground utility clearance. In addition, all interested parties were notified in advance of the project schedule. Areas of investigation at the Site are shown on the attached **Figure 2 – Site Plan with Soil Vapor Probes**.

On February 12, 2021, TRG in conjunction with Optimal Technology of Thousand Oaks, California, collected six soil vapor samples (SV1 through SV6) from approximately 5 ft bgs at various locations in and near the former dry cleaner unit. Soil vapor sampling followed the July 2015 DTSC/LARWQCB *Advisory - Active Soil Gas Investigations (the Advisory)*.

Soil Vapor Probe Installation

The placement of the temporary soil vapor probes was performed by hydraulically pushing one-inch diameter stainless steel soil vapor probes to the desired depth. Once the probes were installed, hydrated bentonite chips were placed around the probes at the ground surface to ensure proper seal of the probes, and soil vapor samples were directly sampled through the probes. Soil vapor was first purged and then collected. Clean gas probes were used for each sampling location.

Soil Vapor Sampling

Soil vapor samples were collected from the termination of each probe, at a constant low flow rate measuring 200 milliliters per minute (ml/min) as shown by an in-line vacuum gauge to limit stripping (i.e. enhanced compound partitioning from impacted soil or groundwater), and to prevent ambient air intrusion and increase the likelihood of representative samples. A three volume purge was used for the soil vapor sampling. New tubing was used at each sampling point to prevent cross contamination.

Leak testing was conducted at every soil vapor probe location. Isobutane, found in common shaving cream, was used as the tracer gas. The tracer gas compound was applied to the soil vapor probes at each point of connection in which ambient air could enter the sampling system, including the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. A detection of the tracer compound in the subsurface soil vapor sample indicates that ambient air intrusion occurred. No leaks were determined to have occurred during the sampling activities.

Vapor samples were obtained in SGE gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection.

After sampling, the soil probe locations were backfilled with hydrated bentonite chips and the surfaces repaired with quick setting concrete. No field wastes were generated during the soil vapor work.

Results of the soil vapor sampling are addressed in the following section of this report.

3.0 INVESTIGATION RESULTS

All soil vapor samples (SV-1 through SV-6) were immediately analyzed on-Site by Optimal Technology for total petroleum hydrocarbons as gasoline (TPHg) and VOCs using EPA Method 8260B. No TPHg or VOCs were detected in any of the six soil vapor samples above the laboratory's reporting limit.

5.0 CONCLUSIONS AND RECOMMENDATIONS

Based on results of the soil vapor survey detailed herein and the *Phase I Environmental Site Assessment Report*, dated February 19, 2021, the former dry cleaner REC at the Site has been mitigated. In addition, no vapor intrusion risk is apparent at the Site and, as such, the Site should be cleared for unrestricted development without vapor mitigation for VOCs. No further environmental investigation at the Site is warranted at this time.

6.0 REGISTERED PROFESSIONAL STATEMENT

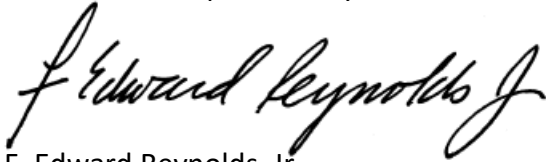

All work on this project was performed under the responsible charge of a California Registered Civil Engineer. The licensed professional whose signature and seal appears at the end of this report supervised and/or conducted all work associated with the project.

Please contact me directly with any questions at 714-920-9310 or by email to reynolds@reynolds-group.com.

Sincerely,

THE REYNOLDS GROUP

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

OPTIMAL LABORATORY ANALYTICAL REPORT

February 16, 2021

Ms. Rosanne Fischer
The Reynolds Group
520 W. 1st St.
Tustin, CA 92780

Dear Ms. Fischer:

This letter presents the results of the soil vapor investigation conducted by Optimal Technology (Optimal), for The Reynolds Group on February 12, 2021. The study was performed at 6014-6018 S. Norwalk Blvd., Whittier, California.

Optimal was contracted to perform a soil vapor survey at this site to screen for possible chlorinated solvents and aromatic hydrocarbons. The primary objective of this soil vapor investigation was to determine if soil vapor contamination is present in the subsurface soil.

Gas Sampling Method

Gas sampling was performed by hydraulically pushing soil gas probes to a depth of 5.0 feet below ground surface (bgs). An electric rotary hammer drill was used to drill a 1.0-inch diameter hole through the overlying surface to allow probe placement when required. The same electric hammer drill was used to push probes in areas of resistance during placement.

At each sampling location, an electric vacuum pump set to draw 0.2 liters per minute (L/min) of soil vapor was attached to the probe and purged prior to sample collection. Vapor samples were obtained in gas-tight syringes by drawing the sample through a luer-lock connection which connects the sampling probe and the vacuum pump. Samples were immediately injected into the gas chromatograph/purge and trap after collection. New tubing was used at each sampling point to prevent cross contamination.

All analyses were performed on a laboratory grade Agilent model 6890N gas chromatograph equipped with an Agilent model 5973N Mass Spectra Detector and Tekmar LSC 3100 Purge and Trap. A Restek column using helium as the carrier gas was used to perform all analysis. All results were collected on a personal computer utilizing Agilent's MS and chromatographic data collection and handling system.

Quality Assurance

5-Point Calibration

The initial five-point calibration consisted of 20, 50, 100, 200 and 500 ul injections of the calibration standard. A calibration factor on each analyte was generated using a best fit line method using the Agilent data system. If the r^2 factor generated from this line was not greater than 0.990, an additional five-point calibration would have been performed. Method reporting limits were calculated to be 1-1000 micrograms per cubic meter ($\mu\text{g}/\text{m}^3$) for the individual compounds.

A daily calibration check was performed using a pre-mixed standard supplied by Scotty Analyzed Gases. The standard contained common halogenated solvents and aromatic hydrocarbons (see Table 1). The individual compound concentrations in the standards ranged between 0.025 nanograms per microliter ($\text{ng}/\mu\text{l}$) and 0.25 $\text{ng}/\mu\text{l}$.

TABLE 1

Acetone	Benzene	Bromobenzene	Bromochloromethane
Bromodichloromethane	Bromoform	Bromomethane	2-Butanone (MEK)
n-Butylbenzene	sec-Butylbenzene	tert-Butylbenzene	Carbon Tetrachloride
Chlorobenzene	Chloroethane	Chloroform	Chloromethane
2-Chlorotoluene	4-Chlorotoluene	Cyclohexane	Dibromochloromethane
1,2-Dibromo-3-chloropropane	1,2-Dibromoethane	Dibromomethane	1,2-Dichlorobenzene
1,3-Dichlorobenzene	1,4-Dichlorobenzene	Dichlorodifluoromethane	1,2-Dichloroethane
1,1-Dichloroethane	1,1-Dichloroethene	cis-1,2-Dichloroethene	trans-1,2-Dichloroethene
1,2-Dichloropropane	2,2-Dichloropropane	1,3-Dichloropropane	1,1-Dichloropropene
Ethylbenzene	Freon 113	Hexachlorobutadiene	Isopropylbenzene
p-Isopropyltoluene	Methylene Chloride	4-Methyl-2-Pentanone	Naphthalene
n-Propylbenzene	Styrene	1,1,1,2-Tetrachloroethane	1,1,2,2-Tetrachloroethane
Tetrachloroethene	Toluene	1,2,3-Trichlorobenzene	1,2,4-Trichlorobenzene
1,1,1-Trichloroethane	1,1,2-Trichloroethane	Trichloroethene	Trichlorofluoromethane
1,2,3-Trichloropropane	1,2,4-Trimethylbenzene	1,3,5-Trimethylbenzene	Vinyl Chloride
m/p-Xylene	o-Xylene	Diisopropyl Ether	Ethyl Tert Butyl Ether
MTBE	Tert-Amyl Methyl Ether	Tertiary Butyl Alcohol	Isobutane

Sample Replicates

A replicate analysis (duplicate) was run to evaluate the reproducibility of the sampling system and instrument. The difference between samples did not vary more than 20%.

Equipment Blanks

Blanks were run at the beginning of each workday and after calibrations. The blanks were collected using an ambient air sample. These blanks checked the septum, syringe, GC column, GC detector and the ambient air. Contamination was not found in any of the blanks analyzed during this investigation. Blank results are given along with the sample results.

Purge Volume

The standard purge volume of three volumes was purged in accordance with the July 2015 DTSC/RWQCB Advisory for Active Soil Gas Investigations.

Tracer Gas Leak Test

A tracer gas was applied to the soil gas probes at each point of connection in which ambient air could enter the sampling system. These points include the top of the sampling probe where the tubing meets the probe connection and the surface bentonite seals. Isobutane was used as the tracer gas. No Isobutane was found in any of the samples collected.

Shut-in Test

A shut-in test was conducted prior to purging or sampling each location to check for leaks in the above-ground sampling system. The system was evaluated to a minimum measured vacuum of 100 inches of water. The vacuum gauge was calibrated and sensitive enough to indicate a water pressure change of at least 0.5 inches.

Scope of Work

To achieve the objective of this investigation a total of 7 vapor samples were collected from 6 locations at the site. Sampling depths, vacuum readings, purge volume and sampling volumes are given on the analytical results page. All the collected vapor samples were analyzed on-site using Optimal's mobile laboratory.

Subsurface Conditions

Subsurface soil conditions offered sampling flows at 0" water vacuum.

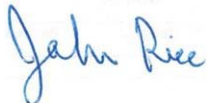

Results

During this vapor investigation, none of the compounds listed in Table 1 above were detected above the listed reporting limits. A complete table of analytical results is included with this report.

Disclaimer

All conclusions presented in this letter are based solely on the information collected by the soil vapor survey conducted by Optimal Technology. Soil vapor testing is only a subsurface screening tool and does not represent actual contaminant concentrations in either the soil and/or groundwater. We enjoyed working with you on this project and look forward to future projects. If you have any questions, please contact me at (877) 764-5427.

Sincerely,

John Rice
Project Manager
