

Office of Planning and Research State Clearinghouse Summary Form for Electronic Document Submittal

Date: Tuesday, March 7, 2023

Project Title: Livermore General Plan 2045, also known as Imagine Livermore 2045

CEQA Document: Environmental Impact Report

State Clearinghouse Number: none issued yet

Lead Agency: City of Livermore

Lead Agency Contact Name: Andy Ross, Economic Development Manager

Email: aaross@LivermoreCA.gov

Phone Number: (925) 960-4475

Project Location (City and County): City of Livermore, Alameda County

Project Description (Proposed actions, location, and/or consequences):

The City of Livermore is preparing a comprehensive update to its existing General Plan. The update will guide the City's development and conservation through 2045. State law requires that the General Plan contain eight elements: Land Use, Circulation, Housing, Open Space, Noise, Safety, Conservation, and Environmental Justice. The overall purpose of the proposed General Plan 2045 is to create a policy framework that articulates a vision for the General Plan planning area in 2045. The key components of the proposed project will include broad community goals for the future of Livermore and specific policies and implementing actions that will help meet the goals. The proposed General Plan 2045 will add new and expanded policy topics to address the current requirements of State law, modernize the City's policy framework, and update the General Plan land use map to plan for future services, jobs, parks, and housing and to address land use mapping issues and inconsistencies. To achieve the proposed General Plan 2045 vision, the City will analyze land use alternatives and will prepare a refined preferred land use scenario that is developed through an extensive public process. Details of the public process and alternatives will be available on the project website for the proposed General Plan 2045 at <https://imagineLivermore2045.org/>. General Plan land use changes supporting additional development capacity will occur primarily in select focus areas.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The EIR for the proposed project will address the range of impacts that could result from the proposed project. The following environmental topics will be examined in the EIR: aesthetics, agricultural and forestry resources, air quality, biological resources, cultural and tribal cultural resources, energy, geology and soils, greenhouse gas emissions, hazards and hazardous materials, hydrology and water quality, land use and planning, mineral resources, noise, population and housing, public services, parks, and recreation, transportation, utilities and system services, and wildfire.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
