 Drainage/Absorption Population/Housing Balance Toxic/Hazardous Cumulative Effects
 Economic/Jobs Public Services/Facilities Traffic/Circulation Other: _____

Present Land Use/Zoning/General Plan Designation:

General Plan- Low Intensity Office/R&D; Zoning- Light Industrial (ML)

Project Description: (please use a separate page if necessary)

The project would make changes to the existing industrial building on the site including: seismic upgrades to the building, upsizing the power supply from 1.6 megawatt (MW) to 9 MW (provided by two new 4.5 MW feeds from SVP), installation of five 2,000-kilowatt (kW) back-up generators (each would include an associated 4,000-gallon above ground diesel tank), and installation of five 427-ton free cooling chillers. No new SVP substations would be required or constructed as part of this upsizing. Additional site improvements would include upgrades to existing hardscape, parking areas, and landscaping, to improve appearance and meet applicable ADA standards. Sidewalks would be added along Raymond Street to the north and east to facilitate pedestrian access to the project site. A new connection to the existing recycled water line that runs along Raymond Street to the east of the project site would be added on the south side of the building.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with and "X".
If you have already sent your document to the agency please denote that with an "S".
