

**Proposed Project
Total Construction-Related Gasoline Usage**

Action	Carbon Dioxide Equivalents (CO₂e) in Metric Tons	Conversion of Metric Tons to Kilograms	Construction Equipment Emission Factor¹	Total Gallons of Fuel Consumed
Project Construction	42.5364	42536.4	10.15	4,191
	<small>Per CalEEMod Output Files.</small>	<small>Per Climate Registry Equation 13e</small>	<small>Per Climate Registry Equation 13e</small>	

Total Gallons Consumed During Project Construction:

4,191

Notes:

¹Fuel used by all construction equipment, including vehicle hauling trucks, assumed to be diesel.
