Project Description (Proposed actions, location, and/or consequences).

The City of La Verne is preparing a comprehensive update to its existing General Plan and Zoning Ordinance. The General Plan is being prepared to address the requirements of State law and the relevant items addressed in Government Code Section 65300 et seq. The La Verne General Plan will include all of the State-mandated elements, and will address five optional topics: Community Design, Community Services and Facilities, Economic Development, Fiscal Sustainability, and Health and Wellness. The General Plan is intended to be an expression of the community's vision for the City and Planning Area and constitutes the policy and regulatory framework by which future development projects will be reviewed and public improvements will be implemented. The City will also update its Zoning Ordinance, codified in Title 18 of City of La Verne Municipal Code, to ensure consistency with the revised General Plan.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

The Draft EIR has identified the following environmental issue areas as having significant and unavoidable environmental impacts from implementation of the Project: Air Quality and Cumulative Air Quality, Greenhouse Gas Emissions and Cumulative Greenhouse Gas Emissions, and Transportation related to Vehicle Miles Traveled. All other environmental issues were determined to have no impact, less than significant impacts, or less than significant impacts with implementation of General Plan Update goals, policies, and actions.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.
