Project Description (Proposed actions, location, and/or consequences).

The purpose of the 2022 WRMP Update is to revise and update Otay Water District's (District) 2015 WFMP. The 2022 WFMP Update would identify proposed potable and recycled water CIP facilities (e.g., pump stations, storage reservoirs, transmission mains) and associated probable cost estimates to meet projected water demands and to address aging pipeline infrastructure within the District planning area and the identified area of influence in unincorporated San Diego County. The 2022 WFMP Update would develop a phased approach to outline the Capital Improvement Projects necessary to meet projected customer demands during the following time frames: 2028 (Near Term) and 2055 (Long Term).

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

To be determined through the preparation of a program environmental impact report.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

There are no known areas of controversy at this time.
