Gepaid: CAD076528678
TSD EPA ID: UTD981552177
CA Waste Code: 181 - Other inorganic solid waste
Disposal Method: H040 - Incineration--Thermal Destruction Other Than Use As A Fuel
Tons: 21.685

Year: 2021
Gepaid: CAD076528678
TSD EPA ID: UTD981552177
CA Waste Code: 141 - Off-specification, aged or surplus inorganics
Disposal Method: H141 - Storage, Bulking, And/Or Transfer Off Site--No Treatment/Reovery (H010-H129) Or (H131-H135)
Tons: 0.124

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

NPDES Number: CA0004910 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board

Subregion: 2

Facility Telephone: Not reported

Facility Contact: ATTN: SANDY GALGANSKI

Agency Name: THE DOW CHEMICAL COMPANY

Agency Address: PO BOX 1398

Agency City,St,Zip: PITTSBURG 94565

Agency Contact: RANDY FISCHBACK

Agency Telephone: 9254325122

Agency Type: Private

SIC Code: 2819

SIC Code 2: 2879

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Primary Waste: FILBRI

Waste Type2: I

Waste2: Filter Backwash Brine Waters

Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.

Secondary Waste: Stormwater Runoff

Secondary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Design Flow: 1

Baseline Flow: 1

Reclamation: No reclamation requirements associated with this facility.

POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.

Treat To Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic impairment would include nuisance from a waste treatment facility.

Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

Name: THE DOW CHEMICAL COMPANY

Address: 901 LOVERIDGE RD

City: PITTSBURG

Facility ID: San Francisco Bay 071017002

Facility Type: Solid Waste Site-Class I - A solid waste facility at which hazardous waste may be treated or stored.

Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Waste Type2: D
Waste2: Process Waste (Waste produced as part of the industrial/manufacturing process)
Primary Waste Type: Hazardous/Influent or Solid Wastes that contain toxic, corrosive, ignitable or reactive substances and must be managed according to applicable DOHS standards.
Secondary Waste: Washwater Waste (Product washwater wastes: E.G., photo reuse wastewater, vegetable washwater)
Secondary Waste Type: Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
Treat To Water: Major Threat to Water Quality. A violation could render unusable a ground water or surface water resource used as a significant drink water supply, require closure of an area used for contact recreation, result in long-term deleterious effects on shell fish spawning or growth areas of aquatic resources, or directly expose the public to toxic substances.
Complexity: Category A - Any major NPDES facility, any non-NPDES facility (particularly those with toxic wastes) that would be a major if discharge was made to surface or ground waters, or any Class I disposal site. Includes any small-volume complex facility (particularly those with toxicwastes) with numerous discharge points, leak detection systems or ground water monitoring wells.

DOW CHEMICAL CO PITTSBURG FACILITY - LANDFILL (Continued)

S110420971

Site History: The Dow Chemical Company owns and operates a chemical manufacturing facility at 901 Loveridge Road in Pittsburg, California. The site is bounded by the New York Slough on the north, the Pittsburg-Antioch Highway on the south, Loveridge Road on the west, and parklands and commercial areas on the east. Residential areas exist further to the south beyond the Antioch-Pittsburg Highway. The site occupies approximately 993 acres of which approximately 235 acres are a wetland preserve located on the eastern side of the facility. In addition to active chemical manufacturing facilities, the site contains an active Class II (designated) solid waste landfill and a number of closed solid waste disposal units. (More information on the landfill can be found in Geotracker ID # L10002834653) Dow currently manufactures latex, agricultural chemicals, fumigants, fungicides, and hydrochloric acid at their Pittsburg facility. Historically, Dow used the site to manufacture chlorine, sodium hydroxide, hydrogen, and chlorinated solvents, including carbon tetrachloride and tetrachloroethene. In addition to chemical manufacturing activities, Dow conducts chemical development research at its Pittsburg facility. The Calpine Corporation operates a power plant on site, producing electricity and steam. The Cynera Company and M.G. Generon fabricate reverse osmosis membranes on the Dow property. Since March 2000, Dow has operated the prototype EISB system proposed in their 1999 revised corrective action plan in lieu of the site-wide hydraulic containment remedy proposed in their 1997 corrective action plan. See ECM and Fortis for more documents. An effectiveness evaluation report of the EISB system was submitted in March 2006.

Injuries: No
Fatals: No
Comments: Not reported
Description: Caller states there was a release of methylene chloride due to over pressuring of vessel. Caller also stated that the amount released is unknown but expected to be above the 1,000 pound reportable quantity. The release was into the atmosphere and unrecoverable. No waterways were impacted. Other unreportable chemicals associated with the release are being cleaned by on-site personnel.

Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P020
Waste Description: Dinoseb (Or) Phenol, 2-(1-Methylpropyl)-4,6-Dinitro-

Waste Code: P087
Waste Description: Osmium Oxide Oso4, (T-4)- (Or) Osmium Tetroxide

Waste Code: U002
Waste Description: 2-Propanone (l) (Or) Acetone (l)

Waste Code: U008
Waste Description: 2-Propenoic Acid (l) (Or) Acrylic Acid (l)

Waste Code: U009
Waste Description: 2-Propenenitrile (Or) Acrylonitrile

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U084
Waste Description: 1,3-Dichloropropene (Or) 1-Propene, 1,3-Dichloro-

Waste Code: U112
Waste Description: Acetic Acid, Ethyl Ester (l) (Or) Ethyl Acetate (l)

Completed Date: 10/14/2015
Comments: Not reported

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Interim Measures Implementation Report
Completed Date: 09/13/2011
Comments: Tank removed, groundwater and soil sampled pumped and removed.

Completed Area Name: Site L-B
Completed Sub Area Name: Unit 1 Landfill (CAMU)
Completed Document Type: Operation and Maintenance Report
Completed Date: 02/08/2012
Comments: Report is complete and observations are compatible with requirements and specifications.

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Fieldwork
Completed Date: 02/28/2010
Comments: Investigation completed, included a MIP investigation, the installation, development and samplinf of 13 additional wells, and the removal of a UGST found during well installation.

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Corrective Measures Study Report
Completed Date: 10/24/2014
Comments: Technical Completion Approval. Final Approval pending public review.

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Remedial Action Completion Report
Completed Date: 08/04/2017
Comments: SWMU 4 Construction Corrective Measures Completion Report documents the corrective measures construction activities completed to address soil and groundwater impacts identified for SWMU 4 and downgradient areas extending north to the Third Street property boundary. Corrective measures implementation includes targeted excavation, soil vapor extraction, groundwater extraction, treatment and disposal, and zero valent iron (ZVI) injections.

Completed Area Name: SWMU 4
Completed Sub Area Name: SWMU 4
Completed Document Type: Interim Measures Workplan
Completed Date: 01/11/2011
Comments: Workplan calls for removal of UGST and associated piping. UGST contains petroleum hydrocarbon residues. Addresses all of our issues

Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple
Violation Description: APSA Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 10/18/2013.
Violation Division: Contra Costa County Health Services Department
Violation Program: APSA
Violation Source: CERS,

Site ID: 399999
Site Name: PSC Industrial Outsourcing Pittsburg
Violation Date: 03-05-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: The business failed to complete and electronically submit chemical inventory information for all reportable hazardous materials on site at or above reportable quantities. Currently the 10,000gal Mix Tank is missing from the inventory. Additionally, please rename Provox to a more generic - Sodium Percarbonate name, as facility no longer utilizes this brand. Rename Tallow Product to reflect that input is no longer Tallow (ex: Oil product, or Vegetable Oil Product, etc). Work with UPI to ensure the Iron oxide is captured on this inventory or theirs, as well as the 2 totes of degreaser in the OSU and update the inventory as necessary or let CCHSHMP know if it is on UPI's inventory. CORRECTIVE ACTION: Complete and electronically submit the chemical inventory information for all reportable hazardous materials on site at or above reportable quantities.
Violation Division: Contra Costa County Health Services Department
Violation Program: HMRRP
Violation Source: CERS,

Site ID: 399999
Site Name: PSC Industrial Outsourcing Pittsburg
Violation Date: 03-05-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to annually review and electronically certify that the business plan is complete and accurate on or before the annual due date.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: The business failed to electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA on or before the annual due date. Facility has submitted their annual submittal, however their business phone has been disconnected for several phones due to an interruption of service. This must be updated on your owner/operator identification page. Please update the billing contact email at that time (email is still currently functional, but is now outdated). Site map and Inventory deficiencies are covered in other violations. CORRECTIVE ACTION: Electronically submit and certify that the business plan is complete, accurate, and in compliance with EPCRA within 30 days. On an ongoing basis, electronically submit and certify the business plan annually on or before the annual due date.

Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 03/18/2019. OBSERVATION: The business failed to complete and electronically submit a site map with all required content including: north orientation, loading area, internal roads, adjacent streets, storm and sewer drains, access and exit points, emergency shut offs, evacuation staging area, hazardous materials/waste storage areas and emergency response equipment. Current maps have most information including emergency response equipment, process drains, north orientation, but is missing a specific evacuation staging area, internal roads/adjacent streets, and is missing the hazardous materials storage areas for the warehouse and the Perlite stored outdoors. CORRECTIVE ACTION: Complete and electronically submit a site map with all required content.

Citation: HSC 6.95 25508(a)(3) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(3)
Violation Description: Failure to complete and electronically submit the Business Activities Page and/or Business Owner Operator Identification Page.
Violation Notes: Returned to compliance on 08/26/2021. OBSERVATION: The facility was provided information from UPI that the liquid processed at the OSU contains petroleum, but the facility has not updated the business activities information in CERS to acknowledge the applicability of the APSA Program. CORRECTIVE ACTION: By August 20, 2021, update and submit the business activities in CERS to indicate the facility owns or operates ASTs with greater than 1,320 gallons of petroleum capacity.

EPA ID: CAD009150194
Name: USS-UPI LLC
Address: 900 LOVERIDGE RD
Cleanup Status: OPERATING PERMIT
Latitude: 38.02252
Longitude: -121.8572
Facility Type: Permitted - Operating
Facility Size: Large Postclosure
Supervisor: RYAN BATTY
Site Code: 200204, 500301, 510914, 520024
Senate District: 07, 9
Assembly District: 14
Public Information Officer: Not reported
Commercial Offsite Facility Types: Not reported
Quarterly Update: QUARTERLY UPDATE Quarterly Update Period: July 2022 - October 2022.
The facility, now known as USS-UPI, Inc., is currently performing permit maintenance in accordance with their post-closure permit. More so, the permit is undergoing a Class 1 modification for proposed changes to the statistical method in the groundwater monitoring plan. The Class 1 modification has been conditionally approved and the Department is currently awaiting documents to finalize the modification process. POST-CLOSURE PERMIT MAINTENANCE Groundwater sampling and analysis: - Groundwater Elevations: monitored quarterly

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F006
Waste Description: Wastewater Treatment Sludges From Electroplating Operations, Except From The Following Processes: (1) Sulfuric Acid Anodizing Of Aluminum; (2) Tin Plating On Carbon Steel; (3) Zinc Plating (Segregated Basis) On Carbon Steel; (4) Aluminum Or Zinc-Aluminum Plating On Carbon Steel; (5) Cleaning/Stripping Associated With Tin, Zinc, And Aluminum Plating On Carbon Steel; And (6) Chemical Etching And Milling Of Aluminum.

Waste Code: K062
Waste Description: Spent Pickle Liquor From Steel Finishing Operations Of Plants That Produce Iron Or Steel.

Waste Code: P030
Waste Description: Cyanides (Soluble Cyanide Salts), Not Otherwise Specified

Waste Code: P098
Waste Description: Potassium Cyanide (Or) Potassium Cyanide K(Cn)

Waste Code: U002
Waste Description: 2-Propanone (l) (Or) Acetone (l)

Waste Code: U151
Waste Description: Mercury

Citation: 23 CCR 16 2712(b)(1)(F) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(F)

Violation Description: "Failure to conduct secondary containment testing, or one or more of the following requirements: Perform the test of the secondary containment system upon installation, within six months of installation and every 36 months thereafter. Perform the test of a secondary containment component within 30 days of a repair or discontinuing vacuum, pressure or hydrostatic monitoring. Use a procedure that demonstrates the system works as well as at installation. Use applicable manufacturer guidelines, industry codes, engineering standard, or professional engineer approval. Performed by a certified service technician. Maintain records of secondary containment testing for 36 months."

Violation Notes: Returned to compliance on 05/23/2021. "OBSERVATION: Facility has failed to do one of the following: 1) Conduct tightness testing of secondary containment at least once every 36 months 2) Underground storage tank owners and operators shall submit a copy of the Secondary Containment Testing Report Form to the local agency within 30 days of the completion of the secondary containment test. 3) The owner or operator shall notify the local agency at least 48 hours prior to conducting the secondary containment test. CORRECTIVE ACTION: Notify CCHSHMP of the Secondary Containment Testing date within 48 hours notice and/or Submit a completed Secondary Containment Testing Report Form to CCHSHMP within 30 days of the testing date."=

Violation Date: 06-25-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 06/26/2019. OBSERVATION: The designated operator failed to complete the designated operator inspection reports every 30 days as required. There was only one DO report between date ranges 12/21 and 2/8 as well as 5/21 and 6/25. CORRECTIVE ACTION: Ensure that designated operators performing monthly inspections at this facility are including all of the required information on the reports. Locate missing reports or provide a statement to the CUPA that you will ensure that DO testing is performed within the required time frame.

Violation Description: Failure to ensure drainage from diked storage areas is restrained by valves, except where facility systems are designed to control such discharge, or failure to ensure manually activated pumps or ejectors are used and the condition of the accumulation is inspected prior to draining dike.
Violation Notes: Returned to compliance on 02/06/2019. OBSERVATION: There are 3 single wall tanks storing petroleum products in a bermed area outside the garage. The bermed area drains directly to a pit. The pit had liquid in it with a visible sheen. The facility does not check the bermed area prior to the liquid draining to the pit. CORRECTIVE ACTION: By 11/2/2018, the facility must implement controls to restrain the liquid in the bermed area from going to the pit and procedures for staff to inspect the condition of the liquid in the bermed area prior to releasing the liquid. The facility must keep a diked drainage log to document these activities.

Violation Description: RCRA Large Quantity Generator - Abandonment/Illegal Disposal/Unauthorized Treatment - General

Violation Notes: Returned to compliance on 09/18/2020. OBSERVATION: During the July 5, 2018 meeting facility provided adequate documentation to clarify different processes occurring on and around the CRU pad/berm. On July 11, 2018 facility provided a Recyclable Materials Report for ERM #3 Pickle Liquor Solution and claims HSC 25143.2(c)(2) for this waste stream. This code section requires that the facility comply with all hazardous waste generator requirements to maintain its exemption from requiring an authorization (permit) for treatment. This includes documentation showing that no waste is held on site prior to treatment for more than 90 days, as well as Hazardous Waste Tank assessments for all hazardous waste tanks including T43 & T42. Facility identified T43 & T42 as a tank requiring a hazardous waste tank assessment in their November 2, 2018 email. CORRECTIVE ACTION: Provide a description of how facility documents accumulation time for the waste prior to treatment to ensure waste is not on site for more than 90 days [Truncated]

Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter 6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to adequately discuss in the SPCC Plan facility drainage or drainage controls such as secondary containment around containers and other structures, equipment, and procedures for the control of a discharge.

Violation Notes: Returned to compliance on 02/06/2019. OBSERVATION: The current SPCC Plan does not include a discussion of the 3 single walled tanks storing petroleum or pit in the garage area or how drainage controls are implemented. Based on the use of the bermed area, the pit is the secondary containment. The drainage from the bermed area to the pit has been occurring for longer than 6 months. CORRECTIVE ACTION: By 11/2/2018, update the SPCC Plan to provide a discussion of how the drainage controls provide adequate secondary containment, procedures for checking the bermed area, procedures for the control of discharge, and maintaining diked drainage logs.

Violation Description: Section(s) Multiple
Business Plan Program - Administration/Documentation - General
Violation Notes: Returned to compliance on 05/13/2017. OBSERVATION: BP02 was cited during the Oct. 14, 2015 inspection for hazardous materials inventory that was missing or incorrectly reported for the largest container, maximum daily amount, as well as hazardous materials inventory that no longer existed on site due to changes in operations. On Nov. 13, 2015 the facility made changes to the hazardous materials inventory. These changes were acknowledged in the Dec. 16, 2015 follow up inspection as well as the Dec. 24, 2015 rejection of the Nov. 13, 2015 CERS submittal. The hazardous materials inventory was rejected due to lack of updating the oil bearing portion of the hazardous materials inventory which the facility was waiting on an updated SPCC Plan for inventory as well as not accounting for other items such as requested process tanks, and issues with the compressed gas related inventory. The violation was elevated to a Class II and the due date was extended to Feb. 16, 2016 to wait for the SPCC Plan updates. The facility [Truncated]

Violation Description: Failure to ensure that containment systems of diked areas in all bulk storage tank installations are either: 1. Sufficiently impervious to contain discharged oil until cleaned up. OR 2. Any discharge to a drainage trench system will be safely confined in a facility catchment basin or holding pond until cleaned up.
Violation Notes: Returned to compliance on 02/06/2019. OBSERVATION: The pit associated with the 3 singled walled tanks in the garage area was storing a liquid with a visible sheen. There were no procedures available at the time of the inspection regarding storage or disposal of the liquid in the pit. Although a precise depth was not obtained, it is believed that the pit was about half full with liquid at the time of the inspection. Although there is no overhead coverage for the pit to prevent rain water from entering the pit, based on the timing of the inspection (lack of rain fall for an extended period of time), the liquid in the pit is most likely from operations associated with garage activities. Based on observations, the pit is storing a liquid with petroleum and is therefore bulk storage containment, but is not

Violation Date: 06-19-2020
Citation: HSC 6.7 25290.2(c) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.2(c)

Violation Description: Failure to maintain secondary containment (e.g., failure of secondary containment testing).

Violation Notes: Returned to compliance on 07/16/2020. OBSERVATION: Liquid in a dry annular was found in the diesel annular indicating a possible leak in the secondary containment. Technician believes the liquid is water, water was found in the annular last year and passed SB989 testing. Diesel had an annular alarm 1/19/20, it was investigated by the new Designated Operator on 2/28/20 who found the annular to be dry and the sensor to be okay. Secondary containment shall be impervious to the liquid and vapor of the substance contained and constructed to prevent structural weakening as a result of contact with any hazardous substances released from the primary containment. CORRECTIVE ACTION: Investigate source of water/liquid, ex: remove water from annular, test annular for secondary containment testing, and then check for water again to ensure groundwater is not leaking into the annular. Send results of investigation. If necessary, contact a properly licensed, trained, and certified contractor to make repairs to the UST system [Truncated]

Violation Notes: Returned to compliance on 01/14/2019. HW44-Used Oil
Violation Division: Contra Costa County Health Services Department
Violation Program: HW
Violation Source: CERS,

Site ID: 405222
Site Name: USS-UPI, LLC
Violation Date: 09-13-2018
Citation: HSC 6.5 Multiple - California Health and Safety Code, Chapter 6.5,
Section(s) Multiple

Violation Description: RCRA Large Quantity Generator - Abandonment/Illegal
Disposal/Unauthorized Treatment - General
Violation Notes: Returned to compliance on 11/08/2020. OBSERVATION: ETL#1 Pickle Rinse
was sampled by the facility on May 29, 2018. The sample was found to
have a pH <2 making it a hazardous waste. Facility has submitted
documentation to CCHSHMP during the May 2017 inspection (Collection
System TWTP.ppt) indicating the ETL#1 Pickle Rinse goes to the TWTP,
which is illegal treatment and disposal of a hazardous waste.
CORRECTIVE ACTION: Facility is not currently running the ETL#1 and
does not have plans to re-use it. This clears this violation. If
Facility decides they want to start using ETL#1 in the future, this
waste stream will need to be diverted from the TWTP and managed as a
hazardous waste.

Violation Division: Contra Costa County Health Services Department
Violation Program: HWLQG
Violation Source: CERS,

Site ID: 405222
Site Name: USS-UPI, LLC
Violation Date: 05-19-2017
Citation: HSC 6.67 25270.4.5(a) - California Health and Safety Code, Chapter
6.67, Section(s) 25270.4.5(a)

Violation Description: Failure to include in the SPCC plan and document discharge prevention
briefings for oil-handling personnel at least once a year, including,
but not limited to, known discharges, failures, and malfunctioning
components.

Violation Notes: Returned to compliance on 05/30/2017.

Potential Contaminants of Concern: Not reported
Potential Media Affected: Not reported
Site History: Roll Technology West (RTW) is a chrome plating steel mill shop. RTW began chrome plating operations in 1994. From 2009 to 2014, RTW used approximately 140 gallons of Fumetrol 140 (AF140), which contains perfluorooctane sulfonate (PFOS), as a fume suppressant to reduce hexavalent chromium air emissions. In 2009, RTW switched from AF140 to Atotech's Fumetrol 21 LF2 (AF21), which contains 6:2 fluorotelomer sulfonate (6:2 FTS). RTW has implemented a closed-loop chrome plating system with no waste discharge stream. There are no records of spills or groundwater contamination to date. To investigate the potential presence of PFAS, samples will be collected from the secondary containment area to investigate possible undocumented tank spills/overflows, from stormwater runoff from the roof to investigate deposition from the air scrubber vent, and from the unpaved soil area on the lot to investigate aerial deposition of PFAS on the ground.

 Feature Description: The 42.98-acre site was acquired in 1942 for construction of the Columbia Steel Foundry. The foundry cast armored stern sections for use in the wartime shipbuilding industry. The plant was declared surplus in 1946 and transferred to the General Services Administration (GSA). In 1949 the name was changed to the Pacific Ordnance Steel Foundry and transferred to the Department of the Army for retention in the Departmental Industrial Reserve. In 1953, the plant was completely refurbished and equipped for the manufacture of 14-ton tank hull casings together with turret. The property was sold on 14 August 1963 to QUAMCO, Inc., an Ohio corporation. There were no restrictions or reservations in the deed. A 1.679-acre parcel was excluded from this transaction, to remain under the jurisdiction of the Department of the Navy for use as an X-ray, radiography facility. On 3 September 1963, the property, consisting of 41.3 acres of land, was transferred from Ludlow Valve Manufacturing Company, Inc., a New York based corporation, to United States Steel Corporation who is the present owner. Subsequent to that transfer, the facility was used for the manufacture of steel products including steel pipe. Steel manufacturing operations have ceased and the facility is now an industrial park with building and yard space leased out to a variety of businesses.

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

STATE MASTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: N/A
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 07/06/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023	Source: EPA
Date Data Arrived at EDR: 05/02/2023	Telephone: N/A
Date Made Active in Reports: 05/17/2023	Last EDR Contact: 07/06/2023
Number of Days to Update: 15	Next Scheduled EDR Contact: 10/09/2023
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Data Release Frequency: No Update Planned

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2023

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/26/2023	Source: EPA

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895
Date Made Active in Reports: 03/20/2023	Last EDR Contact: 06/20/2023

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/06/2023	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/09/2023	Telephone: (415) 495-8895

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ATSDR: PFAS Contamination Site Location Listing

PFAS contamination site locations from the Department of Health & Human Services, Center for Disease Control & Prevention. ATSDR is involved at a number of PFAS-related sites, either directly or through assisting state and federal partners. As of now, most sites are related to drinking water contamination connected with PFAS production facilities or fire training areas where aqueous film-forming firefighting foam (AFFF) was regularly used.

PFAS WQP: Ambient Environmental Sampling for PFAS

The Water Quality Portal (WQP) is a part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations and individuals submit project details and sampling results to this public repository. The information is commonly used for research and assessments of environmental quality.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilities name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2021	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/05/2022	Telephone: 916-255-1136

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

HCYCLE PITTSBURG
NOT REPORTED
ANTIOCH, CA 94509

TARGET PROPERTY COORDINATES

Latitude (North):	38.021424 - 38° 1' 17.13"
Longitude (West):	121.844285 - 121° 50' 39.43"
Universal Transverse Mercator:	Zone 10
UTM X (Meters):	601443.4
UTM Y (Meters):	4208616.5
Elevation:	14 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12021565 ANTIOCH NORTH, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
ANTIOCH NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: CLEAR LAKE

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Poorly drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
2	29 inches	59 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 2

Soil Component Name: RINCON

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
2	11 inches	29 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9
3	29 inches	59 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: JOICE

Soil Surface Texture: muck

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558

Radon Database for California

PHYSICAL SETTING SOURCE RECORDS SEARCHED

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

**Appendix B:
User Questionnaire**

DRAFT

Appendix B: User Questionnaire

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
USER QUESTIONNAIRE**

Pursuant to the American Society for Testing and Materials E 1527-21 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E 1527-21), in order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments”), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that “all appropriate inquiries” is not complete.

The “User” is defined in the ASTM E 1527-21 standard as *the party seeking to use Practice E 1527 to complete an environmental site assessment of the Site. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

Thank you for taking the time to complete this questionnaire. If you have any questions, please contact Doug Kilmer at 616.258.0058 or dkilmer@trccompanies.com

Date: August 2, 2023

User Name: Megan Good
Company: HC (Contra Costa), LLC
Address: 1320 Willow Pass Road, Suite 600
Concord, CA 94520
Telephone No.: 760-583-9211
E-mail Address: megan.good@hcycle.com
Signature: _____

Site Name: Corteva Agriscience
Address: 901 Loveridge Road
Pittsburg, CA 94565

Purpose of ASTM Phase I (potential purchase, potential sale, re-finance, update the environmental condition of the Site, Lease termination or initiation, etc.)

Completion of environmental impact report and analyses for the identified 24-acre Study Area.

(1) Environmental cleanup liens that are filed or recorded against the Site (40 CFR 312.25)

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 below) identify any environmental liens filed or recorded against the Site under federal, tribal, state or local law?

Yes

No

NOTE 1 – In certain jurisdictions, federal, tribal, state, or local statutes, or regulations specify that environmental liens and AULs be filed in judicial records rather than in land title records. In such cases judicial records must be searched for environmental liens and AULs.

(2) Activity and land use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi))

Did a search of recorded land title records (or judicial records where appropriate, see Note 1 above) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law?

Yes

No

(3) Specialized knowledge or experience of the person seeking to qualify for the *Landowner Liability Protection (LLP)* (40 CFR 312.28)

Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

Yes

No

(4) Relationship of the purchase price to the fair market value of the Site property (40 CFR 312.29)

Does the purchase price being paid for the Site property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

Yes

No

(5) Commonly known or reasonably ascertainable information regarding the Site property (40 CFR 312.30)

Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

- (a) Can you provide any information regarding the past uses of the Site?
- (b) Can you provide any information regarding specific chemicals that are present or once were present at the Site?
- (c) Can you provide any information regarding spills or other chemical releases that have occurred at the Site?
- (d) Can you provide any information regarding any environmental cleanups that have occurred at the Site?

Yes

No

See attached documents/links.

(6) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31)

Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site?

Yes

No

(7) Proceedings Involving the Site

Are you aware of: (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

Yes

No

(8) Questions Regarding Helpful Documents

Are you aware of the presence of any of the documents listed below and, if so, whether copies can and will be provided to TRC within reasonable time and cost constraints?

	Yes	No
- Environment site assessment reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Environment compliance audit reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Environmental permits (e.g., solid waste disposal permits; hazardous waste disposal permits; wastewater permits; National Pollutant Discharge Elimination System [NPDES] permits; or underground injection permits)	<input checked="" type="checkbox"/>	<input type="checkbox"/>
- Registrations for underground and aboveground storage tanks	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Registrations for underground injection systems	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Material Safety Data Sheets (MSDSs)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Community Right-To-Know plan(s)	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.,	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Reports regarding hydrogeologic conditions at the Site and surrounding area	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Notices or other correspondence from any government agency regarding current or previous violations of environmental laws with respect to the Site or relating to environmental liens encumbering the Site property	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Hazardous waste generator notices or reports	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Geotechnical studies	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Risk assessments	<input type="checkbox"/>	<input checked="" type="checkbox"/>
- Recorded AULs	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of TRC on Jul 19, 2023.

TARGET PROPERTY

Not Reported
Antioch, CA 94509

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- **Permit Number:** The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

Permit Type: Bldg -

New Permit Number: 101000000405

Status: Valuation: \$1,000,000.00

Contractor Company: OWNER-BUILDER

Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

TRANSFER TAX PAID ON GRANT DEED
SERIES NO. 96834

UNITED STATES STEEL CORPORATION, a Delaware corporation,
Grantor, hereby grants unto THE DOW CHEMICAL COMPANY, a Delaware
corporation, Grantee, all that certain real property in the
County of Contra Costa, State of California, described as fol-
lows:

PARCEL D:

A portion of the Rancho Los Medanos, described as follows:

Beginning on the east line of that parcel of land described as
Parcel 1 in the deed from the Anglo California National Bank of
San Francisco to the Dow Chemical Company recorded May 23, 1950
in Book 1562 of official records of Contra Costa County, page
586, at a point which bears North 0° 59' 14" east 407.92 feet
from the southeast corner of said Dow parcel (1562 or 586);
thence from said point of beginning, along said east line, north
0° 59' 14" east 605.55 feet; thence leaving said east line,
south 89° 00' 46" east 200.00 feet; thence north 21° 25' 34"
east 1344.05 feet to the northern boundary line of the Rancho
Los Medanos; thence along said northern line, south 78° 17' 46"
east 233.23 feet; south 53° 27' 46" east 158.76 feet; south 4°
51' 46" east 173.68 feet, and south 39° 12' 46" east 166.20
feet; thence leaving said northern boundary of the Rancho Los
Medanos, south 39° 51' 58" west 1836.41 feet to the point of be-
ginning.

The foregoing conveyance is made subject to the follow-
ing:

1. The lien of taxes for the fiscal year 1977-78;
2. Any and all rights, rights of way, easements and en-
cumbances existing on the property, whether or not of record.

IN WITNESS WHEREOF, Grantor has caused this instrument to
be executed in its behalf by its officers thereunto first duly au-
thorized, and its corporate seal to be hereto affixed as of the
1st day of July, 1977.

LAND USE COVENANT AND AGREEMENT

ENVIRONMENTAL RESTRICTIONS

County of Contra Costa, Assessor Parcel Number: 073-220-049
Corteva Pittsburg Monofill
DTSC Site Code: 200164

This Land Use Covenant and Agreement ("Covenant") is made by and between Centen Ag LLC (the "Covenantor"), the current owner of property located at 901 Loveridge Road, City of Pittsburg, in the County of Contra Costa, State of California (the "Property"), and the Department of Toxic Substances Control (the "Department"). Pursuant to Civil Code section 1471, the Department has determined that this Covenant is reasonably necessary to protect present or future human health or safety or the environment as a result of the presence on a portion of the land on the Property of hazardous materials as defined in Health and Safety Code section 25260 ("Affected Portion"). The Covenantor and the Department hereby agree that, pursuant to Civil Code section 1471 and Health and Safety Code section 25202.5, the use of the Property be restricted as set forth in this Covenant and that the Covenant shall conform with the requirements of California Code of Regulations, title 22, section 67391.1.

ARTICLE I

STATEMENT OF FACTS

1.1. Property Location. The Property that is subject to this Covenant, totaling approximately 246.20 acres, is more particularly described in the attached Exhibit A, "Legal Description", and depicted in Exhibit B, "Assessor's Map". The Property is located in the area now generally bounded by New York Slough on the north, the BNSF Railway line on the south, Loveridge Road and Pittsburg Waterfront on the west, and wetlands on the east. The Property is also identified as County of Contra Costa, Assessor Parcel Number 073-220-049.

The Restrictions and Requirements outlined in Article IV of this Covenant apply only to the Affected Portion of the Property, totaling approximately 8.99 acres, that is more particularly described and depicted in Exhibit C "Record of Survey" and is referred to as the site of the former Solar Evaporation Ponds.

1.2. Remediation of Property. The Affected Portion of the Property has been investigated and/or remediated under the Department's oversight. The Department approved a Closure Plan in accordance with Health and Safety Code, division 20, chapter 6.5. The closure activities conducted at the Property included solidification and consolidation of waste at the location of former Solar Evaporation Ponds A, B, C, and D, and construction of an encapsulation structure. Hazardous substances and hazardous wastes, including solidified Solar Evaporation Pond waste containing heavy metals, halogenated and non-halogenated volatile organic compounds, semi-volatile organic compounds, and exhibiting flammability and corrosivity characteristics, remain within the Affected Portion of the Property above levels acceptable for unrestricted land use.

1.3. Basis for Environmental Restrictions. As a result of the presence of hazardous wastes, which are also hazardous materials as defined in Health and Safety Code section 25260, at the Property, the Department has concluded that it is reasonably necessary to restrict the use of the Affected Portion of the Property in order to protect present or future human health or safety or the environment, and that this Covenant is required as part of the Department-approved remedy for the Property. The Department has also concluded that the Property, as remediated and when used in compliance with the Environmental Restrictions of this Covenant, does not present an

unacceptable risk to present and future human health or safety or the environment.

ARTICLE II

DEFINITIONS

2.1. Department. "Department" means the California Department of Toxic Substances Control and includes its successor agencies, if any.

2.2. Environmental Restrictions. "Environmental Restrictions" means all protective provisions, covenants, restrictions, requirements, prohibitions, and terms and conditions as set forth in this Covenant.

2.3. Improvements. "Improvements" includes, but is not limited to buildings, structures, roads, driveways, improved parking areas, wells, pipelines, or other utilities.

2.4. Lease. "Lease" means lease, rental agreement, or any other document that creates a right to use or occupy any portion of the Property.

2.5. Occupant. "Occupant" or "Occupants" means Owner and any person or entity entitled by ownership, leasehold, or other legal relationship to the right to occupy any portion of the Property.

2.6. Owner. "Owner" or "Owners" means the Covenantor, and any successor in interest including any heir and assignee, who at any time holds title to all or any portion of the Property.

ARTICLE III

GENERAL PROVISIONS

3.1. Runs with the Land. This Covenant sets forth Environmental Restrictions that apply to and encumber the Property and every portion thereof no matter how it is improved, held, used, occupied, leased, sold, hypothecated, encumbered, or conveyed. This Covenant: (a) runs with the land pursuant to Civil Code section 1471 and Health and Safety Code section 25202.5; (b) inures to the benefit of and passes with each and every portion of the Property; (c) is for the benefit of and is enforceable by the Department; (d) is imposed upon the entire Property; and (e) contains Environmental Restrictions applicable only to the Affected Portion thereof.

3.2. Binding upon Owners/Occupants. This Covenant: (a) binds all Owners of the Property, their heirs, successors, and assignees; and (b) the agents, employees, and lessees of the Owners and the Owners' heirs, successors, and assignees. Pursuant

to Civil Code section 1471, all successive Owners of the Property are expressly bound hereby for the benefit of the Department; this Covenant, however, is binding on all Owners and Occupants, and their respective successors and assignees, only during their respective periods of ownership or occupancy except that such Owners or Occupants shall continue to be liable for any violations of, or non-compliance with, the Environmental Restrictions of this Covenant or any acts or omissions during their ownership or occupancy.

3.3. Incorporation into Deeds and Leases. This Covenant shall be incorporated by reference in each and every deed and Lease for any portion of the Property.

3.4. Conveyance of Property. The Owner and new Owner shall provide Notice to the Department not later than 30 calendar days after any conveyance or receipt of any ownership interest in the Property (excluding Leases, and mortgages, liens, and other non-possessory encumbrances). The Notice shall include the name and mailing address of the new Owner of the Property and shall reference the site name and site code as listed on page one of this Covenant. The notice shall also include the Assessor's Parcel Number(s) noted on page one. If the new Owner's property has been assigned a different Assessor Parcel Number, each such Assessor Parcel Number that covers the Property must be provided. The Department shall not, by reason of this Covenant, have authority to approve, disapprove, or otherwise affect proposed conveyance, except as otherwise provided by law or by administrative order.

3.5. Costs of Administering the Covenant to Be Paid by Owner. The Department has already incurred and will in the future incur costs associated with this Covenant. Therefore, the Covenantor hereby covenants for the Covenantor and for all subsequent Owners that, pursuant to California Code of Regulations, title 22, section 67391.1(h), the Owner agrees to pay the Department's costs in administering, implementing and enforcing this Covenant.

ARTICLE IV

RESTRICTIONS AND REQUIREMENTS

4.1. Prohibited Uses. The Property shall not be used for any of the following purposes without prior written approval by the Department:

- (a) A residence, including any mobile home or factory built housing, constructed or installed for use as residential human habitation.
- (b) A hospital for humans.
- (c) A public or private school for persons under 18 years of age.
- (d) A day care center for children.

4.2. Soil Management. Soil management activities at the Affected Portion of the Property are subject to the following requirements in addition to any other applicable Environmental Restrictions:

- (a) No activities that will disturb the soil at or below grade level (e.g., excavation, grading, removal, trenching, filling, earth movement, mining, or drilling) shall be allowed at the Property without a Soil Management Plan pre-approved by the Department in writing.
- (b) Any soil brought to the surface by grading, excavation, trenching or backfilling shall be managed in accordance with all applicable provisions of state and federal law.

4.3. Prohibited Activities. The following activities shall not be conducted at or within the Affected Portion of the Property:

- (a) Drilling for any water, oil, or gas without prior written approval by the Department.
- (b) Extraction or removal of groundwater without a Groundwater Management Plan pre-approved by the Department in writing.
- (c) Activity that may alter, interfere with, or otherwise affect the integrity or effectiveness of, or the access to, any investigative, remedial, monitoring, operation or maintenance system or activity required for the Property without prior written approval of the Department.

The Prohibited Activities described in paragraph 4.3 of this Covenant do not apply to activities that are expressly authorized in a Hazardous Waste Facility Post Closure Permit issued by the Department.

4.4. Access for Department. The Department shall have reasonable right of entry and access to the Property for inspection, investigation, remediation, monitoring, and other activities as deemed necessary by the Department in order to protect human

health or safety or the environment.

4.5. Access for Implementing Operation and Maintenance. The entity or person responsible for implementing the operation and maintenance activities, if any, shall have reasonable right of entry and access to the Affected Portion of the Property for the purpose of implementing such operation and maintenance activities until the Department determines that no further operation and maintenance activity is required.

4.6. Inspection and Reporting Requirements. The Owner shall conduct an annual inspection of the Property verifying compliance with this Covenant and shall submit an annual inspection report to the Department for its approval by January 31st of each year. The annual inspection report must include the dates, times, and names of those who conducted the inspection and reviewed the annual inspection report. It also shall describe how the observations that were the basis for the statements and conclusions in the annual inspection report were performed (e.g., drive by, fly over, walk in, etc.). If any violation is noted, the annual inspection report must detail the steps taken to correct the violation and return to compliance. If the Owner identifies any violations of this Covenant during the annual inspection or at any other time, the Owner must within 10 calendar days of identifying the violation: (a) determine the identity of the party in violation; (b) send a letter advising the party of the violation of the Covenant; and (c) demand that the violation cease immediately. Additionally, a copy of any correspondence related to the violation of this Covenant shall be sent to the Department within 10 calendar days of its original transmission.

ARTICLE V

ENFORCEMENT

5.1. Enforcement. Failure of the Owner or Occupant to comply with this Covenant shall be grounds for the Department to require modification or removal of any Improvements constructed or placed upon any portion of the Property in violation of this Covenant. Violation of this Covenant, such as failure to submit (including submission of any false statement) record or report to the Department, shall be grounds for the Department to pursue administrative, civil, or criminal actions, as provided by law.

ARTICLE VI

VARIANCE, REMOVAL, AND TERM

To Department: Department of Toxic Substances Control
8800 Cal Center Drive
Sacramento, California 95826
Attention:
Unit Chief
Permitting Division

Any party may change its address or the individual to whose attention a Notice is to be sent by giving advance written Notice in compliance with this paragraph.

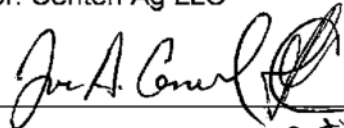

7.4. Partial Invalidity. If this Covenant or any of its terms are determined by a court of competent jurisdiction to be invalid for any reason, the surviving portions of this Covenant shall remain in full force and effect as if such portion found invalid had not been included herein.

7.5. Statutory References. All statutory or regulatory references include successor provisions.

7.6. Incorporation of Exhibits. All exhibits and attachments to this Covenant are incorporated herein by reference.

IN WITNESS WHEREOF, the Covenantor and the Department hereby execute this Covenant.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by TRC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DRAFT

CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
SAN FRANCISCO BAY REGION

ORDER No. R2-2002-0007

UPDATED WASTE DISCHARGE REQUIREMENTS AND RESCISSION OF ORDER NOS. 97-123 AND 98-059 FOR:

THE DOW CHEMICAL COMPANY
PITTSBURG FACILITY
CONTRA COSTA COUNTY

The California Regional Water Quality Control Board, San Francisco Bay Region (hereinafter the Regional Board), finds that:

SITE DESCRIPTION & LOCATION

1. The Dow Chemical Company (Dow or Discharger) owns and operates a chemical manufacturing facility at 901 Loveridge Road in Pittsburg, California (Figure 1). The site is bounded by the New York Slough on the north, the Pittsburg-Antioch Highway on the south, Loveridge Road on the west, and parklands and commercial areas on the east. Residential areas exist further to the south beyond the Pittsburg-Antioch Highway. The site occupies approximately 993 acres of which approximately 235 acres are a wetland preserve located on the eastern side of the facility. In addition to active chemical manufacturing facilities, the site contains an active Class II (designated) solid waste landfill and a number of closed solid waste disposal units.
2. Dow currently manufactures latex, agricultural chemicals, fumigants, fungicides, and hydrochloric acid at their Pittsburg facility. Historically, Dow used the site to manufacture chlorine, sodium hydroxide, hydrogen, and chlorinated solvents, including carbon tetrachloride and tetrachloroethene. In addition to chemical manufacturing activities, Dow conducts chemical development research at its Pittsburg facility. The Calpine Corporation operates a power plant on site, producing electricity and steam. The Cynera Company and M.G. Generon fabricate reverse osmosis membranes on the Dow property.

PURPOSE OF ORDER

3. The purpose of this Order is to update waste discharge requirements (WDRs) regarding the operation, closure, post-closure maintenance, and monitoring of Solid Waste Management Units (SWMUs). Specifically, this Order updates the status and requirements for twenty-five SWMUs at the Dow Pittsburg facility and rescinds WDR Order Nos. 97-123 and 98-059. On-going and future corrective measures at the Dow Pittsburg facility are or will be regulated by site cleanup requirements (SCRs) issued pursuant to the California Water Code, Section 13304.

REGULATORY STATUS

4. In June 1987, the Regional Board adopted WDR Order No. 87-064 requiring Dow to characterize all solid waste management units (SWMUs) of concern for water quality impacts and evaluate alternatives for remediation, if necessary.
5. In 1989 the U.S. Environmental Protection Agency (USEPA) issued a 3008(h) Administrative Order for the Dow facility pursuant to the Resource Conservation and Recovery Act (RCRA). The RCRA Order required Dow to 1) determine the nature and extent of any releases of hazardous wastes/constituents at their facility, and 2) evaluate corrective action alternatives necessary to mitigate the migration of hazardous wastes/constituents at their facility.
6. In August 1996, the California Department of Toxic Substances Control (DTSC) issued a Hazardous Waste Facility Permit (EPA ID Number: CAD 076 528 678) for the Dow facility, which contained a Corrective Action Schedule of Compliance. In response to DTSC's permit, the USEPA issued written notice in August 1997 that it had terminated their 3008(h) Administrative Order and that the requirements of that Order had been incorporated into DTSC's permit. At that same time, the Regional Board assumed the role of lead agency for corrective action at the Dow facility pursuant to Section 25204.6 of the California Health and Safety Code (CHSC). Section 25204.6 of the CHSC allows the Regional Board to implement and enforce the corrective action requirements of Article 6, Chapter 14, Division 4.5, Title 22 of the California Code of Regulations (22CCR).
7. In 1997, the Regional Board adopted WDR Order No. 97-123 requiring Dow to extract groundwater impacted with volatile organic compounds (VOCs) and semi-volatile organic compounds (SVOCs) in order to capture contaminant mass and mitigate impacts in specific areas. Order No. 97-123 established interim minimum groundwater extraction rates in order to take advantage of Dow's existing groundwater treatment capacity until a final remedy could be implemented. Order No. 97-123 also established injection standards for the treated groundwater should Dow select injection as the preferred disposal method. Interim extraction requirements were established in anticipation of a larger, site-wide corrective action remedy based on hydraulic containment of VOCs in groundwater.
8. In 1998, the Regional Board adopted WDR Order No. 98-059 thereby establishing requirements for implementation of corrective action remedies for the SWMUs and for VOC contaminants in groundwater. WDR Order No. 98-059 also rescinded Order No. 87-064. WDR Order No. 98-059 accepted Dow's 1997 proposal for site-wide corrective action of VOC-impacted groundwater using hydraulic containment. However, prior to implementation, Dow determined that hydraulic containment would not be economically feasible due primarily to site hydrogeology. As a result, Dow investigated the use of engineered in-situ bioremediation as the site-wide corrective action remedy and submitted a revised corrective action plan in 1999. Currently the Regional Board is the lead agency overseeing corrective action at the Dow Pittsburg facility.
9. Dow's surface water discharges are regulated by NPDES permit CA0004910 (WDR Order No. 01-142) issued by the Regional Board.

HYDROGEOLOGIC CHARACTERIZATION AND GROUNDWATER CONDITIONS

10. The Dow Pittsburg facility is located in the Pittsburg Plain Groundwater Basin that is bounded by the hills south of the facility, the western portion of the Sacramento-San Joaquin River delta in the north, Bay Point in the west, and the City of Antioch in the east. The basin is filled with unconsolidated fluvial and alluvial sediments deposited in the Sacramento-San Joaquin River delta and in alluvial fans formed by streams draining the hills south of the facility. Groundwater at the Dow facility is first encountered at depths beginning from approximately 2 to 13 feet below ground surface (bgs).
11. Lithology of the shallow subsurface beneath the site consists of a low-permeability silty clay in the upper 40 feet (designated as the water-table interval) with a saturated sand unit extending from approximately 40 to 135 feet bgs. A layer of low permeability material consisting mostly of clay is also present between approximately 85 to 110 feet bgs in the northern portion of the site. This lower clay layer extends southward from the northern boundary of the facility (New York Slough) and pinches out approximately 200 feet south of 2nd Street. Where present, the lower clay layer divides the saturated sand unit into two intervals designated as the mid-depth interval (40-85 feet bgs) and the deep interval (110-135 feet bgs). As the lower clay layer thickens along the northern boundary of the facility (toward the Slough), the mid-depth interval of the saturated sand unit generally becomes thinner/finer grained and apparently pinches out in various locations near the Slough bank. Regionally, a clay layer exists below the deep interval of the saturated sand unit from approximately 130 to as much as 800 feet bgs. Table 1 summarizes the water-bearing intervals at the Dow site.

Table 1. Depths of Occurrence of Groundwater Transmissive Zones at the Dow Pittsburg Facility

Transmissive Zone	Typical Depths (fbgs)
Water Table Interval	5 to 40
Mid-Depth Interval	40 to 85
Deep Interval	110 to 135

12. VOCs and SVOCs have been detected at elevated concentrations in groundwater at various locations beneath the Dow facility in the interior of the site and near the perimeter adjacent to New York Slough and Bundesen Bay (Figure 2). Table 2 summarizes the principal organic contaminants identified in groundwater beneath the site.

Table 2. Principal Organic Contaminants Detected in Groundwater Beneath the Dow Pittsburg Facility

Principal VOCS and SVOCS	
• tetrachloroethene (PCE)	• methylene chloride (MeCl)
• trichloroethene (TCE)	• chloromethane (CM)
• 1,2-dichloroethene (1,2-DCE)	• 1,2-dichloropropane (1,2-DCP)
• 1,1-dichloroethene (1,1-DCE)	• hexachlorobenzene (HCB)
• 1,2-dichloroethane (1,2-DCA)	• hexachloroethane (HCA)
• 1,1-dichloroethane (1,1-DCA)	• pentachlorophenol (PCP)
• vinyl chloride (VC)	• benzene
• carbon tetrachloride (CCL ₄)	• toluene
• chloroform (CF)	

13. The organic contaminants in groundwater summarized in Tables 2 are generally the result of numerous historic spills and leaks to the ground that have occurred throughout the facility during the course of operations. Their sources are generally not the discrete SWMUs regulated under this Order.
14. Mercury and methyl mercury have also been detected in groundwater in the northern portion of the site. The source of mercury in groundwater was Dow's former chlor-alkalai plant, which is located at the southwestern corner of the Former Outfall Pond (Figure 3). The Former Outfall Pond is a SWMU that was closed in compliance with WDR Order No. 98-059. Dow has submitted a technical report that presents an evaluation of mercury impacts and hydrogeologic conditions in the vicinity of the Former Outfall Pond (*Report on Evaluation of Mercury Flux at the Former Outfall Pond, June 2001*). The need for further investigation and/or corrective action will be evaluated based on the extent and magnitude of mercury impacts. Table 3 summarizes the maximum reported mercury and methyl mercury concentrations in groundwater in each transmissive zone in the vicinity of the former chlor-alkalai plant and the Former Outfall Pond.

Table 3 Maximum Mercury and Methyl Mercury Concentrations in Groundwater in the Vicinity of the Former Chlor-Alkalai Plant and the Former Outfall Pond at the Dow Pittsburg Facility

	Maximum Concentrations During Most Recent Characterization (2000–2001) (ug/l)		
	Water Table	Mid-Depth	Deep
Mercury	486	0.39	---
Methyl Mercury	3.6	0.00058	---

'---' No Data.

SURFACE WATER IMPACTS

15. VOCs have been detected in surface water grab samples collected in Bundesen Bay. Additionally, grab samples from a groundwater seep in the southwestern corner of Bundesen Bay contained significant VOC concentrations. The discharge of VOC-contaminated groundwater beneath the Dow facility into Bundesen Bay is believed to be the source of VOC impacts to surface water in Bundesen Bay.

SOLID WASTE MANAGEMENT UNITS (SWMUs)

16. In 1986 the USEPA prepared a RCRA Facility Assessment (RFA) report that identified 25 SWMUs at the Dow Pittsburg facility. In June 1987, the Regional Board issued WDR Order No. 87-064 requiring Dow to characterize the areas of potential concern identified in the RFA report and, if necessary, evaluate alternatives for remediation. In response, Dow has submitted various reports addressing RWQCB requirements for SWMU investigations and closures. Much of the work is summarized in a twelve-volume Remedial Feasibility Investigation and Corrective Action Program report submitted in December 1988. Dow's March 1995 Corrective Measures Study Report presents various alternatives for closing SWMUs and for monitoring and maintenance of closed SWMUs.
17. In 1998, the Regional Board adopted WDR Order No. 98-059 addressing closure and maintenance of three of the twenty-five identified SWMUs. The SWMUs addressed in WDR Order No. 98-059 include the Class III Northeast Landfill, which is currently active, the Hexachlorobenzene Trench, which has since been closed, and the Former Outfall Pond, which has also been closed (Figure 4). Table 4 summarizes the twenty-five identified SWMUs at the Dow facility and the status of each. Requirements in WDR Order No. 98-059 pertaining to these solid waste management units have been satisfied.

Table 4 SWMUs Identified at the Dow Pittsburg Facility

RFA Unit No.	SWMU Description	Action Required	Status/Comments
4.1 - 4.7	Aboveground Storage Tanks (6, 15, 21, 102, 156, 408, 506-A, 506-B)	None	All tanks closed and removed.
4.8	Storm Sewer System	Maintenance/ Retrofitting as Needed	Ongoing program to retrofit old pipelines to prevent infiltration of groundwater contaminants into sewer system.
4.9	Former Solar Evaporation Ponds (Class I - Monofill)	Post-Closure Maintenance	The six surface Impoundments were closed between 1988 and 1990 pursuant to <i>Closure Plan - Class I Surface Impoundments</i> as amended, dated November 1, 1988, approved jointly by DTSC and RWQCB.
4.10	Central Landfill (Class II)	Post-Closure Maintenance	Closure performed simultaneously with closure of adjacent Solar Evap. Ponds (shares hydraulic containment system). Closure is managed pursuant to <i>Final Closure of the Central Landfill at the Dow Pittsburg Facility</i> , dated October 20, 1997.
4.11	Northeastern Landfill (Class II)	Active; operational Maintenance and Monitoring	Dow submitted a report titled <i>Preliminary Closure Plan and Post-closure Maintenance Plan for the Northeast Landfill</i> , dated March 24, 1999 in compliance with WDR Order No. 98-059.
4.12	Hexachlorobenzene Disposal Trench (Class I)	Post-Closure Maintenance & Monitoring	Final cover installed in July 1998 in compliance with WDR Order No. 98-059 as documented in <i>Hexachlorobenzene Trench, Documentation of Final Cover</i> , dated December 21, 1998.
4.13	Inactive Hazardous Waste Disposal Area – chemical research disposal trench (Class I)	None	Closed in 1960's. Area is covered with asphalt. Not a significant source of groundwater contamination. Partially covered by a concrete-diked tank farm and buildings.
4.14	Former Municipal Landfills (Northwestern and North Central)	None	Contain mostly construction waste, but dates of disposal, volume, and type of wastes disposed of are not documented.
4.15	Former Brine Process Ponds	None	Sediment removed. Ponds backfilled with clean soil. Concrete slab constructed over backfilled ponds.

Table 4 (continued) SWMUs Identified at the Dow Pittsburg Facility

RFA Unit No.	SWMU Description	Action Required	Status/Comments
4.16 4.17	Former Latex Coagulation Ponds and Latex Firewater Reservoir	None	Sludge and visibly contaminated soil excavated and ponds backfilled with clean soil.
4.18	Sym-tet Fire Water Receiving Impoundment	None	Closed pursuant to <i>Closure Report Sym-tet Fire Water Impounding Basin</i> , dated September 30, 1987.
4.19	Former Outfall Pond	Post-Closure Maintenance & Monitoring	Closed and capped in Oct. 2000 in compliance with WDR Order No. 98-059 as documented in <i>Former Outfall Pond Cap Construction Project Closure Report</i> , dated December 2000.
4.20	Shock Pond	None	Stormwater detention pond replaced with concrete holding basin.
4.21	Former Drum Storage Area	None	Closed. No evidence of spills or releases.
4.22	E-002 Pond	None	River water clarification area. No hazardous wastes ever deposited.
4.23	Inactive Ethyl Corporation Property (900/1000 Block)	Further evaluation to determine need for remediation	Ethyl Corp. stored chemicals used to manufacture tetraethyl lead in this area prior to Dow's purchase of the property in 1982. Approx. 70% of area is covered with asphalt pavement. Groundwater extraction wells have been installed to contain an isolated low-level VOC plume. Lead has not been detected in groundwater since 1992. Potential for use of bioremediation to be investigated.
4.24	Pioneer Rubber Plant	None	Closed.
4.25	Rail Car Washing Area	None	Closed. No evidence of releases.

Class II Northeast Landfill

- The Northeast Landfill is currently the only active SWMU at the Dow facility. It is bounded by New York Slough to the north, Third Street to the south, J Street to the west, and the Kirker Creek Remnant Channel to the east (Figure 4). The unlined landfill spans approximately 15 acres and has been in use since the 1930's. Materials disposed of in the landfill include inert wastes such as concrete rubble, brick, wood, miscellaneous construction debris and excavation dirt, asphalt paving, and brine mud. Historically, garbage and other miscellaneous refuse were disposed of in the landfill during the 1950s and 1960s. Antioch Harbor dredge bottoms were reportedly placed in the landfill in the 1970s.

19. Currently, disposal of construction materials into the Northeast Landfill is limited to about 100 cubic yards per year. The brine mud, a waste product of the on-site Brine Plant, is currently disposed of in the Northeast Landfill at an approximate rate of 125 cubic yards per year. The Brine Plant produces a concentrated commercial brine solution and condensate used as boiler feed at an on-site power plant. Feed to the Brine Plant consists of extracted groundwater treated to remove VOCs and SVOCs, treated storm water runoff that has contacted chemical process units, plus various maintenance and scrubber waters that have been treated in the site's wastewater processing units. The brine mud waste has a moisture content of 45%, and a pH of about 11. Dow estimates 40,000 cubic yards of remaining capacity are left in the landfill and plans to continue operation indefinitely. Dow has installed a French drain extraction system around the perimeter of the landfill in compliance with the state's general construction standards for landfill containment structures. In March 1999, Dow submitted a preliminary closure and post-closure maintenance plan for the Northeast Landfill in compliance with WDR Order No. 98-059.

BASIN PLAN AND RESOLUTIONS

20. The Regional Board adopted a revised Water Quality Plan for the San Francisco Bay Basin (Basin Plan) in June 21, 1995. This updated and consolidated plan represents the Regional Board's master water quality control planning document. The State Water Resource Control Board and the Office of the Administrative Law approved the revised Basin Plan on July 20 and November 13, respectively, of 1995. A summary of revisions to regulatory provisions is contained in Section 3912, Title 23 of the California Code of Regulations. The Basin Plan defines beneficial uses and water quality objectives for waters of the State, including surface water and groundwater.
21. The Basin Plan provides that all groundwaters are considered suitable, or potentially suitable, for municipal or domestic water supply (MUN) and that, in making any exceptions, the Regional Board will consider the criteria referenced in Regional Board Resolution No. 89-39, "Sources of Drinking Water", where:
 - (a) The total dissolved solids exceed 3,000 mg/l (5,000 μ S/cm, electrical conductivity), and it is not reasonably expected by the Regional Board that the groundwater could supply a public water system, or
 - (b) There is contamination, either by natural processes or human activity (unrelated to the specific pollution incident), that cannot reasonably be treated for domestic use using best management practices or best economically achievable treatment practices, or
 - (c) The water source does not provide sufficient water to supply a single well capable of producing an average, sustained yield of 200 gallons per day.
22. The groundwater beneath the Dow site north of the Atchison Topeka and Santa Fe Railway line has TDS/electrical conductivity that is significantly higher than the 3000 mg/l (5000 μ S/cm) levels considered as maximums for suitability for municipal or domestic water supply. Furthermore, it is not reasonable to expect that the groundwater could supply a public water system because significant pumping of the aquifer is likely to result in

saltwater intrusion that would further degrade water quality. There is evidence that past pumping of the aquifer in the early 1900s resulted in increased salinity. Therefore, the groundwater beneath the Site satisfies the Basin Plan exemption criteria cited in Finding No. 21(a).

BENEFICIAL USES OF SURFACE WATER AND GROUNDWATER

Groundwater

23. The Site resides within the boundaries of the Pittsburg Plain Groundwater Basin, as defined in the Basin Plan. The existing and potential beneficial uses identified for groundwater in this basin, according to the Basin Plan, include:

- Municipal and Domestic Supply (MUN)
- Industrial Process Supply (PROC)
- Industrial Service Supply (IND)
- Agricultural Supply (AGR)

Surface Water

24. The northern portion of the Dow facility is bounded by New York Slough. New York Slough is located within the San Francisco Bay/Delta system between Suisun Bay to the west and the confluence of the Sacramento and San Joaquin Rivers to the east. Contra Costa Water District maintains a drinking water intake at Mallard Slough four miles west of the Dow facility. The Mallard Slough intake is used to augment the main supply primarily during winter and spring months when the salinity is low. The existing and potential beneficial uses identified for surface water in New York Slough and contiguous water bodies, according to the Basin Plan, include:

- Ocean, Commercial, and Sport Fishing (COMM)
- Preservation of Rare and Endangered Species (RARE)
- Water Contact Recreation (REC1)
- Non-Water Contact Recreation (REC2)
- Fish Migration (MIGR)
- Fish Spawning (SPWN)
- Wildlife Habitat (WILD)
- Estuarine Habitat (EST)
- Marine Habitat (MAR)
- Navigation (NAV)
- Industrial Process Supply (PROC)
- Industrial Service Supply (IND)
- Groundwater Recharge (GWR)
- Agricultural Supply (AGR)
- Municipal and Domestic Supply (MUN)

CALIFORNIA ENVIRONMENTAL QUALITY ACT

25. This action is exempt from provisions of the California Environmental Quality Act pursuant to Section 15301, Title 14 of the California Code of Regulations.

NOTIFICATION AND PUBLIC MEETING

26. The Regional Board has notified the Discharger and interested agencies and persons of its intent to update waste discharge requirements and has provided them with an opportunity to submit their written views and recommendations.
27. The Regional Board, in a public meeting, heard and considered all comments pertaining to the proposed waste discharge requirements for the Site.

IT IS HEREBY ORDERED pursuant to the authority in Section 13263 of the California Water Code (CWC), Title 27, Division 2, Subdivision 1 of the California Code of Regulations (27CCR), and Chapter 15, Division 3, Title 23 of the California Code of Regulations (Chapter 15) that the Discharger, its agents, successors, and assigns shall meet the applicable provisions contained in 27CCR, Chapter 15, and Division 7 CWC, and shall comply with the following:

A. PROHIBITIONS

1. The treatment, storage, and discharge of groundwater shall not create a condition of pollution or nuisance as defined in Section 13050(m) CWC, nor degrade the quality of the groundwater in the aquifers to which it is injected.
2. Untreated or inadequately treated groundwater shall not create a condition of pollution or nuisance as defined in Section 13050(m) CWC, nor degrade the quality of waters of the State or of the United States.
3. The relocation of wastes to or from waste management units shall not create a condition of pollution or nuisance as defined in Section 13050 (1) and (m) CWC. Any relocated waste shall not be placed in or allowed to contact ponded water from any source whatsoever. Wastes shall not be relocated to any location where they can be discharged into waters of the State or of the United States.
4. Leachate and ponded water containing leachate or in contact with waste shall not be discharged to waters of the State or of the United States unless specifically authorized under an NPDES permit.
5. The creation of any new waste management units is prohibited without prior Regional Board staff concurrence.
6. Excavation within or reconfiguration of any existing waste management unit is prohibited without prior concurrence of Regional Board staff.

7. The Discharger, or any future owner of the site, shall not cause the following conditions to exist in waters of the State or of the United States at any place outside existing waste management units:
 - a. Surface Waters:
 - (1) Floating, suspended, or deposited macroscopic particulate matter or foam
 - (2) Bottom deposits or aquatic growth
 - (3) Adversely alter temperature, turbidity, or apparent color beyond natural background levels
 - (4) Visible, floating, suspended, or deposited oil or other products of petroleum origin
 - (5) Toxic or other deleterious substances to be present in concentrations or quantities that may cause deleterious effects on aquatic biota, wildlife, or waterfowl, or that render any of these unfit for human consumption either at levels created in the receiving waters, or as a results of biological concentrations
 - b. Groundwater:
 - (1) Further degradation of groundwater quality and/or substantial worsening of existing groundwater impacts
 - (2) Further significant migration of pollutants through subsurface transport
8. Discing of landfill covers is prohibited without prior concurrence of Regional Board staff. Alternate methods of controlling vegetative growth, which do not affect the integrity of the landfill cap, shall be utilized.

B. SPECIFICATIONS

1. All reports submitted pursuant to this Order shall be prepared under the supervision of and signed by a California registered civil engineer, registered geologist, or certified engineering geologist.
2. Surface drainage from tributary areas and internal site drainage from surface or subsurface sources shall not contact or percolate through wastes during the life of the site.
3. Containment, collection, drainage, and monitoring systems at the facility, shall be maintained as long as leachate is present and poses a threat to water quality.
4. Final cover systems for waste management units shall be graded and maintained to promote lateral runoff and prevent ponding and infiltration of water.
5. The Discharger shall install any reasonable additional groundwater and leachate monitoring devices required to fulfill the terms of any future Self-Monitoring Program issued by the Executive Officer.
6. The Discharger shall maintain all devices or designed features, installed in accordance with this Order such that they continue to operate as intended without interruption, except for limited periods of maintenance and repair.

7. The Discharger shall conduct monitoring activities according to the Self-Monitoring and Reporting Program attached to this Order and as may be amended by the Executive Officer, to verify the effectiveness of groundwater remediation and containment systems and waste management unit closure systems.
8. In the event of a release of a constituent of concern beyond the Point of Compliance (27CCR, Section 20405), the site begins a Compliance Period (27CCR, Section 20410). During the Compliance Period, the Dischargers shall perform an Evaluation Monitoring Program and a Corrective Action Program.
9. Landfill gases shall be adequately vented, removed from the landfill, or otherwise controlled to minimize the danger of explosion, adverse health effects, nuisance conditions, or the impairment of beneficial uses of water.
10. At any time, the Discharger may file a written request (including supporting documentation) with the Executive Officer, proposing modifications to the attached Self-Monitoring and Reporting Program. If the proposed modifications are acceptable, the Executive Officer may issue a letter of approval that incorporates the proposed revisions into the Self-Monitoring and Reporting Program.
11. The Discharger shall notify the Regional Board at least six months prior to beginning final closure activities for any waste management unit.
12. The Discharger shall comply with all applicable provisions of 27CCR that are not specifically referred to in this Order.
13. The Discharger shall provide a minimum of two surveyed permanent monuments near the landfill from which the location and elevation of wastes, containment structures, and monitoring facilities can be determined throughout the operation and post-closure maintenance period. A licensed land surveyor or registered civil engineer shall install these monuments.
14. The Discharger shall notify the Regional Board immediately of any failure occurring in any waste management unit. Any failure that threatens the integrity of any containment and control facilities, structures, or devices, shall be promptly corrected after approval of the method and schedule by the Executive Officer.
15. The Discharger shall maintain the facility so as to prevent a statistically significant increase in water quality parameters at points of compliance as provided in 27CCR, Section 20420.
16. All Class I units must comply with the applicable Chapter 15 and RCRA requirements.

C. PROVISIONS

1. **Self-Monitoring Program:** The Discharger shall comply with the updated Self-Monitoring Program (SMP) as attached to this Order (Part A and Part B). The attached SMP is designed to collect information necessary to evaluate the integrity of active and closed waste management units. The attached SMP is also designed to detect any discharges from waste management units and the significance and stability of any discharge. The attached SMP may be amended at the discretion of the Executive Officer, as necessary to better evaluate site conditions and discharges.

COMPLIANCE DATE: IMMEDIATE

2. **Demonstration of Hydraulic Containment and a Five-Foot Separation from Groundwater:** The Discharger shall submit technical reports semi-annually, which demonstrate, to the satisfaction of the Executive Officer, the maintenance of hydraulic containment of groundwater beneath the Class I Former Solar Evaporation Ponds (Monofill) and the Class II Central Landfill. Each semi-annual technical report shall also demonstrate the maintenance of a minimum five-foot separation between the base of each unit and the groundwater table. Demonstration of these requirements shall be made graphically and with tabulated data, as follows:
 - a. a piezometric surface contour map showing monitoring wells/locations, extraction wells/locations, perimeter drains, and water-level measurements
 - b. a table or tables that include all monitoring wells/locations, corresponding water-level measurements, measurement dates, extraction wells/locations, individual and total extraction rates, the total extraction volume for the semi-annual period, and the cumulative extraction volumes.

The above information may be incorporated into each semi-annual self-monitoring report required pursuant to Provision C.1 of this Order in lieu of a separate technical report. Demonstration of hydraulic containment and separation from groundwater for these units must be made using data collected on a semi-annual or more frequent basis.

COMPLIANCE DATE: August 31 and March 1 of each year

3. **Constituents of Concern (COCs):** The Discharger shall submit a technical report, acceptable to the Executive Officer, that presents a complete list of COCs for each SWMU monitored pursuant to the SMP attached to this Order, or as may be modified by the Executive Officer. COCs must be determined based on the character of the wastes and leachate in each SWMU. The COCs for each SWMU must also be validated in a technical report, acceptable to the Executive Officer, to be submitted once every five years.

COMPLIANCE DATE: March 1, 2003, then every five years thereafter

4. **Financial Assurance:** The Discharger shall obtain and maintain a Financial Assurance Instrument, acceptable to the Executive Officer, until the end of the Post-Closure Maintenance Period for each waste management unit subject to 27CCR, Chapter 6, Subdivision 1, Division 2, and Chapter 15, Section 2550.0. The Discharger shall submit a report every five years that either validates the Instrument's ongoing viability or proposes and substantiates any needed changes (e.g., a documented increase in the monitoring systems' ability to provide reliable early detection of a release can cause a decrease in the Instrument's financial coverage). For the purposes of planning the amount of the fund, the Discharger shall assume a post-closure period of at least 30 years. However, the post-closure maintenance period shall extend as long as the wastes pose a threat to water quality.

COMPLIANCE DATE: August 31, 2002, then every five years thereafter

5. **Report of Waste Discharge:** The Discharger shall submit a technical report, acceptable to the Executive Officer, describing any proposed material change in the character, location, or volume of a discharge, or in the event of a proposed change in site use or development [CWC Section 13260(c)]. A material change includes, but is not limited to, the following:
 - a. Addition of a major industrial waste discharge to discharge of essentially domestic sewage, or the addition of a new process or product by an industrial facility resulting in a change in the character of the waste
 - b. Significant change in disposal method, e.g., change from a land disposal to a direct discharge to water, or change in the method of treatment which would significantly alter the characteristics of the waste
 - c. Significant change in the disposal area, e.g., moving the discharge to another drainage area, to a different water body, or to a disposal area significantly removed from the original area potentially causing different water quality or nuisance problems
 - d. Increase in flow beyond that specified in the waste discharge requirements.
 - e. Increase in area or depth to be used for solid waste disposal beyond that specified in the waste discharge requirements

The technical report shall describe the project, identify key changes to the design that may impact waste management units, and specify components of the design necessary to maintain integrity of waste management unit covers and prevent water quality impacts. No material changes to the site shall be made without approval by the Executive Officer.

COMPLIANCE DATE: 120 days prior to any material change

6. **Stormwater Control Plans:** For each proposed development greater than 5 acres in size, the Discharger shall submit a Notice of Intent to the State Water Resources Control Board, submit a Storm Water Pollution Prevention Plan acceptable to the Executive Officer, and implement Best Management Practices (BMPs) for the control of stormwater, in accordance with requirements specified in the State Water Resources Control Board General Permit for Storm Water Discharges Associated with Construction Activities (NPDES Permit No. CAS000002).

COMPLIANCE DATE: 30 days prior to construction

7. **Availability:** A copy of these waste discharge requirements shall be maintained at the discharge facility and be available at all times to operating personnel. [CWC Section 132631]
8. **Change In Ownership:** The Discharger must notify the Executive Officer, in writing at least 30 days in advance of any proposed transfer of this Order's responsibility and coverage to a new Discharger. The notice must include a written agreement between the existing and new Discharger containing a specific date for the transfer of this Order's responsibility and coverage between the current Discharger and the new Discharger. This agreement shall include an acknowledgment that the existing Discharger is liable for violations up to the transfer date and that the new Discharger is liable from the transfer date on. [CWC Sections 13267 and 13263]
9. **Revision:** These waste discharge requirements are subject to review and revision by the Regional Board. [CCR Section 13263]
10. **Termination:** Where the Discharger becomes aware that it failed to submit any relevant facts in a Report of Waste Discharge or submitted incorrect information in a Report of Waste Discharge or in any report to the Regional Board, it shall promptly submit such facts or information. [CWC Sections 13260 and 13267]
11. **Vested Rights:** This Order does not convey any property rights of any sort or any exclusive privileges. The requirements prescribed herein do not authorize the commission of any act causing injury to persons or property, do not protect the Discharger from his liability under Federal, State or local laws, nor do they create a vested right for the Discharger to continue the waste discharge. [CWC Section 13263(g)]
12. **Severability:** Provisions of these waste discharge requirements are severable. If any provisions of these requirements are found invalid, the remainder of these requirements shall not be affected.
13. **Operation and Maintenance:** The Discharger shall, at all times, properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the Discharger to achieve compliance with conditions of this Order. Proper operation and maintenance includes effective performance, adequate funding, adequate operator staffing and training, and adequate laboratory and process controls including appropriate quality assurance procedures. This provision requires the operation of

backup or auxiliary facilities or similar systems only when necessary to achieve compliance with the conditions of this Order. [CWC Section 13263(f)]

14. **Reporting of Hazardous Substance Release:** If any hazardous substance is discharged in or on any waters of the State, or discharged or deposited where it is, or probably will be, discharged in or on any waters of the State, the Discharger shall report such discharge to the Regional Board by calling (510) 286-1255 during regular office hours (Monday through Friday, 8:00 to 5:00). A written report shall be filed with the Regional Board within five working days. The report shall describe: the nature of the hazardous substance, estimated quantity involved, duration of incident, cause of release, estimated size of affected area, nature of effect, corrective actions taken or planned, schedule of corrective actions planned, and persons/agencies notified.
15. **Entry and Inspection:** The Discharger shall allow the Regional Board, or an authorized representative upon the presentation of credentials and other documents as may be required by law, to:
 - a. Enter upon the Discharger's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of this Order;
 - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this Order;
 - c. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this Order; and
 - d. Sample or monitor at reasonable times, for the purposes of assuring compliance with this Order or as otherwise authorized by the California Water Code, any substances or parameters at any location. [CWC Section 13267]
16. **Monitoring Devices:** All monitoring instruments and devices used by the Discharger to fulfill the prescribed monitoring program shall be properly maintained and calibrated as necessary to ensure their continued accuracy. All flow measurement devices shall be calibrated at least once per year, or more frequently, to ensure continued accuracy of the devices. Annually, the Discharger shall submit to the Executive Officer a written statement signed by a registered professional engineer certifying that all flow measurement devices have been calibrated and will reliably achieve the accuracy required.
17. **Analytical Methods:** Unless otherwise permitted by the Regional Board Executive officer, all analyses shall be conducted at a laboratory certified for such analyses by the State Department of Health Services. The Regional Board Executive Officer may allow use of an uncertified laboratory under exceptional circumstances, such as when the closest laboratory to the monitoring location is outside the State boundaries and therefore not subject to certification. All analyses shall be required to be conducted in accordance with the latest edition of "Guidelines Establishing Test Procedures for Analysis of Pollutants" [40 CFR Part 136] promulgated by the U.S. Environmental Protection Agency. [CCR Title 23, Section 2230]
18. **Discharges To Navigable Waters:** Any person discharging or proposing to discharge to navigable waters from a point source (except for discharge of dredged or fill material subject to Section 404 of the Clean Water Act and discharge subject to a general NPDES permit)

must file an NPDES permit application with the Regional Board. [CCR Title 2 Section 223571]

19. **Endangerment of Health or the Environment:** The Discharger shall report any noncompliance that may endanger health or the environment. Any such information shall be provided orally to the Executive officer within 24 hours from the time the Discharger becomes aware of the circumstances. A written submission shall also be provided within five days of the time the Discharger becomes aware of the circumstances. The written submission shall contain a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and if the noncompliance has not been corrected; the anticipated time it is expected to continue and steps taken or planned to reduce, eliminate, and prevent recurrence of the noncompliance. The Executive Officer, or an authorized representative, may waive the written report on a case-by-case basis if the oral report has been received within 24 hours. The following occurrences must be reported to the Executive Officer within 24 hours;
 - a. Any bypass from any portion of the treatment facility.
 - b. Any discharge of treated or untreated wastewater resulting from sewer line breaks, obstruction, surcharge or any other circumstances.
 - c. Any treatment plant upset that causes the effluent limitation of this Order to be exceeded. [CWC Sections 13263 and 13267]

20. **Document Distribution:** Copies of all correspondence, technical reports, and other documents pertaining to compliance with this Order shall be provided to the following agencies:
 - a. RWQCB - San Francisco Bay Region
 - b. Cal/EPA Department of Toxic Substances Control

The Executive Officer may modify this distribution list as needed.

21. **Duty to Comply:** The Discharger shall comply immediately, or as prescribed by the time schedule below, with all Prohibitions, Specifications and Provisions of this Order. All required submittals must be acceptable to the Executive Officer. The Discharger must also comply with all conditions of these waste discharge requirements. Violations may result in enforcement actions, including Regional Board Orders or court Orders requiring corrective action or imposing civil monetary liability, or in modification or revocation of these waste discharge requirements by the Regional Board. (CWC Section 13261, 13263, 13265, 13268, 13300, 13301, 13304, 13340, 13350).

22. **Requests for Technical Reports:** All technical and monitoring reports required by this Order are requested pursuant to Section 13267 of the California Water Code. Failure to submit reports in accordance with schedules established by this Order or failure to submit a report of sufficient technical quality to be acceptable to the Executive Officer may subject the Dischargers to enforcement action pursuant to Section 13268 of the California Water Code.

23. This Order supersedes WDR Order Nos. 97-123 and 98-059. Order Nos. 97-123 and 98-059 are hereby rescinded.

I, Loretta K. Barsamian, Executive Officer, do hereby certify that the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, San Francisco Bay Region, on January 23, 2002.

Loretta K. Barsamian
Executive Officer

**Appendix F:
TRC Staff and Environmental Professional Qualifications/Resumes**

DRAFT

GARY LIEBERMAN, CEM

EDUCATION

B.S., Geology, Sonoma State University, 1987

PROFESSIONAL REGISTRATIONS/CERTIFICATIONS

Certified Environmental Manager, Nevada (#2052), 2007

AREAS OF EXPERTISE

Mr. Lieberman, CEM has program management and technical experience in the following general areas:

- Environmental and Regulatory Compliance
- Environmental Assessments and Audits
- Site Remediation Design and Implementation
- Construction Management and Oversight
- Groundwater Remediation
- Hazardous Waste Management and Disposal
- Environmental Health and Safety

REPRESENTATIVE EXPERIENCE

Mr. Lieberman has over 34 years of experience and responsibility in environmental consulting, including five years of direct experience with the Port. His qualifications include extensive hands-on experience planning, coordinating, directing, and conducting contaminated site investigations, asbestos and lead surveys and abatement programs, and performing environmental and regulatory compliance and audits, environmental site assessments (ESAs), and re-development/Brownfields work. Mr. Lieberman's work sites have included hazardous waste, office buildings, fuel and chemical storage, agricultural, food processing, mining, and telecommunications. His clients have included real estate, petroleum and chemical companies, pharmaceutical, financial, and insurance institutions in the private sector and government agencies at the local and federal levels, including the U.S. Air Force, U.S. Coast Guard, and U.S. Army. He currently serves in the capacity of Senior Project Manager with TRC's Environmental, Construction, and Remediation Division with responsibility for project and client management.

Port of Oakland, As-Needed Environmental Services – Oakland, CA

TRC is working on the Risk Management Plan (RMP) Location 167B Soils Remediation Project. The scope includes investigative, waste profiling, remediation oversight, air monitoring, and reporting services for remediation of lead contaminated soil. The lead impacts were speculated to have been introduced to the site by the use of lead oxides historically used in paint by the ship building industry as rust inhibitors, resulting in the discharge of lead-containing substances into shallow soil (fill) at the site. The selected remedial remedy consisted of removing and disposing of soil with total lead concentrations exceeding the remediation goal at off-site disposal facilities permitted to receive the waste. TRC's initial scope included assisting the Port with in-situ waste profiling for the planned excavation of soil in an effort to delineate areas of soil for disposal as non-RCRA versus RCRA hazardous wastes. The objective was to confidently "pre-profile" soils by location and depth to facilitate direct-loading during remedial excavation activities.

City of Oakland, Public Works, On Call Environmental Services – Oakland, CA (Project Manager)

Facilitated the pick-up and disposal of universal and hazardous materials from various City of Oakland buildings and facilities. Coordinated directly with disposal contractors to pick-up wastes in a timely manner and provide documentation of pick-up and disposal to City personnel.

Environmental Health & Safety (EH&S) and Compliance Outsource Support Services, Shorenstein Realty Services, Inc. – Multiple Locations, United States (Project Manager)

Mr. Lieberman is responsible for assisting with compliance, EH&S, and acquisition and divestiture activities, as well as facilitating staff to support their nationwide building portfolio. Since 1999, he has provided EH&S, compliance and regulatory and CUPA support services for Shorenstein's owned and managed properties in San Francisco and nationwide. His services include CUPA and DTSC annual submittals, asbestos and lead-based paint surveys, indoor air quality studies, preparation of survey reports, preparation of abatement specifications, compliance air sampling, preparation of final closure letters and reports, building health and safety and regulatory audits, and emergency response for chemical spills and exposures, and a naturally occurring asbestos analysis for a redevelopment project with serpentinite fill. Additional services included development of an EH&S policy, plan, and procedures manual and facilitation of rollout to more than 600 client staff nationwide. Mr. Lieberman supports monitoring of pending regulatory developments, working with client management to communicate information throughout organization, and providing corporate EH&S functions for client's owned and managed properties nationwide.

Phase I Environmental Site Assessments, Regulatory Audits and Due Diligence, JDS Uniphase – Various Locations, United States (Project Manager)

Mr. Lieberman facilitated completion of Phase 1 ESAs, compliance audits, and environmental due diligence support services in the Bay Area, United States, Canada, Europe, and Far East. His services included a broad range of disciplines to conduct comprehensive due diligence, compliance, and EH&S assessments associated with real property mergers, acquisitions, and divestitures. Protocols were developed from nationally recognized industry standards and customized to fit the needs unique to each transaction. The services included providing JDSU with a clear understanding of the identified and potential transactional liabilities, and a cost-effective roadmap to solving the challenges. The Phase I ESAs were performed in accordance with ASTM-1527-05 and -1527-13 and the due diligence activities were often performed in quick turnaround to meet the needs of the transaction.

MKS Instruments Onsite Compliance and H&S Support – Milpitas, CA (Project Manager)

Mr. Lieberman is currently providing periodic onsite compliance and health and safety support for the facility. His responsibilities include performing periodic facility compliance checks to verify all applicable permits are in place; preparation of internal safety summary document; assisting onsite staff with determining if documentation of storage and labeling procedures in the hazardous materials waste storage areas are being followed; performing weekly inspections to document site conditions, including completing internal Hazardous Waste Storage Area and Facility Inspection Checklist sheets; assisting MKS with general regulatory coordination, permitting activities, and EH&S support, when requested; and assisting with a facility Lockout/Tagout and Machine Guarding Audit. Mr. Lieberman will assist the facility with the training of a new full-time Health and Safety and Regulatory Compliance employee when a candidate is identified.

SPECIALIZED TRAINING

- Forty-Hour OSHA and Annual Refreshers and Supervisory OSHA Health and Safety Training
- OSHA 10 Hour Construction Safety and Health and Confined Space Entry
- AHERA Building Inspector and Management Planning
- Project Manager Training

PROFESSIONAL AFFILIATIONS

Groundwater Resources Association

BRIAN W. MO

EDUCATION

B.S., Earth Science, University of California, Santa Barbara 2021

AREAS OF EXPERTISE

Mr. Brian W. Mo has technical experience in the following general areas:

- Environmental Site Assessments, Phase I & II
- Field Investigation Preparation
- Field Sampling Activities
- Well Installation/Abandonment
- Technical Writing and Reporting
- ArcGIS, QGIS, gINT

REPRESENTATIVE EXPERIENCE

Mr. Mo is a graduate of the University of California, Santa Barbara, where he received a Bachelor of Science studying geology and hydrology while conducting paleoclimate, geochemical, and structural tectonic research in Death Valley. He serves as a TRC Staff Geologist in the Concord office and is responsible for assisting with Phase I & II Environmental Site Assessments (ESAs), ongoing site investigations, field sampling, data collection and management for related reporting. Mr. Mo's fieldwork experience includes oversight of well installations, well development, well abandonment, soil logging to ASTM standards, and soil sampling. His other responsibilities include writing various reports, compiling and interpreting data, and drafting potentiometric and isoconcentration contour maps.

Rombauer Vineyards Phase I ESAs – Napa, CA (Staff Geologist: 2022 – 2023)

Mr. Mo assisted in the preparation of a Phase I ESAs for Koerner Rombauer Investments, LLC / Rombauer Vineyards, Inc. for due diligence purposes. His responsibilities included review of environmental databases and regulatory agency records, review of previous environmental reports, historical source review (i.e., aerial photographs, topographic maps), description of historical site conditions, and preparation of the written report summarizing findings.

TForce Phase II ESAs – Various Locations, NV, CA (Staff Geologist: 2021 – 2022)

Mr. Mo assisted in the preparation of a Phase II ESAs for TForce Holdings USA, Inc. for due diligence purposes. His responsibilities included implementing remedial actions as required with coordinating removal of leaking underground storage tanks, investigative sampling, and preparation of the written report summarizing findings.

Recology Hay Road Landfill – Vacaville, CA (Staff Geologist: 2021 – Present)

Mr. Mo has served as a staff geologist overseeing the installation and destruction of monitoring wells at this site. His duties include soil logging in the field as well as associated reporting of well completion and subsequent analytical data.

GBF Landfill Groundwater and Soil Vapor Monitoring – Antioch, CA (Staff Geologist: 2021 – Present)

Mr. Mo has served as a TRC staff geologist overseeing the ongoing groundwater and soil vapor monitoring at this site. His duties comprise of coordinating sampling events, overseeing installation and destruction of monitoring wells, soil logging, drafting gINT logs, and assisting in completion of semi-annual reports.

Wilbur-Ellis Helm Soil and Groundwater – Helm, CA (Staff Geologist: 2021 – 2022)

Mr. Mo has served as a staff geologist overseeing the installation and destruction of monitoring wells at this site. His duties include coordinating soil logging in the field, conducting in-field nitrate examination, and drafting gINT logs.

SPECIALIZED TRAINING

- Initial 40-Hour OSHA HAZWOPER Training, July 2021
- 8-Hour OSHA HAZWOPER Refresher, September 2022
- Adult & Pediatric CPR, AED, FA Training, July 2021
- Leave No Trace, September 2020

**Appendix G:
Environmental Professional Statement**

DRAFT

**DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT EXPERIENCE
THERETO PURSUANT TO 40 CFR 312**

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of 3 years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of 3 years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of 5 years of full-time relevant experience; or (iv) have the equivalent of 10 years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the subject property. TRC personnel resume(s) are included in **Appendix F**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

APPENDICES

Appendix A FEMA Flood Insurance Rate Map

1.0 Introduction

At the request of HC (Contra Costa), TRC has prepared this report to address the hydrology and water quality sections required as a portion of the California Environmental Quality Act (CEQA; Public Resource Code Section 21000 et. seq.) environmental impact report (EIR) for the proposed renewable hydrogen production facility (Project) in Pittsburg, California. The purpose of this report is to describe the existing environment and assess the potential impacts to hydrology and water quality associated with the Project in accordance with CEQA requirements.

1.1 Project Location

The Project is located in a predominantly industrial area south of Suisun Bay in Pittsburg, California (Figure 1). Surrounding land use includes undeveloped industrial land to the east of the Project Area, developed industrial areas to the north and west, and developed commercial areas to the south. The Project Area is in Section 3, Township 2 North, Range 1 East, and elevations for the proposed Project Area range from 20 to 30 feet above mean sea level (MSL). Most of the Project Area is lightly to moderately developed, but currently unoccupied, with impervious surfaces present in the form of gravel roads, asphalt, and remnant concrete pads. Two abandoned water storage tanks are also present.

1.2 Project Description

The proposed project is to construct and operate a renewable hydrogen production facility to convert waste organic feedstock into carbon-negative renewable hydrogen. The process for generating renewable hydrogen includes accepting and screening waste organic feedstock for conversion; feeding the engineered municipal solid waste (EMSW) feedstock into the Omni Conversion Technologies (Omni CT) waste conversion unit and introducing steam, oxygen, and a limited amount of natural gas to produce synthetic gas (syngas); additional processing steps to prepare/clean syngas for hydrogen production; and syngas compression and a sour-gas-shift reaction to produce hydrogen-rich gas, which undergoes further purification and compression before distribution via tube-trailers. A byproduct of the renewable hydrogen process is the production of non-hazardous vitrified slag.

Under normal operations the facility will require up to 350 gallons per minute (gpm) for operations and produce two different wastewater streams: 1) process wastewater, and 2) cooling tower blowdown. Process wastewater will be treated on site and mixed with the blowdown stream to meet appropriate discharge limits before being sent to Delta Diablo Sanitation District's (DDSD) wastewater treatment plant (WWTP), adjacent to the Project Area, for disposal at a maximum discharge rate of 130 gpm. Most of the facility's water needs may be supplied from recycled or reclaimed water sources, which are currently being evaluated, or directly from the Contra Costa Water District (CCWD) or the City of Pittsburg.

2.0 Regulatory Framework

2.1 Federal Regulations and Policy

National Flood Insurance Program

The National Flood Insurance Program is managed by the Federal Emergency Management Agency (FEMA) and provides flood insurance to property owners, renters, and businesses. The Program works with communities required to adopt and enforce floodplain management regulations that help mitigate flooding effects.

Clean Water Act

The Clean Water Act (33 USC §1251 et seq.) regulates discharges of pollutants into the waters of the United States as well as quality standards for surface waters. Under the Clean Water Act, the United States Environmental Protection Agency (U.S. EPA) has implemented pollution control programs, such as setting wastewater standards for industry. U.S. EPA has also developed national water quality criteria recommendations for pollutants in surface waters. Section 303(d) of the Clean Water Act authorizes the U.S. EPA to assist states in listing impaired waters and developing Total Maximum Daily Loads (TMDLs) for these waterbodies. A TMDL establishes the maximum amount of a pollutant allowed in a waterbody and serves as the starting point or planning tool for restoring water quality. The San Francisco Bay Regional Water Quality Control Board (SFRWQCB) has classified the San Francisco Bay and many of its tributaries as impaired for various water quality constituents, as required by the Clean Water Act.

National Pollutant Discharge Elimination System

Created in 1972 by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) stormwater program specifies minimum standards for the quality of discharged waters. It requires states to establish standards specific to waterbodies and designate the types of pollutants to be regulated, including total suspended solids and oil. Under NPDES, all point sources that discharge directly into waterways are required to obtain a permit regulating their discharge. NPDES permits fall under the jurisdiction of the State Water Resources Control Board (SWRCB) or Regional Water Quality Control Boards when the discharge occurs within the 3-nautical-mile territorial limit.

NPDES also requires permits for discharges from construction activities that disturb one or more acres, and discharges from smaller sites that are part of a larger common plan of development or sale. To obtain coverage under the Construction General Permit, a project-specific Stormwater Pollution Prevention Plan (SWPPP) must be prepared to minimize impacts from discharges.

2.2 California Regulations and Policy

California Sustainable Groundwater Management Act

Encompassing multiple state Senate and House bills, the Sustainable Groundwater Management Act (SGMA) was passed in 2014 and set forth a statewide framework to help protect groundwater resources over the long-term. SGMA requires local agencies to form groundwater sustainability agencies (GSAs) for the high and medium priority basins. GSAs are responsible for developing and implementing groundwater sustainability plans.

California Water Code

The Porter-Cologne Act (California Water Code, Division 7, §13000-16104) is the principal law governing water quality regulation in California. It establishes a comprehensive program to protect water quality and the beneficial uses of water. The Porter-Cologne Act applies to surface waters, wetlands, and groundwater and to both point and nonpoint sources of pollution.

California Water Code section 13142.5 provides marine water quality policies stating that wastewater discharges shall be treated to protect present and future beneficial uses, and, where feasible, to restore past beneficial uses of the receiving waters. The highest priority is given to improving or eliminating discharges that adversely affect wetlands, estuaries, and other biologically sensitive sites; areas important for water contact sports; areas that produce shellfish for human consumption; and ocean areas subject to massive waste discharge.

California Water Code section 13170.2 directs the SWRCB to formulate and adopt a water quality control plan for the ocean waters of California. The SWRCB first adopted this plan, known as the California Ocean Plan, in 1972, and the most recent update of the California Ocean Plan was completed in 2019. The California Ocean Plan establishes water quality objectives for California's ocean waters, provides the basis for regulation of wastes discharged into coastal waters, and identifies applicable beneficial uses of marine waters and sets narrative and numerical water quality objectives to protect beneficial uses.

Bay Protection and Toxic Cleanup Program Legislation

In 1989, the SWRCB was required to develop sediment quality objectives (SQOs) as part of a comprehensive program to protect beneficial uses in enclosed bays and estuaries. These objectives are required for "toxic pollutants" and were identified in toxic hot spots or that were identified as pollutants of concern by the SWRCB. In 2009, the SWRCB adopted SQOs and an implementation policy for bays and estuaries in the State (Part 1). Part 1 includes narrative SQOs for the protection of aquatic life and human health, identification of the beneficial uses that these objectives are intended to protect, and requirements for program of implementation.

Antidegradation Policy (Resolution No. 68-16)

This policy requires the continued maintenance of existing high-quality waters. It provides conditions under which a change in water quality is allowable. A change must:

- Be consistent with maximum benefit to the people of the state;
- Not unreasonably affect present and anticipated beneficial uses of water; and
- Not result in water quality less than that prescribed in water quality control plans or policies.

Drinking Water Policy (Resolution No. 88-63)

This policy established that all surface and ground waters in the state are considered suitable, or potentially suitable, for municipal or domestic supply and should be designated for this use, with certain exceptions. The exceptions for groundwater are:

- The groundwater's total dissolved solids (TDS) exceed 3,000 milligrams per liter (mg/L) (5,000 microSiemens per centimeter ($\mu\text{S}/\text{cm}$), electrical conductivity), and it is not reasonably expected by the Water Boards to supply a public water system; or

- There is contamination, either by natural processes or by human activity (unrelated to the specific pollution incident), that cannot reasonably be treated for domestic use through implementation of best management practices (BMPs) or best economically achievable treatment practices; or
- The water source does not provide sufficient water to supply a single well capable of producing an average, sustained yield of 200 gallons per day; or
- The aquifer is regulated as a geothermal energy-producing source or has been exempted administratively pursuant to 40 Code of Federal Regulations (CFR), Section 146.4 for the purpose of underground injection of fluids associated with the production of hydrocarbon or geothermal energy, provided that these fluids do not constitute a hazardous waste under 40 CFR, Section 261.3.

Water Reclamation Policy (Resolution No. 77-1)

This resolution adopted in 1977 requires the State and Regional Water Boards to encourage water recycling projects for beneficial use using wastewaters that would otherwise be discharged to marine or brackish receiving waters or evaporation ponds. The resolution also specifies using recycled water to replace or supplement the use of fresh water or better water quality water, and to preserve, restore, or enhance in-stream beneficial uses, including fish, wildlife, recreation, and esthetics associated with any surface water or wetlands.

Bay and Estuaries Policy (Resolution 74-43 and 95-84)

The “Water Quality Control Policy for the Enclosed Bays and Estuaries of California” (Bays and Estuaries Policy), adopted in 1974 and amended in 1995, provides water quality principles and guidelines for the prevention of water quality degradation and the protection of beneficial uses of waters.

Thermal Plan (1975)

The “Water Quality Control Plan for the Control of Temperature in the Coastal and Interstate Waters and Enclosed Bays and Estuaries of California” (known as the Thermal Plan), adopted in 1972 and amended in 1975, specifies water quality objectives, effluent quality limits, and discharge prohibitions related to elevated temperature waste discharges to interstate waters, enclosed bays, and estuaries.

Powerplant Cooling Policy (Resolution No. 75-58)

The “Water Quality Control Policy on the Use and Disposal of Inland Waters Used for Powerplant Cooling” (Powerplant Cooling Policy), adopted in 1975, specifies the State Water Board’s position on powerplant cooling, specifying that fresh inland waters should be used for cooling only when other alternatives are environmentally undesirable or economically unsound.

2.3 Local Regulations and Policy

San Francisco Bay Basin Water Quality Control Plan 2019

The Water Quality Control Plan for the San Francisco Bay Basin (Basin Plan; SFRWQCB Board, 2019) is the Board's master water quality control planning document. It designates beneficial uses and water quality objectives (WQOs) for waters of the State, including surface waters and groundwater. It also includes programs of implementation to achieve WQOs. The Porter-Cologne Water Quality Act requires the development and periodic review of Basin Plans

that designate beneficial uses of California’s major rivers and groundwater basins and establish numerical WQOs for those waters. The 2019 version of the Basin Plan incorporating all amendments approved by the Office of Administrative Law was approved as of November 5, 2019.

Municipal Regional Stormwater NPDES Permit

In May 2022, the SFRWQCB issued the Municipal Regional Stormwater NPDES Permit (Order No. R2-2022-0018; NPDES Permit No. CAS612008) to regulate stormwater discharges from municipalities and local agencies in Alameda, Contra Costa, San Mateo and Santa Clara counties, and the cities of Fairfield, Suisun City and Vallejo.

San Francisco Bay Plan

The San Francisco Bay Plan (Bay Plan) was prepared by the San Francisco Bay Conservation and Development Commission (BCDC 2019). The two objectives of the Bay Plan are to protect the Bay as a great natural resource for the benefit of present and future generations, as well as to develop the Bay and its shoreline to their highest potential with a minimum of Bay filling. Findings and policies related to these objectives are outlined and discussed in the most recent update of the Bay Plan.

3.0 Study Area and Methods

TRC performed a desktop analysis of publicly available resources to describe and assess the existing hydrological resources for the Project Area (Figure 2). Key resources included aerial imagery provided by Google Earth; the 2019 San Francisco Bay Basin Plan; SWRCB’s GeoTracker website, and the 2018 Integrated Report for Clean Water Act Sections 305(b) and 303(d).

4.0 Existing Hydrological Resources

The Project Area is located just north of the Pittsburg-Antioch Highway, approximately two miles east of downtown Pittsburg, California and approximately 0.62 miles south of the New York Slough. The subsections below describe the existing surface water bodies and groundwater subbasins of the Project Area and the surrounding region, as well as the water quality of the existing resources in and around the Project Area.

4.1 Surface Water

The Project Area lies within the Kirker Creek watershed, which covers approximately 33 square miles in eastern Contra Costa County. The watershed is part of the larger San Francisco Bay watershed and drains the northern foothills of Mt. Diablo and portions of the City of Pittsburg and the City of Antioch. The watershed includes suburban development, range land in the foothills of Mt. Diablo, and highly urbanized and industrial areas in the coastal wetland areas (SFRWQCB, 2008). The surface water resources of the Kirker Creek watershed include both perennial and intermittent streams, many of which are channelized or engineered, that drain into Suisun Bay via Kirker Creek and the New York Slough.

San Francisco Bay

The San Francisco Bay encompasses approximately 1,600 square miles, and its estuary system is the terminus for approximately 40 percent of California watersheds, including the Sacramento and San Joaquin Rivers of the Central Valley. Some freshwater flows through the Delta and into the Bay, but much is diverted from the Bay for agricultural, residential, and industrial purposes, as well as delivery to other cities in southern California as part of state and federal water projects (ABAG 2017). Interactions between Delta outflow and Pacific Ocean tides determine how far saltwater intrudes into the Delta. Therefore, the salinity of the water can vary widely depending on the volume of freshwater runoff, which depends on factors such as precipitation, reservoir releases and upstream diversions (ABAG 2017).

The San Francisco Bay is in a highly industrialized area and has a history of human impacts from both regulated point sources and nonpoint-source runoff, which can carry pollutants, including heavy metals, motor oil, paints, chemicals, debris, grease and/or detergents to local waters. The SFRWQCB has classified the San Francisco Bay and many of its tributaries as impaired for various water quality constituents, as required under Section 303(d) of the Clean Water Act. The San Francisco Bay is identified as impaired for multiple contaminants, including mercury, polychlorinated biphenyls (PCBs), selenium, various pesticides, and other pollutants (SWRCB, 2021).

Suisun Bay

Suisun Bay is a complex estuary of the greater San Francisco Bay and is located approximately 0.62 miles north of the Project Area. Fresh water from the Sacramento, San Joaquin, and Napa rivers discharge to Suisun Bay before flowing out to the Pacific Ocean through the central portion of the San Francisco Bay. The water quality of Suisun Bay is affected by nutrient loading, sedimentation, and contamination, including pesticides, metals, and polycyclic aromatic hydrocarbons (PAHs) from urban, industrial, and agricultural runoff. Suisun Bay has been identified in the 2018 California Integrated Report as an impaired water body for several pollutants under Section 303(d) of the Clean Water Act, including furans, PCBs, and dioxins (SWRCB, 2021).

Existing beneficial uses identified for Suisun Bay in the San Francisco Bay Basin Plan include Industrial Service Supply¹, Industrial Process Supply², Commercial and Sport Fishing, Estuarine Habitat, Fish Migration, Preservation of Rare and Endangered Species, Fish Spawning, Wildlife Habitat, Contact and Non-Contact Recreation, and Navigation. The existing beneficial uses identified for New York Slough include Commercial and Sport Fishing, Estuarine Habitat, Fish Migration, Preservation of Rare and Endangered Species, Contact and Non-Contact Recreation, and Navigation (SFRWQCB, 2019).

¹ Uses of water for industrial activities that do not depend primarily on water quality, e.g., cooling water, fire protection, etc.

² Uses of water for industrial activities that depend primarily on water quality.

Kirker Creek

Kirker Creek, which historically flowed immediately east of the proposed Project Area into Dowest Slough, has been channelized and diverted to the east along the Pittsburg-Antioch Highway on the south side of the Project Area. The historic Kirker Creek channel still exists on the east side of the Project Area and drains into the southern reaches of Dowest Slough. Based on site photographs taken for the wetland delineation study, the historic Kirker Creek channel is typically dry but likely flows intermittently during precipitation events (TRC, 2022).

Kirker Creek has been identified in the 2018 California Integrated Report as an impaired water body for several pollutants under Section 303(d) of the Clean Water Act, including toxicity and pyrethroids. These pollutants are likely a result of urban, industrial, and agricultural runoff (SWRCB, 2021). Existing beneficial uses for Kirker Creek include Preservation of Rare and Endangered Species, Warm Water Habitat, Wildlife Habitat, and Contact and Non-Contact Recreation (SFRWQCB, 2019).

4.2 Groundwater

The Project Area is underlain by the Pittsburg Plain Groundwater Subbasin (Basin), within the greater San Francisco Bay Basin. The Pittsburg Plain Subbasin is bounded by Suisun Bay on the north, the Tracy basin on the east, and the Clayton basin on the west. The southern boundary extends inland from the Suisun Bay one to three miles (DWR, 2003). The existing and potential beneficial uses for the Basin include Municipal and Domestic Water Supply, Industrial Process Water Supply, Industrial Service Water Supply, and Agricultural Water Supply (SFRWQCB, 2003).

The aquifer system of the Pittsburg Plain Subbasin is formed by a transitional depositional environment between the Coast Range and Great Valley physiographic provinces. Sediments are derived from alluvial outwash from the Coast Range hills south of the Project Area and from the fluvial influence of the Sacramento-San Joaquin River system, which joins Suisun Bay north of the Project Area. This transitional setting is reflected in the interbedded, fine- and coarse-grained sediments of the Pittsburg Plain. Groundwater recharge is derived primarily from streambed percolation and the New York Slough, and the direction of the groundwater gradient is generally north towards New York Slough.

Based on the Department of Toxic Substances Control's (DTSC) Statement of Basis for the neighboring USS-POSCO Industries (UPI) site located approximately 0.8 miles northwest of the Project Area, two primary groundwater-bearing units have been identified (DTSC, 2015a): an upper groundwater-bearing zone (upper aquifer, shallow and intermediate zones); and a deeper groundwater-bearing zone (main sand and gravel aquifer). Groundwater monitoring activities conducted in July of 2022 at the neighboring KNA California, Inc. facility, immediately west of the Project Area, indicate that groundwater is first encountered at an approximate elevation between 1 and 12 feet above mean sea level (MSL; AEC, 2022).

4.3 Water Supply

The City of Pittsburg (the City) provides potable water to residential, commercial, industrial, and institutional customers within the City limits. Its service area is approximately 15.6 square miles. The City relies on surface water provided by CCWD and groundwater from two groundwater

wells. CCWD maintains intakes in the Delta as a source of its surface water supply; however, the quality of freshwater in the Delta is dependent on the operation of existing Central Valley Project/State Water Project storage reservoirs, which are impacted by changes in snowpack and upstream river conditions. Sea level rise also has the potential to render CCWD's existing Delta intake unusable due to saltwater intrusion. Groundwater and surface water from CCWD are blended at the City's water treatment plant and treated before being delivered to customers (City of Pittsburg, 2021). In 2020, the City delivered approximately 9,232 acre-feet (AF) per year of potable water, which was a 5.2 percent (%) increase from 2015 (City of Pittsburg, 2021).

Delta Diablo Sanitation District operates a recycled water system that provides treated wastewater for irrigation and other non-potable uses. The system provides up to 8,600 AF per year of tertiary treated recycled water to two power plants and 20 acres of parks and landscaped areas. Treatment includes modern primary and secondary treatment of wastewater and tertiary flocculation, filtration, and disinfection to remove bacteria and viruses. The SWRCB oversees production, conveyance, quality control, and proper use of recycled water (DDSD, 2023b). A summary of DDSD's recycled water quality is provided in Table 1.

4.4 Climate and Precipitation

The Project Area is in Pittsburg, California, which has a Mediterranean climate characterized by mild, wet winters and hot, dry summers. The average annual rainfall for Pittsburg is 13.2 inches, most of which falls between November and April. The average summer temperatures range from highs in the upper 90s Fahrenheit (F) to lows in the mid 50s F. Winter temperatures range from the 60s F to the low 30s F (City of Pittsburg, 2021). Overnight lows rarely drop below freezing (32 F) due to the modulating effect of the Suisun Bay and the Delta.

In the San Francisco Bay Area, sea level rise due to climate change is expected to result in higher tides and more frequent flooding, particularly during storm events. According to a report by the San Francisco Estuary Institute, sea level rise could cause flooding and erosion in many areas of Suisun Bay and exacerbate existing environmental problems in the bay, such as habitat loss, erosion, and water quality issues, particularly saltwater intrusion. In Suisun Bay, sea level rise is projected to be particularly significant due to its shallow depth and the surrounding low-lying topography.

5.0 Discussion

This section includes a discussion of the Project's potential impacts to hydrology and water quality as presented in the CEQA Checklist.

a) Would the project violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or groundwater quality?

The Project Area is west of the historic channel of Kirker Creek, which likely flows intermittently during precipitation events and discharges to the New York Slough via Dowest Slough. Both Kirker Creek and Suisun Bay are considered Section 303(d) impaired waterbodies, but have existing beneficial uses including Wildlife Habitat, Preservation of Rare and Endangered Species, and Contact and Non-Contact Recreations.

The Project has the potential to impact surface water quality during construction and during operation. Construction activities may result in increased erosion and sedimentation, which can negatively impact surface water quality by increasing turbidity and reducing water clarity. This would be addressed by implementing effective erosion and sediment control measures, such as silt fences, sediment basins, and vegetative buffers. Wastewater from the proposed project would be treated to meet appropriate discharge limits, then sent to DDSD wastewater treatment facility for disposal. Interconnection for wastewater sewer to the DDSD system would mitigate potential impacts from wastewater discharges.

Accidental spills or leaks of hazardous materials during construction or operation could impact surface water quality. Although construction and operation of the proposed project involves the handling of hazardous materials, like natural gas, chemical additives, machine oils, and lubricants, release risk in significant quantities is limited. This risk would be minimized through proper handling and storage of materials, and by having a Spill Prevention, Control and Countermeasure Plan (SPCC) in place. The handling and storage of EMSW as feedstock, and biochar as a byproduct, has the potential to impact surface water quality, if managed poorly. However, proper management of these materials and implementation of BMPs would mitigate potential impacts to surface water quality.

b) Would the project substantially decrease groundwater supplies or interfere substantially with groundwater recharge such that the project may impede sustainable groundwater management of the basin?

In accordance with the project description in Section 1.2, under normal operations the proposed project could require up to 350 gpm for operations that would be supplied from recycled or reclaimed water sources, or directly from the CCWD or the City of Pittsburg. The Project does not include the installation of any groundwater extraction wells for water supply purposes.

The proposed use of recycled or reclaimed water for project operations would not increase the burden on either surface water supplies and groundwater supplies within the Bay-Delta system and the Pittsburg Plain aquifer system, respectively. DDSD currently operates a recycled water system that provides up to 8,600 AF per year, or approximately 5,332 gpm, of treated wastewater for irrigation and other non-potable uses (DDSD, 2023b); an additional 350 gpm equates to about a 6.5% increase in water supply. If recycled or reclaimed water is unavailable, it is unclear whether the City of Pittsburg has capacity to provide 350 gpm for operations. In 2020, the City provided 9,232 AF per year, or approximately 5,720 gpm, of potable water to its customers, an additional 350 gpm equates to about 6% increase in potable water supply. Some potable water would need to be provided by the City of Pittsburg for domestic use, but the amount would be negligible and is not expected to impact potable water supplies in the area. Further analysis of operation water supplies is ongoing to ensure minimal impacts to groundwater supplies.

The Project would alter surface conditions in the Project Area, which are currently comprised of vacant land, gravel access roads, asphalt, two existing water storage tanks, and miscellaneous abandoned concrete pads. New structures, paved parking areas and access roads would lead to less permeable surface conditions that may affect groundwater recharge. However, as previously noted, groundwater recharge in this area is primarily derived from streambed

percolation and the New York Slough. Therefore, the proposed projects is not anticipated to have a significant effect on overall groundwater levels in the Pittsburg Plain subbasin.

c) Would the project substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which would:

i. Result in substantial erosion or siltation on- or offsite?

Kirker Creek was diverted south of the Project Area where it now flows east along the Pittsburg-Antioch Highway before turning north and discharging to the New York Slough. The historic Kirker Creek channel, which likely runs intermittently, is located just east of the Project Area and discharges to the New York Slough via Dowest Slough.

Based on the Project boundaries shown on Figure 2, the proposed primary access road runs west from Arcy Lane parallel to the diversion channel for Kirker Creek and crosses the historic stream bed of Kirker Creek south of the Project Area. An appropriately sized culvert would be installed under the primary access road to maintain flow. Based on these preliminary plans, the Project could slightly alter the existing drainage pattern of the site, but it is not anticipated that its construction or operation of the proposed project would result in substantial erosion of siltation on- or offsite.

ii. Substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or offsite?

The low-lying land around the historic Kirker Creek channel is a flood plain and considered a Special Flood Hazard Area according to FEMA Flood Insurance Rate Map for Contra Costa County (Appendix A). The Project would increase impervious surfaces at the site and result in increased surface runoff. However, based on the preliminary information available, the Project would be designed to avoid changes to the existing drainage pattern and reduce risk from overflow. Additionally, the Project would be designed in compliance with the required codes and standards to minimize the potential for structure damage and safety risks as a result of flooding. Further analysis may be appropriate to assess the increased volume of surface water runoff based on the proposed footprint of the Project, the available drainage capacity of the historic Kirker Creek channel and flood plain, and the effect of downstream constrictions, e.g., culverts.

iii. Create or contribute runoff water, which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?

If managed poorly, the handling and storage of waste organic materials as feedstock and biochar as byproduct may be sources of polluted runoff. Other hazardous materials stored on site for operations, such as fuels, oils, and other chemicals may provide additional sources of polluted runoff if spills or leaks occur. The storm water management system would be designed to minimize contact with stored materials. A SPCC Plan and a Storm Water Pollution Prevention Plan (SWPPP) would be implemented to prevent or minimize the discharge of oil and other pollutants in

stormwater runoff. Additionally, a Hazardous Materials Management Plan (HMMP) describing hazardous material use, transport, management and disposal protocols would be prepared prior to the start of construction.

iv. *Impede or redirect flood flows?*

Kirker Creek has already been diverted south of the Project Area; however, the historic stream channel likely flows intermittently during precipitation events. The layout of the primary access road crosses historic channel of Kirker Creek south of the Project Area. An appropriately sized culvert would need be installed under the primary access road to not impede or redirect flow.

d) *In flood hazard, tsunami, or seiche risk zones, would the project risk release of pollutants due to project inundation?*

FEMA has produced Flood Insurance Rate Maps (FIRMs) that show existing Special Flood Hazard Areas (SFHAs). Based on the FIRM provided in Appendix A, both Kirker Creek to the south and historic Kirker Creek to the east of the Project Area are designated as Zone AE. Flood zone AE is considered a SFHA, which means that there is at least a 1% chance of annual flooding in that area. This is also commonly referred to as the "100-year floodplain" because there is a 1% chance of a flood of that magnitude occurring in any given year. FEMA Zone AE is different from Zone A in that it takes into account additional factors that can contribute to flood risk, such as wave action, storm surge, and coastal erosion.

The Project Area itself is located west of the historic Kirker Creek and designated as FEMA Zone X, which is not considered a SFHA because the risk of flooding is lower, generally less than 0.2% chance of annual flooding. Because the Project Area is not in an existing flood hazard area the proposed Project is not anticipated to risk release of pollutants due to project inundation.

e) *Would the project conflict with or obstruct implementation of a water quality control plan or sustainable groundwater management plan?*

The Project Area within Contra Costa County is within the limits of San Francisco Bay Basin managed by the SFRWQCB's Basin Plan (SFRWQCB, 2019). The Basin Plan is the master policy document that contains descriptions of the legal, technical, and programmatic bases of water quality regulation in the region. State policy for water quality control in California is directed toward achieving the highest water quality consistent with maximum benefit to the people of the state, and the beneficial uses identified in the Basin Plan for surface waters, groundwaters, marshes, and wetlands serve as a basis for establishing water quality objectives and discharge prohibitions to attain these goals.

The beneficial uses identified for Kirker Creek and the New York Slough include Warm Water Habitat, Wildlife Habitat, Commercial and Sport Fishing, Estuarine Habitat, Fish Migration, Preservation of Rare and Endangered Species, Contact and Non-Contact Recreation, and Navigation. Chapter 3 of the Basin Plan identifies the water quality objectives for surface waters and groundwater, including numerical water quality objectives for select toxic pollutants.

Based on the project description provided in Section 1.2 above, process wastewater will be treated on site and mixed with the blowdown stream to meet appropriate discharge limits before being sent to DDSD's WWTP for disposal and will not be discharged to surface waters under a NPDES permit.

1. Introduction

The following Noise Study Report has been prepared by TRC for the H Cycle Renewable Hydrogen Project proposed by HC (Contra Costa) in Pittsburg, California. Although there are no state, county, or local noise ordinance limits applicable to the facility, the results of the Noise Study presented herein demonstrate that the predicted sound levels during the construction and operation of the facility will be well below the level deemed acceptable for an industrial land use in the State of California and the City of Pittsburg, and that the facility will not cause a perceptible increase in the sound levels at any nearby noise sensitive areas during construction or operation.

1.1 Proposed Facilities

H Cycle is proposing a renewable hydrogen facility in northeastern Pittsburg, CA. The proposed facility location is an approximately 12-acre site in a General Industrial zone on a former Dow Chemical property now operated by Corteva Agrisciences. The site is bounded by a railroad easement to the south, industrial properties to the west, additional industrial property and the San Joaquin River beyond to the north, and vacant land to the east. The facility will include a variety of sound-producing equipment, including pumps, dryers, compressors, cooling fans, generators, and a ground flare system. During construction, an additional 12 acres will be used as construction laydown yards.

2. Concepts of Environmental Sound

Sounds are generated by a variety of sources (e.g., a musical instrument, a voice speaking, or an airplane that passes overhead). Energy is required to produce sound and this sound energy is transmitted through the air in the form of sound waves – tiny, quick oscillations of pressure just above and just below atmospheric pressure. These oscillations, or sound pressures, impinge on the ear, creating the sound we hear. The range of sound pressures that can be detected by a person with normal hearing is very wide, ranging from about 20 micro-pascals (μPa) for very faint sounds at the threshold of hearing to nearly 10 million μPa for extremely loud sounds, such as a jet during take-off at a distance of 300 feet. Because the range of human hearing is so wide, sound levels are reported using “sound pressure levels”, which are expressed in terms of decibels. The sound pressure level in decibels is the logarithm of the ratio of the sound pressure of the source to the reference sound pressure of 20 μPa , multiplied by 20.

Table 2.1 provides some examples of common sources of sound and their sound pressure levels. All sound levels in this assessment are provided in A-weighted decibels, abbreviated “dB(A)” or “dBA.” The A-weighted sound level reflects how the human ear responds to sound, by deemphasizing sounds that occur in frequencies at which the human ear is least sensitive to sound (at frequencies below about 100 hertz and above 10,000 hertz) and emphasizing sounds that occur in frequencies at which the human ear is most sensitive to sound (in the mid-frequency range from about 200 to 8,000 hertz). In the context of environmental sound, noise is defined as “unwanted sound.”

Table 2.1 Examples of Common Sound Pressure Levels

Sound Level dB(A)	Common Indoor Sounds	Common Outdoor Sounds
110	Rock Band	Jet Takeoff at 1000 feet
100	Inside NYC Subway Train	Chain Saw at 3 feet
90	Food Blender at 3 feet	Impact Hammer (Hoe Ram) at 50 feet
80	Garbage Disposal at 3 feet	Diesel Truck at 50 feet
70	Vacuum Cleaner at 10 feet	Lawn Mower at 100 feet
60	Normal Speech at 3 feet	Auto (40 mph) at 100 feet
50	Dishwasher in Next Room	Busy Suburban Area at night
40	Empty Conference Room	Quiet Suburban Area at night
25	Empty Concert Hall	Rural Area at night

Sound pressure levels are typically presented in community noise assessments utilizing the noise metrics described below and expressed in terms of A-weighted decibels.

- “L₁₀” is the sound level that is exceeded for 10 percent of the time. This metric is a measure of the intrusiveness of relatively short-duration noise events that occurred during the measurement period.
- “L₅₀” is the sound level that is exceeded for 50 percent of the measurement period.
- “L₉₀” is the sound level that is exceeded for 90 percent of the time and is a measure of the background or residual sound levels in the absence of recurring noise events.
- “L_{eq}” is the is the constant sound level which would contain the same acoustic energy as the varying sound levels during the time period and is representative of the average noise exposure level for that time period.
- “L_{MAX}” is the instantaneous maximum sound level for the time period.

It is often necessary to combine the sound pressure levels from one or more sources. Because decibels are logarithmic quantities, it is not possible to simply add the values of the sound pressure levels together. For example, if two sound sources each produce 70 dB and they are operated together, their combined impact is 73 dB – not 140 dB as might be expected. Four equal 70 dB sources operating simultaneously result in a total sound pressure level of 76 dB. In fact, for every doubling of the number of equal sources, the sound pressure level goes up another three decibels. A tenfold increase in the number of sources makes the sound pressure level increase by 10 dB, while a hundredfold increase makes the level increase by 20 dB. The logarithmic combination of *n* different sound levels is calculated by the following equation:

$$L_{total} = 10 * \log_{10} \left(10^{\frac{L_1}{10}} + 10^{\frac{L_2}{10}} + \dots + 10^{\frac{L_n}{10}} \right)$$

Perceived changes in sound level can be slightly more subjective; the average person will not notice a change of 1-2 dB, a 3 dB increase is just barely perceptible, while a 5 dB change is clearly noticeable.

3. Noise Sensitive Areas

The facility is being proposed on an industrial property far removed from any noise sensitive areas (NSAs) such as residences, schools, or hospitals. Table 3.1 lists the closest NSAs and their approximate distance and direction from the proposed H Cycle facility. These locations are also shown in Figure 3, Noise Sensitive Area Locations.

Table 3.1 Closest Noise Sensitive Areas

NSA	Description	Approximate Distance from H Cycle Facility to NSA, feet	Direction to NSA
1	Hotel	7,500	SW
2	Residence	4,800	SW
3	Residence	5,000	SE
4	Church	5,000	SE

4. Short Term Ambient Sound Survey

A pre-construction ambient sound survey was completed at the proposed facility property on September 19th and 20th, 2023 to characterize the existing sound environment (i.e., background) in the project area. Short term sound level measurements were taken at the site property lines and within the gated property for approximately ten minutes at each location during multiple time periods.

The measurements were taken using a Larson Davis Model 831C sound level meter that meets the requirements of the American National Standards Institute (ANSI) Standards for Type I instruments. The sound level meter was calibrated before and after each monitoring period using a CAL200 acoustic calibrator. The microphone was positioned according to the ANSI Standard on a tripod 1.5 meters above ground. 7.5 meters from large reflecting surfaces, and at least 1.5 meters from tall trees.

Ambient sound level measurements were conducted on a weekday on a non-holiday week at 6 total measurement points and for a minimum of ten continuous minutes for each criterion. At the first two measuring points, data was collected in the morning (6 AM – 8 AM), afternoon (12 PM – 2 PM), and evening (5 PM – 7 PM). Four other points were collected within the gates of the property in the morning (8 AM-10 AM).

The following measurement criteria are provided in Tables 5.1-5.4 for each measurement location and for each measurement period:

- LA_{EQ}, LC_{EQ}, LA₁₀, LA₅₀, and LA₉₀
- Unweighted octave-band analysis (16, 31.5, 63, 125, 250, 500, 1K, 2K, 4K, 8K Hz)

The measurement points are listed below:

- MP-1: South side of property, outside gates
- MP-2: East side of property, outside gates
- MP-3: Northeast side of property.
- MP-4: Northwest side of property.
- MP-5: Center of property closer to the west.
- MP-6: Southwest side of property.

The proposed Project site layout, showing the location of the measurement points, is shown on Figure 1.

Using the data measured in the short-term monitoring, a summary of the ambient noise measurements was created for each of the NSAs (Tables 5.5 and 5.6). In the table, the closest measuring point is listed for each NSA, and calculations for the daytime (Ld), nighttime (Ln), and combined day and night (Ldn) were completed.

Table 5.5 Ambient Noise Measurements Summary

NSA*	Measured Levels Period Average, dBA Leq		
	Day Ld	Night Ln	Day-Night Ldn
1	59.2	55.9	65.9
2	52.1	77.3	87.3
3	52.1	77.3	87.3
4	52.1	55.9	65.9

*Data is from the closest measuring point to each NSA

During the ambient noise measurements, staff took note of other noises that could be heard in the background. A summary of all of the background noise sources is provided in Table 5.6.

6. Construction Noise Modeling

Short-term increases in sound levels could occur during construction. Standard construction equipment will be used in the construction of the facility, with a pile driver being used during certain aspects of the construction. However, weather conditions, site conditions, specialized construction techniques, emergencies, or other atypical circumstances may necessitate nighttime work or extended work on Sundays. To be conservative in the construction noise calculations, the loudest twenty pieces of Project construction equipment was included in the noise model as operating at the same time. The highest sound levels during construction are expected during the early earthmoving phase. Equipment that may be used during this phase would include bulldozers, excavators, graders, and 35-ton offroad trucks. Based on the Project equipment usage predictions, a sound level calculation was performed using the Federal Highway Administration’s Roadway Construction Noise Model version 1.1 (FHWA, 2006).

H Cycle utilized the construction equipment listed below:

- Pile Driver
- Cranes
- Forklift s
- Excavators
- Loader/Backhoes
- Payloaders
- Graders
- Rollers
- Trucks (flatbed, dump, etc)
- Lifts

Table 6.1 summarizes the results of the construction noise modeling.

Table 6.1 Sound Level Increases During Construction

NSA	Measured Existing Ambient Sound Levels, dBA	Predicted Sound Level - Single Daytime Shift	Construction Plus Ambient	Temporary Increase in Sound Level, dB
	Day (Ld)	Day (Ld)	Day (Ld)	Day (Ld)
1	59.2	57.7	61.5	2.3
2	52.1	60.3	60.9	8.8
3	52.1	60.8	61.3	9.2
4	52.1	60.3	60.9	8.8

As shown above, the RCNM model predicts that there will be significant temporary increases in sound levels at the closest nearby NSAs during Project construction activities. Again, this model

is assuming all equipment is operating at the same time and that will be temporary and only during daytime construction hours.

7. Operational Noise Impacts

This section describes the methods, assumptions, and results of the Cadna-A® noise modeling used to predict future sound levels during operation of the proposed renewable hydrogen production facility.

7.1 Noise Model Inputs

Noise modeling was conducted to predict future sound levels at the nearby NSAs during facility operation, both with and without the gas flare in operation. The Cadna-A model was used for this purpose. An industry standard, Cadna-A was developed by DataKustik GmbH to provide an estimate of sound levels at distances from sources taking into account sound power levels from stationary and mobile sources, the effects of terrain features including relative elevations of noise sources, intervening objects including buildings and sound barrier walls, and ground effects due to pavement and unpaved ground.

The International Standards Organization current standard for outdoor sound propagation (ISO 9613 Part 2 – “Attenuation of sound during propagation outdoors”) was used within Cadna-A. This standard provides a method for calculating environmental noise in communities from a variety of sources with known emission levels. The method contained within the standard calculates the attenuation over the entire sound path under weather conditions that are favorable for sound propagation, such as for downwind propagation or “under a well-developed ground-based temperature inversion.” Application of conditions that are favorable for sound propagation yields conservative estimates of operational noise levels in the surrounding area.

The site layout and existing topography was used to create a terrain model that represents the topography during facility operation. The inputs to the model are 2-foot contours, based on United States Geographic Survey (“USGS”) 3DEP topographic data. The model conservatively assumed continuous operation of all sound sources. A search radius of 8,000 feet from each receptor was used in the model to ensure that all noise sources contributing to the predicted facility noise levels were modeled at every NSA.

Table 7.1 lists the source octave band sound power levels for the proposed equipment. Table 7.2 lists overall sound power levels for individual area and point sources modeled across the site, using the “Other Equipment” octave band profile, scaled as necessary. Separate modeling cases were considered with the gas flare active and inactive. All other equipment is assumed to be continuously operating.

Table 7.1 Equipment Octave Band Sound Power Levels

Component	Octave Band Center Frequency (Hz)									Total	
	31.5	63	125	250	500	1000	2000	4000	8000	dB	dBA
Gas Flare ¹	-	97.5	91.6	106.1	108.5	104.7	108.9	109.7	-	124.8	115.0
Other Equipment ²	-	82.5	86.0	83.8	81.1	79.4	77.4	74.5	72.5	90.5	85.0

¹Based on client provided specification of 115 dBA using typical gas flare octave band profile.

²Based on client provided specification of 85 dBA using cooling fan octave band profile.

Table 7.2 Equipment Sound Power Levels

Component	Type	Height (ft. AGL)	Total dBA
OMNI Package ¹	Area	3.28	96.0
Switchgear Yard ²	Area	3.28	74.0
BMH Package ³	Area	3.28	94.7
Hydrogen Offtake Area ⁴	Area	3.28	75.0

²Based on client provided specification of 74 dBA

³Based on manufacturer specification of 77.7 dBA at 2m

⁴Based on client provided specification of 75dBA at package boundary

7.2 Noise Model Results

Tables 7.3 and 7.4 summarize the predicted operational sound levels at each of the monitoring points and NSA locations, the total predicted sound levels at each location, and the predicted increase in the sound level at each location.

Table 7.3 Operational Noise Modeling Results – Gas Flare Active (dBA)

NSA	Existing	Modeled	Total	Increase
1	59.2	26.6	59.2	< 0.1
2	52.1	27.5	52.1	< 0.1
3	52.1	27.4	52.1	< 0.1
4	52.1	26.9	52.1	< 0.1
MP	Existing	Modeled	Total	Increase
1	52.1	47.8	53.5	1.4
2	52.1	51.3	54.7	2.6
3	47.4	59.5	59.8	12.4
4	47.8	64.8	64.9	17.1
5	48.9	59.6	60.0	11.1
6	59.2	63.7	65.0	5.8

Table 7.4 Operational Noise Modeling Results – Gas Flare Inactive (dBA)

NSA	Existing	Modeled	Total	Increase
1	59.2	7.2	59.2	< 0.1
2	52.1	12.3	52.1	< 0.1
3	52.1	12.6	52.1	< 0.1
4	52.1	11.6	52.1	< 0.1
MP	Existing	Modeled	Total	Increase
1	52.1	39.8	52.3	0.2
2	52.1	43.8	52.7	0.6
3	47.4	48.9	51.2	3.8
4	47.8	43.9	49.3	1.5
5	48.9	52.1	53.8	4.9
6	59.2	63.4	64.8	5.6

As shown on Tables 7.3 and 7.4, the results of the noise modeling conducted predict that there will be imperceptible increases in the sound levels at the closest nearby NSAs and at the property line during facility operation when the gas flare is inactive. When the gas flare is active, there will be imperceptible increases in the sound levels at the nearby NSAs but perceptible increases in the sound levels at some property line locations. However, according to the State of California General Plan Guidelines, which have been adopted by the City of Pittsburg, an Ldn sound level of 75 dBA or less is considered acceptable for an industrial land use, and the predicted sound levels at the facility property line during operation with the flare both active and inactive will still be well below that level, and thus maintain sound levels deemed acceptable for an industrial land use.

8. Noise Mitigation

Construction will generally occur during daylight hours, which will significantly mitigate noise impacts to neighbors. All contractors will be required to utilize sound control devices no less effective than those provided by the manufacturer and maintain equipment in accordance with manufacturer's recommendations. No equipment will have unmuffled exhausts and equipment idling will be kept to a minimum.

Operational sound levels will cause minimal (<1 dBA) noise level increases at the closest NSA locations due primarily to the distance from the facility sound sources to the NSAs. Furthermore, the predicted sound level increases over the current sound levels at the property line during normal facility operation (gas flare inactive) will be imperceptible, and the sound levels at the property line during facility operation at all times will be well below the level deemed acceptable for an industrial use by the State of California and the City of Pittsburg. Therefore, no additional sound mitigation is expected to be necessary during facility operation.

TABLE OF TABLES

Table J-1:	H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program.....	3
------------	---	---

J.1 INTRODUCTION

As the lead agency under the California Environmental Quality Act (CEQA), the city of Pittsburg (City) is required to adopt a program for reporting or monitoring regarding the implementation of mitigation measures for the H Cycle Pittsburg Renewable Hydrogen Project (Project), if it is approved, to ensure that the adopted mitigation measures are implemented as defined in this Environmental Impact Report (EIR). This lead agency responsibility originates in Public Resources Code section 21081.6, subdivision (a) (Findings), and the State Guidelines for Implementing CEQA sections 15091, subdivision (d) (Findings) and 15097 (Mitigation Monitoring or Reporting).

J.2 MONITORING AUTHORITY

The purpose of a Mitigation Monitoring and Reporting Program (MMRP) is to ensure that measures adopted to mitigate or avoid significant impacts are implemented. An MMRP can be a working guide to facilitate not only the implementation of mitigation measures by HC (Contra Costa), LLC (Applicant), but also the monitoring, compliance, and reporting activities of the City and any monitors it may designate.

The City may delegate duties and responsibilities for monitoring to other environmental monitors or consultants as deemed necessary, and some monitoring responsibilities may be assumed by responsible agencies, such as the Bay Area Air Quality Management District. The City or its designee(s), however, would ensure that each person delegated any duties or responsibilities is qualified to monitor compliance.

Any mitigation measure study or plan that requires the approval of the City must allow adequate review time. Other agencies and jurisdictions may require additional review time. It is the responsibility of the Applicant to ensure that appropriate agency reviews and approvals are obtained.

The City or its designee would also ensure that any deviation from the procedures identified under the monitoring program is approved by the City. Any deviation and its correction shall be reported immediately to the City or its designee by the Applicant.

J.3 ENFORCEMENT RESPONSIBILITY

The City, as the lead agency, is responsible for enforcing the procedures adopted for monitoring.

J.4 MITIGATION COMPLIANCE RESPONSIBILITY

HC (Contra Costa), LLC as the Applicant is responsible for successfully implementing all the mitigation measures in the MMRP, and shall ensure that these requirements are met by all of its contractors and field personnel. Standards for successful mitigation are implicit in mitigation measures that include such requirements as obtaining permits or avoiding a specific impact entirely. Other mitigation measures include detailed success criteria. Additional mitigation success thresholds may be established by applicable agencies with jurisdiction through the permit process and through the review and approval of plans required for implementation of mitigation measures.

J.5 MITIGATION MONITORING AND REPORTING TABLE

The MMRP describes implementation and monitoring responsibilities, timing, implementation and reporting schedules, and implementation mechanisms or tools for each mitigation measure identified in the EIR, as described below. The table lists the following information, by column:

- **Mitigation Measure:** Provides the full text of the measure from the Final EIR.
- **Monitoring/Reporting Action:** Identifies the action to be taken by the Applicant.
- **Mitigation Timing:** Implementation of mitigation measures may occur before, during, or after construction or during operation, etc.
- **Responsible Entity:** Identifies the entities that will be responsible for directly implementing the mitigation measures, reporting, and monitoring.
- **Compliance Verification:** Identifies how compliance will be verified.

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<ul style="list-style-type: none"> • Use locally sourced or recycled materials for construction materials (goal of at least 20 percent based on costs for building materials and based on volume for roadway, parking lot, sidewalk and curb materials). Wood products used should be certified through a sustainable forestry program. • When feasible, use low-carbon concrete, and/or minimize the amount of concrete used. When feasible and if more efficient or lower emitting, produce concrete on-site instead of transporting ready-mix. Develop a plan to efficiently use water for adequate dust control since substantial amounts of energy can be consumed during the pumping of water. • Develop a plan to efficiently use water for adequate dust control since substantial amounts of energy can be consumed during the pumping of water. • Include all requirements in applicable bid documents, purchase orders, and contracts, with successful contractors demonstrating the ability to supply the compliant on- or off-road construction equipment for use prior to any ground-disturbing and construction activities. 	Construction	Implement Basic Construction Measures and BMPs	City	Verify implementation and compliance with construction measures and BMPs
<p>Mitigation Measure AQ-O2: To mitigate the potential for GHG emissions during operations, the following measures will be implemented:</p> <ul style="list-style-type: none"> • Project Feedstock Design Feature incorporating the avoidance of landfill emissions with feedstock selection. • The project will not include natural gas appliances or natural gas plumbing (in both residential and nonresidential development). • The project will not result in any wasteful, inefficient, or unnecessary energy use as determined by the analysis required under CEQA Section 21100(b)(3) and Section 15126.2(b) of the State CEQA Guidelines. 	Operations	Implement Basic Operations Measures and BMPs	City	Verify implementation and compliance with operations measures and BMPs
3.4 BIOLOGICAL RESOURCES				
<p>Mitigation Measure BIO-1a: General Work Site Best Management Practices. The following measures shall be included on all plans and employed by HC (Contra Costa), LLC and its contractors to avoid and minimize impacts to water quality and other beneficial characteristics of wetlands at the project site:</p>	Design	Include Measures on Plan	City	Verify measures included on plans

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<ul style="list-style-type: none"> • No debris, soil, silt, sand, cement, concrete or washings thereof, or other construction-related materials or wastes, oil or petroleum products, or other organic or earthen material shall be allowed to enter into or be placed where it may be washed by rainfall or runoff into marshes or open water/ditches adjacent to the work areas. • All personnel and their equipment shall be required to stay within the designated construction area to perform job-related tasks and shall not be allowed to enter wetlands, drainages and habitat of listed species. • Pets shall not be allowed in or near the construction area. • Firearms shall not be allowed in or near the construction area, except for armed HC (Contra Costa), LLC security officers who may periodically patrol work sites. No intentional killing or injury of wildlife shall be permitted. • The construction site shall be maintained in a clean condition. All trash (e.g., food scraps, cans, bottles, containers, wrappers, cigarette butts and other discarded items) shall be placed in closed containers and properly disposed off-Site. <p>After construction is completed, final cleanup shall include removal of all stakes, temporary fencing, flagging and other refuse generated by construction. Vegetation shall not be removed or disturbed in the cleanup process.</p>	During construction	Implement General Work Site Best Management Practices	City	Verify implementation and compliance
<p>Mitigation Measure BIO-1b: Spill and Accidental Discharge Prevention. The following measures shall be included on all plans and employed by HC (Contra Costa), LLC and its contractors. HC (Contra Costa), LLC and its contractors shall be responsible for structure operations in a manner that minimizes the risk of spills or the accidental discharge of fuels or hazardous materials. HC (Contra Costa), LLC and its contractors shall, at a minimum, ensure that:</p> <ul style="list-style-type: none"> • All employees handling fuels and other hazardous materials are properly trained. • All equipment is in good operating order and inspected regularly. Hazardous materials, including chemicals, fuels and lubricating oils, shall not be stored within 200 feet of a wetland or water body. This applies to storage of these materials and does not apply to normal operation or use of equipment in these areas. 	Design	Include measures on plans	City	Verify measure included on plans
	Construction	Implement Spill and Accidental Discharge Prevention Measures	City	Verify implementation of measures

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<ul style="list-style-type: none"> If refueling is needed on-site, it will occur at least 100 feet from a surface water feature, and in a designated refueling area with secondary containment/plastic sheeting and a spill containment kit. 				
<p>Mitigation Measure BIO-1c: Emergency Spill and Containment Plan. The following measures shall be included on all plans and employed by HC (Contra Costa), LLC and its contractors:</p> <ul style="list-style-type: none"> In the event of an accidental spill, the Facility Oil Spill Contingency Plan shall be implemented. Site-specific provisions shall be listed on the Safe Work Permit and included within the job plan maintained on-Site. At a minimum, the Applicant and its contractors shall: <ul style="list-style-type: none"> Ensure that each construction crew (including clean-up crews) has sufficient supplies of absorbent and barrier materials on-Site to allow the rapid containment and recovery of spilled materials, and that each construction crew knows the procedure for reporting spills. Ensure that each construction crew has sufficient tools and material on Site to stop leaks. Know the contact names and telephone numbers for all HC (Contra Costa), LLC contacts and local, state and federal agencies (including, if necessary, the U.S. Coast Guard and the National Response Center) that might need to be notified in the event of a spill. Follow the requirements of those agencies in cleaning up the spill, excavating and disposing soils or other materials contaminated by a spill, and collecting and disposing waste generated during spill cleanup. 	Design	Include measures on plans; Emergency Spill and Containment Plan	City	Verify measure included on plans. Review and approve Safe Work Permit; Review and approve Emergency Spill and Containment Plan
	Construction	Implement plan	City	Verify plan implementation and compliance
<p>Mitigation Measure BIO-1d: Stormwater Pollution Prevention Plan (SWPPP). The proposed Project shall adhere to and implement the requirements of the respective existing SWPPP for Corteva during project operations. Applicable measures for project construction shall be incorporated into the construction SWPPP plans by a qualified specialist and implemented prior to construction.</p>	Design	SWPPP	SFRWQB	Review and approve SWPPP
	Design	Include applicable measures on construction plans	City	Verify measures included on construction plans
	Construction	Implement measures	City; SFRWQB	Verify implementation and compliance

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<p>Mitigation Measure BIO-1e: Demarcation of Limits of Work. Applicant and its contractors shall clearly demarcate the limits of work in the field. All project-related activity shall be confined to the designated work areas; no entry into adjacent areas shall be allowed by project personnel. Upon project completion, material used to mark the work boundary shall be removed.</p>	Construction	Implement work restrictions	City	Verify implementation and compliance
<p>Mitigation Measure BIO-1f: Weed Spread Prevention. Applicant and its contractors shall implement measures to ensure that boots, clothing, vehicles and equipment are free of soils and plant parts prior to entering work areas.</p>	Construction	Implement work restrictions	City	Verify implementation and compliance
<p>Mitigation Measure BIO-1g: . Preconstruction Focused Soft-Bird’s Beak Surveys. Focused surveys for soft-bird’s beak shall be conducted by a qualified biologist each year during the appropriate blooming period (June 1 through September 30) prior to construction to confirm its absence. Locations of rare plants in proposed construction areas will be recorded using a GPS unit and flagged for avoidance or project proponent will consult with the appropriate agency regarding the potential to relocate the plants. When construction is occurring in the area of the flagged plants, a qualified biologist shall monitor construction activities occurring in the vicinity of the flagged plants to ensure that no direct or indirect impacts occur.</p>	Construction	Preconstruction surveys to minimize habitat disturbance	City	Verify implementation and compliance
<p>Mitigation Measure BIO-1h: Preconstruction Nesting Bird Surveys. No more than 5 days prior to construction during the nesting bird season (February 1 through September 15), a qualified biologist shall conduct a survey for nesting birds. If work within an area lapses for more than 14 days during the nesting season, the survey shall be repeated. The survey shall encompass all work areas and those areas within a buffer of 250 feet for passerines, 500 feet for small raptors, and 1,000 feet for large raptors. Where accessible, the location of active nests will be recorded using a handheld global-positioning system unit. Should an active nest be discovered, the area of the nest and an appropriate buffer area will be cordoned off during construction activities that could cause disturbance of the nest. The qualified biologist conducting the nesting surveys should prepare a report that provides details about the nesting outcome and the removal of buffers. This report should be that buffers are removed at the end of the proposed project, at which time the biologist will confirm that the nests were not disturbed.</p>	Construction	Preconstruction surveys in designated work areas	City	Verify implementation of measure

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<p>Measure BIO-1i: California Ridgway’s Rail and California Black Rail Surveys. Prior to construction occurring during the rail nesting season (February 1 through August 31) within 700 feet of suitable rail habitat, surveys shall be conducted for California Ridgway’s rail and California black rail in accordance with the USFWS Survey protocol for California Ridgway’s rail. Surveys should be initiated between January 15 and February 1. For each survey station, four surveys are to be conducted. Surveys should be spaced at least two weeks apart and should cover the time period from the date of the first survey through the end of March or mid-April. If California Ridgway’s or California black rails are detected during the survey, no work within 700 feet of the rail calling centers (identified via compass bearing and distance estimate during surveys) shall occur between February 1 and August 31, unless otherwise approved by USFWS and CDFW.</p>	Construction	Preconstruction surveys in designated work areas	City	Verify implementation of measure
3.5 CULTURAL AND TRIBAL RESOURCES				
<p>Mitigation Measure CR-C1a: Prepare and Implement an Inadvertent Discovery Plan. The following measures shall be included on all plans and employed by HC (Contra Costa), LLC (Applicant) and its contractors to avoid and minimize impacts to historical and archaeological resources at the project site:</p> <ul style="list-style-type: none"> • A plan for the inadvertent discovery of historic or cultural resources, or human remains will be prepared. If unanticipated cultural resources (historic or prehistoric artifacts, concentrations of shell, burnt or unburnt bone, stone features, etc.) are uncovered during grading or excavation activities, work immediately within 50 feet of the discovery of the find shall be halted, the City of Pittsburg Planning Division shall be notified, and a professional archaeologist that meets the Secretary of the Interior’s Standards and Guidelines for Professional Qualifications in archaeology and/or history shall be retained to determine the significance of the discovery. A mitigation plan shall include such measures as avoidance, preservation in place, excavation, documentation, curation, data recovery, or other appropriate measures. The City shall consider mitigation recommendations presented in the mitigation plan. The Applicant shall be required to implement any mitigation necessary for the protection of cultural resources before ground-disturbing activities may resume. 	Prior to any ground disturbance and throughout construction	Upon find of prehistoric or historic-period archaeological resources	City; Tribal representative, if required; CSLC Staff Attorney	Confirm suspension of work upon find and resource determination; Approve avoidance or other applicable measures.

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
<p>Mitigation Measure CR-C1b: Provide Preconstruction Worker Awareness Training. The following measure shall be included on all plans and employed by the Applicant and its contractors to avoid and minimize impacts to historical and archaeological resources at the project site:</p> <ul style="list-style-type: none"> As part of construction personnel training, the City of Pittsburg shall ensure that all construction personnel receive training that includes: 1) information on the possibility of encountering human or animal remains during construction; 2) the types of cultural resources are likely to be seen; and 3) proper procedures in the event of any inadvertent discovery. Worker training shall be prepared and presented by a qualified archaeologist 	Prior to any ground disturbance and throughout construction	Construction worker awareness training on inadvertent discovery	City; Tribal representative, if required; CSLC Staff Attorney	Confirm suspension of work upon find and resource determination; Approve avoidance or other applicable measures.
<p>Mitigation Measure CR-C2: Excavation/Grading Halt upon Human Burial or Bone Discovery. The following measures shall be included on all plans and employed by Applicant and its contractors to avoid and minimize impacts to historical and archaeological resources at the project site:</p> <p>In the event of the discovery of a burial, human bone, or suspected human bone: 1) all excavation and grading in the vicinity of the find shall be halted immediately; 2) the area of the find shall be cordoned off; and 3) the Applicant shall immediately notify the Contra Costa County Coroner of the find and comply with provisions of PRC § 5097 with respect to Native American involvement, burial treatment, and re-burial, if necessary. If the coroner’s office determines that the remains are Native American and not under its purview, it shall contact the Native American Heritage Commission as mandated by PRC § 5097.</p>	Construction	Designate work areas	City	Verify implementation of measure
3.6 ENERGY				
<p>Mitigation Measure ENG-C1a: Provide incentives for construction workers to use electric vehicles, transit, bicycles, or carpool. As examples, construction workers could be provided preferential parking, stipends, and assistance to take advantage of the numerous federal and state electric vehicle incentives. Bicyclists can be provided electric bike subsidies through California’s CalBike Program. Carpoolers can be provided reward programs (such as prize drawings), and employees can be encouraged to form carpools through rideshare matching and through other assistance.</p>	Construction	Provide evidence of compliance	City	Verify implementation of mitigation measure

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
Mitigation Measure ENG-C1b: Provide incentives for zero emission delivery trucks to use the facility. Since California requires 100 percent zero emission truck sales beginning in 2036, most major truck manufacturers already have such vehicles on the market today. Incentives could involve preferences in vendor selection, preferred scheduling, free or low-cost recharging on site, and purchase incentives.	Construction	Provide evidence of compliance	City	Verify implementation of mitigation measure
Mitigation Measure ENG-C1c: Provide incentives for the construction contractor to use electric powered equipment on site.	Construction	Provide evidence of compliance	City	Verify implementation of mitigation measure
Mitigation Measure ENG-C1d: Provide incentives for the construction contractor to minimize and reuse waste generated on site.	Construction	Provide evidence of compliance	City	Verify implementation of mitigation measure
Mitigation Measure ENG-O1a: Require the Applicant to install EV charging stations.	Design	Include on construction plans	City	Verify included on construction plans
Mitigation Measure ENG-O1b: Require 10 percent of on-road commercial trucks entering the facility to be zero emission by 2030 and 100 percent to be zero emission by 2045.	Operations	Implement BMPs	City	Verify implementation of mitigation measure
Mitigation Measure ENG-O1c: Require all buildings to comply with the adopted California Green Building Standards Code.	Operations	Implement BMPs	City	Verify implementation of mitigation measure
Mitigation Measure ENG-O1d: Require the Applicant to prioritize parking for zero emission vehicles.	Operations	Implement BMPs	City	Verify implementation of mitigation measure
Mitigation Measure ENG-O1e: Provide incentives for facility workers and visitors to use electric vehicles, bicycles, or transit, or to walk or carpool to the site.	Operations	Implement BMPs	City	Verify implementation of mitigation measure
Mitigation Measure ENG-O1f: Require the Applicant to participate in one or more of the numerous zero emission truck purchase programs if funding is available. For example, CARB provides funding assistance, planning resources, and other support to entities such as the Applicant to purchase zero-emission vehicles.	Operations	Implement BMPs	City	Verify implementation of mitigation measure

Table J-1: H Cycle Renewable Hydrogen Program Mitigation Monitoring and Reporting Program

MITIGATION MEASURE	TIMING	MONITORING/ REPORTING ACTION	RESPONSIBLE ENTITY	COMPLIANCE VERIFICATION
Mitigation Measure ENG-O1g: Require 25 percent of all on-site forklifts, yard trucks, and company vehicles other than off-road equipment to be zero emission by 2030 and 100 percent to be zero emission by 2045.	Operations	Implement BMPs	City	Verify implementation of mitigation measure
3.7 GEOLOGY AND SOILS				
Mitigation Measure GEO-1: Compliance with California Building Code requirements	Prior to issuance of permit to construct	Provide evidence of compliance	City	Verify implementation of mitigation measure
