Project Title: LandSmart Grazing Program for Community Resilience at Site ZG

Project Applicant: Gold Ridge Resource Conservation District

Project Location: 2155 Bohemian Highway

Project Location – City: Occidental Project Location – County: Sonoma

Description of the Nature, Purpose and Beneficiaries of Project: The proposed project will utilize contracted prescribed herbivory crews to reduce vegetation fuels on the Site ZG property. The Project site includes a total of approximately five (5) acres of mixed conifer and hardwood forest landscape.

A mixture of prescribed herbivory and adaptive management will be employed in the project area. The removal of this woody vegetation is necessary to improve overall health and vigor of the project area. Shrubs and vines are that are considered invasive, or undesirable will be removed. Target nonnative shrubs shall be cut flush with the ground surface, resulting in a stump that is no more than two inches in height. No grubbing of root systems or any other type of soil disturbance shall occur as part of these activities. Miscellaneous debris can be left on the ground as long as it does not impact the growth of native vegetation and/or does not impact land management. Grazer is encouraged to employ adaptive management via monitoring of the project area.

- Prescribed herbivory (also known as "targeted grazing" [ASI 2006, Macon 2019]) is
 the use of domestic livestock to accomplish specific and measurable vegetation
 management objectives. Those would include things like removing biomass (fine
 fuel loads), reducing populations of specific plant species, slowing the reestablishment of shrubs on burned or mechanically thinned sites, and improving
 plant community structure for wildlife habitat values.
- Hand work is defined as the physical act of felling and removing targeted trees, by hand and on foot only, i.e., without the aid of any type of vehicle.
- Adaptive management means effectiveness or validation monitoring after application of a treatment performed to the extent feasible, recognizing fiscal constraints, the need for ongoing access to property, and staff availability.

Prepared For: Gold Ridge Resource Conservation District, Prepared on: 4/2/2023
