## ATTACHMENT TO NOTICE OF EXEMPTION

### Recreational Trap Prohibition and Depth Constraint for the California Dungeness Crab Commercial Fishery and Continuation of the Statewide Fleet Advisory

The California Department of Fish and Wildlife (Department) has taken final action under the Fish and Game Code and Title 14 of the California Code of Regulations with respect to the above-referenced project. On May 2, 2023, the Director of the Department signed a declaration implementing a Recreational Crab Trap Prohibition south of the Sonoma/Mendocino County line and a Depth Constraint in the California commercial Dungeness crab fishery between the Sonoma/Mendocino County line and the California/Oregon border, as well as continuing a statewide Fleet Advisory.

For the purposes of the California Environmental Quality Act (CEQA, Pub. Resources Code, Section 21000 et seq.), the Department approved the project relying on the Class 7 categorical exemption for "Actions by Regulatory Agencies for Protection of Natural Resources" and the Class 8 categorical exemption for "Actions by Regulatory Agencies for Protection of the Environment" contained in CEQA Guideline Sections 15307 and 15308, Title 14, CCR, respectively.

#### Categorical Exemptions to Protect Natural Resources and the Environment

In compliance with CEQA, the Department approved the project relying on the categorical exemptions contained in CEQA Guidelines of Title 14, CCR: Section 15307 (Action by Regulatory Agencies for Protection of Natural Resources) and Section 15308 (Action by Regulatory Agencies for Protection of the Environment). The exemptions apply to agency actions to protect natural resources and the environment, respectively.

The proposed project will prohibit the use of traps for recreational fishery, reduce the areas fished by the commercial Dungeness crab fishery, and continue a Fleet Advisory in response to marine life entanglement risk. Lines and buoys of Dungeness crab traps pose a marine life entanglement risk, especially for whales and sea turtles migrating through California waters. These management actions will have the overall effect of reducing the entanglement risk by decreasing the number of traps being set in areas of the marine environment where whales and sea turtles are present and is therefore the proper subject of CEQA's Class 7 and 8 categorical exemptions.
