## PHASE I ESA REPORT SIGNATURE PAGE

**REPORT TITLE:** Phase I Environmental Site Assessment, 2501 Park Boulevard, Palo Alto, California

**EKI PROJECT NUMBER:** EKI C00083.00

**REPORT DATE:** 9 September 2020

**USER OF REPORT:** Smith Development Group

### **ENVIRONMENTAL PROFESSIONAL STATEMENTS:**

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Section 312.10.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

### **SIGNATURES:**

Paul B. Hoeffy  
Project Manager

Jessica Daugherty, P.G.  
Project Geologist

### **KEY PHASE I TASK DATES:**

Date of Environmental Database Report:	17 August 2020
Date Environmental Lien Search was Performed:	25 August 2020
Date Site Reconnaissance was Performed:	28 August 2020
Date Interviews were Performed/Questionnaire:	20 August 2020
Date On-line Regulatory Databases were Searched:	20 August 2020
Date Agency File Reviews were Performed:	(no files provided by agencies)

# PHASE I ENVIRONMENTAL SITE ASSESSMENT

2501 Park Boulevard, Palo Alto, California

## EXECUTIVE SUMMARY

EKI Environment & Water, Inc. ("EKI") is pleased to present to Smith Development Group ("Client") this report that presents the findings of a Phase I Environmental Site Assessment ("ESA") performed for the property located at 2501 Park Boulevard in Palo Alto, California (the "Subject Property"; see Figure 1). The Subject Property is approximately 0.12 acres in size with the Assessor's Parcel Number (APN) of 124-29-012. A previous street address for the subject property may have been 195 Sherman Avenue. EKI understands Client is interested in potentially acquiring the subject property for eventual redevelopment into commercial uses.

This Phase I ESA was performed by EKI in general conformance with the scope and limitations of ASTM International ("ASTM") *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, Designation: E1527-13, and the requirements issued by the U.S. Environmental Protection Agency ("US EPA") in 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiries, Final Rule*, dated 1 November 2005 ("Final EPA AAI Rule"). The ASTM E1527-13 standard and the Final EPA AAI Rule similarly prescribe accepted reasonable efforts to identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, e.g., Recognized Environmental Conditions ("RECs").

### Findings and Opinions of Phase I ESA

ASTM E1527-13 defines a REC as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment". The following REC was identified associated with the Subject Property:

- The Subject Property is located within the California-Olive-Emerson ("COE") regional groundwater contamination Study Area (an area of Palo Alto where shallow groundwater is impacted by historical solvent releases from the former Varian and Hewlett-Packard ("HP") facilities). Shallow groundwater on the Subject Property may contain residual-level concentrations of tetrachloroethylene ("PCE"), as well as trichloroethylene ("TCE"), associated with the COE regional contaminant plume. In June 2019, sampling from a shallow groundwater well located approximately 80 feet west of the Subject Property and potentially upgradient (COE well F66A) by HP/Varian (see Figure 2) was reported to be non-detect for PCE and TCE. A shallow groundwater well located approximately 500 feet east (downgradient) of the Subject Property (well SH1), also sampled in June 2019, did not contain PCE, but contained TCE at 31 micrograms per liter ("ug/L"). Based on these results, shallow groundwater on the Subject Property may contain low concentrations of PCE and TCE associated with the COE regional VOC plume. The concentrations of PCE and TCE in shallow groundwater at the Subject Property, if any, would be expected to be low, and would not be expected to result in potentially significant vapor intrusion concerns to the Subject Property. The likely presence of VOCs in shallow groundwater on the Subject Property, and the location of the Subject Property within the COE Study Area, represent a REC for the Subject Property.

No other RECs were identified for the Subject Property.

This Executive Summary does not contain all of the information, including observations, findings, and opinions, presented in the main body of this report. This report should be read in its entirety to obtain a more complete understanding of the information and issues identified regarding the Subject Property and to aid in the evaluation of risks, decision-making, and/or actions taken by Client based on this information.

## 1 INTRODUCTION

EKI is pleased to present to Smith Development Group ("Client") this report that presents the findings of a Phase I ESA performed for the property located at 2501 Park Boulevard in Palo Alto, California (the "Subject Property"; see Figure 1). The Subject Property is approximately 0.12 acres in size with the Assessor's Parcel Number (APN) of 124-29-012. A previous street address for the subject property may have been 195 Sherman Avenue. The Subject Property is currently occupied by a two-story office building partially situated above at-grade parking. EKl understands Client is interested in potentially acquiring the Subject Property for eventual redevelopment into commercial uses.

EKI's services were performed in accordance with EKl's Proposal with Client, dated 17 August 2020.

### 1.1 Reliance on Report

This report is for the sole benefit, use, and reliance of Smith Development Group regarding the Subject Property. Unless specifically authorized in writing in an agreement acceptable to EKl in its sole discretion, reliance on this report by any other entity is not permitted or authorized. Reliance on the information contained in this report by any third party without authorization by EKl does not make such entity a third-party beneficiary of EKl's work product. Any such unauthorized reliance on, modification of, or use of this report, including any of its information or conclusions, will be at such third party's sole risk. The "User" of this report, as defined by ASTM E1527-13 and as accepted under the Final U.S. EPA AAI Rule, is Smith Development Group.

### 1.2 Phase I ESA Tasks Performed

The purpose for this Phase I ESA is to identify RECs associated with the Subject Property as defined in ASTM E1527-13. EKl performed the following tasks as part of this Phase I ESA:

- Reviewed available historical land use information for the Subject Property and surrounding area, e.g., historical aerial photographs and Sanborn Fire Insurance maps, provided by Environmental Data Resources, Inc. ("EDR") (see Appendix A);
- Obtained a completed Environmental Questionnaire from the Owner and reviewed the responses to the Questionnaire (see Owner Questionnaire in Appendix C);
- Obtained specialized knowledge of the Subject Property provided by Smith Development Group, the User of this Phase I ESA report and prospective purchaser of the Subject Property, in the form of responses to a User Questionnaire (see Appendix C);
- Purchased and reviewed an Environmental Lien Search report for the Subject Property, prepared by EDR, dated 25 August 2020 (see Appendix C);

- Obtained from Owner a *Risk Assessment Report* (H&L, 2010) for the Subject Property and reviewed the report (see report in Appendix D);
- Purchased and reviewed an environmental regulatory agency database report for the Subject Property and surrounding area prepared by EDR, dated 17 August 2020 (referred to as an EDR Radius Map Report; see Appendix E);
- Requested publicly-available records for the Subject Property from the California Regional Water Quality Control Board (“RWQCB”), California Department of Toxic Substances Control (“DTSC”), Santa Clara County Department of Environmental Health (“SCCDEH”), City of Palo Alto Fire Department Hazardous Materials Division (“PAFD”), and Bay Area Air Quality Management District (“BAAQMD”). No files were provided to EKI at the time of this Phase I ESA report.
- Searched for environmental reports for the Subject Property and nearby upgradient reported chemical release sites, including the COE regional groundwater contamination Study Area on the California WRCB Geotracker and California EPA DTSC EnviroStor database websites, and reviewed available files for selected nearby properties, e.g., 2555 Park Boulevard; and
- Performed a site reconnaissance, i.e., walk-through visual survey, of the Subject Property on 28 August 2020 to observe the current site setting (see photographs in Appendix B), and interviewed a representative of the current owner of the Subject Property (“Owner”).

The Phase I ESA by EKI did not include “non-scope considerations” as defined in ASTM Section 13.1.5, such as cultural or historic resources, ecological resources, endangered species, wetlands, drinking water quality, radon, indoor air quality, asbestos (“ACM”), lead paint (“LBP”), PCBs in building materials and equipment, and mold. Given the age of construction of the Subject Property building (around 1982), ACM and LBP may be present in or on site structures. EKI was not provided any ACM or LBP reports by Client or Owner.

The findings of the Phase I ESA presented herein are our professional opinion and are not a warranty or guaranty as to the presence, absence, or extent of contamination at the Subject Property or of releases from or near the Subject Property. The facts presented herein are based on available information obtained by EKI and represent existing conditions at the Subject Property at the time the information was collected.

## 2 GENERAL SITE CHARACTERISTICS

### 2.1 Site Location, Description and Current Uses

The current street address for the Subject Property is 2501 Park Boulevard, Palo Alto, California. The property is located at the northeast corner of the intersection of Park Boulevard and Sherman Avenue (assumes Sherman Avenue trends north-south) (see Figure 1). A prior street address for the Subject Property may have been 195 Sherman Avenue, according to historical maps. The Subject Property is approximately 0.12 acres in size with the APN of 124-29-012. The Subject Property is currently occupied by a two-story office building constructed partially above at-grade parking. EKI understands Client is interested in potentially acquiring the Subject Property for eventual redevelopment into commercial uses.

The current legal owner of the Subject Property is Park Blvd. Investment, LLC, by Peter & Laura Brewer Trust (“Owner”).

### 2.2 Adjoining Properties

The Subject Property is bounded to the north by a single family residence (123 Sherman Avenue); to the east by a recently-constructed office building with sub-grade parking (2555 Park Boulevard); to the south by Park Boulevard and a paved parking lot south of Park Boulevard; and to the west by Sherman Avenue and a medical/general office building beyond Sherman Avenue (122 Sherman Avenue and 2441 Park Boulevard) (see Figure 2). The Subject Property is located in a mixed use commercial, office, and multi-family residential area of Palo Alto.

As discussed further below, the 2555 Park Boulevard property to the adjoining east (see Figure 2) is a recently-constructed office building over sub-grade parking, and is the site of a former dry cleaner with reported chemical releases (e.g., PCE, naphthalene, and Stoddard Solvent) to the subsurface. The 2555 Park Boulevard site is a current solvent contaminant investigation site with oversight provided by the California Regional Water Quality Control Board, San Francisco Bay Region (“Water Board”). The 2555 Park property is discussed later in this report.

### 2.3 Subsurface Setting

The following sections provide information on regional physiography, geologic conditions, and shallow groundwater characteristics at the Subject Property and vicinity. The information was obtained mainly from a subsurface investigation report (Stellar, 2018) prepared for the adjoining 2555 Park property.

#### 2.3.1 Regional Physiography and Geologic Conditions

The Subject Property lies at a surface elevation of approximately 23 feet above mean sea level. The ground surface of the Subject Property and vicinity is relatively flat, with a very slight downward regional slope to the east-northeast.

The Subject Property is situated on alluvial sediments of the Santa Clara Valley – a northwest-southeast trending elongated structural trough. The area is underlain with material mapped as “Qpa,” designated Late Pleistocene alluvium that is weakly consolidated, slightly weathered, poorly sorted, irregularly interbedded clay, silt, sand, and gravel (Stellar, 2018). Channel and over bank deposits are generally oriented along the direction of regional flow to the north by northeast.

Based on soil boreholes advanced by Stellar Environmental on Grant Avenue opposite the 2555 Park Boulevard property, shallow subsurface geology consists of clayey silts that extend to approximately 12 feet below ground surface (“bgs”). Underlying the silts are moderately plastic silty clays that extend to approximately 17 feet bgs. Below 17 feet are sands to silty gravels that extend to the full depth explored by Stellar of 30 feet bgs (Stellar, 2018).

### 2.3.2 Shallow Groundwater Characteristics

Depth to shallow groundwater at the Subject Property is not known, however, based on measurements made in June 2019 from COE Study Area shallow monitoring wells located near the Subject Property (Stantec, 2019), the depth to groundwater was reported at 18 to 20 feet bgs. The groundwater gradient is reported to be relatively flat, with a flow direction generally to the east-northeast toward a shallow groundwater dewatering station at the Oregon Expressway-Page Mill Road underpass pumping station located approximately 800 feet to the east-northeast. The pumping station discharges into Matadero Creek which ultimately discharges to San Francisco Bay (Stellar, 2018). As discussed further below, the Subject Property is located within the COE groundwater contamination plume Study Area, with reported PCE and TCE impacts to groundwater.

### 3 HISTORICAL USES OF SUBJECT PROPERTY AND VICINITY

Information on historical uses of the Subject Property and vicinity was obtained primarily from review of the following sources:

- Historical aerial photographs provided by EDR for selected years between 1939 and 2016;
- Sanborn Fire Insurance maps for selected years between 1888 and 1978;
- Historical United States Geological Survey (“USGS”) topographic maps provided by EDR for selected years between 1897 and 2012; and
- Historical City Directory information for selected years between 1955 and 2014 provided by EDR (see historical information in Appendix A).

Time Period	Land Use Description
1888-1925	On the Sanborn maps, the Subject Property is depicted as vacant. Adjoining and nearby properties are depicted in residential use. Park Boulevard and Sherman Avenue are noted on the maps. The Southern Pacific Railroad tracks are depicted north of the Subject Property. A “public school” is depicted one block south of the Subject Property.
1945	On the 1945 Sanborn map, the Subject Property is depicted as vacant. The adjoining property to the east (2555 Park Boulevard) is labeled “Cleaning Rm”. Properties to the north, northwest, and south are vacant.
1950, 1956-1978	On the 1956, 1969, and 1978 Sanborn maps, a small building is noted on the Subject Property nearest Sherman Avenue. The building is labeled “Off.” (office). The Subject Property has the street address of 195 Sherman Avenue. On historical aerial photographs during this time period, the site building is noted; the remainder of the property (east of the site building) appears to be vacant and vegetated. The adjoining 123 Sherman property is occupied by a small storage building. The adjoining present-day 2555 Park Boulevard property is labeled “Dry Clean’g” on the 1956 Sanborn map, but appears to be redeveloped with an office building and surface paved parking on the 1969 Sanborn map. On the 1969 map, a “storage building” has been added to the Subject Property, along the property boundary with 123 Sherman Avenue. A “North Santa Clara County Office Building” is constructed south of the Subject Property across Park Boulevard on the 1969 Sanborn map. On the 1978 Sanborn map, there are no changes to the Subject Property or adjoining properties. The Subject Property maintains the street address of 195 Sherman Avenue. Truck parking is depicted north of the 123 Sherman property.
1982	On the 1982 aerial photograph, it appears the present-day site building is noted on the subject property, although the photograph is poor quality. Adjoining land uses remain relatively unchanged. Residential apartment complexes appear to be under construction farther north and northwest of the Site.
1991 to Present-day	On the 1991 aerial photograph, the present-day office building on the Subject Property is clearly noted. Adjoining land uses remain relatively unchanged. The

	adjoining 2555 Park Boulevard property appears to have been redeveloped into its present-day office building in 2018.
--	---

### 3.1 Review of Historical City Directory Report

According to the EDR Historical City Directory Report, the Subject Property at 2501 Park Boulevard was occupied by the following users in the past:

2014

Law offices

2010

Law offices, medical offices, investment offices, general offices

2001

Law offices

1991

Law offices, general offices

1986

Law offices, general offices

1955-1978

Vacant

#### 4 RESULTS OF WALK-THROUGH VISUAL SURVEY

On 28 August 2020, Ms. Jessica Daugherty with EKI conducted a visual reconnaissance of the Subject Property. Ms. Daugherty is an Environmental Professional as defined in 40 CFR Section 312.10, and as accepted by ASTM 1527-13 (see professional resume in Appendix G). EKI was accompanied on the site visit by Boyd Smith with Smith Development (Client), and Ms. Jessica Urioste, the Office Manager for Brewer, Offord & Pedersen, LLP (representative of current Owner). Key observations of the Subject Property and adjoining areas are discussed below. Selected photographs taken during the walk-through of the Subject Property are presented in Appendix B of this report. Additional site walk-through observations are noted below and follow the summary table.

At the time of the site visit, the Subject Property was occupied by a two-story office building occupied by legal and general offices. The building was partially situated above at-grade parking. The surface-paved parking lot extended to the east property line.

Site Reconnaissance Observations		
Interior and Exterior	Hazardous Substances and Petroleum Products <u>in connection</u> with identified uses	None observed.
	Storage Tanks	None observed.
	Unusual Odors (strong, noxious, or pungent)	None noted.
	Pools of Liquids	None observed.
	Drums (conditions, leaks, staining)	None observed.
	Sumps, clarifiers	None observed.
	Hazardous Substances and Petroleum Product Containers not in Connection with Identified Uses	Several 1-gallon and one 5-gallon containers of latex paints were observed on the Subject Property in a closet.
	Unidentified Substance Containers	None observed.
	Hydraulic equipment (elevators, lifts)	None visible.
	Polychlorinated Biphenyls	None noted.

	Transformers (pad-mounted or pole)	None observed.
Interior	Heating/Cooling	Ms. Urioste indicated that there were 5 electrical units within the building used for the heating and cooling system.
	Stains or Corrosion	None observed.
	Drains or sumps	None noted.
	Ventilation of Sub-Grade Parking Levels (if any)	Not applicable.
	Other Key Observations	None.
Exterior	Pits, Ponds, or Lagoons associated with Waste Disposal	None observed.
	Stained Soil or Pavement	None observed.
	Stressed Vegetation	None observed.
	Obvious Fill Areas or Debris Dumping	None observed.
	Solid Waste	Domestic refuse maintained in gated area adjacent to parking lot.
	Aboveground Storage Tanks	None observed.
	Underground Storage Tanks	No observed visual surface evidence of underground storage tanks.
	Wastewater (Industrial/Domestic)	None.
	Wells (Water Supply or Monitoring)	No wells were observed.
	Septic/Leach Field Systems. Cesspools	No surface indications noted.
	Storm Water Drainage (Municipal, dry wells)	One stormwater drain inlet located in the parking lot. Other water may infiltrate into vegetated area adjacent to parking lot and sidewalk along Park Boulevard.
	Other Key Observations	None.
Adjoining Areas	Manufacturing, industrial, or bulk chemical storage or distribution?	None observed.

Chemical use, storage or disposal?	None observed or noted from readily accessible vantage points.
Groundwater monitoring wells, grouted boreholes or other indicators of past investigations/remedial actions?	Two grouted boreholes observed in the parking lot located across the intersection of Sherman Avenue and Park Boulevard, to the southwest. May correspond to former COE shallow groundwater monitoring well F66A (see Figure 2).
Observed current or indications of past gasoline service stations, dry cleaners, machine shops, or auto repair facilities?	Former dry cleaner located at 2555 Park Boulevard (current office building; see discussion in Section 6.3.2). No current gas stations, dry cleaners, auto repair noted adjacent to or near Subject Property.

The following are specific key observations made by EKI during the site reconnaissance:

- The Subject Property consists of a two-story office building and associated parking lot.
- The Subject Property was fully occupied by office uses at the time of the site walk-through.
- Floor coverings on both the first and second floor consisted primarily of carpet, with floor tiles in bathrooms and a copy room.
- No obvious visual indicators of chemical spills or releases or surface staining were noted.
- Ms. Urioste indicated that interior remodeling was conducted in the building in approximately 2011.
- Chemicals observed at the Subject Property primarily consisted of general cleaning products (Clorox, Lysol, 409, Nature’s Miracle) and used paint containers (mostly 1-gallon and one 5-gallon container). No significant chemical use or storage was noted.

#### 4.1 Surrounding Areas

The Subject Property is bounded to the north by a single family residence (123 Sherman Avenue); to the east by the 2555 Park Boulevard office building; to the south by Park Boulevard and a paved parking lot south of Park Boulevard; and to the west by Sherman Avenue and a medical/general office building beyond Sherman Avenue (122 Sherman Avenue and 2441 Park Boulevard) (see Figure 2). The Subject Property is located in a mixed use commercial, office, and multi-family residential area of Palo Alto. No obvious visual indications of significant chemical use or storage were noted on surrounding properties.

## 5 OWNER PROVIDED INFORMATION, QUESTIONNAIRES, AND ENVIRONMENTAL LIEN SEARCH

### 5.1 Review of Environmental Risk Assessment Report (H&L, 2010)

Owner provided to EKI through Client, the following report, a copy of which is included in Appendix D.

*Records Search with Risk Assessment Report, 2501 Park Boulevard, Palo Alto, California, APN 124-29-01, prepared by Harris & Lee Environmental Sciences, LLC (“H&L”), dated 27 October 2010.*

A summary of the information in the H&L (2010) report is presented below.

- H&L conducted a historical land use review and regulatory agency records search of the Subject Property. No site visit or Owner interview was performed. The H&L report is not a Phase I ESA performed under ASTM E1527-13.
- The Subject Property is not listed on any chemical use or chemical release databases.
- H&L indicates that the first development on the Subject Property was a large office building constructed in 1969 (actual construction of the present-day office building was around 1982). The property is reported to be undeveloped from 1945 to 1986, and was in residential use prior to 1945.
- The H&L report indicates that the Subject Property is located within the Hewlett-Packard (“HP”) regional groundwater plume area, and that groundwater beneath the property could be impacted by chlorinated solvents associated with the HP regional plume; although a review of groundwater monitoring well information near the Subject Property by H&L indicates that the property may not be impacted by the HP plume. The HP plume is discussed further below.
- H&L concludes that historical site uses are not likely to have contributed to the regional groundwater contamination.
- H&L further concludes that there is a “low risk” for contamination at the Subject Property, and indicates that “no further environmental investigation is warranted”.

### 5.2 Results of Owner Questionnaire

Mr. Peter Brewer, a representative of the Owner of the Subject Property, completed an Environmental Questionnaire for the property, dated 19 August 2020, a summary of the responses for which is presented below. A copy of the completed questionnaire is included in Appendix C.

- Owner is not aware of past uses of the Subject Property, and indicated the present-day office building was constructed around 1982.
- No chemicals are used on the property, other than photocopier toner and ink.
- Owner is not aware of any past or current underground or above ground fuel or chemical storage tanks on the property.
- No known water supply or groundwater monitoring wells are located on the Subject Property.

- Owner is unsure about the presence or absence of asbestos or lead paint on the Subject Property. No surveys have been performed, according to Owner.
- Owner indicated an Environmental Assessment of the property was performed in 2010. This report (H&L, 2010) was provided to EKI and was discussed above.
- Owner is not aware of any soil or groundwater contamination on the property, and is not aware of any investigations or remediation on the Subject Property.
- No environmental liens are filed or recorded against the Subject Property, according to Owner.

### 5.3 Results of User Questionnaire

Ms. Jenn Bodine with Smith Development Group, the User of this Phase I ESA report, completed a User questionnaire for the Subject Property, dated 17 August 2020, a copy of which is included in Appendix C. The questionnaire is consistent with the User Questionnaire suggested in Appendix X3 of ASTM E1527-13. A summary of the responses by Ms. Bodine to the questionnaire is presented below.

#### *Environmental Liens and Activity/Land Use Limitations*

According to Ms. Bodine, she is not aware of environmental cleanup liens or activity and land use limitations (e.g., institutional or engineering controls) filed or recorded against the Subject Property. This statement is consistent with the EDR Lien Search report for the Subject Property (see below).

#### *Specialized Knowledge or Experience*

Ms. Bodine indicated that she has no specialized knowledge or experience related to chemicals or chemical processes used at the Subject Property.

#### *Commonly Known or Reasonably Ascertainable Information*

Ms. Bodine indicated that she is not aware of past uses of the Subject Property, other than office and residential. Ms. Bodine is not aware of any chemical spills or releases on the Subject Property, or aware of any past cleanups on the property.

### 5.4 Review of Environmental Lien Search

EKI purchased from EDR an Environmental Lien Search report for the Subject Property (APN 124-29-012). A copy of the EDR Lien Search report, dated 25 August 2020, is included in Appendix C of this Phase I ESA report. According to the Environmental Lien Search report, no environmental cleanup liens or activity or use limitations (“AULs”) are filed or recorded against the Subject Property.

## 6 RESULTS OF REGULATORY AGENCY FILE SEARCH AND REVIEWS

To identify conditions indicative of releases and threatened releases of hazardous substances on, at, in, or to the Subject Property, i.e., known or potential contamination of soil or groundwater, or reported chemical use, EKI contracted with EDR to perform a search of available, selected federal, state, and local environmental regulatory agency databases. EDR performed a search for the Subject Property and properties located within certain radii of the Subject Property, in accordance with ASTM E1527-13. A copy of the resulting “radius map report” provided by EDR (“EDR report”), dated 17 August 2020, is provided in Appendix D. Refer to the EDR report (pages GR-1 through GR-51) for a complete list of the federal, state, and tribal databases searched.

### 6.1 Results of EDR Database Search for Subject Property

According to the EDR report, the Subject Property is not listed on any chemical use, chemical release, or investigation or remediation databases.

### 6.2 Off-Site, Nearby and Upgradient Properties with Reported Chemical Releases

As discussed in Section 2, above, shallow groundwater at the Subject Property likely flows to the east-northeast, or generally towards the Oregon Expressway underpass groundwater dewatering system. According to the EDR report, there are no reported chemical release sites located potentially upgradient and within approximately one-eighth of a mile from the Subject Property. The adjoining property to the east, e.g., downgradient of the Subject Property, the 2555 Park Boulevard property, is listed as an “open and active” solvent investigation and remediation case, and is discussed further below.

The Subject Property is located within the California-Olive-Emerson (“COE”) Study Area. The COE Study Area is an area where regional shallow groundwater is impacted by volatile organic compounds (“VOCs”) released at several properties (e.g., former Varian and HP sites) located southwest of the Subject Property (see discussion below).

### 6.3 Search of On-Line Regulatory Agency Databases

EKI searched the State of California WRCB on-line Geotracker database and the California EPA Department of Toxic Substances Control (“DTSC”) on-line EnviroStor database for the Subject Property and vicinity. The Subject Property is not listed in Geotracker or EnviroStor as a chemical release, investigation, or remediation site.

Several sites were identified on Geotracker, as well as in the EDR report, that have potential relevance to the Subject Property, and are discussed below.

### 6.3.1 COE Study Area Groundwater Plume

The Subject Property is located within the COE Study Area. The COE Study Area is a region-wide area of Palo Alto where shallow groundwater is impacted by VOCs, primarily TCE and PCE, released at several properties, including the former HP and Varian Medical facilities located at 395 and 640 Page Mill Road and 601 California Avenue. The groundwater contamination is currently being investigated and remediated by the responsible parties under a Site Cleanup Requirements Order (Order 94-130, dated 21 September 1994), issued by the California Regional Water Quality Control Board (“RWQCB”).

Several groundwater monitoring wells are located near the Subject Property and are sampled on a periodic basis by the COE Study Area responsible parties. The depth to groundwater in the vicinity of the Subject Property is reported at around 18 to 20 feet bgs. The nearest COE Study Area shallow groundwater monitoring well (labeled F66A), located in the parking lot at the corner of Park Boulevard and Sherman Avenue, directly across the intersection from the Subject Property (see Figure 2), was reported in June 2019 not to contain measurable concentrations of PCE or TCE. Well F66A is located approximately 80 feet and directly upgradient of the Subject Property. It should be noted that during the August 2020 site walk by EKI, well F66A appeared to have been recently abandoned/removed, as noted by asphalt patch in the area of the well, and that no surface housing to the well was observed.

The next closest COE Study Area shallow groundwater monitoring well to the Subject Property that is sampled on a regular basis is well SH1, located approximately 500 feet to the east, or downgradient, of the Subject Property. In June 2019, shallow groundwater sampled from this well was reported not to contain measurable concentrations of PCE; and TCE was measured at a concentration of 31 micrograms per liter (“ug/L”).

Based on these data, shallow groundwater beneath the Subject Property may be impacted by low concentrations of PCE and TCE. Given that the Subject Property is not currently considered to be a responsible party for the COE Study Area VOC plume in groundwater, e.g., not a suspected source site, it is not likely that current or future owners of the Subject Property will be held liable for the COE investigation or cleanup. The COE solvent plume, however, will continue to migrate in shallow groundwater beneath the Subject Property.

### 6.3.2 2555 Park Boulevard, Palo Alto

The 2555 Park Boulevard property, located directly east of and adjacent to the Subject Property (see Figure 2) is a reported dry cleaner release site that is currently undergoing investigations under the oversight of the Water Board. Stoddard Solvent, a former dry cleaning compound, is reported to have been released to the subsurface on the 2555 Park property. PCE, another dry cleaning compound, reportedly has been detected at elevated concentrations in soil gas on the 2555 Park property, and is suspected by the RWQCB to be a result of releases at the 2555 Park property. Naphthalene is also present in soil and groundwater in the northeast portion of the 2555 Park property, reportedly from releases of boiler fuel from a UST in that area of the property. Recent groundwater sampling conducted on Grant Avenue identified TCE in groundwater at 3 ug/l and PCE up to 11 ug/l. It was reported that the

TCE and PCE detected in groundwater did not originate from the 2555 Park property, but was related to the regional COE Study Area groundwater plume (discussed above).

Given the reported presence of VOCs in shallow groundwater beneath the 2555 Park property, as discussed above, the RWQCB requested indoor air samples be collected from the recently-constructed building on the property to determine if VOC vapors in the subsurface are entering the building at levels of potential concern, i.e., vapor intrusion. In February 2019 and in November 2019, indoor air samples were collected from the subgrade parking garage as well as the overlying commercial spaces on the 2555 Park property. Low concentrations of VOCs were detected in the air samples, e.g., below current regulatory agency commercial screening levels. The indoor air investigation at the 2555 Park site is ongoing. EKI understands that the RWQCB is requiring additional subsurface sampling around the northeast perimeter of the 2555 Park site to further assess the presence and concentrations of VOCs in the subsurface and potential for further vapor intrusion concerns to the 2555 Park building. As of the preparation of this Phase I ESA report, the 2555 Park Boulevard case remains open at the RWQCB.

Given EKI's review of the available information for the 2555 Park property, the area of remaining subsurface contamination on the 2555 Park property appears to be in the north-central and northeast portions of the property, e.g., along the Grant Avenue sidewalk and possibly extending onto the adjoining 150 Grant Avenue property, approximately 100 to 150 feet from the boundary of the Subject Property (see approximate area shown on Figure 2). Based on this information and given the reported direction of shallow groundwater flow, i.e., generally to the east or away from the Subject Property, the residual contamination on the 2555 Park property would not be expected to impact the Subject Property.

#### **6.4 Request and Review of Regulatory Agency Files**

EKI submitted requests to the following environmental regulatory and public agencies to review available hazardous materials and other potentially relevant files for the Subject Property:

- California Regional Water Quality Control Board, San Francisco Bay Region ("RWQCB")
- California EPA Department of Toxic Substances Control ("DTSC")
- Santa Clara County Department of Environmental Health ("SCCDEH")
- City of Palo Alto Fire Department, Hazardous Materials Division ("PAFD")
- Bay Area Air Quality Management District ("BAAQMD")

The above-listed agencies, with the exception of PAFD, reported to EKI that no files for the Subject Property exist at those agencies (see responses in Appendix F). At the time of preparation of this report, no response had been received from PAFD.

## 7 FINDINGS, CONCLUSIONS, AND OPINIONS OF PHASE I ESA

Based on the information presented above, the following REC was identified associated with the Subject Property:

- The Subject Property is located within the COE regional groundwater contamination Study Area. Recent sampling from a shallow groundwater well located approximately 80 feet west and potentially upgradient of the Subject Property (COE well F66A; see Figure 2), however, was reported to be non-detect for PCE and TCE. A shallow groundwater well located approximately 500 feet east (downgradient) of the Subject Property (well SH1), also sampled recently, did not contain PCE, but contained TCE at 31 ug/L. Based on these results, shallow groundwater on the Subject Property may contain low concentrations of PCE and TCE associated with the COE regional VOC plume. The concentrations of PCE and TCE in shallow groundwater at the Subject Property, if any, would be expected to be low, and would not be expected to result in potentially significant vapor intrusion concerns to the Subject Property.

No other RECs were identified for the Subject Property.

### 7.1 Identified Phase I ESA Data Gaps

According to the Final U.S. EPA AAI Rule, a “data gap” is lack of or inability to obtain information required by the AAI Rule that affects the ability of the environmental professional to identify conditions indicative of releases or threatened releases to the Subject Property despite good faith efforts made by the environmental professional. No potentially significant data gaps were identified in the performance of the Phase I ESA component of this assessment.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EKI Environment & Water, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting [www.edrnet.com/sanborn](http://www.edrnet.com/sanborn).

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

# EDR Historical Topo Map Report

08/14/19

**Site Name:**

2625 and 2635 Park Boulevard  
2625 and 2635 Park Boulevard  
Palo Alto, CA 94306  
EDR Inquiry # 5752512.4

**Client Name:**

EKI Environment & Water, Inc.  
577 Airport Blvd Suite 500  
Burlingame, CA 94010  
Contact: Paul Hoffey

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EKI Environment & Water, Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

## FINDINGS

### **Address Researched**

9 SHERMAN AVE

### **Address Not Identified in Research Source**

2014, 2010, 2006, 2001, 2000, 1996, 1991, 1986, 1985, 1982, 1980, 1975, 1974, 1970, 1968, 1966, 1965, 1964, 1963, 1962, 1960, 1957, 1955, 1950, 1946, 1945, 1942, 1940, 1936, 1935, 1931, 1930, 1926, 1925, 1922

**TARGET PROPERTY: ADDRESS NOT IDENTIFIED IN RESEARCH SOURCE**

The following Target Property addresses were researched for this report, and the addresses were not identified in the research source.

**Address Researched**

2625 and 2635 Park Boulevard

**Address Not Identified in Research Source**

2006, 2000, 1996, 1985, 1980, 1974, 1968, 1966, 1964, 1963, 1962, 1957, 1950, 1946, 1945, 1942, 1940, 1936, 1935, 1931, 1930, 1926, 1925, 1922

## Appendix B

**Selected Photographs Taken During Site Walk-Through  
28 August 2020**

**APPENDIX B**  
**SELECTED PHOTOGRAPHS OF THE SUBJECT PROPERTY**  
**28 August 2020**

Photo 1: Front of site building looking east across Sherman Avenue.

Photo 2: Front of site building looking north across Park Boulevard.

Photo 3: Site building looking northwest across Park Boulevard. 2555 Park building is to photo right.

Photo 4: Site building in photo background from public parking lot looking east.

Photo 5: Site building and covered parking from Park Boulevard sidewalk.

Photo 6: Site parking lot from Park Boulevard sidewalk. 2555 Park building to photo right.

**APPENDIX B**  
**SELECTED PHOTOGRAPHS OF THE SUBJECT PROPERTY**  
**28 August 2020**

Photo 7: Covered portion of site parking lot looking northeast.

Photo 8: Open parking lot looking east toward 2555 Park building from covered portion of lot.

Photo 9: Ground floor lobby of site building.

Photo 10: Typical office setting of site building.

Photo 11: Typical office setting of site building.

Photo 12: Typical office setting of site building.

**Phase I ESA Owner Questionnaire, User Questionnaire,  
and EDR Lien Search Report**

# ENVIRONMENTAL SITE ASSESSMENT QUESTIONNAIRE

The purpose of this questionnaire is to provide information that EKI Environment & Water, Inc. (EKI) can use to perform an Environmental Site Assessment (ESA) for the property cited below. Information provided in this questionnaire will be used solely by EKI to complete the ESA.

Please respond to every question in good faith and to the best of your knowledge. For questions that are not applicable to the property, please indicate so by placing "NA" in the space provided. If your response is "Yes," please add a brief description in the space provided to supplement your answer.

Primary property address(es): \_\_\_\_\_

Any former or alternate property addresses: \_\_\_\_\_

Name(s) of current property tenant(s)/occupant(s): \_\_\_\_\_

\_\_\_\_\_

Number of years current tenant on property: \_\_\_\_\_

Prior tenant(s)/occupant(s) and years on property (if known): \_\_\_\_\_

\_\_\_\_\_

Approximate property size: \_\_\_\_\_

Approximate total building size: \_\_\_\_\_

Approximate dates of building construction: \_\_\_\_\_

Assessors parcel number(s): \_\_\_\_\_

Name of current property owner: \_\_\_\_\_

Provide a general description of current uses of the property: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

Please attach any site drawings showing buildings, structures, and property lines.

Name of person completing questionnaire: \_\_\_\_\_ Date: \_\_\_\_\_

Company: \_\_\_\_\_

Title: \_\_\_\_\_

Length of time associated with property: \_\_\_\_\_

### 1. SITE USE HISTORY

Describe the land use history of the property. Indicate specific years of various uses if known. If use is unknown, write "unknown."

<b>Years</b>	<b>Uses</b>
Pre-1900:	_____
1900-1940:	_____
1940-1950:	_____
1950-1960:	_____
1960-1970:	_____
1970-1980:	_____
1980-1990:	_____
1990-2000:	_____
2000-present:	_____

### 2. USE OF ADJACENT PROPERTIES

Describe the current general land uses of the adjoining properties.

<b>Adjacent Property</b>	<b>Property Use</b>
Property to the North:	_____
Property to the South:	_____
Property to the East:	_____
Property to the West:	_____

### 3. CHEMICALS USED ON THE PROPERTY

List the primary or main chemicals used or stored on the property. Submit a copy of the most recent chemical inventory list for the property that also includes quantities stored:

1. _____	6. _____
2. _____	7. _____
3. _____	8. _____
4. _____	9. _____
5. _____	10. _____

Are current operating facilities on the property required to submit an annual Hazardous Materials Business Plan, or similar chemical use and inventory document, to the local environmental regulatory agency?

Yes                      No                      Unknown

Do the operating facilities currently maintain a chemical use or storage permit with the local environmental regulatory agency?

Yes                      No                      Unknown

Please list the federal, state or local environmental regulatory agencies that currently regulate chemical use, storage, or disposal activities at the property, or conduct inspection visits to the property:

1. \_\_\_\_\_
2. \_\_\_\_\_
3. \_\_\_\_\_
4. \_\_\_\_\_
5. \_\_\_\_\_

Next to each entry, please provide the approximate month and year of the most recent inspection of the facility performed by that agency.

#### **4. TANKS FOR PETROLEUM PRODUCTS OR OTHER CHEMICALS**

##### **4.1 Underground Tanks**

Are you aware of any current or former underground storage tanks (USTs) on the property?

Yes                      No

If yes, please describe: \_\_\_\_\_  
\_\_\_\_\_

If yes, are there permits for the USTs issued by a regulatory agency?                      Yes                      No                      Unknown

If yes, which agency? \_\_\_\_\_

Have the USTs been tested recently for tightness or integrity?                      Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Do you have any knowledge that the USTs leak now or in the past?                      Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any USTs on the property that are still in place and are not used?      Yes      No

If yes, please describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any current or former buried heating fuel oil tanks on the property?      Yes      No

**4.2 Above Ground Tanks**

Are there any current or former above ground storage tanks (ASTs) on the property?      Yes      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

If yes, are there permits for the ASTs issued by a regulatory agency?      Yes      No      Unknown

If yes, which agency? \_\_\_\_\_

Do you have any knowledge that the ASTs leak now or in the past?      Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Is there an emergency power generator situated on the property?      Yes      No      Unknown

If yes, how is the emergency power generator fueled?

**5. STORAGE SYSTEMS FOR PETROLEUM OR OTHER CHEMICALS**

Are any chemicals on the property stored in drums (e.g., 55-gallon drums) or other containers?

Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Do you have any knowledge that the drums or other containers leak or leaked in the past?

Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are there any above ground or below ground pipelines on the property that convey chemicals?

Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Do you have any knowledge that the pipelines leak or leaked in the past?      Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Have any leaks or spills on the property, if any, been reported to the local governing environmental regulatory agency?

Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

## 6. CHEMICAL WASTES

List chemical wastes currently generated and/or stored on the property (e.g., waste oils, waste solvents, solid wastes):

- |          |           |
|----------|-----------|
| 1. _____ | 6. _____  |
| 2. _____ | 7. _____  |
| 3. _____ | 8. _____  |
| 4. _____ | 9. _____  |
| 5. _____ | 10. _____ |

Are chemical wastes transported off-site for disposal?                                      Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Do operating facilities on the property maintain a U.S. EPA Hazardous Waste Generator ID Number?

Yes                      No                      Unknown

Do the operating facilities maintain a Hazardous Waste Generator Permit, or similar waste generator permit, with the local environmental regulatory agency?

Yes                      No                      Unknown

Are you aware of any type of on-site disposal of chemicals, chemical wastes, or other wastes on the property?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any current or former landfills, waste disposal, or debris dumping areas on the property?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are any forms of waste treatment operations performed on the property?      Yes      No      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

## **7. WATER AND WASTEWATER**

### **7.1 Water Supply**

What is the source of potable water supply for the property?

Name of providing agency or department: \_\_\_\_\_

Are you aware of any current or former, known or suspected, water supply wells on the property?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

### **7.2 Wastewater Discharge**

What is the current method of sanitary sewerage for the property?

Name of providing agency or department: \_\_\_\_\_

Are you aware of any current or former septic and/or leachfield systems on the property?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

Is industrial or process wastewater generated and/or discharged from the property?

Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

If yes, is the industrial wastewater discharge currently permitted by a local agency?

Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Is there any pre-treatment of wastewater prior to discharge?                      Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Has the property received any violations related to wastewater discharge?                      Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

**7.3 Stormwater**

Has a Storm Water Pollution Prevention Plan been prepared for the property?

Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any chemical spills or releases entering the property's storm drain system?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

**8. AIR EMISSIONS**

Are there any air emissions or air discharge points on the property?                      Yes                      No                      Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Does an air discharge permit currently exist for the property?                      Yes        No        Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Has the property ever received any air discharge violations?                      Yes        No        Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any complaints from neighbors or others regarding air/odors, soil, water, or noise issues?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

**9. PESTICIDES, HERBICIDES, AND OTHER AGRICULTURAL CHEMICALS**

Are you aware of any past or current applications of pesticides, herbicides, or other agricultural chemicals to the property?

Yes                      No

Describe and provide chemical inventories, if available: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Are you aware of any pesticides, herbicides, or other agricultural chemicals being mixed, formulated, rinsed, stored, or disposed of on the property?

Yes                      No

Describe activities and locations: \_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

Is the property now, or in the past, been used as a storage or staging area for crop dusting operations?

Yes                      No

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any cattle or sheep “dipping” or spraying operations (e.g., pesticides / parasticides), or use of “oilers” on the property?

Yes                  No

Describe: \_\_\_\_\_

\_\_\_\_\_

**10. POLYCHLORINATED BIPHENYLS (“PCBs”)**

Are there any electrical transformers, capacitors, or other equipment on the property that may contain PCBs?

Yes                  No                  Unknown

Describe: \_\_\_\_\_

\_\_\_\_\_

Are transformers on the Property privately-owned, or owned by public utility company or municipality?

Yes                  No                  Unknown

Has any testing for PCBs been performed on the equipment listed above?      Yes      No      Unknown

Describe: \_\_\_\_\_

\_\_\_\_\_

Are you aware of any transformer fluid or PCB-related spills or leaks on the property?

Yes                  No

Describe: \_\_\_\_\_

\_\_\_\_\_

**11. ASBESTOS AND LEAD**

Has an asbestos or lead-in-paint survey ever been conducted for past or current property buildings or structures, if any?

Yes                  No                  Unknown

Describe: \_\_\_\_\_

\_\_\_\_\_

## 12. OTHER QUESTIONS

Have any environmental assessment studies been performed for the property with respect to soil, groundwater, air, or building materials (e.g., Phase I assessments, Phase II investigations, etc.)?

Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Has any public agency ever investigated or cited the property or operating facility for violation or possible violation of any environmental law or commenced enforcement or clean-up action under environmental law with respect to the property?

Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Has any public agency ever listed the property as a site requiring or qualifying for clean-up under any environmental law?

Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are there any Environmental Cleanup Liens filed or recorded against the property?                  Yes                  No

Has a fire, spill, explosion, or release to the environment that required notification to the authorities, remediation, evacuation, or otherwise occurred during the last 5 years?

Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Is there any known or suspected soil or groundwater contamination at or under this facility or property?

Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are there any groundwater monitoring wells on the property?                  Yes                  No                  Unknown

Describe: \_\_\_\_\_  
\_\_\_\_\_

Are you aware of any clandestine drug labs (e.g., meth labs) that have operated on the property in the recent or distant past, or are currently operating on the Site?

Yes                      No                      Unknown

**12.1 Are any of the following features present on or adjacent to the property?**

- |   |     |    |         |
|---|-----|----|---------|
| ● Surface water impoundments (e.g., ponds, sumps, pits, lagoons)        | Yes | No | Unknown |
| ● Existing or former mines, quarries, tunnels or pits                   | Yes | No | Unknown |
| ● Existing or former oil or natural gas wells or related infrastructure | Yes | No | Unknown |
| ● Drainage canals, sloughs, creeks, swales                              | Yes | No | Unknown |
| ● Areas where fill or cover soil was brought onto the property          | Yes | No | Unknown |
| ● Refuse/trash dumps, buried debris, land filling, or “bone yards”      | Yes | No | Unknown |
| ● Easements for buried pipelines (e.g., buried petroleum or gas lines)  | Yes | No | Unknown |
| ● Current or former railroad spurs or tracks                            | Yes | No | Unknown |

**13. HELPFUL DOCUMENTS**

Please indicate which documents listed below are known to exist, are available for review, and/or can be provided to EKI.

- |   |     |    |
|---|-----|----|
| ● Environmental reports for the property (e.g., Phase I-II assessments)   | Yes | No |
| ● Environmental audit reports (e.g., operating/compliance reports)  | Yes | No |
| ● Environmental permits (e.g., hazardous waste or solid waste disposal permits, wastewater or air discharge permits, NPDES permits)   | Yes | No |
| ● Registrations for underground or above ground storage tanks   | Yes | No |
| ● Material safety data sheets (MSDSs)   | Yes | No |
| ● Safety plans (e.g., preparedness and prevention plans, spill prevention, countermeasure, and control plans)   | Yes | No |
| ● Notices or other correspondences from any governmental agency relating to past or current violations of environmental laws with respect to the property or relating to environmental liens encumbering the property | Yes | No |
| ● Hazardous waste generator notices or reports  | Yes | No |
| ● Geotechnical or hydrogeologic studies for the property  | Yes | No |

**END OF QUESTIONNAIRE**

**USER QUESTIONNAIRE  
FOR  
PHASE I ENVIRONMENTAL ASSESSMENT**

This questionnaire is being provided to User/Client to assist with the collection of information required in 40 CFR Part 312.22, Part 312.25, Part 312.26, and Parts 312.28 through 312.31 of the U.S. EPA's *Standards and Practices for All Appropriate Inquiries, Final Rule*, dated 1 November 2005. This questionnaire is consistent with the User Questionnaire suggested in Appendix X3 of ASTM E1527-13 *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, published on 1 November 2013. Please answer the following questions in good faith and to the best of your knowledge regarding the Subject Property.

**Subject Property Address:** \_\_\_\_\_

**Name of Person  
Completing Questionnaire:** \_\_\_\_\_

**Company:** \_\_\_\_\_

**Date:** \_\_\_\_\_

1) Are you aware of any Environmental Cleanup Liens that are filed or recorded against the Subject Property?

Yes                      No

If yes, explain: \_\_\_\_\_  
\_\_\_\_\_

2) Are you aware of any activity and land use limitations (i.e., engineering or institutional controls) that are in place at the Subject Property that have been filed or recorded?

Yes                      No

If yes, explain: \_\_\_\_\_  
\_\_\_\_\_

3) Do you have any specialized knowledge or experience related to the Subject Property or nearby properties, i.e., do you have knowledge of chemicals and processes used at the Subject Property?

Yes                      No

If yes, explain: \_\_\_\_\_  
\_\_\_\_\_

4) Does the purchase price being paid for the Subject Property, if applicable, reasonably reflect the fair market value of the Subject Property?

Yes                      No

**Questionnaire continued on Page 2**

If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be on the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

5) Are you aware of any commonly known or reasonably ascertainable information about the Subject Property that would help EKI identify conditions indicative of releases or threatened releases? For example:

a) Do you know the past uses of the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

b) Do you know of specific chemicals that are present or once were present at the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

c) Do you know of spills or other chemical releases that have taken place at the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

d) Do you know of any environmental cleanups that have taken place at the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

6) Based on your knowledge and experience related to the Subject Property, are there any obvious indicators that point to the presence or likely presence of contamination or past chemical releases at the Subject Property?

Yes No

If yes, explain: \_\_\_\_\_

## EDR Environmental Lien and AUL Search

The EDR Environmental Lien Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

### **Thank you for your business.**

Please contact EDR at 1-800-352-0050  
with any questions or comments.

Name

Jacqueline Griffin  
(typed or printed)

(Area reserved for official notarial seal)

**EXHIBIT A**

The land referred to is situated in the County of Santa Clara, City of Palo Alto, State of California, and is described as follows:

Portion of Lot 92, as shown upon that certain Map entitled, "Mayfield, as surveyed for W. Paul, Esqr., by J.J. Bowen, Co., surveyor", which Map was filed for record in the Office of the Recorder of the County of Santa Clara, State of California, on July 9, 1867 in Book C of Miscellaneous records, Page 641, and more particularly described as follows:

Beginning at the point of intersection of the Southeasterly line of Sherman Street with the Northeasterly line of Third Street (now known as park Boulevard), as said Streets are shown upon the Map above referred to; running thence Northeasterly along the said Southeasterly line of Sherman Street 65.00 feet; thence leaving said last named line and running Southeasterly and Parallel with the said Northeasterly line of Third Street 95.00 feet; running thence Southwesterly and Parallel with the said Southeasterly line of Sherman Street 65.00 feet to the said Northeasterly line of Third Street; running thence Northwesterly along the said Northeasterly line of Third Street 95.00 feet to the point of beginning.

## **REPORT OVERVIEW**

Pursuant to your request and assignment, Harris & Lee Environmental Sciences, LLC has acquired an Environmental Radius Report, Historic Aerial Photographs or a City Directory Abstract and a Sanborn Map Report centered on the property noted above. This document provides a brief interpretation of the above referenced Reports. Our information pertaining to 2501 Park Boulevard, Palo Alto, CA 94306, Santa Clara County Assessor's Parcel Number 124-29-01 is entirely limited to the above referenced Reports. We have not conducted a site reconnaissance of the property nor any other research into the environmental status of this property or any properties near to it to prepare this specific report.

This report conforms to the Standards and Practices for Small Business Administration (SBA) Records Search with Risk Assessment (SOP 50 10 (5); Lender Development Company Loan Programs).

This report is not an All Appropriate Inquiries (AAI) and does not conform to the Standards and Practices for All Appropriate Inquiries (40 CFR Part 312; Title 42 the Public Health and Welfare, Chapter 103, Comprehensive Environmental Response, Compensation, and Liability Act, Subchapter I, Section 9601). Furthermore, the letter is not an Environmental Site Assessment, Phase I Investigation and does not conform to the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process Designation: E-1527-05 for such assessments.

The above referenced Reports were acquired from Environmental Data Resources of Milford, Connecticut (EDR). The EDR reports accompany this letter in electronic form. Following is a brief description of important items in the EDR reports.

## **SUBJECT PROPERTY**

### ***Environmental Radius Map and Report***

The Subject Property at 2501 Park Boulevard, Palo Alto, CA 94306 is not listed on the databases researched and reported upon by EDR.

### ***Historical Usage***

The City Directory Abstract Report covering the years 1922-2006 (these years are not necessarily inclusive) included the following listings for the Subject Property:

<b><u>Year(s)</u></b>	<b><u>Listing</u></b>
1986-2001	All listings appear to be attorneys and related businesses

Sanborn Map coverage was found for the Subject Property. The first commercial development appears in 1969 when a large office building appears on the site. The site was undeveloped in the time frame of 1945 to 1986. From 1886 to sometime prior to 1945 the site appears to have been residential in use.

### **SURROUNDING PROPERTIES**

There are numerous sites listed within the standard ASTM search distance of 1-mile of the Subject Property. A brief review of the listed sites reveals that most are not likely threats for the Subject Property due to one or more of the following reasons: listing database not relevant, sufficient distance from Subject Property, location relative to site topography and ground water flow direction, and the status of the listed site (e.g., closed, contamination characterized, contamination under remediation, etc.)

One large nearby site is the Hewlett Packard National Priorities List (NPL) site. This site is near to the subject property and can be considered to be upgradient. The site has been investigated for an extensive period; however there has apparently been no significant remedial activity for the last 12 years. The contaminants of concern are halogenated volatile organic solvents that were accidentally released in the mid-1980s. Since that release extensive investigation and remediation activities have been conducted. The site remains active with the responsible party, Hewlett Packard, Inc., actively handling the site. There is the potential that this NPL site could affect the groundwater underneath the subject property.

### **SUMMARY AND RISK ASSESSMENT**

In summary, nothing was observed in the EDR report on the Subject Property. One nearby site is the Hewlett Packard site that is listed on the NPL database. This site has the potential to affect the groundwater underneath the subject property. This should not be significant unless there is a domestic water well on the subject property. While the nearby site is significant, the responsible party is clear and it is not likely that any other parties will be drawn into the position of liability for the Hewlett Packard site. Given the history of the subject property it appears unlikely that uses on that property could have contributed to the contamination from the Hewlett Packard NPL site.

Additional research was performed using various databases of the State of California and the United States Environmental Protection Agency. From these databases three monitoring wells that are immediately adjacent to the subject property were investigated. These monitoring wells do not currently exhibit contamination and therefore it is unlikely that contamination from the Hewlett Packard site has directly impacted the groundwater beneath the subject property.

Based on this evaluation, the Subject Property at 2501 Park Boulevard, Palo Alto, CA 94306 has an SBA Risk Category as follows:

SBA Risk Category: **low<sup>1,2</sup> risk** for contamination.

Recommendation: No further environmental investigation is warranted

---

<sup>1</sup> The SBA Risk Category does not indicate the presence or absence of adverse environmental conditions on the Subject Property.

<sup>2</sup> Per SBA standard SOP 50 10 (5), properties deemed "elevated risk" for contamination must complete a Phase I ESA in order to meet SBA funding requirements.

**Disclaimer**

Harris & Lee Environmental Sciences, LLC reminds the client that it is always prudent to maintain care in handling chemicals and any hazardous materials in any building or any property. Current and future tenants should be required to verify that they are complying with the regulations that pertain to waste disposal, storage of hazardous materials and any health and safety issues. It is pertinent to be reminded that the building / property owner is ultimately responsible for the environmental compliance that occurs in any building or on any property. Thus, if a tenant is not in compliance, the owner, who has nothing to do with the tenant's operations, can be held responsible.

We trust that the foregoing satisfies your requirements. If you have any questions regarding any of the foregoing, please do not hesitate to contact us.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/02/2010 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>HEWLETT-PACKARD (620-640 PAGE)</i></b>	<b><i>620 - 640 PAGE MILL RD.</i></b>	<b><i>SE 0 - 1/8 (0.066 mi.)</i></b>	<b><i>0</i></b>	<b><i>8</i></b>

## EXECUTIVE SUMMARY

### ***Federal CERCLIS list***

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>HEWLETT-PACKARD (620-640 PAGE</i>	<i>620 - 640 PAGE MILL RD.</i>	<i>SE 0 - 1/8 (0.066 mi.)</i>	<i>0</i>	<i>8</i>

### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 4 CERC-NFRAP sites within approximately 0.5 miles of the target property.

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 05/25/2010 has revealed that there are 3 CORRACTS sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

### ***Federal institutional controls / engineering controls registries***

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 12/20/2009 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>HEWLETT-PACKARD (620-640 PAGE)</i>	<i>620 - 640 PAGE MILL RD.</i>	<i>SE 0 - 1/8 (0.066 mi.)</i>	<i>0</i>	<i>8</i>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 12/20/2009 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/18/2010 has revealed that there are 10 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### **Other Ascertainable Records**

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 02/17/2010 has revealed that there is 1 RCRA-NonGen site within approximately 0.25 miles of the target property.

Summary Details:

Conditions at proposal June 24, 1988): Hewlett-Packard manufactured optoelectronic equipment on a 10-acre site at 620-640 Page Mill Road in Palo Alto, Santa Clara County, California, until 1986. In July 1981, at least 300 gallons of waste solvents, including 1,1,1-trichloroethane, trichloroethylene, toluene, xylene, and alcohols, leaked from a buried storage tank for a period of at least 3 weeks. The company excavated the tank and approximately 100 cubic yards of contaminated soil and transported the materials to a hazardous waste facility regulated under Subtitle C of the Resource Conservation and Recovery Act. Since 1982, the company has been pumping and treating contaminated ground water. Tests conducted in 1986 by a consultant to Hewlett-Packard detected trans-1,2-dichloroethylene, 1,1-dichloroethylene, trichloroethylene, 1,1,1-trichloroethane, and xylene, several in high concentrations (290,000 parts per billion) in ground water under the tank area. An estimated 57,000 people obtain drinking water from municipal wells within 3 miles of the site. In 1987, Hewlett-Packard excavated an additional 810 cubic yards of soil around the former tank area. Status February 21, 1990): Hewlett-Packard is conducting a remedial investigation/feasibility study (RI/FS) to determine the type and extent of off-site contamination and identify alternatives for remedial action. A report on the RI/FS is due in February 1990.

Site Description: The Hewlett-Packard 620-640 Page Mill Road (HP-640 PMR) Superfund site is located in Palo Alto, California within the Stanford Research Park, a light-industrial and research area owned by Stanford University. Leaks from an underground waste solvent storage tank have resulted in soil and ground water contamination at the site. Land use in the vicinity of the site is predominantly commercial and industrial, with smaller areas of residential development. The nearest residential areas are located approximately 1/8 mile northeast of the facility. Five municipal backup supply wells drawing from a deep aquifer are within three miles of the site but are not currently used. All of the City of Palo Alto drinking water is supplied by the San Francisco Water Department's Hetch Hetchy System. The HP-640 PMR site is located near the western margin of the Santa Clara Valley. The valley surface in this area is a gently sloping alluvial plain that extends northeast from the foothills to San Francisco Bay, located approximately three miles to the

MAP FINDINGS

**HEWLETT-PACKARD (620-640 PAGE MILL ROAD) (Continued)**

**1000281842**

northeast. The area is underlain by interbedded alluvial fan deposits and fine-grained floodplain deposits. The only surface water in the vicinity of HP-640 PMR is Matadero Creek, located to the east of the site. Matadero Creek is an intermittent stream that originates near the Los Altos Hills and flows in a northerly direction through the residential, commercial and industrial areas of Palo Alto. Two areas have been designated as ground water study areas: the California Olive Emerson (COE) Study Area (named by the bordering streets) and the Perimeter Area which represents the limits of the known ground water contamination plume. The COE and Perimeter Areas, are underlain by two primary aquifers, the upper A Aquifer and the lower B Aquifer. Each of these two aquifers contain distinct sand zones. The A Aquifer extends up to 55 feet below ground surface, and groundwater is first encountered at depths between 15 and 30 feet. Within the A Aquifer, the A1 Upper (A1U) Zone is generally found between the depths of 15 and 30 feet, the A1 Zone between 30 and 40 feet, and the A2 Zone between 40 and 55 feet. The general groundwater gradient in the A Aquifer is to the north-northeast. Within the B Aquifer, the B1 Zone occurs below an approximate depth of 60 feet below ground surface. This zone is typically about 10 feet thick. Where encountered, the B2 Zone begins at approximately 85 feet below the surface and is between six and 33 feet thick. The Oregon Expressway Underpass (OEU) serves as a subsurface roadway beneath the Southern Pacific Railroad tracks, Alma Street and Park Boulevard. The underpass, built in 1958, extends 24 feet below ground surface into the aquifer A1U Zone. A dewatering system installed beneath the underpass controls natural groundwater inflow and surface runoff. This dewatering appears to affect groundwater flow in the A1U, A1 and A2 Zones, and does not allow contaminants to bypass the subdrain to the north. During low flow periods, the average rate of groundwater discharge is typically 140 gallons per minute (gpm), with total Volatile Organic Compounds (VOCs) concentrations ranging between 200 and 300 parts per billion (ppb). This water is discharged to the City of Palo Alto sanitary sewer. The discharge during high flow periods consists of both surface water and groundwater; excess is pumped via auxiliary pumps and discharged to the City of Palo Alto storm drain system. Hewlett Packard Company (HP) manufactured gallium arsenide- and silicon-based semiconductors at the property from 1962 until operations ceased in 1986. The facility consisted of two main buildings (#10 and #11) and a storage building. Both buildings have since been demolished and the site redeveloped for an office building with an underground garage. Site investigation began in 1981 after a leaking 1000-gallon underground solvent storage tank was discovered between Building 11 and the storage building. Sources of metals were found in Building 10, associated with acid neutralization pumps, piping and operations areas in the building. The primary contaminants detected at the site were trichloroethene (TCE); 1,1,1-trichloroethane (1,1,1-TCA); tetrachloroethene (PCE); gallium; and arsenic. Interim Remedial Measures (IRMs) have been conducted since 1982. Soil excavations at the HP-640 PMR site between 1987 and 1992 removed approximately 7,700 cubic yards of contaminated soil to Class I landfills and approximately 3,000 cubic yards to Class III landfills. Additional areas of the site were also excavated to remove above-background concentrations of arsenic, gallium and several other metals. Groundwater remediation at HP-640 PMR was initiated in 1982 for seven months; extraction was restarted in 1987 and has continued to the present. On June 24, 1988, the U.S. EPA proposed adding the HP-640 PMR site to the National Priorities List (NPL), subject to the requirements of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). On February 1, 1990, the HP-640 PMR facility was added to the NPL. Since the listing, the groundwater contamination plume emanating from the HP-640 PMR site was found to be commingled in part with groundwater contamination plumes associated with other potential sources beyond the HP-640

PMR facility boundaries. Pursuant to the South Bay Multi-Site Cooperative Agreement and the South Bay Groundwater Contamination Enforcement Agreement entered into by the California Regional Water Quality Control Board (RWQCB), EPA and the California Department of Toxic Substances Control (DTSC) (formerly the California Department of Health Services (DHS)), the RWQCB has been acting as lead regulatory agency for the site. In July 1994, the RWQCB released a Proposed Plan fact sheet for the site that described the proposed remedy for the site. A public notice was published allowing 30 days for public comment on the RI/FS and Proposed Plan. A public meeting was held on July 26, 1994.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Comments: The Oregon Expressway Underpass site is the location of a dewatering  
 system that collects local groundwater for discharge into a culvert.  
 This helps in maintaining a dry roadway and has been in operation  
 since 1959. The site is adjacent to the Hewlett-Packard (HP) facility  
 located at 640 Page Mill Road where groundwater con- tamination has  
 been discovered. Contaminants have migrated from HP far enough to be  
 intercepted by the Oregon Expressway Underpass dewatering system. In  
 addition to HP, other facilities like Alza Corp, Aydin Energy,  
 Commodoze, etc. are believed to have contributed to the plume. The

RWQCB is the lead agency for the site and has issued order 87-129 to address the problem. Contaminants detected at this site include the following: trichloroethylene 190 PPB; perchloroethylene 110 PPB; trichloroetgabe 25 PPB; 1,-1-dichloroethylene 3.1 PPB; and TRANS -1,2-dichloroethylene 24 PPB; U.S. EPA FIT has recommended NFA under CERCLIS.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Corrective Action Summary:

Event date: 01/01/1986  
Event: Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).

Event date: 01/01/1986  
Event: Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).

Event date: 10/01/1987  
Event: RFA Completed

Event date: 10/01/1987  
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 10/01/1987  
Event: CA074HI

Event date: 10/01/1987  
Event: CA049PA

Event date: 10/01/1987  
Event: CA029ST

Event date: 12/31/1987  
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 04/19/1989  
Event: CMS Imposition

Event date: 04/19/1989  
Event: RFI Imposition

Event date: 09/30/1992  
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

**FINDS:**

Registry ID: 110000609299

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are

transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

                         Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
                         Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)  
  
                         Site History:            This site is part of the COE Study Area - bounded by California, Olive, and Emerson Streets - that includes HP 640 PMR (MSCA site) and Varian 601 California. As part of the dual phase extraction (DPE) system GWET was shut down after reaching asymptotic groundwater-CVOC levels in 2001. Subsequent In-Situ Chemical Oxidation (ISCO) began late 2007 when groundwater CVOC levels in well RW-5 were still peaking at over 800 parts per billion (ppb). ISCO baseline groundwater sampling indicated that well OB11-2 - that had not been sampled since 1997 - contained PCE at 120,000 ppb. Subsequent ISCO injections reduced PCE levels below 50 ppb that rebounded to over 1,000 ppb by the next ISCO monitoring event. When elevated groundwater-PCE levels were noted in OB11-2, the Water Board required a workplan to evaluate potential vapor intrusion assessment that was reviewed and approved in January 2008.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**PARK BOULEVARD (NO. 2901) - PALO ALTO (Continued)**

**S105960445**

identified by the Department as being contaminated with an oily black material containing lead. It is suspected that this material accumulated in the ditch from runoff at the auto body shop location. Subsequent to discovery, the area containing the ditch was graded and paved with asphalt. An auto dealership is now located on the site of the former ditch.

Hazardous Waste Desc: Analysis of the oily material indicated the presence of petroleum products and moderate concentrations of lead.

Threat To Public Health & Env: Not reported

Site Activity Status: As a Tier 3 site, this site will be listed annually in this report. If the asphalt cap is removed and the property is proposed for development for other usage, DHS may order that some additional abatement be conducted.

Event date:	01/01/1990
Event:	Stabilization Measures Implemented, Primary measure is source removal and/or treatment (e.g., soil or waste excavation, in-situ soil treatment, off-site treatment).
Event date:	01/01/1990
Event:	Stabilization Measures Implemented, Groundwater extraction and treatment (e.g., to achieve groundwater containment, to achieve MCL).
Event date:	12/01/1993
Event:	Stabilization Construction Completed
Event date:	12/01/1993
Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event date:	12/01/1993
Event:	Stabilization Construction Completed
Event date:	05/02/1994
Event:	RFA Completed
Event date:	08/12/1994
Event:	Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.
Event date:	08/12/1994
Event:	CA Prioritization, Facility or area was assigned a high corrective action priority.
Event date:	09/21/1994
Event:	RFI Approved

Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Status: No violations found

**FINDS:**

Registry ID: 110000610250

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

of the on-site dry well source in 1990 - On-site soil vapor extraction for a few years - On- and off-site groundwater extraction from 1987 until 2003. - On-site In-situ chemical oxidation (ISCO) for the last several years After several years of in-situ chemical oxidation (ISCO), TCE DNAPL conditions persist in the courtyard area through the present time. Varian is about to conduct additional RI in preparation for changing the remedy from ISCO to enhanced in-situ bioremediation. The Water Board is in the process of reviewing a limited remedial investigation workplan related to an anticipated EISB pilot study.

**Environmental Interest/Information System**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The remedial investigation report is due 31July09 with anticipated followup review and response by the end of Aug09. No public participation notification requirement is necessary until the developer has completed the site investigation. Based on investigative results, the developer will submit a Remedial Action Plan. After determining the RAP to be approve-able, our PPN protocol requires a Fact Sheet with a 30-day comment period on the RAP. With an RI report submittal at the end of July09 and anticipated review/response by the end of Aug09, the 30-day comment period would begin in either Sept09 or Oct09.</p>

**FINDS:**

Registry ID: 110002770494

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

no money will be budgeted from the fund for this site.

Site Description: The Hewlett-Packard Optoelectric Division (OED) is located on a 10-acre site in Palo Alto on the western edge of the Santa Clara Valley. The surrounding land use is both industrial and commercial.

Hazardous Waste Desc: Historic releases of 20 chemicals into the soil and ground water onsite have been observed. Waste chemicals including 1,1,1-trichloroethane (TCA) trichloroethylene (TCE), toluene, acetone, xylene, alcohols and other chemicals used in the manufacturing process at the facility were stored in a tank. The concentration of chemicals are highest in the areas immediately below the tank's former location, particularly in the unsaturated zone.

Threat To Public Health & Env: There are six municipal standby wells as close as 4,000 feet from the site and several private wells located within a 3-mile radius. The standby wells serve a population of approximately 59,000 people during emergency situations. TCE has been detected in the ground water at concentrations as high as 340,000 parts per billion (ppb). Acetone and isopropyl (IPA) were also detected at high levels in the wells near the former tank area. The highest concentration detected in wells located approximately 800 feet down gradient from the source was 3800 ppb TCE in samples taken in November, 1985.

Site Activity Status: The subsurface soil and ground water at this site are contaminated with organic solvents believed to have leaked from an underground storage tank installed in 1967. The tank and 100 cubic yards of contaminated soil (to a maximum depth of 12.5 feet) were excavated and disposed of offsite in July, 1981. The RWQCB adopted site cleanup requirements for Hewlett-Packard on October 21, 1987.

Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.  
  
Waste code: D018  
Waste name: BENZENE

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: De-Certification  
Completed Date: 1993-11-15 00:00:00  
Comments: In September 1992; closure of surface impoundments and 100 cubic yards of contaminated soil were removed. In December 1983; company closed a water treatment system which the Department of Toxic Substances Control approved and 28 cubic yards of soil were removed and disposed of during the closure of the water treatment system. Dura Bond has been working with RWQCB concerning fuel spills and some groundwater contamination problems from an off-site source since 1984. Therefore, the site has been "decertified" and the previous

Case Worker: LL  
Local Agency: SANTA CLARA COUNTY LOP  
RB Case Number: 08-034  
LOC Case Number: 06S3W11A02f  
File Location: Stored electronically as an E-file  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: 1986 3 underground storage tanks (USTs) were removed from the site. 6 soil samples were reported to have been collected and analyzed for Total Petroleum Hydrocarbons and reported to have a maximum concentration of 27 parts per million (ppm). All other site developments were also removed and the site remained vacant and undeveloped. 1988 In June, 3 soil samples (#1 through #3) were collected between 2.5-3 feet below the ground surface (ft bgs) near the dispenser islands and were reported to have maximum concentrations of 460 ppm Total Petroleum Hydrocarbons as Gasoline, 3.0 ppm Toluene, 17 ppm Ethylbenzene, and 84 ppm Xylenes. In September, 4 borings were advanced onsite near sample #3, which was reported with the highest concentrations of contaminants. One soil sample was collected from each boring at depths of 4-5 feet and an additional sample was collected at 9 ft bgs in the boring closest to the location of #3. Maximum concentrations were reported of 670 ppm TPHg, 0.5 ppm Benzene, 0.9 ppm Toluene, 8.6 ppm Ethylbenzene, and 49 ppm Xylenes. 1989 In January, 1 monitoring well (MW1) was advanced to approximately 45 ft bgs and groundwater was encountered around 31 ft bgs. 6 soil samples were collected and reported to have maximum concentrations of 4,200 ppm TPHg, 9 ppm Benzene, 110 ppm Toluene, 52 ppm Ethylbenzene, and 260 ppm Xylenes. The initial groundwater sample collected from this well was reported to contain 1,700 parts per billion (ppb) TPHg, 65 ppb Benzene, 7.1 ppb Toluene, 5.4 ppb Ethylbenzene, and 56 ppb Xylenes. 1990 In November, it was reported that approximately 8-inches of free product (FP) was measured in well MW1. 1991 In July, two monitoring wells were installed along the property boundary on the parcel immediately north of the site (1705 El Camino Real). Only 1 soil sample was collected from MW2 at 12 ft bgs and was not reported to contain TPHg, Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX). Groundwater samples were collected from each well and MW2 was not reported to have TPHg and BTEX above the laboratory reporting limits and MW1 was reported to contain 4,700 ppb TPHg, 120 ppb Benzene, 63 ppb Toluene, 11 ppb Ethylbenzene, and 500 ppb Xylenes. 1992 In May, 3 wells (MW2 through MW4) were advanced onsite to 51-55.5 ft bgs. 12 soil samples were collected and reported highest concentrations in the samples collected from 30.5 ft bgs and maximum concentrations of 2,900 ppm TPHg, 6.8 ppm Benzene, 17 ppm Toluene, 11 ppm Ethylbenzene, and 64 ppm Xylenes. Periodic monitoring of the wells commenced. 1993 In January, FP was now being measured in well MW2 in addition to well MW1. It was reported that well MW2 contained over 2 feet of FP. FP bailing was conducted on a monthly basis. Disposition and total volume of FP removed from the wells was not reported. 1994 In February, 2 offsite wells (MW5 and MW6) and 1 onsite extraction well (EW1) were installed. 4 soil samples were collected in the offsite wells and were not reported to have concentrations of TPHg, BTEX and TPH as Diesel (TPHd) above the laboratory reporting limits. 3 soil samples were collected from well

EW1 and reported to have low concentrations of TPHg and BTEX. The new wells were added to the groundwater monitoring program. In March, a soil vapor extraction test was conducted at the site. In April, a skimmer was placed in well MW1 to collect FP. In September, extraction well EW2 was installed onsite for extraction of vapor and groundwater to a depth of 40 feet. 8 soil samples were collected and not reported to have concentrations of the Constituents of Concern (COCs) present above the laboratory reporting limits. 1995 In June, a dual vapor and groundwater extraction system began operation onsite. 1996 In February, 2 extraction wells (EW3 and EW4) were installed to 40 ft bgs. 6 soil samples were collected and reported maximum concentrations of 888 ppm TPHg, 48.7 ppm TPHd, 7.9 ppm Be

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CA BOND EXP. PLAN:**

Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: The RPs will be issued a remedial action order and are expected to comply with it. DHS has budgeted \$50,000 to provide for oversight and monitoring of investigation and cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.  
Site Description: Varian, an electronics manufacturing firm, has occupied the site since 1952. Investigations were initiated by Varian as part of a regional investigation in the Stanford Research Park.  
Hazardous Waste Desc: Investigations are ongoing in three areas of the facility. At the north end of the site, chlorinated solvents, including up to 1,500 parts per billion (ppb) of trichloroethene (TCE) have been detected in shallow ground water. Gasoline contamination has been found in soil and shallow ground water near Building 4. Investigations at an adjacent site, Aydin, revealed TCE at up to 1,400 ppb and DCE an 190 ppb in shallow ground water at the south end of the Varian facility.  
Threat To Public Health & Env: Contamination of shallow ground water poses a potential threat to deeper aquifers currently used as backup municipal water supplies. There are three municipal wells within a two mile radius of the site.  
Site Activity Status: DHS will prepare a consent order or a remedial action order requiring further investigation and site cleanup. Varian is continuing its investigation work and is expected to comply with the order.

the remedial system. Groundwater extraction and treatment will continue in accordance with the approved operation and maintenance plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 1995-01-05 00:00:00  
Comments: Negative declaration approved for RAP.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 1991-12-10 00:00:00  
Comments: Completed negative declaration for Interim Removal Action of groundwater extraction and treatment in building 1 area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 1991-08-15 00:00:00  
Comments: Completed CEQA Negative Declaration for soil vapor extraction in building 3 area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 1989-05-30 00:00:00  
Comments: Consent Order signed with Varian Associates to investigate and remediate soil and groundwater at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Amendment - Order/Agreement  
Completed Date: 1998-12-11 00:00:00  
Comments: Amendment to consent order per chapter 6.5 transition.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Notice of Exemption  
Completed Date: 2007-04-04 00:00:00  
Comments: Notice of exemption approved for modification to the final remedy from groundwater extraction and treatment to injection of sodium permanganate.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 2006-09-25 00:00:00  
Comments: Five-Year Review determined that treatment system continues to achieve plume containment but many areas remain above cleanup goals. Based on the in-situ chemical oxidation pilot study results, site wide in-situ chemical oxidation is recommended.

Completed Date: 1996-09-06 00:00:00  
Comments: Approved O&M Plan for groundwater system. Treatment system incorporates instrumentation for automatic operation which requires only periodic observation and maintenance.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 2002-04-12 00:00:00  
Comments: Completed Five-Year Review. Based on this review, Varian plans to conduct an in-situ pilot test in 2003 to evaluate techniques to reduce the high concentrations of PCE which remain in the groundwater. Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 1996-06-11 00:00:00  
Comments: Completed FRA for the site which includes groundwater extraction and treatment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 1995-07-02 00:00:00  
Comments: Approved Design documents for groundwater treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 1995-04-06 00:00:00  
Comments: Completed RA. Soil Vapor Extraction (SVE) system treated soils impacted with benzene, toluene, ethylbenzene, xylenes (BTEX) and total extractable petroleum hydrocarbons (TPH-G) which were detected near Building 3 onsite. Chemical concentrations have been reduced below remedial action objectives for the site. Verification sampling indicated that the SVE was successful in remediating affected soils. SVE system was shut down and is being removed from the site. The system extracted a cumulative mass of about 15,352 pounds of TPH-G from February 1992 through December 1993.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation Report  
Completed Date: 1992-05-22 00:00:00  
Comments: Several chlorinated VOCs, gasoline, and gasoline-related compounds have been detected in soil and groundwater at the site.

Completed Date: 1993-01-28 00:00:00  
Comments: Second Addendum to RI based on DTSC comments to First Amendment and results of additional fieldwork.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan  
Completed Date: 1995-01-05 00:00:00  
Comments: Approved RAP for groundwater. Implementation expected to be completed by April 1996. SVE and treatment system with activated carbon adsorption was selected for soil. For groundwater treatment, using an air-stripper was selected and treated water will be used on-site for irrigation to the extent possible. Remainder will be discharged to storm drain. CEQA Negative Declaration completed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 1994-06-20 00:00:00  
Comments: Completed RIFS for Soil Operable Unit which found that there are no soil sources that would affect the groundwater quality except at building 4.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 1994-03-31 00:00:00  
Comments: Completed RIFS for Groundwater Operable Unit which found shallow groundwater is contaminated with VOCs.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 1992-06-12 00:00:00  
Comments: Groundwater extraction and treatment system with granular activated carbon was installed in building 1 area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 1991-08-31 00:00:00  
Comments: Completed FRIFS. This was an unplanned FRI/FS. A pilot study was completed with oxidation treatment system which utilizes high intensity ultraviolet light and hydrogen peroxide to oxidize VOCs.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 1991-09-05 00:00:00

 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**S104573830**

Facility ID: San Francisco Bay 431015026  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 2  
Facility Telephone: 6504245503  
Facility Contact: DAVE KIASKI  
Agency Name: VARIAN NMR INSTRUMENTS  
Agency Address: 3120 Hansen Way  
Agency City,St,Zip: Palo Alto 943041030  
Agency Contact: DAVE KIASKI  
Agency Telephone: 6504245503  
Agency Type: Private  
SIC Code: 0  
SIC Code 2: Not reported  
Primary Waste: Not reported  
Primary Waste Type: Not reported  
Secondary Waste: Not reported  
Secondary Waste Type: Not reported  
Design Flow: 0  
Baseline Flow: 0  
Reclamation: Not reported  
POTW: Not reported  
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

**NPDES:**

Npdes Number: Not reported  
Facility Status: Active  
Agency Id: 49712  
Region: 2  
Regulatory Measure Id: 184192

 Comments: SITE SCREENING DONE NEED MORE INFORMATION

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Site Screening  
 Completed Date: 1993-03-30 00:00:00  
 Comments: No further action per EPA's preliminary assessment for this site only determined that its hazard ranking score (hrs) would not admit it into the National Priority List (NPL). Recommendation by dtsc on reevaluation of the site reflects DTSC's own criteria. This 3.6 acre currently active site, mostly paved or landscaped, has been the site of several interests associated with research and development in food, medicine, genetics and biology. Through various leases and subleases, Alza has been the lessee since 1972 and sole operator at the site since March 1986. Sampling since 1987 indicated that surface soil was contaminated with chloroform (520 mg/kg), carbon tetrachloride (250 mg/kg), freon (1.1 mg/kg) and DCE (120mg/kg) and groundwater in the uppermost interconnected aquifers was contaminated with chloroform (4100 mg/kg), carbon tetrachloride and TCE. Bore hole soil samples also detected presence of chloroform (2000mg/kg). Soil gas and groundwater treatment systems have been in operation at site under oversight of Regional Water Quality Control Board. Deeper potable aquifer of wide use as drinking water source has not been impacted. This site screening was based in part on the CERCLA screening site inspection report prepared by Ecology and Environment for USEPA (contained in DTSC file). DTSC files were reviewed. REQCB and county files were not located or reviewed. Extent of soil contamination was about 200 sf. groundwater contamination extends at least 200 feet from soil contamination area and one well screened in deeper aquifer detected 1.5 mg/l of chloroform.

**Hazardous Waste Summary:**

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:

Facility ID: San Francisco Bay 43I015508  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or processing operation of whatever nature, including mining, gravel washing, geothermal operations, air conditioning, ship building and repairing, oil production, storage and disposal operations, water pumping.  
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.  
NPDES Number: CAS000001 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board  
Subregion: 2

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/02/2010	Source: EPA
Date Data Arrived at EDR: 07/14/2010	Telephone: N/A
Date Made Active in Reports: 10/04/2010	Last EDR Contact: 10/13/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 01/24/2011
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/29/2010	Source: EPA
Date Data Arrived at EDR: 02/09/2010	Telephone: 703-412-9810

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010  
Date Data Arrived at EDR: 02/19/2010

## ***State- and tribal - equivalent CERCLIS***

### ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## ADDITIONAL ENVIRONMENTAL RECORDS

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/07/2010	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 06/18/2010	Telephone: 202-307-1000
Date Made Active in Reports: 08/17/2010	Last EDR Contact: 09/17/2010
Number of Days to Update: 60	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Quarterly

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Local Land Records

### LIENS 2: CERCLA Lien Information

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 05/06/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/11/2010	Telephone: 202-564-6023
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 90	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 09/08/2010
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/06/2010
	Data Release Frequency: Varies

### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 07/27/2010	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 08/13/2010	Telephone: 916-323-3400
Date Made Active in Reports: 08/20/2010	Last EDR Contact: 10/18/2010
Number of Days to Update: 7	Next Scheduled EDR Contact: 01/31/2011
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/14/2010	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/15/2010	Telephone: 916-323-3400
Date Made Active in Reports: 09/29/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 14	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Semi-Annually

## **Records of Emergency Release Reports**

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 04/06/2010	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/07/2010	Telephone: 202-366-4555
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 10/07/2010
Number of Days to Update: 50	Next Scheduled EDR Contact: 01/17/2011
	Data Release Frequency: Annually

### CHMIRS: California Hazardous Material Incident Report System

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 12/31/2009	Source: Office of Emergency Services
Date Data Arrived at EDR: 07/21/2010	Telephone: 916-845-8400
Date Made Active in Reports: 08/20/2010	Last EDR Contact: 08/02/2010
Number of Days to Update: 30	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Varies

### LDS: Land Disposal Sites Listing

The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units.

Date of Government Version: 09/20/2010	Source: State Water Quality Control Board
Date Data Arrived at EDR: 09/21/2010	Telephone: 866-480-1028
Date Made Active in Reports: 10/18/2010	Last EDR Contact: 09/21/2010
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2011
	Data Release Frequency: Quarterly

### MCS: Military Cleanup Sites Listing

The State Water Resources Control Board and nine Regional Water Quality Control Boards partner with the Department of Defense (DoD) through the Defense and State Memorandum of Agreement (DSMOA) to oversee the investigation and remediation of water quality issues at military facilities.

Date of Government Version: 09/20/2010	Source: State Water Resources Control Board
Date Data Arrived at EDR: 09/21/2010	Telephone: 866-480-1028
Date Made Active in Reports: 10/18/2010	Last EDR Contact: 09/21/2010
Number of Days to Update: 27	Next Scheduled EDR Contact: 01/03/2011
	Data Release Frequency: Quarterly

## **Other Ascertainable Records**

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/17/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/19/2010	Telephone: (415) 495-8895
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 10/07/2010
Number of Days to Update: 87	Next Scheduled EDR Contact: 01/17/2011
	Data Release Frequency: Varies

## DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 01/12/2010	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/09/2010	Telephone: 202-366-4595
Date Made Active in Reports: 04/12/2010	Last EDR Contact: 08/11/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 11/22/2010
	Data Release Frequency: Varies

## DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 07/22/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 11/01/2010
	Data Release Frequency: Semi-Annually

## FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2008	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 09/30/2009	Telephone: 202-528-4285
Date Made Active in Reports: 12/01/2009	Last EDR Contact: 09/14/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Varies

## CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 04/11/2010	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 04/19/2010	Telephone: Varies
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 10/04/2010
Number of Days to Update: 28	Next Scheduled EDR Contact: 01/17/2011
	Data Release Frequency: Varies

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/01/2010	Source: EPA
Date Data Arrived at EDR: 06/16/2010	Telephone: 703-416-0223
Date Made Active in Reports: 08/17/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 62	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/14/2009	Source: Department of Energy
Date Data Arrived at EDR: 09/29/2010	Telephone: 505-845-0011
Date Made Active in Reports: 10/04/2010	Last EDR Contact: 09/01/2010
Number of Days to Update: 5	Next Scheduled EDR Contact: 12/13/2010
	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 05/07/2010	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 06/09/2010	Telephone: 303-231-5959
Date Made Active in Reports: 08/30/2010	Last EDR Contact: 09/09/2010
Number of Days to Update: 82	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/13/2010	Telephone: 202-566-0250
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 09/01/2010
Number of Days to Update: 36	Next Scheduled EDR Contact: 12/13/2010
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 10/01/2010
Number of Days to Update: 46	Next Scheduled EDR Contact: 01/10/2011
	Data Release Frequency: Every 4 Years

## FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/30/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/13/2010
	Data Release Frequency: Quarterly

## FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/30/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/13/2010
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2008
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2008	Source: EPA
Date Data Arrived at EDR: 01/06/2010	Telephone: 202-564-4203
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 08/16/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Annually

## ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 04/24/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/29/2010	Telephone: 202-564-5088
Date Made Active in Reports: 05/17/2010	Last EDR Contact: 09/27/2010
Number of Days to Update: 18	Next Scheduled EDR Contact: 01/10/2011
	Data Release Frequency: Quarterly

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 02/01/2010	Source: EPA
Date Data Arrived at EDR: 04/22/2010	Telephone: 202-566-0500
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 07/30/2010
Number of Days to Update: 109	Next Scheduled EDR Contact: 11/01/2010
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 03/18/2010	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/06/2010	Telephone: 301-415-7169
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/13/2010
Number of Days to Update: 51	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 07/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/14/2010	Telephone: 202-343-9775
Date Made Active in Reports: 08/09/2010	Last EDR Contact: 10/14/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 01/24/2011
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (415) 947-8000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 09/15/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2007	Source: EPA/NTIS
Date Data Arrived at EDR: 02/25/2010	Telephone: 800-424-9346
Date Made Active in Reports: 05/12/2010	Last EDR Contact: 08/24/2010
Number of Days to Update: 76	Next Scheduled EDR Contact: 12/06/2010
	Data Release Frequency: Biennially

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CA BOND EXP. PLAN: Bond Expenditure Plan

Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989  
Date Data Arrived at EDR: 07/27/1994  
Date Made Active in Reports: 08/02/1994  
Number of Days to Update: 6

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DRYCLEANERS: Cleaner Facilities

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner's agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

Date of Government Version: 09/15/2010	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 09/16/2010	Telephone: 916-327-4498
Date Made Active in Reports: 09/29/2010	Last EDR Contact: 09/13/2010
Number of Days to Update: 13	Next Scheduled EDR Contact: 12/27/2010
	Data Release Frequency: Annually

## WIP: Well Investigation Program Case List

Well Investigation Program case in the San Gabriel and San Fernando Valley area.

Date of Government Version: 07/03/2009	Source: Los Angeles Water Quality Control Board
Date Data Arrived at EDR: 07/21/2009	Telephone: 213-576-6726
Date Made Active in Reports: 08/03/2009	Last EDR Contact: 10/05/2010
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/17/2011
	Data Release Frequency: Varies

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

Date of Government Version: 12/31/2009	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 07/07/2010	Telephone: 916-255-1136

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Data Release Frequency: No Update Planned

#### EDR Historical Auto Stations: EDR Proprietary Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

## SANTA CLARA COUNTY:

### HIST LUST - Fuel Leak Site Activity Report

A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

Date of Government Version: 03/29/2005	Source: Santa Clara Valley Water District
Date Data Arrived at EDR: 03/30/2005	Telephone: 408-265-2600
Date Made Active in Reports: 04/21/2005	Last EDR Contact: 03/23/2009
Number of Days to Update: 22	Next Scheduled EDR Contact: 06/22/2009
	Data Release Frequency: No Update Planned

### LOP Listing

A listing of leaking underground storage tanks located in Santa Clara county.

Date of Government Version: 05/29/2009	Source: Department of Environmental Health
Date Data Arrived at EDR: 06/01/2009	Telephone: 408-918-3417
Date Made Active in Reports: 06/15/2009	Last EDR Contact: 09/07/2010
Number of Days to Update: 14	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Annually

### Hazardous Material Facilities

Hazardous material facilities, including underground storage tank sites.

Date of Government Version: 08/31/2009	Source: City of San Jose Fire Department
Date Data Arrived at EDR: 08/31/2009	Telephone: 408-535-7694
Date Made Active in Reports: 09/18/2009	Last EDR Contact: 09/13/2010
Number of Days to Update: 18	Next Scheduled EDR Contact: 11/29/2010
	Data Release Frequency: Annually

## SOLANO COUNTY:

### Leaking Underground Storage Tanks

A listing of leaking underground storage tank sites located in Solano county.

Date of Government Version: 09/07/2010	Source: Solano County Department of Environmental Management
Date Data Arrived at EDR: 09/10/2010	Telephone: 707-784-6770
Date Made Active in Reports: 09/29/2010	Last EDR Contact: 09/07/2010
Number of Days to Update: 19	Next Scheduled EDR Contact: 12/20/2010
	Data Release Frequency: Quarterly

### Underground Storage Tanks

Underground storage tank sites located in Solano county.

Date of Government Version: 09/07/2010	Source: Solano County Department of Environmental Management
Date Data Arrived at EDR: 09/14/2010	Telephone: 707-784-6770

## VENTURA COUNTY:

### Business Plan, Hazardous Waste Producers, and Operating Underground Tanks

The BWT list indicates by site address whether the Environmental Health Division has Business Plan (B), Waste Producer (W), and/or Underground Tank (T) information.

Date of Government Version: 07/26/2010	Source: Ventura County Environmental Health Division
Date Data Arrived at EDR: 09/01/2010	Telephone: 805-654-2813
Date Made Active in Reports: 09/29/2010	Last EDR Contact: 08/24/2010
Number of Days to Update: 28	Next Scheduled EDR Contact: 12/06/2010
	Data Release Frequency: Quarterly

### Inventory of Illegal Abandoned and Inactive Sites

Ventura County Inventory of Closed, Illegal Abandoned, and Inactive Sites.

Date of Government Version: 08/01/2009	Source: Environmental Health Division
Date Data Arrived at EDR: 10/05/2009	Telephone: 805-654-2813
Date Made Active in Reports: 10/13/2009	Last EDR Contact: 09/27/2010
Number of Days to Update: 8	Next Scheduled EDR Contact: 11/15/2010
	Data Release Frequency: Annually

### Listing of Underground Tank Cleanup Sites

Ventura County Underground Storage Tank Cleanup Sites (LUST).

Date of Government Version: 05/29/2008	Source: Environmental Health Division
Date Data Arrived at EDR: 06/24/2008	Telephone: 805-654-2813
Date Made Active in Reports: 07/31/2008	Last EDR Contact: 08/24/2010
Number of Days to Update: 37	Next Scheduled EDR Contact: 12/06/2010
	Data Release Frequency: Quarterly

### Underground Tank Closed Sites List

Ventura County Operating Underground Storage Tank Sites (UST)/Underground Tank Closed Sites List.

Date of Government Version: 08/31/2010	Source: Environmental Health Division
Date Data Arrived at EDR: 09/21/2010	Telephone: 805-654-2813
Date Made Active in Reports: 09/30/2010	Last EDR Contact: 09/21/2010
Number of Days to Update: 9	Next Scheduled EDR Contact: 01/03/2011
	Data Release Frequency: Quarterly

## YOLO COUNTY:

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Underground Storage Tank Comprehensive Facility Report  
Underground storage tank sites located in Yolo county.

Date of Government Version: 07/20/2010	Source: Yolo County Department of Health
Date Data Arrived at EDR: 09/16/2010	Telephone: 530-666-8646
Date Made Active in Reports: 09/30/2010	Last EDR Contact: 09/27/2010
Number of Days to Update: 14	Next Scheduled EDR Contact: 01/10/2011
	Data Release Frequency: Annually

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009	Telephone: 860-424-3375
Date Made Active in Reports: 09/11/2009	Last EDR Contact: 08/25/2010
Number of Days to Update: 16	Next Scheduled EDR Contact: 12/06/2010
	Data Release Frequency: Annually

### NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2009	Source: Department of Environmental Protection
Date Data Arrived at EDR: 07/22/2010	Telephone: N/A
Date Made Active in Reports: 08/26/2010	Last EDR Contact: 10/19/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 01/31/2011

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2009

Date Data Arrived at EDR: 07/06/2010

Date Made Active in Reports: 07/26/2010

Number of Days to Update: 20

Source: Department of Natural Resources

Telephone: N/A

Last EDR Contact: 09/20/2010

Next Scheduled EDR Contact: 01/03/2011

Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

### Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

FIRST REPUBLIC BANK  
2501 PARK BOULEVARD  
PALO ALTO, CA 94306

### **TARGET PROPERTY COORDINATES**

Latitude (North):	37.42790 - 37° 25' 40.4"
Longitude (West):	122.1421 - 122° 8' 31.6"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	575905.3
UTM Y (Meters):	4142483.5
Elevation:	31 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	37122-D2 PALO ALTO, CA
Most Recent Revision:	1999

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
SANTA CLARA, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06085C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
PALO ALTO	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius:	1.25 miles
Location Relative to TP:	1/4 - 1/2 Mile South
Site Name:	STANFORD CLEANERS
Site EPA ID Number:	CAD028879765
Groundwater Flow Direction:	Northeast
Measured Depth to Water:	15.7 feet.
Hydraulic Connection:	Information is not available regarding the hydraulic connection between aquifers underlying the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### ROCK STRATIGRAPHIC UNIT

Era: Cenozoic  
System: Quaternary  
Series: Quaternary  
Code: Q (*decoded above as Era, System & Series*)

#### GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BOTELLA

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.30 Min: 5.60
2	9 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60
3	41 inches	76 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 0.60 Min: 0.20	Max: 7.80 Min: 5.60

### OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: No Other Soil Types

Surficial Soil Types: No Other Soil Types

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: No Other Soil Types

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit [www.edrnet.com/2009enhancements](http://www.edrnet.com/2009enhancements)

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2006. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

### ***Federal CERCLIS list***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2020 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 CORRACTS sites within approximately 1 mile of the target property.

### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/23/2020 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/23/2020 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

EPA ID:: CAD980884209				

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 02/13/2020 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

### **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/27/2020 has revealed that there are 14 ENVIROSTOR sites within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 24 CPS-SLIC sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

HIST LUST: A listing of open and closed leaking underground storage tanks. This listing is no longer updated by the county. Leaking underground storage tanks are now handled by the Department of Environmental Health.

A review of the HIST LUST list, as provided by EDR, and dated 03/29/2005 has revealed that there are 21 HIST LUST sites within approximately 0.5 miles of the target property.

### **Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

### Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 11 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 21 CUPA Listings sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA Id: CAD076314640  
Cleanup Status: CLOSED

Notify 65: Listings of all Proposition 65 incidents reported to counties by the State Water Resources Control Board and the Regional Water Quality Control Board. This database is no longer updated by the reporting agency.

A review of the Notify 65 list, as provided by EDR, and dated 03/12/2020 has revealed that there are 2 Notify 65 sites within approximately 1 mile of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Name: HEWLETT-PACKARD COMPANY  
Address: 640 PAGE MILL RD  
City,State,Zip: PALO ALTO, CA 94304-1001  
Region: STATE  
**Facility Status: Open - Remediation**  
Status Date: 01/01/1987  
Global Id: SL720511210  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.4211115046554  
Longitude: -122.144923210144  
Case Type: Cleanup Program Site  
Case Worker: RWP  
Local Agency: SANTA CLARA VALLEY WATER DISTRICT  
RB Case Number: 43S0051  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water), Soil Vapor  
Potential Contaminants of Concern: Trichloroethylene (TCE), 1,1,1-Trichloroethane (TCA), Arsenic, Tetrachloroethylene (PCE)

Site History: The responsible parties conducted the following remedial measures: - Soil excavation of the on-site dry well source in 1990s - On-site soil vapor extraction for a few years - On- and off-site groundwater extraction that continues today - On-site In-situ chemical oxidation (ISCO) Groundwater migration is under lateral control in the A1 and A2 Zones with increased off-property extraction in EW-8 and EW-10. However, CVOC levels in the A2 Zone rose from non-detectable levels in 2000 to elevated levels since 2001. The installation and monitoring of a B-Zone well downgradient from the area of elevated A2-Zone CVOCs indicates the B Zone has not been significantly impacted. Following up on the last 5YR, the Responsible Parties are pilot testing on-property direct remediation of the A1 and A2 Zones through focused groundwater extraction that has successfully lowered CVOC levels from over DNAPL threshold to the high-hundreds to low thousands of parts per billion. On-property indoor air vapor intrusion is effectively controlled by the podium-parking design of the building that has a vapor barrier. Off-property VI evaluation is currently being conducted with the residential phase recently completed. The off-property VI evaluation concluded that VI is not occurring in single family homes and in the breathing zone of residential and commercial buildings with Regional Water Board and USEPA concurrence.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 08-03-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility uses steam autoclave and OPA cold sterilization solution which is neutralized with HydeOut before disposing to the drain. Surfaces are disinfected with disposable wipes, enzymatic tablets are used in the ultrasonic cleaner, carpules of lidocaine and whitener are used completely, and facility does not generate expired pharmaceuticals. No metal impression trays are used. First aid kits are sent back for exchange before expiration. Facility switched to digital x-rays in March and has some remaining x-ray waste. Facility has a total of 3x5 gallon containers of developer and 3x5 gallon containers of fixer with a total of approximately 6 gallons of fixer and 6 gallons of developer between them (last recycled in October of 2015, receipt reviewed). Facility has 1 box of lead bite wings which were last recycled for their metal content in 2013 (receipt reviewed). Amalgam separator is located in office and fixer waste is located on porch behind office in secondary [Truncated]

 Site Name: CALIFORNIA AVE. NORGE VILLAGE CLEANERS  
 Violation Date: 06-18-2014  
 Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)  
 Violation Description: Failure to establish and electronically submit an adequate training program in safety procedures in the event of a release or threatened release of a hazardous material.  
 Violation Notes: Returned to compliance on 03/16/2015.  
 Violation Division: Palo Alto City Fire Department  
 Violation Program: HMRRP  
 Violation Source: CERS

Site ID: 14491  
 Site Name: CALIFORNIA AVE. NORGE VILLAGE CLEANERS  
 Violation Date: 04-13-2016  
 Citation: 22 CCR 12 66262.40(c) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(c)  
 Violation Description: Failure to determine if the waste generated is a hazardous waste and to maintain analysis results for three years.  
 Violation Notes: Returned to compliance on 06/06/2016. Ms. Ellis stated that all dry cleaning lint is currently disposed of with regular trash. Ms. Ellis was advised that cleaning machine lint containing Green Earth likely qualifies as hazardous waste due to its toxicity. Determine if lint is hazardous (may chose to test lint via aquatic bioassay) and if determined to be hazardous waste, begin managing it in a closed and labeled container.

Eval Date: 04-13-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility is a dry cleaning shop with one machine that uses Green Earth. Entire shop, including wet and dry cleaning areas, boiler room, and trashcans were inspected on 4/11/2016. Returned on 4/13/2016 to review consolidated manifests for disposal of solid dry cleaning filters and liquid sludges from 2013-2016. Facility uses towels in case of a spill, has serviced fire extinguishers, and has a current emergency posting. Waste containers are inspected weekly and employees are trained by Ms. Ellis. Aisle space is adequate, and the facility's EPA ID number is currently active. The following violations were corrected at the time of inspection by Ms. Ellis: 1x30 gallon container of hazardous waste was missing hazardous characteristics. Ms. Ellis fixed this label at the time of inspection.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Site Screening  
 Completed Date: 02/03/1993  
 Comments: The Oregon Expressway Underpass site is the location of a dewatering system that collects local groundwater for discharge into a culvert. This helps in maintaining a dry roadway and has been in operation since 1959. The site is adjacent to the Hewlett-Packard (HP) facility located at 640 Page Mill Road where groundwater contamination has been discovered. Contaminants have migrated from HP far enough to be intercepted by the Oregon Expressway Underpass dewatering system. In addition to HP, other facilities like Alza Corp, Aydin Energy, Commodore, etc. are believed to have contributed to the plume. The RWQCB is the lead agency for the site and has issued order 87-129 to address the problem. Contaminants detected at this site include the following: trichloroethylene 190 PPB; perchloroethylene 110 PPB; trichloroethylene 25 PPB; 1,1-dichloroethylene 3.1 PPB; and TRANS-1,2-dichloroethylene 24 PPB; U.S. EPA FIT has recommended NFA under CERCLIS.

Local Case Number: 06S3W12F02f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: 1998 Phase I Environmental Site Assessment (ESA): According to Krazan & Associates' (Krazan's) February 11, 1998 Phase I Environmental Site Assessment report, the site was occupied by a brewery from at least 1884 to 1935 and by a Shell-branded service station from approximately 1939 to the early 1970s. The brewery facilities reportedly included a 1,200-gallon oil underground storage tank (UST). The Shell-branded service station had three 1,000-gallon gasoline USTs and a hydraulic lift. No information is available regarding the former locations or the removal of these USTs. Construction of the current on-site office building, which includes a basement occupying at least three-quarters of the site, would likely have discovered any USTs existing on site at that time. Krazan's report includes a copy of the January 3, 1973 building permit for construction of the building. The environmental site assessment also identified the property immediately across South California Avenue as the site of another gasoline service station from at least 1946 to 1970. 1998 Subsurface Investigation: In March 1998, Lowney & Associates (Lowney) drilled five exploratory borings (EB-1, EB-2, EB-3, EB-4, and EB-5). The borings were completed in the on-site building basement (approximately 9 to 10 feet below the adjacent street surface) to a depth of approximately 24 feet below grade (fbg). Groundwater was encountered in each boring at approximately 22 to 24 fbg. Grab groundwater samples contained up to 950,000 micrograms per liter (a%g/L) total petroleum hydrocarbons as diesel (TPHd) and 120,000 a%g/L total petroleum hydrocarbons as gasoline

**SHELL - 299 S CALIFORNIA (Continued)**

**S105126354**

(TPHg). Up to 900 a%g/ L methyl tertiary-butyl ether (MTBE) was initially reported in four of the five groundwater samples analyzed by EPA Method 8020. Confirmation analyses on the highest reported MTBE concentration (sample EB-3) by EPA Method 8260 did not detect MTBE. Lowney did not collect soil samples from the exploratory borings for chemical analyses or provide boring logs in their report. The investigation is detailed in Lowney's April 3, 1998 Ground Water Quality Evaluation report. 1999 Subsurface Investigation: In November 1999, Cambria Environmental Technology, Inc. (Cambria) installed three groundwater monitoring wells (MW-1, MW-2, and MW-3). Soil samples collected from the well borings contained up to 310 milligrams per kilogram (mg/ kg) TPHd, 1,300 mg/ kg TPHg, and 2.1 mg/kg benzene. No TPHd, TPHg, or benzene was detected in soil samples from well boring MW-3. Up to 0.76 mg/ kg MTBE was reported in soil samples analyzed by EPA Method 8020, but no MTBE was detected when the samples were analyzed by EPA Method 8260. Details of this investigation are summarized in Cambria's December 10, 1999 Subsurface Investigation Report and December 20, 1999 Subsurface Investigation Report Addendum. 2000 Subsurface Investigation: In April 2000, Cambria installed one groundwater monitoring well (MW-4) and drilled two soil borings (SB-5 and SB-6). The soil borings were drilled up gradient and down gradient from the former source area on site (based on the groundwater gradients obtained from wells MW-1 through MW-3). Well MW-4 was installed in the likely source area in the basement of the office building. Soil samples collected from SB-6 and MW-4 soil contained up to 140 mg/ kg TPHd, 710 mg/kg TPHg, and 0.92 mg/kg benzene. The only MTBE reported in soil samples was 0.29 mg/ kg (SB-6 at 30.5 fbg) by EPA Method 8020; however, MTBE was not detected in the same sample when analyzed by EPA Method 8260. No analytes were detected in the soil samples collected from boring SB-5, located down gradient from the site, with exception of 12 mg/ kg TPHd at 10 fbg. Grab groundwater samples were collected from SB-5 and SB-6, and two grab groundwater samples were collected from the MW-4 well boring. Grab groundwater samples contained up to 310,000 a%g/L TPHd, 130,000 a%g/L TPHg, and 11,000 a%g/L benzene. MTBE was not detected by EPA Method 8260, with the exception of 5 a%g/L in SB-5. Cambria's June 8, 2000 Additional Subsurface Investigation Report details investigation results. 2001 Conduit Study: In January 2001, Cambria performed a subsurface conduit study of the area adjacent to the site to determine the potential for underground utility trenches to affect groundwater flow near the site. Gas and water lines are generally located at depths of 3 to 8 fbg. Storm and sanitary sewer conduits often exist at greater depths than gas and water lines. Cambria measured the depths of the storm and sanitary sewer systems via access manholes adjacent to the site. The depths to flow lines in V%the conduits were all less than 5 fbg. Given that prevailing groundwater on site ranges from 17.5 to 20 fbg, it is unlikely that the gas, water, storm, or sanitary sewer lines on or near the site are acting as preferential pathways for migration of groundwater contaminants. The results were reported in Cambria's January 18, 2001 Conduit Study. 2001 Corrective Action Plan (CAP): Cambria's May 29, 2001 CAP reviewed site conditions and potential sensitive receptors, identified benzene, toluene, ethylbenzene, and total xylenes (BTEX) as the chemicals of concern (COCs), and evaluated soil vapor extraction and monitored natural attenuation as remedial alternatives. Cambria recommended that a Tier 2 risk-based corrective action (RBCA) analysis be performed to evaluate the

potential health risk posed by site hydrocarbons. 2001 CAP Addendum, Indoor Air Sampling, and RBCA Analysis: Cambria's August 27, 2001 Corrective Action Plan Addendum: Risk-Based Corrective Action Analysis report presented the results of two indoor air samples collected on July 27, 2001. The samples were collected from near the floor level in the building basement using passive integrated air sampling devices (Summa canisters) over an approximate 4-hour period. No outdoor air "background" samples were collected, and a survey of the building basement for possible "background" sources of COCs was not conducted. The basement is not normally occupied, and air sampling was not conducted in any other occupied areas of the building. The maximum benzene air concentration obtained was 0.97 micrograms per cubic meter (a%g/m3). Cambria presented a Tier 2 RBCA analysis, based on the American Society of Testing and Materials' RBCA approach. A conceptual site model identified indoor air inhalation of vapors originating from soil and groundwater as complete exposure pathways to be evaluated. Representative concentrations of soil, groundwater, and indoor air were presented based on maximum-detected concentrations in each media. Due to the existence of the commercial office building, a target carcinogenic risk level of  $1 \times 10^{-6}$  was presented for the commercial receptor scenario. In lieu of modeling indoor air concentrations from soil or groundwater, the results of indoor air sampling were used as the exposure point concentrations for evaluation of the indoor air inhalation exposure pathway. Cambria calculated a risk of  $0.678 \times 10^{-6}$  as the risk due to the highest measured benzene concentrations in basement air, and identified an air concentration of  $1.43 \text{ a}\%g/m^3$  benzene as the risk based screening level for a  $1 \times 10^{-6}$  risk level. 2001 CAP Addendum: Cambria's October 23, 2001 Corrective Action Plan Addendum presented proposed final cleanup levels for groundwater and recommended continued annual groundwater monitoring until the results can demonstrate a clear attenuating trend of COC concentrations and a time estimate to reach cleanup goals can be made. The Santa Clara Valley Water District approved the CAP in a January 25, 2002 letter. 2004 Remedial Method and Site Risk Assessment Re-evaluation: Cambria's January 29, 2004 Site Review-Remedial Method and Site Risk Assessment Re-evaluation letter re-evaluated the site and recommended continued annual groundwater monitoring until the results can demonstrate a clear attenuating trend of COC concentrations and a time estimate to reach cleanup goals can be made. The letter also stated that previous investigations and groundwater monitoring have shown that hydrocarbons are not significantly migrating from the site, and the decreases in hydrocarbon concentrations in off-site wells indicate that natural attenuation processes are working to remediate soil and groundwater. 2011 Subsurface Investigation: In April and May 2011, Conestoga-Rovers & Associates (CRA) installed one groundwater monitoring well (MW-5) and two sub-slab soil vapor probes (SVP-1 and SVP-2). Soil samples from the well boring contained up to 9.8 mg/kg TPHd and 65 mg/kg TPHg. No benzene or MTBE was detected in the soil samples. No BTEX was detected in soil vapor samples collected from the sub-slab probes. CRA's July 22, 2011 Subsurface Investigation Report details these results. 2013 Subsurface Investigation: In August 2013, CRA advanced two soil borings (SB-7 and SB-8). Grab groundwater samples from the well borings contained up to 40,000 a%g/L TPHd and 110,000 a%g/L TPHg. Benzene was only detected in one boring, SB-7 at 30 fbgl, at a concentration of 1.2 a%g/L. CRA's

December 9, 2013 Subsurface Investigation Report details these results. 2013 Soil Vapor Sampling: CRA conducted quarterly soil vapor sampling during 2013 from sub-slab soil vapor probes SVP-1 and SVP-2. No BTEX detections exceeded San Francisco Bay Regional Water Quality Control Board's environmental screening levels, and no naphthalene was detected in any soil vapor samples. CRA's February 20, 2014 Soil Vapor Monitoring Report contains the historical soil vapor data. Groundwater Monitoring: Quarterly groundwater monitoring was conducted from fourth quarter 1999 through the end of 2000. Since 2001, semiannual groundwater monitoring has been conducted during the first and third quarters.

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Facility Status: Completed - Case Closed**  
Status Date: 07/30/2018  
Global Id: T10000001638  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.4261726546906  
Longitude: -122.143270969391  
Case Type: Cleanup Program Site  
Case Worker: RWP  
Local Agency: Not reported  
RB Case Number: 43S1133  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Trichloroethylene (TCE)  
Site History: The underlying HP/Varian plume has been under hydraulic control since the late 1980s with off-property extraction wells and the Oregon Expressway Underpass subdrain system operating on a 24/7 basis. Developer will conduct IA testing after building constructed the building with a VIMS even though groundwater-CVOC levels are very low. Not reported

**Evaluation:**  
Eval General Type: Compliance Evaluation Inspection  
Eval Date: 07-14-2015  
Violations Found: No  
Eval Type: Routine done by local agency  
Eval Notes: Practice is general dentistry. Utilize film for x-rays. Spent develop and fix solutions were collected in 30-gallon container, not using smaller size due to no longer share with Mazzatti. Dr. Armistead hopes to complete conversion to digital x-rays soon. Lead foil is collected and picked up by metal recycler who also takes precious metals. Amalgam disposal service provided for separator by mail back system. Capsules and chariside collection to containers currently, no disposal as of yet. Sterilization via steam autoclave. Also using KOH/IPA and sulfamic acid based cleaning solutions. Both solutions determined to be non-hazardous (pH) in 2011. Reviewed receipts for removal of wastes.

 RB Case Number: 43S1076  
 File Location: Regional Board  
 Potential Media Affected: Soil  
 Potential Contaminants of Concern: Arsenic, Diesel, Tetrachloroethylene (PCE)  
 Site History: This site is located at 2747 and 2787 Park Boulevard, Palo Alto, Santa Clara County. A concrete batch plant operated at the site from approximately the 1940s to the early 1990s. The site is within the California-Olive-Emerson (COE) Study Area, which is characterized by a groundwater plume of chlorinated solvents for sources located up-gradient of the site. Onsite sourced contamination is associated with underground storage tanks for various petroleum products, including diesel fuel and gasoline. Redevelopment plans proposed by 2747-87 Park Boulevard, LLC, include the demolition of an existing building and construction of a three-story Research and Development building and associated subsurface parking structures, paving, and landscaping. Redevelopment of the Site included the demolition of an existing one-story office building and the construction of a new three-story office building with a subterranean parking structure. To mitigate the potential of vapor intrusion of volatile organic compounds associated with a regional COE groundwater plume, the redevelopment incorporated a vapor intrusion mitigation system (VIMS) that included ventilated subterranean parking using the heating, ventilation, and air conditioning (HVAC) system and confirmation soil vapor and indoor air monitoring.

**Facility Status: Open - Inactive**  
Status Date: 01/09/2020  
Global Id: SL0608561372  
Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
Lead Agency Case Number: Not reported  
Latitude: 37.4277062689775  
Longitude: -122.138850688934  
Case Type: Cleanup Program Site  
Case Worker: RWP  
Local Agency: SANTA CLARA VALLEY WATER DISTRICT  
RB Case Number: 43s0230  
File Location: Regional Board  
Potential Media Affected: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Trichloroethylene (TCE)  
Site History: Since the construction of the Oregon Expressway Underpass (OEU), the OEU kept dry and passable by a 24/7 actively pumping gallery of extraction wells known as the OEU subdrain. The cone of depression effectively captured the entire COE plume and the pumped/extracted water has been directed to the nearest creek without pre-treatment until 1995. A groundwater treatment system was then installed to treat the groundwater before discharging to the creek.

Potential Media Affect: Aquifer used for drinking water supply, Soil  
Potential Contaminants of Concern: Benzene, Toluene, Xylene, Gasoline  
Site History: June 1984: The 2 USTs were discovered during property development soil testing activity. Spill/ Release filed with Water Board.  
November 1984: The USTs and dispensers were removed by Woodward-Clyde subcontractor to Howard White Construction. Two UST removal confirmation soil samples showed 100 and 2,500 ppm TPH-gasoline.  
January 30, 1985: Woodward-Clyde conducted a gasoline boring investigation (8 exploratory borings with soil and grab groundwater

samples). Free product was noted in several borings and a monitoring well. The DEH does not have reports of free product removal or the site redevelopment activities during this time. April 19, 1985: Water Board directive letter to install monitoring wells and associated correspondence with Page Mill - Park Company. June 1985: Two site monitoring wells installed by Woodward-Clyde and Pitcher Drilling. June 1985 and December 1985: Groundwater sampling events of 2 site monitoring wells. Between December 1985 and December 2010, no sampling or assessment activities were conducted. December 3, 2010: DEH letter requesting additional site assessment. May 24, 2011: Groundwater monitoring of 2 site wells and one downgradient offsite well. August 23, 2013: An 8-hour indoor air event was conducted; no COCs were detected (Attachment 6). August 23, 2013; Stellar Environmental conducts an exploratory boring site investigation and evaluation. August 2014: Stellar Environmental Solutions prepares an in-situ remedial product injection workplan: submitted and approved by DEH September 2014. October 20, 2015: pre-remedial injection quarterly groundwater monitoring of 2 site wells. October 27-28, 2014: remedial in-situ product injection implemented by Stellar Environmental Solutions. January 8, 2015: post-remedial injection quarterly groundwater monitoring of 2 site wells. April 2015: post-remediation quarterly groundwater monitoring of 2 site wells and one downgradient offsite well.

Case Type: Cleanup Program Site  
Case Worker: RWP  
Local Agency: Not reported  
RB Case Number: 43S1107  
File Location: Regional Board  
Potential Media Affected: Soil, Soil Vapor  
Potential Contaminants of Concern: \* Chlorinated Hydrocarbons, Arsenic, Waste Oil / Motor / Hydraulic / Lubricating  
  
Site History: Limited soil investigations indicates limited chlorinated volatile organic compounds (CVOCs) and petroleum hydrocarbon (PHC) contamination probably originating from prior industrial site use. Groundwater contamination probably may have originated from off-site HP/Varian sources within the COE plume. However, elevated chlorinated volatile organic compounds (CVOCs) in soil vapor under the northeastern half of the property indicate potential vadose zone CVOc sources in that area. During excavation for building footings, PHC contamination associated with several underground storage tanks (USTs) was discovered in the central portion of the property. A followup investigation defined and excavated the soil-PHCs and groundwater-PHCs were defined to within property boundaries. The proposed remedy was excavation and disposal that was completed to accommodate underground parking for the building. The building has been constructed with potential IA VI mitigated through the vapor intrusion mitigation system (VIMS) consisting of a vapor barrier plus a subslab ventilation system. Indoor air testing has been conducted to verify that the VIMS is operating as designed and the results indicate a mix of indoor sources with low level VI. The Regional Water Board required a workplan to obtain more reliable SV-CVOC data than the riser-based data that has been submitted for the past several years. More reliable SV data is needed to allow us to better evaluate VI. So the originally expected closure date may get extended pending results of the workplan implementation.

CA BOND EXP. PLAN:  
 Responsible Party: TIER 3 (MINIMUM HAZARD THRESHOLD SITE) REPORT  
 Project Revenue Source Company: Not reported  
 Project Revenue Source Addr: Not reported  
 Project Revenue Source City,St,Zip: Not reported  
 Project Revenue Source Desc: Not reported  
 Site Description: A ditch adjacent to an auto body shop located at the above address was identified by the Department as being contaminated with an oily black material containing lead. It is suspected that this material accumulated in the ditch from runoff at the auto body shop location. Subsequent to discovery, the area containing the ditch was graded and paved with asphalt. An auto dealership is now located on the site of the former ditch.  
 Hazardous Waste Desc: Analysis of the oily material indicated the presence of petroleum products and moderate concentrations of lead.  
 Threat To Public Health & Env: Not reported  
 Site Activity Status: As a Tier 3 site, this site will be listed annually in this report. If the asphalt cap is removed and the property is proposed for development for other usage, DHS may order that some additional abatement be conducted.

result of manufacturing electronic equipment at the Site. Chemicals of concern are mostly volatile organic compounds (VOCs) such as trichloroethene (TCE), tetrachloroethene (PCE), trichloroethane (TCA), and dichloroethene (DCE). The Regional Water Quality Control Board (RWQCB) has been the lead oversight agency since 1989. DTSC issued a closure certification for the hazardous waste management units at the site on June 10, 1994. The Site is subject to Site Cleanup Requirements as outlined in Order No. 94-130 issued by RWQCB on September 21, 1994. There is a Covenant and Environmental Restriction of Property recorded for the Site between RWQCB and Agilent Technologies restricting the usage of the Site to non-sensitive usage, and ensuring that none of the remediation or monitoring systems are disturbed. Soil remediation began in 1986, consisting of soil vapor extraction and excavation of contaminated soils. RWQCB acknowledged that the final soil cleanup standards had been met on January 30, 2008. RWQCB acknowledged that there was no threat of vapor intrusion for building occupants, and that there was no threat to short- or long-term human health in the surrounding study area. Groundwater remediation is ongoing at the Site, with performance monitoring for the effectiveness of ongoing enhanced in situ bioremediation.

Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 06/14/1993  
Comments: The agenda from a meeting that Hewlett-Packard held with DTSC. The purpose of the meeting was to update DTSC on HP's recent activities regarding their Interim Status Document (ISD) permit and to obtain DTSC's concurrence of their approach to obtain final ISD termination. The agenda reviewed: the permitting history of the facility at 395 Page Mill Road between 1981 and 1993; the status of the ISD regulated units as of June 2, 1993; and HP's plan for going forward.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Correspondence  
Completed Date: 06/10/1994  
Comments: A correspondence from DTSC to Hewlett-Packard stating that DTSC had reviewed the closure plan dated March 28, 1994 and the certification of closure for HP's 395 Page Mill Road facility. DTSC determined that the closure plan and certification were acceptable, and that the Interim Status Document for the facility was no longer in effect as of June 10, 1994. A copy of the March 28, 1994 revised closure plan referenced in the closure certification letter could not be found in DTSC's files when the site screening was performed.

Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE)

Site History: This site is part of the COE Study Area - bounded by California, Olive, and Emerson Streets - that includes HP 640 PMR (MSCA site) and Varian 601 California. As part of the dual phase extraction (DPE) system GWET was shut down after reaching asymptotic groundwater-CVOC levels in 2001. Subsequent In-Situ Chemical Oxidation (ISCO) began late 2007 when groundwater CVOC levels in well RW-5 were still peaking at over 800 parts per billion (ppb). ISCO baseline groundwater sampling indicated that well OB11-2 - that had not been sampled since 1997 - contained PCE at 120,000 ppb. Subsequent ISCO injections reduced PCE levels below 50 ppb that rebounded to over 1,000 ppb by the next ISCO monitoring event. When elevated groundwater-PCE levels were noted in OB11-2, the Water Board required a workplan to evaluate potential vapor intrusion assessment that was reviewed and approved in January 2008. The COE site-wide IA VI has been completed and there were no exceedances of the indoor air ESL in the breathing zone.

 Case Worker: MBR  
 Local Agency: Not reported  
 RB Case Number: 43S1226  
 File Location: All Files are on GeoTracker or in the Local Agency Database  
 Potential Media Affected: Not reported  
 Potential Contaminants of Concern: Trichloroethylene (TCE), Lead, Diesel, Gasoline  
 Site History: June 11, 2019 - Background Site investigations have found various environmental concerns associated with onsite and offsite sources. Most significantly are the volatile organic compounds (VOCs) associated with a regional groundwater and soil gas plume of VOCs, known as the California-Olive-Emerson plume. Of the VOCs, trichloroethene (TCE) concentrations are the highest. The maximum detected concentration of TCE in groundwater was 71 micrograms per liter (a%g/L), which exceeds our commercial environmental screening level (ESL) of 7.5 a%g/L by approximately 10 times. The maximum TCE concentration in soil gas was 19,000 micrograms per cubic meter (a%g/m3), which exceeds our commercial ESL of 100 a%g/m3 by 190 times. The proposed redevelopment includes a subterranean parking garage, commercial space on the ground level floor, mixed commercial and residential space on the second floor, and residential space on the third floor. The subterranean parking structure will extend approximately 14.5 feet below ground surface (bgs). The proposed redevelopment includes a subterranean parking garage, commercial space on the ground level floor, mixed commercial and residential space on the second floor, and residential space on the third floor. The subterranean parking structure will extend approximately 14.5 feet below ground surface (bgs). Groundwater data collected from well F41A1 at 2577 El Camino Real, approximately 650 feet to the southwest, show groundwater seasonally varying from approximately 17 to 20 feet bgs.

Potential Media Affected: Contaminated Surface / Structure, Indoor Air, Other Groundwater (uses other than drinking water), Soil, Soil Vapor  
Potential Contaminants of Concern: Trichloroethylene (TCE)  
Site History: Based on information presented in the May 17, 2012, Phase 1 Environmental Site Assessment, Green Mountain Reality is planning to redevelop the Site with a mixed-use (retail, commercial, and residential) structure. The proposed structure will be three stories above ground with one level below ground for parking. The Site is located within the California Olive Emerson (COE) Study Area, with is characterized with contaminated groundwater of various volatile organic compounds (VOCs) from several upgradient sites including former Hewlett Packard 640 Page Mill Road, former Varian 601 California Avenue, and former Hewlett Packard, 395 Page Mill Road. Analysis of groundwater in the Site vicinity show trichloroethene (TCE) concentrations ranging, generally, from 50 to 130 micrograms per liter (ug/L).

Local Agency: Not reported  
RB Case Number: 43S1150  
File Location: Regional Board  
Potential Media Affected: Soil, Soil Vapor  
Potential Contaminants of Concern: Trichloroethylene (TCE)  
Site History: The project is a redevelopment property within the COE plume with underlying groundwater probably impacted by the upgradient HP/Varian source properties. Elevated SV-TCE levels in the corner of the property overlying the COE plume prompted the developer to construct the building with a vapor intrusion mitigation system (VIMS) and water barrier. Post-mitigation IA testing verified that the VIMS is working as designed.

 Lead Agency: SAN FRANCISCO BAY RWQCB (REGION 2)  
 Lead Agency Case Number: Not reported  
 Latitude: 37.423955  
 Longitude: -122.144545  
 Case Type: Cleanup Program Site  
 Case Worker: CH  
 Local Agency: Not reported  
 RB Case Number: 43S1212  
 File Location: All Files are on GeoTracker or in the Local Agency Database  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil Vapor  
 Potential Contaminants of Concern: Trichloroethylene (TCE)  
 Site History: The site is owned by Leland Stanford Junior University Board of Trustees. The site has been redeveloped with a subterranean garage and office space above by the ground lessee, Sand Hill Property Company of Palo Alto (SHPDM, LLC). The bottom of the garage floor slab is anticipated to be 8 feet below grade (fbg). The site is located within the a regional groundwater plume from Varian Medical Systems (Varian) and Hewlett Packard superfund site (HP). The plume is referred to as the California-Olive-Emerson (named for the streets) or COE plume. Multiple lines of evidence, including soil gas, groundwater, and indoor air sample data collected on this property for the Varian or HP sites, demonstrate that engineering controls will be necessary to mitigate indoor air issues at this facility. Groundwater flow is presumed to be towards the northeast and depth to first encountered groundwater in the area is between 15 and 30 fbg. There are two groundwater monitoring wells on the subject property (V-9 and V-9X) that are part of ongoing monitoring plan for HP and Varian sites. The main chemicals observed in the wells are TCE, DCE, TCA and other volatile organic compounds. Indoor air monitoring was conducted within the first floor and garage areas sometime before June 3, 2014 and again on July 11, 2014. Levels of TCE were not detected within occupied offices on the first floor, but were detected above acceptable health screening levels within the garage, the elevator shaft, and the electrical equipment room within the garage. Based on the initial results, a memorandum from Melanie Morash of US EPA Region 9 to Mr. Deaton and Ms. Olivier dated June 3,

MAP FINDINGS

**SAND HILL PROPERTIES (Continued)**

**S11977537**

2014 recommended operation of ventilation fans in the garage during weekday working hours and on weekends as necessary. The reported levels of TCE from the July 11 sampling were 9.4 "g/m% in the garage and 130 "g/m% in the electrical storage room. It was determined the ventilation fans within the garage area should be operated during weekday working hours and on weekends as necessary. Additionally, the vapor intrusion risk should be evaluated as part of any renovations or new building construction and passive and active mitigation measures should be considered. Current Status: SHPDM LLC has submitted a vapor intrusion mitigation system design plan (VIMS) and it was approved by the Regional Water Board on July 20, 2017. The VIMS will consist of a sub-slab vapor venting system and a vapor barrier. A construction completion report will be submitted after installation and testing of the VIMS is complete and will include a VIMS operation and maintenance plan. As of March 2020, construction is almost complete pending final inspections.

RB Case Number: 19-048  
Local Agency: SANTA CLARA COUNTY LOP  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S3W12E01f  
Potential Media Affect: Other Groundwater (uses other than drinking water), Soil  
Potential Contaminants of Concern: Gasoline  
Site History:

1983 In January, eight monitoring wells (MW-1 through MW-8) were installed to approximately 30 feet below grade. No soil samples were collected from the well borings. No groundwater monitoring data has been reported for monitoring wells MW-1 through MW-8 from January 1983 until February 1990. 1987 In January, one 550 gallon waste oil underground storage tank (UST) was removed and replaced with one 550 gallon double walled waste oil tank. 16 cubic yards of TPH-impacted soil was transported by Crosby & Overton to Chemical Waste Management facility in Kettlemen Hills for disposal. Three soil samples were collected from the UST excavation. TPH as oil and grease were detected at concentrations of 806 mg/kg and 8 mg/kg in samples collected from 6.5 feet bgs and 13 feet bgs, respectively. 1990 In, April, seven inches of separate phase hydrocarbon was discovered in MW-8, located next to the dispenser islands. 1991 In July, six borings were drilled onsite and converted to monitoring wells (MW-9 and MW-10), and four monitoring wells (MW-11- through MW-14) were installed offsite. Vadose wells V-1 and V-2 were installed onsite and well MW-3 was reconstructed for aquifer testing. 1.75 gallons of separate phase hydrocarbons (SPH) was bailed out of MW-6 and MW-8. 1992 In May, a groundwater extraction (GWE) program was initiated. The GWE program consisted of pneumatic fluid pumps and extraction wells E- 1 through E- 4. Extracted water was treated by carbon absorption prior to discharge to the sanitary sewer. The GWE system was shut down in March 1996 and restarted December 1998 to control migration of impacted groundwater. GWE operation was discontinued in August 2007. The GWE system extracted 3.64 million gallons of groundwater and removed 55 pounds of petroleum hydrocarbons as gasoline, 2.82 pounds of benzene and 20 pounds of MTBE. In June, a soil vapor extraction (SVE) system started operation at the site. The vacuum blowers were connected to wells and MW-1, MW-4, MW-8, V-1, V-2, and E-4. The vapors were discharged directly to the atmosphere.

The SVE system operated through October 1995. 1994 In April, one offsite monitoring well (MW-15) was installed to a depth of 35 feet below grade, converted monitoring well MW-5 to extraction well E- 4, and drilled soil boring B-7 to approximately 35 feet below grade. 1998 In March and June, elevated concentrations of MTBE (47,000 ug/L to 280,000 ug/L) were detected in onsite groundwater monitoring and extraction wells. 1999-2000 From August 1999 to March 2000, 16 borings were drilled (GP-1 through GP-16), and one groundwater monitoring well (MM-9d) was installed to 48 feet below grade (fbg). The soil borings were advanced to depths of between 36 fbg and 44 fbg, and depth discrete groundwater samples were collected from two water bearing zones. 2001 In October, a CAP was submitted recommending continuing and expanding GWE and implementing short-term SVE. A water well survey was conducted and found 31 active and abandoned groundwater monitoring wells within and \\\% mile radius of the site. Only one well owned by the City of Palo Alto is an active water supply well and is 850 feet deep. 2003 In February, a groundwater extraction well pair (E-6 and E-6B) were installed. Four soil borings GP-17 through GP-21 were drilled off-site. The borings where advanced to depths of 23 to 27 feet below grade and depth-discrete groundwater samples were collected from the two water bearing zones. 2005 In February, four shallow soil samples (D-1 through D-4) were collected beneath each of the four former product dispensers during station upgrades. The analytical results of soil samples are summarized in Attachment 3. In April, 23.45 tons of soil was excavated from the dispenser islands and off-hauled to Kettlemen Hills disposal facility. In addition, 15.1 tons of pea gravel was off-hauled to Forward Landfill in Manteca, California. 2006 In June, one 550 gallon dual wall fiberglass waste oil UST was removed one soil sample was collected at 12 feet below grade from the bottom of the UST excavation. 2007 Eight monitoring wells and five extraction wells were removed from the site groundwater monitoring program. 2007-2013 Quarterly or semi-annual groundwater monitoring was performed.

**Violations:**

Site ID: 141401  
Site Name: PALO ALTO SHELL  
Violation Date: 10-08-2015  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment..

Violation Notes: Oil was noted in the secondary containment of the oil storage container. If containment is to be provided, it should be kept clear of oil. PLEASE HAVE OIL REMOVED AT TIME OF NEXT ROUTINE OIL PICK UP.

Eval Date: 05-10-2016  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: Onsite to oversee functional testing of liquid/containment sensors in newly installed system. Latham Zubillaga holds current ICC and Veeder Root certifications. The following sensors were tested and shown to provide audible and visual alarms: 87 STP sump - L1 87 Fill sump - L2 91 STP sump - L3 91 Fill sump - L4 Diesel STP sump - L5 Diesel Fill sump - L6 87 STP sump annular - L9 87 Fill sump annular- L10 91 STP sump annular - L11 91 Fill sump annular- L12 Diesel STP sump annular - L13 Diesel Fill sump annular- L14 87 tank annular - L23 (both high and low liquid alarms) Diesel/91 tank annular - L24 (both high and low liquid alarms) Spill buckets were tested for one hour. All three buckets showed no loss of liquid (as measured and visually confirmed in sump). System was ELD tested on 5/5/16 by CGRS using the Iota VaporTite V005 test methodology by technician Sergio Nunez. All three UST systems were shown to "pass" the ELD testing. Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Lead Agency Case Number: Not reported  
 Latitude: 37.4231564549483  
 Longitude: -122.146275043488  
 Case Type: Cleanup Program Site  
 Case Worker: RWP  
 Local Agency: SANTA CLARA VALLEY WATER DISTRICT  
 RB Case Number: 43S0188  
 File Location: Regional Board  
 Potential Media Affected: Other Groundwater (uses other than drinking water), Soil  
 Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Trichloroethylene (TCE)  
 Site History: The Varian site is a non-Superfund SCP site located upgradient from and contributing to the COE plume - that includes the Hewlett Packard 395 and 640 Page Mill Road (PMR) sites. The Varian site is located northwest of and adjacent to the 640 PMR site. Periodic IA sampling by the present occupants indicates that indoor air contaminants are below levels of concern. A deed restriction prohibits the use of groundwater for drinking water and excavation without notifying the Water Board. Varian conducted remedial actions at the site including:  
 - Soil excavation of the on-site dry well source in 1990 - On-site soil vapor extraction for a few years - On- and off-site groundwater extraction from 1987 until 2003. - On-site In-situ chemical oxidation (ISCO) for the last several years After several years of in-situ chemical oxidation (ISCO), TCE DNAPL conditions persist in the courtyard area through the present time. Varian conducted additional RI in preparation for changing the remedy from ISCO to enhanced reductive dechlorination (ERD). The Water Board reviewed and approved a pilot study workplan for ERD and issued an approval letter. The pilot study and followup results indicated that ERD may be selected as the final remedy

Completed Date: 06/23/2017  
Comments: The Intevac/EO Sensors, Inc site is owned by Stanford University. General Electric conducted research and manufactured electron tubes and other devices at the site from 1954 to 1966. Varian Associates Electro-Optical Sensors Division began producing night vision products at the site in 1967. Varian sold the operations to Intevac in 1991, where they operated until 1996. The site was redeveloped in 1996 and an office building was constructed on the site. The site is a part of the California-Olive-Emerson study area of Palo Alto, and located adjacent to the 640 Page Mill Road HP Superfund Site. trichloroethylene (TCE), 1,1,1-trichloroethane, 1,1-dichloroethylene, and 1,1-dichloroethane have been detected in groundwater. Of the chlorinated VOCs that were detected in groundwater, TCE was the most widely distributed and detected at the highest concentrations. The site has been under the oversight of Regional Water Quality Control Board (RWQCB) since the 1980s. There is ongoing groundwater remediation under RWQCB's oversight.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 05-23-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Facility is a single-garage auto shop that does auto service but no bodywork or painting. Facility generates the following wastes: used oil, used antifreeze, oily rags (commercially laundered), used oil and gasoline filters, spent batteries (core exchange, none on-site at the time of inspection), non-empty aerosol cans (none on-site or in trash), and oily absorbent (none on-site). Facility does not generate the following waste streams: brake fluid, parts washing solution, spent gasoline, or oily water. Employees receive regular hazardous waste training through tailgate meetings and indoor waste containers are managed as point-of-generation. Fire extinguishers are annually serviced, spill kit is available, and emergency aisle space is adequate. Inspection covered waste storage area and service areas in garage, outdoor underground used oil tank, shipping container, trash cans and dumpsters, review of bills of lading for rags and batteries, and consolidated manifests for [Truncated]

Violations:

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 04-26-2018  
Citation: HSC 6.75 25299.30-25299.34 - California Health and Safety Code, Chapter 6.75, Section(s) 25299.30-25299.34  
Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.  
Violation Notes: Returned to compliance on 04/30/2018. Facility does not have an updated CFO letter for the current fiscal year.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: UST  
Violation Source: CERS

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 04-27-2017  
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)  
Violation Description: Failure to maintain records of repairs, lining, and upgrades on site, or off site if approved by the CUPA, for the life of the UST.  
Violation Notes: Returned to compliance on 04/30/2018. The facility has had numerous repairs and maintenance activities conducted on the UST system within the past year, including the replacement of a 91 STP sump sensor on 6/25/2016, replacement of the 91 turbine, replacement of a valve on the 87-main turbine, and replacement of the sump top covers to prevent water infiltration. However, no maintenance records from the past 3 years are on-site and available for review.

Violation Source: CERS

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 04-30-2015  
Citation: 23 CCR 16 2712(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(f)  
Violation Description: Failure to implement the corrections specified in the inspection report within 30 calendar days of receiving an inspection report from either the local agency or the special inspector.  
Violation Notes: Returned to compliance on 05/10/2016.

The facility did not submit responses to the 2013 and 2014 inspections detailing the corrective actions taken to resolve the observed violations. Complete the Corrective Actions sections and sign the certification section and return the forms with the response to this Notice of Inspection (NOI). Copies of the 2013 and 2014 NOIs are attached to this report. Ensure all violations are corrected in a timely manner and a response is submitted in the proper timeframe.

**S101594385**

Citation: 23 CCR 16 2715 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715

Violation Description: Failure to comply with one or more of the designated operator monthly inspection requirements: failed to inspect the monthly alarm history report; attach a copy of the alarm history; failed to inspect for the presence of liquid or debris in the spill container/spill bucket and under dispenser containment; failed to inspect the under dispenser containment to ensure that monitoring equipment is placed in the proper position; failure to inspect for liquid or debris in the containment sump where an alarm occurred or for which there is no record of a service visit; or failure to check that all testing and maintenance has been completed and documented.

Violation Notes: Returned to compliance on 05/10/2016.

The DUSTO

inspections did not properly record the last secondary containment date (logged 6/28/2014 when the testing was done 6/16/2014) and did not address the alarms that happened during the testing in the July report. Ensure the DUSTO has access to the testing reports so they may make accurate account of all testing and alarm situations.

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 04-30-2015  
Citation: HSC 6.7 25284 - California Health and Safety Code, Chapter 6.7, Section(s) 25284

Violation Description: Failure to obtain and maintain a valid operation permit from the CUPA.  
Violation Notes: Returned to compliance on 05/10/2016.

Facility's

permit expired February 28,2014. You must submit all the required documentation to the California Environmental Reporting System (CERS) and clear all outstanding violations by returning properly completed Notice of Inspection (NOI) forms.

Violation Division: Santa Clara County Environmental Health  
Violation Program: UST  
Violation Source: CERS

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 04-29-2016  
Citation: 23 CCR 16 2712(b) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)

Violation Description: Failure to maintain leak detection alarm logs and/or maintain records of appropriate follow-up actions

Violation Notes: Returned to compliance on 04/30/2018. THE MONITORING SYSTEM, SPILL BUCKET AND SECONDARY CONTAINMENT TESTING REPORTS WERE NOT AVAILABLE FOR REVIEW AS REQUIRED. THIS VIOLATION WAS CITED LAST YEAR AND HAS NOT BEEN CORRECTED. ENSURE ALL RECORDS ARE READILY AVAILABLE FOR ON-SITE REVIEW BY THE DUSTO AND DURING THE MONITORING SYSTEM AND SECONDARY CONTAINMENT TESTING.

Violation Date: 04-27-2017  
Citation: HSC 6.7 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25290.1(c), 25290.2(c), 25291(a)(2), 25292(e)  
Violation Description: Failure to maintain secondary containment (e.g. failure of secondary containment testing).  
Violation Notes: Returned to compliance on 04/30/2018. The two Veeder-Root/Gilbarco dispensers are fitted with conversion frames, but portions of product piping and the fuel filters hang outside of the UDC pans. The product piping overhangs the electrical conduit troughs in both dispensers and the filters overhang the dispenser mount troughs along the long edges of the UDC pan. If a spill or a leak was to occur from the portion of the product piping or filters not overhanging the UDC pan, the leak would not be channeled into the existing UDC pans. Under dispenser containment must provide containment for any potential leaks within the dispenser. Repair, modify or replace UDCs and/or dispensers as necessary to provide adequate protection for any potential leaks within the dispensers. Apply for a permit from HMCD, if necessary.  
Violation Division: Santa Clara County Environmental Health

Site ID: 79764  
Site Name: VALERO OF PALO ALTO  
Violation Date: 05-01-2014  
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)  
Violation Description: Failure of sensor to be located in the proper position/location.  
Violation Notes: Returned to compliance on 05/01/2014. 87Siphon fill sensor did not alarm upon introduction to water. Sensor tapped to loosen float and retested-- operated as designed at that point. 91 STP sensor located on wrong side of sump- furthest from pipe. Sensor was relocated during inspection to pipe side of sump. NO CORRECTIVE ACTION REQUIRED, REPAIRED DURING INSPECTON.

Site Name: VALERO OF PALO ALTO  
Violation Date: 04-27-2017  
Citation: 23 CCR 16 2641(a) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2641(a)  
Violation Description: Failure of leak detection equipment to be located such that equipment is capable of detecting a leak at the earliest possible opportunity.  
Violation Notes: Returned to compliance on 04/28/2017. The 87-siphon STP sump's liquid sensor was observed on the opposite side of the rounded sump bottom than the product piping. At this location, a leak would not be detected at the earliest moment of opportunity. The sensor was re-located to the side of the rounded sump bottom nearest the product piping during inspection. This violation was corrected at the time of inspection. NO FURTHER ACTION IS NEEDED.

Violation Date: 04-29-2016  
Citation: 23 CCR 16 2631.1 - California Code of Regulations, Title 23, Chapter 16, Section(s) 2631.1  
Violation Description: UST system is not made of or lined with materials that are compatible with the substance stored in the underground storage tank system.  
Violation Notes: Returned to compliance on 04/30/2018. OBSERVED APPROXIMATELY TWO INCHES OF FUEL AT THE BOTTOM OF THE 87-1 STP SUMP ALONG THE OUTER EDGES WHEN THE UST SERVICE TECHNICIAN FIRST REMOVED THE LID. THERE WAS NOT ENOUGH FUEL COLLECTED TO MAKE THE SENSOR MONITORING THE SUMP TRIGGER AN ALARM. THE FUEL MAY BE COMING FROM REGULATED PIPING PRIMARY CONTAINMENT OR ANOTHER SOURCE SUCH AS LEAKING FROM WHEN THE LINE LEAK DETECTOR. THE SERVICE TECHNICIAN REMOVE THE FUEL WITH A FUEL ONLY ABSORBENT PAD. WITHIN 30 DAYS TROUBLESHOOT TO DETERMINE WHERE THE FUEL IS COMING FROM AND REPORT THE FINDINGS TO OUR OFFICE. NOTE THAT A PERMIT FROM OUR OFFICE MAY BE REQUIRED FOR REPAIR WORK. \*DISREGARD THE CORRECTIVE TEXT BELOW THAT SAYS TO IMMEDIATELY CEASE STORING HAZARDOUS MATERIALS IN THE UST.

Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,- 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: . The Overfill Prevention Option in use is Probes and A/V, with single wall vent lines and ball float inspected. NOTE: This Inspection is past due. The next 36 month inspection shall be performed on or before October 2021.

Eval Notes:	On-site to witness the annual monitoring system certification and spill bucket test performed by Mr. Nikola Zagorov (all certifications current) of ECO-Check Compliance. Site is monitored by a Veeder-Root TLS 350 panel and sensors (sumps and under dispenser containment -208, fuel annulars -407, waste oil annular -344). Sensors were tested in water and provided audible and visible alarms. Positive shutdown performed as required. Fail safe (sensor out, power out) functioned properly. The electronic line leak detectors were tested at dispenser 1/2 and detected a simulated 3.0 GPH leak at 10 psi and shut down the turbines. Automatic Tank Gauge (ATG) is used for overfill protection and provided alarms that are audible and visible from the fill point. The spill buckets are contained in the sumps and were hydrostatically tested for one hour with no loss. The emergency shut off was tested and shut down the turbines. NOTE: The 87 fill sump sensor did not work when [Truncated]

Eval Notes: Onsite to oversee annual UST system monitoring certification conducted by ECO-CHEK. Technician Nik Zagorov has current ICC (5/30/15), Veeder Root (12/13/14) and VMI (3/18/16) certifications. The following sensors provided alarms when tested: 87 Master, 87 siphon, 91, used oil annular sensors 87 Master, 87 siphon, 91, used oil fill sump sensors 87 Master, 87 siphon, 91 STP sump sensors. These sensors also provided shutdown of the turbines. UDC 1/2 and 3/4 sensors. These sensors also provided shutdown of turbines. PLLDs were able to detect and provide shutdown of turbines with 3 gph/10psi simulated leak. ATGs for overfill prevention provided audible and visual alarms at the point of fill. Spill buckets held water for one hour without loss. --noted 87Master fill bucket has drain valve stuck in closed position. Site owner indicated that he has hand pump and capability to empty bucket after fuel drops. Reviewed the following: DUSTO Monthly inspection [Truncated]

slurry extraction vessels (primary and polish)and an ozone generator/treatment system. Extraction vessels are set to run in sequence (primary then through polish to discharge) -When system is serviced for removal of slurry, primary treat tank is emptied, and valves changed to make "polish" tank the new primary treatment tank. Discharged to storm water system under NPDES permit. Had water reuse system, has been abandoned and reuse tank is marked "empty" Carbon slurry is removed approximately every 4 months as a F002 waste. System is operated by Stantec as contractor for HP. Have specific site emergency plan/health and safety management [Truncated]

**CA BOND EXP. PLAN:**  
 Responsible Party:      RWQCB REFERRAL SITE  
 Project Revenue Source Company:      Not reported  
 Project Revenue Source Addr:      Not reported  
 Project Revenue Source City,St,Zip:      Not reported  
 Project Revenue Source Desc:      This site is proposed for the National Priority List. The RWQCB will continue to have lead responsibility for monitoring the RP's remedial actions. Until such time as the RWQCB refers the site to DHS for follow-up using Bond funds, no money will be budgeted from the fund for this site.

**Site Description:**  
 The Hewlett-Packard Optoelectric Division (OED) is located on a 10-acre site in Palo Alto on the western edge of the Santa Clara Valley. The surrounding land use is both industrial and commercial.

**Hazardous Waste Desc:**  
 Historic releases of 20 chemicals into the soil and ground water onsite have been observed. Waste chemicals including 1,1,1-trichloroethane (TCA) trichloroethylene (TCE), toluene, acetone, xylene, alcohols and other chemicals used in the manufacturing process at the facility were stored in a tank. The concentration of chemicals are highest in the areas immediately below the tank's former location, particularly in the unsaturated zone.

**Threat To Public Health & Env:**  
 There are six municipal standby wells as close as 4,000 feet from the site and several private wells located within a 3-mile radius. The standby wells serve a population of approximately 59,000 people during emergency situations. TCE has been detected in the ground water at concentrations as high as 340,000 parts per billion (ppb). Acetone and isopropyl (IPA) were also detected at high levels in the wells near the former tank area. The highest concentration detected in wells located approximately 800 feet down gradient from the source was 3800 ppb TCE in samples taken in November, 1985.

**Site Activity Status:**  
 The subsurface soil and ground water at this site are contaminated with organic solvents believed to have leaked from an underground storage tank installed in 1967. The tank and 100 cubic yards of contaminated soil (to a maximum depth of 12.5 feet) were excavated and disposed of offsite in July, 1981. The RWQCB adopted site cleanup requirements for Hewlett-Packard on October 21, 1987.

 Potential Media Affect: Other Groundwater (uses other than drinking water)  
 Potential Contaminants of Concern: Trichloroethylene (TCE), Diesel, Gasoline  
 Site History: The site is located within the California-Olive-Emerson (COE) regional plume of VOC affected groundwater. Chlorinated VOCs (CVOCs) associated with this regional plume, (including trichloroethene [(TCE)], have been found in soil and/or groundwater samples at low concentrations at the site at concentrations generally less than 5 a%g/L. Numerous shallow groundwater monitoring wells associated with monitoring and evaluation of the COE plume are located at on- and off-site locations in the vicinity of the former UST area. Typical groundwater depths (ranging between 13 to 17 feet bgs) and flow directions in the vicinity is understood (both within the greater COE study area as well as at the site), and based on groundwater elevation contour maps prepared by others groundwater flow direction at the subject site is north to northeast, towards San Francisco Bay (located approximately 2 miles northeast of the site). The former UST

MAP FINDINGS

**EL CAMINO CENTER (Continued)**

**S111711442**

area is located in the southern portion of the main parking lot of the El Camino Center, a commercial retail shopping center. Prior to removal of the two diesel tanks (including one 1,000-gallon UST and one 1,150-gallon tank), groundwater samples were collected in 2010 in the vicinity of the former USTs. The groundwater sample results indicated low-to-moderate concentrations of total petroleum hydrocarbons quantified as gasoline (TPHg) and diesel (TPHd), and a general absence of benzene, toluene, ethylbenzene, and xylenes (BTEX) in groundwater in the near vicinity of the tanks. TPHg and TPHd were detected in grab groundwater samples at maximum concentrations of 2.1 and 24.3 milligrams per liter (mg/L), respectively; in contrast, relatively low maximum concentrations of benzene and ethylbenzene were detected at 9.4 and 11.4 micrograms per liter (µg/L); respectively. All other petroleum hydrocarbon-related constituents were detected below San Francisco Bay Regional Water Quality Control Board (RWQCB) Environmental Screening Levels (ESLs). The two former USTs were removed under permit with oversight by the DEH on October 18, 2011. During the tank excavation activities, approximately 750 cubic yards of hydrocarbon affected soil were removed and disposed off-site. Prior to backfilling, approximately 500 pounds of oxygen-releasing compound (ORC) was distributed across the bottom of the excavation to assist in the degradation of residual hydrocarbons in the subsurface. Surface conditions at the site consisted of an asphalt-cement parking lot, with little base rock material beneath. During previous investigations, subsurface soils encountered beneath the parking lot were predominantly clays to the maximum depth explored (28 feet bgs). A sand lense, ranging from 1 to 7 feet thick, is present at approximately 15 feet bgs. Saturated soil was encountered in each boring at varying depths ranging from approximately 15 feet to 25 feet bgs. Static depth to water was measured in most borings at approximately 16 feet bgs. Numerous shallow groundwater monitoring wells associated with monitoring and evaluation of the COE plume are located at on- and off-site locations in the vicinity of the former UST area. Based on current and historical groundwater elevation measurements and contour maps, groundwater flow direction at the subject site is north-to-northeast. Based on the most recent groundwater data, the extent of residual petroleum hydrocarbons in groundwater appears to be generally controlled by lateral groundwater flow in the downgradient north-to-northeast groundwater flow direction. Dissolved residual petroleum hydrocarbons are being depleted via natural attenuation, advection, and diffusion. The highest concentrations of petroleum hydrocarbon residuals in groundwater appear to be in the near vicinity of the former tanks, represented by groundwater samples GW-4 and GW-8, and the downgradient extent of the residual hydrocarbon plume (less than 150 feet in length) is delineated by samples GW-1 and GW-2. The maximum concentrations of TPHd are less than the maximum groundwater concentrations detected during the 2010 investigation (24.3 mg/L); collected during the source removal actions (tank removal and overexcavations) in 2011.

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Sub Area Name: Not reported  
Completed Document Type: Human Exposure Controlled  
Completed Date: 09/27/2012  
Comments: The Human Health Environmental Indicators document was completed, and DTSC has determined that current human exposures are under control.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Groundwater Migration Controlled  
Completed Date: 06/30/2014  
Comments: DTSC completed the Migration of Contaminated Groundwater Under Control Environmental Indicator (EI) for the Communications Power Industries (CPI) site and concluded "Yes" that it is controlled. CPI has operated at Building 2 within the Varian Site, which itself is a site where DTSC is overseeing cleanup activities. DTSC issued a Consent Order for the Varian Site in 1989. During the Varian Site characterization, the Building 2 CPI site was NOT identified as a source of contamination. Operation and maintenance is currently ongoing at the Varian Site under DTSC oversight. CPI still operates a facility in Building 2, with units under Permit-by-Rule.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Amendment - Order/Agreement  
Completed Date: 06/29/2006  
Comments: Agreement was amendment to include submittals in electronic format.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Amendment - Order/Agreement  
Completed Date: 12/11/1998  
Comments: Amendment to consent order per chapter 6.5 transition.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Notice of Exemption  
Completed Date: 04/04/2007  
Comments: Notice of exemption approved for modification to the final remedy from groundwater extraction and treatment to injection of sodium permanganate.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 08/21/1997  
Comments: Amendment to consent order to add O & M of groundwater extraction and treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 08/21/1997  
Comments: Certified Site. Amended Order to include operation and maintenance of the remedial system. Groundwater extraction and treatment will continue in accordance with the approved operation and maintenance plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 01/05/1995  
Comments: Negative declaration approved for RAP.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 12/10/1991  
Comments: Completed negative declaration for Interim Removal Action of groundwater extraction and treatment in building 1 area.

Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 08/15/1991  
Comments: Completed CEQA Negative Declaration for soil vapor extraction in building 3 area.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Consent Order  
Completed Date: 05/30/1989  
Comments: Consent Order signed with Varian Associates to investigate and remediate soil and groundwater at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 09/25/2006  
Comments: Five-Year Review determined that treatment system continues to achieve plume containment but many areas remain above cleanup goals. Based on the in-situ chemical oxidation pilot study results, site wide in-situ chemical oxidation is recommended.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 09/06/1996  
Comments: Approved O&M Plan for groundwater system. Treatment system incorporates instrumentation for automatic operation which requires only periodic observation and maintenance.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 04/12/2002  
Comments: Completed Five-Year Review. Based on this review, Varian plans to conduct an in-situ pilot test in 2003 to evaluate techniques to reduce the high concentrations of PCE which remain in the groundwater.  
Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/11/1996  
Comments: Completed FRA for the site which includes groundwater extraction and treatment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 07/02/1995  
Comments: Approved Design documents for groundwater treatment system.

impacted with benzene, toluene, ethylbenzene, xylenes (BTEX) and total extractable petroleum hydrocarbons (TPH-G) which were detected near Building 3 onsite. Chemical concentrations have been reduced below remedial action objectives for the site. Verification sampling indicated that the SVE was successful in remediating affected soils. SVE system was shut down and is being removed from the site. The system extracted a cumulative mass of about 15,352 pounds of TPH-G from February 1992 through December 1993.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan  
Completed Date: 01/05/1995  
Comments: Approved RAP for groundwater. Implementation expected to be completed by April 1996. SVE and treatment system with activated carbon adsorption was selected for soil. For groundwater treatment, using an air-stripper was selected and treated water will be used on-site for irrigation to the extent possible. Remainder will be discharged to storm drain. CEQA Negative Declaration completed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 06/20/1994  
Comments: Completed RIFS for Soil Operable Unit which found that there are no soil sources that would affect the groundwater quality except at building 4.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 03/31/1994  
Comments: Completed RIFS for Groundwater Operable Unit which found shallow groundwater is contaminated with VOCs.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 06/12/1992  
Comments: Groundwater extraction and treatment system with granular activated carbon was installed in building 1 area.

Completed Date: 10/27/2003  
 Comments: The pilot study results showed VOCs in groundwater can be reduced by injecting sodium permanganate.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Pilot/Treatability Study Report  
 Completed Date: 03/14/2005  
 Comments: In-situ chemical oxidation pilot study has successfully reduced the concentrations of VOCs in the immediate area of the permanganate injection.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 10/09/2007  
 Comments: Groundwater concentrations are consistent with historical results.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 11/07/2008  
 Comments: Sodium permanganate injections have resulted in VOC concentration reductions in localized areas surrounding most injection wells. Sampling also demonstrate that injections did not mobilize hexavalent chromium at concentrations of concern.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 05/18/2010  
 Comments: Report approved 5/18/2010. Reduced monitoring for the first of the two yearly monitoring events to only 12 wells to be sampled and analyzed for VOCs. However, if resultant data collected from future monitoring events yield increasing concentrations or indicate possible plume migration, DTSC may require that monitoring be modified with regard to chemicals to be analyzed and/or frequency of monitoring events.

Completed Document Type: Work Notice  
Completed Date: 11/10/2014  
Comments: Work Notice detailing Enhanced In-Situ Bioremediation Pilot Study fieldwork published and mailed to local community on 11/10/2014.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Financial Assurance Documentation  
Completed Date: 11/20/2015  
Comments: Financial Assurance Mechanism accepted by DTSC Financial Responsibility Unit on 11-19-2015.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Pilot/Treatability Study Report  
Completed Date: 02/24/2017  
Comments: The Report describes the enhanced in situ bioremediation (EISB) pilot study implementation and associated performance and vapor intrusion monitoring results. Limited data from the initial injection indicates EISB may be effective at the site; however, some monitoring locations during the initial injections may have been too far from injection points to properly evaluate pilot study progress. Proposed additional fieldwork includes expansion of the pilot study injection area, as well as installation of additional monitoring wells in both the Building 1 and Building 4 areas. DTSC approved the additional,

Completed Document Type: Work Notice  
Completed Date: 09/01/2017  
Comments: A Work Notice was printed and distributed and mailed on 09/01/2017 to inform the community of injection fieldwork to begin at site on 09/11/2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 03/26/2018  
Comments: On February 13, 2018, air sampling was conducted indoors and outdoors at Building 4 to monitor the previously-approved enhanced in situ bioremediation injections. Elevated levels of trichloroethene (TCE) were reported in indoor air sampled at location IA4-4 (hallway adjacent to loading dock) at 11 micrograms per cubic meter (ug/m3), which exceeded the USEPA Accelerated Response Action Level of 8 ug/m3. This location was resampled on March 22, 2018, following the same procedures implemented on February 13th. The sample was analyzed using EPA Method TO-15; however, TCE was not detected during this second event. Other volatile organic compounds were detected during the second event at concentrations similar to those detected during the Feb 13th event. No known sources were identified near the sampling location, nor usage of TCE was documented at the site; therefore, the Feb 13th detection of TCE was deemed anomalous. Indoor air will be sampled again in August 2018.

Completed Document Type: Consent Order  
Completed Date: 05/30/1989  
Comments: Consent Order signed with Varian Associates to investigate and remediate soil and groundwater at the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 09/25/2006  
Comments: Five-Year Review determined that treatment system continues to achieve plume containment but many areas remain above cleanup goals. Based on the in-situ chemical oxidation pilot study results, site wide in-situ chemical oxidation is recommended.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 09/06/1996  
Comments: Approved O&M Plan for groundwater system. Treatment system incorporates instrumentation for automatic operation which requires only periodic observation and maintenance.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 04/12/2002

MAP FINDINGS

**VARIAN (Continued)**

**S100833273**

Comments: Completed Five-Year Review. Based on this review, Varian plans to conduct an in-situ pilot test in 2003 to evaluate techniques to reduce the high concentrations of PCE which remain in the groundwater. Not reported

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 06/11/1996  
Comments: Completed FRA for the site which includes groundwater extraction and treatment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Design/Implementation Workplan  
Completed Date: 07/02/1995  
Comments: Approved Design documents for groundwater treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 04/06/1995  
Comments: Completed RA. Soil Vapor Extraction (SVE) system treated soils impacted with benzene, toluene, ethylbenzene, xylenes (BTEX) and total extractable petroleum hydrocarbons (TPH-G) which were detected near Building 3 onsite. Chemical concentrations have been reduced below remedial action objectives for the site. Verification sampling indicated that the SVE was successful in remediating affected soils. SVE system was shut down and is being removed from the site. The system extracted a cumulative mass of about 15,352 pounds of TPH-G from February 1992 through December 1993.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan  
Completed Date: 01/05/1995  
Comments: Approved RAP for groundwater. Implementation expected to be completed by April 1996. SVE and treatment system with activated carbon adsorption was selected for soil. For groundwater treatment, using an air-stripper was selected and treated water will be used on-site for irrigation to the extent possible. Remainder will be discharged to storm drain. CEQA Negative Declaration completed.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 06/20/1994  
Comments: Completed RIFS for Soil Operable Unit which found that there are no soil sources that would affect the groundwater quality except at building 4.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 03/31/1994  
Comments: Completed RIFS for Groundwater Operable Unit which found shallow groundwater is contaminated with VOCs.

Completed Sub Area Name: Not reported  
Completed Document Type: Financial Assurance Documentation  
Completed Date: 11/20/2015  
Comments: Financial Assurance Mechanism accepted by DTSC Financial Responsibility Unit on 11-19-2015.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Pilot/Treatability Study Report  
Completed Date: 02/24/2017  
Comments: The Report describes the enhanced in situ bioremediation (EISB) pilot study implementation and associated performance and vapor intrusion monitoring results. Limited data from the initial injection indicates EISB may be effective at the site; however, some monitoring locations during the initial injections may have been too far from injection points to properly evaluate pilot study progress. Proposed additional fieldwork includes expansion of the pilot study injection area, as well as installation of additional monitoring wells in both the Building 1 and Building 4 areas. DTSC approved the additional, recommended fieldwork.

Completed Date: 09/01/2017  
Comments: A Work Notice was printed and distributed and mailed on 09/01/2017 to inform the community of injection fieldwork to begin at site on 09/11/2017.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Other Report  
Completed Date: 03/26/2018  
Comments: On February 13, 2018, air sampling was conducted indoors and outdoors at Building 4 to monitor the previously-approved enhanced in situ bioremediation injections. Elevated levels of trichloroethene (TCE) were reported in indoor air sampled at location IA4-4 (hallway adjacent to loading dock) at 11 micrograms per cubic meter (ug/m3), which exceeded the USEPA Accelerated Response Action Level of 8 ug/m3. This location was resampled on March 22, 2018, following the same procedures implemented on February 13th. The sample was analyzed

**VARIAN (Continued)**

**S100833273**

using EPA Method TO-15; however, TCE was not detected during this second event. Other volatile organic compounds were detected during the second event at concentrations similar to those detected during the Feb 13th event. No known sources were identified near the sampling location, nor usage of TCE was documented at the site; therefore, the Feb 13th detection of TCE was deemed anomalous. Indoor air will be sampled again in August 2018.

**CA BOND EXP. PLAN:**

Responsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: The RPs will be issued a remedial action order and are expected to comply with it. DHS has budgeted \$50,000 to provide for oversight and monitoring of investigation and cleanup efforts. DHS will recover 100 percent of direct costs plus staff costs and overhead related to the project. The responsible parties will pay all costs associated with remedial investigations and cleanup activities.  
Site Description: Varian, an electronics manufacturing firm, has occupied the site since 1952. Investigations were initiated by Varian as part of a regional investigation in the Stanford Research Park.  
Hazardous Waste Desc: Investigations are ongoing in three areas of the facility. At the north end of the site, chlorinated solvents, including up to 1,500 parts per billion (ppb) of trichloroethene (TCE) have been detected in shallow ground water. Gasoline contamination has been found in soil and shallow ground water near Building 4. Investigations at an adjacent site, Aydin, revealed TCE at up to 1,400 ppb and DCE an 190 ppb in shallow ground water at the south end of the Varian facility.  
Threat To Public Health & Env: Contamination of shallow ground water poses a potential threat to deeper aquifers currently used as backup municipal water supplies. There are three municipal wells within a two mile radius of the site.  
Site Activity Status: DHS will prepare a consent order or a remedial action order requiring further investigation and site cleanup. Varian is continuing its investigation work and is expected to comply with the order.

Description:	RP states that an auxiliary tank overfilled causing a release of waste water from the tank that contained waste water from a plating operation. The release entered the storm drain system. The waste water contains low levels, 9ppm Copper and 4ppm Nickel, of contaminated water. The storm drain feeds into Matadero Creek. They are getting very low readings at the creek, less than .1 ppm copper and less than .05 ppm Nickel.

Approximately 60 gallons was contained in the concrete area with the storage tank, while approximately 20 gallons was released onto the asphalt by the tanker truck. No waterway was impacted. At the request of the fire department approximately 300 personnel were evacuated from the building. The exterior release has been cleaned up and they are working on the containment area.

CERS Description: Chemical Storage Facilities

Violations:  
Site ID: 390435  
Site Name: COMMUNICATIONS & POWER INDUSTRIES  
Violation Date: 10-11-2017  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.  
Violation Notes: Returned to compliance on 11/15/2017. Building 2: (Basement) Sodium hydroxide was observed to be leaking from the union connecting the sodium hydroxide container to FTU-002 and crystallizing on the container and piping run. Ensure that the crystallized sodium hydroxide is removed and properly disposed of and the container and system is maintained in a manner that prevents an unauthorized release of hazardous waste. Hazardous Waste Central Accumulation Area: ("Lack Pack"Locker) Saturated absorbent from a previous spill of hazardous waste was observed on the floor of the locker. Ensure saturated absorbent is immediately collected and managed as hazardous waste.

Violation Notes: handled; 9) Prior to placing a new tank system or component in use, an independent, qualified installation inspector or an independent, qualified, professional engineer, registered in California, either of whom is trained and experienced in the proper installation of tank systems, shall inspect the system or component for the presence of any of the following items and document in writing the results of the inspection: A) Weld cracks or breaks; B) scrapes of protective coatings; C) corrosion; D) any structural damage or inadequate construction or installation such as cracks, punctures, damaged fittings. All discrepancies shall be documented in the assessment and remedied before the tank system  
Returned to compliance on 10/21/2015. Prior tank assessment was conducted April 2010. Reassessment of system is required every 5 years. Please ensure that assessment includes all waste tanks, including used oil tanks, condensate holding tanks, cyanide holding tanks, and all waste treatment tanks.

Violation Notes: 8) A copy of documents related to the environmental investigation and any cleanup, abatement or other necessary remedial action taken; and 9) Documentation of any convictions, judgments, settlements, or orders resulting from any action by any local, State, or federal environmental or public health enforcement agency concerning the operation of the facility within the last three years, as the documents would be available under the California Public Records Act. Returned to compliance on 10/21/2015. System does not have a recorded record (operating log) of the quantity of waste treated in the unit. Totalizer quantities are not currently recorded during inspection rounds.

Eval Date: 09-22-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Lead condensate treatment system Walkthrough took place on 9/21/15 Notification of activities submitted on CERS 2/26/15. Reviewed and approved by HMCD 3/16/15. System is two tanks and two containers for treatment of water (cooling system condensate) which is high in lead. Condensate is routed to hold tank (with second tank as "overflow") then through two resin packed columns for metal removal. The following PBR related documentation was reviewed: Closure plan (2009) Closure cost estimate (updated 2015) Closure financial mechanism (insurance policy, issued 4/1/15 with term of one year) Waste analysis plan (updated 5/2013) --Noted that frequency of sampling is recorded as "as required". Suggest changing to "with change of process" or specify a actual time frequency. Treatment tank/area inspection logs

Eval Date: 09-22-2015  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: Neutralization system Walkthrough took place on 9/21/15 Notification of activities submitted on CERS 2/26/15. Reviewed and approved by HMCD 3/16/15. System is a two-tank flow through waste water treatment system for the neutralization of non-metal bearing aqueous wastes from the plating shop. Tanks are gravity fed from T1 to T2, single walled. Tanks are in epoxy lined bermed area with liquid sensors at low spots in floor for release monitoring. Recommend that map posted on CERS be made more clear as to the locations of the systems. Cross hatched area makes map difficult to read. The following PBR related documentation was reviewed: Closure plan (2009) Closure cost estimate (updated 2015) Closure financial mechanism (insurance policy, issued 4/1/15 with term of one year) Waste analysis plan (updated 5/2013) --Noted that frequency of sampling is recorded as "as required". Suggest changing to "with change of process" or specify a actual time tank/area inspection [Truncated]

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: 1) Provide documentation that the secondary containment "vault" for the Patio Area - South Section has a capacity of 100 percent of the capacity of the largest tank within its boundary without including the curb with the fence opening near the clarifier [22CCR 66265.193(e)(2)(A)]. NOTE TO FACILITY: 1) If the 55 gallon drum in the plating shop area is used for cyanide-contaminated anode bag rinsing, ensure that it is labeled with the generator name, EPA ID Number, and FTU number [22CCR 67450.3(c)(7)]. 2) Observed that the Closure Plan refers to non-SW-846 standards for sampling analyses (e.g. EPA 150.1, E200.7). Strongly recommend amending Closure Plan to use SW-846 test methods to ensure all equipment and containment have been properly decontaminated [22CCR 67450.3(c)(8), 22CCR 67450.3(c)(11)(B)]. FTU 001 is used to treat metal-containing and cyanide-containing plating shop rinse waters and floor wastes and non-metal [Truncated]

Eval Notes: Walkthrough took place on 9/21/15 Notification of activities submitted on CERS 2/26/15. Reviewed and approved by HMCD 3/16/15. System is the flow through waste water treatment system which consists of cyanide destruction (two step) which is mixed with various metal bearing rinsewaters for removal of metals and pH adjustment. Drums are rinsed as additional influent to system. Resultant sludge is pressed to remove water. As a system that treats cyanide wastes, the additional requirements were confirmed: -cyanide plating area is equipped with dragout reduction drain racks between tanks and posted "dwell processes" to indicate drip, shake, spray rinse, etc.. - Cyanide specific training is provided and documented for plating room staff - Reviewed cyanide minimization using SB 14. Facility reported a reduction of 92% reduction in plating bath waste 2010-2014 and a 95% reduction in cyanide contaminated aqueous wastes 2010-2014 Recommend that map posted on CERS be made [Truncated]

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes:

UNRESOLVED ISSUE THAT REQUIRES FOLLOW-UP: 1) Provide documentation that the secondary containment "vault" for the lead-contaminated condensate collection tank is 100 percent of the capacity of the tank [22CCR 66265.193(e)(2)(A)]. FTU 003 is used to treat lead-containing condensate from the HVAC system. Per Mr. Dale, the condensate occasionally meets hazardous waste criteria by having lead concentrations in the 12-14ppm range. The lead condensate is automatically pumped into the lead condensate collection tank located next to the cyanide rinse and floor wash tanks behind the building. A second overflow tank (G lead condensate overflow tankG ) is located on the opposite side of the cyanide rinse and floor wash tanks. Any waste accumulation in the overflow tank would be metered into the main lead condensate collection tank. The lead condensate waste is then pumped from the collection tank into two ion exchange resin bottles, which are situated in series and located inside [Truncated]

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violation Description: Failure to submit and maintain complete and current Certification of Financial Responsibility or other mechanism of financial assurance.  
Violation Notes: The facility uses an annual insurance policy for financial responsibility. CERS has not been updated since 2016. An insurance policy effective through October 1, 2018 was observed on site. A new Certification of Financial Responsibility (CFR) must be submitted each year to update the insurance policy information. Submit a new CFR to CERS and ensure it is updated annually with the new insurance policy information.

Violation Date: 09-06-2019  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2  
Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months."  
Violation Notes: The spill bucket failed the hydrostatic test. The UST Service Technician determined that the drain valve was defective. Within 30 days retest the spill bucket and provide a copy of the test results to our office. Note: A repair permit is not needed to replace the drain valve but if a new spill bucket is needed you must obtain a repair permit from our office prior to replacement.

Hazardous Waste Summary:

- . Waste code: 122
- . Waste name: Alkaline solution without metals (pH > 12.5)
  
- . Waste code: 132
- . Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)
  
- . Waste code: 135
- . Waste name: Unspecified aqueous solution
  
- . Waste code: 141
- . Waste name: Off-specification, aged, or surplus inorganics
  
- . Waste code: 151
- . Waste name: Asbestos-containing waste
  
- . Waste code: 172
- . Waste name: Metal dust (see 121) and machining waste
  
- . Waste code: 181
- . Waste name: Other inorganic solid waste
  
- . Waste code: 214
- . Waste name: Unspecified solvent mixture
  
- . Waste code: 221
- . Waste name: Waste oil and mixed oil
  
- . Waste code: 231
- . Waste name: Pesticide rinse water
  
- . Waste code: 331
- . Waste name: Off-specification, aged, or surplus organics
  
- . Waste code: 343
- . Waste name: Unspecified organic liquid mixture
  
- . Waste code: 352
- . Waste name: Other organic solids
  
- . Waste code: 513
- . Waste name: Empty containers less than 30 gallons
  
- . Waste code: 551
- . Waste name: Laboratory waste chemicals
  
- . Waste code: 731

Completed Info:

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Plan  
Completed Date: 04/21/1995  
Comments: RAP - A Remedial action Plan was approved to address PCBs and organic solvents in both soil and groundwater. The RAP required partial excavation and capping of soils and enhancement of the existing groundwater extraction and treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Investigation / Feasibility Study  
Completed Date: 09/16/1994  
Comments: RIFS - Elevated levels of polychlorinated biphenyls (PCBs) were found to a depth of 60 feet. Trichloroethane, dichloroethane, trichloroethylene, perchloroethylene and chlorobenzene were detected at the Site in soil and groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Removal Action Completion Report  
Completed Date: 11/16/1992  
Comments: RA - SOIL - Removal actions were conducted to excavate and dispose offsite soils contaminated with PCBs, organic compounds and total petroleum hydrocarbons.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Participation Plan / Community Relations Plan

Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 12/05/2007  
Comments: Annual Inspection Report indicates that the existing system and the cap continue to be protective of human health and the environment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation & Maintenance Order/Agreement  
Completed Date: 09/25/1997  
Comments: An enforceable agreement was entered into by DTSC and Aydin to provide a financial assurance for the implementation of the O&M Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction  
Completed Date: 06/27/1997  
Comments: A Deed Restriction was recorded in June 1997 limiting land use to commercial.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 09/30/1997  
Comments: Certification - Ongoing operation and maintenance consists of the continued extraction and treatment of the groundwater and periodic inspections of the cap.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 04/21/1995  
Comments: A Negative Declaration was approved for the RAP.

**1000255235**

Completed Date: 04/28/2008  
Comments: Data is within historical trends, except for TPH which is higher. This could be caused by the shutdown of the system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 11/25/2008  
Comments: Report indicates data within historical trend. RP will evaluate sampling procedures and will submit evaluation to DTSC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 07/31/2009  
Comments: Groundwater monitoring changes have been approved. Groundwater data is within historical ranges.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 10/05/2009  
Comments: Report approved with some comments and the following additional monitoring: Based on the revised MCL for 1,2,4-trichlorobenzene (1,2,4-TCB), and the concentrations of this compound in wells W6R and W6A1, DTSC requires that wells W2, W3, and W5R be analyzed for 1,2,4-TCB during the next groundwater monitoring event.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 06/18/2014  
Comments: The Report presents the results of monitoring both groundwater quality and groundwater remediation at the Site during the period January through December 2011. The Report also presents a summary and evaluation of groundwater monitoring and remediation activities that were performed between 2007 and 2011. Groundwater extraction and treatment is continuing at the Site. The concentrations of chlorinated volatile organic compounds (i.e. 1,1-DCA, TCE) are either declining or consistent with historical results, thus showing plume stability and prevention of off-site migration.

Completed Area Name: PROJECT WIDE

report to include request to reduce monitoring and reporting requirements.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Operations and Maintenance Report  
 Completed Date: 06/30/2011  
 Comments: Report approved in same letter as 2 other reports; minor comments provided by GSU to be addressed in future reports. Report results consistent with historical site activity. Next monitoring report to include request to reduce monitoring and reporting requirements.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Operations and Maintenance Report  
 Completed Date: 06/08/2012  
 Comments: Groundwater extraction and treatment to continue at site; reporting requirements changed from semiannual to annual, with a sampling data memo to be submitted in lieu of semiannual report. Groundwater sampling will continue to be performed quarterly.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Public Notice  
 Completed Date: 12/02/2014  
 Comments: A public notice announcing the approval of the Five-Year Review Report was published in the Palo Alto Daily on 11/21/2014.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 08/01/2013  
 Comments: Report indicates that groundwater monitoring results consistent with historical results. Cap in good condition.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 02/28/2014  
 Comments: The report presents the results of groundwater remediation system monitoring and sampling performed during the period January through December 2012. The groundwater pump and treat system operated normally during the reporting period. Contaminant concentrations in groundwater were consistent with historical data.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Monitoring Report  
 Completed Date: 12/06/2013  
 Comments: The groundwater extraction and treatment system is in working order; the concentrations of contaminants (i.e. volatile organic compounds) are consistent with historical results. The responsible party/consultant may request a reduction of 1,4-dioxane monitoring in future, eliminating monitoring of wells that have consistently resulted in non-detection of the chemical.

Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 11/06/2014  
Comments: The 2014 Annual Groundwater Monitoring Report results were consistent with historical groundwater sampling results. Due to accidental lab spiking of 1,4-dioxane, the results of sample analysis for said constituent in the lab report were determined not to be representative of concentrations found in site groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 04/08/2014  
Comments: The report presents the results of groundwater remediation system monitoring and sampling performed during the period January through December 2013. Groundwater sampling results were consistent with historic groundwater sampling results.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 12/28/2018  
Comments: The Five-Year Review was conducted to review the effectiveness of the remedial actions. The Five-Year Review Report presents a summary and evaluation of groundwater monitoring and remediation activities that were performed at the Site between 2012 and 2016. Ongoing groundwater extraction and treatment, and groundwater monitoring will continue for the treatment and monitoring of groundwater impacted by volatile organic compounds such as trichloroethylene (TCE) and its daughter products. Additional site characterization of groundwater and subsurface conditions will be performed to in order to allow for further enhancement of groundwater remediation activities. The site cap is in good condition, and is currently used as a parking lot for the Hewlett Packard campus.

Completed Document Type: Amendment - Order/Agreement  
Completed Date: 02/08/1999  
Comments: The O&M Agreement was amended based on the requirements of sections 25187, 58009 and 58010 of the Health and Safety Code.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 12/05/2007  
Comments: Annual Inspection Report indicates that the existing system and the cap continue to be protective of human health and the environment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operation & Maintenance Order/Agreement  
Completed Date: 09/25/1997  
Comments: An enforceable agreement was entered into by DTSC and Aydin to implement the O&M plan and for Aydin to provide a financial assurance for the implementation of the O&M Plan.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction  
Completed Date: 06/27/1997  
Comments: A Deed Restriction was recorded in June 1997 limiting land use to commercial.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Certification  
Completed Date: 09/30/1997  
Comments: Certification - Ongoing operation and maintenance consists of the continued extraction and treatment of the groundwater and periodic inspections of the cap.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: CEQA - Initial Study/ Neg. Declaration  
Completed Date: 04/21/1995  
Comments: A Negative Declaration was approved for the RAP.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Amendment - Order/Agreement  
Completed Date: 08/20/1993  
Comments: An Amended Order was issued on August 20, 1993 to include Stanford

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Land Use Restriction - Site Inspection/Visit  
Completed Date: 10/20/2005  
Comments: An annual site inspection was conducted.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 11/28/2007  
Comments: The cap and the existing treatment system continue to be effective in protecting the public and the environment.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 06/18/2002  
Comments: A Five Year Review was conducted to assess the effectiveness of the groundwater monitoring, extraction and treatment system and found the system to effectively contain offsite migration.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Plan  
Completed Date: 05/15/1997  
Comments: O&M Plan for the soil cap and the groundwater monitoring and extraction treatment system.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Remedial Action Completion Report  
Completed Date: 11/15/1996  
Comments: RMDL - The soil remediation consisted of partial excavation and installation of a multi-layer cap where cleanup levels could not be achieved. The groundwater treatment system installed in 1986 was enhanced.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 11/25/2008  
Comments: Report indicates data within historical trend. RP will evaluate sampling procedures and will submit evaluation to DTSC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 07/31/2009  
Comments: Groundwater monitoring changes have been approved. Groundwater data is within historical ranges.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 10/05/2009  
Comments: Report approved with some comments and the following additional monitoring: Based on the revised MCL for 1,2,4-trichlorobenzene (1,2,4-TCB), and the concentrations of this compound in wells W6R and W6A1, DTSC requires that wells W2, W3, and W5R be analyzed for 1,2,4-TCB during the next groundwater monitoring event.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 06/18/2014  
Comments: The Report presents the results of monitoring both groundwater quality and groundwater remediation at the Site during the period January through December 2011. The Report also presents a summary and evaluation of groundwater monitoring and remediation activities that were performed between 2007 and 2011. Groundwater extraction and treatment is continuing at the Site. The concentrations of chlorinated volatile organic compounds (i.e. 1,1-DCA, TCE) are either declining or consistent with historical results, thus showing plume stability and prevention of off-site migration.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 06/30/2011  
Comments: Report approved in same letter as 2 other reports; minor comments provided by GSU to be addressed in future reports. Next monitoring report to include request to reduce monitoring and reporting requirements.

Completed Document Type: Operations and Maintenance Report  
Completed Date: 06/30/2011  
Comments: Report approved in same letter as 2 other reports; minor comments provided by GSU to be addressed in future reports. Report results consistent with historical site activity. Next monitoring report to include request to reduce monitoring and reporting requirements.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Operations and Maintenance Report  
Completed Date: 06/08/2012  
Comments: Groundwater extraction and treatment to continue at site; reporting requirements changed from semiannual to annual, with a sampling data memo to be submitted in lieu of semiannual report. Groundwater sampling will continue to be performed quarterly.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 12/02/2014  
Comments: A public notice announcing the approval of the Five-Year Review Report was published in the Palo Alto Daily on 11/21/2014.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 08/01/2013  
Comments: Report indicates that groundwater monitoring results consistent with historical results. Cap in good condition.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 02/28/2014  
Comments: The report presents the results of groundwater remediation system monitoring and sampling performed during the period January through December 2012. The groundwater pump and treat system operated normally during the reporting period. Contaminant concentrations in groundwater were consistent with historical data.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 12/06/2013  
Comments: The groundwater extraction and treatment system is in working order; the concentrations of contaminants (i.e. volatile organic compounds) are consistent with historical results. The responsible party/consultant may request a reduction of 1,4-dioxane monitoring in future, eliminating monitoring of wells that have consistently resulted in non-detection of the chemical.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 11/06/2014  
Comments: The 2014 Annual Groundwater Monitoring Report results were consistent

with historical groundwater sampling results. Due to accidental lab spiking of 1,4-dioxane, the results of sample analysis for said constituent in the lab report were determined not to be representative of concentrations found in site groundwater.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Monitoring Report  
Completed Date: 04/08/2014  
Comments: The report presents the results of groundwater remediation system monitoring and sampling performed during the period January through December 2013. Groundwater sampling results were consistent with historic groundwater sampling results.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: 5 Year Review Reports  
Completed Date: 12/28/2018  
Comments: The Five-Year Review was conducted to review the effectiveness of the remedial actions. The Five-Year Review Report presents a summary and evaluation of groundwater monitoring and remediation activities that were performed at the Site between 2012 and 2016. Ongoing groundwater extraction and treatment, and groundwater monitoring will continue for the treatment and monitoring of groundwater impacted by volatile organic compounds such as trichloroethylene (TCE) and its daughter products. Additional site characterization of groundwater and subsurface conditions will be performed to in order to allow for further enhancement of groundwater remediation activities. The site cap is in good condition, and is currently used as a parking lot for the Hewlett Packard campus.

**Environmental Interest/Information System:**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CA BOND EXP. PLAN:**

Reponsible Party: RESPONSIBLE PARTY-LEAD SITE CLEANUP WORKPLAN  
Project Revenue Source Company: Not reported  
Project Revenue Source Addr: Not reported  
Project Revenue Source City,St,Zip: Not reported  
Project Revenue Source Desc: Aydin is complying with an order issued by the Department. DHS has budgeted \$100,000 for related costs to the project. The responsible parties will pay all costs associated with site cleanup.  
Site Description: A manufacturer and repair firm for transformers and other electrical power equipment formerly operated on this site.  
Hazardous Waste Desc: Polychlorinated biphenyls (PCBs) have been detected in soils and volatile organic compounds (VOCs) have been detected in soil and ground water at this site.  
Threat To Public Health & Env: The volatile organic compounds in the ground water have migrated offsite. There are 29 water supply wells within a three mile radius of the site which could be impacted by contaminants.  
Site Activity Status: The property is owned by Stanford University. Hewlett-Packard took over the lease in 1983. The site has been fenced and posted. A remedial action order has been issued to Aydin and Stanford University. Aydin Energy has nearly completed

Completed Date: 07/29/2013  
Comments: No visual impacts, odors, or photo-ionization detector detections were observed in the soil. No chemical of concern concentrations were detected above site screening criteria in soil. No visual or odor detections were reported in the groundwater samples. Only benzene was detected at concentrations exceeding groundwater screening level. Benzene, freon, 1, 3-butadiene, and trichloroethylene (TCE) were detected in the soil gas; however, only benzene and 1,3-butadiene exceeded the screening level. DTSC determined that the human health risk for these chemicals of concern, based on the maximum detected concentrations is approximately  $1 \times 10^{-6}$ , well within the acceptable risk range for residential land use.

Completed Info:

Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Site Screening
Completed Date:	03/30/1993
Comments:	No further action per EPA's preliminary assessment for this site only determined that its hazard ranking score (hrs) would not admit it into the National Priority List (NPL). Recommendation by dtsc on reevaluation of the site reflects DTSC's own criteria. This 3.6 acre currently active site, mostly paved or landscaped, has been the site of several interests associated with research and development in food, medicine, genetics and biology. Through various leases and subleases, Alza has been the lessee since 1972 and sole operator at the site since March 1986. Sampling since 1987 indicated that surface soil was contaminated with chloroform (520 mg/kg), carbon tetrachloride (250 mg/kg), freon (1.1 mg/kg) and DCE (120mg/kg) and groundwater in the uppermost interconnected aquifers was contaminated with chloroform (4100 mg/kg), carbon tetrachloride and TCE. Bore hole soil samples also detected presence of chloroform (2000mg/kg). Soil gas and groundwater treatment systems have been in operation at site under oversight of Regional Water Quality Control Board. Deeper potable aquifer of wide use as drinking water source has not been impacted. This site screening was based in part on the CERCLA screening site inspection report prepared by Ecology and Environment for USEPA (contained in DTSC file). DTSC files were reviewed. REQCB and county files were not located or reviewed. Extent of soil contamination was about 200 sf. groundwater contamination extends at least 200 feet from soil contamination area and one well screened in deeper aquifer detected 1.5 mg/l of chloroform.

**S103982804**

Completed Date: 08/01/2013  
Comments: DTSC executed a VCA to review existing sampling data (PEA) for the Site to determine if further action and/or clean up is required.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 12/13/2013  
Comments: Based upon the review and evaluation of the site environmental assessment and investigation reports, DTSC concluded the Site would not pose a significant threat to human health or the environment under residential land use and determined that no further action is necessary with respect to investigation of hazardous substances releases at the Site. However, an investigation that has been performed on the adjacent 1601 California Avenue property indicates a release of hazardous substances may have occurred on the property. Further investigation is to be conducted and may indicate additional sampling is needed to determine the extent that TCE soil gas and groundwater plumes have migrated from the 1601 California Avenue property.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Application  
Completed Date: 08/01/2013  
Comments: DSTC executed a VCA to review existing sampling data (PEA) for the Site to determine if further action and/or clean up is required.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 12/13/2013  
Comments: Based upon the review and evaluation of the site environmental assessment and investigation reports, DTSC concluded the Site would not pose a significant threat to human health or the environment under residential land use and determined that no further action is necessary with respect to investigation of hazardous substances releases at the Site. However, an investigation that has been performed on the adjacent 1601 California Avenue property indicates a release of hazardous substances may have occurred on the property. Further investigation is to be conducted and may indicate additional sampling is needed to determine the extent that TCE soil gas and groundwater plumes have migrated from the 1601 California Avenue property.

**Completed Info:**

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Risk Assessment Report  
Completed Date: 04/04/2016  
Comments: The Supplemental Investigation and Risk Assessment indicates there will not be a significant risk to future site users (residents, site visitors), based on the proposed redevelopment layout. Future residences are not to be constructed over the area where a soil vapor plume of trichloroethylene (TCE) remains in soil vapor at depths of greater than 25 feet below ground surface. Based on the proposed redevelopment plan, this area will be an open park space. Polychlorinated biphenyls in soil at concentrations above the residential screening level were excavated and removed from the site.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Preliminary Endangerment Assessment Report  
Completed Date: 01/29/2018  
Comments: The Preliminary Endangerment Assessment (PEA) Report provides historical and current information regarding environmental conditions at the Site, an evaluation of the potential risk to human health and the environment, and recommends additional measures to reduce the potential risk. No further action was determined to be needed for areas of the Site planned for construction of housing. Elevated concentrations of trichloroethylene were found in soil vapor in the discrete open park area (located in the center of the Site). The PEA Report recommends placing a land use covenant (LUC) on the discrete open park area to restrict and manage future land use. Stanford will enter into a LUC with DTSC, and provide protocols for the monitoring and management of the discrete open park area use in a Post Development Management Plan, which shall be reviewed and approved by DTSC.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Fact Sheets  
Completed Date: 05/13/2016  
Comments: Fact sheet detailing current status of project site: Supplemental Investigation and Risk Assessment has been approved by DTSC, which discusses the presence of trichloroethylene (TCE) in soil vapor and risk assessment findings.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Public Notice  
Completed Date: 02/21/2020  
Comments: Public Notice of announcement of the Land Use Covenant was published in the Palo Alto Weekly on February 21, 2020.

Completed Area Name: PROJECT WIDE  
Completed Sub Area Name: Not reported  
Completed Document Type: Technical Report

MAP FINDINGS

**FACILITY 12505-1 (Continued)**

**S100944536**

Completed Date: 07/01/2015  
 Comments: The report documents investigation and remediation activities that were performed to address the release of polychlorinated biphenyls (PCBs) reported by Hewlett Packard Scientific Instruments Division in 1987. More than 33,300 tons of PCB impacted soil was removed from the Site and disposed at permitted non-hazardous and hazardous waste landfills. The investigation and remediation activities documented in the report were performed prior to DTSC's involvement with the Site.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Technical Report  
 Completed Date: 12/01/2015  
 Comments: The document is an addendum to the previous report documenting investigation and remediation of soil impacted by polychlorinated biphenyls (PCBs). Additional excavation of PCB-impacted soil was completed on eastern boundary of the Site. This soil was not previously removed due to structural stability concerns related to an adjacent parking lot. DTSC did not oversee the additional soil removal.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Voluntary Cleanup Agreement  
 Completed Date: 08/19/2015  
 Comments: DTSC entered into a Voluntary Cleanup Agreement with the Board of Trustees of Leland Stanford Junior University, Office of Stanford Real Estate to review documentation of prior Site remediation and to oversee a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Correspondence  
 Completed Date: 03/18/2016  
 Comments: DTSC received questions and comments in letters and via email from the College Terrace Residents Association (CTRA) and the Center For Public Environmental Oversight (CPEO) on January 26, 2016. DTSC, in coordination with Stanford University and Haley & Aldrich, provided responses to CTRA's and CPEO's questions and comments via email on March 18, 2016.

Completed Area Name: PROJECT WIDE  
 Completed Sub Area Name: Not reported  
 Completed Document Type: Correspondence  
 Completed Date: 08/02/2017  
 Comments: DTSC letter to City of Palo Alto regarding site status. DTSC concurs that development and construction of planned housing can commence prior to public notice period of the site Preliminary Endangerment Assessment Report, as the Supplemental Investigation and Risk Assessment Report previously approved by DTSC concluded that 1) sufficient site characterization has been performed to define the nature and extent of contamination present at the site, and 2) there would be no significant risk to future residents based on the future development plans.

Description:	RP states that .25 cup of uraning dye was mixed with approx 1500 gallons of water to mitigate a grease blockage in a storm drain. The release is not contained and is traveling down the storm drain system which leads to Matadero Creek. The creek has not been impacted yet. Crews are in the process of diking off the storm drain to prevent the creek from being impacted.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## **STANDARD ENVIRONMENTAL RECORDS**

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/27/2020	Source: EPA
Date Data Arrived at EDR: 05/06/2020	Telephone: N/A
Date Made Active in Reports: 05/28/2020	Last EDR Contact: 08/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2020	Source: EPA
Date Data Arrived at EDR: 05/06/2020	Telephone: N/A
Date Made Active in Reports: 05/28/2020	Last EDR Contact: 08/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/12/2020
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2020

Telephone: 703-603-8704  
Last EDR Contact: 07/02/2020  
Next Scheduled EDR Contact: 10/12/2020  
Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2020  
Date Data Arrived at EDR: 05/06/2020  
Date Made Active in Reports: 05/28/2020

Last EDR Contact: 08/03/2020  
Next Scheduled EDR Contact: 10/26/2020  
Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 04/27/2020	Source: EPA
Date Data Arrived at EDR: 05/06/2020	Telephone: 800-424-9346
Date Made Active in Reports: 05/28/2020	Last EDR Contact: 08/03/2020
Number of Days to Update: 22	Next Scheduled EDR Contact: 10/26/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/23/2020	Source: EPA
Date Data Arrived at EDR: 03/25/2020	Telephone: 800-424-9346
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020

## ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

## RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/25/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

## ***Federal institutional controls / engineering controls registries***

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 05/15/2020	Source: Department of the Navy
Date Data Arrived at EDR: 05/19/2020	Telephone: 843-820-7326
Date Made Active in Reports: 06/18/2020	Last EDR Contact: 08/04/2020
Number of Days to Update: 30	Next Scheduled EDR Contact: 11/23/2020
	Data Release Frequency: Varies

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 02/13/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/20/2020	Telephone: 703-603-0695
Date Made Active in Reports: 05/15/2020	Last EDR Contact: 05/15/2020
Number of Days to Update: 85	Next Scheduled EDR Contact: 09/07/2020
	Data Release Frequency: Varies

### US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 02/13/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 02/20/2020	Telephone: 703-603-0695
Date Made Active in Reports: 05/15/2020	Last EDR Contact: 05/15/2020
Number of Days to Update: 85	Next Scheduled EDR Contact: 09/07/2020
	Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## **Federal ERNS list**

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 03/22/2020

Date Data Arrived at EDR: 03/24/2020

Date Made Active in Reports: 06/18/2020

Number of Days to Update: 86

Source: National Response Center, United States Coast Guard

Telephone: 202-267-2180

Last EDR Contact: 06/22/2020

Next Scheduled EDR Contact: 10/05/2020

Data Release Frequency: Quarterly

## **State- and tribal - equivalent NPL**

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 04/27/2020

Date Data Arrived at EDR: 04/28/2020

Date Made Active in Reports: 07/13/2020

Number of Days to Update: 76

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/27/2020

Next Scheduled EDR Contact: 11/09/2020

Data Release Frequency: Quarterly

## **State- and tribal - equivalent CERCLIS**

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 04/27/2020

Date Data Arrived at EDR: 04/28/2020

Date Made Active in Reports: 07/13/2020

Number of Days to Update: 76

Source: Department of Toxic Substances Control

Telephone: 916-323-3400

Last EDR Contact: 07/27/2020

Next Scheduled EDR Contact: 11/09/2020

Data Release Frequency: Quarterly

## **State and tribal landfill and/or solid waste disposal site lists**

SWF/LF (SWIS): Solid Waste Information System

Active, Closed and Inactive Landfills. SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills. These may be active or inactive facilities or open dumps that failed to meet RCRA Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 05/11/2020

Date Data Arrived at EDR: 05/12/2020

Date Made Active in Reports: 07/27/2020

Number of Days to Update: 76

Source: Department of Resources Recycling and Recovery

Telephone: 916-341-6320

Last EDR Contact: 08/10/2020

Next Scheduled EDR Contact: 11/23/2020

## ***State and tribal Brownfields sites***

### BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 03/23/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/24/2020	Telephone: 916-323-7905
Date Made Active in Reports: 06/05/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 73	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/01/2020	Source: Environmental Protection Agency

Number of Days to Update: 176	Next Scheduled EDR Contact: 11/09/2020
	Data Release Frequency: Varies

## Local Lists of Hazardous waste / Contaminated Sites

### US HIST CDL: National Clandestine Laboratory Register

A listing of clandestine drug lab locations that have been removed from the DEAs National Clandestine Laboratory Register.

Date of Government Version: 03/18/2020	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/19/2020	Telephone: 202-307-1000
Date Made Active in Reports: 06/09/2020	Last EDR Contact: 05/18/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/07/2020
	Data Release Frequency: No Update Planned

### HIST CAL-SITES: Calsites Database

The Calsites database contains potential or confirmed hazardous substance release properties. In 1996, California EPA reevaluated and significantly reduced the number of sites in the Calsites database. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

Date of Government Version: 08/08/2005	Source: Department of Toxic Substance Control
Date Data Arrived at EDR: 08/03/2006	Telephone: 916-323-3400
Date Made Active in Reports: 08/24/2006	Last EDR Contact: 02/23/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/25/2009
	Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 04/27/2020	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 04/28/2020	Telephone: 916-323-3400
Date Made Active in Reports: 07/13/2020	Last EDR Contact: 07/27/2020
Number of Days to Update: 76	Next Scheduled EDR Contact: 11/09/2020
	Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2019	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 05/28/2020	Telephone: 916-255-6504
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 07/09/2020
Number of Days to Update: 76	Next Scheduled EDR Contact: 10/19/2020
	Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995	Source: State Water Resources Control Board
Date Data Arrived at EDR: 08/30/1995	Telephone: 916-227-4364
Date Made Active in Reports: 09/26/1995	Last EDR Contact: 01/26/2009
Number of Days to Update: 27	Next Scheduled EDR Contact: 04/27/2009
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CERS HAZ WASTE: CERS HAZ WASTE

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, and RCRA LQ HW Generator programs.

Date of Government Version: 04/20/2020	Source: CalEPA
Date Data Arrived at EDR: 04/21/2020	Telephone: 916-323-2514
Date Made Active in Reports: 07/13/2020	Last EDR Contact: 07/21/2020
Number of Days to Update: 83	Next Scheduled EDR Contact: 11/02/2020
	Data Release Frequency: Quarterly

## US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/18/2020	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/19/2020	Telephone: 202-307-1000
Date Made Active in Reports: 06/09/2020	Last EDR Contact: 05/18/2020
Number of Days to Update: 82	Next Scheduled EDR Contact: 09/07/2020
	Data Release Frequency: Quarterly

## PFAS: PFAS Contamination Site Location Listing

A listing of PFAS contaminated sites included in the GeoTracker database.

Date of Government Version: 03/09/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 03/10/2020	Telephone: 866-480-1028
Date Made Active in Reports: 05/19/2020	Last EDR Contact: 06/09/2020
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/21/2020
	Data Release Frequency: Varies

## **Local Lists of Registered Storage Tanks**

### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

Date of Government Version: 06/01/1994	Source: State Water Resources Control Board
Date Data Arrived at EDR: 07/07/2005	Telephone: N/A
Date Made Active in Reports: 08/11/2005	Last EDR Contact: 06/03/2005
Number of Days to Update: 35	Next Scheduled EDR Contact: N/A

### DEED: Deed Restriction Listing

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## **Records of Emergency Release Reports**

### **HMIRS: Hazardous Materials Information Reporting System**

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 02/27/2020	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 03/24/2020	Telephone: 202-366-4555
Date Made Active in Reports: 06/18/2020	Last EDR Contact: 06/23/2020
Number of Days to Update: 86	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

### **CHMIRS: California Hazardous Material Incident Report System**

California Hazardous Material Incident Reporting System. CHMIRS contains information on reported hazardous material incidents (accidental releases or spills).

Date of Government Version: 03/31/2020	Source: Office of Emergency Services
Date Data Arrived at EDR: 04/21/2020	Telephone: 916-845-8400
Date Made Active in Reports: 07/09/2020	Last EDR Contact: 07/21/2020
Number of Days to Update: 79	Next Scheduled EDR Contact: 11/02/2020
	Data Release Frequency: Semi-Annually

### **LDS: Land Disposal Sites Listing (GEOTRACKER)**

Land Disposal sites (Landfills) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 05/13/2020	Source: State Water Quality Control Board
Date Data Arrived at EDR: 05/13/2020	Telephone: 866-480-1028
Date Made Active in Reports: 05/14/2020	Last EDR Contact: 06/09/2020
Number of Days to Update: 1	Next Scheduled EDR Contact: 09/21/2020
	Data Release Frequency: Quarterly

### **MCS: Military Cleanup Sites Listing (GEOTRACKER)**

Military sites (consisting of: Military UST sites; Military Privatized sites; and Military Cleanup sites [formerly known as DoD non UST]) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Date of Government Version: 05/13/2020	Source: State Water Resources Control Board
Date Data Arrived at EDR: 05/13/2020	Telephone: 866-480-1028
Date Made Active in Reports: 05/15/2020	Last EDR Contact: 06/09/2020
Number of Days to Update: 2	Next Scheduled EDR Contact: 09/21/2020
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012	Source: FirstSearch
Date Data Arrived at EDR: 01/03/2013	Telephone: N/A

Number of Days to Update: 50	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

## Other Ascertainable Records

### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/23/2020	Source: Environmental Protection Agency

Date Made Active in Reports: 05/21/2020	Last EDR Contact: 06/22/2020
Number of Days to Update: 57	Next Scheduled EDR Contact: 10/05/2020
	Data Release Frequency: Quarterly

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 05/13/2020	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 05/18/2020	Telephone: 202-528-4285
Date Made Active in Reports: 08/12/2020	Last EDR Contact: 08/13/2020
Number of Days to Update: 86	Next Scheduled EDR Contact: 11/30/2020
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 07/09/2020
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/19/2020
	Data Release Frequency: Semi-Annually

### FEDLAND: Federal and Indian Lands

Federally and Indian administrated lands of the United States. Lands included are administrated by: Army Corps of Engineers, Bureau of Reclamation, National Wild and Scenic River, National Wildlife Refuge, Public Domain Land, Wilderness, Wilderness Study Area, Wildlife Management Area, Bureau of Indian Affairs, Bureau of Land Management, Department of Justice, Forest Service, Fish and Wildlife Service, National Park Service.

Date of Government Version: 04/02/2018	Source: U.S. Geological Survey
Date Data Arrived at EDR: 04/11/2018	Telephone: 888-275-8747

Number of Days to Update: 574	Next Scheduled EDR Contact: 10/19/2020
	Data Release Frequency: N/A

### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017

Data Release Frequency: Annually

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Data Release Frequency: Varies

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995  
Date Data Arrived at EDR: 07/03/1995

## HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2019	Source: California Environmental Protection Agency

## WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

## CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

Date of Government Version: 04/30/2012	Source: Los Angeles County Department of Public Works
Date Data Arrived at EDR: 04/17/2019	Telephone: 626-458-6973

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

---

Hello Jaclyn,

The San Francisco Bay Regional Water Board received your August 19, 2020 file review request, which seeks records related to the property you described below.

Based on a thorough search, the San Francisco Bay Regional Water Board does not possess any records responsive to your request. I suggest please contact the local agency, Santa Clara County Health Department for any further information they may have.

Thank you,

Melinda Wong  
Management Services Division  
San Francisco Bay Water Board

**From:** Jaclyn Catania <[jcatania@ekiconsult.com](mailto:jcatania@ekiconsult.com)>  
**Sent:** Wednesday, August 19, 2020 11:05 AM  
**To:** Wong, Melinda@Waterboards <[Melinda.Wong@waterboards.ca.gov](mailto:Melinda.Wong@waterboards.ca.gov)>  
**Subject:** Request for Records in Palo Alto

**EXTERNAL:**

Hi Melinda,

I would like to submit a public records request for all files, current and archived (and may not be included in Geotracker), the Regional Board maintains for 2501 Park Boulevard, Palo Alto. I believe this address was formerly 195 Sherman Avenue, Palo Alto so if you could please search for records at 195 Sherman Avenue as well, I would appreciate it.

Please let me know if you need additional information. Contact me at [jcatania@ekiconsult.com](mailto:jcatania@ekiconsult.com) or at (650)292-9100 with your search results and to schedule an appointment for a file review or for a copy service to come in.

Thank you!  
Jaclyn

**Jared Blumenfeld**  
Secretary for  
Environmental Protection

## Department of Toxic Substances Control

Meredith Williams, Ph.D., Director  
700 Heinz Avenue  
Berkeley, California 94710-2721

**Gavin Newsom**  
Governor

August 28, 2020

Jaclyn Catania  
[jcatania@ekiconsults.com](mailto:jcatania@ekiconsults.com)  
650-292-9100

**Public Records Request Number: PR2-081920-05**

**Location(s): 195 Sherman Ave.; 2501 Park Blvd., Palo Alto, CA**

Dear Ms. Catania:

On [August 19<sup>th</sup>, 2020](#) the Department of Toxic Substances Control (DTSC) received your email of [August 19<sup>th</sup>, 2020](#) requesting records under the Public Records Act. After a thorough review of our files, no site records were found pertaining to the sites/facilities referenced above.

DTSC's Hazardous Waste Tracking System (HWTS) may also have records that pertain to this request. This unit tracks toxic waste generators, transporters (manifests), and disposal facilities. If you are interested in this type of information, it can be identified by accessing the HWTS database at: [http://hwts.dtsc.ca.gov/report\\_search.cfm?id=5](http://hwts.dtsc.ca.gov/report_search.cfm?id=5). If you are interested in retrieving detailed reports, additional charges may apply. Please contact the HWTS unit by email at [hwtsreports@dtsc.ca.gov](mailto:hwtsreports@dtsc.ca.gov) or by phone at (800)618-6942 for further information. For copies of manifests please send an email to [mcr@dtsc.ca.gov](mailto:mcr@dtsc.ca.gov).

Many of our records are available on EnviroStor, an online database that provides non-confidential, public access to DTSC's data management system. It tracks our cleanup, permitting, enforcement, and investigation efforts at hazardous waste facilities and sites with known or suspected contamination issues. EnviroStor is available 24/7, 365 days a year. The data reflects the latest updates as they are entered in the system. Access it from your computer or smartphone, the local library – anywhere Internet access is available. Just go to [www.envirostor.dtsc.ca.gov](http://www.envirostor.dtsc.ca.gov). You'll find a step-by-step tour of EnviroStor under the "How to Use EnviroStor" menu on the website.

If you have any questions or would like further information regarding your request, please contact me at [510-540-3800](tel:510-540-3800) or via email at [Berkeleyfileroom@dtsc.ca.gov](mailto:Berkeleyfileroom@dtsc.ca.gov).

Sincerely,

*Carl Rose*

## Appendix G

### Resumes for Preparers of Phase I ESA Report

# Paul B. Hoffey

## Principal Environmental Scientist

### Education

- The University of Iowa, B.S. Physical Geography/ Minor in Geology, 1984

### Registrations/Certifications

- Forty-hour HAZWOPER Training Course
- Eight-hour Health and Safety Training Course for Supervisors

### Summary of Experience

---

Mr. Hoffey has 30 years of environmental consulting experience in conducting environmental assessments. At EKI, Mr. Hoffey heads up the Property Transaction Environmental Due Diligence division, and is principal quality control reviewer of Phase I Environmental Site Assessment (ESA) reports. Mr. Hoffey has performed, written, managed, and reviewed over a thousand Phase I ESA reports for a variety of land uses from large open space properties to

heavy industrial and manufacturing sites. Mr. Hoffey's clients have varied from non-profit land use trusts, to residential and commercial developers, to community redevelopment agencies, to large global high technology firms. Mr. Hoffey frequently provides Phase I ESA training workshops and has given many seminars to community groups and other professionals on Phase I ESAs, the ASTM E1527 Phase I guidance, and environmental due diligence in property transactions. Mr. Hoffey is an Environmental Professional as defined by the U.S. Environmental Protection Agency's (U.S. EPA) All Appropriate Inquires (AAI) Rule (Part 312.10).

Prior to joining EKI, Mr. Hoffey worked for three years preparing and managing Environmental Impact Reports (EIRs) under the California Environmental Quality Act (CEQA) for various proposed development projects.

### Selected Experience

---

- Over the past 11 years, Mr. Hoffey has provided overall environmental due diligence services on behalf of a Fortune 50 multi-national technology company based in California for its planned acquisition and lease facilities located throughout the United States as well as internationally. Services provided to this client by Mr. Hoffey include preparation of Phase I assessments for property acquisitions and mergers & acquisitions, design and implementation of Phase II sampling investigations, and coordination with sub-consultants worldwide for the provision of other due diligence services including asbestos and lead paint assessments, indoor air sampling, mold and moisture assessments, and other hazardous materials assessment services, as well as providing technical support to the client and legal counsel regarding potential environmental liabilities and business risks associated with contaminated properties. Throughout this 10-year period, Mr. Hoffey has assisted the Environment Health and Safety (EHS) division of the client company with the development of a formal environmental due diligence program that is being adopted by the various lease and acquisition departments within the company.
- Mr. Hoffey has prepared Phase I ESAs for communities and city redevelopment agencies interested in revitalization of blighted areas. Issues included contamination associated with former gasoline service stations, dry cleaning facilities, and automotive repair shops. Mr. Hoffey assisted such organizations with the evaluation of data given planned land uses, and potential environmental risks and liabilities, as well as potential remedial options and costs. Mr. Hoffey also assisted one community with the development of a database of environmental information for properties located within a designated redevelopment area, such that the information could be used by the city and potential redevelopment partners to facilitate assessment and re-use of impaired properties.
- Mr. Hoffey has assisted residential developers in the assessment and re-use planning of former agricultural and manufacturing properties, including the preparation of Phase I ESAs, design of Phase II

scopes of work, and assisting the clients with remedial option planning, cost estimating, and regulatory planning associated with converting properties to more sensitive residential use. Issues addressed included pesticides in soil and the potential for direct exposure concerns, and solvents in groundwater and the potential for vapor intrusion concerns.

- Mr. Hoffey assisted a developer with environmental due diligence of a portion of a Federal Superfund site for acquisition and redevelopment into office uses. Mr. Hoffey assisted client by performing a Phase I ESA to identify potential issues associated with re-use, provided technical support to client in obtaining a Prospective Purchaser Agreement from the U.S. EPA, assisted client with identification of on-going obligations, including design and implementation of vapor mitigation, allowing access to the site by Responsible Parties, and providing overall technical support in communications with the seller and responsible parties.
- Mr. Hoffey assisted a developer with potential acquisition and re-development of an approximate 150-acre former automobile manufacturing facility. Mr. Hoffey reviewed prior Phase I ESA and Phase II reports prepared for the facilities, reviewed regulatory agency information related to ongoing investigations and remedial actions, and assisted client with evaluation of identified and potential environmental issues that could impact redevelopment of the site. Areas of concern included petroleum hydrocarbons and solvents in shallow groundwater from on-site releases, and potential issues from former operations areas such as rail spur tracks, spray paint areas and sludge pits, various tanks farms, and hazardous waste storage areas that were not fully characterized. Mr. Hoffey provided to client a spreadsheet of identified and potential issues, options for additional investigations and corrective actions, and estimated cost ranges to implement actions.
- Mr. Hoffey has completed numerous Phase I ESAs for various non-profit land trusts for potential acquisition of large tracts of land used for open space, agriculture, and ranching. Issues identified and characterized by Mr. Hoffey included pesticides in soil in and around mixing areas and cattle squeeze gates, ranch dumps containing discarded chemical drums and cans, landfills, and above ground and below ground fuel storage tanks. Mr. Hoffey has assisted clients with the development of Phase II investigations, design and implementation of corrective actions, and development of remedial action cost estimates that were used to facilitate the transactions.
- Mr. Hoffey is currently assisting a property management firm with annual and biennial auditing of its tenants that use and store chemicals. For each environmental audit, Mr. Hoffey reviews regulatory agency and chemical use inventory information for these facilities, conducts a site visual survey of chemical use and storage areas, conducts interviews with tenants, and prepares a report for the property management firm that identifies potential issues and options for corrective actions. The audits are used by the property management firm to demonstrate to the respective owners that actions are being taken to reduce the potential for impairment to the properties caused by tenant activities.
- On behalf of a current property owner, Mr. Hoffey evaluated the status of a site that has been the subject of 15 years of investigations by the California Department of Toxic Substances Control (DTSC). The client was named the Potentially Responsible Party (PRP) by the DTSC and was being held liable for nearly \$1.2 million in investigation and DTSC oversight costs incurred to date. Mr. Hoffey evaluated over 15 years of site data and determined that the DTSC had not sufficiently identified the site as a source for the contamination in the subsurface beneath the site. At a meeting held between EKI, its client and attorney, and the DTSC, Mr. Hoffey presented arguments that the site was not the source for the contamination detected in site groundwater. The DTSC concurred with EKI's findings and agreed to close the site and absolve EKI's client of past costs. EKI prepared the closure documentation for the site, including a Remedial Investigation Summary Report, Human Health Risk Assessment (HHRA), Public Participation Plan, and Removal Action Work Plan (RAW).

# Jessica Fadde Daugherty, PG

## Geologist

### Summary of Experience

#### Education

- San Francisco State University, M.S. in Applied Geosciences, 2007
- State University of New York at New Paltz, B.A. in Interpersonal and Intercultural Communications, 1995

#### Registrations/Certifications

- Professional Geologist in California (PG #9116)
- Forty-hour HAZWOPER Training Course

Ms. Daugherty has over eight years of experience in field planning and implementation of site characterization and remediation projects. Ms. Daugherty has participated in performing Phase I environmental site assessments (ESAs) and has conducted numerous subsurface investigations of soil, groundwater, and soil vapor contamination with various types of chemicals including chlorinated solvents, polychlorinated biphenyls (PCBs), petroleum hydrocarbons (TPHs), agricultural pesticides, metals, and leaking underground storage tanks (USTs) containing fuels and

solvents. She also performs construction observation services and contractor management for remediation projects. Ms. Daugherty has extensive experience managing large sets of data, depicting the results of investigations on maps, and preparing geologic cross-sections to aid in the interpretation of subsurface conditions. Ms. Daugherty has also performed detailed research of field documentation to support site conceptual models as part of litigation activities.

### Detailed Experience

- Ms. Daugherty has coordinated and implemented soil and groundwater investigations at numerous sites in the Bay Area with former industrial/commercial, residential, and agricultural land uses. Coordination and oversight tasks performed by Ms. Daugherty for these projects include procuring permits from both city and county agencies; writing work authorizations and health and safety plans; coordinating with analytical laboratories; obtaining and overseeing subcontractors such as drillers, utility locators, and concrete corers; and managing the disposal of investigation derived wastes (IDWs). On-site activities managed and performed by Ms. Daugherty include drilling soil borings using hollow-stem auger and direct-push drilling, and in-situ environmental investigation techniques such as cone penetration testing (CPT) and membrane interface probe (MIP). Ms. Daugherty is also experienced with various methods of sample collection, including discrete soil sampling, confirmation soil sampling, multi-increment sampling, soil vapor sampling, grab groundwater sampling, and purging and sampling of monitoring wells. She is experienced in soil borehole logging techniques and in preparing and interpreting geologic cross-sections for remedial design. She has performed excavation oversight and perimeter air monitoring.
- Ms. Daugherty recently managed a 4-month long, deep groundwater investigation on multiple sites, encompassing approximately 16-acres. During this investigation, she simultaneously managed several detailed and fast-paced activities that included street closures, utility clearance, CPT, MIP, grab groundwater sampling, soil sampling, UST removal, well installation and borehole logging using various drilling methods, well development, well sampling, and IDW management.
- Ms. Daugherty has installed sub-slab vapor and soil vapor probes at multiple commercial and industrial sites and sampled these probes in accordance with regulatory guidance. Ms. Daugherty has planned an indoor air sampling investigation to evaluate whether significant vapor intrusion (VI) was occurring at a site in Emeryville.
- Ms. Daugherty has been the lead involved in the field planning for multiple pilot study tests and full-scale implementation for in situ groundwater remediation using enhanced reductive dechlorination (ERD) at multiple sites in Emeryville, for the City of Emeryville as the Successor Agency to the

Emeryville Redevelopment Agency, under the oversight of the Department of Toxic Substances Control (DTSC). Ms. Daugherty has been involved in coordinating multiple injection events. Tasks involved in these injection events include managing injection logistics; interpretation of injection intervals; using different amendments to adjust for pH and subsurface biology; handling challenging access conditions; and managing surfacing of the injected constituents. These injection events have led to a successful reduction of chlorinated volatile organic compounds (CVOCs) concentrations in groundwater by three orders of magnitude, to date.

- Ms. Daugherty has prepared Phase I ESAs at numerous commercial and industrial sites across the Bay Area in general accordance with the United States Environmental Protection Agency (U.S. EPA) All Appropriate Inquiries (AAI) rule and the American Society of Testing and Materials (ASTM) E-1527 guidance. Ms. Daugherty has also developed and performed Phase II subsurface investigations for soil, soil vapor, and groundwater following Phase I recommendations.
- Ms. Daugherty has assisted in plan preparation for remedial implementation. These plans include storm water pollution prevention plans (SWPPP), sampling and analysis plans (SAP), quality assurance project plans (QAPP), air monitoring plans, traffic control plans, decontamination plans, and dust and vapor control plans.
- Prior to joining EKI, Ms. Daugherty conducted physical modeling experiments of a gravel bedded river in a flume with a research team from UC Berkeley and UC Santa Barbara, for a CALFED funded study to guide future river restoration projects. During this research Ms. Daugherty assisted in the design and reconstruction of the flume to be used in the experiments, carried out flume experiments, used sonar and laser equipment to create topographical profiles of the gravel bed, mapped sediment pulse movement through the flume, and analyzed grain size distributions of sediments by weight and through point counts.
- As a research assistant with the San Francisco State University (SFSU) Fault Creep Monitoring Project Ms. Daugherty performed theodolite survey measurements of seismic fault movement on alignment arrays on active strike-slip faults in the San Francisco Bay Area.
