Project Title: Yolo County Above Ground Tank Drought Assistance

Project Location: Unincorporated areas of Yolo County (locations are throughout the entire County and are dependent on the location of the independent well that has gone dry)

Description of nature and purpose of the Project: Yolo County will provide temporary assistance to landowners with dry wells that are a direct result of the current Drought in California. Once an individual homeowner has reported that their well has gone dry, Yolo County OES (YCOES) and the Yolo County Flood Control and Water Conservation District (YCFWCWD) will work together to verify the well's depth to water and the fact that the homeowner has secured a water well driller to replace the well. Once both of these facts have been confirmed, the YCFWCWD will assist the homeowner with temporary installation of an above ground tank and booster pump and will arrange for non-potable drinking water to the property for hygiene purposes. The YCOES will then provide bottled drinking water to the property based on the number of persons living on the property. Assistance will be provided while the property is on the well driller's wait list for drilling. Once the well is successfully replaced, the property will be removed from the program and the YCFWCWD owned equipment will be re-used for another property.

Name of Public Agency Approving Project: Yolo County

Name of Person or Agency Carrying Out Project: Yolo County

Exempt Status: Section 15061(b)(3) and Section 15269(c)

Reasons why project is exempt: Yolo County finds that the Project activities are covered by the common-sense exemption that CEQA applies only to projects which have the potential for causing a significant environmental effect on the environment. Additionally, Yolo County finds that the Project activities are necessary to prevent or mitigate an emergency.
