PROJECT DESCRIPTION:

Additional page(s) attached.

The proposed project is for the demolition of existing structures on site and the construction of a new five-story, 58-foot 6-inch apartment complex with 29 dwelling units, consisting of 22 Very-Low-Income units, six (6) Moderate-Income units, and one (1) market rate manager's unit. The project will have a total floor area of approximately 13,639 square feet and a Floor Area Ratio of 4:1. The project proposes no vehicle parking spaces, 28 long-term bicycle parking spaces, and three (3) short-term bicycle parking spaces on the ground floor. There are no trees on-site, and the project does not propose the removal of any trees. The project is required and is proposing 8 on-site trees. The project assumes a worst-case scenario of removing all street trees, in the event of changes to the right-of-way improvement plans after approval of the environmental clearance. However, this environmental analysis does not authorize the removal of any street trees without prior approval of Urban Forestry, in compliance with LAMC Sections 62.169 and 62.170 and their applicable findings.
