Los Angeles Fire Department Letter

CITY OF LOS ANGELES
INTER-DEPARTMENTAL CORRESPONDENCE

March 6, 2023

To: Eyestone Environmental
Attention: Laura Rodriguez
2121 Rosecrans Ave Suite 3355
El Segundo Ca 90245

From: Los Angeles City Fire Department

Subject: Request for Fire Services Report

CASE NO.: 6000 Hollywood Bl.
PROJECT NAME: The 6000 Hollywood Boulevard Project
PROJECT APPLICANT: Eyestone Environmental
PROJECT LOCATION: 6000 w Hollywood Bl. Los Angeles CA 90028

PROPOSED PROJECT:

The Project Site is located at 6000 Hollywood Boulevard (Project Site) in the Hollywood Community Plan area of the City. The Project Site is generally bound by Hollywood Boulevard to the north, Bronson Avenue to the east, Carlton Way to the south, and Gower Street to the west. Regional access to the Project Site is provided by Hollywood Boulevard located just north of the Project Site, Sunset Boulevard located south of the Project Site, and US-101, which is accessible within approximately 730 feet of the Project Site. Local access to the Project Site is provided by several local streets and avenues, including Gower Street and Bronson Avenue.

The Project is a new mixed-use development proposed on a 163,327-square-foot (3.75-acre) site comprised of nine lots south of Hollywood Boulevard (Hollywood Lot) and one adjoining lot along Carlton Way between Bronson Avenue to the east and Gower Street to the west (Carlton Lot). The Hollywood Lot is currently developed as an automotive dealership for Toyota, and includes a showroom, parts storage structure, auto repair facility with five service bays, and surface parking. The existing structures on the Hollywood Lot total approximately 31,833 square feet. The Hollywood Lot and the Carlton Lot are collectively referred to herein as the Project Site.

As summarized in Table 1, the Project would replace the existing automotive dealership and surface parking on the Project Site with a mixed-use development that would comprise 501,460 square feet of new residential, commercial, and retail floor area across multiple structures that would be integrated with public and private open space. The proposed uses would be provided within a six-story, 113-foot office and retail building (Building A, height of 120 feet with mechanical) along the northwest portion of the Project Site; a 35-story, 404-foot residential tower (Building B, height of 419 feet with mechanical) along the northeast portion of the Project Site that would contain 265 residential units; 11 low-rise structures ranging from two to three stories; and a four-story, 44.5-foot residential building located entirely on the Carlton Lot (Building C, height of 56 feet with mechanical) that would contain 46 units. The proposed 35-story residential building, six-story office building, and 11 low-rise style structures would all be atop a parking podium and be

located along Hollywood Boulevard. One of the low-rise structures would be used as a 4,366-square-foot two-story restaurant. The remaining 10 structures would include 39 townhomes with ground floor retail. Each of these 10 structures would be between two and three stories above the podium with a maximum height of 98 feet. Overall, the Project would include 341,094 square feet of residential uses (350 units), 136,000 square feet of commercial office uses, and 24,366 square feet of retail uses, including 19,500 square feet of retail, 4,366 square feet of restaurant uses, and 500 square feet of support uses. The overall floor area ratio (FAR) would be 3.08:1.

Table 1 Summary of Existing and Proposed Floor Area^a

Land Use	Floor Area
Existing (All to Be Removed)	
Commercial (Automotive Dealership)	31,833 sf
<i>Total Existing Floor Area to Be Removed</i>	<i>31,833 sf</i>
New Construction	
Residential	341,094 sf (350 units)
Office	136,000 sf
Retail/Restaurant	24,366
<i>Total New Construction</i>	<i>501,460 sf</i>
Net Floor Area Upon Completion	469,627 sf
<p><i>sf = square feet ^a Square footage is calculated pursuant to the Los Angeles Municipal Code (LAMC) definition of floor area for the purpose of calculating FAR. In accordance with LAMC Section 12.03, floor area is defined as “[t]he area in square feet confined within the exterior walls of a building, but not including the area of the following: exterior walls, stairways, shafts, rooms housing building-operating equipment or machinery, parking areas with associated driveways and ramps, space for the landing and storage of helicopters, and basement storage areas.”</i></p>	

The Project would incorporate numerous on-site common and private open space and recreational amenities. The Project would provide common open space at the ground level that could be publicly accessible during daytime hours in the form of gardens, courtyards, and terraces. The common open space proposed to be provided within the Project Site would total 38,252 square feet. The primary public open space amenity would be a landscaped and paved central plaza along Hollywood Boulevard, which would include access to retail, outdoor dining, and terrace stairs that provide additional gathering space as well as access to a landscaped upper plaza and residential garden walk. Interior common areas would include resident amenities such as a pool deck, view deck, fitness areas, game rooms, lounges and meeting rooms. Additional common area opens spaces

would be provided in gardens and terraces throughout the Project Site. Many of the residential structures would also include roof top open spaces.

Vehicular access to the Project Site would be provided from four driveways along Hollywood Boulevard. Access for trash pickup and other freight vehicles would be provided via a loading dock entry off Hollywood Boulevard, adjacent to the Project Site's eastern boundary. The Project would include a total of 971 parking spaces within a maximum three-level subterranean parking garage. Two levels of the subterranean parking garage would cover the entire Project Site while the third level would cover only the eastern half of the Project Site. Pedestrian access to the Project Site would be provided at several access points around the perimeter of the Project Site, including along Hollywood Boulevard, Carlton Way, and Gower Street. Bicycle access would occur via the pedestrian access points and three driveways along Hollywood Boulevard. Additionally, the Project would include 42 short-term and 202 long-term bicycle parking spaces. Short-term bicycle parking spaces would be provided on the ground level and long-term bicycle parking spaces would be provided within the subterranean parking garage. Locker rooms and showers would also be provided beside the long-term bicycle parking area and bike racks would be provided on all frontages of the Project Site.

Proposed lighting would include shielded low to medium output exterior lights adjacent to buildings and along pathways for security and wayfinding purposes. In addition, shielded low to medium output lighting to accent signage, architectural features, murals, and landscaping elements would be incorporated throughout the Project Site.

The Project Site does not currently contain any residential uses; therefore, the existing uses on-site do not generate a residential service population. The Project would increase the building square footage on-site and would introduce new residential uses, as discussed above. Based on employee generation rates included in the City of Los Angeles VMT Calculator Documentation, the Project's new residential units would result in a population of approximately 827 new residents. Additionally, the Project is estimated to generate 536 net new employees to the Project Site.

The following comments are furnished in response to your request for this Department to review the proposed development:

FIRE FLOW:

The adequacy of fire protection for a given area is based on required fire-flow, response distance from existing fire stations, and this Department's judgment for needs in the area. In general, the required fire-flow is closely related to land use. The quantity of water necessary for fire protection varies with the type of development, life hazard, occupancy, and the degree of fire hazard.

Fire-flow requirements vary from 2,000 gallons per minute (G.P.M.) in low density residential areas to 12,000 G.P.M. in high-density commercial or industrial areas. A minimum residual water pressure of 20 pounds per square inch (P.S.I.) is to remain in the

water system, with the required gallons per minute flowing. The required fire-flow for this project has been set at **9,000 G.P.M. from six fire hydrants flowing simultaneously.**

Improvements to the water system in this area may be required to provide 9,000 G.P.M. fire-flow. The cost of improving the water system may be charged to the developer. For more detailed information regarding water main improvements, the developer shall contact the Water Services Section of the Department of Water and Power.

RESPONSE DISTANCE:

Based on a required fire-flow of 9,000 G.P.M., the first-due Engine Company should be within 1 mile(s), the first-due Truck Company within 1 1/2 mile(s).

FIRE STATIONS:

The Fire Department has existing fire stations at the following locations for initial response into the area of the proposed development: **6000 w Hollywood Bl, LA CA 90028**

DISTANCE	Fire Station No.	EQUIPMENT & SERVICES	STAFF
0.3	Fire Station No. 82 5769 Hollywood Bl Los Angeles CA 90028	Engine, Paramedic Rescue Ambulance	6
1.1	Fire Station No. 27 1327 Cole Avenue Los Angeles, CA 90028	Light Force, Engine, Paramedic Rescue Ambulance and BLS Rescue Ambulance, Battalion Supervisor	16
1.7	Fire Station No. 52 4957 Melrose Ave Los Angeles, CA 90029	Assessment Engine and Paramedic Rescue Ambulance	6
2.1	Fire Station No. 35 1601 N Hillhurst Ave. Los Angeles, CA 90027	Assessment Engine, Light Force, Paramedic Rescue Ambulance, BLS Rescue ambulance	14
2.1	Fire Station No. 41 1439 N Gardner Los Angeles, CA 90046	Engine, Paramedic Rescue Ambulance	6

Based on these criteria (response distance from existing fire stations), fire protection would be considered **adequate.**

At present, there are no immediate plans to increase Fire Department staffing or resources in those areas, which will serve the proposed project.

Bob Babajian
March 6, 2023
6000 w Hollywood Bl. (Request for Fire Services Report)
Page 5

The Los Angeles Fire Department continually evaluates fire station placement and overall Department services for the entire City, as well as specific areas. The development of this proposed project, along with other approved and planned projects in the immediate area, may result in the need for the following:

1. Increased staffing for existing facilities. (I.E., Paramedic Rescue Ambulance and EMT Rescue Ambulance resources.)
2. Additional fire protection facilities.
3. Relocation of present fire protection facilities.

For additional information, please contact the Fire Development Services Section, Hydrants & Access Unit at **(213) 482-6543**.

Bob Babajian
201 North Figueroa Street
Los Angeles, CA 90012

Dear Bob Babajian:

[ENV-0000-0000-EIR]

The proposed, "The 6000 Hollywood Boulevard Project," is located at 6000 Hollywood Boulevard, Los Angeles, CA 90028. The project location is in Reporting District (RD) 0647. This RD falls within the geographical boundaries of the Los Angeles Police Department's (LAPD) Hollywood Area. A project of this size could have an impact on police services within Hollywood Area. The Department is available for advisement on crime prevention features appropriate for the design of the properties within the project.

Upon completion of the project, it is encouraged to provide the Commanding Officer of Hollywood Community Police Station with a diagram copy of each portion of the property. Hollywood Community Police Station's Commanding Officer is Captain III Raymond Valois. Hollywood Community Police Station is located at 1358 North Wilcox Avenue, Hollywood Boulevard, CA 90028 (RD 0666). Captain Valois phone number is (213) 972-2900. The diagram should include access routes and any additional information that might facilitate police response.

Should you have any further questions, please contact Police Officer II Alfonso Velasco at the Public Engagement Section (PES), Office of Operations, Crime Prevention Through Environmental Design (CPTED) at (213) 486-6000 or via e-mail at CPTED@lapd.online.

Respectfully,

MICHEL R. MOORE
Chief of Police

A handwritten signature in black ink, appearing to read "Michel R. Moore".

BILLY B. BROCKWAY, Commander
Department Homeless Coordinator
Office of Operations

The following report was prepared for the “The 6000 Hollywood Boulevard Project” in accordance with Section 15083 of the California Environmental Quality Act (CEQA).

Project Location / Description:

The “The Star Project” site is located at 6000 Hollywood Boulevard, Los Angeles, CA 90028. This project will be constructed within the boundaries of the City of Los Angeles and located in LAPD’s Hollywood area. Some of the communities in this area are Hollywood, Mount Olympus, Fairfax District (North of Beverly Boulevard), Melrose District, Argyle Avenue and Los Feliz Estates. (LAPD’s Operations West Bureau).

A summarization of this project’s Environmental Impact Report (E.I.R.) is to identify and assess the project’s potential impact on public quality of life issues and concerns. This is in accordance with Section 15083 of the California Environmental Quality Act (CEQA). This E.I.R. will also address the project’s potential impact on police protection services, the resources needed, the resources available and the impact these services and resources will have on the immediate community.

Purpose of Proposed Project:

The proposed “The 6000 Hollywood Boulevard Project” site includes the development of 16,327 square foot site comprised of nine lots south of Hollywood Boulevard. The project will replace the existing automotive dealership and surface parking with a mixed-use development that would comprise 501,460 square feet of new residential, commercial, and retail floor area across multiple structures.

Project Distance and Times:

The 6000 Hollywood Boulevard, Los Angeles, CA 90028 addresses are approximately 1.2 miles and 6 minutes from the Hollywood Community Police Station.

These distances and times were calculated from a departure point starting from the Hollywood Community Police Station. These arrival times were configured utilizing some traffic delays. Estimated times of arrival can vary depending on divisional call load, time of the day, traffic delays and types of calls being responded to.

The reporting district for Hollywood Community Police Station is RD 0666. Their phone number is (213) 972-2971.

Divisional Geographic’s / Demographics:

Hollywood Community Police Station’s geographical area of patrol is approximately 17.2 square miles. It consists of 58 Reporting Districts. The service boundaries for Hollywood Station are as follows:

To the **West** is North La Brea, Sierra Mar Place;

To the **North** Mulholland Drive;

To the **East** Fern Dell Drive, Normandie Avenue, border with LAPD Northeast Division;

To the **South** is Melrose Avenue, Willoughby Avenue, Fountain Avenue, Sunset Boulevard;

The proposed, "The Star Project", will be in **RD 0647** (*Los Angeles Police Department's Hollywood Division*). The borders for **RD 0647** are as follows:

Reporting District 0647

To the **West** is Vine Street;

To the **North** is Hollywood Boulevard;

To the **East** is the Hollywood 101 Freeway;

To the **South** is Sunset Boulevard;

Hollywood Division

Hollywood Division has approximately 302 sworn personnel and 15 civilian support staff. Hollywood staffing consists of two Captains, six Lieutenants, 27 Detectives, 34 Sergeants, 233 Police Officers and 15 Civilian employees.

To the North, Hollywood Division borders North Hollywood, and the city of Burbank. To the west is LAPD's West Los Angeles Division, and the city of Beverly Hills. To the south is LAPD's Wilshire, and Olympic Division's. To the east is LAPD's Northeast Division.

Some points of interest that Hollywood area of Los Angeles offers is Argyle, Cahuenga Pass, East Hollywood, Hobart, Hollywood, Hollywood Hills, Hollywood/La Brea, Little Armenia, Los Feliz, Melrose District, Mount Olympus, Sierra Vista, Spaulding Square, Sunset Strip, Thai Town, Vine/Willoughby

The residential population in the Hollywood area is estimated at 3000,000 people, plus or minus (WIKIPEDIA and Los Angeles Almanac). The officer to resident ratio is 1 officer for every 993 residents (993:1). This is a given residential impact for a 17.2 square mile area. This population amount does not reflect citizens from outside the area visiting local businesses, churches, residences and educational institutions.

The Los Angeles Police Department

The Los Angeles Police Department currently has 9,069 sworn personnel and 2,823 civilian employees. These city police employees cater to a Los Angeles City population of approximately 3,985,516. This city population amount is current as of October 1, 2021 (according to 2010-2020 American Community Survey and the 2020 US Census for year 2020). Additionally, this amount

does not include all residents and non-residents, but only reflects those individuals that responded to the 2020 Census.

This population equates to a resident to officer ratio of 433 residents for every 1 officer (433:1). The 3,985,516-population amount depicts a firm registered value of population for the City of Los Angeles. However, this number can also be fluid.

The ethnic breakdown of the City of Los Angeles, according to the 2010-2020 American Community Survey and Wikipedia is:

- 46.9% Hispanic / Latin
- 28.9% White (Non-Hispanic)
- 11.7% Asian
- 8.3% Black / African American
- 0.73% Native American
- 0.16% Native Hawaiian / Pacific Islander
- 3.4% Other/two or more races

Divisional Support and Communication:

There are many specialized support units, divisions, sections and services available to Hollywood's Division within the LAPD (i.e., Air Support, Detectives, Bike Unit, K9 and Metro / SWAT) to support any additional policing needs Hollywood Division may encounter. These services are available to supplement and complement Hollywood area policing. In utilizing these available resources, the Los Angeles Police Department can meet the demanded needs of police services for the Star Project.

Hollywood Community Police Station's emergency response system is directly linked to the Los Angeles Police Department's Communication and Dispatch Center. Communication Division has the responsibility to staff this Dispatch Center. The staff are incident trained personnel that will respond to radioed and telephoned calls for service. They would then dispatch these requests to the proper emergency and non-emergency personnel required or requested. Then they would provide the city personnel involved with the necessary information to execute their duties for any given incident.

These operations are performed on a 24 hour a day, 7 days a week, 365 days a year basis. This includes 911 emergency calls (police, fire and medical). In referencing Communication Division, their main area of concentration is the dispatching and follow-up of police calls for service. Communication Division's "Emergency Operations Center" (EOC / DOC), also works in concert with the Los Angeles Fire Department's (LAFD) "Metropolitan Fire Communications Center" (MFC). Additional emergency response entities that Communication Division interacts with are, but not limited to, is the Los Angeles County Fire Department (LACoFD), the Los Angeles County Sheriff's Department (LASD) and other regional city police and fire agencies. This interaction is performed to ensure coordinated responses to all emergencies and incidents that occur, will occur or have occurred in Los Angeles City and Los Angeles County regions.

Divisional and Citywide Response Times:

According to the Los Angeles Police Department’s Computer Statistics (COMPSTAT) Division, the average police response time to emergency, high priority calls in the Hollywood Area (Code 3 calls) was 3.7 minutes. This was done with a dispatch median time of 1.4 minutes. The medium high priority response time (Code 2) was 13.6 minutes. This was done with a dispatch median time of 3.4 minutes. Low priority, non-emergency response times, was 27.8 minutes. These low priority calls had a dispatch median time of 8.8 minutes.

Citywide response times during this same 4-week period was 4.7 minutes for emergency, high priority calls. The dispatch median time was 1.5 minutes. The medium high (Code 2 calls) priority response times were 15.4 minutes with a dispatch time of 4.3 minutes. Low priority response times were 29.1 minutes with a dispatch time of 12.9 minutes.

These response times were taken from the statistics submitted by Hollywood Division to “COMPSTAT”, for a 4-week period between March 19, 2023 through April 15, 2023. During this same 4-week period, Hollywood Division answered 301 emergency calls for service, 1,331 medium high priority calls and 1,079 low priority calls.

Citywide, for the same 4-week period, the Los Angeles Police Department answered 6,714 emergency calls for service, 25,687 medium high priority calls and 20,005 low priority calls. The response times stated are adequate performance times for this police division.

Statistics:

The following is one month of crime statistics for RD 0647 (The 6000 Hollywood Boulevard Project) and Hollywood Division 5-year crime statistics for the years 2018-2022. Also included are Citywide crime statistics, broken down by month for the same period.

PART 1 CRIMES BY WATCH REPORT

There are no planned improvements to the Hollywood Area Community Police Station and or it's protection facilities currently. These planned project improvements and or non-planned improvements are intended only for the service areas of the "6000 Hollywood Boulevard Project" site.

Additionally, at this time, there are no special police protection requirements needed by law enforcement because of the specific attributes of the 6000 Hollywood Boulevard site.

The 6000 Hollywood Boulevard, individually or combined with other past or present projects, will not result in the need for new or altered police facilities.

This concludes the 6000 Hollywood Boulevard Project, Environmental Impact Report. If there are any further questions regarding this report, please email them to CPTED@lapd.online for the fastest response time.

Thank You for your patience,

Prepared by:

Officer Alfonso Velasco, CPD
Los Angeles Police Department
Public Engagement Section
Crime Prevention Through Environmental Design

100 West 1st Street, RM 250
Los Angeles, CA. 90012
