Subject: Islais Creek Bridge Project EIR - CGS comments

Categories: Comments

Hello Elizabeth White,

The California Geological Survey (CGS) has received and reviewed a Notice of Preparation of an Environmental Impact Report (EIR) for the Islais Creek Bridge Project. This email conveys the following recommendations from CGS concerning geologic issues in the project area:

1. Seismic Hazards

The project area is located in a zone of required investigation for liquefaction as mapped by CGS. The EIR should address the potential hazard of liquefaction with respect to the proposed project. Additional information is available at the links below:

<https://maps.conservation.ca.gov/cgs/EQZApp/app/>

<https://maps.conservation.ca.gov/cgs/informationwarehouse/index.html?map=regulatorymaps>

Please let me know if you have any questions.

Erik
