Subject: Notice of Determination in compliance with Section 21108 or 21152 of the Public Resources Code.

Project Title: PW2023-01 - County Road 96 over Union School Slough Bridge Replacement Project

State Clearinghouse Number: 2023060337

Applicant: Yolo County Department of Community Services Owner: Yolo County  
292 W. Beamer St.  
Woodland, CA 95695

Project Location: Portion of County Road (CR) 96 within unincorporated Yolo County, as it crosses over Union School Slough, approximately 0.65 mile north of CR 29 (APNs: 040-180-012, 040-170-001, 040-170-003, 040-180-013).

Project Description: The Yolo County Department of Community Services, Public Works Division, will replace the existing bridge on CR 96 over Union School Slough with funding made available through the Federal Highway Administration (FHWA) Highway Bridge Program and administered by the California Department of Transportation (Caltrans). The bridge has been determined to be structurally deficient by Caltrans as recently as 2013 and has a sufficiency rating of 54.9. County Road 96 is a paved rural local roadway that extends between Russell Boulevard to the south and CR 27 to the north; the project site is located within the southern region of Yolo County, northeast of the Yolo County Airport. The subject bridge is bordered primarily by agricultural land.

The existing bridge (Bridge No. 22C0126) was constructed in 1930 and is approximately 40 feet long and 20 feet wide consisting of single-span, reinforced concrete T-girders. The bridge has extensive deck cracking, with longitudinal cracking along the bottom of all girders. Spalls with exposed rebar are also visible on the girders and soffit, and abrasion with exposed rebar is evident on the face of the norther abutment. Sections of the bridge railing have completely spalled, exposing rebar. To improve public safety while traveling on CR 96 as it crosses over Union School Slough, a new bridge will be constructed to the south of the existing structure, such that Union School Slough can flow straight east under CR 96. A pipe culvert will be installed at the current crossing to accommodate overflows and maintain the environmental benefit of the existing watercourse spur. The new bridge will be a 46.5-foot long, 29.5-foot wide, single-span, cast-in-place, post-tensioned slab structure. Construction of the roadway approaches will involve the placement of new roadway fill material, aggregate base, hot mix asphalt pavement, and installation of guard rail.

An Initial Study/Mitigated Negative Declaration (SCH #2023060337) was prepared for the proposed County Road 96 over Union School Slough Bridge Replacement Project. This is to advise that the Yolo County Board of Supervisors has adopted the Mitigated Negative Declaration for the above-described project on September 26, 2023, and has made the following determinations:

1. The project will not cause a new significant effect on the environment or substantially increase the severity of a previously identified significant environmental effect.
2. A Mitigated Negative Declaration (SCH #2022060272) was prepared for this project pursuant to the provisions of CEQA and adopted by the County.
3. Mitigation measures were made a condition of the approval of the project.
4. A statement of Overriding Considerations was not adopted for this project.

This is to certify that the Mitigated Negative Declaration and record of project approval is available to the General Public for review at the Yolo County Community Services Department located at 292 W Beamer Street, Woodland, California.
