The District is required to consider the potential effects of a funded project on the natural and human environment under the California Environmental Quality Act (CEQA) (Division 13 PRC (§21000 et seq)).

The Beaumont Cherry Valley Water District proposes to upgrade and replace existing pipeline infrastructure for 6 pipeline segments. Pipeline 2 is located in Bing Place from Napoleon Street to the end of the cul-de-sac, a distance of approximately 240 feet. Pipeline 3 is located in Star Lane, Sky Lane, and View Drive, a distance of approximately 390 feet for Star Lane, 390 feet for View Drive and 295 feet in length for Sky Lane. Pipeline 4 is located in Utica Way from Vineland Street to an existing inline valve. Pipeline 5 is located in Avenida Sonrisa from Avenida San Timoteo to Avenida Miravilla, a distance of approximately 1,380 feet. Pipeline 6 is located in Avenida Miravilla near Quail Road, a distance of approximately 300 feet.

On the basis of the Initial Study, the District has concluded that the project will not have a significant effect on the environment with the incorporation of proposed mitigation measures and, therefore, has prepared a Mitigated Negative Declaration. Copies of the Initial Study and Mitigated Negative Declaration are on file and available for review at 560 Magnolia Ave, Beaumont, CA 92223, Monday through Friday, between 8:00 a.m. and 5:00 p.m., or online at <https://bcvwd.org>.

This notice is given in order to provide all parties an opportunity to be heard and to present their views regarding this application. If the commenter believes that the project may have a significant environmental effect, it would be helpful to identify the specific effect, explain why the effect

would occur, and why it would be significant. The public review period for the Mitigated Negative Declaration was from June 16, 2023 to July 17, 2023.
