Present Land Use/Zoning/General Plan Designation:

Project Description: *(please use a separate page if necessary)*

See attached page.

Project Description

DWR is seeking approval of long-term operations of the SWP facilities in the Delta, Suisun Marsh, and Suisun Bay to continue to provide water supply for agricultural, municipal, and industrial uses, along with the additional benefits to recreation and the environment in compliance with all applicable laws and regulations, including contractual obligations. SWP operations will be coordinated with DWR's implementation of the Voluntary Agreements, an alternative implementation approach for satisfying the revised State Water Resources Control Board's Bay-Delta Water Quality Control Plan, including flows to satisfy legal obligations under both endangered species laws and the Voluntary Agreements should the Voluntary Agreements be adopted by the State Water Resources Control Board. Considering other ongoing regulatory processes, the project will provide a framework for future projects involving SWP operations to come online.

The EIR will evaluate potential impacts associated with long-term operations of the SWP including:

- Updated operating criteria, including operations of SWP facilities in the Delta such as pumps, the Suisun Marsh Salinity Control Gates, and the North Bay Aqueduct.
- Measures that may be adopted to avoid, minimize, or mitigate impacts to listed species resulting from SWP long-term operations.

No new infrastructure facilities are included in the proposed project and long-term SWP operations would not change DWR's water rights or impact the water rights of any other legal user of water.

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X".
If you have already sent your document to the agency please denote that with an "S".
