

**Summary Form for Electronic Document Submittal****Form F**

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 202306467Project Title: Long-term Operations of the State Water Project facilities in the Sacramento-San Joaquin Delta, Suisun MLead Agency: Department of Water ResourcesContact Name: Chris WilkinsonEmail: christopher.wilkinson@water.ca.gov Phone Number: 916-653-5791Project Location: Various

Project Description (Proposed actions, location, and/or consequences).

Project Description and Purpose: DWR is seeking approval of long-term operations of the SWP facilities in the Delta, Suisun Marsh, and Suisun Bay to continue to provide water supply for agricultural, municipal, and industrial uses, along with benefits to the environment in compliance with all applicable laws and regulations, including contractual obligations. The CEQA project encompasses the Sacramento River from the Feather River confluence to the Delta, waters of the Delta, Suisun Marsh, and Suisun Bay, and the SWP facilities in the Delta, Suisun Marsh, and Suisun Bay. SWP operations will be coordinated with DWR's implementation of the Voluntary Agreements, an alternative implementation approach for satisfying the revised State Water Resources Control Board's Bay-Delta Water Quality Control Plan, including flows to satisfy legal obligations under both endangered species laws and the Voluntary Agreements, should the Voluntary Agreements be adopted by the State Water Resources Control Board. Considering other ongoing regulatory processes, the project will provide a framework for future projects involving SWP operations to come online. The Draft EIR evaluates potential impacts associated with long-term operations of the SWP including:

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

Anticipated Impacts: The Draft EIR analyzed the following environmental resources in detail: Surface Water Hydrology; Surface Water Quality; Aquatic Biological Resources; Tribal Cultural Resources; Environmental Justice; Climate Change Resiliency and Adaptation; Growth Inducement; and Cumulative Effects. There are no significant environmental effects anticipated on environmental resources analyzed in the Draft EIR.

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

Areas of controversy identified by the public and other agencies in response to the NOP include:  
Whether alternatives that incorporate actions to reduce demand for water from the Delta should be considered.  
Whether alternatives that incorporate actions to reduce impacts on fish species should be considered.  
Surface water hydrology and water quality impacts due to the operations of the Proposed Project should be considered.  
Climate change effects, floods, and drought should be considered in relation to the operations of the Proposed Project.  
Long-term effects and future water needs due to the operations of the Proposed Project should be considered.

Provide a list of the responsible or trustee agencies for the project.
