Attached please find our PHASE I ENVIRONMENTAL SITE ASSESSMENT, ("the Report") for the above-mentioned Subject Property. This report has been prepared by Odic for the Client under the professional supervision of the principal and/or senior staff whose seal(s) and signatures appear hereon. Neither Odic, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties, and has no personal bias with respect to the parties involved.

The assessment was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation, expressed or implied, and no warranty or guarantee is included or intended. The Report speaks only as of its date, in the absence of a specific written update of the Report, signed and delivered by Odic.

There are no intended or unintended third party beneficiaries to this Report, unless specifically named. Odic is an independent contractor, not an employee of either the issuer or the borrower, and its compensation was not based on the findings or recommendations made in the Report or on the closing of any business transaction. Thank you for the opportunity to prepare this Report, and assist you with this project. Please call us if you have any questions or if we may be of further assistance.

By signing below, Odic declares that, to the best of our professional knowledge and belief, the undersigned meet the definition of an Environmental Professional as defined in §312.10 of 40 CFR 312 and have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. Odic has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Respectfully Submitted,

Mike Miller  
Senior Consultant per §312.10 of 40 CFR 312

# CERTIFICATE OF LIABILITY INSURANCE

DATE (MM/DD/YYYY)

10/15/2021

THIS CERTIFICATE IS ISSUED AS A MATTER OF INFORMATION ONLY AND CONFERS NO RIGHTS UPON THE CERTIFICATE HOLDER. THIS CERTIFICATE DOES NOT AFFIRMATIVELY OR NEGATIVELY AMEND, EXTEND OR ALTER THE COVERAGE AFFORDED BY THE POLICIES BELOW. THIS CERTIFICATE OF INSURANCE DOES NOT CONSTITUTE A CONTRACT BETWEEN THE ISSUING INSURER(S), AUTHORIZED REPRESENTATIVE OR PRODUCER, AND THE CERTIFICATE HOLDER.

**IMPORTANT:** If the certificate holder is an ADDITIONAL INSURED, the policy(ies) must have ADDITIONAL INSURED provisions or be endorsed. If SUBROGATION IS WAIVED, subject to the terms and conditions of the policy, certain policies may require an endorsement. A statement on this certificate does not confer rights to the certificate holder in lieu of such endorsement(s).

## EXECUTIVE SUMMARY

ODIC Environmental (hereinafter referred to as ODIC) performed a *Phase I Environmental Site Assessment* (hereinafter *Phase I ESA* or *Report*) of the subject property (hereinafter referred to as the Property) in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to or deletions from this practice are described in the individual sections of this Report. A summary of findings is provided below:

SUMMARY OF FINDINGS
<b>CURRENT PROPERTY ADDRESS(ES)</b>
The Property address is 2110 Old Middlefield Way, Mountain View, Santa Clara County, CA 94043.
<b>PROPERTY DESCRIPTION</b>
The Property is a 0.32-acre rectangular-shaped unpaved vacant lot. The Property was formerly occupied by a gas station and an automotive repair shop until 2008 when all improvements including the fueling system features were removed.
<b>SUMMARY OF PROPERTY RECONNAISSANCE</b>
The Property is an unpaved vacant lot. Site reconnaissance revealed no evidence of underground storage tanks, clarifiers, sumps, hazardous materials, or other environmental concerns.
<b>HISTORICAL USE OF THE PROPERTY AND VICINITY</b>
<u>Property History Summary:</u>  Per historical aerial photographs it appears that the Property was developed with a gas station by 1939. An apparent canopy was visible on the southeastern portion of the site, a building was on the western portion, and a smaller building may have also been on the northern portion at that time. These improvements remained until at least 1960. By 1963 the Property had been redeveloped; the aforementioned canopy was no longer visible and at least one building and possible canopies were on the western and northern portions. By 1980 additions were made to the building and a concrete patch was visible on the southeastern portion of the site, indicative of the location of underground storage tanks (USTs). The facility operated as an ARCO-branded gas station and included an automotive repair shop on the central / northwestern portion. In August and September 2008, all improvements and fueling system features were removed. The Property has remained as an unpaved vacant lot since that time.
<u>Closed Leaking Underground Storage Tank (LUST) Case:</u>  On May 12, 1986, a Leaking Underground Storage Tank (LUST) case was opened due to a release of fuel from the gas station. Extensive soil and groundwater investigations and remediation activities were conducted at the Property from 1986 until 2016. In May 1989, three gasoline USTs (two 10,000-gallon tanks and one 8,000-gallon tank) were removed from the southeastern portion of the Property and were replaced with three 12,000-gallon gasoline USTs. A 280-gallon waste oil UST was also discovered and removed at that time. Approximately 700 cubic yards of soil, 150 cubic yards of pea gravel, and 14,400 gallons of groundwater were removed and disposed of during the UST replacement activities. In 1992, an oil-water separator was removed from within the former automotive repair shop building; elevated levels of petroleum hydrocarbons were detected in soil samples collected at that time.
From August 1989 to August 2004, site investigation and remediation were conducted at the Property which included soil vapor extraction (SVE), dual phase extraction (DPE), and in-situ Submerged Oxygen Curtain (iSOC). In January 2002, 20,595 gallons of hydrocarbon-impacted groundwater were extracted. In October 2002 dispensers and fuel piping were removed and replaced during upgrade activities. From June 2003 to August 2004, the iSOC system was implemented. In August and September 2008 fuel

dispensing operations ceased and the improvements and fueling system features were removed, including the removal of the three 12,000-gallon USTs, one 550-gallon waste oil UST, four dispensers, two hydraulic lifts, product piping, two overhead canopies, and an automotive repair shop building. In a 2014 Low-Threat Underground Storage Tank Case Closure Report, the rationale was detailed for Low-Threat UST Case Closure qualifications including the Low-Threat Closure Policy (LTCP) for Vapor Intrusion to Indoor Air. Per a letter issued by the County of Santa Clara Department of Environmental Health (SCEH) on August 26, 2015, no additional work to assess potential vapor intrusion was required. In 2016 groundwater samples were collected down-gradient (to the northwest) to further delineate the methyl tertiary-butyl ether (MTBE), tertiary-butyl alcohol (TBA), and 1,2-dichloroethane (1,2-DCA) groundwater contaminant plumes. The analytical results were non-detectable to low levels of these contaminants (the detected concentrations were below the established Environmental Screening Levels (ESLs)). Since the contaminant plume was adequately delineated and contaminant concentrations were found to be stable to decreasing, the County of Santa Clara Department of Environmental Health (SCEH) issued a "No Further Action" closure letter for the LUST case on September 7, 2017 under Site Management Requirements for remaining residual soil and groundwater contamination.

The Santa Clara County Department of Environmental Health Local Oversight Program (SCEH – LOP) provided the following Site Management Requirements in a Case Closure Summary dated February 3, 2017:

*The site is currently an undeveloped vacant lot. Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH (Department of Environmental Health) and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.*

The following additional Site Management Requirements were stated in a September 7, 2017 "No Further Action" letter from the County of Santa Clara Department of Environmental Health (SCEH):

*Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time. It should be noted that any additional or previously unidentified contamination at this site may require further investigation or cleanup.*

Vicinity History Summary:

The vicinity was primarily vacant and/or agricultural land with sparse residential development until increased residential and commercial development began sometime 1943 and 1948. Increased development took place thereafter. By 1963, the vicinity was primarily commercially developed. Greatly increased commercial development has taken place since that time.

**FEDERAL, STATE, AND LOCAL AGENCY RECORDS RESEARCH**

The Property was identified on the following researched environmental databases: Facility Index System (FINDS), California Environmental Reporting System (CERS), Underground Storage Tank (UST), Statewide Environmental Evaluation and Planning System – Underground Storage Tank (SWEEPS UST), Historical Underground Storage Tank (HIST UST), California Facility Inventory Database Underground Storage Tank (CA FID UST), Leaking Underground Storage Tank (LUST), Recovered Government Archive Leaking Underground Storage Tank (RGA LUST), Historical Leaking Underground Storage Tank (HIST LUST), Cortese, Historical Cortese (HIST CORTESE), CA CUPA Listings, Emergency Response Notification System (ERNS), Hazardous Waste Information System (HAZNET), Hazardous Waste Tracking System (HWTS), and on the EDR Hist Auto Stations proprietary database.

These database listings pertain to the operation of the Property as a gas station and an automotive repair shop, as well as a closed LUST case. Records were available on the California State Water Resources Control Board (SWRCB) online GeoTracker database in association with the LUST case. The subsurface of the Property and vicinity (primarily to the north) has been extensively investigated and characterized. The LUST case was opened on May 21, 1986 and closed on September 7, 2017. Refer to Section 4.1 for further details regarding investigations associated with the LUST case.

Numerous records were available from the City of Mountain View Fire Department (MVFD) that are associated with the historical operation of the Property as a gas station and the aforementioned closed LUST case. Records obtained from the County of Santa Clara Department of Environmental Health (SCEH) pertained to the operation of the Property as a gas station and an automotive repair shop. The records consisted of inspection reports, hazardous waste generator permit applications, a waste inventory, and a hazardous waste manifest. A 500-gallon waste oil UST, used motor oil (500 gallons generated annually), used anti-freeze (50 gallons generated annually), and used “solvent” (15 gallons generated annually) were reported.

Records obtained from the Bay Area Air Quality Management District (BAAQMD) pertained to permitting for the former gas station. It was reported that the gas station was demolished in September 2008.

**POTENTIAL OFF-SITE CONCERNS**

No properties within the specified search distances were identified that are assessed to pose significant environmental risk to the Property.

**NON-SCOPE ITEMS**

Unless the *Client* contracted ODIC to investigate specific Non-Scope or Non-CERCLA items, evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.5 of this Report, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13.

**INACCESSIBLE OR UN-SURVEYED PORTIONS OF THE PROPERTY**

Full access to the entire Property was provided to ODIC, and there were no notable portions of the Property excluded from the survey and field inspection.

**SIGNIFICANT DATA GAP**

None

## FINDINGS AND RECOMMENDATIONS

### SUMMARY OF FINDINGS

#### CONCLUSIONS AND FINDINGS

ODIC Environmental (ODIC) performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13. ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *Property*: (1) due to *release* to the *environment*; (2) under conditions indicative of a *release* to the *environment*; or (3) under conditions that pose a *material threat* of a future *release* to the *environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* conditions are not *Recognized Environmental Conditions*.

- This environmental assessment has revealed no RECs in connection with the Property.

A *Historical Recognized Environmental Condition (HREC)* is a past *release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *Property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *Property* to any required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

- This environmental assessment has revealed no HRECs in connection with the Property.

A *Controlled Recognized Environmental Condition (CREC)* is a *Recognized Environmental Condition* resulting from a past *release* of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *Property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

The following CREC was identified in connection with the Property:

As summarized above, a closed LUST case is associated with the Property. Residual contamination was permitted to remain in place by regulatory authorities at the time of case closure. This is a CREC. See Section 4.1 for details.

#### RECOMMENDATIONS AND OPINIONS

ODIC performed a Phase I Environmental Site Assessment of the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

- ODIC recommends that the Property Owner / Operator continue to abide by the above-cited Site Management Requirements, as well as any additional requirements as may be imposed by oversight agencies. Otherwise, ODIC recommends No Further Investigation at this time.

## 1.0 INTRODUCTION

ODIC Environmental (ODIC) performed a *Phase I Environmental Site Assessment Report* (hereinafter referred as "*Phase I ESA*" or "*Report*") of the Property in conformance with the scope and limitations of the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, *ASTM Designation E1527-13*.

This *Report* documents the methods and findings of the *Phase I ESA* performed in general conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) for the Property.

This *Report* has been prepared by ODIC for the *Client* under the professional supervision of the principal and/or senior staff whose seal(s) and signature(s) appear hereon. Neither ODIC, nor any staff member assigned to this investigation has any interest or contemplated interest, financial or otherwise, in the subject or surrounding properties, or in any entity which owns, leases, or occupies the subject or surrounding properties or which may be responsible for environmental issues identified during the course of this investigation, and has no personal bias with respect to the parties involved.

### PURPOSE AND OBJECTIVE

The purpose of this practice is to define good commercial and customary practice for conducting an *environmental site assessment* of a parcel(s) of *commercial real estate* with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and *petroleum products*. As such, this practice is intended to permit a *User (Client, Purchaser, Lender, Owner)* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"): that is, the practice that constitutes "*all appropriate inquiry* into the previous ownership and uses of the *Property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

Another purpose of this *Phase I ESA* is to assist the *Client* in its underwriting of a proposed mortgage loan on the Property, if this *Report* is prepared as a part of a pre-financing environmental due diligence, and to identify *Recognized Environmental Conditions (RECs)* in connection with the Property described in this *Report*.

ASTM Standard Practice E1527-13 defines a *Recognized Environmental Condition (REC)* as the presence or likely presence of any *hazardous substances* or *petroleum products* in, on, or at a *property*: (1) due to *release to the environment*; (2) under conditions indicative of a *release to the environment*; or (3) under conditions that pose a *material threat* of a future *release to the environment*. Conditions determined to be *de minimis* generally do not present a threat to human health or the *environment* and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis conditions* are not *Recognized Environmental Conditions* or *Controlled Recognized Environmental Conditions*.

A *Controlled Recognized Environmental Condition (CREC)* is a *Recognized Environmental Condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (for example, *property use restrictions, activity and use limitations, institutional controls, or engineering controls*).

A *Historical Recognized Environmental Condition (HREC)* is a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

SCOPE OF WORK

This Report was prepared for the exclusive use of the Client or User of this Report. The information reported was obtained through sources deemed reasonably ascertainable, as defined in ASTM Standard Practice E1527-13; a visual survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property. Municipal information was obtained through file reviews of reasonably ascertainable standard government record sources, and interviews with the authorities having jurisdiction over the Property. Findings, conclusions, and recommendations included in the Report are based on our visual observations in the field, the municipal information reasonably obtained, information provided by the Client (or User), and/or a review of readily available and supplied documents.

The scope of work for this Phase I ESA is in general accordance with the requirements of ASTM Standard Practice E 1527-13. This assessment included: 1) Property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of standard historical sources; 4) a review of standard regulatory agency records; and 5) a review of a regulatory database report provided by a third-party company such as Environmental Data Resources (EDR).

LIMITATIONS AND EXCEPTIONS

ODIC renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property, which are described below. ODIC relies completely on the information, whether written, graphic or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this Report are valid on the date of the survey. Where access to portions of

the Property or to structures on the Property was unavailable or limited, ODIC renders no opinion as to the presence of petroleum products or hazardous substances in that portion of the Property or structure. In addition, ODIC renders no opinion as to the presence of, or indirect evidence relating to, petroleum products or hazardous substances where direct observation of the interior walls, floor, or ceiling of a structure was obstructed by objects or coverings on or over these surfaces.

The conclusions provided by ODIC are based on the information obtained by visual survey of the Property, and information provided by agents representing the Property, or agents of the owner. In addition, ODIC has relied on certain information provided by state and other referenced parties, and on information contained in the files of federal, state and/or local agencies available to ODIC at the time of the assessment. Although there may have been some degree of overlap in the information provided by these various sources, ODIC did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of these Environmental Services.

CERCLA Requirements Other Than *All Appropriate Inquiry* (ASTM Standard Practice E1527-13 1.1.3) - This practice does not address whether requirements in addition to *All Appropriate Inquiries* have been met in order to qualify for the *LLPs* (specified in 42 U.S.C. §9607(b)(3)(a) and (b) including the continuing obligation not to impede the integrity and effectiveness of *Activity and Use Limitations*), or the duty to take reasonable steps to prevent releases, or the duty to comply with legally required release reporting obligations).

It is acknowledged that ODIC's judgments shall not be based on scientific or technical tests or procedures beyond the Scope of Services or beyond the time and budgetary constraints imposed by the *Client*. It is acknowledged further that ODIC's conclusions shall not rest on pure science but on such considerations as economic feasibility and available alternatives. The *Client* also acknowledges that, because geologic and soil formations are inherently random, variable, and indeterminate in nature, the conclusions and opinion of this *Report* are not guaranteed to be a representation of actual conditions on the Property, which are also subject to change with time as a result of natural or man-made processes, including water permeation.

In performing the Services, ODIC shall use that the degree of care and skill ordinarily exercised by environmental consultants or engineers performing similar services in the same or similar locality. The standard of care shall be determined solely at the time the Services are rendered and not according to standards utilized or in effect at a later date. The Services shall be rendered without any other warranty, expressed or implied, including, without limitation, the warranty of merchantability and the warranty of fitness for a particular purpose.

It should be noted that certain conditions may not have been reasonably identifiable or ascertainable from the available information during the course of this *Report*. ODIC assumes that information obtained from the records review and the interviews concerning the Property is reliable. However, ODIC cannot and does not warrant or guarantee that the information provided by these or other sources is accurate or correct.

Some of the information provided in this *Report* is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This *Report* is subject to the limitations of historical documentation, availability, and accuracy of the pertinent records, and the personal recollections of those persons contacted. This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the *LLPs*. Furthermore, this *Report* does not intend to address health and safety concerns, if any, associated with the Property.

The *Phase I ESA* was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession, and in accordance with generally accepted practices of other consultants currently practicing in the same locality under similar conditions. No other representation,

expressed or implied, and no warranty or guarantee is included or intended. The *Report* speaks only as of its date, in the absence of a specific written update of the *Report*, signed and delivered by ODIC.

Controlled substances are not included within the scope of this standard. Persons conducting an *environmental site assessment* as part of an EPA Brownfields Assessment and Characterization Grant awarded under CERCLA 42 U.S.C. §9604(k)(2)(B) must include controlled substances as defined in the Controlled Substances Act (21 U.S.C. §802) within the scope of the assessment investigations to the extent directed in the terms and conditions of the specific grant or cooperative agreement. Additionally, an evaluation of *business environmental risk* associated with a parcel of *commercial real estate* may necessitate investigation beyond those identified in this practice.

#### SIGNIFICANT ASSUMPTIONS AND LIMITING CONDITIONS

The objective of ASTM Standard Practice E1527-13 is to help *Users* qualify for one of the CERCLA Landowner Liability Protections (LLPs). *Users* should be aware that there are other federal, state, and local environmental laws and regulations that can impose liabilities and obligations on owners and operators of real property that are outside the scope of this practice. This practice does not address all possible environmental liabilities that a *User* may need to consider in the context of a commercial real estate transaction. Therefore, *Users* may desire to expand the scope of pre-purchase or pre-finance due diligence to assess other business environmental risks that exist beyond CERCLA liability associated with the Property.

Business Environmental Risk (BER) is a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of commercial real estate, and is not an issue required to be investigated under this practice. A BER may include one or more of the non-scope issues contained in Non-Scope Considerations. Evaluation of Non-Scope or Non-CERCLA items, including those addressed in this *Report*, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the *User* based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the *User* and ODIC including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of ASTM Standard Practice E1527-13, not part of this *Report*, and should only be included in the *Report* if so specified in the terms of engagement between the *User* and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13).

ASTM Standard Practice E1527-13 does not encompass analytical testing to evaluate Asbestos Containing Materials (ACM), radon, lead-based paint (LBP), drinking water quality, lead in drinking water, wetlands, regulatory compliance, cultural and historical resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, mold, stored chemicals, debris, fill materials, surface water, or subsurface samples (soil and groundwater) as part of a Phase I ESA. Such additional information regarding non-ASTM Standard Practice E1527-13 issues may be provided merely for the *User's* convenience, and cannot be used to bind this *Report* as a whole to the compliance and conformance with ASTM Standard Practice E1527-13. No disassembly of systems or building components or physical or invasive testing is to be performed unless the *Client* specifically calls for such testing as an additional scope of work.

ODIC has performed this *Phase I ESA* in conformance with the scope and limitations of ASTM Standard Practice E1527-13. This *Report* may not include all environmental conditions which can materially impact the Property other than those defined as RECs in ASTM Standard Practice E1527-13.

ODIC is not contracted to perform *Environmental Liens* and *Activity and Use Limitations (AULs)* searches via title records, and such is beyond the scope of services included in this *Report*. Information pertaining to deed restrictions and environmental liens, Activity/Use Limitations, title search/report was requested from the *Report User*. This information may or may not be provided to ODIC at the time of the assessment. See pertinent sections of this *Report* for further discussion.

Interviews with past or current owners, operators and occupants may not be reasonably ascertainable and can constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 4.0), this data gap may or may not be expected to alter the findings of this assessment.

Adjoining sites, neighboring sites, or surrounding properties mentioned in this *Report* are defined only up to one parcel immediately next to the Property, and ODIC will only evaluate immediately adjoining properties to identify historical use of the surrounding areas via historical sources or data available for adjoining properties, and/or walk-through visual inspection along the Property's perimeters to identify obvious signs of environmental concerns.

It is often not possible (under the "*reasonably ascertainable*" clause of the ASTM Standard Practice E1527-13) to identify every single historical business tenant or occupant of the Property. ODIC cannot be liable for not identifying all such past tenants or occupants of the Property.

This ESA did not necessarily comply with the ASTM Standard Practice E2600-15 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." For assessment of potential "vapor encroachment conditions" (VECs) and to determine if a "vapor intrusion condition" (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-13 is required.

For the purposes of ASTM Standard Practice E1527-13, "migrate" and "migration" refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM Standard Practice E2600-15; however, nothing in this practice (ASTM Standard Practice E1527-13) should be construed to require application of ASTM Standard Practice E2600-15 standard to achieve compliance with all appropriate inquiries.

#### USER RELIANCE

This investigation was conducted in accordance with the *Client's* Environmental Site Assessment scope of work for the use and benefit of the *Client* and assignees. It is based, in part, upon documents, writings, and information owned, possessed, or secured by the *Client*. Neither this *Report*, nor any information contained herein, shall be used or relied upon for any purpose by any other person or entity without the express written permission of the *Client*.

All reports, both verbal and written, are for the sole use and benefit of the *Client*. Either verbally or in writing, third parties may come into possession of this *Report* or all or part of the information generated as a result of this work. In the absence of a written agreement with ODIC granting such rights, no third parties shall have rights of recourse or recovery whatsoever under any course of action against ODIC, its officers, employees, vendors, successors or assigns. Any such unauthorized user shall be responsible to protect, indemnify and hold ODIC, the *Client* and their respective officers, employees, vendors, successors and assigns harmless from any and all claims, damages, losses, liabilities, expenses (including reasonable attorneys' fees) and costs attributable to such use. Unauthorized use of this *Report* shall constitute acceptance of and commitment to these responsibilities, which shall be irrevocable and shall apply regardless of the cause of action or legal theory pled or asserted. Additional legal penalties may apply.

#### INDEPENDENT CONTRACTOR STATUS / PROFESSIONAL RESPONSIBILITY

In performing Services under the mutually agreed contractual agreement and engagement, ODIC operates as, and has the status of, an independent contractor. Subject to any limitations established by the *Client* as to the degree of care and amount of time and expenses to be incurred and any other limitations contained in the mutually agreed contractual agreement and engagement, ODIC performs the Services consistent with the level of care and skill ordinarily exercised by other professional consultants under similar circumstances at the time the Services are performed. *Client* hereby acknowledges that whenever a Project involves hazardous or toxic materials there are certain inherent risk factors involved (such as limitations on laboratory analytical methods, variations in subsurface conditions, economic loss to *Client* or Property owner, a potential obligation for disclosure to regulatory agencies, a potential for a decrease in market value of real property, and the like) that may adversely affect the results of the Project, even though the Services are performed with such skill and care. No other representation, warranty, or guarantee, express or implied, is included or intended by the mutually agreed contractual agreement and engagement.

#### QUALIFICATION STATEMENT OF ENVIRONMENTAL PROFESSIONAL

ODIC states that this ESA was performed under *Environmental Professional (EP)*'s direct supervision, that he/she has prepared and/or reviewed and approved the *Report*, and that the methods and procedures utilized in the development of this *Report* conform at least to minimum industry standards using both the *ASTM International*, formerly known as the *American Society for Testing and Materials (ASTM)*, Standard Practice E1527-13 and the United States – Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (40 CFR Part 312) as guidelines. ODIC certifies that ODIC's *Environmental Professionals* and *Subcontractors* are properly licensed, qualified, and/or certified to conduct *Phase I Environmental Site Assessments*.

ODIC's EP declares that, to the best of his/her professional knowledge and belief, he/she meets the definition of *Environmental Professional* as defined in 40 CFR Part 312. ODIC's EP who prepared this assessment possesses the specific qualifications based upon education, training and experience to assess a property of the nature, history, and setting of the Property. ODIC has performed the "*All Appropriate Inquiries*" in accordance with the standards and practices as defined in 40 CFR Part 312.

## 2.0 PROPERTY DESCRIPTION

### 2.1 PROJECT INFORMATION

Project Information	
ITEM	
Project Number	6374868-ESAI
Property Address(es)	The Property address is 2110 Old Middlefield Way, Mountain View, Santa Clara County, CA 94043.
Historical/Alternate Property Address(es)	None were identified. Source: Not applicable.
Tax Assessor's Parcel Number	147-07-048
Property Inspection Date	December 11, 2021
Weather Condition	Sunny, approximately 70 degrees Fahrenheit
Site Visit Conducted by	Richard Kim, Senior Environmental Consultant
Report Author	Haley Shivers, Environmental Consultant
QA/QC Environmental Professional	Michael A, Miller, M.S., Senior Environmental Consultant
Property Location	The Property is located at the northwest corner of the intersection of Old Middlefield Way and North Rengstorff Avenue.
General Setting	The general setting is mixed-use: commercial and residential.

### 2.2 PROPERTY IMPROVEMENTS

Property Improvements & Building / Land Description	
ITEM	
Property Description	The Property is a 0.32-acre rectangular-shaped unpaved vacant lot. The Property was formerly occupied by a gas station and an automotive repair shop until 2008 when all improvements including the fueling system features were removed.
	Data Source(s) for Parcel Size: TitlePro 247 property profile
	Data Source(s) for Building Size(s): Not applicable; there are no improvements on the Property.
Estimated Year of Construction	Not applicable; there are no improvements on the Property.
	Data Source(s): Not applicable.
Improvement Description	Not applicable; there are no improvements on the Property.
	See Property Description above for additional details. See also appended photographs and site plot plan.
Other Improvements & Features (including description of unimproved areas)	The perimeter of the Property is fenced.

### 2.3 PROPERTY OCCUPANTS & USE

Property Occupants & Use
--------------------------

ITEM	
Present Occupant(s) and Detailed Description of Business Operation(s)	The Property consists of an unpaved vacant lot. It was formerly occupied by a gas station and an automotive repair shop until 2008 when the improvements including the fueling system features were removed.

#### 2.4 MUNICIPAL SERVICES & UTILITIES

Municipal Services & Utilities	
ITEM	
Potable Water Supply	None currently
Natural Gas Utility Provider	None currently
Electrical Utility Provider	None currently
Sewage Disposal System	None currently
Solid Waste Disposal	None currently
Any Septic System, Cesspool, Seepage Pits	None were identified.
Private Water Well	None were identified.
Heating/Cooling System	None currently

#### 2.5 PHYSICAL SETTING

##### TOPOGRAPHY

The Property's physical location was researched employing a United States Geological Survey (USGS) 7.5 Minute Topographic Quadrangle (Quad) Map relevant to the Property. The USGS 7.5 Minute Quad Map has an approximate scale of 1 inch to 2,000 feet, and may show physical features with environmental significance such as wetlands, water bodies, roadways, mines, and buildings. The elevation of the Property is approximately 20 feet above mean sea level. There is a regional downslope to the north.

##### GEOLOGY AND HYDROGEOLOGY

Geologic and hydrogeologic information was obtained from site assessment documents prepared for the Property:

*Based on previous investigations, lithology beneath the Site is predominantly composed of alluvial deposits with alternating fine- and coarse-grained soil types. Silt, silty clay, and clay are the primary soils ranging from roughly near surface to beneath 8 and 14 feet below ground surface (bgs), however some boring logs identify fine grained soils extending to 17 feet bgs. These sediments are underlain by a coarse-grained unit consisting of clayey sands through silty gravels that varies in thickness extending from between 8 and 20 feet bgs. Fine grained soils are again the predominant soil type from approximately 20 to 44 feet bgs, the depth to which the majority of soil borings have been advanced. A small lens of silty to well graded sand was reported between approximately 34 and 36 feet bgs, but appears to be discontinuous. Lithologic information provided by an off-site boring, indicates that large lenses of coarse and fine-grained soils alternate at this location in the following order: silty sand, gravelly sand, and sandy gravel from approximately 27 to 45 feet bgs, clay from approximately 45 to 54 feet bgs, gravelly sand from approximately 54 to 95 feet bgs, silty to sandy clay from approximately 95 to 123 feet bgs, and a dense clay unit from 125 to 172*

*feet bgs. Gravelly sand zones approximately two feet thick were identified at 123 and 152 feet bgs and a sandy gravel horizon was identified at approximately 172 feet bgs to the total depth explored of 177 feet bgs.*

*The Site is located in the Santa Clara Subbasin of the Santa Clara Valley Groundwater Basin. The Santa Clara Subbasin occupies a structural trough parallel to the northwest trending Coast Ranges and is bounded on the east by the Diablo Range and on the west by the Santa Cruz Mountains. The water bearing formation include Pliocene to Holocene age deposits of unconsolidated to semi-consolidated gravel, sand, silt, and clay. Historically, groundwater levels decreased in the subbasin due to local pumping, which caused degradation of the aquifer adjacent to the San Francisco Bay from salt-water intrusion. Artificial recharge is currently conducted within the subbasin.*

*Two water-bearing zones were encountered in an off-site deep boring, from approximately 10 to 45 feet bgs and from 54 to 95 feet bgs, with a moderately dense clay unit separating the two zones. Beneath the second permeable zone, two thick dense, fine-grained (predominantly clay) units were encountered at approximately 95 and 127 feet bgs. A deeper water bearing zone was reported at approximately 172 feet bgs and artesian conditions were encountered at 173 feet bgs.*

Per a 2015 Groundwater Monitoring Report, the depth to water was between 6.6 to 8.78 feet below top of casing. The groundwater flow direction was toward the northwest at a gradient of 0.004.

[https://documents.geotracker.waterboards.ca.gov/regulators/deliverable\\_documents/6098269402/SCM\\_R\\_2012-07-05.pdf](https://documents.geotracker.waterboards.ca.gov/regulators/deliverable_documents/6098269402/SCM_R_2012-07-05.pdf)

[https://documents.geotracker.waterboards.ca.gov/esi/uploads/geo\\_report/1256135940/T0608500170.PDF](https://documents.geotracker.waterboards.ca.gov/esi/uploads/geo_report/1256135940/T0608500170.PDF)

While groundwater flow direction at the Property cannot be confirmed without survey measurement of static groundwater level at triangulated points, it is expected to flow in the direction of surface topographical contour, or toward the wetland or nearest water body or discharge basin (percolation channel).

It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells. Depth and gradient of the water table can change seasonally in response to variation in precipitation and recharge, and over time, in response to urban development such as storm water controls, impervious surfaces, pumping wells, cleanup activities, dewatering, seawater intrusion barrier projects near the coast, and other factors.

### 3.0 PROPERTY RECONNAISSANCE

#### 3.1 LIMITING CONDITIONS

The information reported herein was obtained through sources deemed reliable, a visual site survey of areas readily observable, easily accessible or made accessible by the Property contact, and interviews with owners, agents, occupants, or other appropriate persons involved with the Property.

No disassembly of systems or building components or physical or invasive testing was performed. ODIC renders no opinion as to the Property condition at un-surveyed and/or inaccessible portions of the Property. ODIC relies completely on the information, whether written, graphic or verbal, provided by the Property contact or as shown on any documents reviewed or received from the Property contact, owner or agent, or municipal source, and assumes that information to be true and correct. The observations in this *Report* are valid on the date of the survey. Note: Typically lenders have environmental policies where due diligence reports are valid for one year from the report date. However, such policies and standards can vary from each lender or *User*. For CERCLA landowner liability protection, Phase I ESA reports are valid for 180 days, per ASTM Standard Practice E1527-13.

#### 3.2 PROPERTY RECONNAISSANCE

ODIC conducted interior and exterior observations of the Property with the intent to identify *releases* or *material threat* of future *releases* of *hazardous substances* or *petroleum products* to the *environment*. The site reconnaissance table below lists items *visually and/or physically observed*.

<b>PROPERTY RECONNAISSANCE</b>
<b>Processes involving Petroleum Products or Hazardous Substances</b>
None were observed.
<b>Underground Storage Tanks (USTs)</b>
None were observed. The Property was formerly occupied by a gas station. All USTs were removed in 2008. Refer to Section 4.1 for details.
<b>Aboveground Storage Tanks (ASTs)</b>
None were observed.
<b>Fuel Islands / Dispensers, or any type of Fueling System/Operation</b>
None were observed.
<b>Containers or Drums of Hazardous Materials and/or Petroleum Products related to the Property's operations/processes</b>
None were observed.
<b>Unidentified Substance Containers: Other containers of suspect hazardous materials in drums, barrels, or other storage, or unlabeled/unidentified containers on site</b>
None were observed.
<b>Stained or Corroded Surfaces / Stained Soil (paved or unpaved)</b>
None were observed.
<b>Unusual Areas of Asphalt/Cement Patch or Surface Depressions including any possible boring locations</b>
None were observed.
<b>Stockpiled Soils, Fill Materials, or Soil Piles</b>

None were observed.
<b>Stressed Vegetation</b>
None were observed.
<b>Any type of Heavy Equipment or Machinery of environmental concern</b>
None were observed.
<b>Electrical or Hydraulic Equipment or Machinery of environmental concern</b>
None were observed.
<b>Drains for machinery/equipment cleaning or flushing</b>
None were observed.
<b>Drains, sumps, wastewater treatment units, oil/water separators, clarifiers, catch basins, drip pads, or sumps</b>
None were observed.
<b>Evidence of Onsite Surface Water Impoundment, Pits, Dry Wells or Sensitive Surface Water features such as lagoons, ponds, and other water bodies</b>
None were observed.
<b>Any Regulated Surface-Water Discharges, Illegal Dumping, Unauthorized Surface Runoff or Discharge to potentially impact water bodies</b>
None were observed.
<b>Stormwater or Surface Water Drainage System having any abnormal accumulation of petroleum or chemical run-off or foreign materials, any unusual blockage of the stormwater control systems</b>
None were observed.
<b>Pools of Liquid such as standing surface water, pools, or sumps containing liquids likely to be hazardous substances or petroleum products</b>
None were observed.
<b>Odors (strong, pungent, or noxious odors and their sources)</b>
None were observed.
<b>Septic Systems, Cesspools, Seepage Pits</b>
None were observed.
<b>Wells (private water wells, irrigation wells, injection wells, abandoned wells, groundwater-monitoring wells, dry wells, septic wells, oil wells, gas wells, domestic water wells, vapor recovery wells or other monitoring wells)</b>
None were observed. Former monitoring well locations at the adjacent sites and in the street were observed.
<b>Railroad Tracks or Spurs</b>
None were observed.
<b>Visual Evidence of Improper Handling/Disposal of Solid Wastes</b>
None were observed.

### 3.3 DETAILED DESCRIPTION OF SITE RECONNAISSANCE AND ENVIRONMENTAL CONDITIONS

The Property is an unpaved vacant lot. Site reconnaissance revealed no evidence of underground storage tanks, clarifiers, sumps, hazardous materials, or other environmental concerns.

### 3.4 CURRENT USES OF ADJACENT PROPERTIES

For the scope of this assessment, properties are defined and categorized based upon their physical proximity to the Property. An adjoining property is defined as any real property or properties in which the border is contiguous or partially contiguous with that of the Property, or that would be contiguous or partially contiguous with that of the Property but for a street, road, or other public thoroughfare separating them.

Adjacent Properties	
ITEM	
North	North of the Property is Driven Auto Care, an automotive repair shop at 826 North Rengstorff Avenue. T
Northeast	Northeast of the Property is North Rengstorff Avenue followed by Studio 819, a mixed-use commercial and residential building at 819 North Rengstorff Avenue. Papas & Eggs restaurant is located within this building to the east at 2070 Old Middlefield Way.
East	East of the Property is North Rengstorff Avenue followed by Studio 819 Avenue and Papas & Eggs at 819 North Rengstorff and 2070 Old Middlefield Way.
Southeast	Southeast of the Property is the intersection of Old Middlefield Way and North Rengstorff Avenue followed by Dennis Kobza & Associates architecture at 2083 Old Middlefield Way.
South	South of the Property is Old Middlefield Way followed by a retail strip mall at 2105 Old Middlefield Way. It is occupied by INdGO Indian Restaurant, Los Altos Taqueria, Donut Basket, The Don's Deli, and the Art School of SF Bay.
Southwest	Southwest of the Property is Old Middlefield Way followed by O'Malley's Sports Pub at 2135 Old Middlefield Way.
West	West of the Property is Public Storage at 830 North Rengstorff Avenue.
Northwest	Northwest of the Property is Public Storage at 830 North Rengstorff Avenue.

### 3.5 NON-SCOPE (NON-ASTM) CONSIDERATIONS

Evaluation of Non-Scope or Non-CERCLA items, including those addressed in Section 3.4 of this Report, is not required nor relevant for compliance with the AAI Rule or ASTM Standard Practice E1527-13. Inclusion of any non-scope item in a Phase I Environmental Site Assessment report is entirely within the discretion of the User based on its own risk tolerance. Non-Scope Consideration should not be construed as requiring the inclusion of any non-scope issues in a Phase I Environmental Site Assessment report.

Any additional services contracted for between the User and ODIC Environmental including a broader scope of assessment, more detailed conclusions, liability/risk evaluations, recommendation for Phase II testing or other assessment activities, remediation techniques, etc., are beyond the scope of Standard Practice E1527-13, are not part of this Report, and should only be included in the Report if so specified in the terms of engagement between the User and ODIC. Such additional services may include *business environmental risk* issues not included within the scope of this practice (ASTM Standard Practice E1527-13). No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive.

There may be environmental issues or conditions at a Property that parties may wish to assess in connection with *commercial real estate* that are outside the scope of this practice (the non-scope considerations). As noted by the legal analysis in Appendix X1 of ASTM Standard Practice E1527-13, some substances may be present on the Property in quantities and under conditions that may lead to contamination of the Property or of nearby properties but are not included in CERCLA's definition of *hazardous substances* (42 U.S.C. §9601(14)) or do not otherwise present potential CERCLA liability. In any case, they are beyond the scope of this practice.

Whether or not a *User* elects to inquire into non-scope considerations in connection with this practice or any other *environmental site assessment*, no assessment of such non-scope considerations is required for appropriate inquiry as defined by this practice.

<b>NON-SCOPE, NON-CERCLA ITEMS</b>	
<b>ITEM</b>	
Suspect asbestos-containing building materials (ACBM) in damaged condition if the structure is built prior to 1978	Not applicable; there are no improvements on the Property.
Suspect lead-based paint (LBP) in damaged condition if the structure is residential and was built prior to 1978	Not applicable; there are no improvements on the Property.
Lead in drinking water (LIW)	Not applicable; there are no improvements on the Property.
Radon	<p>Since a radon survey is not included in the scope of services for this Phase I ESA, ODIC did not test for radon at the Property.</p> <p>Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings.</p> <p>A review of the EPA's Map of Radon Zones indicates that Santa Clara County falls within Zone 2, a zone of moderate radon potential. Counties located within Zone 2 have a predicted average indoor radon screening level of 2 to 4 picocuries per liter (pCi/L), generally below EPA's radon action level of 4 pCi/L for residential structures. A radon survey was not included in the current scope of services.</p> <p><i>Source:</i>  <a href="https://www.epa.gov/sites/default/files/2014-08/documents/california.pdf">https://www.epa.gov/sites/default/files/2014-08/documents/california.pdf</a></p> <p>It should be noted that site-specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the Property radon levels.</p>
Urea Formaldehyde	Not applicable; there are no improvements on the Property.
Suspect PCB-oil concern with hydraulic equipment, ballasts, transformers, etc.	Since a PCB survey is not included in the scope of services for this Phase I ESA, ODIC did not test for PCBs at the Property.

<b>NON-SCOPE, NON-CERCLA ITEMS</b>	
<b>ITEM</b>	
Wetlands, creeks, swale, pits, ponds, lagoons, or any other water bodies	<p>A wetland is defined as areas inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands provide a number of economically and environmentally important functions such as flood control, water quality protection, groundwater recharge, spawning areas for commercially important fish, and wildlife habitat.</p> <p>Wetlands are evaluated using three indicators: hydrology, hydrophytic vegetation, and hydric soils. Section 404 of the Clean Water Act requires a permit before dredged or fill material may be discharged into regulated wetlands (known as Jurisdictional Wetlands). The Army Corps of Engineers has primary responsibility for making wetlands jurisdictional determinations and issuing wetlands permits. A number of activities are authorized through the use of nationwide permits.</p> <p>A wetland study or survey is not included in the current scope of services for this Phase I ESA. However, based on a review of the EDR Radius Map Report, the site is not within a mapped National Wetland Inventory location.</p>
Visual evidence of mold problems from wet areas, roof leaks, moisture around air conditioning or plumbing units	Not applicable; there are no improvements on the Property.
Indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment (unusual smells, noxious odors, or visual emissions, air emission stacks), excluding impacts to indoor air from releases of hazardous substances into the environment	Not applicable; there are no improvements on the Property.
Flood Zone	<p>The Federal Emergency Management Agency Flood Insurance Rate Map is typically used to determine if the Property is located within a flood zone. Such evaluation is not included in the scope of work for this Phase I ESA.</p> <p>However, based on a review of a flood zone map contained in an EDR Radius Map Report, a small portion of the Property may be within a 500-year flood zone.</p>

<b>NON-SCOPE, NON-CERCLA ITEMS</b>	
<b>ITEM</b>	
Methane Gas	<p>Since a methane gas survey is not included in the scope of services for this Phase I ESA, ODIC did not test for methane gas at the Property.</p> <p>In response to concern regarding the potential for methane accumulation beneath buildings, and potential methane intrusion into buildings, some cities or regulatory oversight agencies have established methane zones and/or methane buffer zones based on the proximity to oil wells, landfills, or naturally occurring methane deposits.</p> <p>A methane risk assessment is not included in the scope of work for this Phase I ESA.</p>
Other non-scope considerations discussed in Appendix X1 and Appendix X5 of ASTM Standard Practice E1527-13	<p>No implication is intended as to the relative importance of inquiry into such non-scope considerations, and this list of non-scope considerations is not intended to be all-inclusive. These items are not included in the current scope of services for this Phase I ESA.</p> <p><i>Endangered Species Act</i>—Under the Endangered Species Act (ESA), the government protects endangered and threatened plants and animals (listed species) and their habitats. The presence of listed species can restrict use of the Property to ensure that the proposed activities do not adversely affect endangered or threatened species as well as their critical habitats. This includes <i>Biological agents, Cultural and historical resources, and Ecological resources</i>.</p> <p><i>Compliance with AULs</i>—Parties who wish to qualify for one of the <i>LLPs</i> will need to know whether they are in compliance with AULs, including land use restrictions that were relied upon in connection with a response action. A determination of compliance with AULs is beyond the scope of ASTM Standard Practice E1527-13.</p> <p><i>Regulatory Compliance (Includes Health and Safety and Industrial Hygiene)</i>—Properties used for industrial, commercial and even residential purposes are frequently subject to a panoply of environmental laws and regulations that relate to many aspects of operations conducted at the Property. In the context of a property transaction, noncompliance with environmental laws and regulations may create a material risk of financial loss for both building operators and owners of the properties.</p> <p><i>Potential Effects of Noncompliance</i>—Depending on the circumstances, noncompliance with various regulatory requirements could result in material costs to owners and operators of industrial, commercial or residential properties, including fines or other monetary penalties, injunctions or other equitable relief that slows or eliminates productivity, and could result in increased transaction costs associated with defending claims of noncompliance. Furthermore, even in the absence of administrative or legal enforcement proceedings, the costs to bring facilities into compliance with applicable regulatory requirements could be material in some circumstances.</p>

#### 4.0 PROPERTY AND VICINITY HISTORY

The objective of consulting historical sources is to develop a history of the previous uses of the Property and surrounding area, in order to help identify the likelihood of past uses having led to Recognized Environmental Conditions (RECs), Controlled Recognized Environmental Conditions (CRECs), or Historical Recognized Environmental Conditions (HRECs) in connection with the Property. ODIC exercises professional judgment and consider the possible *releases* that might have occurred at a Property in light of the historical uses and, in concert with other relevant information gathered as part of the Phase I process, to use this information to assist in identifying RECs, CRECs, and/or HRECs in connection with the Property. Historical Records Search was conducted for the Property in conformance with the scope and limitations of ASTM Standard Practice E1527-13.

##### 4.1 PREVIOUS ENVIRONMENTAL REPORTS

The Property is associated with a closed Leaking Underground Storage Tank (LUST) case under the name ARCO #2010 (Global ID# T0608500170). The LUST case was opened on May 21, 1986 due to impacted "other groundwater (uses other than drinking water)" as the result of a gasoline release. Case closure was granted on September 7, 2017.

The above information, as well as numerous previous environmental reports and associated records, are available for review on the State Water Resources Control Board (SWRCB) online GeoTracker database accessible via the following link:

[https://geotracker.waterboards.ca.gov/profile\\_report.asp?global\\_id=T0608500170](https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608500170)

Numerous records were also obtained from the City of Mountain View Fire Department (MVFD). The most recent and pertinent environmental reports and associated records are summarized below. Additional associated records are summarized in Section 5.2.

August 1992, Report of Oil-Water Separator / Clarifier Investigation, ARCO Facility No. 2010, 2110 Old Middlefield Way, by EA Engineering, Science, and Technology (EA)

EA stated that a clarifier was removed from the former building on the Property, in the vicinity of service bays. Soil samples were collected at that time. The following table depicts the soil analytical results:

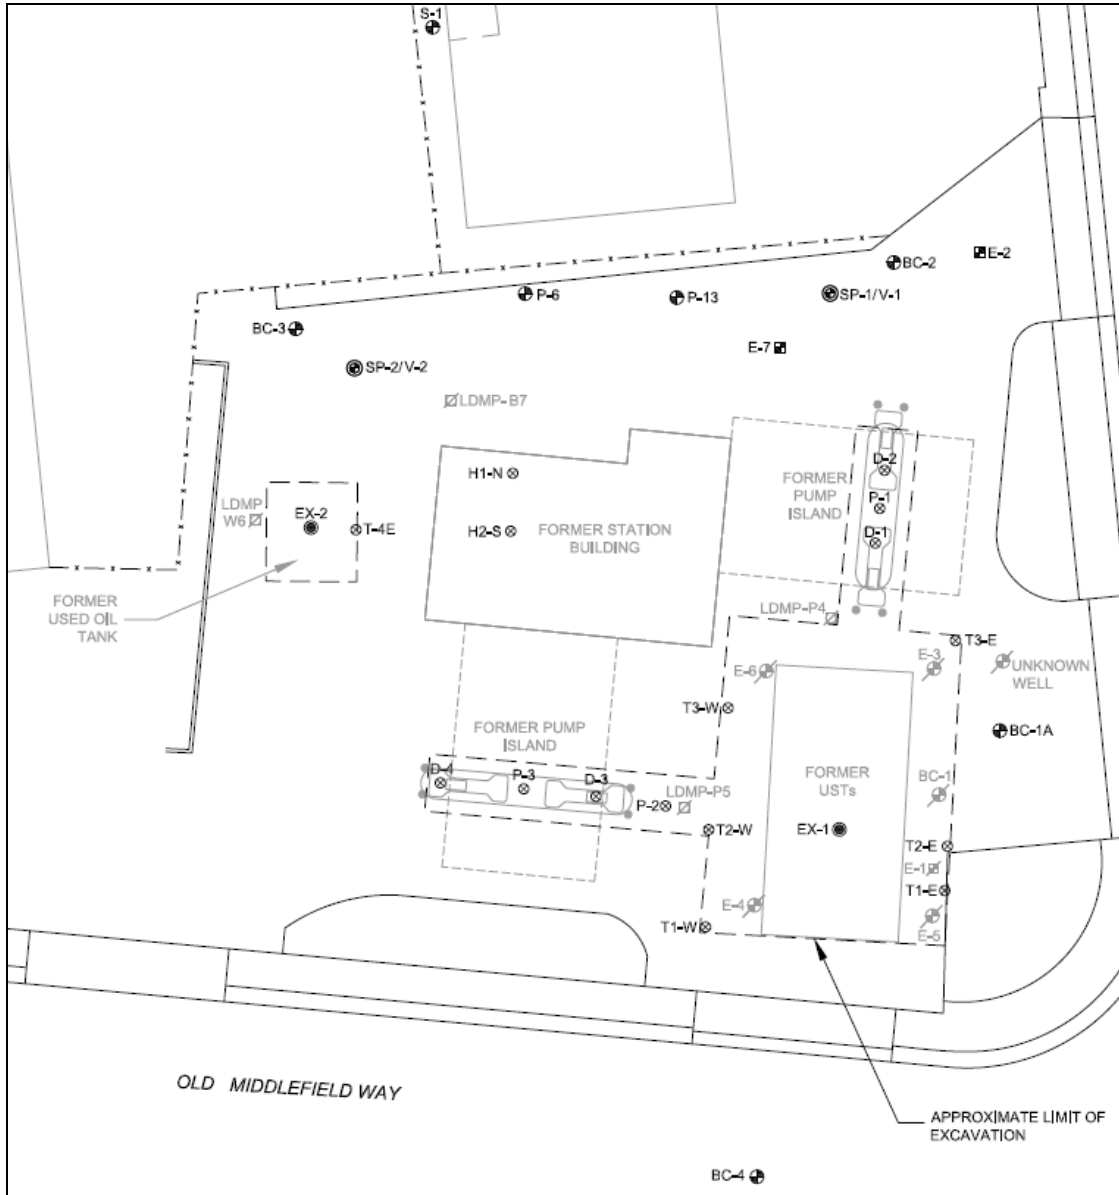

TABLE 1 CONCENTRATIONS (ppm) OF ANALYTES IN CONCRETE AND SOIL SAMPLES, ARCO FACILITY NO. 2010, MOUNTAIN VIEW, CALIFORNIA, 13 MAY 1992			
Analyte	Concrete Sample	Soil Sample SBI-0	Soil Sample SBI-2
Total Recoverable Petroleum Hydrocarbons	260	1,300	5,600
VOCs:			
Benzene	<0.10	0.83	<0.5

NA Not analyzed. ND Not detected at concentrations greater than laboratory detection limits.			

October 13, 2008, Well Destruction and Site Demolition Report, Former ARCO Service Station No. 2010, 2110 Old Middlefield Way, by Stantec Consulting Services, Inc. (Stantec)

Stantec observed and documented the removal / demolition of the former gas station at the Property. Activities included the removal of three 12,000-gallon fuel USTs, one 550-gallon waste oil UST, associated product piping, four fuel dispensers, and two hydraulic lifts; well destruction associated with the LUST case was also conducted. Soil and groundwater samples were collected at that time.

The following diagram illustrates the sampling locations and former gas station layout:

LEGEND:	
⊕	GROUNDWATER MONITORING WELL LOCATION

Stantec provided the following discussion of analytical results:

*Low concentrations of lead were reported in all soil samples collected. Concentrations of lead, cadmium, chromium, nickel, and zinc were also reported in the hydraulic lift soil samples and waste oil UST groundwater sample. The concentrations of metals are within the range of background soil concentrations presented in the Kearney Foundation March 1996, Background Concentrations of Trace and Major Elements in California Soils and, therefore, do not appear to be associated with the former automotive service station and retail fueling operations at the site. The concentration of GRO reported in grab groundwater sample EX-2 appears higher than recent and historical groundwater concentrations reported in groundwater samples collected from groundwater monitoring wells at the site. The higher GRO concentration in the grab groundwater sample collected may be expected considering the soil disturbance activities conducted during the waste oil UST excavation and removal. The action of disturbing residual petroleum hydrocarbons present within the waste oil UST excavation and collecting a grab sample from the groundwater surface would likely result in higher hydrocarbon concentrations. Hydrocarbon concentrations reported in groundwater samples from the existing monitoring wells appear more indicative of actual groundwater quality at the site.*

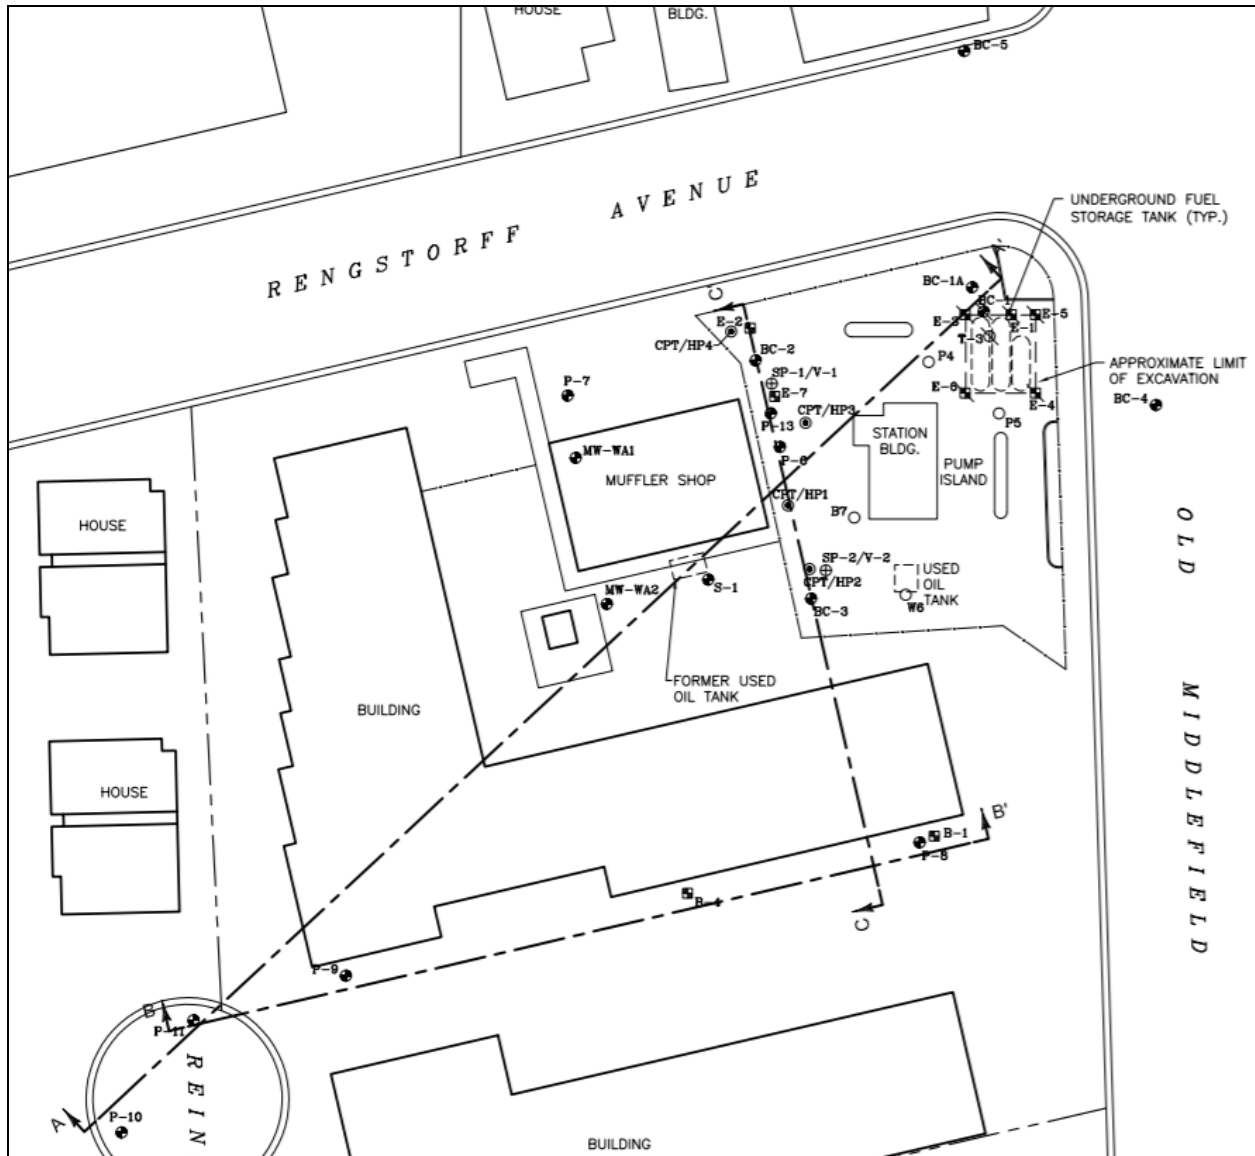

Stantec provided the following summary of findings:

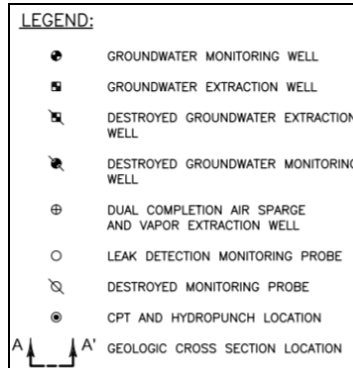

*Prior to UST and facility removal operations, six monitoring/observation wells and four LDMPs were properly destroyed under SCVWD inspection. Musco successfully removed and disposed of three 12,000-gallon double walled fiberglass USTs, one 550-gallon single walled fiberglass waste oil UST, two hydraulic lifts, four fuel dispensers, and associated product piping from the site. The UST removal and collection of compliance soil and groundwater samples was completed under the direction of Mr. Chris Steck of the CMVFD. Soil compaction test results indicate that the former gasoline and waste oil UST excavations were backfilled and compacted to at least 90%. Laboratory analysis of soil and groundwater samples collected during facility removal operations indicated the presence of impacts to the subsurface. Since the site is the subject of ongoing environmental monitoring and remediation work, no further investigation is recommended at this time.*

July 5, 2012, Conceptual Site Model, Former ARCO Service Station No. 2010, 2110 Old Middlefield Way, by Closure Solutions, Inc. (Closure Solutions)

Closure Solutions prepared the Conceptual Site Model to address requirements by the SCEH for an evaluation of methyl tertiary butyl ether (MTBE) plume stability, updated site maps, geologic cross-sections, and an evaluation of the potential need for additional assessment.

At the time of Closure Solutions site inspection, the Property was a vacant lot. In 2008, all former gas station and automotive repair shop improvements were removed. The following diagram illustrates the former sampling locations and former gas station layout:

Closure Solutions provided the following conclusions and recommendations:

*An evaluation of MTBE plume stability indicates that while it is clear that MTBE impacted groundwater has migrated off-Site, the concentrations are likely to have reached Water Quality Objectives. Given that the Santa Clara Valley Water District has confirmed that there are no water supply wells in the down-gradient direction (northeast) and that the closest water supply well is approximately 350 feet up-gradient from the Site, it is unlikely that these wells are threatened by the concentrations remaining at the Site. Closure Solutions recommends and ARC formally requests that No Further Action status be granted for the environmental case at 2110 Old Middlefield Way at this time.*

June 12, 2014, Low-Threat Underground Storage Tank Case Closure, Former ARCO Service Station No. 2010, 2110 Old Middlefield Way, by Stantec Consulting Services, Inc. (Stantec)

Stantec discussed previous environmental investigations and remedial activities conducted at the Property and vicinity and detailed rationale for Low-Threat UST Case Closure qualifications. Stantec stated that the Property met conditions of the Low-Threat Closure Policy (LTCP) for Vapor Intrusion to Indoor Air and provided the following discussion:

*As of fourth quarter 2013 (4Q13), benzene concentrations in groundwater are less than 100 µg/L in all site monitoring wells, with one localized exception (V-1) where benzene concentration was 160 µg/L. Although this well exceeds the criteria set forth in "Scenario 3" of the LTCP, it meets the criteria of "Scenario 3" that limits benzene concentrations to 100 µg/L - 1,000 µg/L, provided that a bioattenuation zone of 10 ft is present. In 4Q13, depth to groundwater (dtw) at the site was approximately 7-8 ft bgs, historical soil boring logs indicate that the water table lies approximately 10 ft below a confining clay layer. This provides the required 10 ft bioattenuation zone overlying groundwater with benzene concentrations in the range of 100 µg/L - 1,000 µg/L, as specified in "Scenario 3" of the LTCP.*

*Actual groundwater benzene concentrations at the site as of 4Q13 were less than 0.50 µg/L in 14 of nineteen site wells, and benzene concentrations in four of the five remaining wells (P-7, S-1, SP-2, V-2) ranged from 0.82 to 6.0 µg/L. One site well (V-1) contained 160 µg/L benzene.*

*Soil TPH concentrations in the areas of the site that fall into "Scenario 3" (requiring a 5 ft bioattenuation zone) are less than 100 mg/kg in 26 of 30 soil samples taken in the 0-5 ft depth. Of the four samples that exceed this criteria, one of them (D-8 at 2' bgs) that was sampled in 2002 was subsequently excavated in September 2008, and therefore not representative of current soil conditions, and two of them (D-1 and D-2, both sampled at 5 ft bgs in September 2008) were sampled during 2008 site demolition activities, from the base of the excavation trench below the former dispenser islands located to the north of*

*the site, and therefore do not represent the TPH concentration from the 0-5 ft interval above the sample. In the area of the site that falls under "Scenario 3" (V-1), the required bioattenuation zone is nearly 10 ft deep. In this location, TPH concentration at 9.5 ft bgs was 730 mg/kg, however, in shallower samples (5.5 ft bgs) taken from the same location, TPH concentration was only 4.7 mg/kg, indicating that the TPH concentration throughout most of the required bioattenuation zone is within the specified limits. Additionally, it would be reasonable to assume that concentrations in this area have attenuated significantly since the sample was collected in 1993 due to active remediation and natural attenuation over the past 21 years, including direct exposure to oxygen in air since 2008 when the site was demolished and left as a dirt lot.*

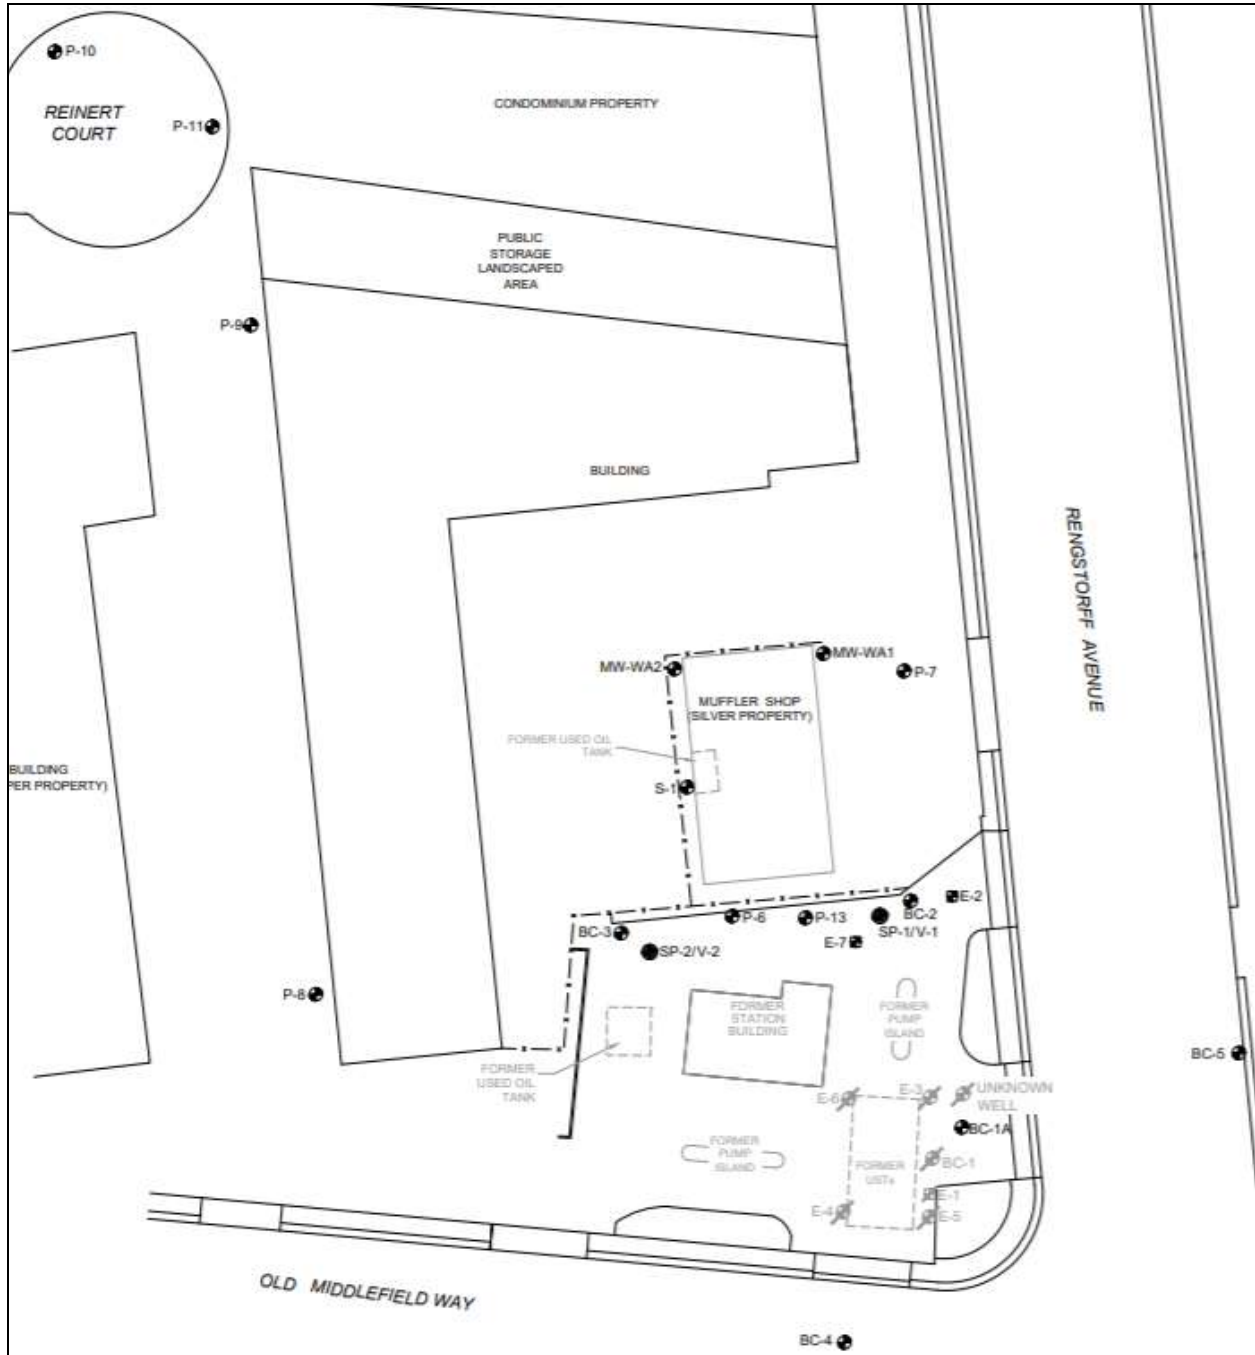

*Stantec believes that due to the very localized nature and extent of any remaining impacted material that the site meets this criteria.*

Note: A letter issued by the County of Santa Clara Department of Environmental Health (SCEH) dated August 26, 2015 stated that no additional work to assess potential vapor intrusion was required.

January 28, 2016, Groundwater Monitoring Report, 2110 Old Middlefield Way, by Stantec Consulting Services, Inc. (Stantec)

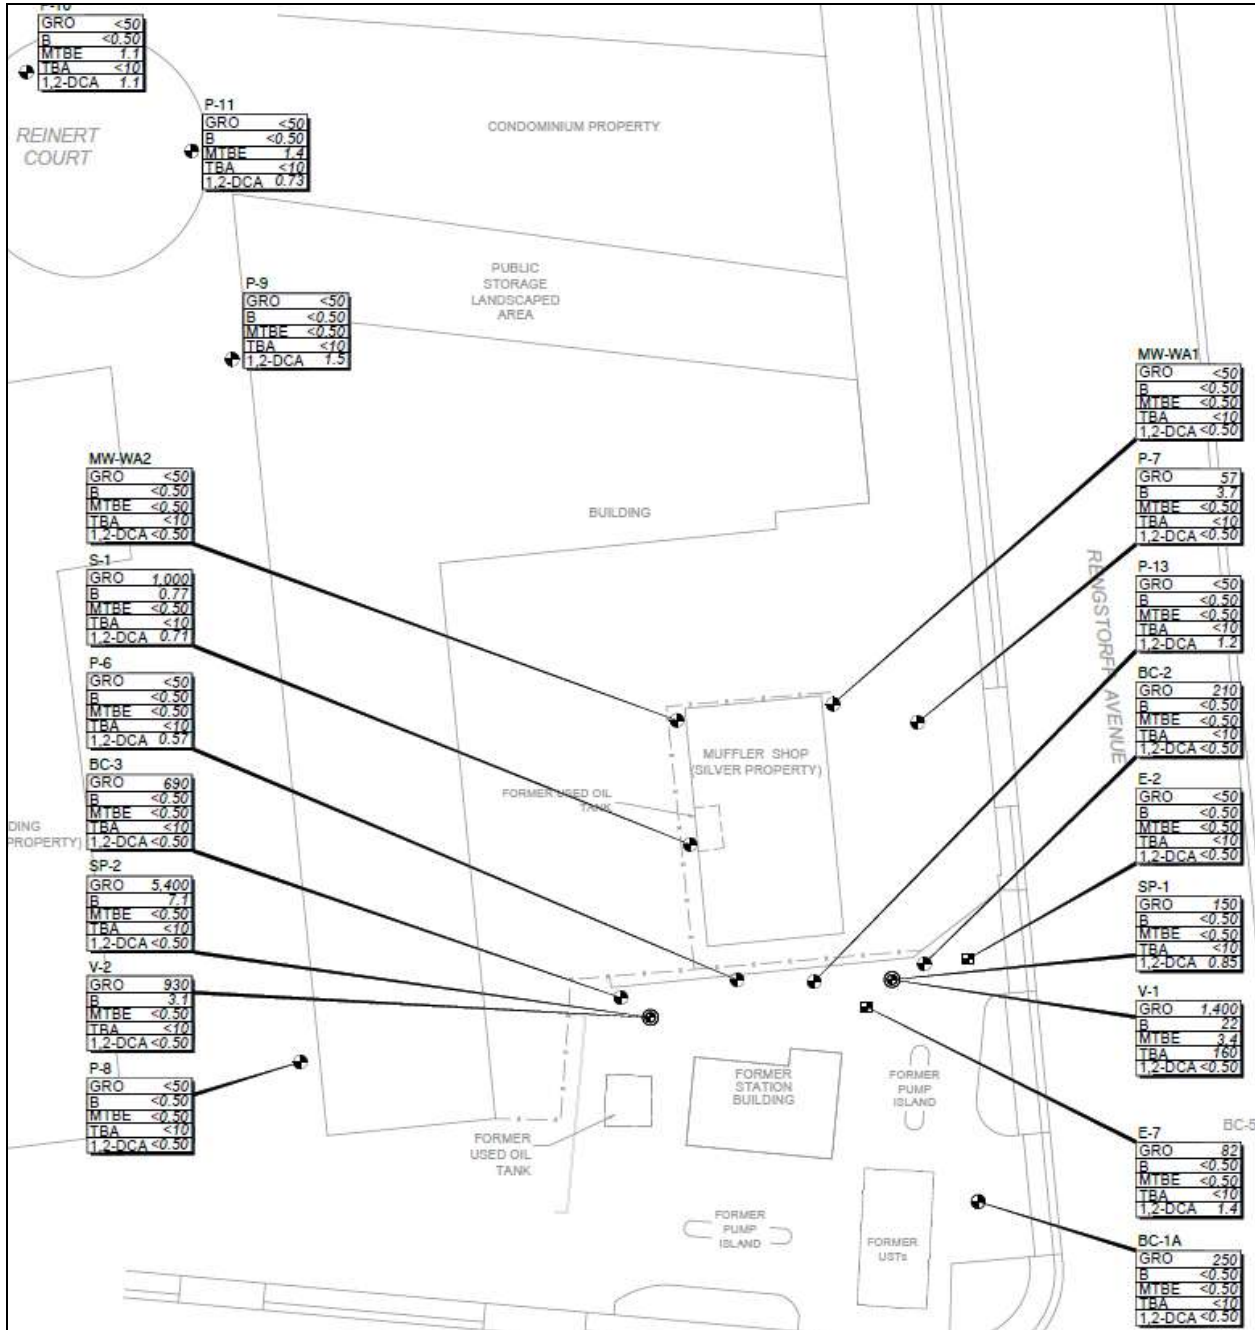

At the time of Stantec's site inspection the Property was a vacant lot. The Property was formerly occupied by a gas station; the fueling system consisted of three 12,000-gallon USTs containing gasoline, one 550-gallon UST containing waste oil, and associated product lines and dispensers. The following diagram illustrates the sampling locations at the Property and locations of former improvements on the Property:

LEGEND:	
	GROUNDWATER MONITORING WELL LOCATION

**Notes:**  
 GRO = Gasoline range organics  
 B = Benzene  
 T = Toluene  
 E = Ethylbenzene  
 X = Total xylenes  
 MTBE = Methyl tert-butyl ether  
 TBA = Tert-butyl alcohol  
 DIPE = Di-isopropyl ether  
 ETBE = Ethyl tert-butyl ether  
 TAME = Tert-amyl methyl ether  
 1,2-DCA = 1,2-Dichloroethane  
 EDB = 1,2-Dibromoethane  
 D.O. = Dissolved Oxygen  
 SPH = Separate-phase hydrocarbons  
 TOC = Top of casing (surveyed)  
 Calc. GW Elev. = Calculated groundwater elevation = TOC - Depth to Water + 0.75\*(Measured SPH Thickness); assuming a specific gravity of 0.75 for SPH  
 ft-MSL = feet above mean sea level  
 mg/L = Milligrams per liter  
 µg/L = Micrograms per liter  
 < = Analyte was not detected above the specified method reporting limit  
 - = Not measured or analyzed  
 SUB = Screen submerged

Additional historical analytical results can be reviewed via the following link (beginning on page 26 of the report):

[https://geotracker.waterboards.ca.gov/esi/uploads/geo\\_report/1256135940/T0608500170.PDF](https://geotracker.waterboards.ca.gov/esi/uploads/geo_report/1256135940/T0608500170.PDF)

Stantec provided the following conclusions and recommendations:

*Current groundwater concentrations continue to meet closure criteria of the State Water Resources Control Board Low-Threat Underground Storage Tank Case Closure Policy (LTCP). Stantec recommends terminating groundwater monitoring and sampling at the Site as it is no longer warranted.*

May 26, 2016, Additional Site Assessment Report, ARCO Service Station No. 2010, 2110 Old Middlefield Way, by Stantec Consulting Services, Inc. (Stantec)

Stantec stated that soil and groundwater investigations, source removal, and remedial activities had been conducted at the Property since hydrocarbon impacts were initially detected at the Property in 1986. Investigations have included the installation of groundwater monitoring wells, soil vapor extraction (SVE) wells, and soil borings. The groundwater monitoring program was initiated in 1987.

In May 1989 three gasoline USTs were removed from the southeastern portion of the Property and were replaced with three 12,000-gallon gasoline USTs. Soil was removed from the Property and groundwater extraction was conducted at that time. In August 1989, approximately 14,400 gallons of groundwater was extracted and properly disposed of. Stantec further reported that a remedial feasibility study via dual-phase extraction (DPE) and groundwater extraction (GWE) was conducted at the Property (via well E-7). A total of 20,595.6 gallons of hydrocarbon-impacted groundwater was extracted from well E-7. In October 2002, dispensers and related piping were removed and replaced during upgrade activities. From June 2003 to August 2004, an in-situ Submerged Oxygen Curtain (iSOC) system was operated at the Property. In August and September 2008, gasoline dispensing operations ceased and the improvements and fueling system features were removed. Soil and groundwater samples were collected at that time.

In 2016, Stantec conducted an investigation to further delineate a dissolved MTBE groundwater plume that migrated down-gradient (to the northwest). As part of the investigation, two soil borings (HP-1 and HP-2) were advanced further north and northwest.

The following diagram illustrates the sampling locations:

LEGEND:	
	HYDRO PUNCH LOCATION
	MTBE ISOCONCENTRATION CONTOUR
<i>MTBE</i>	METHYL TERTIARY-BUTYL ETHER
1.1	MTBE CONCENTRATION (µg/L)
µg/L	MICROGRAMS PER LITER

The following table depicts the groundwater analytical results:

Summary of Groundwater Analytical Results

Sample ID	Date Collected	MTBE (µg/L)	TBA (µg/L)	1,2-DCA (µg/L)
HP-1	3/3/2016	0.57	<10	3.7
HP-2	5/12/16	< 0.50	<10	< 0.50
SFBRWQCB ESL	N/A	5.0	12	5.0

**Notes:**  
 MTBE – methyl tertiary-butyl ether.  
 N/A – Not applicable.  
 SFBRWQCB ESL – San Francisco Bay Regional Water Quality Control Board Environmental Screening Level.  
 TBA – tertiary-butyl alcohol.  
 1,2-DCA – 1,2-dichloroethane.  
 '<' – Less than; indicates that analyte was not detected above the listed laboratory reporting limit.  
 µg/L – micrograms per liter.

Stantec provided the following conclusions and recommendations:

*Two soil borings (HP-1 and HP-2) were advanced in order to obtain depth-discrete groundwater samples for plume delineation of MTBE, TBA, and 1,2-DCA.*

- *Only one groundwater sample (HP-1) contained detectable levels of MTBE (0.57 µg/L) and 1,2-DCA (3.7 µg/L). Groundwater collected from HP-2 did not contain detectable levels of MTBE, TBA, or 1,2-DCA, and HP-1 did not contain detectable levels of TBA.*

- *Detected concentrations of MTBE and 1,2-DCA in HP-1 are both lower than the SFBRWQCB established ESLs.*

- *Further delineation of the detached MTBE, TBA and 1,2-DCA plumes was the only remaining impediment to Site closure under the LTCP. Results presented herein demonstrate that the MTBE, TBA and 1,2-DCA plumes are defined and therefore Stantec respectfully recommends closure of the Site under the LTCP.*

February 3, 2017, Case Closure Summary Report, Former Arco Service Station No. 2010, 2110 Old Middlefield way, Santa Clara County Department of Environmental Health Local Oversight Program (SCEH – LOP)

The SCEH – LOP stated that six leak detection and monitoring probes were installed at the Property in March 1986. In May 1989 three steel gasoline USTs (two 10,000-gallon tanks and one 8,000-gallon tank) were removed and replaced with three 12,000-gallon fiberglass double-walled gasoline USTs. The SCEH – LOP stated that one 280-gallon waste oil UST was also discovered and removed.

From August 1989 to August 2004, site investigation and remediation were conducted at the Property which included soil vapor extraction testing, dual phase extraction, and in-situ Submerged Oxygen Curtain (iSOC). In August 2008, all improvements and fueling system features were removed. The following USTs were reported:

Tank #	Size in Gallons	Contents	Closed in Place/Removed	Date
1	10,000	Gasoline	Removed	05/1989
2	10,000	Gasoline	Removed	05/1989
3	8,000	Gasoline	Removed	05/1989
4	280	Waste Oil	Removed	05/1989
5	12,000	Gasoline	Removed	09/2008
6	12,000	Gasoline	Removed	09/2008
7	12,000	Gasoline	Removed	09/2008
8	550	Waste Oil	Removed	09/2008

The following waste treatment and disposal actions were reported:

Material	Amount (Include Units)	Action (Treatment or Disposal Method)	Date
Tank	2-10,000 gallon gasoline, 1-8,000 gallon gasoline, 1-280 gallon waste oil	Disposed (location not listed)	05/1989
Piping	--	Disposed (location not listed)	05/1989
Pea gravel	150 cubic yards	Disposed (location not listed)	05/1989
Soil	700 cubic yards	Disposed (location not listed)	05/1989
Groundwater	14,400 gallons	Disposed (location not listed)	08/1989
Groundwater	16,000 gallons	Disposed (location not listed)	06/2001
Groundwater	20,595 gallons	Disposed (location not listed)	01/2002
Soil	130 tons	Disposed (location not listed)	10/2002
Tank	3-12,000 gallon gasoline, 1-550 waste oil	Disposed (Potrero Hills Landfill, Suisun City)	09/11/2008
Piping	--	Disposed (Clean Harbors Inc., Buttonwillow)	09/11/2008
Groundwater	150 gallons	Disposed (location not listed)	09/2008

Historical soil and groundwater analytical results can be reviewed via the following link (beginning on page 18 of the report):

[https://geotracker.waterboards.ca.gov/regulators/deliverable\\_documents/8861374378/06S2W16D01f.pdf](https://geotracker.waterboards.ca.gov/regulators/deliverable_documents/8861374378/06S2W16D01f.pdf)

The SCEH – LOP provided the following Site Management Requirements:

*The site is currently an undeveloped vacant lot. Residual contamination both in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as, but not limited to, site grading, excavation, or the installation of water wells. Therefore, the impact of the disturbance of any residual contamination or the installation of water well(s) in the vicinity of the residual contamination shall be assessed and appropriate action taken so that there is no significant impact to human health, safety, or the environment. This could necessitate additional sampling, health risk assessment, and mitigation measures. DEH and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with time.*

September 7, 2017, “No Further Action” Letter, Fuel Leak Investigation, Arco Service Station No. 2010, 2110 Old Middlefield Way, County of Santa Clara Department of Environmental Health (SCEH)

The SCEH confirmed completion of site investigation and corrective action for the USTs formerly at the Property. The SCEH stated that “no further action” related to the petroleum release(s) was required. The SCEH provided the following Site Management Requirements:

*Residual contamination in soil and groundwater remains at the site that could pose an unacceptable risk under certain site development activities such as site grading, excavation, or the installation of water wells. The County and the appropriate planning and building department shall be notified prior to any changes in land use, grading activities, excavation, and installation of water wells. This notification shall include a statement that residual contamination exists on the property and list all mitigation actions, if any, necessary to ensure compliance with this site management requirement. The levels of residual contamination and any associated site risk are expected to reduce with*

*time. It should be noted that any additional or previously unidentified contamination at this site may require further investigation or cleanup.*

November 19, 2019, Transaction Screen Assessment, 2110 Old Middlefield Way, by Odic environmental (ODIC)

At the time of ODIC's site inspection, the Property was a vacant lot. ODIC indicated that the Property was formerly occupied by a gas station and an automotive repair shop until 2008 when the improvements including the fueling system features were removed.

ODIC stated that the Property was developed with a gas station by 1948 and had been redeveloped by 1968. Additions were made to the building in 1980. The facility operated as an ARCO-branded gas station and included an automotive repair shop on the central / northwestern portion of the site. In August and September 2008 all improvements and fueling system features were removed. ODIC stated that the Property remained an unpaved vacant lot since that time.

ODIC discussed the closed LUST case associated with the Property and summarized previous environmental reports and associated records. The Property was identified on several environmental database listings in association with the former gas station and automotive repair shop, as well as the associated LUST case. Numerous records were obtained from the City of Mountain View Fire Department (MVFD) which were associated with the former gas station and closed LUST case. ODIC also summarized County of Santa Clara Department of Environmental Health (SCEH) records which pertained to the former gas station and automotive repair shop.

ODIC reported that Site Management Requirements were placed on the Property at the time of LUST case closure which was granted on September 7, 2017. ODIC stated the following regarding an identified Potential Environmental Concern (PEC) in connection with the Property:

*As indicated above, soil and groundwater contamination remained at the Property at the time of regulatory LUST case closure. This is a PEC pursuant to ASTM Standard Practice E1528-14.*

ODIC provided the following recommendations:

*ODIC recommends that the Property Owner / Operator abide by the above Site Management Requirements, as well as any additional requirements as may be imposed by oversight agencies. Otherwise, ODIC recommends No Further Investigation at this time.*

#### 4.2 SANBORN MAP COMPANY FIRE INSURANCE MAPS

Sanborn Map Company maps were created for insurance underwriters from 1867 to present, and often contain information regarding the uses of individual structures, and the locations of fuel and/or chemical storage tanks that may have been on a particular property. In 1996, the entire Sanborn Map Company collection was acquired by Environmental Data Resources, Inc. (EDR). ODIC subcontracted with EDR to provide copies of Sanborn Map Company maps, if available, for the Property and vicinity.

EDR responded that Sanborn Map Company fire insurance maps were not available for the Property or vicinity.

4.3 HISTORICAL AERIAL PHOTOGRAPHS

ODIC reviewed historical aerial photographs supplied by the EDR Aerial Photo Decade Package. A summary of observations is provided below:

Historical Aerial Photographs	
YEAR	DESCRIPTION
1939	<b>Property:</b> It appears that the Property is occupied by a gas station. An apparent canopy is on the southeast portion and a building is on the western portion. A smaller building may also be on the northern portion.
	Adjacent North: Vacant and/or agricultural land is north.
	Adjacent South: A road is south, followed by vacant and/or agricultural land and a residence. An intersection is southeast, followed by vacant and/or agricultural land.
	Adjacent West: Vacant and/or agricultural land is west.
	Adjacent East: A road is east, followed by vacant and/or agricultural land.
1943	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
1948	<b>Property:</b> The Property appears similar to the previous photograph.
	Adjacent North: The property appears similar to the previous photograph.
	Adjacent South: A road is south, followed by residences and vacant land. The site may also include approximately two commercial buildings. An intersection is southeast, followed by vacant land and a sparse number of residences and/or commercial buildings.
	Adjacent West: Approximately two commercial buildings and/or residences are west.
	Adjacent East: A road is east, followed by vacant land and approximately two apparent commercial buildings.
1950	An additional commercial building is east of the Property. Otherwise, although resolution of the photograph is poor, the general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
1956	Although resolution of the photograph is poor, the general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
1963	<b>Property:</b> It appears that the Property has been redeveloped; the aforementioned canopy is no longer visible and at least one building and possible canopies are on the western and northern portions.
	Adjacent North: The current commercial building is north.
	Adjacent South: A road is south, followed by an apparent gas station, residences, and commercial buildings. An intersection is southeast, followed by an apparent gas station.
	Adjacent West: A residence or commercial building and a yard area are west.
	Adjacent East: A road is east, followed by approximately three apparent commercial buildings.
1968	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
1974	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
1982	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph. Note: An apparent concrete patch is visible at the southeast portion of the Property, indicative of the location of USTs.
1991	<b>Property:</b> The Property appears similar to the previous photograph.
	Adjacent North: The property appears similar to the previous photograph.
	Adjacent South: A road is south, followed by the current commercial development. An intersection is southeast, followed by apparent commercial buildings.
	Adjacent West: Commercial buildings are west.
	Adjacent East: A road is east, followed by apparent commercial buildings.
1998	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.

Historical Aerial Photographs	
YEAR	DESCRIPTION
2006	Although resolution of the photograph is poor, the general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
2009	The Property is vacant land. The general setting and configuration of the adjacent sites appear similar to the previous photograph.
2012	The general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.
2016	A current commercial building is east of the Property. Otherwise, the general setting and configuration of the Property and adjacent sites appear similar to the previous photograph.

#### 4.4 LOCAL STREET DIRECTORIES / HISTORICAL CITY DIRECTORIES

ODIC reviewed Historical City Directories provided by EDR for the years spanning 1922-2017. A summary of listings for the Property is provided below:

Historical City Directories	
Property Address: 2110 Old Middlefield Way	
YEAR	LISTINGS
1975	Harris ARCO Service Station
1982	Teds ARCO
1986	Teds ARCO
1991	Teds ARCO
1994	Teds ARCO
1999	Teds ARCO
2001	Gardner James Tedsarc
2004	Teds ARCO

For discussion of nearby properties of environmental concern, if any, refer to Sections 5.3 and 5.4.

#### 4.5 CITY/COUNTY BUILDING DEPARTMENT, ZONING/LAND USE, PROPERTY TAX RECORDS, PROFILES

##### Building Department Records:

A written request was made to the Mountain View Building Department to review public records pertaining to the Property. As of the drafting of this report the Mountain View Building Department had not responded to the request. If information is subsequently received from this agency which alters the conclusions of this assessment, a report addendum will be provided to the *Client*.

##### Property Profile:

ODIC obtained the following Property information from one or more title company property profiles:

- Current Property Owner(s): Grand Salkhi Properties LLC
- Assessor Parcel Number(s): 147-07-048
- Lot Size: 14,000 square feet / 0.32 acres
- Building Size: 0
- Construction Date: Information not provided.
- Site Use / Use Code: Vacant Land (General)

#### 4.6 HISTORICAL TOPOGRAPHIC MAPS

Development history of the Property and surrounding area was researched using historical 7.5 minute USGS topographic maps provided by EDR. No environmental concerns were identified.

#### 4.7 OIL & GAS MAPS

ODIC reviewed the Geologic Energy Management Division's (CalGEM, formerly DOGGR) online mapping application Well Finder maps for the Property and immediate vicinity via the CalGEM Online Mapping System. No active or abandoned oil and/or gas wells were identified on the Property or in the immediate vicinity.

Source: <https://www.conservation.ca.gov/calgem/Pages/WellFinder.aspx>

#### 4.8 OTHER HISTORICAL RECORDS

This category includes, but is not limited to: maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, and/or other sources.

An internet search of the Property address(es) was conducted to identify additional former Property occupants and/or uses that may not have been identified via other sources. None were identified.

## 5.0 STANDARD ENVIRONMENTAL RECORDS RESEARCH

### 5.1 PROCEDURE

The most current databases sources maintained by state and federal offices were provided by governmental record search database suppliers, such as Environmental Data Resources (EDR). For definitions of database acronyms, review the database report in Appendix C and/or refer to ASTM Standard Practice E1527-13, Sections 3.3 and 8.2.

Database sources maintained by local offices were obtained via records requests. Databases were searched for properties with reported environmental listings within distances specified by ASTM Standard Practice E1527-13, either by using geocoding information that identified the coordinates of the properties in the databases or by checking the street addresses of practically reviewable non-geocoded “orphan” properties within the same zip code. The database report is included as an appendix to this *Report*. The database report may identify certain “orphan sites” which are those facilities that could not be mapped or geocoded due to inadequate address information. ODIC cannot be held liable for not correctly locating these orphan sites to determine their impact to the Property.

ASTM Standard Practice E1527-13 Sections 3.3 and 8.2 use terminology such as Leaking Storage Tank and Registered Storage Tank to refer to both Leaking Underground/Aboveground Storage Tanks and Underground/Aboveground Storage Tanks. For the purposes of this assessment, ODIC has used state-specific terminology to refer to Leaking Storage Tanks and/or other Registered Storage Tanks as generally defined by the state in which the Property is located.

### 5.2 PROPERTY LISTING(S)

FEDERAL AGENCY LISTINGS		STATE AGENCY LISTINGS	
DATABASE	PROPERTY LISTED	DATABASE	PROPERTY LISTED

### LOCAL ENVIRONMENTAL AGENCY LISTINGS

AGENCY	RECORDS ON FILE FOR THE PROPERTY
<b>State Environmental Agency(ies) with Local/Regional Offices</b>	
California State Water Resources Control Board (SWRCB) – GeoTracker database	Yes
San Francisco County Regional Water Quality Control Board (SF-RWQCB)	Yes
CA Department of Toxic Substances Control (DTSC) – ENVIROSTOR database	No
CA Environmental Protection Agency (EPA) site portal database	Yes
DTSC – Hazardous Waste Tracking System (HWTS) database	Yes
DTSC Local Office	Agency response pending
<b>County/City Environmental Agency(ies)</b>	
City of Mountain View Fire Department (MVFD)	Yes
County of Santa Clara Department of Environmental Health (SCEH)	Yes
<b>Air Quality Management District</b>	
Bay Area Air Quality Management District (BAAQMD)	Yes
<b>See below for a discussion of agency records, if any, for the Property.</b>	

The Property was identified on the following researched environmental databases: Facility Index System (FINDS), California Environmental Reporting System (CERS), Underground Storage Tank (UST), Statewide Environmental Evaluation and Planning System – Underground Storage Tank (SWEEPS UST), Historical Underground Storage Tank (HIST UST), California Facility Inventory Database Underground Storage Tank (CA FID UST), Leaking Underground Storage Tank (LUST), Recovered Government Archive Leaking Underground Storage Tank (RGA LUST), Historical Leaking Underground Storage Tank (HIST LUST), Cortese, Historical Cortese (HIST CORTESE), CA CUPA Listings, Emergency Response Notification System (ERNS), Hazardous Waste Information System (HAZNET), Hazardous Waste Tracking System (HWTS), and on the EDR Hist Auto Stations proprietary database.

**CA EPA Site Portal Database**

The Property is identified on the online CA EPA Site Portal Database under the name “ARCO #2010” in association with a closed LUST case. Refer to Section 4.1 for details.

Source: <https://siteportal.calepa.ca.gov/nsite/map/results/detail/242017/ei>

**California State Water Resources Control Board (SWRCB)**

The Property is identified on the SWRCB online GeoTracker database in association with a closed Leaking Underground Storage Tank (LUST) case under the name ARCO #2010 (Global ID# T0608500170). The LUST case was opened on May 21, 1986 due to impacted “other groundwater (uses other than drinking water)” as the result of a gasoline release. Case closure was granted on September 7, 2017. Refer to Section 4.1 for further details.

**Department of Toxic Substances Control – Hazardous Waste Tracking System (HWTS) Database**

The Property is identified on the HWTS database under the following names:

Atlantic Richfield Company: No hazardous waste generation was reported.

Source: [https://hwts.dtsc.ca.gov/hwts\\_Reports/ReportPages/Report03.aspx?epaid=CAC000171957](https://hwts.dtsc.ca.gov/hwts_Reports/ReportPages/Report03.aspx?epaid=CAC000171957)

BP West Coat Products LLC: The inactive dates are January 1, 2002 and June 30, 2011.

The following hazardous waste generation was reported:

Ted's ARCO: No hazardous waste generation was reported.

Source: [https://hwts.dtsc.ca.gov/hwts\\_Reports/ReportPages/Report03.aspx?epaid=CAL000298593](https://hwts.dtsc.ca.gov/hwts_Reports/ReportPages/Report03.aspx?epaid=CAL000298593)

The HWTS database listings pertain to the operation of the Property as a gas station.

### **HAZNET (Hazardous Waste Information System)**

The Property is identified on the HAZNET database under the following names:

BP West Coast Products LLC 2010: Wastes categorized as “aqueous solution with total organic residues less than 10 percent,” “off-specification, aged, or surplus organics,” and “other empty containers 30 gallons or more” were reported.

ARCO Service Station #2010: In 1999, 0.0034 tons of waste categorized as “unspecified organic liquid mixture” was generated and disposed of under a hazardous waste manifest.

BP West Coast Products LLC: Wastes categorized as “aqueous solution with total organic residues less than 10 percent,” “waste oil and mixed oil,” “other organic solids,” “contaminated soil from site clean-up,” and “other empty containers 30 gallons or more” were reported.

### **RGA LUST (Recovered Government Archive Leaking Underground Storage Tank)**

The Property is identified on the RGA LUST database under the name of ARCO. These listings pertain to a closed LUST case. Refer to Section 4.1 for further details.

### **LUST (Leaking Underground Storage Tank)**

The Property is associated with a closed LUST case under the name ARCO #2010 (Global ID# T0608500170). The LUST case was opened on May 21, 1986 due to impacted “other groundwater (uses other than drinking water)” as the result of a gasoline release. Case closure was granted on September 7, 2017. Refer to Section 4.1 for further details.

### **HIST LUST (Historical Leaking Underground Storage Tank)**

The Property is identified on the HIST LUST database under the name ARCO. The date listed is January 1, 1987. This listing pertains to a closed LUST case. Refer to Section 4.1 for further details.

### **HIST CORTESE**

The Property is identified on the HIST CORTESE database under the name ARCO. This listing is associated with a closed LUST case at the Property. Refer to Section 4.1 for further details.

#### **CA CUPA Listings**

The Property is identified on the CA CUPA Listings database under the names ARCO Facility #2010 and Ted's ARCO. The program description is "generates 100 kg per year to less than 5 tons per year."

#### **CERS (California Environmental Reporting System)**

The Property is identified on the CERS database under the name ARCO Service Station #2010 as a LUST cleanup site. Refer to Section 4.1 for further details.

#### **FINDS (Facility Index System)**

The Property is identified on the FINDS database under the name ARCO #2010. The FINDS database is a "pointer" database which identifies other database listings. The FINDS database listings pertain to the former operation of the Property as a gas station.

#### **CA UST (California Underground Storage Tank)**

The Property is identified on the CA UST database under the name ARCO Smog Pros Store #02010. The listing refers to former USTs.

#### **ERNS (Emergency Response Notification System)**

The Property is identified on the ERNS database under the name 2110 Old Middlefield Way. It was reported that the piping line between two USTs leaked gasoline during leak detector testing in 1987. It was indicated that the tanks were shut-down pending investigation, and that soil removal was pending. The Property has been adequately assessed in association with a closed LUST case. Refer to Section 4.1 for further details.

#### **SWEEPS UST (Statewide Environmental Evaluation and Planning System – Underground Storage Tank)**

The Property is identified on the SWEEPS UST database under the name ARCO. Three 12,000-gallon USTs and one 550-gallon waste oil UST were reported. Refer to Section 4.1 for further details.

#### **CA FID UST (California Facility Inventory Database Underground Storage Tank)**

The Property is identified on the CA FID UST database under the name ARCO with an active status. This listing is associated with the former USTs.

#### **HIST UST (Historical Underground Storage Tank)**

The Property is identified on the HIST UST database under the name Taghi Lavassani in association with former USTs. Two 10,000-gallon USTs, an 8,000-gallon UST, and a 250-gallon UST were installed in 1979. Refer to Section 4.1 for further details.

Source: <https://geotracker.waterboards.ca.gov/ustpdfs/pdf/0002CDFC.pdf>

#### **Other Non-ASTM List - EDR Historical Auto Stations**

The Property is identified on the EDR Hist Auto proprietary database under the names “Doris Richfield Service” in 1969 and 1970, and “Teds ARCO” from 1986 to 2008 as a gas station.

#### **City of Mountain View Fire Department (MVFD)**

Numerous records were obtained from the MVFD that are associated with the historical operation of the Property as a gas station and an associated LUST case. Refer to Section 4.1 for details.

#### **County of Santa Clara Department of Environmental Health (SCEH)**

Records obtained from the SCEH pertain to the former onsite gas station and automotive repair shop. The records included inspection reports, hazardous waste generator permit applications, a waste inventory, and a hazardous waste manifest. A 500-gallon waste oil UST, used motor oil (500 gallons generated annually), used anti-freeze (50 gallons generated annually), and used “solvent” (15 gallons generated annually) were reported.

#### **Bay Area Air Quality Management District (BAAQMD)**

Records obtained from the BAAQMD pertained to permitting for the former gas station. It was reported that the gas station was demolished in September 2008. The following additional information was reported:

Application No.	Legacy Plant/GDF No.	Application Submission Date	Application Name	Current Status	Current Status Date	Application Engineer
<a href="#">6003</a>	3680	7/29/2002	GDF - Modification (3x12K, 8 tprn, bal, EVR)	Approved	8/16/2002	Madhav Patil
<a href="#">22247</a>	3680	6/4/1990	GDF - Modification	Approved	6/12/1990	Pleasant McNeel
<a href="#">21979</a>	3680	11/13/1989	GDF-Cancel per RHL	Canceled	12/7/1989	Luna Salaver
<a href="#">21663</a>	3680	4/13/1989	GDF - tank replace	Approved	4/28/1989	Luna Salaver

#### **Department of Toxic Substances Control (DTSC)**

A written request was made to the DTSC to review public records pertaining to the Property. As of the drafting of this report the DTSC had not responded to the request. If information is subsequently received from this agency which alters the conclusions of this assessment, a report addendum will be provided to the *Client*.

De-listed NPL	0.5	0
CERCLIS/SEMS	0.5	3
CERCLIS-NFRAP/SEMS-ARCHIVE	0.5	0
RCRA-CORRACTS	1.0	2
RCRA-TSDF	0.5	0
RCRA-Generator	Adjoining Sites	1

**NPL (National Priority List):**

LISTING	ADDRESS	DISTANCE
PRINTEX CORPORATION	PLYMOUTH & COLONY STREETS	NE 1/8 - 1/4
TELEDYNE SEMICONDUCTOR	1300 TERRA BELLA AVENUE	E 1/4 - 1/2
SPECTRA-PHYSICS INC.	1250 WEST MIDDLEFIELD WAY	SE 1/2 - 1

**PRINTEX CORPORATION:** This NPL site is located approximately 1,200 feet northeast of the Property. It is identified on the online EPA cumulis database under the name CTS Printex, Inc. The site is also identified on the online ENVIROSTOR and GeoTracker databases in association with a RESPONSE case and an "Information Item" CPS (Cleanup Program Sites) case, respectively. The CPS case is associated with the address of 1911 Plymouth Street. The following was reported on the online EPA cumulis database:

*The CTS Printex, Inc. site (site) is located in Mountain View, California. CTS Printex operated a printed circuit board manufacturing facility within a 5.5-acre portion of the area bounded by Plymouth, Colony, and Sierra Vista Streets from 1966 to 1985. Metals and volatile organic compounds (VOCs), including trichloroethene (TCE), were discharged to site soils and groundwater as a result of waste management practices during CTS Printex's manufacturing operations. EPA added the site to the Superfund National Priorities List (NPL) in 1990. The site includes the former facility property and an area of impacted groundwater extending beyond the facility boundary.*

*Environmental cleanup activities began in 1985, when CTS Printex initiated site closure activities in cooperation with the Regional Water Board. This work included the removal of contaminated soil, and the construction, operation, and maintenance of a groundwater extraction system.*

*Active groundwater extraction occurred from 1987 to 1996, resulting in successful removal of approximately 100 pounds of TCE and more than 106 million gallons of contaminated groundwater. In 1996, it was determined that the groundwater extraction system was no longer an efficient way to remove contaminants, and the Regional Water Board disconnected the system. However, VOC concentrations in groundwater remained above cleanup goals.*

*In 2011, EPA became the lead agency for the site and issued a Record of Decision Amendment with updated remedies for both groundwater and vapor intrusion. The vapor intrusion remedy relies on institutional controls, monitoring, and installation of mitigation measures at specific properties and/or during site redevelopment. The new groundwater remedy includes enhanced anaerobic bioremediation (EAB) to speed up cleanup of remaining VOC contamination, monitored natural attenuation, and institutional controls restricting groundwater use. EAB is a treatment technology that uses naturally occurring microorganisms below the surface to clean up the groundwater contamination.*

*EPA has conducted four Five-Year Reviews (FYR) to evaluate if the remedy is working as intended and protective of human health and the environment. The 2015 FYR concluded that the remedy continues to be protective of human health and the environment.*

*Soil cleanup is complete and groundwater cleanup is ongoing. Vapor intrusion mitigation measures have been successfully implemented at new developments to address potential vapor intrusion concerns. Vapor intrusion mitigation measures will be implemented as needed for future construction and redevelopment on or near the Site.*

*CTS Printex completed the Remedial Design investigation for the new groundwater remedy selected in the 2011 Record of Decision Amendment. The new groundwater remedy is anticipated to begin in 2019.*

The following conclusions and recommendations were provided in a 2017 Groundwater Monitoring Report for the CTS Printex Superfund Site:

*The results of the 2017 annual groundwater monitoring indicate that the plume is relatively stable, and concentrations are consistent with a general decreasing trend over time. The remedy defined in the ROD Amendment remains protective of human health and the environment.*

Per the 2017 Annual Groundwater Monitoring Report and a 2020 Fifth Five-Year Review Report for the CTS Printex Superfund Site, it appears that contamination at the CTS Printex site has not impacted the Property. Further, the CTS Printex site is not assessed to be indicative of environmental concern to the Property based on its horizontal distance from the Property.

[https://www.envirostor.dtsc.ca.gov/public/profile\\_report?global\\_id=43360083](https://www.envirostor.dtsc.ca.gov/public/profile_report?global_id=43360083)

**TELEDYNE SEMICONDUCTOR:** The westernmost boundary of the Teledyne Semiconductor NPL site is located approximately 2,000 feet east of the Property. It is also identified on the ENVIROSTOR and GeoTracker databases in association with a RESPONSE case and an open CPS case, respectively. The CPS case is associated with the address of 1300 Terra Bella Avenue. The Teledyne Semiconductor NPL site is also associated with the Spectra-Physics, Inc. NPL site. Investigations pertain to both cases.

The following was reported on the online EPA cumulis database:

*Teledyne Semiconductor has operated as a semiconductor manufacturer at this 1-acre site since 1962. In 1982, Teledyne reported to the California Regional Water Quality Control Board (CRWQCB) that soil and groundwater were contaminated with solvents from an underground solvent storage tank. The State inspected the site and found that contaminants had migrated north of the site and affected approximately 50 private domestic wells. Furthermore, contaminated groundwater that migrated north from another NPL site, Spectra-Physics, Inc., merged with the contaminated plume of the Teledyne site. The two firms are cleaning up the sites jointly. These sites are among the 28 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which have contaminated a common groundwater basin. Although the sites are listed separately on the NPL, the EPA intends to combine cleanup activities at some of the sites as part of an area-wide approach to the contamination. The site is located in a densely populated, urban area. Approximately 189,000 people live within a 3-mile radius of the site. The distance from the site to the nearest residence is 200 feet.*

*The parties responsible for the environmental cleanup (Potentially Responsible Parties) have been conducting soil and groundwater cleanup activities for over 30 years. Groundwater extraction and soil vapor extraction have removed thousands of pounds of VOCs from both groundwater and soil. Over the last several years, a new cleanup method was tested and evaluated to speed up the groundwater cleanup. This evaluation is known as a Revised Focused Feasibility Study (Revised FFS), and is a major milestone for the Site. EPA and the Regional Water Board are close to completing their approval of the FFS, pending public comments. Approving the Revised FFS will pave the way to officially changing the cleanup plan for the Site from groundwater extraction to the bioremediation remedy. The new method uses bioremediation - a process whereby microorganisms found naturally underground are stimulated with nutrients to clean up the contamination groundwater. This new cleanup method has greatly improved groundwater quality across the former Teledyne property and has the potential to greatly reduce the time it will take to reach the cleanup goals in the impacted areas. We will issue a public comment fact sheet to invite your comments within the next few months.*

*EPA has conducted several five-year reviews of the site's remedy. These reviews ensure that the remedies put in place protect public health and the environment, and function as intended by site decision documents. The most recent review concluded that EPA could not determine the protectiveness of the remedy until it conducts a vapor intrusion assessment.*

*Additionally, the most recent five-year review (reviews that ensure that the remedies put in place protect public health and the environment) concluded that EPA could not determine human health protectiveness of the remedy until it conducts a vapor intrusion assessment. There is some limited potential for VOCs in groundwater to move as vapors through soil under a building, pass through cracks and other openings in the foundation or flooring, and then enter the indoor air. This process is known as vapor intrusion. To determine if vapor intrusion is occurring at levels unacceptable to the EPA, the EPA and Regional Water Board have been working with the Potentially Responsible Parties to conduct indoor air testing in homes and businesses over the TCE plume from the Site that might be affected. The process for testing TCE in indoor air is not disruptive and involves placing a small sampling device inside a home (such as on a shelf) and underneath the building in the crawlspace and left untouched for one to two weeks. There is no cost to owners or tenants for the sampling.*

*The Fourth Five-Year Review was completed in Sept. 2014, concluding that the vapor intrusion indoor air investigation needs to be completed before a "protectiveness*

determination” can be made. The following issues and recommendations were identified in the report:

- The performance of the selected remedy in the Record of Decision, groundwater extraction and treatment, has declined and new remedial actions are being investigated.

*Recommendation – Complete a Record of Decision Amendment or prepare an Explanation of Significant Differences selecting new remedial actions and including updated institutional controls.*

- The Five-Year Review vapor intrusion evaluation indicated that the subsurface-to-indoor air pathway is a concern at the site.

*Recommendation – Continue to monitor and provide mitigation for vapor intrusion, including step-outs to lower concentration areas of the shallow TCE groundwater plume.*

*The Five-Year Review further stated the following:*

*A protectiveness determination of the remedy at the Teledyne Semiconductor and Spectra-Physics, Inc. Joint Superfund Sites cannot be made at this time until further information is obtained. Additional vapor intrusion assessments must be conducted to determine if indoor air pathways are complete. When unacceptable levels are encountered in a particular building, mitigation plans are developed and implemented to ensure that levels of volatile organic compounds (VOCs) in indoor air are protective. It is expected that these actions will take approximately two years to complete, at which time a protectiveness determination can be made. To be protective in the long-run, a new remedy should be selected due to the declining effectiveness of the existing remedy.*

Per previous environmental reports, contamination at the Teledyne Semiconductor site has not impacted the Property. Further, the Teledyne Semiconductor site is not assessed to be indicative of environmental concern to the Property based on its horizontal distance from the Property.

SPECTRA-PHYSICS INC.: This NPL site is associated with the Teledyne Semiconductor site above.

The following site history was reported on the GeoTracker database for the Spectra-Physics, Inc. site:

*The former Spectraphysics property is part of a 2-property Federal Superfund site along with the adjacent Teledyne property.*

*Within the last ten years, Responsible Parties (RPs) for the Teledyne/Spectra-Physics site completed a Monitored Natural Attenuation (MNA) study in the off-property area north of and down-gradient of the site. The MNA study concluded that natural breakdown*

of the chlorinated volatile organic compounds of concern is occurring naturally and at the same rate as groundwater extraction. As a result, only a few of the off-property down-gradient extraction wells are operating mainly to maintain hydraulic control of the plume. The RPs completed an extended pilot study to test the feasibility of enhanced reductive de-chlorination (ERD) and concluded that ERD is feasible with bioaugmentation of the Shallow Zone.

Within the last several years, the RPs detected on-property groundwater-CVOCs and higher than expected levels but under 1,000 parts per billion and are about to impelment an on-property ERD treatability study with the same recirculation technology as the the neighboring Teledyne property. When sub-slab depressurization (SSD) systems have been installed under the potentially impacted buildings, the RPs will move forward on the ERD treatability study.

Within the last seven years however, IA VI was evaluated in several of the on-property commercial buildings to find that IA-CVOCs were over ESLs. The RPs installed SSD systems at several of the buildings. The RPs also assertively evaluated potential IA VI in the off-property commercial North Bayshore and residential Spring Street areas to conclude that IA VI is occurring in one of the off-property commercial area buildings and in several homes in the residential area. The RPs were in the process of installing a sub-slab depressurization system in the commercial building and offered the affected residents crawl space fans to address the issue.

Based on its horizontal distance from the Property and a review of previous environmental reports (as discussed in the Teledyne Semiconductor section above), the Spectra-Physics, Inc. site is not assessed to be indicative of environmental concern to the Property.

**SEMS (Superfund Enterprise Management System):**

LISTING	ADDRESS	DISTANCE
PRINTEX CORPORATION	PLYMOUTH & COLONY STREETS	NE 1/8 - 1/4
TELEDYNE SEMICONDUCTOR	1300 TERRA BELLA AVENUE	E 1/4 - 1/2
SIERRA VISTA PROPERTIES	465 SIERRA VISTA WAY	SSE 1/4 - 1/2

PRINTEX CORPORATION: This site is discussed in the NPL section above.

TELEDYNE SEMICONDUCTOR: This site is discussed in the NPL section above.

SIERRA VISTA PROPERTIES: This site is located approximately 2,500 feet south-southeast of the Property.

The following site history was reported on the ENVIROSTOR database:

*From 1963 to 1985, property owner operated pest control company out of a residence on this site. Improper storage and handling of pesticides resulted in soil contamination. Contaminated soil was consolidated and capped beneath driveway areas of the property. The site has been redeveloped into townhomes.*

The Sierra Vista Properties site is not assessed to be indicative of environmental concern to the Property based on its horizontal distance from the Property and the lack of reported groundwater impact.

**RCRA-CORRACTS (Corrective Action Tracking System):**

LISTING	ADDRESS	DISTANCE
TELEDYNE SEMICONDUCTOR	1300 TERRA BELLA AVENUE	E 1/4 - 1/2
SPECTRA-PHYSICS INC.	1250 WEST MIDDLEFIELD WAY	SE 1/2 - 1

These sites are discussed in the NPL section above.

**RCRA NonGen / NLR (Resource Conservation and Recovery Act – Non-Generator):**

LISTING	ADDRESS	DISTANCE/DIRECTION
DRIVEN AUTO CARE, INC.	826 NORTH RENGSTORFF AVENUE	NNE 0 - 1/8

DRIVEN AUTO CARE, INC.: This site adjoins the Property to the north. It is identified on the GeoTracker database in association with a closed LUST case under the name Alvin Silver Prop. The LUST case was opened in 1987 due to impacted “other groundwater (uses other than drinking water)” as the result of a waste oil (motor oil, hydraulic oil, and/or lubricating oil) release. Case closure was granted on March 23, 2009.

In 1987, a 550-gallon waste oil tank was removed from the Driven Auto Care, Inc. site. At the time of case closure, soil and groundwater contamination remained at the site. However, it was reported that the release from the waste oil tank did not appear to impact shallow groundwater. The groundwater contamination at the site was determined to be a result of the former fuel release at the Property. Previous groundwater monitoring wells at the Driven Auto care, Inc. site were incorporated into the groundwater monitoring program for the LUST case at the Property. In January 1997, a settlement agreement was completed between the Property (ARCO) and the north-adjacent site (Alvin Silver Prop); it was determined that ARCO would assume all corrective action and remediation at the Property and north-adjacent site. The investigations associated with the Property LUST case included areas within the Property boundaries and vicinity (primarily to the north-northwest). Refer to Section 4.1 for details regarding the LUST case at the Property which included investigations at the north-adjacent vicinity.

Based on the above, it appears that the release from the former waste oil tank at the north-adjacent site did not contribute to the contaminant plume that was associated with the fuel release at the Property. Further, groundwater flows toward the northwest, away from the Property and case closure was granted

for the Driven Auto Care, Inc. site in 2009. As such, the Driven Auto Care, Inc. / Alvin Silver Prop site is not assessed to be indicative of environmental concern to the Property.

5.4 SURROUNDING SITES: STATE AGENCY LISTINGS

STATE ENVIRONMENTAL AGENCY LISTING(S)		
DATABASE	MINIMUM SEARCH DISTANCE (MILES)	PROPERTIES IDENTIFIED WITHIN SEARCH DISTANCE
State/Tribal Equivalent NPL	1.0	6
State/Tribal Equivalent CERCLIS	0.5	4
State/Tribal SWLF	0.5	0
State/Tribal Leaking Storage Tank	0.5	32 (may include duplicate listings)
State/Tribal Registered Storage Tank	Adjoining Sites	1
State/Tribal IC/EC Registries	Adjoining Sites	0
State/Tribal Voluntary Cleanup Sites	0.5	1
State/Tribal Brownfield Sites	0.5	1
State/Tribal CPS / SLIC (CA only)	0.5	11
Other State List	Adjoining Sites	2
Other Non-ASTM Listings	Adjoining Sites	3

**State/Tribal Equivalent NPL - RESPONSE:**

Listed below are the five nearest RESPONSE sites to the Property. For a complete listing, refer to the EDR Radius Map Report appended to this report.

LISTING	ADDRESS	DISTANCE
TRW/VIDAR	77 ORTEGA AVENUE	SW 1/2 - 1
PLESSEY #3	2256 MORA DRIVE	SSW 1/2 - 1
DTSC FORMER PLESSEY	2274 MORA DRIVE	SSW 1/2 - 1
PLESSEY #2	2251, 2257, 2283 and 2287 MORA DRIVE	SSW 1/2 - 1
SYMTRON CORP MOUNTAIN VIEW DIV	2235 MORA DRIVE	SSW 1/2 - 1

TRW/VIDAR: This RESPONSE site is located approximately 4,800 feet southwest of the Property. It is not assessed to be indicative of environmental concern to the Property based on its horizontal distance.

The remaining RESPONSE sites are not assessed to be indicative of environmental concern to the Property based on their horizontal distances. Further, with the exception of the DTSC Former Plessey site, the remaining RESPONSE sites have "No Further Action" cleanup statuses.

**State/Tribal Equivalent CERCLIS - ENVIROSTOR:**

LISTING	ADDRESS	DISTANCE/DIRECTION
PRINTEX CORPORATION	PLYMOUTH & COLONY STREETS	NE 1/8 - 1/4
RAMLOR SILKSCREENING	918 INDEPENDENCE AVENUE	NW 1/4 - 1/2

MT. VIEW JONES HALL USAR	1776 OLD MIDDLE FIELD WAY	E 1/4 - 1/2
CALWEST PROPERTIES (SIERRA VISTA)	465 SIERRA VISTA AVENUE	SSE 1/4 - 1/2

PRINTEX CORPORATION: This site is discussed in the NPL section above.

CALWEST PROPERTIES (SIERRA VISTA): This site is discussed in the SEMS section above.

The remaining ENVIROSTOR sites are not assessed to be indicative of environmental concern to the Property based on their horizontal distances from the Property. Further, the Ramlor Silkscreening site has a “No Further Action” cleanup status and it is at a down / cross-gradient location with respect to the groundwater flow direction.

**State/Tribal LST (Leaking Storage Tank) – LUST (Leaking Underground Storage Tank):**

Listed below are the five nearest LUST sites to the Property. For a complete listing, refer to the EDR Radius Map Report appended to this report.

LISTING	ADDRESS	DISTANCE/DIRECTION
DRIVEN AUTO CARE, INC.	826 NORTH RENGSTORFF AVENUE	NNE 0 - 1/8
SHELL	2105 OLD MIDDLEFIELD WAY	S 0 - 1/8
AWARD SERVICES/CV MOUNTAIN VIEW	827 NORTH RENGSTORFF AVENUE	NNE 0 - 1/8
MADLEM MECHANICAL, INC.	1990 OLD MIDDLEFIELD WAY	E 0 - 1/8
RICH'S TIRE SERVICE	1950 OLD MIDDLEFIELD WAY	E 1/8 - 1/4

DRIVEN AUTO CARE, INC.: This site is discussed in the RCRA-NonGen / NLR section above.

SHELL: This site adjoins the Property to the south (approximately 80 feet south). The LUST case was opened on March 2, 1987 due to impacted “other groundwater (uses other than drinking water)” as the result of a gasoline release. Case closure was granted on June 24, 1996. Based on a review of previous environmental reports available on the GeoTracker database, contamination from this site has not impacted the Property. Further, case closure was granted in 1996, indicating that the identified contamination was mitigated to a degree that the applicable governing agency no longer believed this site posed an apparent threat to the subsurface environment. As such, this site is not assessed to be indicative of environmental concern to the Property.

**Note:** This site is also identified on the EDR Historical Cleaner database as a dry-cleaning business from 1992 to 1997. No hazardous waste generation was reported on the HWTS database. This site is not assessed to be indicative of environmental concern to the Property in connection with the potential operation as a dry-cleaning business based on the lack of a reported release of hazardous substances to the environment at the site with regards to chlorinated solvents. Further, this site does not immediately adjoin the Property (it is separated by Old Middlefield Way).

Sources:

[https://geotracker.waterboards.ca.gov/profile\\_report.asp?global\\_id=T0608501274](https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501274)

[https://geotracker.waterboards.ca.gov/regulators/deliverable\\_documents/8628132700/CLOS\\_L\\_1996-06-24.pdf](https://geotracker.waterboards.ca.gov/regulators/deliverable_documents/8628132700/CLOS_L_1996-06-24.pdf)

AWARD SERVICES/CV MOUNTAIN VIEW: This case-closed LUST site is located approximately 140 feet northeast of the Property. The LUST case was opened in 1987 due to impacted “other groundwater (uses

other than drinking water)” as the result of a gasoline release. Case closure was granted on November 2, 2012. The following site history was reported on the GeoTracker database:

*Leak detection monitoring wells installed in 1986 indicated groundwater contamination. The USTs were coated with fiberglass in 1988 and subsequently tested tight. 3 months later, the USTs were removed. During removal, some product sheen was observed in the tank pit. However dissolved concentrations declined in the wells after the tanks were recoated and removed, indicating that the source of contamination had been removed. The fuel leak case was closed on 5/25/95.*

*In February 2012, a subsurface investigation was conducted for a possible real estate transaction. Soil and grab groundwater samples reported the presence of petroleum hydrocarbons. The responsible party choose to conduct additional soil removal at the site to reduce the residual contamination onsite. The case was re-opened in April 2012.*

*Soil was excavated and groundwater was extracted from the pits onsite. Excavations were backfilled with imported fill.*

Per review of a 2012 Groundwater Verification Sampling Report for the Award Services / CV Mountain View site, contamination from this site has not impacted the Property. Further, case closure was granted in 2012, indicating that identified contamination was mitigated to a degree that the applicable governing agency no longer believed this site posed an apparent threat to the subsurface environment of the surrounding vicinity. As such, this site is not assessed to be indicative of environmental concern to the Property.

MADLEM MECHANICAL, INC.: This case-closed LUST site is located approximately 500 feet east of the Property. The LUST case was opened in 1987 due to impacted “other groundwater (uses other than drinking water)” as the result of a gasoline release. Per review of previous environmental reports available on the GeoTracker database for the Madlem Mechanical, Inc. site, contamination from this site has not impacted the Property. Further, case closure was granted in 2000, indicating that identified contamination was mitigated to a degree that the applicable governing agency no longer believed this site posed an apparent threat to the subsurface environment of the surrounding vicinity. As such, this site is not assessed to be indicative of environmental concern to the Property.

RICH'S TIRE SERVICE: This site is located approximately 900 feet east of the Property. It is not assessed to be indicative of environmental concern to the Property based on its horizontal distance from the Property and its case closed regulatory status.

Source: [https://geotracker.waterboards.ca.gov/profile\\_report.asp?global\\_id=T0608501103](https://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608501103)

The remaining LUST sites are not assessed to be indicative of environmental concern to the Property based on their horizontal distances from the Property and their case closed regulatory statuses. Further, several of the sites are at a down / cross-gradient location with respect to the groundwater flow direction.

**State/Tribal List – CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites)**

Listed below are the five nearest CPS sites to the Property. For a complete listing, refer to the EDR Radius Map Report appended to this report.

LISTING	ADDRESS	DISTANCE/DIRECTION
1957 OLD MIDDLEFIELD WAY	1957 OLD MIDDLEFIELD WAY	ESE 1/8 - 1/4
PRINTEX CONCRETE	827 INDEPENDENCE AVENUE	WNW 1/8 - 1/4
CTS PRINTEX, MOUNTAIN VIEW	1911 PLYMOUTH STREET	NE 1/8 - 1/4
MIDDLEFIELD PLAZA	2454 OLD MIDDLEFIELD WAY	SW 1/4 - 1/2
TEXACO	1036 RENGSTORFF AVENUE	N 1/4 - 1/2

1957 OLD MIDDLEFIELD WAY: This case-closed CPS site is located approximately 850 feet southeast of the Property. It is not assessed to be indicative of environmental concern to the Property based on its horizontal distance from the Property and its case closed regulatory status.

CTS PRINTEX, MOUNTAIN VIEW: This site is discussed in the NPL section above.

The remaining CPS sites are not assessed to be indicative of environmental concern to the Property based on their horizontal distances from the Property. Further, several of the CPS/SLIC sites have case-closed regulatory statuses and several of the sites are at a down / cross-gradient location with respect to the groundwater flow direction.

**VCP (Voluntary Cleanup Program):**

LISTING	ADDRESS	DISTANCE
CALWEST PROPERTIES (SIERRA VISTA)	465 SIERRA VISTA WAY	SSE 1/4 - 1/2

CALWEST PROPERTIES (SIERRA VISTA): This site is discussed in the SEMS section above.

**State/Tribal Brownfields:**

LISTING	ADDRESS	DISTANCE
MIDDLEFIELD PLAZA	2454 MIDDLEFIELD WAY	SW 1/4 - 1/2

MIDDLEFIELD PLAZA: This site is not assessed to be indicative of environmental concern to the Property based on its horizontal distance. In addition, it is identified on the CPS/SLIC database with a case-closed regulatory status.

**State/Tribal RST (Registered Storage Tank) – HIST UST (Historical Underground Storage Tank) / SWEEPS UST (Statewide Environmental Evaluation and Planning System – Underground Storage Tank) / CA FID UST (California Facility Inventory Database Underground Storage Tank):**

LISTING	ADDRESS	DISTANCE
SAMUEL SHELL SERVICE	2105 OLD MIDDLEFIELD WAY	S 0 - 1/8

This site is discussed in the LUST section above.

**Other State Listings:**

LISTING	ADDRESS	DISTANCE/DIRECTION
DRIVEN AUTO CARE, INC. PRECISION TUNE AUTO CARE ALVIN SILVER PROPERTIES	826 NORTH RENGSTORFF AVENUE	NNE 0 - 1/8
SHELL	2105 OLD MIDDLEFIELD WAY	S 0 - 1/8

DRIVEN AUTO CARE, INC. / PRECISION TUNE AUTO CARE / ALVIN SILVER PROPERTIES: This site is discussed in the RCRA-NonGen / NLR section above.

SHELL: This site is discussed in the LUST section above.

**Other Non-ASTM List - EDR Hist Auto:**

LISTING	ADDRESS	DISTANCE
LEMONS AMERICAN OIL SERVICE	799 NORTH RENGSTORFF AVENUE	SE 0 - 1/8
SALMONS SHELL SERVICE	2105 OLD MIDDLEFIELD WAY	S 0 - 1/8

LEMONS AMERICAN OIL SERVICE: The specific location of this site is unknown since it plots to North Rengstorff Avenue (approximately 200 feet southeast of the Property). This listing may pertain to the south- or southeast-adjacent site. This site is identified on the EDR Hist Auto proprietary database from 1969 to 1983 as a gas station under the names Lemon's American Oil Service and Francines Service Center. It is not identified on the HWTS database. This site is not assessed to be indicative of environmental concern to the Property based on the lack of a reported release of hazardous substances to the environment. Further, this site may not adjoin the Property and based on previous environmental reports available on the GeoTracker database for the south-adjacent case-closed LUST site, contamination from this site has not impacted the Property. Based on the foregoing, the Lemons American Oil Service site is not assessed to be indicative of environmental concern to the Property.

SALMONS SHELL SERVICE: This site is discussed in the LUST section above.

**Other Non-ASTM List - EDR Historical Cleaner:**

LISTING	ADDRESS	DISTANCE
SWAN CLEANERS	2105 OLD MIDDLEFIELD WAY	S 0 - 1/8
SPARKLE CLEAN CLEANERS	2065 OLD MIDDLEFIELD WAY	ESE 0 - 1/8

SWAN CLEANERS: This site is discussed in the LUST section above.

SPARKLE CLEAN CLEANERS: This site plots to approximately 250 feet southeast of the Property. The specific location of this site is unknown; the site may adjoin the Property to the east or southeast. It is identified on the EDR Historical Cleaner database under as a dry-cleaning business in 1976. It is not identified on the HWTS database. This site is not assessed to be indicative of environmental concern to the Property based on the lack of a reported release of hazardous substances to the environment at the site. Further, this site does not immediately adjoin the Property.

**Note:** Although this business was identified at 2065 Old Middlefield Road on the EDR Radius Map Report, the correct address is 2065 Old Middlefield Way.

5.5 VAPOR ENCROACHMENT CONDITION

ODIC performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Standard Practice E1527-13 of the Property. It should be noted that ASTM Standard Practice E1527-13 does not necessarily comply with the ASTM Standard Practice E2600-15 “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.” For assessment of potential “vapor encroachment conditions” (VECs) and to determine if a “vapor intrusion condition” (VIC) exists on-site, additional investigation beyond ASTM Standard Practice E1527-13 is required.

For the purposes of ASTM Standard Practice E1527-13, “migrate” and “migration” refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is described in ASTM Standard Practice E2600; however, nothing in this practice (ASTM Standard Practice E1527-13) should be construed to require application of the ASTM Standard Practice E2600-15 “Standard Guide for Vapor Encroachment Screening” to achieve compliance with all appropriate inquiries.

The purpose of ASTM Standard Practice E2600-15 is to provide practical guidance and a useful process for conducting a *vapor encroachment screen (VES)* on a property parcel involved in a *real estate transaction* in the United States of America with respect to *chemicals of concern (COC)* that may migrate as vapors onto a property as a result of contaminated soil and groundwater on or near the property.

A vapor encroachment condition (VEC) is the presence or likely presence of chemicals of concern (COCs) vapors in the vadose zone of the Property caused by the release of vapors from contaminated soil and/or groundwater either on or near the Property. A VEC may exist in connection with the Property due to areas of concern (AOCs) from current or historical uses of the Property and/or vicinity properties.

A VEC may exist from migration of COCs through subsurface conduits such as pipelines, utility lines, and sewer and storm-water lines from offsite source of contamination.

In defining a standard of good commercial and customary practice for determining a VEC on a parcel of property, the goal of the process established by this practice is to identify whether or not a VEC exists or is likely to exist on the property. The term VEC means the presence or likely presence of any COC in the indoor air environment of existing or planned structures on a property caused by the release of vapor from contaminated soil and/or groundwater either on the property or within close proximity to the property, at a concentration that presents or may present an unacceptable health risk to occupants. The term is not intended to include *de minimis* conditions that do not normally represent an unacceptable health risk to occupants that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be *de minimis* does not represent a VEC.

Minimum search distances surrounding the Property to identify the Area of Concern (AOC)		
STANDARD ENVIRONMENTAL RECORD SOURCES	MINIMUM SEARCH DISTANCE (MILES) CHEMICALS OF CONCERN	MINIMUM SEARCH DISTANCE (MILES) PETROLEUM HYDROCARBON CHEMICALS OF CONCERN
Federal NPL	1/3	1/10
Federal CERCLIS	1/3	1/10
Federal RCRA-CORRACTS	1/3	1/10
Federal RCRA-TSDF	1/3	1/10
Federal RCRA-Generator	Property only	Property only
Federal IC/EC Registries	Property only	Property only
Federal ERNS	Property only	Property only
State/Tribal Equivalent	1/3	1/10

<b>Minimum search distances surrounding the Property to identify the Area of Concern (AOC)</b>		
<b>STANDARD ENVIRONMENTAL RECORD SOURCES</b>	<b>MINIMUM SEARCH DISTANCE (MILES) CHEMICALS OF CONCERN</b>	<b>MINIMUM SEARCH DISTANCE (MILES) PETROLEUM HYDROCARBON CHEMICALS OF CONCERN</b>
NPL		
State/Tribal Equivalent CERCLIS	1/3	1/10
State/Tribal SWLF	1/3	1/10
State/Tribal Leaking Storage Tank	1/3	1/10
State/Tribal Registered Storage Tank	Property only	Property only
State/Tribal IC/EC Registries	Property only	Property only
State/Tribal Voluntary Cleanup Sites	1/3	1/10
State/Tribal Brownfield Sites	1/3	1/10

The screening involves a two tiered approach to assessing VEC risk as described below.

#### **VES TIER I - Search Distance Test**

The search distance test involves a review of the regulatory database report (see Sections 5.2 through 5.4 of this Report) and available historical records to determine if any *known or suspect potentially contaminated* properties exist within the Area of Concern (AOC). Sites of potential Vapor Encroachment Condition (pVEC) are typically former and current gas stations (using petroleum hydrocarbons), dry cleaners (using chlorinated volatile organic compounds), manufactured gas plants (using volatile and semi-volatile organic compounds) and industrial manufacturing facilities using volatile organic compounds from parts-cleaning, degreasing, etc.),

The AOC is defined as any up-gradient sites within the ASTM Standard Practice E1527-13 standard search distances and any cross- or down-gradient sites within 1/3 mile for solvents and petroleum products.

If the contamination at the known or potentially contaminated site within the AOC consists of Contaminants of Concern (COCs), then a potential Vapor Encroachment Condition (pVEC) exists and Tier II screening is recommended. If no known or potentially contaminated sites with COCs exist within the AOC, no further inquiry is deemed necessary.

Releases of COCs may have occurred from the sites in the vicinity of the Property, but if (1) the medium affected is the soil only, (2) the sites within AOC are beyond the critical distance of 100-feet, and (3) the site location and/or plume of contamination is excess of the critical distance of 100-feet from the Property, the sites may not pose a significant threat or an unacceptable health risk via vapor intrusion pathway to the Property.

The Property is associated with a closed LUST case. Extensive soil and groundwater investigations and remedial activities have been conducted at the Property and vicinity. Per a 2014 Low-Threat Underground Storage Tank Case Closure Report prepared for the Property rationale was detailed for Low-Threat UST Case Closure qualifications including Low-Threat Closure Policy (LTCP) for Vapor Intrusion to Indoor Air. Per a letter from the County of Santa Clara Department of Environmental Health (SCEH) dated August 26, 2015, it was indicated that no additional work to assess potential vapor intrusion was required. Refer to Section 4.1 for details.

Based on the foregoing, a significant vapor intrusion risk was not identified in connection with the Property.

### **VES TIER II - Plume Test**

The Plume Test assesses whether or not a plume is close enough to the Property to result in a VEC, based on the following:

1. Critical Distance Determination – Determined by the distance from the Property to edge of a contaminant plume in any direction (vertical, horizontal, lateral).
2. A VEC exists if there is a plume of volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), volatile inorganic compounds (VICs), or free petroleum product that has accumulated above a water table within 100 feet of the Property, or if a plume of dissolved volatile petroleum hydrocarbons is present within 30 feet of the Property.

The sites were manually mapped to determine the location of the Property and any potential plumes of contamination relative to the Property and the groundwater gradient. In addition, the case information for each site was reviewed.

As discussed above, the SCEH confirmed that no additional work was required with regards to potential vapor intrusion at the Property. Based on the soil and groundwater analytical results for the Property and vicinity, there was no indication that a significant vapor intrusion risk exists for the Property.

## 6.0 USER PROVIDED INFORMATION

### 6.1 USER PROVIDED INFORMATION

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-13 Phase I Standards require that the *Report User* conduct independent research and consider certain information before purchasing a property.

The purpose of this section is to describe tasks to be performed by the *User*. The “All Appropriate Inquiries” Final Rule (40 CFR Part 312) requires that these tasks be performed by or on behalf of a party seeking to qualify for an *landowner liability protections (LLP)* to CERCLA liability. While such information is not required to be provided to the *environmental professional*, the *environmental professional* shall request that the *User* provide the results of these tasks as such information can assist the *environmental professional* in identifying Recognized Environmental Conditions.

Per ASTM Standard Practice E1527-13, the “*User*” is defined as follows:

*User—the party seeking to use Practice E 1527-13 to complete an environmental site assessment of the property. A User may include, without limitation, a potential purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.*

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “*Brownfields Amendments*”), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The *User* should provide the following information to the *environmental professional*. Failure to conduct these inquiries could result in a determination that “*all appropriate inquiries*” is not complete.

USER/CUSTOMER QUESTIONNAIRE	
QUESTION	USER/CUSTOMER TO ANSWER
<p><b>(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</b></p> <p>Are you aware of any environmental cleanup liens against the <i>Property</i> that are filed or recorded under federal, tribal, state or local law?</p>	<p>The <i>User</i> has not informed ODIC of any knowledge of cleanup liens filed or recorded against the <i>Property</i>.</p> <p>An environmental cleanup lien/AUL search is not required from ODIC as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this <i>Report</i>; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the <i>Property</i> were identified.</p> <p>Source:  <a href="http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp">http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</a></p>

<p><b>(2.) Activity and land use limitations (AULs) that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26).</b></p> <p><i>Reasonably Ascertainable Title and Judicial Records for Environmental Liens and Activity and Use Limitations.</i></p> <p>Are you aware of any AULs, such as <i>engineering controls</i>, land use restrictions or <i>institutional controls</i> that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?</p>	<p>The <i>User</i> has not informed ODIC of any knowledge of activity or land use limitations associated with the Property.</p> <p>An environmental cleanup lien/AUL search is not required from ODIC as part of this Phase I ESA.</p> <p>An Environmental Lien Search was not requested by the <i>User</i> of this <i>Report</i>; however, based on our review of the California Department of Toxic Substances Control (DTSC) EnviroStor Database, no Environmental Liens or Activity of Use Limitations enforced by the DTSC against the Property were identified.</p> <p><i>Source:</i>  <a href="http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp">http://www.envirostor.dtsc.ca.gov/public/deed_restrictions.asp</a></p>
<p><b>(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).</b></p> <p>As the <i>User</i> of this <i>ESA</i> do you have any specialized knowledge or experience related to the <i>Property</i> or nearby properties? For example, are you involved in the same line of business as the current or former <i>occupants</i> of the <i>Property</i> or an adjoining <i>property</i> so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	<p>The <i>User</i> has not informed ODIC of any specialized knowledge or experience related to the Property or nearby properties.</p>
<p><b>(4.) Relationship of the purchase price to the fair market value of the Property if it were not contaminated (40 CFR 312.29).</b></p> <p>Does the purchase price being paid for this <i>Property</i> reasonably reflect the fair market value of the <i>Property</i>? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ODIC of any information pertaining to the purchase price with respect to the fair market value of the Property.</p>
<p><b>(5.) Commonly known or reasonably ascertainable information about the Property (40 CFR 312.30).</b></p> <p>Are you aware of commonly known or <i>reasonably ascertainable</i> information about the <i>Property</i> that would help the <i>Environmental Professional(EP)</i> to identify conditions indicative of releases or threatened releases? For example, as <i>User</i>,</p> <p>(a.) Do you know the past uses of the <i>Property</i>?</p> <p>(b.) Do you know of specific chemicals that are present or once were present at the <i>Property</i>?</p> <p>(c.) Do you know of spills or other chemical releases that have taken place at the <i>Property</i>?</p> <p>(d.) Do you know of any environmental cleanups that have taken place at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ODIC of any commonly known or reasonably ascertainable information about the Property that would identify conditions indicative of releases or threatened releases, other than as described in Section 6.3 (Interviews), if applicable.</p>

<p><b>(6.) The degree of obviousness of the presence of likely presence of contamination at the <i>Property</i>, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).</b>                  As the <i>User</i> of this <i>ESA</i>, based on your knowledge and experience related to the <i>Property</i> are there any <i>obvious</i> indicators that point to the presence or likely presence of contamination at the <i>Property</i>?</p>	<p>The <i>User</i> has not informed ODIC of any obvious indicators that point to the presence or likely presence of contamination at the <i>Property</i>, other than as described in Section 6.3 (Interviews), if applicable.</p>
---	---

6.2 PRELIMINARY TITLE REPORT OR LAND TITLE RECORDS

No preliminary title reports, recorded land title records, or historical chain of title was reviewed during this *ESA*. ODIC's scope of investigation as well as the contractual agreement between ODIC and the *Client* does not include obtaining and/or reviewing preliminary title reports, recorded land title records, or a historical chain of title.

6.3 INTERVIEWS

<b>Interview with Property Owner</b>	
<b>INTERVIEW DETAILS</b>	
Name	Mr. Amin Salkhi
Title	Owner
Contact Information	510-331-8405
Summary	Mr. Salkhi stated that he purchased the <i>Property</i> in 2017. He confirmed that the <i>Property</i> has been a vacant lot for over ten years and that it was historically occupied by an ARCO gas station. He said that the site is being temporarily used by PG&E for storage (a backhoe was temporarily stored on the <i>Property</i> ).

<b>Interview with Past Owners, Operators, and Occupants</b>	
<b>INTERVIEW DETAILS</b>	
Reason for No Interview	Past owners, operators, and occupants were not available for interview by ODIC.

<b>Interview with State and/or Local Government Officials</b>	
<b>Interview Details</b>	
ASTM E1527-13 Section 10.3 states that questions to be asked pursuant to this section may be asked in person, by telephone, or in writing, in the discretion of the <i>environmental professional</i> . See Section 5.2 for summary of regulatory agencies contacted for records under the Freedom of Information Act.	

## 7.0 REFERENCES

During the preparation of this *Report*, a number of sources were contacted, individuals were interviewed, and various federal, state, county or local municipal agencies were consulted. Documentation applicable to the Property in those departments and agencies was requested and reviewed when and where reasonably ascertainable, as detailed in ASTM Standard Practice E1527-13. Individuals listed without phone numbers were contacted in person or by e-mail. Reference sources for site-specific information, hydrogeologic setting, technical data, historical research data, environmental reports and other records used are identified throughout this *Report* in corresponding sections. Any additional reference sources not cited in each applicable section of this *Report*, if applicable, are disclosed in this section.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

CA RGA LF..... Recovered Government Archive Solid Waste Facilities List

## SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## STANDARD ENVIRONMENTAL RECORDS

### ***Lists of Federal NPL (Superfund) sites***

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 10/20/2021 has revealed that there are 3 NPL sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***Lists of Federal sites subject to CERCLA removals and CERCLA orders***

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains

## EXECUTIVE SUMMARY

data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 10/20/2021 has revealed that there are 3 SEMS sites within approximately 0.5 miles of the target property.

### ***Lists of Federal RCRA facilities undergoing Corrective Action***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2021 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

### ***Lists of Federal RCRA generators***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

EPA ID:: CAP000252080

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 09/13/2021 has revealed that there are 14 RCRA-SQG sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/13/2021 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 08/23/2021 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

### ***Lists of state- and tribal (Superfund) equivalent sites***

CA RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the CA RESPONSE list, as provided by EDR, has revealed that there are 6 CA RESPONSE sites within approximately 1 mile of the target property.

### ***Lists of state- and tribal hazardous waste facilities***

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/22/2021 has revealed that there are 21 CA ENVIROSTOR sites within approximately 1 mile of the target property.

CA CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CA CPS-SLIC list, as provided by EDR, has revealed that there are 12 CA CPS-SLIC sites within approximately 0.5 miles of the target property.

### **Local Lists of Registered Storage Tanks**

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 3 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

## EXECUTIVE SUMMARY

### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/13/2021 has revealed that there are 61 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

CA CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CA CUPA Listings list, as provided by EDR, has revealed that there are 89 CA CUPA Listings sites within approximately 0.25 miles of the target property.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk

## EXECUTIVE SUMMARY

Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 2 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Case Worker: Not reported  
RB Case Number: 03-050  
Local Agency: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S2W16D01f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: 5/20/86 URF filed by Mountain View Fire indicating that fuel hydrocarbons release was discovered by a crew drilling for the installation of a traffic signal. March 1986 6 leak detection and monitoring probes were installed onsite and monitoring of the wells began in August. July 1987 URF filed - free product found in monitoring probes. March 1989 - URF filed waste oil UST removed. September 1987, well BC1 northeast of the tank complex to 20 ft bgs. Feb. 1989 - well E1 installed. May 1989 - USTs were replaced. June 1989 3 new wells; November 1989 replace well BC1 and new well BC5. At this time highest concentrations in groundwater in well BC2 along the northern property boundary.

Summary Details:

Conditions at proposal October 15, 1984): Teledyne Semiconductor has manufactured semiconductors on a 1-acre site in Mountain View, Santa Clara County, California, since 1962. In December 1982, Teledyne reported to the California Regional Water Quality Control Board (CRWQCB) that soil and ground water near an underground storage tank were contaminated with solvents, including trichloroethylene. An investigation in June 1984 revealed that the contaminants had migrated to the north and affected approximately 50 private domestic wells. Local agencies and the company have provided alternative sources of drinking water for the affected residences. About 116,000 people depend on wells within 3 miles of the site as a source of drinking water. The company is working with CRWQCB to determine the extent of the contamination and to develop interim hydraulic controls to prevent further migration of the contaminants. The facility received Interim Status under Subtitle C of the Resource Conservation and Recovery Act (RCRA) when the company filed Part A of a permit application. This is one of 19 sites in the South Bay Area of San Francisco. Facilities at these sites have used a variety of toxic chemicals, primarily chlorinated organic solvents, which contaminate a common ground water basin. Although these sites are listed separately, EPA intends to apply an area-wide approach to the problem as well as take specific action as necessary. Status February 1986): CRWQCB, in conjunction with EPA and the California Department of Health Services, is considering various response actions at the site. This site remains in

proposed status until EPA implements the appropriate elements of its final policy for placing RCRA-related sites on the NPL and then applies the policy to this site. Status July 22, 1987): Subsequent investigation revealed that this site is not subject to the Subtitle C permitting requirements of RCRA. Its score on the Hazard Ranking System, which EPA uses to evaluate sites for the NPL, is above the cutoff point of 28.50, and EPA received no information that prevents placing the site on the NPL. Therefore, it is being placed on the NPL. Teledyne is planning on pumping the contaminated ground water in the upper aquifer to the surface for subsequent treatment.

Summary Details:

Conditions at proposal June 24, 1988): Spectra-Physics, Inc. SP) has manufactured electronic equipment and gas lasers on Terra Bella Boulevard and Middlefield Roads in Mountain View, Santa Clara County, California, since 1961. The 11.5-acre site consists of nine buildings in a light industrial complex. SP uses a variety of cleansers, degreasers, and lubricants in its manufacturing processes, including isopropyl alcohol, acetone, methyl alcohol, trichloroethylene TCE), Freon, 1,1,1-trichloroethane TCA), and Solvasol Solvent 360. In an inspection conducted in 1981, the California Regional Water Quality Control Board CRWQCB) found that areas where hazardous wastes were stored had no dikes or systems to collect leachate; rusty barrels were also found on-site. Ground water investigations began at the SP facility in September 1984 after tests at Teledyne Semiconductor adjacent and downgradient of SP) indicated possible upgradient sources of contamination. The Teledyne site was placed on the NPL in July 1987.) Soil and ground water collected at SP contained TCE, TCA, and 1,2-dichloroethylene. SP's plume of contaminated ground water has merged with Teledyne's and migrated off-site. More than 200 private drinking water wells had been drilled into the 1-square-mile plume. Most wells have been closed; 47 were found contaminated above State Action Levels. The owners now obtain water from municipal water supplies. An estimated 189,000 people obtain drinking water from public and private wells within 3 miles of the site. Teledyne is operating two extraction wells on-site -- one in the shallow one and one in the intermediate one. The wells pump the water to the surface and discharge it to the sanitary sewer; the ground water is not treated before discharge. SP will evaluate the effectiveness of this system in preventing its on-site plume from migrating off-site. Both companies are jointly designing an off-site extraction system. San Francisco Bay 2.5 miles downstream of the site) is used for recreational activities. Permanente Creek is tidally influenced within 1 mile of the site. Several species of birds designated as endangered species by the U.S. Fish and Wildlife Service are found within the area of tidal influence. Status February 11, 1991): In February 1990, SP installed a vapor extraction system to reduce concentrations of contaminants in soil. Under an order issued by CRWQCB, SP conducted a remedial investigation/feasibility study RI/FS) to determine the type and extent of contamination at the site and identify alternatives for remedial action. The RI/FS was completed in December 1990. In February 1991, CRWQCB will adopt a final cleanup and abatement order requiring SP to implement the best remedial alternative evaluated in the RI/FS. This alternative will include expanding the existing soil vapor extraction system and the ground water extraction system. In April 1991, EPA will complete a Record of Decision describing the selected remedy.

Summary Details:

Conditions at proposal June 24, 1988): CTS Printex, Inc., manufactured printed circuit boards on 5.6 acres in Mountain View, Santa Clara County, California, during 1966-85. Printex was incorporated in 1966 and acquired by CTS Corp. in 1981. In the wet-floor building at 1911 Plymouth Street, acid waste water containing copper, lead, and organic wastes containing trichloroethylene (TCE) and other solvents drained to the floor, collected in a sump where they were neutralized with ammonia, and discharged to the Mountain View sanitary sewer. Early in 1985, a consultant to CTS Corp. found high levels of copper and lead in soil near the wet-floor building and high levels of TCE, 1,1,1-trichloroethane, and 1,1-dichloroethylene in monitoring wells downgradient of the site. An estimated 189,000 people obtain drinking water from municipal wells within 3 miles of the site. Permanente Creek borders the site. Surface water drainage eventually discharges to San Francisco Bay 2.5 miles to the north. Late in 1985, the company excavated the sump area and filled it in, decontaminated the building, and transported waste materials to a hazardous waste facility regulated under Subtitle C of the Resource Conservation and Recovery Act (RCRA). In October 1986, the California Department of Health Services certified closure of the facility. In an attempt to stop migration of contaminated ground water off-site, the company is pumping the water and discharging it to Mountain View's sanitary sewer system under a city permit. The company continues to monitor to define the plume of contaminated ground water. In March 1987, the California Regional Water Quality Control Board (CRWQCB) issued a Cleanup and Abatement Order requiring the company to be more expeditious and thorough in its cleanup and set a schedule for various on- and off-site tasks. Status February 21, 1990): CTS Printex is conducting a remedial investigation/feasibility study (RI/FS) to determine the type and extent of contamination at the site and identify alternatives for remedial action. In November 1989, CRWQCB received the first draft of the RI/FS for review. The final draft is scheduled to be submitted in late 1990.

**Environmental Interest/Information System:**

California Department of Toxic Substances Control EnviroStor System (DTSC-EnviroStor) is an online search and Geographic Information System (GIS) tool for identifying sites that have known contamination or sites for which there may be reasons to investigate further. The EnviroStor database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites.

**SUPERFUND NPL**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Case Worker: Not reported  
RB Case Number: Not reported  
Local Agency: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S2W16D03f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Waste Oil / Motor / Hydraulic / Lubricating  
Site History: 1987 - 500-gal. waste oil UST removed. 108.2 ppm VOCs by 8020 in soil sample collected at 7 ft bgs - analytical report not found in file. No TOG or TPH analysis done. Additional 2 ft soil was removed from the tank pit and aerated onsite. Total volume of soil removed was not reported and disposition of tilled soil was not reported. 1991 - 1 well installed and 1 boring advanced. 1994 - two additional wells installed and 3 additional borings. Contamination appears to be gasoline. This property is located adjacent to and downgradient of Former Arco 2010, 2110 Old Middlefield Road, which is also a fuel leak case. January 1997 settlement agreement between Silver and Arco, who will take over all corrective action and remediation at both properties. Arco has been monitoring the site wells since 10/97.

LUST:

Name: AWARD SERVICES/CV MOUNTAIN VIEW  
Address: 827 N RENGSTORFF AVE  
City,State,Zip: MOUNTAIN VIEW, CA 94043  
Lead Agency: SANTA CLARA COUNTY LOP  
Case Type: LUST Cleanup Site  
Geo Track: [http://geotracker.waterboards.ca.gov/profile\\_report.asp?global\\_id=T0608500203](http://geotracker.waterboards.ca.gov/profile_report.asp?global_id=T0608500203)  
Global Id: T0608500203  
Latitude: 37.4153342183528  
Longitude: -122.092416286469  
Status: Completed - Case Closed  
Status Date: 11/02/2012  
Case Worker: Not reported  
RB Case Number: 10-090  
Local Agency: Not reported  
File Location: All Files are on GeoTracker or in the Local Agency Database  
Local Case Number: 06S2W16C02f  
Potential Media Affect: Other Groundwater (uses other than drinking water)  
Potential Contaminants of Concern: Gasoline  
Site History: Leak detection monitoring wells installed in 1986 indicated groundwater contamination. The USTs were coated with fiberglass in 1988 and subsequently tested tight. 3 months later, the USTs were removed. During removal, some product sheen was observed in the tank pit. However dissolved concentrations declined in the wells after the tanks were recoated and removed, indicating that the source of contamination had been removed. The fuel leak case was closed on 5/25/95. In February 2012, a subsurface investigation was conducted for a possible real estate transaction. Soil and grab groundwater samples reported the presence of petroleum hydrocarbons. The responsible party choose to conduct additional soil removal at the site to reduce the residual contamination onsite. The case was re-opened in April 2012. Soil was excavated and groundwater was extracted from the pits onsite. Excavations were backfilled with imported fill.

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Violation Date: 04-02-2019  
Citation: 22 CCR 12 66262.34(e) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(e)  
Violation Description: Failure to meet the following conditions of satellite accumulation regulations: G Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. G Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accumulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. G The generator complies with section 66265.171, 66265.172, and 66265.173(a). G The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words G Hazardous WasteG including specified information G Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a G 90 dayG accumulation area G 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated  
Violation Notes: Returned to compliance on 04/03/2019. Observed 3 mobile used oil carousels that were incompletely labeled. One carousel had a faded label, the other two did not have the hazardous contents marked on the container labels.

CERS Description: Chemical Storage Facilities

Violations:

Site ID: 25311  
Site Name: Carbahn Autoworks  
Violation Date: 11-21-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)  
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.  
Violation Notes: Observed the following containers with missing or incomplete hazardous waste labels: 1) 1 x 500 gal tank with a hazardous waste label missing the accumulation start date 2) 2 x 55 gal steel drums with waste coolant - 1 x 55 gal steel drum missing the physical state and hazardous properties - 1 x 55 gal steel drum missing the accumulation start date, physical state and hazardous properties 3) 4 x 30 gal steel rollers observed on the shop floor missing all required markings 4) 4 x 5 gal plastic buckets filled with various amounts of used oil in the hazardous waste storage area missing all required markings 5) 1 x 55 gal steel drum paper filter waste marked as "Drained Used Oil Filters", however the contents of the drum were majority paper filter waste with ~3 metal cased oil filters Hazardous waste labels were provided to Mr. Montes during this inspection.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 25311  
Site Name: Carbahn Autoworks  
Violation Date: 11-21-2019  
Citation: 40 CFR 1 262.34(d)(5)(ii) - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 262.34(d)(5)(ii)  
Violation Description: Failure to post the following information next to the telephone: (A) The name and telephone number of the emergency coordinator; (B) Location of fire extinguishers and spill control material, and, if present, fire alarm; and (C) The telephone number of the fire department, unless the facility has a direct alarm.  
Violation Notes: No emergency posting could be observed during this inspection. An emergency response posting template was provided to Mr. Montes.

however the contents of the drum were commingled paper filter waste along with ~3 metal cased oil filters. Mr. Montes was not able to determine at the time of this inspection whether drained metal cased oil filters are sent for recycling or managed as a fully regulated hazardous waste. Additionally, no bills of lading could be reviewed demonstrating that drained used oil filters were being sent for metals recycling. If managed as a fully regulated hazardous waste, the drum containing the commingled containers should have all required markings for hazardous waste, and not be labeled as "Drained Used Oil Filters". If drained used oil filters are sent for metals recycling, they must be fully drained, kept in a separate, closed container labeled with the words "Drained Used Oil Filters" and an accumulation start date, and managed within 1 year of the accumulation start date.

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11

Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.

Violation Notes: Observed 1 x 55 gal red steel drum in the hazardous waste storage area with a hazardous waste label with no information filled in indicating the contents of the drum. Contents of the drum could not be determined at the time of this inspection. Make a hazardous waste determination on the contents of the drum, and if determined to be hazardous, manage as hazardous waste immediately.

Violation Date: 11-04-2015  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 11/10/2015. 1 x 500 gallon used oil tank in back of shop did not have accurate accumulation start date marked. 2 x 55 gallon waste coolant drums in back of shop did not have hazardous waste labels with legible detail information marked.

Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 25311  
Site Name: Carbahn Autoworks  
Violation Date: 11-21-2019  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Observed 4 x 5 gal plastic buckets filled with various amounts of used oil with no lids perched on the used oil collection tank located in the hazardous waste storage area which is kept in an outside enclosure. The outside location, lack of secondary containment, and open containers create a situation of increased risk of unplanned release of used oil to the environment.

requires modification to any portion of the business plan.  
Violation Notes: Update the hazardous materials business plan to properly reflect the chemicals stored on site.  
Violation Division: Mountain View Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

Site ID: 25311  
Site Name: Carbahn Autoworks  
Violation Date: 11-21-2019  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Upon manifest review, one pick up of waste antifreeze was observed occurring on 7/15/19, however no pickups have occurred prior to that date in all consolidated manifests reviewed up until the beginning of 2017. Observed 2 x 55 gal steel drum of waste antifreeze, one with a label indicating the accumulation start date as 7/15/19, consistent with the date of pick up. However, the second drum was labeled with an accumulation start date of 2/11/16. Lack of hazardous waste antifreeze pick ups prior to July of 2019 and container labeling indicate that facility accumulated hazardous waste antifreeze on-site for longer than the accumulation time limit of 180 days.

Eval Type: Routine done by local agency  
Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is an auto repair shop with 8 service bays, which handle a variety of auto repair services. Facility generates used oil, waste antifreeze, used oil filters, spent parts washer fluid (water & oil), and spent absorbent. Facility also generates and manages scrap metal, batteries, and reusable soiled textile material (i.e. contaminated rags).A walkthrough of the shop floor, outside hazardous waste storage area, and dumpsters was conducted during this inspection with Manager Steve Montes. The outside hazardous waste storage area is kept in a locked enclosure with a roof, preventing intrusion of rainwater. Facility maintains one large parts washer in the outside enclosure, and 3 parts

Violations:

Site ID: 124789  
Site Name: IsraelG s Tire & Alignment  
Violation Date: 07-30-2019  
Citation: 40 CFR 1 265.35 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.35  
Violation Description: Failure to maintain aisle space to allow the unobstructed movement of personnel, fire protection equipment, spill control equipment, and decontamination equipment to any area of facility operation in an emergency, unless aisle space is not needed for any of these purposes.  
Violation Notes: Observed several areas of the facility where access to waste collection containers and other areas is obstructed due to debris, including but not limited to 1 x 55 gal steel drum with used oil, and 1 x 5 gal bucket of paper oil filters  
Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 124789  
Site Name: IsraelG s Tire & Alignment  
Violation Date: 07-30-2019  
Citation: 22 CCR 16 66266.81(a)(4)(B) - California Code of Regulations, Title 22, Chapter 16, Section(s) 66266.81(a)(4)(B)  
Violation Description: Failure to retain for at least three years a legible copy of each manifest or bill of lading which identifies spent lead-acid storage batteries shipped to a person who stores the batteries or who uses, reuses, recycles or reclaims the batteries or their components.  
Violation Notes: At the time of this inspection, 10 spent lead-acid batteries were observed stored at the facility, however Mr. Virgen could not provide 3 years of records recording the shipment of the spent lead-acid batteries. Record all shipments of automotive type lead-acid batteries and keep records for 3 years for review

Site ID: 124789  
Site Name: IsraelG s Tire & Alignment  
Violation Date: 07-30-2019  
Citation: HSC 6.5 25144.6 (b) - California Health and Safety Code, Chapter 6.5, Section(s) 25144.6 (b)  
Violation Description: Failure to properly manage reusable soiled textile materials prior to being sent for laundering.  
Violation Notes: Observed one step can with what appeared to be soiled contaminated rags on the shop floor. When asked how Mr. Virgen manages these soiled rags, he informed me that he previously used Mission Linen as a vendor for laundering the rags, however he has stopped using them. When asked how he currently manages the rags, he indicated that he washes them on-site for reuse. Mr. Virgen was informed that in order for the rags to be managed as exempt "reusable soiled textile materials" they must meet the below requirements, including being sent to an authorized commercial laundry facility. Cease the laundering of the rags and either meet the below requirements or begin managing as hazardous waste.

Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.  
Violation Notes: According to Mr. Virgen, he uses absorbent for oil spills during the course of his work. He collects the absorbent in buckets and reuses the absorbent until it is spent, at which point he will dispose of the used absorbent in the municipal garbage. Make a hazardous waste determination based on generator knowledge or analytical testing on the used absorbent, and if determined to be hazardous begin managing as hazardous waste.

Violation Notes: As per Mr. Virgen, he collects automotive type lead acid batteries from jobs, as well as through his personal projects of refurbishing cars. When asked how these are managed, he explained that he will use a voltage testing device to determine if the battery is still good, and either resell or exchange for cores, while the ones that fail are either exchanged for the core or given to the people who pick up his scrap metal. Immediately cease the transfer of automotive type lead-acid batteries for disposal as scrap metal

**Violations:**  
Site ID: 52817  
Site Name: nSymbio, Inc.  
Violation Date: 06-16-2016  
Citation: 22 CCR 12 66262.34(d) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(d)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Returned to compliance on 06/28/2016. Observed 1 x 55 gallon drum of waste oily soilds/debris with a start date of 12/15/11. Your accumulation time limit as a small quantity generator is 180 days.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS  
  
Site ID: 52817  
Site Name: nSymbio, Inc.  
Violation Date: 06-16-2016  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.  
Violation Notes: Returned to compliance on 06/28/2016. Observed free flowing amounts of waste imaging oil on top of 1 x 55 gallon drum of waste imaging oil. Observed 4 spent oily water filters on the floor in the waste accumulation area. Ensure that facility is maintained in a manner to minimize the possibility of a release to the environment.

Eval General Type: Compliance Evaluation Inspection  
Eval Date: 06-16-2016  
Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On site to conduct a routine hazardous waste inspection. Inspection conducted with Jeffery Higbee of HMCD. Facility is a printing shop that uses HP Indigo printing machines and has one offset printing machine. Observed the following wastes on site: 1 x 55 gallon drum of waste imaging oil 1 x 55 gallon drum of waste oily solids/debris Fire extinguishers have had annual maintenance Spill control is available on site Container areas are inspected weekly Employees are thoroughly familiar with hazardous waste management Disposal receipts were reviewed for used imaging oil and oily solids/debris EPA ID# CAL000262087 is active Unresolved issue: Currently, there are unknown management practices for spent oily water filters from the HP Indigo machines. Owner is looking into best managing practices for spent oily water filters and to respond to HMCD within 30 days. Issue resolved 8/10/16: The imaging oil used in the HP Indigo machine is a petroleum hydrocarbon [Truncated]

**Violations:**

Site ID: 147717  
Site Name: RichG s Tires Inc.  
Violation Date: 04-22-2019  
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)  
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.  
Violation Notes: Returned to compliance on 07/01/2019. Two consolidated manifests were reviewed at the time of inspection, including one waste pickup for 10 gallons of waste antifreeze and 80 gallons of used oil on 3/18/2016, and one waste pickup for 40 gallons of waste antifreeze and 250 gallons of used oil on 11/07/2018. According to Mrs. Orozco, these are the only two pickups that have happened since 2016, to her knowledge. Based on the provided information, facility has exceeded the accumulation time limit of 180 days. Ensure that all hazardous waste is being picked up within 180 days of initial generation.

Violation Description: Chapter 1, Section(s) 265.201(c)(3)  
Failure to inspect hazardous waste tanks at least once each operating day for the following, when present: (1) Discharge control equipment (e.g., waste feed cutoff systems, by-pass systems, and drainage systems) to ensure that it is in good working order; (2) Data gathered from monitoring equipment (e.g., pressure and temperature gauges) to ensure that the tank is being operated according to its design; (3) The level of waste in the tank.

Violation Notes: Returned to compliance on 07/01/2019. According to facility mechanic Danilo, through interpretation from Mrs. Orozco, the tanks are being inspected approximately once a month. Ensure that hazardous waste tanks are being inspected daily to detect any corrosion or release of waste, and the construction materials and the area immediately surrounding the externally accessible portion of the tank system, including the secondary containment system to detect erosion or signs of releases of hazardous waste.

Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31

Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.

Violation Notes: Returned to compliance on 07/01/2019. Observed an unknown liquid that Mrs. Orozco stated was rainwater contaminated with antifreeze and used oil in the secondary containment structure holding 1 x 30 gal steel drum of used oil filters and 1 x 55 gal steel drum of waste antifreeze. The contaminated rainwater filled the secondary containment structure approximately halfway. Maintain and operate the facility in such a way to prevent liquid from accumulating in the secondary containment structures that are holding hazardous waste containers. Ensure that contaminated rainwater is being properly managed as hazardous waste. Observed an orange secondary containment structure with a draining tray laid atop the opening with several used oil filters left on top to drain. According to Mrs. Orozco, and through limited observation, two half drums are underneath the draining tray inside of the secondary containment to collect the used oil. Ensure that used oil filters are drained in a manner to preclude used oil from [Truncated]

Citation: Un-Specified  
Violation Description: Business Plan Program - Administration/Documentation - General Local Ordinance

Violation Notes: Location: This facility is currently operating without a hazardous materials permit which expired on 5/1/2020. In order to return to compliance you must complete the following objective: Option 1 1. Pay the hazardous materials permit fees for the 2020/2021 permit cycle. Please contact me if you need a copy of the invoice. 2. Update and certify the hazardous materials business plan in CERS. Please contact my office if you need assistance with this step. Option 2 1. Complete a hazardous materials closure application and submit it to our office.

Violation Date: 08-27-2019  
Citation: HSC 6.5 25144.6 (b) - California Health and Safety Code, Chapter 6.5, Section(s) 25144.6 (b)

Violation Description: Failure to properly manage reusable soiled textile materials prior to being sent for laundering.

Violation Notes: Returned to compliance on 10/22/2019. According to facility mechanic, rags that have been contaminated with used oil but are not heavily soaked as to release free liquid are given to a neighboring facility who contracts with Aramark for laundering. Clean rags are obtained from the same facility. No paperwork could be produced to indicate that oil contaminated rags generated at this facility are laundered by an authorized commercial laundry, due to the fact that the neighboring facility is the entity that contracts with Aramark. Begin managing all oil contaminated rags as hazardous waste or contract directly with a commercial laundry and retain receipts indicating that oil contaminated rags generated at this facility are laundered by an authorized commercial laundry.

Eval Notes: On-site to conduct a routine hazardous waste inspection. Facility is a two man auto repair shop that performs typical auto repair activities and generates used oil, waste coolant, drained used oil filters, paper filters, lead-acid battery cores, and hazardous waste contaminated rags. An inspection of the hazardous waste storage area, walkthrough of the shop floor, and review of consolidated manifests was conducted during this inspection. Notes: Fire extinguishers are observed as maintained Absorbent is provided for spill control. Facility has not had to use absorbent material as of the time of this inspection. Proper disposal of saturated absorbent material was discussed at the time of inspection. Emergency Response posting was observed in the back office area Mr. Takahashi and facility mechanic are trained on hazardous waste management Inspections of the hazardous waste storage area are conducted daily Scrap metal is recycled daily Observed a small pile of [Truncated]

Eval General Type: Other/Unknown  
Eval Date: 09-09-2019  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: On-site to conduct a follow up inspection and consultation regarding violations issued on the Notice of Inspection issued on 8/27/2019. Noted the following items as corrected: G053: Consolidated Manifesting: Receipt Retention - Mr. Takahashi provided consolidated manifest receipts for 2018, 2017, 2016. All consolidated manifests were observed to be complete and consistent with the facility's generator status. Approximately 110 gallons of Used Oil are disposed of every 1-2 months. Drained Used Oil Filters are disposed of approximately once per year. Waste coolant is disposed of in intervals greater than 1 year. Ensure that the accumulation start dates note the date the first drop of waste was added to the container, and ensure that wastes are picked up 180 days after the accumulation start date, or up to 1 year if operating under point of generation rules G020: Marking of Hazardous Waste - The following containers were observed with completed hazardous waste labels [Truncated]

Violations Found: Yes  
Eval Type: Routine done by local agency  
Eval Notes: On-site with Mickey Pierce of HMCD to perform a routine Hazardous Waste Generator inspection. MB Repair has been in operation at this location for about 2 years. Per Owner Elliott Dan, MB Repair does primarily diagnostic work Service work is also done infrequently along with brake flushes. A walk-through of the facility was conducted. The following hazardous waste streams were observed: - Used Oil: 1 x 120 gal tank + 3 mobil rollers - Used Oil Filters (both metal and paper): 1 x 5 gal bucket EPA ID: CAL00042051i is inactive. Saw dust and rags are available for spill control. Shop towels are commercially laundered by Aramark. Battery core exchanges are done with Worldpac. Mr. Dan is the only employee and is trained in hazardous waste management. Inspections of the hazardous waste storage areas are done at least weekly. Aerosols are disposed of in the trash only when completely empty. Mr. Dan has a small rolling container of antifreeze which he stated he is [Truncated]

**Violations:**

Site ID: 132390  
Site Name: Magnussen Toyota of Mountain View  
Violation Date: 07-31-2013  
Citation: 22 CCR 15 66265.195(a) - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.195(a)  
Violation Description: Failure of the owner or operator to conduct inspections and maintain inspection records at the facility of the following tank equipment: 1) Overfill/spill control equipment (e.g., waste-feed cutoff systems, bypass systems, and drainage systems) to ensure that it is in good working order; 2) The aboveground portions of the tank system, if any, to detect corrosion or releases of waste; 3) Data gathered from monitoring equipment and leak-detection equipment, (e.g., pressure and temperature gauges, monitoring wells) to ensure that the tank system is being operated according to its design; 4) The construction materials and the area immediately surrounding the externally accessible portion of the tank system including secondary containment structures (e.g., dikes) to detect erosion or signs of releases of hazardous waste (e.g., wet spots, dead vegetation); and 5) For uncovered tanks, the level of waste in the tank, to ensure compliance with section 66265.194(b)(3).  
Violation Notes: Tank inspections are not being logged daily. Inspections are being logged weekly since 6/24/13.  
Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 132390  
Site Name: Magnussen Toyota of Mountain View  
Violation Date: 11-23-2015  
Citation: HSC 6.67 Multiple - California Health and Safety Code, Chapter 6.67, Section(s) Multiple  
Violation Description: APSA Program - Administration/Documentation - General  
Violation Notes: Returned to compliance on 12/18/2015. Section 1 of the plan does not identify storage of up to 220 gallons of 0W20 synthetic oil noted onsite during the inspection.  
Violation Division: Santa Clara County Environmental Health

Violation Description: Failure to properly dispose of hazardous waste at an authorized location.

Violation Notes: Returned to compliance on 12/18/2015. Facility is mixing paper cartridge and metal cased used oil filters and managing the mixed filter waste under the reduced management standards for "drained used oil filters". In order to quality for the reduced management standards, filters must be eligible to be recycled for their metal content. Cartridge type filters noted did not meet this criteria. IMMEDIATELY BEGIN SEGREGATING CASED AND UNCASED FILTERS, AND MANAGE UNCASED FILTERS AS "OILY DEBRIS", SUBJECT TO FULL HAZARDOUS WASTE LABELING AND APPLICABLE STORAGE TIMES (180 DAYS).

Eval Program: APSA  
Eval Source: CERS

Eval General Type: Other/Unknown  
Eval Date: 04-11-2019  
Violations Found: No  
Eval Type: Other, not routine, done by local agency  
Eval Notes: On-site with Chris Hansen to determine the permit status of the facility. Facility has removed all petroleum tanks and is now using the site only for parking vehicles. Facility no longer requires permits for aboveground petroleum storage. Permit will be inactivated. Observed small amounts of hazardous waste oily rags and oily solids where tanks used to be, some waste coolant in the remaining coolant tank, and oily water in the parts washer still on-site. Once disposal of these wastes is complete, forward disposal receipts to HMCD office for review. At that time, hazardous waste permit for this site will also be inactivated.

Site Name: MOUNTAIN VIEW BODY SHOP INC  
Violation Date: 04-18-2019  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.  
Violation Notes: Returned to compliance on 05/17/2019. Observed pooling of liquid atop 1 x 55 gal drum of waste antifreeze and 1 x 55 gal drum of used oil. According to Mr. Mota, waste automotive fluids are collected in drip pans and then immediately transferred to the collection drums located in the outside yard of the facility. Ensure that wastes are being transferred in a manner to minimize the possibility of spillage.

Violation Date: 04-18-2019  
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.  
Violation Notes: Returned to compliance on 05/20/2019. Observed a container with various refuse along with what observed to be oily cardboard. When asked, Mr. Mota indicated that this container was to hold waste for ultimate disposal in the municipal garbage. As per Mr. Mota, the oily cardboard was generated from maintenance activities on the car lifts in the back of the facility. Additionally, Mr. Mota indicated that absorbent is provided on-site for oil spills, but no collection container was observed for used absorbent. Make a hazardous waste determination on the oily solids using generator knowledge or analytical testing and if determined to be hazardous, manage as hazardous waste. Observed 1 x 55 gal drum with solid dust/debris waste containing a hazardous waste label labeled as "flammable solids". When asked about this waste stream, Mr. Mota explained to me that this drum typically contained paint booth filter waste before they had done analytical testing to determine that the paint booth filters are

Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7  
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.

Violation Notes: Returned to compliance on 05/17/2019. Observed a paint cup in the trash can with a half-inch thick layer of partially solidified base coat. When asked how paint cups are typically managed, the employee in the paint mix area explained that base coats and sealants are typically kept in order to reuse as touch-up paint or for other vehicles, and when paint is no longer needed, it is poured into the drum containing waterborne paint waste. Ensure that all paint cups are free of all pourable and scrapable material before being disposed of in the garbage.

Eval Notes: On-site with Hazardous Materials Specialist Ana Bui to conduct a routine hazardous waste inspection. Facility is a body shop consisting of two paint booths, prep area, and 6 service bays. Wastes generated by this facility include used oil and waste antifreeze drained from cars to be serviced, waterborne paint waste, and solvent waste generated from paint gun cleaning activities. Facility generates paint booth filters and has performed analytical for CAM-17 metals, indicating that the metal content falls below hazardous waste thresholds. Copies of the analytical report were provided at the time of inspection. Facility currently manages paint booth filters by disposing in the municipal garbage. Facility has one gun cleaning station using flammable solvents, the waste is collected in a small 5 gallon bucket with a hazardous waste label. A small station was observed next to the gun cleaning station, according to Mr. Mota, the cleaned guns are blasted with air, and any [Truncated]

Violation Date: 04-18-2019  
Citation: 40 CFR 1 265.31 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.31  
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.  
Violation Notes: Returned to compliance on 05/17/2019. Observed pooling of liquid atop 1 x 55 gal drum of waste antifreeze and 1 x 55 gal drum of used oil. According to Mr. Mota, waste automotive fluids are collected in drip pans and then immediately transferred to the collection drums located in the outside yard of the facility. Ensure that wastes are being transferred in a manner to minimize the possibility of spillage.

Site Name: MOUNTAIN VIEW BODY SHOP INC  
Violation Date: 04-18-2019  
Citation: 22 CCR 12 66262.11 - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.11  
Violation Description: Failure to determine if wastes generated are hazardous waste by using generator knowledge or applying testing method.  
Violation Notes: Returned to compliance on 05/20/2019. Observed a container with various refuse along with what observed to be oily cardboard. When asked, Mr. Mota indicated that this container was to hold waste for ultimate disposal in the municipal garbage. As per Mr. Mota, the oily cardboard was generated from maintenance activities on the car lifts in the back of the facility. Additionally, Mr. Mota indicated that absorbent is provided on-site for oil spills, but no collection container was observed for used absorbent. Make a hazardous waste determination on the oily solids using generator knowledge or analytical testing and if determined to be hazardous, manage as hazardous waste. Observed 1 x 55 gal drum with solid dust/debris waste containing a hazardous waste label labeled as "flammable solids". When asked about this waste stream, Mr. Mota explained to me that this drum typically contained paint booth filter waste before they had done analytical testing to determine that the paint booth filters are non-hazardous. Violation Date: 04-18-2019  
Citation: 22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7  
Violation Description: Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.  
Violation Notes: Returned to compliance on 05/17/2019. Observed a paint cup in the trash can with a half-inch thick layer of partially solidified base coat. When asked how paint cups are typically managed, the employee in the paint mix area explained that base coats and sealants are typically kept in order to reuse as touch-up paint or for other vehicles, and when paint is no longer needed, it is poured into the drum containing waterborne paint waste. Ensure that all paint cups are free of all pourable and scrapable material before being disposed of

Eval Notes: On-site with Hazardous Materials Specialist Ana Bui to conduct a routine hazardous waste inspection. Facility is a body shop consisting of two paint booths, prep area, and 6 service bays. Wastes generated by this facility include used oil and waste antifreeze drained from cars to be serviced, waterborne paint waste, and solvent waste generated from paint gun cleaning activities. Facility generates paint booth filters and has performed analytical for CAM-17 metals, indicating that the metal content falls below hazardous waste thresholds. Copies of the analytical report were provided at the time of inspection. Facility currently manages paint booth filters by disposing in the municipal garbage. Facility has one gun cleaning station using flammable solvents, the waste is collected in a small 5 gallon bucket with a hazardous waste label. A small station was observed next to the gun cleaning station, according to Mr. Mota, the cleaned guns are blasted with air, and any [Truncated]

Violation Date: 09-23-2020  
Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Violation Date: 09-23-2020  
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)

Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.

**SALGA2 COMPLETE AUTO REPAIR (Continued)**

**S121774581**

Violation Description: Failure of the leak detection equipment to be installed, calibrated, operated, and/or maintained properly.

Violation Notes: Returned to compliance on 12/01/2017. Waste oil remote fill line secondary is not being monitored.

Violation Division: Mountain View Fire Department

Violation Program: UST

Violation Source: CERS

Site ID: 397911

Site Name: Mountain View Valero #7542

Violation Date: 09-18-2018

Citation: 23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)

Violation Description: Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.

Violation Notes: Returned to compliance on 03/29/2019. The Diesel annular space sensor was placed and the installation was done improperly. The sensor no longer goes back into the annular space. The secondary piping is not being monitored between dispensers 1/2 and 3/4 because the penetration boots are on. Remove the penetration boots or remove the valve and point the valve towards the bottom of the sump.

Violation Source: CERS

Site ID: 397911

Site Name: Mountain View Valero #7542

Violation Date: 09-23-2019

Citation: HSC 6.7 25284.2 - California Health and Safety Code, Chapter 6.7, Section(s) 25284.2

Violation Description: "Failure to meet one or more of the following requirements: Install or maintain a liquid-tight spill container. Have a minimum capacity of five gallons. Have a functional drain valve or other method for the removal of liquid from the spill container. Be resistant to galvanic corrosion. Perform a tightness test at installation, every 12 months thereafter, or within 30 days after a repair to the spill container. Tested using applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Tested by a certified UST service technician. Maintain records of spill containment testing for 36 months. "

Environmental Interest/Information System:  
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**CERS:**

Name: CAR WEST COLLISION  
Address: 2400 OLD MIDDLEFIELD WAY  
City,State,Zip: MOUNTAIN VIEW, CA 94043  
Site ID: 571953  
CERS ID: 10350205  
CERS Description: Chemical Storage Facilities

**Violations:**

Site ID: 571953  
Site Name: Car West Collision  
Violation Date: 07-03-2018  
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit hazardous material inventory information for all reportable hazardous materials on site at or above reportable quantities.

Violation Notes: Returned to compliance on 01/03/2019. Location: Update annual waste production amounts, add detergents and degreasers to inventory

Violation Division: Mountain View Fire Department  
Violation Program: HMRRP  
Violation Source: CERS

Site ID: 571953  
Site Name: Car West Collision  
Violation Date: 03-19-2015  
Citation: HSC 6.5 Multiple Sections - California Health and Safety Code, Chapter 6.5, Section(s) Multiple Sections

Violation Description: Haz Waste Generator Program - Operations/Maintenance - General  
Violation Notes: 1 x 30 gallon drum of used oil was open, no cap. 1 x 30 gallon drum of waste coolant was open, no cap.

Violation Division: Santa Clara County Environmental Health  
Violation Program: HW  
Violation Source: CERS

Site ID: 571953  
Site Name: Car West Collision  
Violation Date: 09-09-2019  
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 10/03/2019. Observed 1 x 30 gal steel drum with a "Non-Hazardous Waste" label identifying the contents as paper filter waste. Ensure that all hazardous waste containers are marked with the words "Hazardous Waste", along with all other required information listed below Observed 1 x 55 gal steel drum with paint cup waste, and empty containers under a drum compactor in the paint and prep area with no hazardous waste label. According to General Manager Brent Tiernan, the paint gun cleaner has two carboys for each cleaning process. One process cleans waterborne paint. One carboy contains clean water, and one contains the contaminated water, which is collected and disposed of in the waterborne paint waste collection container. A similar process is employed for solvent based paint

waste antifreeze, drained used oil filters and paper filter waste. Facility maintains one spray booth, and disposes of paint booth filters on a weekly basis in the municipal garbage. A hazardous waste determination was made on the paint booth filters using analytical testing on 7/31/19 and the results were reviewed at the time of this inspection. A walkthrough of the paint and prep area, paint mixing area, staging and detail area, and frame and body area were conducted. Facility maintains manifests for both this location, as well as the sister location managed by the same General Manager located at 2171 Old Middlefield. Notes: State [Truncated]

Environmental Interest/Information System:

AIR EMISSIONS CLASSIFICATION UNKNOWN  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
